* The Matrix: Neo attempts to escape the agents during a bleary post-hacking morning at work, all the while taking the mysterious instructions over the phone he's just received in a FedEx package, though he eventually chickens out rather than risk a narrow ledge along the outside of the skyscraper.
* The Matrix, Neo can fly and stop bullets with his mind. You'd think he'd be able to do more stuff (like disarming enemies), but apart from one scene where he pulls some weapons from across the room, stopping bullets seems to be it.
* The Matrix, Neo jumps from a chopper to grab Morpheus as he jumps out of a skyscraper window. He doesn't try to pull him up, however (as he is dangling on a rope attached to the chopper himself at that moment), but maintains the hand-grip until he can safely drop Morpheus onto a nearby roof.
* The Matrix- Neo kicks Agent Smith in the face, breaking his sunglasses. Agent Smith does not look happy.
* The Matrix. Neo likely understood the words in a computing context, being a hacker, but outside that had trouble figuring out where they would apply.
* The Matrix. Neo used a Nokia 8110. While the film prop version had been modified by the film's production crew to have its keypad cover spring-loaded, the retail model did not have this function. In response, the Nokia 7110 was later released, with a spring-loaded cover inspired by the film.
* The Matrix: Neo versus the new Agents. Later, Neo versus the Merovingian's goons.
* The Matrix, Neo was picked up by Trinity and the others under the Adams Street bridge.
* The Matrix. Not only are Agents ridiculously powerful and ridiculously hard to kill, but if you do manage to kill one, all the Agent needs to do is find another human to possess in order to continue trying to take you down. There's a reason that standard Resistance procedure before Neo came along was to "run your ass off" when an Agent showed up.
* The Matrix, of course — rather than spend time actually learning Kung Fu, Neo just has it uploaded directly into his brain. Voila, I know kung fu! At various other points in the series, other characters also get instant uploads of useful skills, such as flying a helicopter, or hotwiring a motorbike. The second is gently spoofed when, before Trinity can be given the hotwiring skills, the Keymaker simply gives her the right key to turn on the bike.
* The Matrix of the blue-pill/red-pill without being fully informed what taking the "rabbithole" pill actually entails, and with Agent Smith pointing out that humanity has a biological niche closely akin to a virus, and has indeed devastated the planet; humans had even, by Morpheus' own admission, "scorched the sky" to blacken out the sun to try to destroy the robots that they themselves created, and the robots tried to make a functional solution to that problem that still allowed the humans to survive and even be reasonably happy.
* The Matrix on how humans are viruses because they don't instinctively develop an equilibrium with their environment like other mammals and instead breed until they can't support themselves. In reality, animals do not instinctively find an equilibrium with their environment; it's forced upon them by outside factors. We see invasive species of animals run rampant in new ecosystems all the time. The only difference with humans is that we have the power to push past most opposing environmental limitations. On the other side, there are plenty of viruses that can

inhabit a person but not kill them and form their own equilibrium, like many of those diseases that never really leave your system but also don't cause major symptoms.
* The Matrix Online about his current status. (Alive? Dead? Reincarnated? Assimilated by the Machines? The world may never know.)
* The Matrix Online filled with giant eyes, all looking down on players in random orientations.
* The Matrix Online has a long-running example of this trope in the form of "Hack the Ground Smash". The rumor states that using a fake ability called "Hack the Ground Smash" at a certain location will cause the ground to break away, and you'll fall into "Morpheus' secret hideout" where Neo and/or Morpheus are waiting for you. The fake ability apparently has its roots in a very, very old video of the game during its pre-beta days which shows a player using a Hacker ability that involves smashing an energy-charged fist into the ground. This ability never made it into the live game.
* The Matrix Online it. Morpheus was unwilling to admit it and staged terrorist attacks with the end goal of crashing the entire thing; he was left to do it largely alone, with even Zion distancing itself from him.
* The Matrix Online, safeguards have apparently been put into place that when a redpill is killed in the Matrix, an emergency switch jacks them out of the Matrix, forcing them to re-enter at a hardline after some recovery time.
* The Matrix Online's storyline, not only do large numbers of humans in the real world take up permanent residence in large hover barges, some choose to work for the Machines. As the storyline progressed, Zion and the Machines were embroiled in a cold war where the Machines worked to suppress Zion's recruitment efforts in secret and Zion was preparing for another war. It's very likely that, had the game not been shut down, future story arcs would have explored a second war between the Machines in Zion - one where Zion now has a way of causing real harm to the Matrix and the Machines who are dependent on it for survival.
* The Matrix Online, there's a group of people called "Cypherites" who argue that Cypher was right and that Neo and the people of Zion had no right to decide for the rest of humanity. After all, who would want to live in a dead, post-apocalyptic world that humans themselves were largely responsible for?
* The Matrix on that seemingly ironclad detail: on the off chance that he does not exist, then that means he cannot exist in the capacity of being wrong.
* The Matrix opening scene, which didn't rain, but did change characters, and flowed across the screen. Note that these characters were a machine-code translation of the English-language credits into which they transformed.
* The Matrix - originally a guardian AI in a simulated reality, he becomes something akin to a computer virus.
* The Matrix originally had the headbutts cut out of it in the UK version; however, the uncut version with headbutts intact was passed with a '15' certificate in 2006.
* The Matrix: Path of Neo, after the enemy is knocked into a kneeling position, Neo raises the sword above his head before bringing it down.
* The Matrix: Path of Neo, all the Asian characters speak perfect English except for the fact that they have accents.
* The Matrix: Path of Neo and gets set straight on who the metaphorical demon is.
* The Matrix: Path of Neo are ready to do this, until you help her free herself.
* The Matrix: Path of Neo as no matter how enemies get shot, stabbed or blown up their bodies disintegrate back into the Matrix's code. The only time you see any blood is during the in-game cut-scenes.
* The Matrix: Path of Neo Captain and yourself until they/you can use the hardline to return to the hovercraft.
* The Matrix: Path of Neo downloaded. Along with the A.I. sword master who tests Neo's skills. "I was told a man legendary with a blade would come. Are you worthy of the blade, can you beat me?"
* The Matrix: Path of Neo during 'The Key' whose voice is much deeper and slower, than nearly anybody elses in the whole game.
* The Matrix: Path of Neo game has nearly all of the rebels, particularly Morpheus

and Trinity wearing these.
* The Matrix: Path of Neo has a expository delay with the Det. packs in the sewer, except you don't see Neo press the button unless the camera is in the right place.
* The Matrix: Path of Neo has a level designed around glitchy effects. It's a white and black, static-filled sword fighting simulation, that randomly deletes parts of the floor and causes cracks in the wall, and at the end it bursts into flames. It's lampshaded by Tank.
* The Matrix: Path of Neo has a level where you're running around trying to find a way out of an abandoned hotel. The most obvious hallways are cut-off by a flickering of green code and you have to find a secondary route.
* The Matrix: Path of Neo has almost too many examples - there's Neo in a few levels, there's in-Matrix Smith and the Agents, then there are quite a few of the Merovingian's mooks.
* The Matrix: Path of Neo has a varient of this trope for a level - Smith takes over a security building and uses this to keep track of Neo and taunt him onto the right path.
* The Matrix: Path of Neo has Neo do this to a brick wall in an in-game cutscene once, when there was a door a few feet away.
* The Matrix: Path of Neo has Neo saving a girl who was given a skeleton key by the Key Maker. In the end she uses it to help herself and Neo escape, then destroys it.
* The Matrix: Path of Neo has one or two of these, most particularly the one on the factory level.
* The Matrix: Path of Neo has this in some versions, most notably if the enemy is near death and Neo does his run up the chest, then kick in the head move which kills the guy. Even with modding, a blow to the neck can still have this effect.
* The Matrix: Path of Neo in an extened level Smith does this to Neo in a cutscene. It ends up sending him flying through a concrete wall.
* The Matrix: Path of Neo inverts Neo's decision and lets you cross the ledge, when you do it opens up the rest of the level.
* The Matrix: Path of Neo let's you play through all of Neo's training simulations, including the fight with Morpheus and an altered version of the jump program.
* The Matrix: Path of Neo Morpheus will express his disappointment as Neo awakens from the dream, presumably at the start of the film. The game then returns the player to the level select screen.
* The Matrix: Path of Neo Neo is much more powerful in cutscenes than actual play. There are a few in-game cutscenes where Neo busts through a brick wall with a single punch, and does the same to a heavy steel door that sends it flying across the room. Try to do it in the game itself and Neo can't even touch the door or wall. There's also the cutscenes where he flies around the city, impossible during the game itself.
* The Matrix: Path of Neo sometimes the last wave of enemies in a training level will use throwing axes as their only weapons.
* The Matrix: Path of Neo still manages to add in more material for the game. Examples include more detail going into Neo's training, Neo being trapped on a stray code resembling a subway and facing down a SWAT team right after the famous one-on-one fight with Agent Smith, and Neo rescuing more inhabitants of the Matrix in between the events of the first and second films.
* The Matrix: Path of Neo takes place in an abandoned church with weak stairs, scaffolding, and broken windows. It gets ruined further, the windows of the bell-tower get kicked in by a SWAT team and you can take out sections of the floor by taking out the four bells.
* The Matrix: Path of Neo takes place in a train station similiar to the first movie - except that it's lights are even poorer and rats are seen running about on the floor.
* The Matrix: Path of Neo that showcases glitches the developers encountered during development.
* The Matrix: Path of Neo this is averted during the chase level, you either jump off the balcony and land a few feet away or run down the stairs.
* The Matrix: Path of Neo this is what happens when an Agent/the System 'seals' off

an area in the Matrix. You can't leave until you've gotten rid of the Agents, or it's subverted in that you sometimes find a way out that they forgot to block off.
* The Matrix: Path of Neo to rescue Morpheus and Trinity during 'The Captains' rescue missions.
* The Matrix: Path of Neo type bindings around his waist and fists during the kung-fu/ninja training level
* The Matrix: Path of Neo video game, which followed the plot of the movie trilogy, did this with the ending, where instead of Neo sacrificing himself to stop Smith, Smith merges all his pieces into a 500-foot-tall Mega-Smith, which Neo fights as the final boss. This was lampshaded with a tongue-in-cheek cameo by the Wachowskis explaining that artsy everybody dies plots are fine for films, but video games are about punching out Galactus using the Hulk.
* The Matrix. Possibly in reference, the two major Neo vs. Smith fights in the two sequels are referred to as the "Burly Brawl" and the "Super Burly Brawl".
* The Matrix rather than four years between the first and second movie.
* The Matrix Reloaded, Agent Smith describes himself as "A new man, so to speak."
* The Matrix Reloaded, a living embodiment of this trope: a humanoid sentient program with the ability to produce a key that unlocks any door or lock that he comes across in the virtual world, including system backdoors.
* The Matrix Reloaded, although he had good reason to shout as the cave had no PA system.
* The Matrix Reloaded, a normal agent does this when Morpheus cuts his tie.
* The Matrix Reloaded: An upgraded Agent jumps onto the hood of a car from another car, and just stands there while the car swerves back and forth. There is also a full-scale kung fu battle on the top of a semi truck, brought to an abrupt end when it slams into another truck head-on.
* The Matrix Reloaded are both for the most part considered lesser to the original film. But there is often disagreement and debate over whether or not they are sub-par follow-ups that turned the story into a convoluted and incoherent mess that relied too much on special effects or if they were actually solid sequels that satisfactorily complete the trilogy by doing things like interestingly expand the mythology, creatively subvert certain tropes, and up the ante in terms of their action sequences.
* The Matrix Reloaded, as they apparently broke up due to Morpheus believing in the Oracle. However, they gradually reconcile over the course of the film, as Morpheus learns that there's more to the Oracle's predictions than he thought, and Niobe starts to believe in Neo.
* The Matrix Reloaded. Bane and Malachi jump through a skylight simultaneously. Even though they have shades on, Bane waits until the glass has settled before looking back up.
* The Matrix Reloaded because "I know, because I must know. It's the reason I'm here. Same reason we're all here."
* The Matrix Reloaded before hurling it at a group of approaching Smiths, complete with the sound of bowling pins as they are knocked down.
* The Matrix Reloaded could make keys to open any door or lock in the Matrix, or keys to make any door go to a particular destination.
* The Matrix Reloaded establishes that stories about werewolves, vampires and UFOs are based on now-defunct programs trying to escape deletion. The Merovingian employs several of these programs as muscle.
* The Matrix Reloaded had various characters doing so in their promo posters. The page pic is Agent Smith's poster, featuring the film's title across his crotch.
* The Matrix Reloaded has a fight on top of a semi truck, with many similar stylings.
* The Matrix Reloaded has one in the Merovingian's chateau that leads to the dungeons.
* The Matrix Reloaded. He owns a restaurant, an S&M fetishist nightclub, lives in a grand mansion, and has a beautiful wife. His manner is that of a smug Frenchman and he effortlessly rebuffs the heroes upon their first encounter. As he points out during their first meeting, even swears in French sound beautiful.

* The Matrix Reloaded, however, details the adventures of Niobe and Ghost at the power plant that were not covered in the movie.
* The Matrix Reloaded if Neo/Smith wasn't part of the main storyline you'd never figure out they were gay, unless you were in the know. From the later chapters there's also Max Jameson.
* The Matrix Reloaded is in the Matrix trying to stop the back-up power supply from going online, their hovership is destroyed (and they are killed) by the attack of a bomb-throwing Sentinel.
* The Matrix Reloaded: Link, Neo, Trinity, and the Kid are all on an elevator together. When the door opens, Link says, "Let's go, Kid. These two got things to do." As soon as the door closes again, Neo and Trinity start kissing.
* The Matrix Reloaded, Morpheus had a machine pistol in one hand and a katana in the other. He then proceeded to use both to dispatch The Twins.
* The Matrix Reloaded, music that vaguely resembles "The Girl from Ipanema" can be heard after Neo and company get off an elevator, en route to meeting with the Merovingian.
* The Matrix Reloaded, Neo and Morpheus right their way through a horde of Smith clones when they are ambushed in the hallway of a building leading to the Source.
* The Matrix Reloaded. Neo falls unconscious after destroying several Sentinels.
* The Matrix Reloaded, on how to find Niobe when a car chase is imminent: "Just follow the sirens."
* The Matrix Reloaded onward, this became a running shtick for the self-duplicating Agent Smith.
* The Matrix Reloaded: Played straight (and in slow motion) by Morpheus during the freeway chase. Strange, when you consider this is averted in the first movie, though that was with a helicopter and not a car. The only effect shooting the fuel tank had was an empty tank a few moments later. Hell, it was averted a few minutes earlier when Morpheus' Cadillac was shot about 1500 times from all directions during the car chase, which must have hit the fuel tank at least once, and nothing happens to it.
* The Matrix Reloaded powerplant. Even then, there is a contingency system which has to be shut off simultaneously from an entirely different place.
* The Matrix Reloaded, Smith escapes into the real world through Bane's body. Not that he enjoys it, remarking that being in a "rotting meatsuit" repulses him, but he's willing to endure it because he just hates Neo that much.
* The Matrix Reloaded spends a good five minutes describing the plan and showing it being executed in the intercuts. As soon as all details are established, things get wrong.
* The Matrix Reloaded starts as a weapon brawl, and eventually traverses car chase into a fist v. sword fight on the back of a speeding semi, and ends with a game of chicken...
* The Matrix Reloaded suggesting that Lovecraftian madness awaits any mortal who should happen to solve the mystery.
* The Matrix Reloaded, the Architect despises humans at any cost, regardless of imperfection.
* The Matrix Reloaded, The Architect's screens show every possible future. One screen depicts Neo flipping him off.
* The Matrix Reloaded: The Architect tells Neo that he must either reboot the Matrix or allow it to crash, killing all humans inside of it. When Neo asks why the machines would allow the Matrix to crash, since they rely on it for power, the Architect says only that there are levels of existence that the machines are willing to accept. No further details on how the machines can survive without the Matrix are provided.
* The Matrix Reloaded ("The Burly Brawl"), it's a case of Diamond vs. Diamond as neither can defeat the other no matter how hard they struck. Smith does draws the stalemate close to a win since there was only one Neo, who escapes from a dog-pile of nearly 100 Smiths atop him.
* The Matrix Reloaded the elevator, the three characters still don't face each other when speaking, and they all follow the protocol despite the seriousness of

the conversation.
* The Matrix Reloaded, the last mook is lying on the ground and looking up as Neo swings a polearm with a spiked end down at his head. The scene cuts to the Merovingian looking away in disgust as a "thunk" sound effect is heard.
* The Matrix Reloaded, The Merovingian reprograms a chocolate cake so that when a random woman eats it, she has an orgasm.
* The Matrix Reloaded: The Merovingian, when Neo blocks a sword with his bare hand during the chateau fight.
* The Matrix Reloaded. Then at the end, we realize Neo's dream was prophetic.
* The Matrix: Reloaded, the Sentinels achieve exactly the point of MMM: have at least one more missile than they have bullets.
* The Matrix Reloaded: The Twins initially fight with straight razors.
* The Matrix Reloaded, this apparently happens to Agent Smith after his...experience in the first movie. He then uses his power to copy himself and replace everyone inside the Matrix, including a Zion rebel inside it at the time. An alternate interpretation is that this is an aversion; Neo making him go all explodey is no different than when an Agent is rarely shot; they just take a new host. Because this particular defeat proves the current batch of Agents outdated, Smith simply goes back to the Machines to be replaced, except he feels an un-programmed urge to refuse this and stays in the Matrix instead. Copying onto Bane and leaving to the real world is certainly still an ascension, though.
* The Matrix Reloaded Trinity jumps out of the window when cornered by two agents. Neo's dreams foretell that she dies.
* The Matrix Reloaded uses a very bizarre iteration of this trope. The Merovingian uses old programs from previous versions of the Matrix as his private Mook Army — notably because they are powerful and notoriously hard to kill, even by Agent standards. The programs themselves are said to be variations of werewolves, vampires, and ghosts. But other than The Twins, the rest don't really exhibit any of the typical traits (other than Persephone using a silver bullet to kill a supposed werewolf program).
* The Matrix Reloaded, when an army of Sentinels invades Zion, and Captain Mifune's team is the main line of defense.
* The Matrix Reloaded, when Neo flies to rescue Morpheus and The Keymaker from an explosion, we can see Neo coming from some distance away, before he grabs the two and corresponding music plays.
* The Matrix Reloaded when the woman eats the chocolate dessert that The Merovingian coded specially to evoke an orgasm. The viewer gets to see Matrix code: digital representations of her legs, and then a brilliant explosion between them.
* The Matrix Reloaded. While Neo and the Oracle are discussing free will and whether we understand our own choices, the Oracle is feeding the birds. The Oracle says her goodbyes... and the birds immediately take flight en masse as Agent Smith shows up.
* The Matrix removes glasses to get "personal", when he's interrogating people.
* The Matrix reveals that Smith hates the Matrix at least as much as he hates humans and that he also hates the Matrix just as much as the Redpills hate it, so it is very likely that he had plans during even the original film to eliminate the Matrix, and Neo defeating him only gave him the capability to act upon this desire. In the sequels, Smith, corrupted into a virus after his first fight with Neo, has gone rogue and now considers both the machines and humans as equally flawed and deserving of extinction. Whereas he originally just wanted to destroy Zion, his new goal is to infect and destroy everything, which would also destroy him.
* The Matrix Revolutions: After Smith succeeds in assimilating everyone plugged into the Matrix (including the Oracle, becoming equal to Neo in power), he and Neo fight on a city street in pouring rain... Then up into the air... Then inside an abandoned building... Then into the sky above the city... And then a pit created by Smith smashing Neo into the ground.
* The Matrix Revolutions, a move that drew a mixed reaction from audiences.
* The Matrix Revolutions. As Neo is walking through the machine city, a number of insect-like robots crawl out of the walls and follow him.

* The Matrix Revolutions. As the Agent Smiths invade the Oracle's building, the lights go out in the hallways.
* The Matrix Revolutions. Bane's body then becomes Smith's gateway to the real world, leading to a terrifying scene.
* The Matrix Revolutions confront the Merovingian at his nightclub to secure freedom for a limbo-ridden Neo. There were easily at least 20 people involved. When the Merovingian demands "the eyes of the Oracle" in return, Trinity decides she doesn't have time for this shit and points a gun at his head. Merovingian calls off the standoff with no bloodshed after he realizes that the trio aren't going to back down.
* The Matrix Revolutions could be said to complete the trifecta, if you consider the Matrix as Smith's castle, or if you count when they storm the Machine City.
* The Matrix Revolutions does a trick with throwing and catching a gun.
* The Matrix Revolutions existence, though the Oracle survives to combat him and ensure the era of peace between man and machine will last.
* The Matrix Revolutions explains that the machines tore through armor like butter, meaning there was no point it keeping it there if it was just going to be useless anyway.
* The Matrix Revolutions goes on for at least 10 minutes with both not really showing that any of the battle is affecting them until the very end.
* The Matrix Revolutions guarding an elevator outside the Merovingian's night club, wraps his arms around the mook's neck and breaks it.
* The Matrix Revolutions has Neo decapitating an Agent Smith-possessed bad guy with a jack handle.
* The Matrix Revolutions has the shape of a baby's head. Any similarity ends there.
* The Matrix Revolutions, Neo comes across a pair of Programs named Rama Kandra and Kamala in Limbo. Despite their artificial nature, they state they love each other and have created a daughter Program they call Sati to raise. Neo is a bit surprised at seeing emotional expressions from an A.I., but Rama Kandra says that "love" is just a concept, not something distinctly human.
* The Matrix Revolutions. Neo does it after realizing that Bane has been possessed by Smith.
* The Matrix Revolutions, Neo finds himself in a subway station. He runs down the tunnel, only to find himself approaching the station from the other way, too soon for the tunnel to be a closed loop.
* The Matrix Revolutions of one of Neo's fellow members of the Human resistance in an attempt to kill him in the real world. This trope applies in that the human has a technological implant, from which Smith (a thoroughly non-biological entity) was able to use to manifest himself in the real world via a human host.
* The Matrix Revolutions, program trafficking is coordinated by the Train Man.
* The Matrix Revolutions, since he fulfilled his purpose successfully.
* The Matrix Revolutions, Smith copies himself over Neo in their final battle. Since Neo is connected to Deus Ex Machina, Smith is promptly deleted.
* The Matrix Revolutions subverts this trope when Trinity threatens to shoot the Merovingian instead of accepting another errand.
* The Matrix Revolutions. The Kid is only 16 years old but joins the Corps to fight the Machines. Captain Mifune tells him he can't serve because the minimum age is 18, but relents when the Kid points out that the Machines won't care how old he is, they'll kill him whether he fights them or not.
* The Matrix Revolutions. The Trainman is much more powerful than normal in the underground subway area he controls. He's even more powerful than The One (Neo).
* The Matrix Revolutions: Trinity, in the real world, gets tied up by Smith in Bane's body. She's thrown down into a hatch where some conveniently placed sharp things were broken earlier.
* The Matrix Revolutions where Neo is surprised to encounter a machine family that understand love better than him.
* The Matrix Revolutions, with the Zion forces battling the Machines in the Real World and Neo fighting Smith for the final time in the Matrix itself.
* The Matrix series, since he is "The One" fated to save mankind from the Machines.

* The Matrix series the Earth is a dark planet, courtesy of eternal clouds of self-replicating nanomachines that people spread into atmosphere before the events of the movie in order to stop solar-powered robots.
* The Matrix she gets relegated to the back while Neo kicks most of the asses.
* The Matrix short "Matriculated", where machines emit a warm, peaceful green glow when they turn good and seem less dark.
* The Matrix, since The One, The Prophecy, and The Oracle are all further systems of control of the humans by the AI's.
* The Matrix Smith does this to Neo who been killed in the real world by a Sentinel. The entire thing, it's quite long, boils down to:
* The Matrix, so her insistence on coming along is an order. Neo promptly shuts up and lets her come with him.
* The Matrix: Something similar happens after Smith kills Neo, and Trinity is talking to his dead body in the real world.
* The Matrix Supergirl did this quite a bit for some time before she briefly gained the ability to shapeshift.
* The Matrix-Supergirl was a shapeshifter, who would periodically go
* The Matrix take out an agent he comes back at full strength mere seconds later by just jumping into another body.
* The Matrix that the movie might as well have been bundled with the player. It was the first DVD million-seller.
* The Matrix that the sexual decisions they make in the Matrix are replicated in the real world by the machines artificially conceiving new humans.
* The Matrix: The Agents are established early on as being programmed to be fast enough to dodge bullets. This doesn't stop the heroes unloading clips on them.
* The Matrix The Architect then changed the program to reflect the human need for suffering more closely, but it still wasn't realistic enough and was rejected by too many people who were plugged into it, until the Oracle stumbled upon the real missing element: choice.
* The Matrix. The bridge of the Nebuchadnezzar (and presumably the other hoverships) has a holographic display that shows other objects (like Sentinels).
* The Matrix: The first generation of intelligent machines built by humans were humanoid, but the later generations built by other machines are more like mechanical squids and spiders. The ones we see in the real world in the films seem to be little more than drones, with the intelligent individuals existing as pure software.
* The Matrix, the Gang is given away by Cypher while descending the wetwall to escape the agents. (May be a lampshade though as he intended to give them away.) Well, technically, this was a cough of doom, not a sneeze of doom.
* The Matrix the hunters are actually a group of loosely organized rebels around the Matrix's version of the world that delete 'supernatural' programs that kill innocent people. Examples of smaller teams are: Sam/Jessica and formerly the team of John Winchester and Bobby Singer.
* The Matrix the Masquerade (beyond basic damage control), and limiting their jurisdiction within the Matrix. Sheer inertia seems to keep a lot of the populace (maybe willfully) in the dark. This goes along with what Morpheus said in the first movie, where he said that adults pulled from the Matrix have trouble letting go.
* The Matrix. The Matrix is a massive simulation maintained by Machines to entrap human minds. Anyone that is a threat to the Matrix will bring the Agents, nigh-unbeatable programs that will neutralize that threat with extreme prejudice.
* The Matrix: The most advanced weapon in the real world is a handheld lightning gun, but almost all of the other weapons the rebels wield are either firearms or rocket-propelled munitions, much like those used within the titular simulation.
* The Matrix, then Neo during and after the climax, and throughout the series until he fought the Oracle-empowered Smith.
* The Matrix: The Oracle has a reference to the Oracle of Delphi (Greek) over her door, but it's written in Latin.
* The Matrix there are three characters with affectionate nicknames, the romantic kind: Smith's given the nickname "Ice-eyes" because of his eye-color that Neo

loves. Smith in return gives Neo the nickname of "Life" for saving him. Later, Smith gives Max Jameson the nickname of "Sun" because of his blond hair.
* The Matrix there are two successful examples from Smith. Along with more if you count the failed, silly sounding ones by the Merovingian.
* The Matrix the red pill humans are able to perform seemingly superhuman feats by believing that they can do it, since they're in a virtual reality. As Spoon Boy elaborates: "There is no spoon." There are limits to even their abilities, though, which is what makes Neo, whose belief can transcend those limits as well, so important (at least, that's how it seems at first).
* The Matrix there's Dean, Sam and Tom after John Winchester saved Tom from vampires. It really starts after the three boys play tag around the Impala setting them to be friends for life.
* The Matrix the robots use humans as batteries! (And recycle the dead into nutrient solution to help feed the living.)
* The Matrix. The scene in which Neo says "I used to eat lunch there. Good noodles", the car is clearly driving through the Chinatown end of George street in Sydney's CBD. Of course, you also see the Sydney Tower and the Maritime Services Board control tower on the city's skyline.
* The Matrix: the second movie reveals that Zion has repeatedly been wiped out, save for a few dozen survivors who are allowed to become this, rebuild and go to war with the machines all over again.
* The Matrix. The Sentinel "search and destroy" robots (which threaten the humans in the real world throughout the trilogy) have multiple glowing red eyes.
* The Matrix: The Sentinels, squid-like robots that come in the millions.
* The Matrix: The virtual prison of the Matrix is populated by many sentient programs. The Agents serve as enforcers for the Machines, monitoring the system and battling the resistance trying to reveal the truth about reality. Also, renegade programs hide out there to avoid deletion (and inadvertantly inspire mythical creatures, such as vampires, werewolves and ghosts). The third film shows that external programs can also enter the Matrix as human avatars.
* The Matrix, they're given very generic names ("Smith," "Brown," and "Jones" in the first film, and the "upgraded" ones "Jackson," "Johnson," and "Thompson" in the second) and seem to hold some ambiguous government position that gives them command over both the police and military.
* The Matrix, this happens in the opening when Agent Smith, Agent Brown, and Agent Jones drive up to the Heart 'O the City Hotel where they've dispatched the police to capture Trinity. In the simulated world that the Matrix has created, blue pills see the Agents as the equivalent of the FBI.
* The Matrix, this is a beat cop's reaction to not only witnessing Trinity leap over a six-lane street, plus sidewalks, to go from rooftop to rooftop, but seeing Agent Brown follow her.
* The Matrix, this is the explanation given for the existence of the supernatural within the Matrix. The sequels and Animatrix would later clarify that they were programs from earlier, imperfect versions of the Matrix that escaped deletion.
* The Matrix. This is the preferred method for aspiring creators who don't have enough technical knowledge or money to build one from scratch and no intention to sell.
* The Matrix. Those scenes were the last ones filmed and were shot altogether. The very last scene shot was the one where he first woke up in the real world, and he had lost considerable weight to give a slightly emaciated appearance. He would later shave his head again as well as shaving off his beard in the fourth instalment.
* The Matrix, though Morpheus acknowledges that it's only an estimate.
* The Matrix to avoid reality where they are suffering constantly thanks to their cybernetics.
* The Matrix to them: even if a normal non-Neo rebel manages to kill an Agent (taking it by surprise with a contact-shot to the head, luring it in front of a subway train, unloading a helicopter-mounted minigun at it, etc.) all this does is kill the bluepill human body they were downloaded into at the time. The actual

Agent program then simply body-hops into another nearby bluepill human within a minute or two.
* The Matrix" to try and inspire/goad him into fighting without the rules of real-world physics.
* The Matrix trilogy, Agent Smith becomes something like this, infecting people in the Matrix and even taking over a human in the real world.
* The Matrix trilogy, the Machines destroy Zion and (with the help of The One) reboot the Matrix every 100 years, to prevent the Zion "anomaly" from expanding uncontrollably. Neo is the first One to refuse to participate in the reboot, and later strikes a peace agreement with the Machines, saving Zion and ending the war.
* The Matrix trilogy. While the main characters themselves technically qualify, the only character that actually hacks into other beings' minds is the former Agent Smith when he copies himself. He even takes over a human outside of the Matrix.
* The Matrix, Trinity disposes of an agent this way by shoving the gun right against his head.
* The Matrix. Trinity gives Neo a kiss as it appears the Machines have triumphed, only for him to revive from her kiss. At the same time, it's subverted because Trinity knows that they're not going to die just yet.
* The Matrix. Trinity jumps through a glass window and gets her face cut for it.
* The Matrix uses this. All the 'supernatural' beings are actually programs whose coded weaknesses the hunters exploit to delete them.
* The Matrix use them for transportation as they fight for freedom of other humans.
* The Matrix, using up whatever organic and inorganic resources are available in a region, or planet, then moving on to the next target.
* The Matrix version of Supergirl loses the Pocket Universe Earth to the Phantom Zone criminals in
* The Matrix was to CDs, as it was the first album to sell over a million copies in the format and the first to outsell the LP version. The albums's insanely high sound quality showed off what those shiny little discs could do.
* The Matrix weapons so much as a way into the city; this is zero comfort to those who get in their way.
* The Matrix wearing conservative suits. Resistance fighters typically wear flashy black suits and shades, juxtaposing their drab, worn clothing in the real world.
* The Matrix were powered by a mixture of fusion and the energy produced by humans which they grew and harvested in fields like livestock or produce.
* The Matrix when characters have new skills downloaded directly into their brains, for example Neo being given fighting skills or Trinity learning how to fly a helicopter.
* The Matrix when he says that Morpheus thinks he's something he's not.
* The Matrix when he tells Neo, "Try to relax. This will feel, a little weird."
* The Matrix when Smith overwrites Bane's Matrix-self then uses the phone line to download himself into Bane in the real world, taking over his body.
* The Matrix, where a guy calls Neo a "personal Jesus Christ", but in the context of being polite instead of amazed.
* The Matrix, where Neo's cry of "Jesus CHRIST, that thing's real?!" is toned down to the rather more comical "Jeepers creepers, that thing's real?!".
* The Matrix which defeated humanity. All that remains are the cold, endless ruins of human civilization and the hive-like machine cities.
* The Matrix, which was made and released in between the first and second films, goes some way towards bridging the gap between the first film and its sequels. Many shorts are prequels to the first film, covering the rise of the machines and the fall of man, while others are set between the first and second films. Also, promotional art of all the 2003 installments was consistently putting emphasis on the green color, it wasn't so much the case for the first film outside the coding lines.
* The Matrix: While running away from Agent Smith, Neo steals a person's cellphone so he can contact the real world. As soon as he does so, the person in question is promptly overridden by Agent Smith.
* The Matrix: While the world inside of the Matrix mostly looks contemporary to the

time the film was made (late '90s, when there were both readily available landline phones and trendy flip-phone and slider cell phones), the real world is much grungier, with monitors only showing text terminals and information stored on MiniDiscs which manage to both look very exotic to American audiences at the time (the format never caught on in the US) and incredibly dated within a few years with the adoption of USB flash drives.
* The Matrix willy-nilly. Of course, when you have a giant jack in the back of your head, why not use it?
* The Matrix with a high stack of annotated papers and manila folders, the props used in the old "We Know Everything" bit, implying that the authorities have his permanent record, and that it really does contain everything you've ever done wrong. It was less than effective than they were used to when they applied it to Neo, however.
* The Matrix with nuclear weapons (it didn't do them a whole lot of good).
* the matryoshka dolls themselves! A common variation of them is a matryoshka with faces of various Russian leaders, usually from Lenin to Putin.
* The Matshuhiro Underground Imperial Headquarters near Nagano was intended to be this for
* The Matsushiro RC car featured red "Knight Rider" logos on the sides, windshield, and a "Knight 2000" logo on the left headlight.
* The matter of money was an obstacle to a marriage project involving Junot and Napoleon's sister, Pauline (suggested at a time where both men were unemployed officers, and Bonaparte was even poorer than Junot).
* The Matter of Seggri where rape and murder is not only common but encouraged to maintain their violent social order. Opening themselves up to the Ekumen does introduce the idea of education for men, however, and some men have escaped the castles by going offworld.
* The matter of Ysengrin. At one point, Annie sees him out of his magical wooden
* The Matt Helm films were a major contributor to the trope, right down to the revolving bed that can dump you into the pool for a bath. In one of the movie,
* The mature paintings of Mark Rothko are comprised of a couple of big fields of color with very subtle gradations.
* The "maturity" of a companion can usually be gauged by their ability to engage in small talk in the face of danger. Of course, not all of the Doctor's companions appreciate this ability when they're in distress.
* "The Maud Couple" is about how you don't get any say in who your siblings like for their significant others. Even if you don't like them, you aren't getting the whole story, so suck it up and take it for the sake of your family.
* The Maud Couple", Maud's new boyfriend Mudbriar has a pet stick called Twiggy. In one scene, the two put the pebble and stick next to each other on the ground and comment on how cute they are playing together.
* The Maud Couple": Pinkie Pie is disagreeing with Mudbriar that her sister Maud wouldn't like surprise parties, so they ask her...
* The Maury Povich Show when he has you guess whether that's a woman or a drag queen...
* The Mausoleum at Halicarnassus was also destroyed by a series of earthquakes. Bodrum Castle was built on the ruins in 1494.
* The Maverick has a bigger, stronger brother, the Strongarm, which features the same six-round capacity, but includes a 'slam fire' function which can launch darts far faster than the Maverick, as well as greater range.
* The Mavericks were one of the more popular alternative-country bands of
* The Maw. When it eats certain unique enemies, it can also gain their powers, such as fire, flight, or shooting laser beams from its multiple eyes.
* the MAX books. That is, everyone on BOTH sides (USMC garrison vs VC/NVA Regiment) perished, except for him.
* The Maximal insignia, which in all fiction beforehand was just there, with no comment on the change from the Autobots. One story mentions that it's a stylized Cybertronian wolf's head, after the hound of Maxima, the first Maximal, used as a rallying symbol after her death (neatly also explaining the name "Maximal" -

they're the followers of Maxima).
* The Maximoffs And Friends And Family Vs The Multiverse And Sometimes With still occurs, though no mention is made of aliens). As the MCU characters aren't particularly focused on in the first half, they're reactions are left offscreen, but it is implied that Team Cap at least accepts this. Meanwhile Vision does have amnesia for his confusion, whereas the S.W.O.R.D. team has a mixed reaction. To be fair, Wanda and Peter are.... alarmingly casual about explaining the very strange situation. Though subverted in that every X-Men character who was familiar with Wendy before her death easily believes it.
* the MAX imprint of Marvel Comics made a deal with...something during the Vietnam War, an entity which promised him exactly what he so desperately wanted: the ability to wage a never ending war (against organized crime).
* the Max imprint, subverts this in the oneshot ''The Cell'. The five men who fired the bullets that killed Frank's family are all in the same large cell in Riker's. It looks like any old regular cell, but the narration reveals that they can get whatever the hell they want (except women) and the guards will look the other way. It's implied they could just outright leave if they wanted to. Frank doesn't let them.
* The Maximus Universe, with solo novels following individual characters and an overarching plot that ties each story together, with the characters from some stories frequently guest-starring in others.
* the MAX series arc "Six Hours to Kill", Punisher is poisoned and told to kill someone to get the antidote. Instead, he kills the person who poisoned him and pulls out his list of scumbags, going through the methodically before the poison kills him. He actually runs out of targets before he runs out of time.
* the Max series It freaked the hell out of the reinforcements that came to see who survived. At one point, he gets shot in the side of his chest, point-blank, with a shotgun. After acknowledging that one of his ribs is "...gone. Not broken, gone.", he gets into an extended fistfight with the man who shot him, tosses him out of a window, and carries on. It seems like you can't finish a story arc without Castle experiencing some near-fatal damage.
* The MAX version had a defining incident in his youth when a friend of his committed suicide after becoming the victim of the local don's son (a
* The MAX version of the Foolkiller elaborately stages the bodies of those he kills and leaves a "Fool" tarot card at the scene, often with a message.
* The Maxx, a group of kids scare off some older people because of Maxx towering up behind them. The kids just think they were intimidating.
* The Maxx, but later claimed that his magic powers were limited to knowing a few "loopholes". And then later it turned out that he had no power at all and was just an ordinary dude who everyone else consensually hallucinated was an evil sorcerer. Or something.
* The Maxx by Sam Kieth. Julie and Maxx are sitting on a rooftop, where Julie is struggling to find the words to explain to him why she has to move away, with little success. While Maxx stares stoically off into the distance, The sky around him is literally comprised entirely of the words "please please please please...don't leave."
* The Maxx featured something of a parody of MIBs, a squad of quasi-informed, dark-suited supernatural investigators who are led by psychic messages delivered from the ashes of their dead founder, which they carry around in an urn.
* The Maxx knows every little psychological detail of why he does what he does. He even feels bad about it. That doesn't stop him.
* The Maxx shifts back and forth between the "real" world and The Outback, a subconscious world resembling a prehistoric Australia populated by fantastic creatures and psychological symbolism. The Outback featured in most of the series is that of protagonist Julie Winters, but everybody supposedly has an Outback, and physical travel between them and the "real" world can be achieved by those with the proper knowhow.
* The Maxx, so you can bet the fans took anything other than praise as an insult. Linkara even addressed this in his "Top 15 Screw-Ups" video.

* The Maxx takes what is assumed to be a girl hostage. Maxx smashes the girl's face into a car, leaving the villain to wander off in a fit of anger. It was a CPR dummy, but Maxx very poorly tries to cover up his surprise it wasn't a real person.
* The Maxx was somehow beheaded by an out-of-shape woman wielding a knife-length tooth of one of his henchmonsters, but that didn't stop him from continuing to play mind games with the heroes. He eventually finds a chiropractor to reattach his head.
* the May 1, 1988 strip, but gets his comeuppance when Lanolin retaliates by taking Roy's feathers.
* The May 17, 2017 strip has Jon prove to Garfield that he can speak dog by barking at Odie. Garfield remarks that Jon just said "My elbow is a potato".
* the May 17, 2020 strip, this time involving what they should do on their date. Jon wants to go see a monster movie, while Liz wants to go to a craft fair and wins the argument by saying "Monster movie" to trick Jon into replying with "Craft fair".
* the May 31, 2008 strip, prompting Jon to say he's getting tired of replacing their front door.
* The Maya are a scientific/religious hybrid civ thanks to their stepped Pyramid buildings, which unlike normal Temples produce both science and faith. They can also get an early boost to research with a free Great Scientist if they so choose, since their Long Count calendar mechanic means that they're guaranteed a Great Person once every
* The Maya believed that their Gods created three worlds before this one, but were unsatisfied with the creatures therein and wiped the slate clean.
* The Mayan warriors from one of the other displays. But those guys are jerks, and never get let out of their case.
* The Mayerling Incident. In other words, the whole incident created the circumstances that would result in not one but two of the deadliest conflicts in human history.
* The Mayflower is the most famous of many ships that carried European migrants to the New World.
* The "Mayhem Guy" rides on the outside of a car, to represent its "blind spot" in a commercial for car insurance.
* The mayor at one point discovers that the city of Springfield actually has an old and unenforced law banning the sale of alcohol. Therein, anyone convicted of possessing alcohol in Springfield was to be punished "by catapult" as in being flung into the next county with one. Then it turns out that the 200-year-old law was repealed 199 years ago anyway. The old man who discovered the law suddenly realized there were more words on the parchment.
* "The mayor gave me a direct order to stay here, she never said I couldn't build a fusion test reactor on the premises."
* The Mayor gets all teary-eyed seeing Faith go on a torture/kill date with Angelus. "She's not a little girl anymore."
* The mayor hires an outsider to be sheriff because all the previous local sheriffs have been paid off by Proctor. Ironically, it's implied that Proctor may have turned the real Hood before he even got to Banshee.
* The Mayor is a young rapper runs for mayor of his small California town just to get publicity for his new album. He acts up majorly in debates, no sense of decorum, rants about how normal folks really feel and slamming his opponent, convinced this will get him in the limelight and make his album a hit. On election night, guess what happens...
* The Mayor is blackmailed by Vicky with pictures of him from the '70s. Even though he still succumbs to the blackmail, he makes a strong claim that it was fashionable back then.
* The Mayor is portrayed as a neat-freak and refuses to shake anyone's hand.
* The Mayor makes Bubbles look intelligent. In "Best Rainy Day Adventure Ever", he forgets that he's a mayor and jumps out the window after Bubbles
* The Mayor). Most of the citizens also seem to not have names (The Clown With The-Tear-Away-Face, The Wolf Man, etc.).

* The Mayor of Casterbridge, Lucetta describes her love problem to Elizabeth-Jane this way, saying she has a friend who feels obligated to marry a man with whom she had a dalliance years earlier but who was not entirely sure his wife was dead at the time, but since receiving word that the man's wife really is dead and they are now free to marry, she has met another man and fallen in love with him. Liz sees through it but doesn't know who the other parties are (respectively her stepfather, Michael Henchard, and the object of her own crush, Donald Farfrae) till later.
* The Mayor of Casterbridge: Michael Henchard starts out as an itinerant hay-trusser, walking from town to town in search of work and lodgings, with no more than a few shillings in his pocket. Eighteen years later, he has become a successful grain merchant and mayor of his hometown, with a fine house and furniture to match. Unfortunately, he goes from riches back to rags after a series of bad decisions, and by the end of the novel, he has had to go back to being an itinerant hay-trusser.
* The Mayor of Casterbridge, Susan Henchard sees the sparks of attraction beginning to fly between her daughter, Elizabeth-Jane, and her husband's business manager, Donald Farfrae. She proceeds to forge notes in which each asks the other to meet, hoping they will hit it off. Although the spark is fanned into a flame by the carefully orchestrated meeting, they do not get together properly until much later.
* The Mayor of Halloween Town orders the alarms sounded when Jack Skellington disappears (a siren in the form of a stone cat with its tail being turned by a mummy).
* The mayor of Las Vegas (Oscar Goodman) was a much-beloved mayor and when he hit his term limit, so the city promptly elected his wife mayor by a landslide.
* The mayor of Shinjuku fits this trope, cheerfully doing Eko's bidding—and believing in his philosophy.
* The Mayor of Springfield tried it in another episode. He had just had sex with his lover and commented on how he'd like some cigarettes when a bag of them is thrown in his room. He then offered one to her but she rejected and explained she was pregnant. Mayor Quimby then prayed for God because he had another favor to ask.
* The Mayor of Townsville, its a wonder how he got the title, but he seems to a math wiz when he solves the last riddle Him gives the girls.
* The Mayor parodies this. Whenever he wants to sound important, he attempts this, then gives up partway through.
* The Mayor, reassuming his role as Horton's friend from Doctor Hoovey, is made as an
* The Mayors, causing Hardin's enemies to end their impeachment efforts.
* The Mayors gives them power over the people of these kingdoms, if not the rulers.
* The Mayors, is facing internal revolutionary elements on Terminus, led by Sef Sermak. At the same time, they're facing a threat from Anacreon, where Prince Regent Weinis, uncle to the King of Anacreon, is making a power play for his country to take control of Terminus.
* The Mayors. It's implied several times that said accident was arranged by the Prince Regent, Wienis.
* The Mayors": Prince Regent Wienis learns that they've become fatally dependent on the Foundation when he tries to conquer Terminus, but the military, along with the planetary population, rise up against him.
* The mayor's secretary does this while running away from a horde of paparazzi surrounding Ninamori's house.
* The Mayor" stage of his plan. Presumably this would give him the power to do so.
* The Mayors": Terminus has public visiphones, which High Priest (Ambassador) Poly Verisof uses to schedule an appointment with Mayor Hardin.
* The Mayors": Their futuristic weapons are called atomic blasters, and ships use hyperatomic motors.
* The Mayors, to stop the fleet and incite mass riots across Anacreon just before they arrive at Terminus. The monocracy quickly crumbles in the face of revolting citizens and they never actually fight the Foundation.
* the Mayor's. When she gets rescued, it turns out she has crucial pages about the Ascension hidden in her boot.

* The Mayors which killed King Leopold's father might have been arranged and the same could happen to Lepold if he doesn't go along with Wienis's plans.
* The Mayor was able to posses dead bodies after his own death and eventually settled in a "patchwork" monster built by the Initiative with such an ability in the
* The Mazda Laputa was named after after the fictional island of Laputa in
* The Maze Agency #15, Lieutenant Bliss is accused of murdering her ex-husband. So Jennifer Mays goes undercover to find the real killer.
* The Maze Agency #1, a dead body turns up in one of Gabe's moving boxes when he is moving into Jennifer's apartment. Naturally this leads Gabe and Jen into investigating where the body came from.
* The Maze Agency #20 uses the sabotage variant, smashing the radio and then blowing up the boat to strand the characters on an isolated island.
* The Maze Agency #6, the killer balances a bowl of acid atop a door which splashes Gabe on his arm as he rushes through the door.
* The Maze Agency #8, Gabe gets knocked off the roof of his building by the killer. He manages to grab hold of a TV antenna that bends alarmingly and leaves him dangling over the side of the building. Jen manages to grab him and haul him back just before the antenna snaps.
* The Maze Agency #8, Gabe's downstairs neighbour yells abuse at him and he pounds on the floor with his shoe to get her to shut up. The animosity between them becomes an issue when she is murdered.
* The Maze Agency and it is invariably his insights that solve the case.
* The Maze Agency before the series was cancelled. This explains why the plot deals with an 'impossible' theft, rather than a murder like the rest of the series.
* The Maze Agency by having another character think they've solved the mystery and do the summation, only for Gabe to explain why they are wrong and provide the true solution.
* The Maze Agency comic book, a murder is committed in a cornfield maze and the body strung up as scarecrow to hide it.
* The Maze Agency: Gabe and Jen are stranded on island with a (literal) boatload of suspects when the boat that brought them there is blown up in #20. And then someone is murdered following a séance...
* The Maze Agency had an example of this version using one of Jack the Ripper's famed messages.
* The Maze Agency. It's not even clear what make it is, but the panels are not all the same colour, and it has been towed multiple times.
* The Maze Agency, some seemingly random comment or event will start the gears spinning in Gabe's head and cause him to suddenly see the solution to the current mystery.
* The Maze Agency ("The Mile High Corpse"). Jen and Gabe are on a largely empty flight to London when one of their fellow first class passengers—a notorious gangster—is garrotted while he sleeps.
* The Maze Agency. When Gabe complains about how uncomfortable long stake-outs are, Jen says that he is lucky as he can at least pee into a tennis ball container.
* the maze is inside an artifact taken back to the Library. Had she remained in the Library the assassin would never have gotten to her.
* The Maze Of The Kings: The player character is an explorer who shoots up a ton of mummies throughout an ancient pyramid.
* The Maze Runner and its sequels and prequels by James Dashner). Greenies is used for new fans of the TMR franchise (books and movies included).
* The Maze Runner) are the Distaff Counterparts to most of Group A. Specific examples include:
* The Maze Runner comes with a 24 page comic told from Minho's perspective set before Thomas is sent to the maze.
* The Maze Runner features a place called The Glade. A bunch of teenagers are trapped in it with no memory of their lives before they woke up there. The doors open at dawn and close at dusk, but only lead to a giant maze with no exit. Better yet, the maze changes every night while the doors are closed. Oh, and if you're in

the maze at night, giant metal monsters attack you.
* The Maze Runner. Medics are called "Med-Jacks", butchers are called "Slicers", etc.
* The Maze Runner, mentions the War of 2020. This is the only time in the series where real-life year count is used (the count currently used is made up of three digits), suggesting that the war was the catalyst for the reset of the count. This may mean that the series is set over 200 years into the future.
* The Maze Runner, Newt and Teresa are respectively voiced by real-life siblings Arturo and Carla Castañeda.
* The Maze Runner, on his first outing in the Maze, Thomas is stalked by a Griever (spider-like cybernetic monster) climbing above between two walls. He's warned of its presence by some slime dripping on his shoulder, a mere second before it attacks.
* The Maze Runner Series — Science fiction series based on the novel series. 3 films since 2014.
* The Maze Runner series, the Flare virus was unleashed to cull those competing for scarce resources in a world devastated by solar flares. At first, it killed its victims quickly, but it rapidly mutated and the infected started taking longer to die. Not only that, the Flare robbed them of their humanity and turned them into animalistic beings known as Cranks. However, a small percentage of the world's population is immune to the virus; WICKED was set up to study such people in the hope that finding out the reason for their immunity might lead to a cure.
* The Maze Runner, the Flare has those infected show symptoms of paranoia, hallucinations and extreme, unwanted violence before eventually descending into madness and gruesomely attacking anything that moves, even resorting to cannibalism.
* The Maze Runner Trilogy, in that throughout the books the Gladers act like teenagers of fairly normal intellect while making decisions and attempting tasks.
* The Maze Runner Trilogy. In the Glade, he answered only to the leader, Alby. He was generally the second-in-command within the main group of characters too.
* The Maze Runner Trilogy, solar flares and a pandemic that followed led the the demise of civilization, save for a few bases here and there.
* The Maze Runner. Ultimately, only a handful of the kids WICKED used as subjects (up to seven from Group A, plus an unknown number from Group B) make it through to the end.
* The Maze Runner was released, although critics were lukewarm to it, audiences were a different story - calling it the best film of the series.
* The Maze Runner when she betrays him. Even if she didn't mean it, he never forgives her for it. As a result, he ends up becoming closer to Brenda, who debuts in the same book.
* The /m/ board has also seen three major Quest Threads, with the largest being
* Thembria is based off of the Soviet Union. Occasionally there appeared a race of cruel, Germanic-accented dogs who wore SS-looking uniforms and menaced the skies above Cape Suzette in a zeppelin.
* The McBain episode featured in "Last Exit To Springfield" features a scene (you might have to slow this scene down or pause it) where he mows down Mendoza's henchmen and you can see the one eating cake getting his thumb blown off.
* The McCain campaign also attempted to use John Mellencamp's "This Is Our Country" without getting permission and without realizing that not only are the lyrics of the song extremely bitter and sarcastic, but that Mellencamp is a Democrat.
* The MC can seduce every single one of his teachers by acing their classes. It's practically required to complete the game.
* The McCarthys, about a sports-obsessed Boston family, the one son who is clueless about sports is asked the name of Miami's NBA franchise; he admits the only thing that comes to mind is the 'Miami Sound Machine'.
* The McCormick parents joined a doomsday cult of Cthulhu for free beer and are crackheads. They also have a meth lab in an open shed in their backyard.
* The McCoy for some of her emotional displays. She once nearly ate Harry because

he summoned her at an inconvenient time. While he freed himself of here binding and proved himself to her, she notes that either way she got something out of it: a hard-working mortal or dinner.
* The McCoy: The most ethical decisions are based on emotion rather than logic.
* The McDonald's golden arches were not the company's first symbol - they were introduced in 1962 and refined to today's version in 1969 - but it has become known the world over as a shorthand for fast food.
* the McGann movie, "Next Christmas, take a vacation. Don't be here." However, here the Doctor is referring to San Francisco, not London.
* The McGauer-Linden Act, which allows the government to imprison Latents without trial for refusing to join up, or execute Latents who hold particular abilities - especially as a huge number of Latents are
* The McGurk Mysteries) frequently came up with "training exercises" that also got the other kids to do his work for him. For example, raking the yard to match leaves. The point, as McGurk explained, was to look for leaves that didn't match the trees in the yard. Really, he was just getting the others to rake the yard so he didn't have to.
* The Mc Gurk Mysteries was a series about a group of pre-teen detectives called the McGurk Detective Agency. Starting from the sixth book in the series, they were also a five man band. They added a Sixth Ranger in Book 16.
* The McLaren-Mercedes partnership had 3 cars planned after the SLR: a mid-engined supercar, codenamed "P8", competing with the Ferrari F430 or Lamborghini Gallardo, a more powerful version of the P8, codenamed "P9" competing with the Ferrari 599 or Lamborghini Murcielago, and a completely different car, codenamed "P10" and replacing the SLR. However, the partnership ended up splitting, due to different visions on it, and only the P8 ended up hitting the market as the McLaren
* The "McLaren" Windows Phone was going to support over thirty games specifically in development for the system, including games based on
* The McLaughlin Group in 2016; revived in 2018 on a local D.C. station, with plans to syndicate nationally)
* The McLaughlin Group, one of the panel members, annoyed by McLaughlin's continued interruptions and overly long nicknames, invoked this trope. McLaughlin just responded with another "WRONG!"
* The MCP took one look at the universe and decided it could do better...
* Them Crooked Vultures: These are apparently the types of "Elephants" referred to in the song of the same name, since the lyrics specifically refer to "lepers riding atop pachyderms full of germs."
* The MCU also offered a live-action version of a famous one from the comics in
* The MCU? I'd rather call it the Motherfucking Connected-my-ass Universe. And it's no longer a "universe", it's a Multiverse.
* The MCU narrowly averts the ghetto. The ensemble films still play to
* The MCU reached this point somewhere around 2016. As of July 2021, there are currently 24 films, and their long-term plan takes them up to 2028. If they keep the current rate of 4 films per year (as of 2021), that's potentially 28 more films to come!
* the — although it doesn't use that name, it's a mechanical manifestation of it in spirit — where giving a cool description to accompany an action grants a Stunt bonus to perform it. The more awesome it sounds, the bigger the bonus.
* Them!, Dr. Pat Medford is mostly a calm and competent professional, but she does cut loose once when she abruptly and unexpectedly finds herself face-to-face with one of the ants. The little girl who survived an early attack also screams when finally snapped from her traumatized catatonia.
* The Me-163 Komet was a rocket powered interceptor in World War 2 that used hypergolic fuels. These occasionally exploded on
* The Mézga Family, a Hungarian cartoon from the 70s, the titular family, living in the 20th century, manages to contact a descendant called MZ/X, who lives in the 30th century. At first they don't understand a word he's saying, as MZ/X speaks "new Hungarian", which is just modern day Hungarian with EVERY word abbreviated to one syllable. Thankfully he has a telepathic helmet he can put on

when he wants to talk to his ancestors from "the atomic dark age", as he calls them.
* The Mézga Family Hungarian animated sitcom occasionally featured a relative from the different future who would speak New-Hungarian, which basically just shortens down every word to the first syllable, leading to odd misunderstandings. He proudly declares in one episode that he officially became a "Gaz-Em-Ber" ("gazember" is usually used as an unflattering term for corrupt individuals), as in "Gazdaság-Emelési Berendező" which is a nonsense term that roughly translates into "Economical-Inflation Organiser". On another instance, Géza asks his advice regarding the "worms in my garden" ("...féreg a kertemben") and he assumes he was saying "Félek Reggel a Kerületi Temetőben", which means "I'm afraid of (going to) the district cemetary in the morning".
* The Mean 6 hasn't quite grasped that brainwashing isn't a good thing to do and as if they don't live in a world where evil shapeshifters, curses, corrupting artifacts, body swapping, and cloning spells are scarily common and literally every villain ever has employed brainwashing to some extent.
* The Mean 6", Pinkie Pie's clone complains that the trek through the forest is boring with these words. Twilight's clone then points out they have no idea where "there" is supposed to be.
* The Mean Brit: "Right, I'll get you more pumpkin and rum it into your fucking arse."
* The Mean Brit: You're absolutely bloody awful. Now piss off, you dumb wanker!
* theme (and infernal) natures. (The version from the show's first OST replaces the organ with synth sounds.)
* Theme-and-Variations Soundtrack: The songs are all variations on a theme.
* The meanest animal in Africa is the crocolion, half crocodile in front, half lion in back. How does it poop? Again,
* The Meanest Man In The World, Jack Benny plays such a lawyer with Eddie "Rochester" Anderson as his assistant. While talking to a client in his office an ambulance screams by and both men jump to their feet and start to race to the door. Remembering their client they stop, shrug and sit back down with Benny saying something "Well, next time."
* The meaning of "El Rudo de Los Rudos", though despite the claime, Axel Cruz
* The meaning of gestures also differs from country to country and culture to culture, which can cause some problems, when you travel abroad.
* The Meaning of Harmony has many of these and even opens on one, all involving Sunset's magic going out of control, and the world turning to crystal. They get progressively worse as more Forges are activated.
* The Meaning of Harmony, she realizes that everyone is free to choose their own path in life.
* The Meaning of Harmony, the temporally locked equilibrium in the Forge of Kindness allows the ponies to see the event which led to the Forge getting damaged.
* The Meaning of Life has a criminal executed by being chased through town and off a cliff by naked women, although it's mentioned he was allowed to choose his demise.
* The Meaning of Liff defines "Scosthrop" as the act of miming using a pair of scissors while searching for them, in the hope that it will favourably influence your chance of actually finding them.
* The Meaning of Liff mentions this by inversion, coining the word "Kibblesworth" to refer to the amount by which a price is under the round number - for instance, "£5 kibblesworth a penny".
* The Meaning of Liff, the horizontally-growing bush characters cling onto is called a "grimmit".
* The Meaning Of One has Harry and Ginny soul-bonded to each other, experiencing everything the other does; it's generally assumed (including by themselves) that they'll marry someday, and they share a bed out of necessity (one of the side effects of the bond is that they find it extremely difficult to fall asleep unless they are making skin-to-skin contact). But being only between ten and twelve years

old, they don't go beyond kissing.
* The Meaning Of One, Molly Weasley punishes Harry, Ron and Ginny by making them trim the grass in their meadow. With scissors.
* The Meaning Of One recruit Mr Weasley to help them get one over on the Twins. He sends the Twins a Howler on March 31st to wish them a happy birthday, explaining that he and Mrs Weasley came across their birth certificates and realised that they were actually born slightly before midnight, not on April 1 as they'd always thought. The Twins are aghast at the revelation that they weren't really born on April Fool's Day, and mope through the whole day without the heart to pull a single prank, as it would "be like we're pranking ourselves as much as anyone else." The evening of April 1, though, they get a second Howler to tell them that they really were born shortly after midnight.
* The Meaning Of One: The only noticeable effect of Harry and Ginny teleporting is a slight disturbance of the air. Even they don't feel anything; one moment, they're in the old location, the next moment, the new.
* The meaning of the Eagles' "Hotel California" has remained ambiguous even after multiple band interviews on the subject. At best, the song is usually just said to be about "the 70s."
* The means by which pressure kills you isn't really obvious, though. What kills you is the high amount of oxygen in your bloodstream. Likewise, if you put an unopened bottle of carbonated water at the bottom of the ocean, very little will happen to it, because water, which is the biggest part of any soft drink, is pretty much incompressible. The only thing that will happen is that the air bubble at the top will shrink.
* The means by which the Silmarils were devised is unknown, nobody knows what they're physically made of, and their maker, Fëanor, insisted that their production was so demanding, physically, psychologically, and spiritually, that to remake them would be impossible, and would produce only flawed imitations, lacking everything that made them special. After the Two Trees are destroyed, the Silmarils really do become irreplaceable — they were created using the Trees' holy light. Then Fëanor's killed and for his crimes he's sentenced never to be reincarnated, so they're
* The Mean Warrior Therapist applies heavily with this subtype. Exploits fears of being helpless.
* The Measure are sessile organisms living at the bottom of the sea under intense pressure. Their psychology is
* The Measure of a Man and works out that if he can pilot the damaged starship most of the way, he'll hopefully still be alive by the time the lifepod gets back to Earth.
* The Measure Of A Man", Data is placed on trial by Starfleet to prove that he's a life form in order to avoid being reassigned to destructive reverse-engineering. Picard manages to win the case by arguing that Data is sentient by the prosecution's own standards, and that the end result of the research, the de facto enslavement of the Data-type androids that would be built without rights, would contradict the Federation's fundamental ideals.
* The Measure of a Man, he just doesn't like the idea of them removing his second officer's body parts-and withdraws his objection.
* "The Measure of a Man": How Data likens the transfer of his positronic matrix into a data container for study, when Commander Bruce Maddox suggests the development of creating hundreds or even thousands of versions of Dr. Noonien Soong's androids:
* The Measure of a Titan is practically the paragon of this. His powers are theoretically capable of splitting a planet in half, and he can use them to fight multiple high-level metahumans at once, but he is as fragile as any normal human, and heals as slowly also.
* The meat industry in this verse is treated the same way it's treated in the real world: living beings are bred and cooked for the evolved ones to eat, mostly mentally retarded animals who are even tenderized by their civilized counterparts. The humor comes from how hilariously wrong it is to see people treat this as

normal, even if it's also
* The Meat Wagon hurls corpses at long range (spreading disease where it fires) and stores corpses for use by necromancers and
* The Mecha Easter Bunny is created partly based on the original Easter Bunny's DNA, but is only organic on the surface, much like a
* The Mecha/Jet Tengu is an amphibious mecha (that is, it hovers over water rather than floating in it) that transforms into an fighter jet.
* The Mechanic (1972), Charles Bronson's character trains a young man to also become an assassin.
* The Mechanic (1972) however does it for the thrill of existing outside morals and laws, and kills Bronson's character for not living up to that image.
* The Mechanic (1972): Some scenes were actually filmed on location in New Orleans. However, New Orleans also happened to double for Chicago, Houston and Colombia.
* The Mechanic (1972). The sociopathy of the two hitman protagonists is shown in various ways. Arthur realizes Steve has what it takes to be his understudy when the latter watches a former girlfriend who's slit her wrists to get his attention bleed over the course of several hours (she lives, but only because they give her the car keys so she can drive herself to the hospital). In another scene when Arthur is at the hospital, he walks past a young boy with an artificial leg without even a sympathetic glance.
* The Mechanic (2011): Justified. The shooter lets the fuel spill out over the ground before igniting it with a shot from his pistol.
* The Mechanic (2011) opened on January 28, 2011, the same day that the film's climax takes place.
* The Mechanic (2011), the hitman uses this to get the mark out of the building, by making him think the call is coming from a room above — in actuality the hitman has rigged the switchboard to give a false signal.
* The mechanical men of Muni-Mula come to Earth in a flying saucer and make off with
* The mechanical owls deployed by Marquis' "Predatory Strike" basically function as owl shaped attack drones.
* The mechanical shark "Bruce" (or as the cast and crew ended up calling it, "The Great White Turd") had a habit of breaking down. While the actors were waiting for Bruce to be repaired
* The mechanical soldiers (that are controlled by an AI mainframe) that were being built by the
* The mechanic is frequently misquoted as saying, "Somebody set us up the bomb." The actual line was, "Somebody set
* The mechanics behind Toy Box Multiball (wherein a player can delay the mode in order to add more balls, up to 6) could potentially lead to a second player "stealing" excess balls by choosing to play it with the minimum of 3. The game combats this by
* The Mechanic, the mob gets angry at Mr. Bishop for taking on an apprentice without their permission. So they give him a job in Italy to "cowboy" the next hit, where he's bound to be killed.
* The Mechanicus hold similar views, as the artificial intelligences used by humanity at the time are considered by the Machine Cult to be abominations -
* The Mechanisms. Among other such changes, Arthur, Lancelot, and Guienevere are now a mutually loving and faithful triad.
* The Mechanisms, appropriately titled "Terminus", depicts the delayed arrival of Yog-Sothoth to the Yggdrasil system. It's not a song, so much as a series of distress calls that overlap and build to a cresendo before cutting out.
* The mechanisms built by Sirrus and Achenar on their respective prison ages in
* The Mechanisms' engineer, Nastya Rasputina, is attracted to machines rather than other (mostly) humans. She and Aurora, the Mechanisms' sentient ship, are in a committed relationship.
* The Mechanisms of Rose's memories was too perfect, and she remembered that Rose was abducted from her wedding instead of volunteering, and the rest of the Rose Reds had to be degraded in memory recall and strength.

* The Mechanisms present themselves as distinct characters, each with their own quirks, and ended the band by 'dying' in creative ways.
* The Mechanisms' songs are almost all based on stories from legend or mythology, and occasionally history or classic literature. In addition to a multitude of individual songs and short tales, they have three albums that each tell a different story:
* The Mechanisms travel in The Aurora, a biomechanical ship given sapience by the same process that turned the rest of the band into cyborgs. Nastya, the ship's engineer, is in a romantic and sexual relationship with the ship.
* The Mechanisms were a dieselpunk cabaret band, which also incorporated various genres such as folk and jazz.
* The Mechanist is an expert of robotics and has an army of robot for terrorizing the Commonwealth and killing everything coming across their path, complete with a factory as the lair to mass produce the robots. You can become one after acquiring the Robot Workshop as well.
* The Mechanoids from Palladium Books features telekinetic aliens. Their devices usually have the activation switches on the inside of the casing for a cleaner look. Human intruders who want to, say, use the elevator have to saw a hole and flip the switch manually.
* The Mechonis sports a pair of glowing eyes when it awakens, as does the Bionis.
* The "mechs" are like this. Every night, they have to manually upload the events of that day to a backup hard drive held by the organization that built the mechs, which is then uploaded to a new body should something happen. Note that this is only for mechs who live a conventional life; those off the grid have no means of saving a backup.
* Themed Aliases: A character has several aliases, that all have something in common.
* The Medallion's character Eddie has just died. His friend Arthur in the morgue confirming his identity, when suddenly Eddie appears and doesn't believe it when Arthur tells him he's dead. Eddie pulls back the sheet on the stiff and confirms its him because "I know my own thing."
* The medallions that Eivor takes off the bodies of felled members of the Order of the Ancients, that serve as the symbol for their order, are of the exact same design as the one worn on Templar Shay Patrick Cormac's belt.
* themed around toilet-training. The toy will often ask to go to the potty after the child does a certain action, and will get more desperate if the child doesn't listen to them.
* The Meddling Kids Are Useless: The heroes get into a lot of danger and excitement, but in the end they don't actually stop the villain or accomplish anything directly.
* The Meddling Kids Are Useless: The protagonists did all the cool stuff, but ultimately it was some other person, such as the police, who solved the problem.
* The Meddling Monk was a rather comedic villain on his two appearances in the TV series. In Big Finish he shows himself to be dangerous, helping the Ice Warriors in a plan to kill 300,000 Martian colonists and in Lucie Miller/To the Death he helps the Daleks invade Earth again.
* The Medea Hypothesis proposes that life is naturally self-destructive, as it has come close to destroying itself several times (eg the Oxygen Catastrophe, and the Permian Mass Extinction). Of course, even if true, there wouldn't be much anyone alive could do about that. What's the
* The Mede Empire, a continuation of the Third Empire most prominently seen in
* The media couldn't shut up over the controversy of the film's ultra-violence.
* The mediaeval torture described in Real Life, below, is probably the origin of the Tarot card called the Hanged man, in which a bound man swings from a gibbet by one foot.
* The Media Man, even more) in which case he closed the comments on the review in preparation of the backlash.
* the mediation of the church in the War of the Lions. His brother Zalbaag is shocked, while listening to everything behind the main door.

* The Mediator and are unable to move on, unless they contact a mediator to help them fulfill their goals. These usually involve passing on a message of some sort, while others are considerably more hostile in what they want.
* The Mediator is all about this. This trope applies to any mediator seen throughout the series, but especially main character Suze.
* The Mediator, this is the reason most if not all ghosts remain on earth for the heroine to deal with.
* The Medic abilities, but by the X-Cution arc she has fully evolved into this.
* The medical augmentation of one or more subjects on a client's account — often including the clients themselves — is one of the most common services the Dark Eldar Haemonculi are contracted for. The Haemonculi take these jobs with relish, plying their grisly trade with absolutely no regard for morality, ethics or the safety of their patients as they experiment with agonizing surgical modifications, flesh and organ grafts, chemical injections and more bizarre procedures to grant their patients physical perfection or turn them into killing machines.
* The medical community tends to do this, especially when recording something on a patient's chart. For example, a nurse can not write "John Doe is asleep" in his chart. She must write "John Doe
* The medical condition that drives Clayface III to reduce people to pools of protoplasm in the
* The medical field actually requires a good amount of this. Whether it's one patient that's seconds from death or 60 bus crash victims showing up in the emergency department on a slow Sunday night, you can't render any aid if you yourself are operating in panic mode.
* The medically alarming term "idiopathic" just means "We have no idea what caused this." As
* The medical procedure for amputating people at the waist is called
* The medical technicians who test Regan are also real medical technicians. Eerily, one of them was later convicted of murder - and was implicated in, although never charged with, the serial killings that inspired a later William Friedkin film,
* The medical term for this type of injury is "transection," and the standard example is a man who fell asleep on the railroad tracks. While survival is occasionally possible, most hospital ERs have standing "do not resuscitate" orders for patients who have been bisected in accidents.
* The Medic and spiritual leader; in ordinary circumstances there is only one at a time and they train just one apprentice to take their place.
* The Medic. At the end, when he finally calls Heffron 'Babe', it's a sign that he's getting closer to the rest of the men.
* The Medic can play his bonesaw as though it were a violin. And if it's the Amputator,
* The Medic can, through healing his allies, acquire energy to power an "Ubercharge", an 8-second glowing shell of indestructibility for himself and his patient.
* The Medic (Either a full-fledged doctor with a staff and hospital conditions or a field medic.)
* The Medic: In a team, this character is the one whose main skill is tending to the injured.
* The Medicine Charms of the Solar Exalted really stand out. They allow a skilled surgeon to cut treatment time radically, instantly purge a person of poisons through proper manipulation of Essence, and
* The Medicine Seller actually does this quite a bit — given the things he dedicates his life to hunting are eldritch monsters and people are occasionally slaughtered graphically right in front of him, he has very little emotion to offer. Comparing the earlier example to his common behavior suggests he's not as unaffected as he seems — after the illusion ends, we're treated to a camera shot that lingers on his tightly-clenched hands.
* The Medic in his spoken lines and overall character, the creators have said that

he is in fact not a former Nazi.
* The Medic is also pitiful in offensive and defensive capabilities, but the entire game is said to revolve around his abilities.
* The Medic is an example of this trope himself. He's always called 'Doc Roe', and Dick Winters is the only one that calls him Eugene.
* The Medic is a player class option, including tabletop games as well as many video games. One way to tell which team you should join is by the amount of medics they have. If they have at least one more than the opposing team (though not too many), they're more likely to win.
* The Medic is unashamedly gleeful to experiment on friend and foe alike. Despite his scientific advancements having revolutionary potential in medicine, he prefers to use them to help his team massacre the enemy and satisfy his own morbid curiosity.
* The Medic or in any other use is illegal. Before 1973, ambulances in the United States and elsewhere in the Western Hemisphere were typically marked with a safety orange cross, differing from the red cross only in its hue. Toys and paintings of ambulances commonly ignored even that nuance, instead using a red cross. After protests from the American Red Cross that the safety orange cross was insufficiently distinguishable from the protected Red Cross symbol, the U.S. Department of Transportation developed the Blue Star of Life as a replacement for the safety orange cross.
* the Medic performing his first Ubercharge heart transplant, as seen in Meet the Medic. He still controls like a drunk on amphetamines. Two memetic meatgrinder surgeons for the price of one!
* The Medic: Ratchet, sometimes sharing the role with Sparkplug and Hoist
* The Medic received a pair of mad scientist goggles (resembling the strange device Egon wore in
* The Medic's idea of "proper surgical garb" is whatever he happens to be wearing at the time. In
* The Medic's Ubercharge, which grants total invulnerability to everything except a select few environmental hazards for eight seconds to whoever he's healing at the moment.
* The Medic: Toadman and Meddy assists their teammates in liberating more areas; their abilities explicitly only works with another teammate. They also help their team recover.
* The Medic: Ton Phanan (early), Lara Notsil (midway), Elassar Targon,
* The Medicuboid is a medical device used for terminal patients that not only allows them a higher quality of life through VR, but also uses stronger electromagnets than NerveGears to stop spinal reflexes, making it an effective alternative to traditional anesthesia.
* The Medic use standard methods, but he'd rather start grafting animal parts into the patient's body to see what happens.
* The Medic: Was originally Shed Garvey, though he didn't last long enough to set foot on the Roci.
* The Medieval Battle of Chioggia between Genoa and Venice was like a Stalingrad on the water. After Genoa got a foothold in
* The Mediterranean Caper. Teri von Till feels this way about her long-dead husband, to the point of depression. Dirk Pitt tries to convince her to move on with her life.
* The Meditite and Marill lines have stick-arms and are chubby-looking rodents, respectively, but they can both have the Pure/Huge Power abilities, which double their physical attack stats, allowing them to hit
* The Medium and alcoholic, who fakes séances with the help of her daughter and a mute boy she took in. During one of her séances, she feels an icy hand grab her throat. It is never revealed whether it was supernatural in nature, or just her imagination.
* The Medium of Sburb creates a unique, distinctly alien planet for each player. Examples include the Land of Wind and Shade's bioluminescent forests, blue rock formations and rivers of oil, the Land of Mounds and Xenon's planet-circling

canyons, and the Land of Quartz and Melody's crystal mountains.
* Themed Party: A party centered around a theme with matching décor, music and dress code.
* Themed Stock Board GameA crossover with the work and a classic board game.
* Themed Stock Board Game: A pre-existing board game is given an edition tying into a specific work.
* The Medusa Amulet were beneficiaries of the power of the titular amulet after it was created.
* The Medusa Chronicles's counterparts of Christopher and Mary Soames).
* The Medusa Chronicles showcases several of these scenarios. The humans have a solar farm on the planet, and then the machines kick them off and pick the planet apart to turn it into a fleet of satellites that almost encapsulate the sun.
* The Medusa Particle Beam Cannon, which is currently in the late stages of development and is going to be used in a field test soon, if successful, will result in the creation of what is essentially a real-life portable Death Ray.
* The Medusa V campaign ended with the Dark Eldar capturing enough human slaves to use them as
* The Medusian language of trueform jellyfish consists primarily of flashing bioluminescence.
* themed webcomic where the Nazi villains are planning to use the Necronomicon for some yet-unknown evil purpose.
* The Meek. And one is a giant white cave salamander and the other a vast, malformed tiger with glowing eyes.
* The Meek, but as the story goes on she starts collecting clothing, but still no shoes (or shirt).
* The Meek is poisoned and a tracheotomy is used to attempt to save her life. It's not pretty. And then things go to hell.
* The Meek Shall Inherit The Babes is a fic all about the shows geeks hooking up with the shows babes.
* The Meek, the Carissi people uniformly have blond hair, the Pasori have dark hair, and the Santri have a wider range but tend towards brownish-red.
* The Meek the comic's website is banned; this is likely because of the nudity present in some chapters of the comic.
* The Meek, while his wife Phe is fairly tall woman. Guessing from the art, his forehead is about level with her nose.
* The meeting is a setup, as Hattley is also on Fisk's payroll. She has Nadeem hand over his gun, then proceeds to kill Winn with said gun. Ray barely has time to process the betrayal when Felix Manning.
* The Meeting Place Cannot Be Changed, in the autumn of 1945. There's no famine, but food is being rationed, and anything above the set limits costs a lot. The Black Cat gang rob stores (murdering people for food and money) and then sell food through an accomplice in a cafeteria. The scene in their hideout is a feast honest people cannot afford, with fresh cucumbers and tomatoes.
* The Meeting Place Cannot Be Changed of the series, Zheglov himself can be considered as an example.
* The Meeting Place Cannot Be Changed, Sharapov, an undercover MUR agent, faces this issue when he tries to infiltrate a gang. The gang members suspect him of being a paid informant or a plant more than an undercover police officer though. He answers with a categorical denial: "Do I have to provide a document from the Militsia that states I'm not in it"?
* The Meeting Place Cannot Be Changed: the Black Cat gang (specialty: burglary with a side dish of murder) leave a cat drawing or an actual cat at the scene of the crime.
* The Meeting Place Cannot Be Changed - Vladimir Sharapov was a former Red Army scout, now in Moscow Criminal Police.
* The Meeting Place under the clock, which is presumably meant to evoke this trope.
* The "Meet the Sniper" video opens with shots of the Sniper driving his RV through the desert; inside, he flicks a
* The "Meet the Spy" video features this trope with the BLU Spy being mistaken for

the RED Spy.
* theme features a bell, which helps add to the grim and otherworldly feel of the place.
* "(Theme From) Blood Orgy Of The Atomic Fern" has a bridge where Rodney Anonymous starts sing/speaking what sounds like
* "Theme from S'Express" by S'Express has "I got the hots for you, boop boop b-boop bep b-bep ah ah," rinse and repeat.
* The Mega Buster also qualifies, since it's stated to be a weapon that fires "bullets of highly compressed solar energy" which is in essence, a solar-powered laser. The projectiles that the Buster fires are constantly ridiculed by fans for looking a lot like lemons.
* The Mega Evolutions that appeared in Gen VI only have one model for both genders of each species. If the Pokémon that Mega Evolves has some gender dimorphism, the Mega Evolution will be modeled after the male version. For example, a female Venusaur will lose the small yellow seed in her flower when she Mega Evolves, and a female Garchomp will gain a triangular scar in her dorsal fin, like the one that the male Garchomps have.
* The Mega Man comic started being welded into the Sonic comic canon as well.
* The Megamouth shark, a very rare deep-sea shark with a huge mouth, but only eats shrimps.
* The Mega Powers: Re-formed in 1994, disbanded again in 1996. Hogan and Savage would occasionally team together throughout 1997 and 1998 as part of the nWo.
* The megaregion of Southern California (that's with a capital "S") includes every county south of San Luis Obispo County, except Imperial County.
* The Megas as an equal, or at least the nearest thing to it he can process, and eagerly awaits the chance to test himself against the Blue Bomber.
* The Megas, but he doesn't yell and even sounds more sad than angry, even though he's talking about how he intends to smash past Mega Man and kill Dr Light as payback for taking him apart.
* The Megas Doctor Lights' song is about how Megaman is the Replacement Goldfish for the son he never had. Unlike most example the song has Doctor Light loving him unconditionally and is scared to death that he has to send out his son to fight Doctor Wily, as he's the only one that can do so.
* The Megas for long enough to be able to convincingly throw the fight.
* The Megas) goes so far as to throw the same move back at him after the second attempt in "Make Your Choice".
* The Megas have a particular line in these, partially through the writing, partially because they sometimes have one vocalist take on two or more roles in the song.
* The Megasilver suit is a lot stronger than the others... until we find out that its power only lasts two and a half minutes. (In
* The Megas it, and would love to avoid it, but since it appears inevitable, he's going to go down swinging.
* The Megas. It's not clear how much of this is because of Wily's repairs and how much is just the parts actively rusting.
* The Megas rages at Dr Light for sending him to war against his wishes, while Proto Man is understandably furious that Light physically took him apart and used the bits to build Mega Man.
* The Megas shows him the error of his ways, he concludes that he wouldn't have been a good fit for the job anyway:
* The Megas: The nigh-unstoppable "peacekeeping" robot Gamma is represented by a much deeper electronic voice than either of the Megas' singers tries to pull off.
* The Megas. They're, for the most part, the most overtly villainous characters, and they get the most over-the-top moments in their songs.
* The megastructures DLC uses them not for energy but for mining, with the Matter Decompressor that extracts from the mass the black hole has accumulated for millennia.
* The Megas videogames. Sometimes they even include references to the songs being actual songs as well.

* The Megaversal Legion makes it creepier-looking than other examples.
* The Megawhatts were introduced as annoying electrical beings who play pranks on people. However, they once needed to ask Ben's help because some of them were being kept as a fuel source by the villain of the week.
* The Meg business once she notices Suyin's less-than-subtle interest in Jonas.
* The Meg demon is fond of possessing attractive hosts and varies between smacking around or making out with the Winchester boys.
* The Meg: Jonas' career as a deep sea rescue specialist was spoiled by one when he was forced to decide between going back into a sunken nuclear submarine to save his best friends (which would've risked the lives of everyone down there), or return to the surface with the eleven people they had already rescued by then. He chose the latter, something he has never forgiven himself for even years later.
* The Meg was a collaboration between the Chinese division of Warner Bros. (US) and China Media Capital (US).
* theme (he sits misbehaving cops in his office and plays it for several hours; the unfortunate victim is left deaf for a week).
* Theme Hospital, the condition "Bloaty Head" is treated by popping the patient's head with a pin, and re-inflating it to normal pressure.
* Theme Hospital") works a heart monitor beep into the music, which includes long notes meant to be a flatline sound.
* The Meiji government tried to invoke this on Makoto Shishio, Kenshin's successor as Manslayer because they feared his ambition. They jumped him at night, knocked him out, and burned him alive. That certainly ended his old career. Unfortunately for the government, it just made Shishio angry…
* theme is a notable one. The show's villain Crabby Appleton has his own also.
* The Mekon War: The Mekon, along with his Romulan and Gamilan allies, invade Citadel space.
* The Melancholy of Haruhi-chan comes the closest ever to showing any emotion (thus far) by becoming the fangirl of an unnamed anime/game series.
* The Melancholy of Haruhi-chan Suzumiya where in the final episode Yuki makes a romantic Visual Novel with Kyon as the player character and with 10 heroines, one of which is Kyon's little sister.
* The Melancholy of Haruhi Suzumiya, as, after schlepping downtown to pick up a heater for the club room, he falls asleep in a steel chair and wakes to find himself draped with two cardigans, one from Haruhi, and the other implied to be from Yuki Nagato.
* The Melancholy Of Haruhi Suzumiya at the conclusion of a murder mystery episode. During the same scene, Koizumi duplicates the mannerisms of Phoenix's rival, Edgeworth, and Mikuru copies poses from Phoenix's sidekick Maya.
* The Melancholy of Haruhi Suzumiya books being adapted to anime seemingly become more and more unlikely with every passing year.
* The Melancholy of Haruhi Suzumiya (both the book and the first season) is effectively a closed circle invocation as well, the circle being delimited by the dimensions of Haruhi's "closed space", and the time available to escape being delimited by how effectively the Celestials can stomp about. It is an interesting reduction of the trope to its simplest arrangement. There are only two people in the closed space, one of whom is the hero (Kyon), and one of them the unknowing monster (Haruhi), but only Kyon recognizes what is going on. Kyon has to figure out the "mystery" of how to escape the trap. The two ghostly intrusions (Nagato and Koizumi) are allowable in that their fates are also tied to the resolution so are arguably closed in as well, and they don't give Kyon any new information (they basically remind him of what they had previously told him).
* The Melancholy Of Haruhi Suzumiya does a pretty good job of blending, but a couple incidents stand out.
* The Melancholy of Haruhi Suzumiya emotions, it's possible she's laughing on the inside when something funny happens, but her rare attempts at humor suggests she really doesn't understand it.
* The Melancholy of Haruhi Suzumiya girls' uniform jackets while he was napping in the cold club room. Earlier in the episode, Mikuru gave him her scarf as well.

* The Melancholy Of Haruhi Suzumiya got 14. The second season also has 14 episodes (a total run of 28, including the first season).
* The Melancholy of Haruhi Suzumiya in front of Haruhi so she would rope them into joining, because their respective superiors ordered them to spy on her.
* The Melancholy of Haruhi Suzumiya, in his usual snarky way, will usually break a potential beat with a thought of his own. This doesn't happen when he encounters something he can't explain, like accidentally walking in on a Mikuru clothes-changing session.
* The Melancholy of Haruhi Suzumiya; it has constructed humanoid Agents who can observe and interact. These Agents are partially their own being, partially of the Overmind. How exactly individual Yuki is in comparison to the Overmind is a common theme in the series.
* The Melancholy of Haruhi Suzumiya). Kyon describes her first smile as "reminiscent of a blazing sun in an equatorial sky," and later uses adjectives like "divine" and "cherry blossoms in full bloom" when referring to it.
* The Melancholy of Haruhi Suzumiya. (Kyon makes sure the viewer knows that Mikuru did return to the room, but doesn't think about who left the second cardigan).
* The Melancholy of Haruhi Suzumiya of the broadcast. The company responded by putting the episodes in broadcast order in one disc and chronological order on the other in future releases.
* The Melancholy of Haruhi Suzumiya, so her friends have to juggle playing dumb with using their own knowledge of tropes to fix whatever damage Haruhi has caused.
* The Melancholy of Haruhi Suzumiya that Haruhi and Kyon are getting closer has to do with Haruhi's habit of nonchalantly stripping down for gym while male classmates are still in the room. Kyon supposes this behavior reflects how little respect Haruhi has for men, essentially treating them like inanimate objects. When she demands Kyon leave the club room when she changes, it's significant.
* The Melancholy of Haruhi Suzumiya the arc. It also successfully broke the rule of never showing a story arc out of order. Helped largely by Arc episodes being still in order, just with the Breathers inserted in-between.
* The Melancholy of Haruhi Suzumiya, though every piece has its own defined genre.
* The Melancholy of Haruhi Suzumiya to balance out the bet, equating her with the three computers. When the computer club are shocked, she offers Mikuru and then herself. This last provokes panic, so in the end only their computer is wagered.
* The Melancholy of Haruhi Suzumiya, we see an adult woman ripping apart papers and letting them fly from the balcony. Does this have anything to do with the following plot? No. In fact, the "murder mystery" that follows is one great big red herring; it's just a game set up to prevent Haruhi from getting bored, which could have inadvertently caused a real murder mystery to take place.
* The Melancholy of Haruhi Suzumiya when Kyon meets an adult version of Mikuru.
* The Melancholy of Haruhi Suzumiya within the game and the tinny, 8-bit MIDI version in the 'real world'.
* The Melancholy of Haruki Suzumiya, Haruki has Mitsuru wear a maid outfit for a photo shoot.
* The Melancholy of Suzumiya Haruhi-chan, Ms. Mori the maid delivers the following line while in the air, just before drop kicking (and deliberately missing) Tsuruya:
* The Mel Brooks Number: A song that sounds like a sad song, but is actually funny because the lyrics, context, or characters' behaviour is.
* The Melee-based Brawler path of the Pirate class also learns a skill that converts HP into MP. The higher level the skill, the less HP you have to use to gain MP.
* The "melee-only hunter" takes a class primarily used for ranged attacks and requires the player to use it without using any ranged weapons whatsoever.
* The Melinda Chronicles canon. Melinda notably averts getting angsty over it because she considers the children she's adopted over the centuries like Tails no less her children than biological offspring would be.
* The Melkin Fool in Red; a Solar Night Caste who was captured, tortured and converted by the Lover Clad in the Raiment of Tears, she looks like a harlequin... Except she doesn't wear clothes. Try not to think too much about it.

* The Melnorme. Culturally, they consider giving anything, without fair and just compensation, to be vulgar and inappropriate. One time a different race told them their entire history and all of their knowledge for free, the Melnorme basically forced them to accept a gift in return. Do note that this goes both ways for the Melnorme: while they do charge for everything, everything they sell is
* The Melodifestivalen-inspired voting system in place from 2016 – each jury announces in turn, then total televote points are added in ascending order – is deliberately designed to prevent runaway winners and heighten the drama of the results portion of the show (working incredibly well each time it's been used).
* The melody for "Can't Help Falling in Love" has its origins in "Plaisir d'amour", a French love song composed by Jean-Paul-Égide Martini in 1784.
* The melody known as "Jesu, Joy of Man's Desiring" from J.S. Bach's sacred cantata
* The melody of Gracie Fields' 1930s song "Sing As We Go" lives on as the
* The melody to "Be Our Guest" was originally intended as a rough ditty that Alan Menken played to give lyricist Howard Ashman a general idea to the style of the Song. When the time came to actually put music to the lyrics, Alan Menken soon realized that the ditty he played worked with what Howard had written.
* The melody to the children's song "Head and Shoulders, Knees and Toes" is taken from the verses of the song "There Is a Tavern in the Town", a late 19th century drinking song. It has also been set to "London Bridge Is Falling Down", but unlike "There Is a Tavern in the Town", that song is still fairly well-known in its own right.
* The melody was already the movie's theme long before the rhyme itself was revealed, and was made even creepier after the fact.
* The Melt in black with slicked red hair. Upon Naruto saying "I thought you were a fox.", the Kyuubi shows his true form promptly scaring Naruto and causing the Kyuubi to point out that he chose that form for a reason.
* The Melting of the Iceage was its own apocalypse, and the world exploded at least three times during the Invasion Cycle. And that's to say nothing of the other planes we've visited since Invasion, where each one has had at the very least one world-ending event, if not two or three, in addition to the general world-wide-war situation most of them are in.
* The Melting Season. The performing arts school where the main character Giselle goes used to be a hospital during World War I(or the Civil War) and is filled with crazy people.
* The Meltokio Coliseum has several tournaments available in the player's choice of group fights or
* The Member Berries from the episode of the same name, which placate people by talking about nostalgic things, like "Member Chewbacca?" or "Member Ghostbusters?" But there is a side effect; after a while, they start saying things like
* The members of Arachnophobia should also count as they have similar white masks, but are decidedly much more villainous.
* The members of Japanese rock band Beat Crusaders always wore masks featuring dot-matrix print-outs of their faces, never showing their actual faces in public.
* The members of R.E.M. were, depending on whom and when you asked, amused or angry that they'd see couples holding hands to "The One I Love" at concerts, which doesn't fit with the lyrics ("
* the members of the Ackerman, which apparently led to the government persecuting their clan in the past.
* The members of the Ashwood Abbey are of a similar make-up, only they do it using supernatural creatures (such as werewolves and vampires) and only after making sure they've "had their fun" with the critters first. The Hunt Club thinks they're pussies.
* The members of The Chamber are also prone to this. However, it's worth noting that the Chamber is an organization composed entirely of
* The members of the House of Savoy had an habit of fighting in battle, both before and after becoming the royal house of Italy. Among their
* The members of the Lollipop Guild are represented as stereotypical union tough

guys, who talk out of the corners of their mouths.
* The members of the obscure American-British girl group No Secrets have all but vanished from existence. Reportedly, Angel Faith is a doctor, Carly Lewis is married, Erin Tanner (now Nicki Foxx) is a solo artist, Jessica Fried (now Jessi Malay) is a solo artist as well, and Jade Ryusaki now resides in Hawaii as a model. Good luck trying to track them down!
* The members of the Order of the Stick learned a while back that their planet is actually a prison for an
* The members of the Pache tribe in are all named after elements of the periodic table: Silva (silver), Goldva (gold), Kalim (kalium AKA potassium), Rutherfor (rutherfordium) and so on.
* The members of the Terrible Trio in the comics were named Warren Lawford (Fox), Gunther Hardwick (Shark), and Armand Lydecker (Vulture). They're renamed, respectively, David, Justin, and
* The members of the Zathras family, the caretakers of the Great Machine on Epsilon III, are all named Zathras, with small differences in pronunciation. This mightily confuses
* The members of Twelve-Step programs count the days since they last drank alcohol or otherwise returned to their addiction, and use visible symbols in the form of a poker-chip-like object for each drug-free month.
* The member species of the former Covenant also tend to be aversions; the Elites and Brutes are each divided into a number of opposing factions and clans (several of which employ a wide variety of other species), and the Jackals are such anarchists that even
* The Mementos targets for Takemi and Iwai's Confidants are rather easy compared to other Targets. This may be because their Confidants are among the first to open up, although they have steep stat requirements for the events unlocking the requests (Takemi's requires Rank 4 Charm, while Iwai's requires maxed out Guts).
* The memetically awesome website" message. The Facebook page also acted as one for the park for a while.
* The memetic phrase "Pilot the Eva, Shinji, or Rei will have to do it again" and its snowballing parodies through a lot of franchises, from
* Thememobile: Customized motor vehicles used by superheroes or supervillains.
* The Memoirs of General Thiébault feature a duel that ends like this: two officers were fighting, one fell mortally wounded by the first shot; but he gathered his strength and stood up, shouting to the other who thought that the fight was over: "En garde! I still have one minute to live, and that is enough to take my revenge." Indeed, he shot, killing the other on the spot, and then died.
* The memorable "Butterball hotline" scene from the episode "The Indians in the Lobby" of
* The Memory Band share a drink and talk about the people who qualify for this role in their lives.
* The 'Memory of Mankind' by serving as a time capsule. It archives crowd-sourced submissions from the Internet, public institutions, and arbitrary individual contributors onto ceramic tablets stored in a salt mine in Austria.
* The Memory Trap kicks off with a Russian defector being murdered just as he makes contact with the British agents who have come to fetch him, managing to pass on a cryptic and incomplete message before dying.
* The Memory Wars, believe that immortality is a far better alternative to death and reincarnation. This is because no-one's ever remembered what it's like between incarnations, and most members join the Council out of fear that they won't really be themselves anymore if they are reincarnated.
* The Memory Wars, dated briefly in college. They're still close enough to go investigating murder scenes together.
* The Memory Wars in that Nathan and his Conclave try to avoid mundane interference (since they break the law on a regular basis, and to prevent attracting innocent bystanders who might get hurt), and guns make a LOT of noise. Also, most of their opponents are creatures who are so old they're more used to ancient weapons, or demons that come from realms where firearms don't exist.

* The Memory Wars is set in New York, and alludes to the city itself almost having a soul of its own, although it's specified that all places have this, as it's an energy generated from the emotions of the populace.
* The Memory Wars, Nathan and Elena do this while trying to figure out how to deal with their past-life feelings for each other.
* The Memory Wars: Nathan Shepherd and Elena De Santis have been these throughout multiple past incarnations.
* The Memory Wars sees its hero, Nathan Shepherd, spend a lot of his time doing this.
* The Memory Wars. The lining is lightly armored, so it offers protection as well as concealing any weapons he's carrying.
* The Memphis Belle. There's actually a montage of all the nose art of the bombers in the squadron. One plane chose to avoid cheesecake and instead had a painting of a skunk squirting Hitler, with the caption "In Der Fuhrer's Face".
* The Memphis Belle will definitely be paying attention when the CO gives the briefing for the bombing raid. On other occasions, the narrator speaks of "we". The idea is obviously to make the viewers feel part of the mission and the war.
* The Memphis Grizzlies use "Go Harder" by Future as their theme song. During time outs at home games, they play "Whoop That Trick" from the
* theme music adds to the effect by being at once humorous and intimidating, just like the man himself.
* Theme Music Power-Up: When a character does something amazing, their theme plays loudly.
* Theme Music Withholding: The theme song goes away for a few episodes, but then comes back.
* "The Menace of the White Dwarf". Wendy and Marvin's bicycle disappears while they're at a gas station. When they try to tell Superman about it, he tells them to hold it a minute.
* "The Menagerie, Part 1" had Spock using a computer to convincingly create commands in Kirk's voice.
* The Menagerie use this sort of technology, including an elevator hidden in a rock face which leads to an advanced underground layer, and a viewscreen embedded in rock (probably an attempt to convey a flatscreen-like device) shows up in the episode as well. However, though their technology is impressive, the Talosians, who are all weakened survivors of an ancient nuclear war, have forgotten how to maintain it and now rely primarily on their psionic powers for survival.
* "The Menagerie": Vina (Susan Oliver), also a spaceship crash survivor.
* "The Menagerie": When Spock finds out that Kirk's shuttle has passed the point of return, he places the ranking bridge officer, Lt. Hanson, in operational command
* Theme Naming: A group of people whose names share something in common.
* Theme Naming also fits into this, like a goat-man named Capra, Latin for goat, and a bee-woman named Melissa, Greek for honeybee.
* Theme Naming — with names like Tunguska, Morokweng, and Vredefort, they are all named after significant earth impact events too.
* Theme Naming reason. Her first appearance has her wear a shirt with "BULMA" in big letters across the chest, cementing that translation more or less for all time. Vegeta's daughter Bura (Bra) became Bulla, likely for the same obvious reason.
* Theme Naming rules the day, just close enough to real-world name inheritance to be confusing to viewers.
* Theme Naming: the "Fio" (Earth) caste performs manual labour as well as scientific research, the "Kor" (Air) caste covers piloting and transportation, the "Por" (Water) caste deals with politics, diplomacy, and bureaucracy, and the "Shas" (Fire) caste serves as the Tau military. There is also a fifth caste: the "Aun" (Ethereal) caste, who govern the empire. In addition, caste members have a rank for their place within the caste. In ascending order from lowest to highest: Saal, La, Ui, Vre, El, and O. For example, a "Fio'La" is the equivalent of a factory labourer, a "Shas'Vre" is the equivalent of a military veteran or officer, and an "Aun'O" is the equivalent of a king or emperor. A Tau's caste and rank make up part of their name.

* The Menaphite Pantheon: Tumeken (sun), Elidinis (water), Amascut (destruction), Het (health), Scabaras (isolation), Apmeken (sociability).
* The men are later revealed to be innocent as someone stole their van, let someone else use it to commit the rape/murder, and returned it without their knowledge.
* "The Men" consists almost entirely of "Sheep among wolves/We are the men/Silent and strong/Beautiful eyes" repeated.
* The Menendez brothers but were sentenced to life in prison without the possibility of parole after the judge limited much of their abuse testimony during their second trial.
* the Menendez Brothers, who spent the months after their father's passing living large, spending 700,000 dollars in under a year. It also ended up being a major reason they were found guilty, as while their father had been severely abusive (which might allow the verdict to be lowered by way of self-defense), the fact that they were so happy to blow their cash convinced the jury that their real motive was to get his money.
* The Men from the Ministry, after Mr. Lamb accidentally buys thousand pounds worth of light Stilton cheese, Sir Gregory is pretty much this.
* The Men from the Ministry. After transport people return the plans for a potential flyover wanting instead an underpass, Lamb orders Mildred to send the plans back turned upside down.
* The Men from the Ministry always makes his arrival clear to everyone when enters the office.
* The Men from the Ministry angrily calls and asks Lennox-Brown if he's forgotten annual grants for all the national organisations. He immediately states that he definitely hasn't, since he's never even heard of them.
* The Men from the Ministry, as two Mayors of different London boroughs are tied into a fierce argument over the fluoridation of a shared reservoir, Hamilton-Jones decides to make one of them change their mind on the matter. Unfortunately, Lamb, thinking HJ isn't going to do anything about it, does the same to the other mayor, which takes the whole debate back to its starting point.
* The Men from the Ministry but fortunately re-recorded in Series 14 as "The Christmas Spirit"), a special episode "A Present For Norman" (that is completely lost) aired beetween the first two series and Series 3's "The Post Office Pantomine".
* The Men from the Ministry calls Sir Gregory "bunny". Sir Gregory in turn calls her "lotus blossom".
* The Men from the Ministry doesn't know how to lie by his own admission.
* The Men from the Ministry during a trip to New York two poorly-worded notes One and Two left to their hotel and office back at London leave FBI and the British Government into thinking the two are spies planning on defecting to USSR.
* The Men from the Ministry episode "Seal of Office" changes the episode's circus seal into a circus bear, since the plot requires it to be confused with something else via pun. In the original General Assistance Department wants seal for the package they are about to send into NATO headquarters, where as in the Finnish version they're waiting for a collection letter for their delayed payment on the shipment (collection letter is "karhukirje" in Finnish, literally meaning "bear letter").
* The Men from the Ministry episode "The Great Trouser Troubles" has a lot of fun with this with the China's ambassador Hu Flang.
* The Men from the Ministry features the arrival of an inspector to the Ministry, with the General Assistance Department always desperately attempting to make it look like they're doing a lot of work instead of slacking all day.
* The Men from the Ministry has a car that's this, which in one episode breaks down in the middle of the street.
* The Men from the Ministry has a habit of saying "righty-ho" in the place of "right away". Also Mr. Crawley from the neighbor office always forgets names of basic everyday things and calls them "Whats-It's-Names."
* The Men from the Ministry) has been made the Permanent Under-Secretary, he spends most of his time making prank calls all across the ministry insulting and mocking

pretty much everyone.
* The Men from the Ministry has One and Two stripping down in order to negotiate with the owner of a Nudist colony about buying the land, but since they do it in the night they keep going into wrong houses in the dark.
* The Men from the Ministry, he assumes that he has got the job from the get-go because he is fifteen years senior to all other applicants. Upon receiving the letter from Staff Appointments, he doesn't even bother opening it until Lennox-Brown convinces him to at least read what exactly they are saying about his acceptance. Turns out Mr. Haggit from the cantine got the job instead.
* The Men from the Ministry. However, when the Finnish run adapted the episode "The War with the Isle of Wight" in 1998, the creators apparently couldn't find a way to replace her role adequately with another character, leading to Ms. Adams popping into the office for one episode, and then never to be heard from again.
* The Men from the Ministry in the episode "Thoroughly Modern Ministry". Several civil servants bring him gifts like chocolate and roses, and Sir Gregory even tries to seduce "Raquel" at the end of the day and is only stopped in his advances because he'll have to leave to meet his wife.
* The Men from the Ministry into thinking it's just his breakfast or medicine.
* The Men from the Ministry is an old Permanent Under-Secretary who's after the young women of the Ministry, especially Ms. Daphney Bentwater from the typing pool.
* The Men from the Ministry is often mentioned in great detail, but never actually appears in the show.
* The Men from the Ministry Lennox-Brown for the rest of the series. The two were practically the exact same characters with different names, and the show never acknowledged the change.
* The Men from the Ministry Lennox-Brown is being interrogated by an FBI agent, and assumes he is from Federal British Industries.
* The Men from the Ministry Ministry's janitor or a charwoman, she's a hygiene operative.
* The Men from the Ministry Mr. Lamb is being depressed by the utter boredom of his life, and Mildred and Mr. Lennox-Brown decide to make him take dancing lessons so that he will find more joy in his life. He does find dancing very enjoyable, so much that he plans to quit his job in the Ministry and become a professional dancer.
* The Men from the Ministry, Mr. Lamb is dabbing his eye with a frozen rissole, since he couldn't afford a raw steak.
* The Men from the Ministry Mr. Lamb is often described by the narrator as "an eager young executive". In the show proper he is just as lazy as every other civil servant of the Ministry.
* The Men from the Ministry Mr. Lamb's landlady Mrs. Bradby makes consistenly terrible food. At one point Lamb describes having shepherds pie and rhubarb custard... on the same plate.
* The Men from the Ministry no matter how insane they are, and Forth Robinson, a Welsh reporter who often ends up witnessing the chaos the General Assistance Department causes first-hand.
* The Men from the Ministry of General Assistance Department, but his own superior Lord Stilton sometimes plays this role saving (mostly unknowingly) the staff of Department from Sir Gregory's wrath.
* The Men from the Ministry One and Two have a fiery argument over the quality of latter's recent play for the Ministry's amateur theater, and afterwards refuse to talk to each other and try to use Mildred as a relay. She, however, isn't having any of it and quickly forces them to make an agreement.
* The Men from the Ministry opens with One and Two talking about an alarming national catastrophe that's threatening entire nation's pride. Then we find out they're talking about losing a cricket match to Australia.
* The Men from the Ministry overbearing mummy. Lamb suggests contacting the Mafia, which Sir Gregory immediately shoots down... since they don't know their address.
* The Men from the Ministry: poorly worded notes end up causing havoc, telephone-conversations are misinterpreted due to being heard only from one end and out-of-

context and instructions aren't laid out properly leading to big misunderstandings among other things.
* The Men from the Ministry, Richard Lamb and Deryck Lennox-Brown, are played by Richard Murdoch and Deryck Guyler respectively.
* The Men from the Ministry, since she doesn't get much material in the comedy (apart from the episode "Moderately Important Person", where she's the main focus of Prince Salim's lust).
* The Men from the Ministry, Sir Gregory frequently threatens to reassign One and Two to the Outer Hebrides.
* The Men from the Ministry Soviet/generic Eastern Block agents appear as antagonists in multiple episodes.
* The Men from the Ministry staff of General Assistance Department is listening a horse race from the radio when all the sudden the speaker informs that horse My Wotsit (which everyone thought was going to lose) starts to moving up. Mr. Lamb protests that they said that My Wotsit didn't have a chance, which the speaker replies that he was wrong in his earlier statement about My Wotsit's chances.
* The Men from the Ministry that he is, Wilkins naturally ends up destroying the Ministry's plumbing in the process.
* The Men from the Ministry, the head of the General Assistance Department Sir Gregory Pitkin is very tend of hitting One and Two or throwing something at them after they've messed up greatly on their assigments.
* The Men from the Ministry the newsreader Bryan Martin will report the most ridiculous things caused by One and Two's bunglings with utter seriousness, no matter how much of an insane chaos London is in.
* The Men from the Ministry to the core, being a mean and unnecessarily cruel as well as occasionally violent towards his underlings. However the General Assistance Department is also the most incompetent office in the whole Whitehall, so his anger is often more than justified.
* The Men from the Ministry was run over by a truck, and after leaving it on the Ministry's lobby it had been displayed the next day as modern art.
* The Men from the Ministry were co-written by John Graham, who also played most of the side-characters such as Lord Stilton and Mr. Crawley.
* The Men from the Ministry, when assessing Mr. Lamb, Ministry's psychiatrist Dr. Schwein states that he has many latent aptitudes and unplunged propensities. Lamb immediately assumes that Schwein is insulting him, and Lennox-Brown has to tell him that Schwein is complementing him.
* The Men from the Ministry, when discussing how the Postman refused to give them back the letter they accidentally send to the wrong person, One credits the Postman's honesty, as he threw Two's five pence bribe to the gutter.
* The Men from the Ministry: whenever One and Two oversee a construction site or any other business, they always tangle on to the smallest of regulations, laws and orders no matter how insignificant they are. They also love to create forms full of personal questions which have nothing to do with what the form's about and are often impossible to answer.
* The Men from the Ministry when Mr. Lamb informs the rest of the General Assistance Department that he has been made the new Permanent Under-Secretary (or so he thinks), Lennox-Brown assumes he's having a nightmare caused by the Stilton he had for lunch.
* The Men from the Ministry, when Sir Gregory decides to go on an extended weekend he leaves Mr. Lamb in charge of a lot of minor jobs that have to be done. Lamb, however, misunderstands his instructions and thinks Sir Gregory is retiring and making him the new Permanent undersecretary. He immediately turns into a ruthless tyrant forcing all staff of General Assistance Department work 10+ hours a day and insults pretty much everyone within the Ministry within few days.
* The Men from the Ministry, When testing the new armored van for the Ministry, Mr. Lennox-Brown tries sound serious:
* The Men from the Ministry, wile having the occasional arguments, are closest friends each other has and will help each other in any problems they face.
* The "menial jobs and not book smart" description is averted in real life: a

French sociologist studied the metal crowd, taking for basis the fans who attended the Hellfest Summer Open Air festival of 2011. His conclusion: higher diplomas and less unemployment among metalheads than other youth groups. Having a good job is often
* The Men in Black: A common feature of various political conspiracy theories (especially ones about UFOs and aliens); in which the government sends out well-dressed secret agents to intimidate people who witnessed strange or suspicious events into keeping silent about everything they've seen.
* The Men in Black described were the creepiest sort as well. They had reptilian features, always sported a
* The Men in Black describe them as vaguely olive-skinned, and with features that make them hard to pin down, ethnically. Of course, many people claim they're disguised aliens or something, so likely not any real variety among humans (that's assuming they exist).
* The Men in Black for the express purpose of having them think and feel in ways that are totally alien to them, with the first hybrid being a man named C. Flayton Ruell.
* The Men in Black: Generic agents, often involved with investigating or denying aliens' existence.
* The Men in Black in the area and maps a small part of the man's face onto a model, extrapolates the rest of his face from that, and pops up with an identity. Castle and Beckett are surprisingly unfazed by the technology.
* The Men in Black on humanity specifically: can't risk the neutral zone stop being neutral.
* The Men in Black responsible for keeping something secret from the general public.
* The Men in Black that she is out of things to report on, and is only interviewing random bystanders as an attempt to fill time.
* The Men in Black, the non-descript gents wearing a dark three-piece suit, reflective shades, and earpiece, who work for the Secret Service, Special Branch or perhaps some shadowy organization that runs everything.
* The men in Ironborn armor who pursue Theon in "Walk of Punishment" are these, except for their leader. They are deliberately making use of this trope by pretending to be Greyjoy soldiers to mess with Theon's mind.
* The Men in Letters bunker is warded against almost all supernatural creatures.
* The men in the Nick Berg video and other beheading videos. The executioners wear balaclavas and kaffiyeh, so we do not know their real identities.
* The Mennonites (another Anabaptist sect) are somewhat more accepting of technology than the Amish are. A typical restriction would be that you can have a car, but it must be painted entirely black with no chrome. Moreover, there is tremendous variation among Mennonite groups, ranging from Old Order groups scarcely different from the Amish, to modernist ones with no tech restrictions at all.
* The men of Bretonnia fight primarily as armoured knights, wearing a panoply of armor and using weapons drawn from the armouries of European knights from the 12th to 16th centuries - mainly lances and shields. Bretonnia, being a land of Arthurian chivalry and heroic adventure, could hardly be otherwise. Questing Knights, however, use greatswords instead of the lance, which they symbolically set aside to denote giving up their lands and duties in order to quest for the grail. The peasant men-at-arms in Bretonnia are a sorry lot, however, and use badly-kept spears, billhooks and halberds or wooden longbows, like much medieval peasant militia. The contrast with the wide range of weaponry used by the other human army in the game - the Empire - is quite deliberate, and emphasises the distinct cultures of the two nations - chivalric and knightly on the one hand, pragmatic and technological on the other.
* The men of Maggody arrange a tontine for possession of the bass boat in Joan Hess's
* The men of the Brotherhood Without Banners proudly proclaim that some of them were once swineherds but now they all fight for the people.
* The men of the Night's Watch belong to a semi-monastic order where they have to

have vows of celibacy and renounce all claims to heritage and lands. Calling them monks would be a stretch, since they don't subscribe to a faith (though recruits swear their vows before the Seven or the Old Gods, whichever they choose). The celibacy vow is very lax, as they are informally allowed to have sexual relations as long as these don't produce any offspring. The recruiting has also become gradually lax as well, as they have to scrape from the bottom of the barrel and recruit mostly from convicts and criminals, whereas in better years many lords and heirs "took the Black". The Watch has become a
* The men of the Night's Watch, the wildlings, and nearby townspeople tend to be a much more motley and diverse group than the comparatively vanilla Jon Snow. Yet when they are onscreen, their personalities and complex motivations are usually only revealed so far as they impact main characters they share screentime with (such as Jon) and you rarely, if ever, see them pursuing their own ends. This makes sense on the writers' part, since keeping the story about the Wall as linear as possible (by primarily focusing on how it relates to Jon, who is one of the main point-of-view characters for this storyline in the books along with Sam) means there is more time to spend on the other storylines.
* The men of the Saiyan race took this approach: they only get into romance and courtship simply to have offspring, and even then it's notable that Bardock (in the new backstory) actually
* The men of the Southern Water Tribe left to fight the Fire Nation before the story starts. The heroes fight alongside them in several battles.
* The men of the Thunderbird Squadron were all transformed into attractive women, but they were mostly attractive
* The Men of Valhalla are migration-era Vikings (as in, the Odin-worshipping, axe-swinging, mead-swilling, raid-and-pillage kind). The Men of Wotan share some Vikingness with their western cousins, but have more of a medieval Rus thing going on.
* The Mensa Puzzle Book has a series of these which are turned into puzzles by presenting the story and asking the reader to guess the punchline.
* The Men series that presented three different shows from different companies, one of which was Universal)
* The men's FIFA World Cup will be held in Qatar in 2022 and in the United States alongside a number of games in Canada and Mexico in 2026 (the U.S. hosted the 1994 Cup and Mexico held the 1970 and 1986 championships). The FIFA Women's World Cup host for 2023 is set to be announced in June 2020, with candidates being an Australia/New Zealand joint bid, Brazil, Colombia, and Japan. None of the candidates have hosted the women's edition, though two have hosted the men's edition (Brazil in 1950 and 2014, and Japan alongside South Korea in 2002). The 2027 women's host is likely to be announced in 2024.
* The mental disease known as Pica causes people to uncontrollably eat things that are not conventionally considered edible. Dirt, sand, paper, wood, stones, rusty nails, hair... Depending on the severity of the disorder and developmental level of the afflicted individual, they may be
* The Mental Illnesses Jreg posted the video and made a poll captioned “Should this be the next series” with both answers of the poll being “no”. Three months later? It’s an actual series.
* the mental image of a Faye/Dora lesbian scene. Mostly amusing due to, apparently, being infectious.
* The Mentalist, 5'4 Robin Tunney (Lisbon) is pretty much a head shorter than everyone. This makes her unquestioned (well, except by 5'10.5 Jane) authority over them all even more impressive.
* The Mentalist. After Lisbon is injured (by one of Jane's stunts), CBI boss Hightower joins Jane in the field. When they are going to question a suspect, he asks her if she's going to be bad cop. She replies that she will do what she always does. Jane says that's exactly what he meant.
* The Mentalist after several seasons of unresolved sexual tension and a lot of fan shipping. Of course, Jane's past come to play as at least one of the reasons of why he was reluctant to explore those feelings.

* The Mentalist against each other when he tricks The San Joaquin Killer into badmouthing Red John on TV. In the next scene, the San Joaquin Killer winds up gruesomely murdered, Red John-style.
* The Mentalist: Agent Michelle Vega asks Kimball Cho to do a trust fall to rebuild his trust in her in the seventh-season episode "Black Market". Cho tells her if she tries it, she'll end up on the floor. But, though they don't do the trust fall, Cho does ask her to go with him to the gun range at the end of the episode.
* The Mentalist, a high school drama teacher had a love affair with her student. She killed the victim of the week (a fellow teacher) because he saw them making out and wanted to report her.
* The Mentalist, a lawyer, is killed when his speedboat is destroyed in an explosion. Lisbon and Jane, who were already on the scene when the bomb went off, rush over, only to see the man's severed arm suddenly get tugged underwater by what is almost certainly a shark.
* The Mentalist, a married couple, are found. Likely nostalgia as they were going to his high school reunion.
* The Mentalist and a good understanding of human nature) turn out to be quite useful for police work, though... He's strongly opposed to psychic claims because of this.
* The Mentalist and wants to observe the agent's reaction to the accusations. If the agent really is dirty, he will assume that the FBI has found evidence of his other wrongdoing and are misinterpreting it as evidence of him being the mole. If he tries to explain it away, Jane's suspicions will be confirmed and he will know where to find the real evidence.
* The Mentalist. At the end of the episode, he's moving stiffly and described by Lisbon as "creaky", but the doctor apparently said he'll have no lasting damage. Jane responds by suggesting the doctor should try it sometime.
* The Mentalist averted this (mostly) for the first six seasons, setting the show in California as well as filming there. Now that the show has moved to Austin, it's no longer averting the trope.
* The Mentalist been other women whom he's met after his wife that he's shown to have feelings for. Sadly, none of these have gone well so far.
* The Mentalist begins with a guy being blown up by a bomb vest he was forced into. The bomber later puts a similar vest on Lisbon, but Jane manages to figure out who's responsible and they get it disarmed without incident.
* The Mentalist, but not to the point of helping him out of other scrapes.
* The Mentalist called "Code Red", a bioweapons researcher finds out that one of the vials with a super-virus has spilled. She immediately locks down the containment room with her inside and calls CBI to get them started on looking for her murderer, knowing she only has hours to live.
* The Mentalist - certainly, it IS pretty, but quite realistic anyway (automatic defibrillator!) and the "reliable" part is justified (the reason for passing out is drowning, which tends to come with a better prognosis).
* The Mentalist, Cho's confidential informant Summer confronts him in an elevator after he fired her, demanding her job back. She tells him that she's figured him out - that he likes her, but fired her so he doesn't have to admit it. She shoves him, demanding that he admit it. He admits that he does like her and she slaps him, telling him again to admit it. Then she realizes what he said.
* The Mentalist: Co-workers at California Bureau of Investigation Wayne Rigsby and Grace Van Pelt are dating but keep it hidden, since coworkers are not allowed to date.
* The Mentalist diner is the only one which could afford to put a fancy sign on the highway to attract more customers.
* The Mentalist episode "Code Red" with a murder victim and her husband.
* The Mentalist episode "Redline", the killer stuffs the body into the trunk of a sports car when security shows up unexpectedly. The killer is unable to retrieve the body and the car ends up on the showroom floor.
* The Mentalist episode "Rose Colored Glasses," this happens to Lisbon and Jane at a high school reunion. They take the opportunity to play the trope straight.

* The Mentalist episode "Ruby Slippers". Jane and Van Pelt are examining the childhood bedroom of a murder victim, which is very precisely decorated but with no real elements of individuality; Van Pelt mentions that it "looks like a furniture catalog threw up in here". Given that it's decorated with classical masculine themes, Jane deduces that the victim's father probably decorated it to surround his son with "manly" energy after discovering that his son was gay.
* The Mentalist episode "Scarlet Letter" an accomplice of the killer dies during the investigation. When they bring the killer in, the corpse is propped up in a chair and they claim he's confessing in exchange for a lighter sentence. The killer confesses, at which point they reveal the accomplice is dead. The director was not amused.
* The Mentalist episode, when a suspect is asked why he'd been having an argument with the murder victim he replies by asking about the statute of limitations for dealing a certain kind of drug before giving an answer after finding out that he can no longer be prosecuted for that.
* The Mentalist, fans speculated that the guy who was killed by Jane in the ending of the episode was not Red John. Jane's actor also hints at this in a pre-season interview explaining the premise of the fourth season.
* The Mentalist features a male example in Craig O'Laughlin, an FBI agent who begins dating and eventually gets engaged to Grace Van Pelt. He turns out to be an associate of serial killer Red John. Unfortunately, they don't figure this out until after Van Pelt and Lisbon have let him in on the location of a key witness against Red John, and Van Pelt ends up having to shoot him to protect Lisbon and the witness.
* The Mentalist find what they were looking for, since at best that would mean they found it in the last possible place it could be (extremely unlikely), or more likely not at all.
* The Mentalist good), which tells him where the gun is. Although likely as not it'll be a misdirection, telling Alice this while Bob (the real killer) is in the room, so Bob will look while he thinks Jane is paying attention to Alice.
* The Mentalist, has caught several killers who escaped others' suspicion by pretending to be disabled, mentally handicapped, and such.
* The Mentalist has His Red Right Hand in which Jane and Lisbon are lightheartedly joking with a secretary as they make their way to Bosco's office... where Bosco and his entire team are found massacred.
* The Mentalist has Jane blaming himself for the deaths of his wife and daughter. He did technically cause it to happen, but really all he did was get overconfident and piss off the wrong person; he had no way of knowing what Red John was going to do.
* The Mentalist has one reading "You'll get a call in 2 hours. Take the jewels where you are told. No cops, or your aunt dies."
* The Mentalist has Teresa Lisbon and Grace Van Pelt. Lisbon is even the team leader, but not the show's protagonist.
* The Mentalist has the serial killer "Red John", who always leaves a smiley face drawn in the victim's own blood.
* The Mentalist he and Lisbon now work with tangle with an anti-government commune in Texas. Agent Fischer investigates a farmer's market incognito after meeting with a wall of silence as an FBI agent. After one of the members she talked to previously outs her, she is irately informed that she is required to identify herself as a law enforcement officer.
* The Mentalist. He and the CBI team are investigating a dead body in a suburban neighborhood. They follow a guy who looks out of place and he claims to be house sitting for two people who lived on the block. Patrick is a step ahead already and realizes they've been kidnapped, so to force the guy to admit it he uses his own cellphone to call the line the man is expecting to hear from the kidnappers on, making him freak out because they told him they'd kill the hostages if he involved the police (who are standing next to him at this very moment). The guy spills the beans and answers the phone nervously with the police staying quiet. Jane tips his hand at that point, "Tell me... what are you wearing?" He then laughs and reveals

that he's the one making the call, but now they can help the kidnapping victims and track down the killer
* The Mentalist himself, made months earlier, in which a list of the same seven names is read off. (How exactly this was accomplished is never explained.)
* The Mentalist. If the actor is familiar but playing a bit role, generally they're the murderer or the mastermind of the murder.
* The Mentalist, inadvertently leaves traces of his breaking-and-entering behind and blows their murder case against a contract killer until the team can find new evidence.
* The Mentalist: In an attempt to catch Red John's mole, the team must "inform" five suspects of the supposed location of someone they know Red John wants dead. One of the suspects isn't someone they can tell directly without rousing suspicion, so Rigsby and Cho invoke this trope while they know the suspect can hear them.
* The Mentalist: In "Ball of Fire", Sherry Winger has Jane and Lisbon handcuffed in the basement of a hunting lodge and goes upstairs to spread gasoline, intending to burn down the house with them inside. This is in revenge for the team arresting her father for murder, after which he died in prison.
* The Mentalist in "Black Cherry". The sister of a victim of the week pulls a gun on some gang-bangers who she thought knew who her brother's killer was. Even though she's caught red-handed for assault by Lisbon, she's dissuaded from prosecuting her by Jane, who reminds her that if the sister goes off to prison, her brother's young son would likely end up in foster care and eventually in the very gang that the sister pulled a gun on. Eventually, Lisbon is able to talk Sarah (the ADA who wants to prosecute) out of it by playing on her brand-new motherly instincts.
* The Mentalist: In episode "Red Hair and Silver Tape", a couple who owns and runs a luxurious restaurant kidnap girls with the intention to murder them. Jane first suspected only the husband. Agent van Pelt especially is horrified to learn that they were in it together.
* The Mentalist: In "Fire and Brimstone", Jane abandons Lisbon on a beach en route for his final confrontation with Red John. Lisbon flags down a car, flashes her badge at the driver and commandeers the car to go after him.
* The Mentalist in his suits. The show seems to imply that these suits, dress shirts, and a single pair of worn brown shoes are all the clothes he owns.
* The Mentalist in pursuit of a chance at revenge. He's not exactly "atoning" (or giving back the money), but he is deeply ashamed of his past actions as a con artist and seems to hope that he's become a man his dead family would be proud of.
* The Mentalist: In "Red Sauce", the CBI's murder investigation gets a lot more complicated when the victim, who worked at a local video arcade, turns out to be a mob informant in witness protection.
* The Mentalist: In season 3's "The Red Mile", Jane gleefully exclaims this, while running around nearly beside himself with excitement. Though the butler was driving the car to Jane's pre-arranged trap, it was actually the rich mother-in-law that did it.
* The Mentalist. In spite of the fact that Jane is not exactly a Navy Seal, the closest thing to emotional fallout from all this is that he no longer says things like, "pain is in the mind." Two episodes later he voluntarily goes undercover at a clinic that uses aversion therapy in the form of electric shocks.
* The Mentalist: In "The Crimson Hat", Jane is instructed by one of Red John's lackeys to kill his trusty friend and partner Lisbon to prove he's had a change of heart.
* The Mentalist involves a case of a murdered teenage girl. A neighbor boy is blamed but Jane deduces that the father is responsible. It turns out that the father and daughter were having a sexual relationship and the father killed the daughter when she wanted out.
* The Mentalist is the son of a mob boss who is dying of cancer. The boss is on record as planning to kill the person responsible. Cho goes to investigate a possible suspect, who got beaten by the son's goons over a bar dispute. The suspect loudly says that the victim was a great man and he had no problems with him. Then he quietly tells Cho to come back after the old man dies & he might have a

different story to tell.
* The Mentalist is titled "If It Bleeds, It Leads" and is about the death of a TV reporter. Naturally, her death is headline news on the station that she works for.
* The Mentalist: Jane gets hammered on Bloody Marys in "Red Rover, Red Rover". This was on the anniversary of his family's death. Since he had a "regular table" with two empty places, it is possible he does this on special dates (birthdays, happier anniversaries, etc.).
* The Mentalist: Jane once escaped from jail by scaring a rodent-phobic guard with a live mouse he'd caught.
* The Mentalist; Jane, who can count cards better than Rain Man, arranges a poker game with the suspect in a Vegas case, provoking him into producing key evidence as a wager on the final hand. The suspect is holding four Kings; Jane beats it with a straight flush—because he cheated while the guy's back is turned to ensure they both had those exact hands.
* The Mentalist name has since been changed to simply the Bureau of Investigation (BI), but the show is keeping the original name.
* The Mentalist of criminals and suspects to crack cases that leave trained detectives stumped - except that he's actually on the police payroll as a consultant.
* The Mentalist only raised further issues, as many clues that were dropped about Red John turn out to be irrelevant (his height, for instance — the actor in question is taller than Red John was stated to be). Practically all of the clues that pointed to him were only dropped in the sixth season, the one he was revealed in; most ones from previous seasons were never mentioned again.
* The Mentalist or confuse his opponent until help arrives rather than fighting them.
* The Mentalist: Or rather, middle-school sweethearts. In "Bloodsport" it's mentioned that Betriz and Manny have been dating since they were thirteen and married since they were seventeen.
* The Mentalist Patrick Jane and Teresa Lisbon are working the case of an undercover female detective who was killed just outside of a popular local dance club known for its continuous loud music. Lisbon tries to call Jane while he is inside the club, only for him to ask what she's saying a couple of times and then hang up. She finally arrives and meets him at the club, where he is talking with the proprietor, Vince Candide, whom he says is "a womanizing buffoon, but I think you'll be amused by his presumption."
* The Mentalist: Patrick Jane fits perfectly. He hardly ever STOPS smiling no matter what, but the man is ridiculously full of self-loathing and guilt for his role in the death of his family. He can't sleep at night, he still wears his wedding ring eight years after the death of his wife, and his only home beside the CBI headquarters is his broken-down old house where his mattress is right up next to the smiley face on the wall that is Red John's signature.
* The Mentalist, Patrick Jane is pulled over speeding and ends up sending the cop on a chase to the crime scene. Later, he is ticketed and refuses to pay it. He spends most of the episode insisting to Teresa Lisbon that he won't pay the ticket and at the end of the episode she tells him that she'll get the CBI director Gail Bertram to pay it, that she has her ways.
* The Mentalist: Patrick Jane was a professional psychic before his family was murdered. He admits that it was all fake.
* The Mentalist possesses a similar plot: the killer places an audition notice for clowns who must arrive in full costume, then commits the murder while dressed as a clown. Bonus Points: the victim had a fear of clowns.
* The Mentalist Red John, he describes him as an "evil, sexually perverted sociopath with delusions of grandeur", Red John responds, hurt, that they are not mere delusions.
* The Mentalist, Righetti and Owain Yeoman decided to leave the show, with Grace and Wayne getting married. Seems like a missed opportunity.
* The Mentalist, Rigsby's girlfriend becomes pregnant. As the due date approaches, he becomes increasingly panicked, while repeatedly insisting that it's his

girlfriend who's freaking out.
* The Mentalist smokes a high-grade joint while undercover as pot baron. Amazingly, his reaction doesn't blow his cover.
* The Mentalist solved the case. One memorable trick: knowing Rigsby was on his way to interview a suspect, Jane phoned the suspect using Rigsby's name and insulted him, provoking the suspect to attack Rigsby and get himself arrested... and put in the same prison as Jane, who could then talk to him in person.
* The Mentalist's Patrick Jane drives a classic French car - a metallic grey Citroen DS.
* The Mentalist's Patrick Jane, while technically merely a "consultant", probably qualifies as a "consulting detective" in real terms. And is more than a slight bit odd. At least when you consider he's a little bit sociopathic and has apparently decided that being nice to other people unnecessarily (by his standards) is a waste of his time.
* The Mentalist style. Everybody's dancing — Patrick Jane with Teresa Lisbon, Abbot with his wife Lena, Wylie with his crush Vega — except for Cho who decides to get one more taco, though he doesn't seem to mind that he's not with anyone. He's excited because he has just found out he's going to be promoted to a unit leader at the FBI.
* The Mentalist. Subverted somewhat in that, while Jane is only ever seen in his hallmark three-piece suit, his curls can get unruly, the suit itself is somewhat rumpled, and his shoes are very worn.
* The Mentalist Teresa Lisbon is undercover in prison to get a convict to turn on her boyfriend who leads a car theft ring. The plan later involves Teresa and her cellmate Marie to break out of jail. It involves dressing as employees and going away casually with them at the end of one shift.
* The Mentalist the arc, so the series ended up rushing the conclusion, and in the process failed to follow up on some plot lines that initially seemed like they would be significant.
* The Mentalist, the CBI often finds itself bumping up against local police departments who are not happy about them having jurisdiction.
* The Mentalist, there's only so many ways she can reach out to a guy who still works with the police without getting caught.
* The Mentalist, the team acquired a dead man's cell phone, which one of their suspects was calling. They said it would take two minutes to triangulate the call. Patrick Jane took the phone, named a location and issued an ultimatum, then hung up. When everyone looked at him askance, he said that it would just be easier to bring the suspect to them. He was right.
* The Mentalist this becomes a crucial point during an investigation of a murder in a high school. The school's principal is able to obtain information about events he could not have witnessed and was not told about. It turns out that he secretly installed security cameras in the bathrooms.
* The Mentalist this trope just in case a renewal wasn't forthcoming.)
* The Mentalist, to give one of the CBI employees who might be Red John's spies the room number of a person they were hiding. The person is actually somewhere else, and the room number is a trick to reveal who is Red John's spy.
* The Mentalist to Red John as proof of his change of heart and willingness to join him.
* The Mentalist to simply leave the money on the table, finish his tea, and let himself be arrested.
* The Mentalist. Turns out she is blind and therefore cannot identify what he looks like and most likely is the main reason he hasn't killed her.
* The Mentalist uses profiling tactics routinely to play criminals- and everyone else, for that matter- into his hands.
* The Mentalist was killed via exposure to a deadly virus kept in a high-security vault accessed by retina scan - which didn't work right and would let in anybody who presented their eye for scanning.
* The Mentalist: Wayne Rigsby and Grace Van Pelt continue working together on the same team after being forced to break up due to CBI's non-fraternization rules.

They eventually get back together after the rules are changed.
* The Mentalist. When he goes off-work, you know he's serious because there have been at least three separate times where he's done it for a significant period of time, even once for over a year.
* The Mentalist when Lisbon is walking down an empty hall alone when a cat meows and comes rubbing up against her leg. After reaching down to pet it and getting a hand full of blood, she quickly notices the bloody paw prints leading from one of the rooms.
* The Mentalist Whether it was strictly platonic or something more is a matter of speculation.
* The Mentalist which conveniently saves the writers from having to come up with an explanation.
* The Mentalist who did it, making him an accomplice. Said socialite arranged for the butler to go free if she confessed.
* The Mentalist who had never been investigated prior, by convincing the jury that the man was his arch-nemesis when in reality he wasn't.
* The Mentalist who targeted police officers as the focus of the episode "Red Moon".
* The Mentalist will get Red John to send an assassin to the room they've been given.
* The Mentalist will usually inform people that he is merely a consultant and not an actual police officer. However, when he deems it necessary he has no qualms about letting people think that he is a full CBI agent.
* The Mentalist with Jane to make him aware she let him get away with it. Jane is impressed with the new boss.
* The Mentally Disturbed, so it's not surprising when his arguments are questionably rational; Crankcase, who at one point insists that since he came up with the name for their Nerf wars, he holds the copyright and so anyone who says it owes him money, has no excuse.
* The Mentally Disturbed: Treating mental illnesses as mere quirks or bad habits.
* the mentally retarded Rita, her response is an astonished "But wherever did [the lighter fluid] come from?"
* The Mental State (albeit an extremely brutal manslaughter with several casualties). However, once he finds himself in prison, his recently triggered sociopathic mindset enables him to perform several illegal acts without remorse. These acts include theft, blackmail, threats, arson, incitement, extortion and drug-handling. Ironically, one of his objectives is to prevent this trope from happening to others.
* The Mental State and a fondness for devious schemes. It is almost impossible to tell what his objective is at any one time. He normally only reveals what his plans were after they have been completed. He comfortably worms his way into other people's confidences, sets two sides against each other and takes full advantage of any opportunity that comes his way.
* The Mental State, has gone to extreme lengths to maintain his anonymity and conceal his true identity. Nobody knows anything about who he was before being sent to prison. It is suspected that he might have been a member of a black-ops unit, but no one knows which one he belonged to if this is true.
* The Mental State has Zack State. He has a talent for turning criminal gangs against themselves and luring his enemies into traps. His status as a 'Hero' is questionable to say the least, but his schemes tend to have positive consequences for others (except his opponents).
* The Mental State is an inmate who suffers from kleptomania. The main character actually weaponizes this as part of a complicated plan to maintain indefinite control over the prison populace and infiltrate the primary antagonist's organisation. By the end of the story, Jeremy is completely cured of his condition, as his new life as a police informant is more than exciting enough to fill the void that was bothering him.
* The Mental State is described as having a baritone voice, and he is probably the biggest badass in the entire story.

* The Mental State is the biggest and strongest inmate currently serving time in the state prison. Practically all the other prisoners are afraid of him. Inf act, they only obey his brother's commands because they do not want him to set Billy on them.
* The Mental State mostly takes place in prison, it is difficult finding someone to recruit who is NOT a criminal.
* The Mental State, Officer Reed and Officer Jeff are both police officers who do amoral things. Reed infringes on prisoner rights by spying on inmates, and Jeff is extorted into helping a devious psychopath in his plans to strengthen his hold over a vast criminal network. Zack State's machinations have dire consequences for both of them. However, Reed gradually comes to realise during his time in Zack's service that the two of thema re not so different, and Jeff actually thanks Zack for concocting a way to save his daughter from the psychopath's influence. Ultimately, they both end up on very good terms with Zack and one of them even ends up becoming his replacement as prisoner representative once Zack is finally released.
* The Mental State. [[spoiler:He plants drugs in his office and spikes his coffee with Spice to get him high. This ultimately leads to the guard getting arrested and sentenced to the very same prison he used to work in.
* The Mental State: This is the crime that sends the main character to prison. He snaps after being made to watch is his girlfriend is raped by street thugs. He responds by lacerating, injuring and traumatizing the ones responsible. Although he chose to leave most of them alive so that they could continue to suffer, he killed one of them on account of him suffering from psychosis and, therefore, physically incapable of ever truly reforming.
* The Mental State when Zachary is forced to watch as his girlfriend is raped in an alleyway. He sees laceration as the only viable option.
* The Mental State who frequently resorts to manhandling inmates to get them to calm down. Then, once the prison starts adopting increasingly more liberal approaches to reforming offenders, his behaviour worsens and he ends up taking it out on one of the weaker inmates, nearly beating him to a pulp.
* The Mental State, Zack, is that the reason so many people in prison become violent and refuse to reform is because they are exposed to people he refers to as 'Irredeemables'. These are people who are pathologically incapable of reforming, only care about themselves and serve as appalling influences on criminals who have understandable motives for doing what they did. Zack even refers to a specific type of 'Irredeemable' by this name. He spends most of his time in prison trying to find these people and turn everyone against them so that conditions inside the prison can improve.
* The mental torture of the German soldier after the assault on the machinegun nest, with Reiben threatening to desert
* The Mentat Piter makes several correct predictions of Duke Leto Atreides' actions, but wrongly predicts that his Bene Gesserit concubine Jessica will have a daughter rather than a son; his logic was actually correct (this was the Bene Gesserit plan), but he (and they) failed to take into consideration the possibility that Jessica would defy her orders out of love for her husband.
* The Mentats may be the most fundamentally realistic example of this trope in literature, though their feats of deduction and analysis are labeled as necessarily superhuman even within the context of the books. Miles Teg's
* The Men They Couldn't Hang invoke this in "The Ghosts of Cable Street", a song about a riot that broke out in 1936 between the British Union of Fascists and the heroic antifascist demonstrators.
* The mentioned-but-never-seen has put forth the Very Strong Anthropic Principle, which holds that the entire point of the universe is to give rise to the Unseen University so that it may house a Professor of Applied Anthropics (Footnotes comment that virtually everyone secretly believes this, with minor variations of a fill-in-name-here nature). Later in the book in which this is mentioned, one of the wizards mentions the principle, and comments that it's jolly decent of the Professor to share the universe with everyone else.
* The mentioned designers have their trademark silhouettes copied by fellow

designers, tailors and housewives everywhere, like:
* The Mentor to both Van and later Kabuto, who uses Ian's unique Sense ability.
* The Mentor to Nanoha in the first two seasons, but it's more prominent in the first season. At the beginning of the series, he needs time to recover to regenerate his mana, thus he's dependent on Nanoha to gather the 21 Jewel Seeds as soon as possible before things escalate. She already surpasses his expectations and in power from the start, thus she's more suited to battle in combat against her adversary Fate than Yuuno is.
* The menu bar shared by various branches of Google is inexplicably different on Google Groups, with the link back to the regular Web search jumping from the far left to the middle (and
* The menu is the pages of a book, and there are equipment hotspots that are books. There is a very light excuse plot that Dracula is taking over the book and the other Castlevania heroes, including Dracula
* The menu tends towards unpretentious Americana: pancakes, burgers, fries, hot dogs, milkshakes, fried chicken, chicken-fried steak, biscuits and sausage gravy, etc., all washed down with bottomless,
* The Men Who Murdered Mohammed. This story isn't about that sort of make-believe man. It is about Henry Hassel, a genuine mad professor..." It goes on to contain one of the best lines from short SF: "In exactly seven and one-half minutes (such was his rage) he put together a time machine (such was his genius)."
* The Men Who Stare at Goats in real life, the United States Army started research on new age and psychic powers because they heard Soviets were researching those things as well. The Soviets supposedly started the research because they heard a rumour the Americans has started research...
* The Men Who Stare at Goats is a flickering light. Lock someone in a room with it and most people will go insane, especially if it is at a slow random pace, like Chinese water torture. The playing of a kiddy song over and over was just plain cruel. An especially interesting one as well is not allowing someone to go into deep sleep, so even though they slip out of consciousness, when you wake them up to interrupt them they don't feel like they've slept at all. Although after a few days they start hallucinating and go batshit insane but it's better than some of the other ways.
* The Men Who Stare at Goats Like every other "paranormal" incident in the movie, it's up to the viewer to decide.
* The Men Who Stare at Goats. They refer to themselves as warrior monks, using new age phrases, and their goal is to be Jedi-like warriors.
* The Menzingers-type serial killer holding a boombox over his head in an attempt to make up with his lady outside her house.
* Theme Park games are the theme park version of... running a theme park.
* Theme park "Hellendoorn" in the Netherlands is Halloween-themed during the entire month of October, and renames itself "Heksendoorn" during that time ("Heks" is Dutch for witch).
* Theme Park Landscape: The land of all-natural rollercoasters and water slides.
* Theme Park, "La Venezuela de Antier" (Old-Timey Venezuela), all the cleaning employees are dressed as such, with the security employees wearing 1930s State Police uniforms.
* Theme Park's DS release has Crystal, a 26-year-old adviser, commented as attractive by the "main" adviser.
* "theme park", The Cheat isn't tall enough to ride the park's coolest roller coaster, The Bowels of Trogdor. Strong Bad apologizes and tells him he'll have to go to Sweet Cuppin' Cakes Land instead.
* Theme Park Version of Feudal Japan, but Kaido's factories have poisoned the landscape, turning the entire nation, bar the Flower Capital into a polluted wasteland.
* Theme Park Versions (the archetypal Dwarven drink) and is more Protestant, hence their down-to-earth perception and their work ethic.
* The Mephrit Dynasty were once famous for sun killing super-weapons that could cause a star to wither and die or to explode into a supernova, wiping out its

planets and their populations. Many of these weapons have been lost or malfunctioned over the course of the
* The Meq. Geaxi probably tops them all though and definitely fits the trope best.
* The Meq subverts this by having the loss of their immortality be a vital part of their life cycle.
* The Meq, though it doesn't really fit into any of the above three categories because it's shown so realistically.
* The mer and kor on the plane of Zendikar each worship a triplet of gods, the legends of which are based on the horrific Eldrazi (
* The Mercator Projection use the Mercator Map to better inform viewers on the gulf between the apparent size of the Mercator Map and the actual size of the particular landmass.
* The Mercedes CLS could have never seen production, if not for an executive seeing an employee-made drawing of "a Jaguar built by Mercedes" and deciding to put it into production.
* , the mercenaries all use firearms despite their magical talents. The advantages of guns over spells are discussed.
* The mercenaries eventually start using the prefix TT-##, short for Tagon's Toughs, with the most recent addition at the time being TT-11. When the younger Tagon asks why this was necessary since they've never had more than three ships at a time, it's pointed out that eight ships have been lost under his direct command.
* The mercenaries in general in the book. [[spoiler:The Captain returns to the valley at the end saying mortally wounded in battle and saying everyone who left with him was killed but given the likely chaos of the battlefield it’s easy to question how he could have known that for sure, especially given his own need to quickly get out of there.]
* The mercenary attack on the Barracks in the fourth season, where three redshirts (and presumably a fourth who was unaccounted for) are shot by redshirt mercenaries in the jungle. They then proceed to open fire on Sawyer, but their Stormtrooper training prevents them from hitting him.
* The mercenary Gunhawk doesn't care who his target is. The only person he shows any affection to is his partner Bunny.
* The mercenary Infected have bombs implanted in their brains that are set to go off if they reveal important secrets about their employers. Naturally, they know nothing about this.
* The Mercenary Scarface Force (officially: 92nd Special Tactical Fighter Squadron) in
* The mercenary villain Watch has, among other powers, the ability to make his hands intangible — and partially unphase them inside people to do damage.
* the Mercer effect occurs. As you can imagine, he's not happy about being associated with it.
* The Merchant of London, he mentions that he left the legal records about the childhood trial behind to see if Sherlock would hunt them down and read through them, although Sherlock skipped that lead.
* The Merchant of Venice. After Bassanio successfully courts and marries the wealthy Portia, his friend Gratiano and Portia's handmaid Nerissa also decide to marry each other, apparently for the hell of it.
* The Merchant of Venice: Almost all of Portia's suitors are rich (princes, dukes, barons, etc), and Bassanio, a "poor...gentlemen" is the exception. Needless to say, he's the only one she's really interested in. A lot of the plot revolves around the fact that he's borrowed money from a friend in order to woo her.
* The Merchant of Venice and gives him legitimate reasons for being so ruthless.
* The Merchant of Venice And he keeps dropping her in his attempts to dip her. Oh, and Jessica just got back from her elopement.
* The Merchant of Venice and nobody can claim any idea to be inherently merciful.
* The Merchant of Venice. Antonio's ship, presumed to have been lost in storm, had unbeknowstly managed to reach emergency harbour and return eventually to home. Antonio manages to pay his debt to Shylock.
* The Merchant of Venice are pretty much this; narrating what happens between

events and standing alongside characters as they try to explain their situation. They aren't always together on stage; Salerio seeks out Bassanio to warn him of Antonio's plight while Solanio comforts Antonio in the days before his trial.
* The Merchant of Venice, Bassanio has something going on with Antonio, marries Portia, who is loved by the Prince of Morocco and others. Then there's Jessica and Lorenzo and Nerissa and Gratiano.
* The Merchant of Venice between middle-aged Antonio and young Bassanio.
* The Merchant of Venice, but he is shown to mourn his deceased wife and truly loves his daughter.
* The Merchant of Venice contains a character called, depending on the editor, "Launcelot" or "Lancelot". This doesn't seem so bad... except that the folios call him "Launcelet" or "Lancelet", and spell his last name, Gobbo, alternately as "Jobbe" or "Job".
* The Merchant of Venice devil. He gets out of the dilemma when his father shows up and helps him to lawfully switch jobs.
* The Merchant of Venice Does the play really condone casual antisemitism, or is Shylock driven to villainy by society?
* The Merchant of Venice had Shylock stab himself before exiting the court scene.
* The Merchant of Venice has led to many a production implying that he's in love with Jessica, and he masks his sorrow that she chose Lorenzo over him by making some particularly cutting jokes about her parentage (as well as repeatedly trying to one-up Lorenzo in battles of wits).
* The Merchant of Venice has Poria and Bassanio the innamorati, as well as Shylock as the Pantalone (although Pantalone is typically a merchant of Venice, this play's title character, Antonio, does not actually qualify as a Pantalone). And of course, Touchstone, Bottom, Gratiano, and many others are perfect arlecchini.
* The Merchant of Venice, has very few lines, but the whole play hinges on her elopement and her conversion to Christianity, which drive her dad over the edge. Whether she's seen as a "good" or "bad" character is a key decision when staging the play, and directors tend to give her plenty of extra stage time to pray in Hebrew or look tragic. Lorenzo could also be seen this way — besides being the boy who steals Jessica, he has one of the play's best soliloquies ("How sweet the moonlight sleeps upon this bank...")
* The Merchant of Venice. "...here's a small trifle of wives; alas, fifteen wives is nothing! A 'leven widows and nine maids is a simple coming-in for one man..."
* The Merchant of Venice in the play and the fact that giving someone a ring was one of many symbols that the dirty-minded Elizabethans associated with sex…
* The Merchant of Venice is the go-between for Lorenzo and Jessica, delivering their love messages and generally helping them with their elopement. However, he's fond enough of Jessica that many productions interpret their relationship this way. Lorenzo himself can't help but wonder, at one point joking that he'll get jealous if Launcelot keeps stealing Jessica for alone time.
* The Merchant of Venice, Launcelot Gobbo (a clown) runs into his blind father, who doesn't recognize him. Instead of explaining who he is, Launcelot continues to pretend to be a stranger... and informs him that his son is dead, just to see what will happen.
* The Merchant of Venice. Launcelot's blind father, Old Gobbo, shows up and doesn't recognize him. Launcelot is a troublemaker, so instead of revealing his identity, he gets into a whole conversation with his father about "young Master Launcelot", finally revealing that Launcelot is "deceased". The trouble is, once he decides that the joke's gotten a bit old, he has trouble explaining to his father that he's really Launcelot, and not dead at all. The whole thing cumulates with Old Gobbo joyfully embracing Launcelot, complimenting him on his fine new beard — actually just his long hair, which his father has accidentally grabbed hold of. And that's only what's directly mentioned in the script. Depending on the performance, there will usually be plenty of visual gags involving Old Gobbo walking off in the wrong direction, bumping into the other characters, falling off the stage and into the audience, etc.
* The Merchant of Venice: Lorenzo (Straight Man) and Launcelot (Wise Guy).

* The Merchant of Venice makes it come off as extremely cruel and religiously-intolerant).
* The Merchant of Venice named Salerio and Solanio or two guys named Salarino and Solanio and a third guy, a messenger, named Salerio. Either way, these two (or three) characters have long been known to actors as "the Sallies" or "the Salads".
* The Merchant of Venice. Portia spends much of the play dealing with the weird test he had set up for potential suitors, since according to his will she can't marry anyone who doesn't pick the right casket and must marry the man who does. She is not entirely pleased with this situation.
* The Merchant of Venice, Shylock complains that his daughter has stolen from him "two rich and precious stones"—in other words, his family jewels.
* The Merchant of Venice. Shylock has been defeated! The eponymous Merchant is saved! Mercy's quality avoids straining! Everything the audience cares about is over! Meanwhile, in Act Five...
* The Merchant of Venice, Shylock, partly because he wants to get out of his predicament alive and partly because Antonio suggested the order to convert to Christianity out of a desire to redeem his soul, agrees to become a Christian, departs from the court in poor physical health from what he had just gone through in his unsuccessful attempt to get the pound of flesh from Antonio, and signs the deed offscreen when the court delivers it to him.
* The Merchant of Venice Shylock's life, then decides to fuck with her fiance apparently just for the lulz with the whole stupid rings subplot.
* The Merchant of Venice: Shylock's speech pattern is very repetitive, even at the beginning. This becomes nightmarish later when he becomes intent on killing Antonio:
* The Merchant of Venice. Since doing this is physically impossible, the contract is declared null and void.
* The Merchant Of Venice sympathy towards Shylock (he had villains similar to this in other plays after all). He's allowed to deliver a long speech denouncing anti-semitism and basically says it's this treatment which induced his desire for vengeance, supporting the idea of intended sympathy.
* The Merchant of Venice: they're both vocally opposed to marriage but end up falling in love by the end of the play.
* The Merchant of Venice to modern readers, who are much more prone to sympathize with an oppressed Jew getting some payback on an antisemitic society and see his final fate—losing most of his wealth as a result of the court's judgment against him and his daughter stealing from him, and being forced to convert to Christianity—as quite tragic. While Shakespeare gave Shylock some sympathetic motivation, he very possibly did not intend the audience to root for him. Shylock is, after all, a heathen who wants to murder a Christian over injured pride.
* The Merchant of Venice when Bassanio's new wife demands the wedding ring he has been forced to give away:
* The Merchant of Venice, which implies that it was already an old aesop.
* The Merchant of Venice, which many scholars suspect was heavily inspired by the above, albeit with a much more sympathetic Jewish character.
* The Merchant of Venice, who was written in specifically as "the Clown." His life offstage is referred to (he's got a family and a mistress), but onstage he's mostly there to give overdramatic monologues, spew puns and complain about how converting Jews to Christianity will raise the price of pork. Gratiano qualifies, too.
* The Merchant Princes" (actually his bastard son). He appears in only two chapters, being the one to send Lathan Devers to spy on General Riose.
* The Merchant Princes, instead choosing to briefly defend and running away. Riots break out over the fact that the government is inconveniencing the citizens for nothing more than empty successes.
* The Merchant Princes in the core of the galaxy, and is trading with systems along the Periphery of the galaxy. The Empire later supplies Korell with nuclear spaceships to attack the Foundation, whose capital is at the extreme end of the Periphery.
* The Merchant Princes": Orsha II is the new capital of the Normannic Sector, since

the revolutions on Siwenna.
* The Merchant Princes Series. As the figure becomes more familiar, it triggers her more quickly.) One member of the family made a flawed version of the figure from memory, and jumped into a different parallel world. Later books in the series have the younger and more progressive Clan elements using the computer program Mathematica to determine what the two figures have in common, and what others can be drawn with the same properties.
* The Merchant Princes Series. Mike Fleming is going undercover in the Gruinmarkt. He needs to pass as a noble so he is given a sword, but is warned not to use it "because we haven't got the five years it would take to get you to a basic level of competence".
* The Merchant Princes Series, which starts out as a fantasy novel where "world-walkers" commute from a parallel medieval universe to the present-day US. The world-walkers steal some nuclear weapons and threaten the US. Over six books, the US Government finds out that's happening, and Dick Cheney (!) puts Lawrence Livermore Labs onto finding out how, builds "world-walking" technology onto combat helicopters and aircraft, and we end in Tom Clancy territory.
* The Merchant Princes, so they try to weaken the blossoming Traders by sending an agent to undermine Master Trader Huber Mallow during his mission on Korell, a world staunchly against the Foundation's religion. During the last third of the story, after Mallow has defeated his political opponents, he is faced by the planet of Korell itself, which has declared war on the Foundation. Mallow uses the Foundation's economic powers to win by declaring a trade embargo on Korell. Despite winning every battle, Korell is forced to surrender due to civil revolt during wartime hardships.
* The Merchant Princes": The "tech-men" of Siwenna, a hereditary sect of engineers and technicians, learn the operation of their nuclear power stations by rote. When Mallow asks what would happen if he destroyed a vital component, his guide's nearly incoherent rage indicates that they cannot actually repair anything important.
* The Merchant Princes") to make Foundation technology palatable to the Four Kingdoms has been ridiculously unsuccessful at converting new systems to the Foundation's rule. Master Trader Hober Mallow realizes that the time for rule by religion is over and now it is time for rule by capitalism.
* The Merchant Princes, would allow them to effortlessly crush the upstart Second Empire.
* The merchant ship in question unfortunately turns out to have been carrying, among other things, a sheltered
* "The Merchant's Tale": Old Januarie is deceived by his young wife May and her lover Damyan after Januarie suddenly goes blind. Januarie is over sixty and May not yet twenty. Both names are very
* The Merchants' War has a smart antagonist going up against dimension-hopping teleporters. Their particular brand of teleportation has safeties built in so that, if there's an obstacle at the other end, the teleport simply doesn't work. So, he fills his castle with netting and rope to foil his foes, which not only traps the teleporters into going exactly where he lets them, but lets his own troops walk around unhindered to boot.
* "The Merchant," the hero had killed the dragon on this promise. He had to throw the heads far apart to keep them from rejoining the body, but a peasant collected them and claimed to have killed the dragon. The princess recognizes his dog, and he can produce the tongues to prove his claim.
* The Merch. One Finn even posted "go go retarded lion!" after Finland won the World Hockey Championships.
* The Merch: Selling things related to your product so that you can pay for it.
* The Merciless One species is also encountered earlier in Vashj'ir. Ozumat appears to be a very big version.
* The Mercora look like giant, asymmetrical crabs. One side has four large legs, the other three smaller legs, meaning that they move sideways. The four-legged side also has a big, three-pronged claw, while the other has two humanlike arms, but stronger and with tapered, delicate fingers.

* The Mercorans, who settled on Earth in the Cretaceous period, were also nonviolent, to the point that they committed ritual mutilation in mourning when some of them were killed the only time they were forced to fight against another sentient being.
* The Mercurians fulfill this trope by being very spindly in build, but also subvert it by being superhumanly strong.
* The Mercury astronauts wore an olive drab pilot's pressure suit, which was spray-painted silver for thermal control purposes. This was abandoned when astronauts started doing spacewalks,
* The Mercury Comet was designed as an addition to the Edsel lineup, but the cancellation of the latter brand got it put in the Mercury lineup in the last second.
* The Mercury Men (beings who are in control of the Mercury Men) are brains in jars.
* The Mercury Men, Edward attempts this, hiding behind a two-inch-wide narrow pole.
* The Mercury Men, Edward Borman can't see anything without his glasses.
* The Mercury Men have sophisticated technology; they can transport between worlds and manipulate gravity. But going from planet to planet via chemical-propelled rockets is something new and threatening to them.
* The Mercury Men, humans are unique and special among all the races in the galaxy. They are the only race that has discovered space flight.
* The Mercury Men is oblivious to the alien invasion going on in the building - that is, until he gets zapped by them.
* The Mercury Men try to pull the Moon down to crash into the Earth using a Gravity Engine.
* The Mercury Men universe never heard of the Roche Limit; the Moon gets so close to the Earth that it's affecting the cloud cover. Possibly justified, however, as we don't really know how the Gravity Engine works.
* The Mercury Men, words to this effect are said by Edward on several occasions.
* The Mercury Men, Yaeger uses a hologram of a Mercury man to distract a sniper.
* The Mercury Theatre on the Air, as Jonathan Harker's coach makes its way to Dracula's castle.
* The Mercury Theatre on the Air, Richard Hannay has chased down the trio of bad guys, but can't be sure that they're actually the right people. While they all sit in the seaside house in a standoff, they all play a game of billiards—until the three men are in fact revealed to be the bad guys. This is a change from the novel where they play bridge in the climactic scene.
* The mere existence of Beerus and Whis, beings so powerful that they can kill creatures as strong as Super Saiyan God Goku with a word,
* The mere existence of FOB Frontier is a violation of the War Powers Resolution, which says that the President must inform Congress within 48 hours of a foreign military deployment and must withdraw them within ninety days without a Congressional authorization of military support.
* The Merenguy enemy will also cause this for as long as it stays alive. Its dance is so distracting that Pit is unable to look away, meaning that the camera will always point at the Merenguy until Pit kills it.
* The Mere Wife, Willa recalls an incident in which a baby who was not hers latched onto her breast while she was breastfeeding. She reacts with the restraint you'd expect.
* The merger between United Airlines and Continental Airlines in 2011 has taken this to ridiculous levels. In the 1960s and 1970s, both airlines introduced logos designed by the legendary
* The merging occurred at the local level: many local YWCAs are now affiliated with
* The Merkava main battle tank has space for 6 passengers in addition to the 4 man crew.
* The Merlin Conspiracy Twin girls in a magical family where only one can be selected to inherit the family's magic, this is their way of fighting back by making themselves completely indistinguishable.

* The Merlin, head of the White Council, however accepts this trope; he just interprets responsibility differently than Harry.
* The Merlin Trilogy by Mary Stewart. Merlin usually responds that bats are his specialty.
* The Merlin Trilogy. Merlin frequently gets seasick, and it is completely mundane, the way lots of people get seasick. However, he considers it embarrassing, so when someone mentions it he tells them that wizards have difficulty crossing water.
* The Merlin Trilogy where Uther's self-image and self-confidence are almost fatally undermined by his erectile failure.
* The Mermaid and the Genie) after the destruction of her collection of human things, she uses her first wish to become human, but then admits to Genie that she doesn't actually want anything else from him. In keeping with his usual attitude, when Ariel suggests that she could use her second wish to set him free, Genie advises her to wait and see how her humanity plays out rather than let her essentially waste two wishes just to set the Genie free.
* The Mermaid and the Genie, Ariel sacrifices her third wish to free the Genie as she originally agreed even when he offers to make her human again (Ariel having used her second wish to undo all of Genie's previous wishes, including both Ursula's wishes and Ariel's wish to be human), feeling that the Genie deserves to live his dream after he helped her achieve hers.
* The Mermaid Princess's Guilty Meal focuses on the titular mermaid princess discovering the wonders of seafood by eating cuisine made from her fish friends. When she returns to the sea after her first meal, her guilt causes her to momentarily perceive her friends as potential food. After numerous chapters of dining, she's so far gone that she can no longer snap herself out of this trope.
* The Mermaid Princess's Guilty Meal is basically a collection of tales of how various fish and sealife live their lives underwater before ultimately getting fished and cooked by humans, and then eaten by Era.
* The Mermaid Princess's Guilty Meal: Shark the Ripper boasts of eating ten fish, a crime that landed him in a Hannibal Lecter-style straitjacket and mask. Ela, who by this point has eaten more than twice that amount, is naturally mortified by what that means for her: when her mutterings catch Shark's attention and he demands her look him in the eye, he's struck by a terrifying vision of her surrounded by the skeletons of the fish she's eaten. He ends up equally scared and impressed.
* The Mermaid Singing by Val McDermid had a soundproof cellar in a country cottage that was used for medieval torture
* The mermaids were precious little better, but, then again, they don't seem to like anyone in the book (The
* The Mermecolion, a giant ant with the head of a lion that was always doomed to starve to death due to its incompatible digestive system (the lion head can only eat meat, but the ant body can only digest grain). Supposedly originated from a mistranslated Bible when an ancient word for "lion" became jumbled up with the Greek word for "ant".
* The Merovingian from the sequels. "I am a trafficker of information, I know everything I can."
* The merpeople sound like these above the water. They can hardly be described as "cute", though.
* The Merry Go Round Broke Down fanfic set over 60 years later. Eddie has since passed, but his grandson Freddie carries on the family business of detective work.
* "The Merry-Go-Round Broke Down" is nowadays all but entirely known as "The
* The Merry Killers to come out and said personality is a psychotic killer.
* The Merry Widow (both the Jeanette MacDonald and Lana Turner versions).
* The Merry Widow Danilo, and vice versa, but he refuses to court her because he doesn't want it to seem that he's only interested in the money she inherited from her late husband (whom she married after Danilo's family judged her unsuitable because of her then-poverty). She eventually gets him to propose by telling him that, according to the terms of the inheritance, she will lose her fortune if she remarries — not mentioning, until after the engagement is settled that she will lose the fortune in the sense that it will become her new husband's property.

* The Merry Widow Danilo until she's sure he still loves her for herself, and not just for the large inheritance from her late husband.
* The Merry Widow features Prince Danilo getting engaged to showgirl Sally O'Hara, but being pressured by the King and Queen into giving up his romance.
* The Merry Widow, Hanna and Danilo were in love, but Danilo's uncle put an end to it because Hanna had no money. Residual feeling from this causes complications when Hanna reappears in Danilo's life as a widow with a large inheritance.
* The Merry Widow Hanna, because he doesn't want it to seem that he's only interested in the money her late husband left her, but his reaction when he hears that she's engaged to marry someone else makes his real feelings clear.
* The Merry Widow (renamed Marsovia in the first English translation of the operetta). By the way, it's a thinly disguised Montenegro.
* The Merry Widow this is the explicit deal, as creepy Baron Sadoja offers Sally the showgirl not only money and power, but status and the chance to embarrass the royal family, as Sally was engaged to marry Prince Danilo before the King and Queen vetoed the wedding.
* The Merry Widow when taking the stand at his court-martial. The queen, who was having an affair with him, had his handcuffs engraved "From Dolores to Danilo".
* The Merry Wives Of Maggody for it to feature a bad pun about taking the bull by the horns, but the bull rented for the filming kept wandering off.
* The Merry Wives of Windsor has a one-sided version; the title housewives, incensed at Falstaff's propositioning them, pretend to play along with his schemes and proceed to dupe and humiliate him again and again until they get half the community into the fun, whereupon he is publicly shamed.
* The Merry Wives of Windsor has Fenton and Anne as the innamorati, the foolish doctor Caius, Evans as the priest with a "speech impediment" (actually an outrageous Welsh accent), and Falstaff of all people as a sleazy Pantalone-type.
* The Merry Wives of Windsor," Mistress Quickly tells him, and Alice hails him as "my deer, my male deer."
* The Merry Wives of Windsor of myth. When Falstaff has been properly humiliated in his horned disguise, Ford points to the horns and tells him, "Now, sir, who's a cuckold now?"
* The Merry Wives of Windsor set just after Iowa's legalization of gay marriage, has young Miss Anne Page coming out as straight and marrying a young man...leaving behind her two (still older, and not quite as inept) lesbian suitors, who seem quite happy with each other.
* The Merry Wives of Windsor, the Host of the Garter Inn repeatedly references a subplot about three German guests at his Inn. These German characters are never seen in the play, but oddly enough, they eventually steal the Host's horses, thus providing poetic justice for the Host's earlier pranks on Caius and Evans. This detail is so odd that it is only reasonable to assume that some material was cut. Either these Germans befriended Caius and Evans, or, as many scholars theorize, they were simply Caius, Evans, and perhaps Bardolph in disguise.
* The Merseyside Derby, contested by Liverpool and Everton, used to be known as 'the friendly derby' up until the mid-eighties. It helped that fans of both teams are often drawn from the same families - indeed, local players have sometimes grown up supporting the other team, with the most notable recent example being former Liverpool vice-captain Jamie Carragher, and as a result, it's one of the few that doesn't enforce total fan segregation. This has since changed dramatically and is now a twice-annual fixture that generally consists of nothing
* The Mesan Alignment has been practicing the biological form of this in secret for quite some time and believe they should share it with the rest of the galaxy... by force.
* The Mesan Alignment is the trope's logical conclusion; its leadership is
* the Mesan Alignment reveal two new super-duper space drives, an entirely new biological "mind control" weapon, and that's just the first few things we've seen coming from their centuries-long supersecret R&D program.
* the Mesan Alignment's MO for the last few centuries. In recent years they've run multiple False Flag operations intended to heat up the shooting war between

Manticore and Haven whenever it starts to cool down, and more recently to start a war between Manticore and the Solarian League.
* Themes and narratives which reflect the gameplay, essentially playing with the concept of
* the Mesans blow up all their orbital facilities. On the other hand, the League is not likely to last that long, as its own internal issues are likely to cause it to collapse before long.
* Theme Serial Killer, and they have a set of themes (possibly taken from a poem/book), with each victim fitting the next theme in the killer's list (which they rarely get to complete).
* Theme Serial Killer: As slasher movies proliferated, many creators tried to distinguish their films from the pack by coming up with increasingly bizarre gimmicks for their killers.
* themes has a beta 'triad': Kensuke, Mana, and Kaworu. Their story is laid out in the canon sidestory to the fic, Life During Wartime.
* The Mesoamerican Ballgame: can't forget the Aztecs' old favorite of court ball and the similar game played by the Mayans, both of which could get quite bloody even
* The Mesoamerican ballgame, from 1,400 B.C. by the pre-Columbian peoples of Ancient Mexico and Central America. This game involved a ball which symbolized the sun. The winner gets sacrificed to the sun gods, and the grisly sacrifice features ripping out a person's heart and cutting off a person's head, or some other gory spectacle for the masses.
* Theme Song as well: "This is the theme to Garry's show, the opening theme to Garry's show, this is the song that you hear as you watch the cre-dits..."
* theme song for commercials about family cruises, and his career as a singer took an upswing.
* Theme Song). No mention of Sputnik, or even a glimpse of Yuri Gagarin.
* Theme Song Reveal: Elements of the plot are suggested via the theme song.
* Theme Song territory ("I stole ten thousand pounds, ten thousand pounds to see you / I robbed convenience stores 'cause I thought they'd make it easier / I lived off rats and toads, I starved for you / I fought off giant bears and I killed them too").
* Theme Song, they hold the final note until each has audibly dropped out (staggering their breaths), taken a breath, and come back in.
* The Mesopotamian Lilu and Lilitu were not a single entity but a whole family. Not all of them were horny devils, but
* The Mesozoic Era gets hit with this trope. Many forms of fictional
* The message displayed on the monitor in the cockpit of every Megadei changes at this moment for Alan: "YE GUILTY" This event happened after he told Roger about how he intends to use Big Duo solely for mass murder and destruction.
* The message seems to be that the audience is supposed to sympathize with the kids, and feel ridiculously entitled to their cereal, thus becoming more insistent on buying it.
* The Message series. Both Cassie and Tobias receive psychic messages from a distance; when they do, they pass out simultaneously. It turns out that these messages are the thought-speak of Ax, who's trapped in the Andalites' crashed Dome Ship.
* The message that displays the cause of death if a player is killed by a snowball or an egg is said to be from Herobrine. This is because both projectiles are harmless and thus cannot kill the player, meaning the only way to see this message for yourself is to mod the game.
* The message: There are lots of things more important than the lottery. The subtext: your weekly Lucky Four are an important part of a balanced and successful family life.
* The Mess Dress uniform (the one worn for dinners, parties and balls) for the Honourable Artillery Company (UK), to the point where privates from those unit get more bling than a lot of commissioned officers from other units.
* The Messenger (2018): Despite his name, Phantom was originally not this trope,

but the Demon King fixed that by placing a cursed mask on him and imprisoning him in a music box to play the pipe organ for all eternity.
* The Messenger (2018), there's a cabinet on the left side of the shop, but the Shopkeeper will not let you open it. Keep trying and he'll tell you to not touch the cabinet in a variety of ways, including even faking a dialogue reset. Do this long enough and he'll go on a philosophical talk that you can't fast forward through. You need to do this for an achievement.
* The Messenger, a member of the Architect's faction, seems to be the only Disciple who is a totally straight example of this. During the Darkspawn assault on Amaranthine he warns the Warden that the Mother is
* The Messenger and couldn't get it to start before the police arrived.
* The Messengers, an unidentified man has eyes that glow red. He is revealed to be Satan.
* The Messengers has two ghost children inhabiting the family's house. They are ostensibly the messengers of the film's title.
* The Messenger, the Ninja can swap between the 8-bit present and 16-bit future via blue portals in the game's levels.
* The Messenger: The Story of Joan of Arc but only started dating afterwards) — and it underperformed at the Box Office. Luc Besson especially was criticized for casting his wife as the lead, in a role it was agreed she was not up to playing.
* The Messenger: The Story of Joan of Arc from 15 to 18 in 2020 due to scene where Joan's sister is raped.
* The Messenger: The Story of Joan of Arc, Gilles de Rais (Vincent Cassel) writes "Hello" on a cannonball that is shot into an English fort.
* The Messenger: The Story of Joan of Arc has a multiple arrow launcher.
* The Messenger: The Story of Joan of Arc might also be accused of going the opposite route and adding fantastic elements (though this gets into a tricky theological debate).
* The Messenger: The Story of Joan of Arc: The film suggests the possibility Jeanne didn't really see signs from God, but is just a mentally ill girl who saw what she wanted. On the other hand, some things here (such as somehow picking out Charles from a room full of nobles) don't get explained.
* The Messenger: The Story of Joan of Arc: The film toys with the audience over whether Jeanne really has visions from God, or is just deluded.
* the mess had been caused by The Organization sending an agent to prevent the experiment and the danger in first place, resulting in the experiment being anticipated and the agent causing the experiment to go awry in the attempt to stop it.
* The Messiah, on the other hand, is explicitly described by Isaiah as being ugly, so that no one would be distracted by carnal desire.
* "The Messiah" Xavier Burns is from Waterford but spoke in an American-sounding accent in promos. According to him this was from playing an American character years ago and he would occasionally slip back into it.
* the messianic protagonist, since he is a fairly regular guy in the book.
* themes to non-existent porno films for their first album, staring famous porn actor Ron Jeremy, who also performs spoken-word sound bites on the album, starts as a spoof of these.
* The Mesutchi (girl) and Osutchi (boy) toys initially came in pink and blue, respectively.
* The Metabarons, and barring one have godlike levels of psychic power in order to be the ultimate military force in that universe. One Metabaron slaughters an entire alien universe to save ours while another single-handedly guts a space fleet numbering in the millions in only a few seconds.
* The Metabarons are dedicated to a bushido-like code and will kill or be killed for honor. They also favor primitive weapons like swords and double-barreled pistols, especially for ritual combat.
* The Metabarons comic, the first Metabaron, Othon von Salza, manages to defeat an army of 100,000 mercenary spaceships using his super-advanced spaceship which

somehow needs to be operated through his "protonic pen," a cord that plugs into his crotch.
* The Metabarons series, Aghnar (the second metabaron) has implanted a lot of miniature bombs in his body and set them to go off if he is mortally wounded. When he faces off against a beast impervious to all his attacks, he shoves his arm down its throat and lets it get bitten off. The bombs in his lost arm then make the creature collapse into a small sphere.
* The Metabarons, the entire history of the Metabarons is told from the start of the dynasty to the last Metabaron.
* The Metabarons, the Metabarons are fated to never be happy and lead a tragic existence; son slaying father to succeed as Metabaron, wives dying, mutilation and general unhappiness.
* The Metabarons, the planet of Ulkmar-Eight-Moon is a literal example. The females of the local proto-anthropoid species all have huge breasts.
* The Metabarons: Used frequently. The prefixes paleo- and bio- are frequently attached to words without any real rhyme or reason, resulting in absurd terms like "Paleo-Christ!", "bio-crap," "paleo-wedding," and even "bio-infant." Robots Tonto and Lothar attach robo- to the beginning of many words when they're referring to each other.
* The Metabarons: Very much the case with the Castakas. A couple of Metabarons actually end up having more than one child, but no collateral family lines are ever formed. Othon's first son Bari is accidentally killed by him when still a teenager and Steelhead's son (Aghora's twin) dies at birth.
* The Meta, formerly Agent Maine, was long presumed to have survived his fall at the end of
* The metagame of tic-tac-toe means that it is virtually unplayable for any two people with even casual experience of it (or, to put it another way,
* The Meta gets nerfed the next he shows up, losing all the powers he copied
* The Meta has the abilities and A.I. of every Freelancer it has killed so far. That many A.I. in one body, however, have caused it to be more than slightly snarling mad. To the point where it doesn't seem able to speak itself, only growl. (
* The Meta Human Liberation Army was a terrorist organization that sought to impose a society where people with powerful Quirks would rule above those with less powerful ones.
* The Meta is already overpowered, so a limit to how many abilities he can use at once is introduced. His first attempt at using Wyoming's Time Distortion upgrade renders its suit unable to power any of its equipment, forcing it to retreat. Meta's armor can't power all of its equipment properly without AI support, which is why Meta runs multiple A.I. fragments at once. This puts an enormous strain of his suit and equipment, making it increasingly energy-inefficient and prone to overloading the more he adds.
* The meta joke being that said arc is the one that follows the point where 4Kids ended the American dub of the original show.
* The metal band Virgin Steele have the spelling "magick" pop up frequently in their lyrics.
* The Metal Gear games have them as recurring or secondary antagonists.
* The Meta Liberation Army arc culminates in a final battle with Shigaraki's League of Villains vs the titular terrorist group vs
* "The Metallikats": Mac and Molly drop Callie out of a window for denying their parole.
* The Metal Men. She has the body of a centerfold complete with metal mammaries. Despite this, Dr. Magnus constantly berates her for "acting like a girl" despite obviously having made her in the shape of one. Her creator and programmer also chastises her for her frequent displays of romantic interest in him. Dr. Magnus has issues. When the Metal Men appeared in the Superman/Batman series, Copper looks very much like a "black" (i.e. copper-colored) version of the "white" (silvery) Tina.
* The metal world Mirrodin, which is inhabited by people, is attacked by machines

seeking to transform everyone into a weird Frankenstein robot. The Mirrans are normal people (who happen to have metal grow naturally in them). Their enemy is the Phyrexian virus, which gives the infected a religious (literally) urge to spread the virus. One of their tenets is that flesh is weakness and should be replaced by metal.
* The Metamorphoses is the story of Apollo and his first love, Daphne.
* The Metamorphoses live in connected houses, but they're forbidden to see each other because of their parent's rivalry. They communicate through a crack on the wall.
* The Metamorphoses: This counts for a great deal of the male cast in the work, the most well known being: Narcissus, Hermaphroditus, Hyacinth, Ganymede and Adonis, and among the Olympians: Apollo, Hermes and Dionysus
* The Metamorphosis of Justin Jones, a young man who expresses interest in the metamorphosis stage trick (where the magician switches places with his assistant) is given a bag and an instruction manual. The instructions say to sleep in the bag every night over a certain period, and when he complies, he starts to grow wings. This story is actually one of the few times where what the character wants from the shop more or less matches up with what the character needs, because he happens to live with an extremely abusive uncle...
* The Metamorphosis of Prime Intellect according to its own design. When combined with a rather paternalistic (though entirely benevolent) attitude toward humanity, this produced truly remarkable results.
* The Metamorphosis of Prime Intellect does not require PI to protect them, and they pose a nominal threat. PI genuinely does not understand why this is wrong.
* The Metamorphosis of Prime Intellect for the comfort, safety, and pleasure of humanity. The plot revolves around one person's quest to destroy it.
* The Metamorphosis of Prime Intellect, humanity has spent at least the last six hundred years in a simulated universe where they can not die, and can have anything they wish for. Prime Intellect won't necessarily make life as enjoyable as possible, but its response to every voiced desire gets pretty close. That includes a voiced desire to have the neurons responsible for pleasure directly stimulated. The main character spends quite some time trying to get free.
* The Metamorphosis of Prime Intellect, is another AI like this: once it evolved to the point where it could edit the laws of physics at will, it decided that it could best fulfill its directives by giving everyone whatever they ask for at no cost. The main characters of the story are the ones who realize that this makes everyone's lives meaningless.
* The Metamorphosis of Prime Intellect led it to freeze them in stasis so that they would never become technologically advanced enough to pose a threat to humanity.
* The Metamucil fiber supplement demonstrates how easily it dissolves in water compared to its competitors.
* The Meta Out of all the characters, he doesn't talk, but is the most fearsome character besides Tex, he works for the Director of Project Freelancer, but everyone dreads of his presence the most.
* The metaphor is also strained by the fact that there are reasons other than irrational bigotry to be leery of superpowered mutants — some of them are genuinely dangerous because they
* The Metarex are depicted as an extremely powerful version of this, funded and controlled by both their
* The Metarex are easily the most blatant example of this trope, unaware that they were being manipulated by Maledict the whole time despite tons of suspicious hints. They also
* The Meta saying that they'd found three freelancers, and there were only three at Avalanche, including the aforementioned.
* The Meta's Brute Shot as well. It can slice a rocket launcher in half, cleave into stone, and even parry Tucker's
* The Metaverse: An internet-like system represented as a place where people can walk around like in the physical world.
* The Metaverse, led by Demon, and The Roaming Eye of Doom, led by Octavius Fong.

* The Meteor Heads. They are flying Mooks that spawn at meteorites and
* The Meteor Man allows catching an entire volley of bullets, but the weakening power meant he wasn't perfectly invulnerable when doing so.
* The Meteor Man: Speaking with animals turns out to be one of the meteor's powers, learned when casually asking the dog what he wanted to eat.
* The Meteor Man. The eponymous superhero uses Superman-like powers to defend his neighborhood from gangsters and doesn't really fly higher than a few feet off the ground because he is scared of heights. Partially justified in that his powers are not one hundred percent reliable.
* The Meteor Man: The title character survives a direct hit from a meteor, and gains superpowers.
* The Meteor Man, where much of the movie is spent on Jefferson Reed learning to use his new powers, including flight (despite being afraid of heights).
* The Meteors' "Corpse Grinder", which contains the line "See you later /
* The meteor shower at least, is semi-Justified by it actually being a
* The Meteor Shower Trilogy", in which each episode was a seperate story about different members of the main cast which all take place on the same night.
* The Meteor, the Stone and a Long Glass of Sherbet object you can refer to, even ones never intended to sit in a person's inventory. She will readily give you herself, for example, meaning she's available to do the same in later scenes; or hand you the green glow you see in the sky.
* theme the new War Thor). The Wolverine example is distinct in that each character there had a different writer; the other "dueling" titles were orchestrated by the same writers. (Nick Spencer for Captains America, Brian Michael Bendis for Iron Men, and Jason Aaron for all your Thor needs.)
* The method of death showing up on the ghost has been removed. It's a kids' show.
* theme to Astaroth, the most common recurring villain. Other villains include Beelzebub, Lucifer, Samael, and Hades.
* The Metric calendar failed in part because pretty much everyone (this was revolution-era
* The metric system did take hold in manufacturing, as companies wanted to build things that could be easily repaired overseas, hence
* The Metroid home planet is SR388. Justified as the name is a catalog name given by the Federation. The planet was never colonised by them (due to certain nasty energy-sucking jellyfish-things) and so there's no reason for a proper name. Samus' own home colony is K2-L.
* The Metroids themselves, unless you're packing a cold based weapon.
* The Metroliners are sort-of a defied trope at the moment, however: Between the originals (some of which are still in service 50 years later) and their immediate non-EMU cousins in the Amfleets, the design has largely been "the" intercity passenger railcar design in the Eastern US for two generations...if only because no new equipment has come along to replace them. Ironically, however, the newer railcar designs out there look an
* The Metrons are also pictured as being elven: A tall, powerful but aloof race, with grey skin, white hair, shimmering silver clothing and gladiator-style shoes.
* The Metropolitan Opera airs a radio broadcast season each year. Although going since Christmas of 1931 (and broadcast in January 1910 over experimental radio broadcasts), unlike
* The Metropolitan Opera Company was founded by a group of businessmen who were annoyed by being unable to obtain box seats at the Academy of Music.
* The Metropolitan Storage Warehouse in Cambridge, Massachusetts is frequently photographed from a certain angle due to part of the architecture obscuring some of the letters - if you approach the building from one particular side, a tower that juts out from the main building blocks some of their sign, making it appear to read "METROPOLITAN
* The Metro service tunnel leading to the Family's hideout also has a hidden back entrance from Northwest Seneca Station, which is the way most players first discover during the Blood Ties quest. The main tunnel entrance is from the Meresti Trainyard, which is a fair distance away.

* The Mets' version of the interlocking NY, which itself is based on their cross-town National League predecessors, the Giants.
* Theme Tune and got Ray Parker Jr. to sing the modified lyrics tops the lot. The relevant ads included many a pun on "I ain't afraid of no ghosts!":
* Theme Tune Extended: The show's writers make a longer version of the theme tune.
* Theme Tuneless Episode: The episode doesn't open with the theme song.
* Theme Tune Roll Call: The theme song mentions the names of the main characters.
* Theme Tune Roll Call: The theme song of a series has one or two lines devoted to each character and their role.
* Theme Tune starts off "This could possibly be the best day ever...."
* Theme Twin Naming: Twin names follow a theme: rhyme, alliteration, named after famous twins, etc. This is especially common with identical twins or at least twins of the same gender (boy-boy, girl-girl).
* The Mexican (2001) had the flashbacks filmed in a hand-cranked camera to evoke this trope.
* The Mexican brand of snacks and baked goods called "Bimbo." It actually is available in the English-speaking world, probably because its name isn't quite an obscenity, but it still causes snickers, maybe more so now that Bimbo products have begun to fill in the market hole left behind by Hostess's bankruptcy in the US.
* The Mexican comic actress and director María Elena Velasco (of
* The Mexican comic book called Memin Pinguin. It's possible you've actually read that last name as Pingüin (similar to "Pingüino", Spanish for penguin). That's because when the comic started being distributed outside Mexico, it was discovered that some South American countries use
* The Mexican Day of the Dead celebration doesn't traditionally involve a giant parade, like the one Bond encounters at the start of
* The Mexican Day of the Dead has been given a twist due to stacks. While the vast majority of people are too poor to buy a new sleeve when they die, families often rent sleeves so that their dead loved ones can visit. Detective Ortega spins up her grandmother for the celebration, which freaks out her family because they are all Neo-Catholics and didn't realize grandmother had removed her coding before she died. It didn't help that she was spun up in a male Neo-Nazi sleeve covered in white supremacist tattoos.
* The Mexican director Carlos Reygadas has a preference for casting non-professional actors in his films. He sees it as a way to get the most natural performances possible.
* The Mexican dub was even campier, the prefix "bat-" was changed to "bati-", and the characters got ridiculous dub names such as "Gatúbela" for Catwoman or "El Guasón" for The Joker (Even when the card is generally referred as "joker" in Spanish) and Bruce Wayne was changed to the more Hispanic Bruno Díaz. The dub was so successful that even today the characters are known officially as that even in later
* The Mexican elections of 2006 featured the conservative PAN saying "Vote for Andrés Manuel López Obrador, and his populist politics will bring Mexico to a new era of crisis, devaluation, unemployment, hunger, starvation, crime, and poverty!"; the leftist PRD eventually fired back, saying "Felipe Calderón is a corrupt bastard who plunged Mexico into crisis in 1994, giving later his brother-in-law a suspicious job!". However, since the Mexican people as of 2008 are still scared of economical crisis after
* The Mexican Empire endured for two years before fragmenting. It was much larger than Mexico today; barring the territories that were annexed by the United States after the Mexican-American War, it also included most of Central America except for Panama. After the monarchy was abolished, the Central American territories split off to form the Federal Republic of Central America. This new state, in turn, lasted until 1841 before breaking up again into the five modern countries: Costa Rica, Guatemala, El Salvador, Honduras, and Nicaragua.
* The Mexican equivalent is the "Niña Fresa" (Strawberry Girl) or "Chica Nice" (Nice Chick/Girl).
* The Mexican filmmaker León Salvador Fermet was believed to had been

stabbed to death by thieves, which was said to have driven his wife María Adriana to hang herself.
* The Mexican folktale of La Llorona has a woman named Maria being barred from Heaven after drowning her two sons in a fit of rage (and subsequently killing herself out of guilt). Forbidden from entering the afterlife, she's condemned to wander the earth forever, searching for her lost boys.
* The Mexican killed its first victim this way when it was being test fired. This lead to the persistent rumor that the pistol was cursed.
* The Mexican Lancers were feared by the American forces during the incidents of the separation of Texas and the Mexican-American war. Americans left written accounts of the skill with which these mounted lancers handled their weapon, particularly the battalions of Jalisco and Aguascalientes, which served with distinction in the defense of their homeland, despite facing unsurmountable odds.
* The Mexican luchador Fantasma de la Quebrada, the ghost of the broken. He and his successors are best known for their time in
* The Mexican military was going to provide the vehicles for the movie
* The Mexican National Anthem, which is extremely Teutonic and military.
* The Mexican restaurant chain Chi-Chi's was already strained by a number of factors throughout the 1980s and 1990s, including the raising of the drinking age to 21, overzealous expansion, increased competition from then-growing chains that offered comparatively better food (Chipotle, Chili's, Chevy's Fresh Mex, On the Border, etc.), and a rise in Mexican immigration. Having already filed for bankruptcy in 2003, the chain was brought to its creator-killer moment that same year when the largest hepatitis outbreak in U.S. history was traced back to green onions served at a location inside a Pennsylvania shopping mall. Unable to recover from the negative PR and boatloads of lawsuits, Chi-Chi's closed its last locations in 2004. (However, Hormel Foods continues to license the Chi-Chi's name for its lines of Mexican foods which are still sold in supermarkets.)
* The Mexican Revolution administrations supported opposite sides of the conflict. And this is leaving out historiological debates over the whole mess.
* The Mexican Revolution there were Las Soldaderas: active female soldiers fighting hand-in-hand with their fathers, sons, and brothers. When their husband died, they wouldn't cry, they'd say "Dame la pistola!" and ride off into battle.
* The Mexican Revolution, when Pancho Villa led a raid on the border town of Columbus, New Mexico.
* The Mexican's character) stops at a stoplight in the middle of nowhere. He waits for the light to turn for a while, noting that no cars seem to be coming in either direction for miles. He gives up waiting and starts to run the red when a semi-truck comes barrelling through the intersection out of nowhere and almost t-bones him. This is all ironic because it was a traffic accident that mixed Jerry up in the plot to begin with.
* The Mexican singer Daniela Romo's song "Celos" ("Jealousy") is from the POV of a Clingy Jealous Girl.
* The Mexican version of this trope, encompassed in the tradition of
* The Mexico City newspaper "Metro" has a mascot by the same name that competes as Luchador Enmascarado for
* them, expecting them to help, having clearly mistaken them for real physicians, given their clothing (the show hadn't even aired yet, so no one could recognize them as actors). Luckily, someone else helped the kid, who was fine.
* the "Mezzer" class — including villains — can pick the small Medicine pool of abilities as a tertiary set of powers.
* The Mezzotint which depicts a supernatural creature gradually making off with the family residing at an English manor.
* Them! getting frustrated when dealing with this trope when trying to talk to other characters over a radio.
* Them! giant ants that it's pointless unless the heroes can kill them individually, or are in an enclosed space.
* The MGM Barney Bear cartoon "Wee Willie Wildcat" had a similar plot, with a twist— Barney and the wildcat's dad spank Willie with their bare hands, and

end up sore because Willie used the book to armor his butt.
* The Miami Herald's Julie Brown was instrumental in the July 2019 arrest of serial pedophile Jeffrey Epstein. In 2008, Epstein was given a sweetheart, illegal
* The Mice Templar has the evil serpent spirit Donas, who controls the Nathair and wants to destroy the world through Karic.
* The Mice Templar, which is filled with dozens of battle sequences, isn't shy about killing off background characters who have had very little characterization or lines. Trabek, Haxton, and Draicus, for example, are all seemingly important characters who are killed off less than two issues after they're introduced.
* the mice that terrorised the Philistines were actually camel spiders.
* The Michael J. Fox Show, since he's playing a beloved television personality with Parkinson's who returns to TV after a long retirement.
* The Michael J. Fox Show, though possibly unintentionally. One notable example is Mike's neighbor saying that he "doesn't know what it's like to struggle" as Mike is in the background, struggling to open a jar that his 10 year old opens with ease.
* The Michigan "Fab Five" teams of the 1990s. They popularized baggy shorts and brought swagger to college basketball, despite being the NCAA runner-up twice. Unfortunately, Ed Martin, a booster for the Michigan team, was found to have provided benefits to the team in violation of NCAA guidelines, and as a result, Chris Webber was found ineligible and the Fab Five title appearances were vacated.
* The Mick... and then has to sit down because Mick spiked it with six different sleep drugs.
* The Mick: At the end of the first episode, Mick is slashed up pretty bad by an owl. By the start of the second, she's fine without a single scar.
* The Mick ends with Sabrina critically injured, with the doctor unsure of whether she's received brain damage. It's left hanging how she'll recover and whether she'll continue to Yale.
* The "Mickey and the Beanstalk" segment was dubbed first in 1966, but heavily edited to remove the narration sequences. With the exceptions of Susanne Tremper as the Harp (who also re-dubbed Snow White in the same year) and Gernot Duda as Willie, the original dub for this cartoon is also rather weak. All of Donald's dialogue remains in English, a few scenes of the cartoon are shown without the accompanying narration, the second half of the song "My, What a Happy Day" is cut and part of the song "Eat Until I Die" is left un-dubbed without any voices.
* The Mickey Mouse Club actually did an episode in 2003 about young girls who were imitating her.
* The Mickey Mouse Club (after the show) for fans of Mickey himself (as well as the aforementioned "Mouseketeers").
* The Mickey Mouse Club, arriving via flying carpet before landing and making it disappear.
* The Mickey Mouse Club as well, most notably in the opening sequence.
* The Mickey Mouse Club had a newsreel that reported subjects about science, nature, culture and activities involving children, as well as showcasing material related to Disneyland and the Walt Disney Studios.
* The Mickey Mouse Club, the entrance of Annette's high school is that of the (now former) animation building at the Walt Disney Studios in Burbank.
* The Mickey Mouse Club theme song is used as a marching song at the end of the film.
* The Mickey Mouse Club was on the show as it is with the former three). Amusingly, not only were none of the original cast members (the show actually premiered in the very late '80s), but the first three weren't even the first pop stars who had their careers launched by the program. ("The Party", anyone?) The 1950s original? Good luck finding anyone under the age of 65 who remembers it for anything other than Annette Funicello boob jokes.
* The Mickey Mouse Club was putting a "Mouseke-" in front of every third or fourth word. Typical dialog:
* The Mickey Mouse Club were shortened down to 30 minutes from the hour long length they originally aired in.
* The Mickey Mouse will not be appearing on account of his obnoxious behavior on

last week's show. Afterward, Mickey receives a telegram.
* The Mickey MouseWorks short "Minnie Takes Care of Pluto" was banned because it involved the disturbing premise of Pluto having the paranoid belief that Minnie planned to kill him and also had a scene where Pluto dreamed that he was in Hell. As a result, it is one of the only MouseWorks shorts to never be recycled as part of
* The Mick: Sabrina and Mick constantly go back and forth pranking each other to get the other under control. In the second episode, Sabrina admits that it's preferable to her grandmother's brutal and malicious domination.
* The Mick. When she doesn't, Mickey breaks into Sabrina's room and downloads her laptop's data to a USB stick. She threatens to release it unless Sabrina lets her brother off easily. Sabrina simply steals the drive back.
* The micro-brain repair unit in "Unlikely Alloys." Averted, then subverted, then played straight. It turns out Greenbox had a device to shut the thing down in the event it went rogue (that or he quickly whips one up), but he never gets a chance to use it because after the repair unit becomes sentient, names itself "Zed," and starts going around on the usual rampage, Greenbox gets too big for his britches over what "his genius" has created, and not only refuses to use the shutoff device, but smashes it. And of course it was the only one.
* The Micronauts as an experiment to deal with overpopulation who attempt to establish a working colony in the grounds of an estate.
* The microSD Card slot on the New 3DS requires using a screwdriver to gain access to, just so you can do things like access your photos and screenshots on your PC, unlike the non-New 3DS and both 2DS models where you simply pop off a tab with your finger to acceess the slot. There is an option in the Settings area to allow data on the microSD card to be sent over a network via SMB (Windows file sharing), thus sidestepping the entire screwdriver issue, but the location of this option is only intuitive in hindsight and is notoriously finicky regardless. To date, nobody has found a way to get a non-Windows computer to reliably connect to the New 3DS's variety of network sharing.
* The Microsoft Windows 10 Updates. It won't take no for an answer, it decides on its own if and when it will update, and it takes hacky
* The microwave oven was invented when engineers working on a radar project realized that working in the same room as the radar when it was running caused the candy in their pockets to melt. This is why the original name of the microwave was the Radarange.
* "The Micro World of Doctor Doom!" has Doom plot to have lizard people enslave the Fantastic Four. He tells the heroes that the lizard people would force Reed to do research, Johnny to help burn cities, Ben to work in the mines, and Sue to... cook everyone's meals.
* The mid-1970s introduces their creator Davros, who becomes a key figure in every Dalek story from that point on. Related to this, the 1980s results in a series of stories about an increasing schism in the Dalek Empire divided between Daleks who are loyal to the Dalek Emperor and a breakaway faction of Daleks
* the mid-1980s... and there was a MASSIVE push-back from older animators and Imagineers within the company, who fought tooth-and-nail to prevent it from happening.
* The mid-'60s were notorious for this, with comic creators trying to cash-in on the current youth trends and counterculture. A notable example were the
* The mid-70s Philadelphia Flyers, aka "The Broad Street Bullies." Were the first expansion team to win the Stanley Cup (winning it twice in a row), became beloved in Philadelphia and loathed by traditional hockey fans for their success through intimidation and violence. They were also known for their skirmishes against the Soviet "Red Army" teams.
* The Midas Plague, the thought of simply reducing production is considered unworkable.
* The Middle acknowledges that he's still very much alive, despite Jerry Van Dyke's death in February of 2018.
* The Middle. After three seasons of her not, as far as we've ever seen, actually

selling a car, Frankie gets laid off, and her boss suggests she wouldn't be likely to be rehired.
* the middle-aged policeman Jiro Kuroda after a brain transplant into a schoolgirl's corpse. Those circunstances make Niho resistant to the brainwashing, though she is affected enough to be unable to directly kill Himeno.
* The Middle Ages in Europe and even before, it was a common roofing technique to use thatch (for insulation) and tar (for waterproofing). Of course, this was in the age that people used torches and candles, so you can guess how well that panned out...
* The Middle Ages. Macaulay wrote that the Puritans opposed bear-baiting, not because it hurt the bear but because this form of sport gave pleasure to the onlookers.
* the Middle Ages proper itself was banned when it came out as the heretical ravings of a lunatic, but unfortunately enthusiastic amateurs got a hold of it anyway, causing a boom among both Catholic and Protestant laymen.
* The Middle Ages: Resulting in more sandpapering off of its traits than usual.
* The Middle Ages. They are the second pair of spirit user and shadow-kissed companion introduced in the series. Rose studies their life to learn more about the nature of Lissa's and her own powers.
* The Middle, a lazy teenage guy named Axel is dateless on Valentine's Day. He says he doesn't care because he's with the woman that means the most to him, his mother. His mom is so happy, and then he bursts out laughing and says he can't believe she believed that.
* The Middle always hanging out with her brother Axl, for a few episodes. Axl doesn't take it well — not because he's protective of his sister or anything, but because he thinks she is the biggest loser ever to walk the face of the Earth. Although later on when Darren unintentionally hurts Sue, Axl lectures Darren and almost slams the door in his face.
* The Middle attitude, and she usually gets a good hand out of it all.
* The Middle: Axl does this to Sue in "Foreign Exchange", just before the family takes a long car trip.
* The Middle, Axl is helping out at a Habitat for Humanity house. When asked if he needs help with the bracing, he scoffs and says he knows what he's doing, only to have the wall fall while he stands in the doorway.
* The Middle, Axl is towards this with his little brother, Brick, and especially his younger sister, Sue.
* The Middle; Axl's boss is an extremely sexy but extremely dumb party girl who he is at first overjoyed to work with, but eventually grows to intensely dislike, even turning down a date (to his own shock) due to frustration at her thoughtlessness.
* The Middle: Axl's initial first kiss with Lexie in "The Par-tay" has him saying that she needs to brush her teeth, but then declaring that he doesn't care and kissing her again anyway.
* The Middle, Axl (who normally wouldn't fit this trope) manages to pull together an impressive demonstration of how to run an Italian restaurant by calling in favors from a wide group of students in less than an hour, saving his class project not only for himself but for his sister.
* The Middle. Brad and Sue seem to be the only two people unaware that Brad is gay.
* The Middle Brad, ex-boyfriend and close friend of Sue, references his own Canadian girlfriend when scolding her for talking about herself.
* The Middle, but for some reason she's always ignored by everyone and, as a running joke, nobody notices her or remembers her name. On the bright side, she at least appears to be cheerfully unaware of it.
* The middle chapters take the player on an exploration of the old Aperture Science Innovators test facilities, far beneath the more modern chambers that you start the game in. You get to see what Aperture was like when its eccentric founder, Cave Johnson, was in his heyday, full of money and enthusiasm and with "astronauts, Olympians, and war heroes" jumping at the chance to test his products. Then you get to see it as a company struggling to survive and hiring bums off the street due to Congressional inquiries over the "

* The Middle features a celebration of the centennial of Orson, the town in which the series is set.
* The Middle for his children. Actually a subversion as Mike claims his dad never actually used it; the threat was enough.
* The Middle found Frankie and the family quickly gathering up garbage for the once every two week garbage pick up. Frankie tossed an empty bottle to Sue which accidentally hit Brick in the head. Later at school when asked about the injury, Brick innocently said "My Mom hit me with a beer bottle", not intending it to sound the way it did.
* The Middle, Frankie decides to go back to school and train to be a dental technician.
* The Middle, Frankie obsesses over the "Royal Wedding" of William and Kate, firmly fixing the episode in 2011.
* The Middle gives her character's birthday as Nov 13th, same as her own.
* The Middle Ground comics of complete anonymity. He still insists that you call him by his online name, however.
* The Middle: Happens to Sue when she is walking home from a football game in the mascot costume in the episode where she breaks Axl's foot.
* The Middle have feelings for him too though and they end up getting together not long after his breakup with April.
* The Middle; however, it's a little inaccurate to say that the two are exactly the same.
* The Middle: In "Dollar Days", when Frankie, after a fruitless day of job interviews, asks her kids for one word to describe her. They offer "lazy", "angry" and "tired", prompting Mike to defend her:
* The Middle: In "The Ditch", Mike, after trying Axl's plan to get the car and boat unstuck.
* The Middle is thought to be that in one episode; it turns out his test results were just switched with a classmate who is actually brilliant.
* The Middleman. Actually, she wears one in the opening credits, but "The Obsolescent Cryogenic Meltdown" is the first episode in which she wore one within the episode.
* The Middleman, after Wendy sneaks up behind a villain and injects him with tranquilizer:
* The Middle Man and to a lesser degree, both of Dub-Dub's mundane cars.
* The Middleman are both geeky artists with a high potential for heroics (even if Wendy was the one eventually chosen for the job).
* The Middle Man, but he manages to dodge the question by giving her an honest answer that says nothing.
* The Middleman comes as close to being a superhero as possible without being openly labeled as one. He even has a super hero name, but no tights. The first episode has him explain his job to Wendy in terms of it being "exactly like your comic books".
* The Middleman dogfights, machine gun duels, and swordplay before his opponent finally dies of a heart attack during a Rock'em Sock'em Robots game.
* The Middleman episode "The Flying Fish Zombification", Ida starts a phone call with, "I've got good news, bad news, more bad news, and worse news."
* The Middleman, every single male character is bearded; most but not all are more evil than their clean-shaven counterparts.
* The Middleman, fashion mogul Roxy Wasserman and her staff are all reformed succubi and incubi.
* The Middleman featured a gang of luchadores obsessed with killing The Middleman's martial arts trainer and mentor, Sensei Ping (who also, incidentally, wore the mask of a luchador).
* The Middle Man featured superintelligent genetically engineered lowland gorillas.
* The Middle Man gives them names that are different but still similar enough to invoke familiarity with the actual product they're spoofing or implying.
* The Middle Man gives us Shibumi, an exceedingly complex card game played by high-class villainous types. Each player is given a full deck of cards, over 300 verbal

and physical challenges are involved, and the price for losing or cheating is death. And live bunnies are involved somehow.
* The Middleman: Guy Goddard has been in cryogenic suspension since 1969.
* The Middleman has a particularly spectacular one of these, nicely complementing his broad shoulders and washboard abs.
* The Middleman has something similar between the Middleman and Wendy, only they were both awake, albeit extremely bored.
* The Middleman Ida is destroyed defeating the villain's scheme, given a hero's funeral — and then Wendy finds a box with a brand-new Ida robot inside. It is never mentioned again.
* The Middleman; in the pilot episode, Wendy and The Middleman share this banter:
* The Middleman is a B.T.R.S. scanner, which looks for things Beyond the Realm of Science.
* The Middleman Lacey refers to her mother as Doctor Barbara Thornfield MD. PhD., doesn't recognize her voice over the phone, and is surprised at being able to speak to her the same day she tried to contact her after only 40 minutes on hold.
* The Middle Man often drops into Imagine Spot sequences when people ask her questions she needs to answer, or when she has a "Eureka!" moment.
* The Middleman, Roxy Wasserman is a reformed succubus who runs a halfway house for not-quite-reformed succubi, disguised as a fashion boutique.
* The Middle Man supply. In an interesting subversion, not even the Middleman himself knows who they are—the name is a joke meaning "Organization Too Secret To Know", and Middleman '69 called them WTHWWF, "Whoever The Hell/Heck We Work For."
* The Middle Man, the drink !!!! (pronounced by stomping one foot, throwing your hands in the air, and smiling excitedly) turns people into fish-craving zombies.
* The Middleman: The Middleman is being possessed by an evil genius. Ida, warned by Wendy, innocently asks if there's anything he needs from her before she goes home to her husband and children. The fake Middleman, not knowing that Ida is an android, doesn't suspect a thing.
* The Middle Man, there are a pair of sunglasses that allow the wearer to see ghosts.
* The Middle Man triggers the Middlejet's seat remotely, much to Wendy's horror.
* The Middleman, Tyler says to Wendy "I think I kinda love you." She gives him grief for it, but eventually admits that she kinda loves him too.
* The Middleman' very own ventriloquist dummy Little Vladdie, who naturally comes to life and obsesses some of the cast.
* The Middleman. What happens with Fatboy Industries? Do alt!Middleman and alt! Lacey save the world? And what does aerosolized soup taste like, anyway?
* The Middleman, when Wendy asks MM this and he refuses to divulge secrets through a civilian interpreter. That's good enough to prove it for Wendy.
* The Middleman when Wendy begins her training with Sensei Ping. After a long sequence with Ida and The Middleman telling her how strict and ruthless a teacher Sensei Ping is and how unlikely she is to survive the first day, she bounces out of the training room, out of breath but mostly unhurt, yelling, "That was AWESOME!"
* The Middleman, which is the plot driver for her to take the job at the Jolly Fats Wehawkin Temp Agency. To a lesser extent, her young, photogenic, animal activist room-mate Lacy Thornfield.
* The Middleman with great glee. Or, as MM himself said, "Quit your grinnin' and drop your linen!"
* The Middle: Mike is banned from Brick's school after his attempt to help at the Valentine's Day craft project ends up ruining Valentine's Day.
* The Middle, Mike is trying to be more outgoing and strikes up a conversation with a female neighbor at a party. When he realizes she's reading way too much into his friendliness, he shuts it down fast.
* The middle mouse button pans in AutoCAD, but doesn't in Adobe software. This results in a few moments of stupidly staring at the screen wondering why it isn't changing.
* The Middle of, at least once each episode, repeating what he just said in a

whisper while looking downward. He's in a special social skills class at his school. He is obsessive about reading almost continually, to the point where he's delighted to get a toy robot for his birthday... because the instructions are in different languages, and he hopes to learn Japanese that way.
* the middle of nowhere predators we don't get much of a glimpse of, like krayt dragons) justifies its allure for underworld players like smugglers and bounty hunters, while for regular folk it remains an unimportant dust ball.
* The Middle of Nowhere, trilogy, trainee Apprentice Engineer Robert Gatineau discovers through multiple encounters that Rule #1 is "Whatever your superior officer says it is."
* the middle of season 5 when Jo rejects Dean's flirting during their "last night on Earth", saying she'd prefer to keep her self-respect... and she dies later in the episode anyway.
* The Middle puts his head down and whispers "I'm lying!" whenever he lies. Sue is pretty terrible at it, too, rambling nervously and saying "and so on and so forth" for no reason.
* The Middle's fourth-season episode "The Hose." Brick tries to opt out of sex-ed class at school because it makes him uncomfortable, making Mike and Frankie realize they've never had "the talk" with him. Before they can, however, he asks his older brother, who gives it all to him in a two-hour session. Brick repeats it when he does finally have sex ed, which results in a parent meeting and ultimately Mike and Frankie talking to Axl.
* The Middle she asks her Mom to make a grilled cheese sandwich like she used to — with potato chips in the middle.
* The Middle: Sue Heck is a Leap baby who dreamt of actually celebrating her 16th birthday on Feb 29, 2012.
* The Middle's "Vacation Days", when Sue learns that Brad has been using a pseudonymous Yelp account to make constructive criticism of how she does her job, she stands on a table at the mall's food court and makes a speech about how, if people are going to do things like that they should at least use their names. It backfires when everything she says becomes a setup line for audience jokes about the poor quality of the food at the potato-stand chain she works for.
* The Middle that began with the Hecks coming back from Aunt Ginny's funeral, ended with an "in memoriam" to Frances Bay, who had played the character until she died the previous September.
* The Middle, the Glossner boys are the terror of the neighborhood. Whenever someone confronts their mom (who is no saint, either) about their delinquency, she always responds with "Them's good boys!"
* The Middle, the Hecks go on a trip and ask their neighbor to bring in the mail while they're gone. The first time the neighbor goes into the house, the place is such a mess that she calls the police, thinking that it had been broken into and ransacked. The family is embarrassed into cleaning up, but it doesn't stick.
* The middle to end of the Thriller Bark arc signaled this very well as it was the first time that the One Piece TV anime received such a high number of great animators to do it justice.
* The Middle was told to smile more; later the family revealed to each other who assigned what to who, and Frankie says that Mike has a beautiful smile.
* The Middle, we learn that Frankie has been rewarding Brick for years with candy cigarettes for informing on his older siblings.
* The Middle, when Sue and Brad are training for a square dance competition. There's even a square dance version of "Eye of the Tiger" playing during the scene.
* The Middle: When Sue is at the meeting listing all the activities she tried (and failed) at in a speech, Frankie gives her a 'hurry up' gesture from the audience. Sue sees this and concludes "Oh, yes, and tumbling."
* The Middle who told him about how he had lost his own little brother in a cornfield all those years ago.
* The Middle: Without a whole lot of warning to the fans, Axl kisses Lexie right when he shows up at her apartment at the end of the episode "The Par-tay".
* The Mideast 8-seed Wildcats first edged out 9-seed Dayton 51-49. Dayton played

on their home court in the game.
* the mid-Eighties, instead. These have since fallen into general use now that Williams is no longer in the pinball business. A few examples:
* the midget Billy Curtis (120 cm) got married to Lois De Fre (193 cm) (for which her height probably came in rather handy).
* The mid-Hoenn episode "Love At First Flight", which occurs between the episodes "What You Seed is What You Get" and "Let Bagons Be Bagons", was initially skipped over in the US due to elements involving love (and a scene where Brock chases Ash dressed as a girl), eventually airing a few episodes later. Reruns would have it air in its proper spot, however.
* Them Idiots: Whirled Tour (though Larry starts visibly chuckling after a minute). Jeff then tells Reno to go stand in the corner and think about what he just said.
* The Midnight Beast's song "Ninjas": "And my hands are like samurai swords, except not metal, so nothing like swords- they're just hands!"
* The Midnight Crew later does a nice variant, where Slick starts saying "Hate to cut and..." and then curses his poor sense of timing, as his targets have not actually appeared yet. Then he utters this awesome line:
* The Midnight Crew, who live this trope with a healthy dash of noir and more than a touch of sociopathy (although in the case of
* The Midnighter starts every battle by first running the whole thing through the supercomputer in his head a few million times, analyzing every possible outcome, so he'll know precisely how the battle will go, and what he'll have to do. He's particularly fond of telling people that he's already beaten them a few million times, so doing it once more will be simple. He even put this on a business card once in an effort to save time. This failed, as the card ended up in his forehead.
* The Midnighters Trilogy has the Blue Time, between midnight and 12:01, though in the last book it starts appearing during the day as well. Also involves monsters which attack the defenseless ordinary people (or would were it not for the efforts of a bunch of teenagers who fight them with superpowers and the number 13).
* The Midnight Express. Condrey was in turn replaced a couple of years later by Stan Lane, and it's debated among fans to this day whether the Condrey/Eaton or Eaton/Lane version of the team was better. Rose eventually rejoined Condrey and they feuded with Eaton and Lane over who was the "real" Midnight Express, but Rose gets little recognition compared to Condrey Lane and Eaton, and Austin is a footnote.
* The Midnight Express - Dennis Condrey, Randy Rose, Bobby Eaton, Stan Lane
* The Midnight Express's "Double Goozle", in which Bobby Eaton charge at an opponent and clothesline him while Stan Lane clips his legs out from under him.
* The Midnight Express would frequently cross the politically correct borders when addressing black wrestlers such as Rocky King. They actually caused a riot when they whipped Brickhouse Brown with pants belts to remind him "what your grandfathers got".
* The Midnight Folk features a ship carrying a valuable cargo where one of the officers leads the crew to mutiny against the captain, maroon him, and take the cargo for themselves. Then the crew mutinies against the new captain and maroons him as well.
* The Midnight Folk, the young orphan Kay learns that his beloved toys, which were packed away after his parents died, came alive when nobody was looking and went on a quest to make things better for Kay.
* The Midnight Gang, many of the hospital's signs are broken in comical ways:
* The Midnight Gospel, Clancy visits a simulated planet in which clown-spider parasites have taken over the bodies of humans, and who are using Meat City to render the local wildlife into meat.
* The Midnight Gospel happen all around them, often with the interviewee engaged in dire circumstances while having very in-depth conversations.
* The Midnight Gospel has Clancy visiting a planet ruled by clown-parasites. They resemble clown babies in their juvenile form and spiders with cylindrical clown heads in their adult form.
* The Midnight Juggernauts song "Dystopia" describes the stars falling out of the

sky in a beautiful and terrible spectacle: "Any given minute we're witness to planets falling from on high/Sparkle as they're falling through the twilight sky".
* The Midnight Meat Train, and in interviews, he had indicated that he wanted to switch to making films in America permanently, despite being quite bankable in Japan.
* The Midnight Meat Train, Bradley Cooper's character gets his tongue ripped off by another character's teeth.
* The Midnight Meat Train, his room turns into a craze den with tons of photos and newspaper clips on the wall.
* The Midnight Meat Train human flesh is gathered from subway riders to feed the elders of New York in exchange for their immortality.
* The Midnight Meat Train: Leon Kauffman, a photographer, is attempting to find the "real" New York City. He begins to delve into the city's inner "darkness", and while there, discovers a monstrous serial killer roaming the subways.
* The Midnight Meat Train, the camera cuts to the point of view of the victim's head.
* The midnight rides of Samuel Prescott, William Dawes, and Paul Revere. The last of these only made it to one village before he got caught, but he got the poem, so he's the famous one.
* The Midnight Rose collective, a group of British SF writers, published several shared-universe anthologies in the early 1990s, with settings including
* The Midnight Sky Augustine Lofthouse survives a world-ending cataclysm at his Arctic research station while trying to contact astronauts in space and give the coordinates he's programmed, which will allow them to reach another planet with the limited fuel aboard their ship.
* The Midnight Slasher) is assumed to be male, but is secretly a woman, driven insane after the murder of her parents at the hands of the domain lord of Invidia, Gabrielle Aderre. Most residents of Invidia assume the killer to be a man, never suspecting the disheveled beggar they see on the streets by day to be a cold-blooded killer by night; in fact, that's how she keeps the façade alive.
* "The Midnight Son" Caleb Konley, especially in EVOLVE. No one cares about win-loss rankings, mixed styles or even really wrestling. What's really important is his magnificent face, and he will hold up the show as long as he can to keep the camera focused on it as long as possible. His face will be burned into your brain!
* The Midnight Son Caleb Konley, who says his face is the best in the sport.
* The Midnight Story on Griffin Hill, a man tells a griffin a sad story and the griffin's tears fill a pool.
* The mid-season 4 finale features The Governor leading an assault on the prison, resulting in a three-way battle between Rick and The Governor's groups and a horde of walkers.
* The midshipman is actually reluctant to sound the alarm, so a more decisive officer does so on his behalf. Unfortunately the crew witnessed his indecision — this and other events cause him to lose their respect.
* The mid to late '30's Popeye radio show actually predates the Quaker Oats fiasco, minus the bad PR but still glossing over Popeye's most well known trademark; specifically, the show regularly shills Wheatena cereal over Popeye's spinach, even incorporating the cereal into Popeye's theme song for the show.
* The Midwestern Brotherhood of Steel are just downright fascist in one of the worlds from
* The midwestern US fast food chain Steak 'n' Shake use to advertise with the slogan "It's a meal!"
* The Midwest. Poorer and less educated than their coastal brethren, and somewhat more likely to be conservative. Often, these portrayals stray far from real life and enjoy an undercurrent of hypocrisy (the respectable church-goers are all sleeping with each other), partly to add color, but mostly because the Midwest is just slightly less alien than Mars to most of the folks who write TV.
* The Midwich Cuckoos movie) in which none of the kids had human emotions. They all died along with the teacher responsible for their deaths, but almost everybody else they hadn't "influenced" survived.

* The midwife/healing woman Matilda is accused of witchcraft and dunked in the village pond. Somewhat
* them if they tried to hit back. Even Jaune acknowledges how shitty Atlas was.
* The Migax Cycle,"dreg" is used to refer to humans that are part of the lower class.
* The Migax Cycle, Leafsong calls Summer "Hacker," due to the fact that Summer is good at hacking technology, yet hates being called a hacker.
* The Migax Cycle, most of the important protagonists are LGBTQ+, with Leafsong being bisexual, Summer being a lesbian, and Moonwafer being asexual.
* The Migax Cycle, Squell District is the place where the outcast vagrants of society are forced to live.
* The Migax Cycle, Summer doesn't even try to sue Sylas for damages to her apartment, because she knows he'll be able to pay his way out of it. Also, Mililabs gets away with luring people into exploitive contracts and doing horrible experiments on them due to their huge lobbying power.
* The might and power of the Dwarves has been lessened over time by their many wars (mainly with the Enemy but also with others) and the fall of their ancestral home, Moria. The fact that only a third of their population is female doesn't help with the population growth and many of the men will not marry, choosing instead to focus on their crafts. Furthermore, many of the women refuse to marry if they cannot have the man that they desire.
* The Mighty Angelo, the world's strongest flea, from the short "To Itch His Own". Anytime he goes to do something badass, his mustache uncurls itself.
* The Mighty Avengers (it happens), he is recovering in a hospital. When asked how he's doing, Tony checks under his bedsheet and reports that he is fine.
* The Mighty B! and the effects of which are putting all of San Francisco at risk.
* The Mighty B!, Bessie eats what was probably several dozen foods in an attempt to find which is her weakness. When she lastly eats a zucchini, she throws it all up, carrying Ben out the door in a wave of mostly undigested food.
* The Mighty B! Bessie enjoys playing a game of Pineapple with her friends. While the rules aren't stated, all we know is that they're fairly inconsistent and involve someone dressing up as a pineapple.
* The Mighty B!: Bessie Higgenbottom is an ambitious and optimistic 9-year-old Honeybee Scout who believes that she will become a superhero called "The Mighty B" if she collects every Honeybee badge.
* The Mighty B!: Bessie is surrendered one to save her relaxing hive from her popular top enemies.
* The Mighty B!, Bessie sees a driver speeding, and cries, "He could've hurt a chicken crossing the road!".
* The Mighty B!, Bessie (who fancied herself a would-be superhero) once tried to find her Kryptonite Factor by going through every food item she could think of alphabetically. By the time she got to zucchini she was so full that she became violently ill, and thus thought that zucchini was her weakness.
* The Mighty B!, "B Plus 1", Bessie wins two tickets to a sold-out boy-band concert. Fellow Bee Scouts, Portia and Gwen, fight for her extra ticket by buttering Bessie up with favors, breaking off their friendship in the process. Bessie's dog Happy is a closet fan of the boy-band attending and went as far as stealing the tickets. Mistaking Happy for wanting attention, she gives up both tickets to Portia and Gwen, who became friends again instantly afterward. In the end, they both enjoy the concert... until it was canceled when the boy-band suffers a case of puberty.
* The Mighty B! has Happy and some dog impostor mothering him do this with bendy straws.
* The Mighty B! is very adventurous due to her determined will to win badger scout badges.
* The Mighty B!: on thanksgiving at Colonial Farms, Bessie and Portia do this during sleep at a barn's haystack until Bessie gives up within a moment.
* The Mighty Boosh and Howard quips "we spent the budget on your hair".
* The Mighty Boosh, "an exploration of pain and rage… so playful" features a

doctor and a man in a pencil costume screaming at each other while an unshaded lightbulb swings between them; the doctor also pounds a piece of meat with a telephone handset while yelling "MAKE THE CALL" (seen in "The Chokes").
* The Mighty Boosh are friends and family of Noel Fielding and Julian Barratt. The biggest example is definitely Noel's younger brother Mike, who plays Naboo and is also part of the main cast, but there are several other notable ones:
* The Mighty Boosh are only loosely written, usually only specifying a few things the actors need to say to further the plot, with much of the rest being improvised. The performers often change their lines between takes to keep their delivery fresh. This is even more the case with the original radio show which was less rehearsed than the TV show.
* The Mighty Boosh are zookeepers (in series 1 and 2), and some episodes deal with a problem at work.
* The Mighty Boosh: Bob Fossil, trying to bribe Bollo to let him into a party, offers him such worthless incentives as "the key to a bike I had in the '70's".
* The Mighty Boosh, Bollo is Naboo's familiar, although most of the time they're just pals. Also, in one episode, Noel Fielding briefly plays the character "Barry", whose familiar is a bat named Chrissie.
* The Mighty Boosh) breaks. He claims that it wasn't an ordinary bottle and that they released a demon that's hiding inside one of them, causing everyone to worry. He then clarifies that it will only possess the body of a virgin. This causes Howard to scream in terror. Naboo then says that he was only joking, causing an embarrassing moment for Howard.
* The Mighty Boosh, but admits he only went with the costume when he fell asleep trying to chew eight packs of bubble gum at once.
* The Mighty Boosh But when they get to the last one, Vince's phone goes off.
* The Mighty Boosh can talk to animals and is referred to as Mowgli in Flares—although he often "squanders" his gift by talking to the animals at the zoo about Gary Numan and and dressing the lion up as Adam Ant. Sometimes his boundless charisma does prove useful, however.
* The Mighty Boosh, Dixon Bainbridge's secret lab, which Vince struggles to find, is clearly marked by a giant sign that says "Secret Lab".
* The Mighty Boosh does it with Old Gregg - a sea monster who kidnaps Howard and leaves a card saying "I'm Old Gregg"
* The Mighty Boosh episode "Killaroo", where Howard's boxing training montage fails to yield any improvement at all.
* The Mighty Boosh episode "Milky Joe", Howard and Vince flee from the coconut police in a bamboo car. They also construct houses, fashion items, and the coconut men from bamboo, palm leaves, etc.
* The Mighty Boosh episode "Party". Vince is cornered by the angry shaman Dennis, who thinks (incorrectly) that Vince put the moves on his wife and is prepared to behead him for it. Vince insists that he didn't do it because he's in love with Howard, and passionately kisses him to prove it.
* The Mighty Boosh especially, opens with Vince and Howard introducing the show in front of a curtain, and generally riffing on what's to come. This occasionally includes quibbling about changes in the script, and bitching about using up special effects money on Vince's hair. Occasionally they'll pause mid-episode to reference these facts. Vince is fond of breaking the fourth wall with a wink or a grin, and an episode in Series 3 has Howard pause and address the camera directly to point out that the audience has already seen the events he's about to summarise.
* The Mighty Boosh features a character named Daddy Push who has a winkle-shell for a head.
* The Mighty Boosh for a character called Old Gregg to be portrayed drinking Bailey's, since they imagined he would probably be an aging man. They eventually allowed the usage when they were informed that Old Gregg was, in fact, a transsexual man-fish, which is apparently much more in line with the company's new target market.
* The Mighty Boosh found the audience overdid it so much that they decided not to keep it. It sounds disastrous indeed, as The Boosh is clearly not a "laugh out

loud" type of comedy.
* The Mighty Boosh gave the probably most accurate definition of the series: "If Dali made a show, hopefully it would look like this."
* The Mighty Boosh gives Vince a tin whistle to play if he needs help. Vince plays the wrong tune and gets a locksmith.
* The Mighty Boosh gradually became more a victim of cruel humor as the series progressed.
* The Mighty Boosh had one character receiving a phone call on an expedition somewhere in the arctic. We can safely suspend our belief to include it, considering that at the time the expedition, comprised of two zoo-keepers, was trying to defrost the frozen last words of an explorer killed by Jack Frost.
* The Mighty Boosh has Bob Fossil finish an anecdote with "...and that's why you should never bring a Cricket Bat to Greece!"
* The Mighty Boosh has fabulous hair, amazing clothes, and one brain cell.
* The Mighty Boosh has the boys stranded on an island, and they start to make crude companions out of coconuts. As the boys devolve into madness, the coconut people start to take increasingly human and terrifying characteristics.
* The Mighty Boosh has Vince suggesting a shortcut to Howard that leads them both into the middle of nowhere. When Vince explains himself as having tried to follow the long red road on the map, Howard rightly points out that it's actually a raspberry bootlace.
* The Mighty Boosh have a live show that has no fourth wall to speak of, the players cracking asides to the audience and commenting on the effects (they apparently have a very bad sound technician). It gets meta damn quick.
* The Mighty Boosh have jobs like this in series one. They work at a zoo helmed by two madmen who openly dislike them and routinely try to kill them, but for some reason Bainbridge and Fossil never think to simply fire them every time they survive. In the entire series, it takes the zoo closing to upseat them from their jobs.
* The Mighty Boosh, he walks into the Nabootique with his hair neatly combed while wearing flattering black clothing and a dapper hat. His bisexual best friend Vince, who is hinted to be in love with him, doesn't say anything, but the way he looks him up and down from head to toe with a mixture of surprise and lust on his face certainly implies he was thinking this trope.
* The Mighty Boosh, Howard and Vince are trapped on a desert island and have no food. As Howard chases Vince in an attempt to eat him, Vince backs into a coconut tree, knocking a coconut down onto Howard's head. He knocks several more down in his delight, all of which hit Howard.
* The Mighty Boosh, Howard and Vince end up washed up on a desert island and divide it up this way. Howard doesn't realise until after he's drawn the line that all of the trees (so basically everything of use) is on Vince's side of the island.
* The Mighty Boosh, Howard catches the eye of an avant-garde filmmaker and is cast in his next venture - unfortunately for Howard's dignity, the filmmaker has decided to sell out and make advertisements, and Howard plays "the angry crab of trapped wind" in an ad for anti-gas medicine.
* The Mighty Boosh, Howard has a flashback of when the soul of jazz tricks him into signing away Howard's soul to him. After the evil jazz soul gets mad at Howard for not telling him his hat is on fire (and "ruining his exit") he stomps off to the right of the screen. Seconds later, he comes back, saying "There isn't an exit there, it's a damn toilet." and walks off to the left of the screen.
* The Mighty Boosh, Howard is trying to impress some goth girls. When he gets up, his incredibly tight trousers split through the rear to reveal his goofy, colorful, and decidedly not goth briefs. The girls just laugh at him.
* The Mighty Boosh: Howard plays a tape of his own dramatic score in the radio show episode, "Jungle".
* The Mighty Boosh: Howard receives one of these in "The Chokes", courtesy of his hero, Jurgen Haaberemaaster.
* The Mighty Boosh Howard's wife or girlfriend) in nearly every episode. He addresses his oddly compelling androgyny himself in the episode "Party": "Of course

you [fancy me] — all men do! I'm the confuser! 'Is it a man? Is it a woman? I'm not sure if I mind!'"
* The Mighty Boosh is a sort-of Fifth Ranger to the main group of Howard, Vince, Bollo and Naboo. He was in the radio show and tv show from the beginning, but as an antagonist with not much focus. After series one ended, he vanished from the show, as the main characters no longer worked for him. He had a single cameo in series two, then in series three, he appeared in a neutral role in a few episodes, though the other characters still don't like him. In the live shows, however, he's updated to full group status, fights on the side of the heroes, and seems to be at least somewhat friendly with Vince and Howard.
* The Mighty Boosh is named after a childhood memory of co-creator Noel Fielding, when a 6-year-old Portuguese friend of Michael Fielding (who plays Naboo on the show) described Michael's large hairstyle as "a mighty boosh." Ironically, Noel's character Vince Noir has a large, distinctive hairstyle that is the subject of many jokes, while Naboo's hair is almost always covered by a hat.
* The Mighty Boosh is Vince's brain: a lone cell who looks like Vince and spends all its time watching a television that only shows people who look like Vince.
* The Mighty Boosh loves exaggerated comedy violence, usually directed at Howard, who is often hit with something equivalent to a stick.
* The Mighty Boosh. Many original fans have complained the latest series is too mainstream and lacking in invention. Whether there's been an actual drop in quality is debatable.
* The Mighty Boosh Mrs Gideon agrees that it looks just like him, and later on Dixon Bainbridge draws a sketch of Howard the same way.
* The Mighty Boosh. One of the best: The Hitcher's massive thumb's backstory, related while driving through the dark and ominous Forest of Death. His long and cheery reminiscence culminates with him smashing in the head of the shaman that helped him, just to get out of the bill.
* The Mighty Boosh) onto a plate, at which point Howard thinks he has to eat the delicacy or he would offend them. After trying the "spit", he mumbles some fake compliments, at which point the real lunch arrives: ordinary sandwiches.
* The Mighty Boosh: Rudy something something (he goes by many names) has an actual door (of Cuckoondo) in his afro.
* The Mighty Boosh season 1 episode "Hitcher", Howard Moon picks up one of these.
* The Mighty Boosh's Howard Moon is Britain's leading cream poet. This trope is also a running gag in the audio commentary. "This is one of the top five dwarf-based arctic sick jokes" and "He's one of the great London tent-shakers."
* The Mighty Boosh so that he can become younger and more powerful. Naboo flushes the nearby toilet to stop him, heating up the water in the shower and melting The Hitcher into a green milkshake-like slime.
* The Mighty Boosh spits on your fourth wall! They not only look at the camera and talk to the audience, they make in-episode references to the show's premise, the actors playing multiple characters, that episode's costumes and special effects, even the show's channel and time slot.
* The Mighty Boosh: Subverted in a first season episode. After Howard is killed (temporarily) he returns to visit Vince as a ghost. Vince is impressed and moves his hand to bash into Howard's chest:
* The Mighty Boosh, the Crack Fox offers Vince a "goblet" (really a half of a tennis ball) full of wine. Vince asks what sort of wine it is, then takes a sip. The Crack Fox replies "blood from a cat's face". Vince does a spit-take, and the Crack Fox seems quite proud of his joke.
* The Mighty Boosh the evil spirit of Jazz is subuded by being sucked into a vacuum cleaner. Sadly this doesn't stop the spirit as he just rolls the cleaner to Howard and "Get's inside him."
* The Mighty Boosh, the Hitcher and his minions are introduced into the show when a box is opened. The Hitcher was apparently sealed in the box for 200 years, for crimes against humanity. Including, but limited to raping a dolphin and driving contaminated swans to fights.
* The Mighty Boosh: The Hitcher is one of the series’ only recurring villains.

His first appearance is in the episode "Hitcher" when he seemingly teleports into the van after Howard refuses to pick him up from the side of the road while driving to the animal offender zoo. Howard later becomes trapped in The Hitcher’s box with Vince, where The Hitcher reveals he owns the animal offender zoo, and his plan to cut them up and feed them to the animals.
* The Mighty Boosh. Then later he steps out from behind the door in a strange way that gets a second laugh out of the same joke.
* The Mighty Boosh... the only difference is that it goes on for longer.
* The Mighty Boosh. The series 3 episode "Party" has two particularly good examples:
* The Mighty Boosh, Vince blackmails Bob Fossil into giving him and Howard a gig spot by threatening to call Fossil's mother. Fossil quickly agrees to the demand, mainly because his mother's under the impression he's still being held prisoner by the Vietcong.
* The Mighty Boosh Vince Noir is never seen anywhere without a pair of really nice ladies' boots, often with large heels. The knee high black boots in Strange Tale of the Crack Fox had the highest heels he ever wore in the show and were absolutely MASSIVE, making you wonder how he was able to run from danger and jump out of high-up openings without falling over.
* The Mighty Boosh, when the main characters are trapped on a deserted island; before long Howard wants to eat Vince and the camera flashes to Vince made of food. Then the camera goes to the regular Vince, who says "Hey, Howard, why don't we eat this guy? He's made of eggs and sausages."
* The Mighty Boosh: When Vince Noir tried to run away from home as a child, he didn't get very far, as he was using a bindle stick to carry stuff several times his own body weight.
* The Mighty Boosh where there was a villain stealing animals from the zoo. Howard wants to do a psychological profile, get inside the fiend's head and work out when he'll next strike... and Bob Fossil and Vince suggest flying around in a helicopter firing flares everywhere.
* The Mighty Boosh which references the two sub-cultures clashing in 1960's England.
* The Mighty Boosh, whose offenders include Kodiak Jack (attempted) and Elenore the Tour Whore (unintentional), both played by Rich Fulcher.
* The Mighty Boosh, with several instances of monster-on-man rape, including Yetis, Aliens, and Mermaids. Vince actually invented a "game" called Pelt the Rabbit in His Big White Face, which tends to end in people getting raped by giant rabbit-monsters (or people in grotesque rabbit suits, it's not clear which).
* The Mighty B!'s Honeybees have unusual similarities to The Girl Scouts.
* The Mighty B!, the Honeybee Scouts are camping and Penny tells the story of a mean girl no one liked who gets lost in the woods, speaking in a deep, creepy voice. The story freaks Portia (and her mom) so much she runs away into the woods.
* The Mighty Casey", footage of crowd scenes from the Polo Grounds and Fenway Park is shown during the montage of the Hoboken Zephyrs' winning streak.
* The Mighty Casey", the robot Casey becomes the pitcher for the Hoboken Zephyrs. After he has a heart installed and can't bring himself to strike out the members of the opposing team, Mouth has Stillman create a series of robot pitchers to help the Zephyrs win championships.
* The Mighty Ducks 2: When the Ducks become famous as in an international tournament as "Team USA," Coach Bombay abandons his coaching responsibilities in favour of milking his newfound wealth and fame for all it is worth.
* The Mighty Ducks and Garette Ratliff Henson are brothers who play fellow Ducks, Fulton and Guy.
* The Mighty Ducks, coach Gordon Bombay names Charlie captain because he's an emotional leader. In the second film, he helps his team win a championship by serving as an assistant coach. In the third film, he's so upset at not having Gordon for a coach that he reverts to running on sheer emotion. New coach Orion demotes Charlie until he balances his charisma with levelheadedness.
* The Mighty Ducks decided by the playoffs, not the season record.) Perhaps it was

a case of Gordon's motivational speech holding too much weight:
* The Mighty Ducks, Don Tibbles gets hit by one of Fulton's slapshots; upon being revived, he asks for "a cheeseburger, fries, and a chocolate shake."
* The Mighty Ducks, Dwayne offers to shake hands when meeting the varsity team—and gets a handful of chewing gum instead.
* The Mighty Ducks film, a speed skater (Luis Mendoza) is introduced into the team. He is extremely fast and actually quite agile and maneuverable, but he has one slight problem... which is shown when he "stops" by hitting the boards with a splat.
* The Mighty Ducks film series features real-life sportscaster Bob Miller providing the play-by-play for several of the Ducks' games.
* The Mighty Ducks: Game Changers: All of the parents whose kids are part of the current Ducks team (which is now a powerhouse) are this, having splurged on expensive gear, private coaching sessions, etc. to try to get their middle school aged kids to the highest competitive levels of hockey. One parent in particular has hired a pediatric sports psychologist.
* The Mighty Ducks: Game Changers is that a boy named Evan gets cut from the hyper-competitive Ducks, so his mother decides to start a new hockey team to return to the idea of children playing for fun rather than to always win.
* The Mighty Ducks: Game Changers, the Ducks wear purple jerseys and they're the strongest team in Minnesota youth hockey.
* The Mighty Ducks: Gordon Bombay is a deconstruction. He is very good at winning cases, but his methods and attitude (including but not limited to seducing a court reporter for information) leave his boss increasingly disgusted at having to defend him, and antagonizes judges and prosecutors he should be building relationships with. When he gets arrested for a DUI charge, the judge (whom he has argued in front of before) is all too keen to throw the book at him, and the only thing that keeps him out of prison is some deft social engineering from his boss.
* The Mighty Ducks. Happens several times. In the Ducks' final regular season game, Coach Bombay pulls Goldberg to give the Ducks six attackers and a chance to win the game in regulation, as a tie would not have been enough to qualify for the playoffs. It works.
* The Mighty Ducks has Gordon Bombay take a knee injury during a minor-league game, ending his NHL career before it begins. Later in the movie, during a pickup game of three-bar, Wolf "The Dentist" Stansson hits him in the same knee.
* The Mighty Ducks heaving a cooler full of ice and dousing Coach Bombay.
* The Mighty Ducks lawyer Gordon Bombay is arrested for drunk driving - but because he's been such a jerk to so many in the legal profession, including the judge that hands him his sentence, he's forced to coach the titular peewee hockey team as his community service.
* The Mighty Ducks moment... until the goalie removes his glove and shows an enormous puck-shaped bruise on his palm. Later, when Reed is taking a penalty shot at the same goalie, the goalie is visibly shaking with fear.
* The Mighty Ducks movies have some version of this involving Gordon Bombay.
* The Mighty Ducks movies. In the sequel, they are merely in over their heads but have a few "secret weapons" in the form of unlikely or impossible technical feats.
* The Mighty Ducks movie. They lose at least half of the games in the season, but due to a series of extreme coincidences (chief among them an entire team coming down with a serious illness and forfeiting their season) they make it to the playoffs.
* the Mighty Ducks of Anaheim, wearing uniforms which matched those from the second film and owned by Disney themselves. In 2005, Disney sold the team, who thus changed their name and removed the movie iconography from their brand. That said, their mascot, Wild Wing, still wears the mask from the classic logo.
* The Mighty Ducks, one of the kids relates to Gordon what happened to their previous coach: A long rant, followed by a sudden clutch at his left arm. Gordon concludes, "Heart attack."
* The Mighty Ducks on offense, but their defense is rather lacking. This is pointed out in the third movie by Coach Orion, who teaches them how to play "two-way"

hockey.
* The Mighty Ducks sends its captain to take a vicious slash at Banks, breaking his wrist. Despite that such an obvious attempt to injure would get him ejected from the game (at minimum), he only gets a 2-minute minor penalty and lampshades it on the way to the penalty box.
* The Mighty Ducks series of movies always ended in some dramatic fashion, though never in overtime. The first movie ended on a penalty shot, the second in shootouts; the third movie again used the trope by having a scoreless tie all the way to the last seconds of the third period, and the Ducks being content with a tie against the varsity team. Then, a brilliant defensive play allows the Ducks a goal-scoring opportunity—from Goldberg, who had been the goalie in the previous two movies and was still a mostly defensive player.
* The Mighty Ducks trilogy, Hans uses ketchup to act like he's just cut himself on his skate sharpener. Charlie isn't fooled for a moment, possibly because Hans has pulled this stunt before.
* The mighty elk/wapiti. Cute when young, majestic symbol of the North American wilds when an adult.
* The Mighty has Alpha One who wasn't used to fighting others with his power level and just used his power.
* The Mighty Hercules cartoon series purely for the cash plus residuals; nothin' wrong with that!
* The Mighty Hercules was much the same, using Hercules' Roman name in an otherwise Greek(-ish) setting. Of course, they used names oddly in general - for example, Daedalus was used as the name of an evil wizard.
* The Mighty Hercules, who usually ends each episode being dragged off by said hood.
* The Mighty Heroes, from Terrytoons' 1966 TV series, each had a secret identity disclosed at the opening of each story. Strongman was a mechanic, Tornadoman was a meteorologist, Ropeman was a Navy tar, Cuckooman was a pet bird store owner, and Diaperman was a baby.
* The Mighty Heroes" has the reassuring version that follows a beginning that is genuinely frightening for kids of a villain forcibly transforming innocent people into mindless creatures in a dark house. That sequence is immediately followed by the series' title sequence which has blazing bright colours set to a rousing march as powerful superheroes are called to action to stop this horror.
* The Mighty Heroes hits a scarecrow. Not only does it bring it to life, but the charge is powerful enough that the scarecrow gains the ability to bring straw to life. It makes itself haystack henchmen and terrorizes the countryside. The Mighty Heroes can't defeat the straw army at first because they're strong, big, and punches go right through them. The team only barely escapes being mowed down by a combine harvester, but comes back with renewed determination. Strong Man and Tornado Man join forces to create a powerful gust that blows the haystacks apart and the scarecrows' filling away. This ends the lot of them.
* The Mighty Heroes: Nearly every episode has the heroes fight a different villain.
* The Mighty Jingles, himself a former communications officer in the Royal Navy. He tells quite a few war stories, both of his own and from history, and any time that things go pear-shaped, as they often do, he takes a moment to pause and interject with "Join the Army/Navy, they said!" and his signature laugh.
* The Mighty Jingles often says this if he destroys an opponent at the cost of himself, especially if it's by ramming them.
* The Mighty Jingles once referred to his commanding officer from his Royal Navy days by the words "We would have gone anywhere, fought anyone for him."
* The mighty lummox is a lumbering, pinniped-like mountain dweller which, in the wild, grabs boulders with its semi-prehensile tail and throws them at creatures like a living catapult. James tames the beasts and drives them into battle, calling them Flummoxes. But Pyro and Stratos both have territories full of lummoxes, which they have likewise tamed; Pyro calls his version "Bombards", outfitting them with protective armor and a supply of firebombs to throw, whilst Stratos' Flurries allow aeromancers to ride on their backs, who use their magic to create imploding crystal

bombs for them to lob at their foes.
* The Mighty Macs: Based on the story of Immaculata College, a small Catholic college in Pennsylvania that became an early powerhouse in womens' college basketball.
* "The Mighty Megalosauras": When Earl asks B.P. Richfield for a raise, Mr. Richfield snaps at him and orders him to quit. But Earl ends up getting his job back in the end.
* The Mighty Megalosaurus has Earl begin the story of Baby's birth with Earl getting stuck in the doorway of his house on his way to dinner. Fortunately, he manages to free himself.
* The Mighty Mightor episode "Battle of the Mightors". Tor to L'il Roc after he falls off a cliff and lands on a branch.
* The Mighty Mighty Boss Tones home. The lyrics describe him waiting, wondering "Where did you go?" and finally leaving.
* "The Mighty Navy" opens with Popeye enlisting in the navy. After the typical slapstick gags that lead to Popeye
* The Mighty Nein (main characters of campaign 2) has bisexual Caleb Widogast, genderfluid Mollymauk Tealeaf (played by the bisexual
* The Mighty One: This is the powers granted by whomever who learned all five creeds of the Tong Zi sect, coveted by the main villain, who ends up being insanely invulnerable in his final battle. Lets just say getting a sword through his brain doesn't even slow him down...
* The Mighty One title is the Water Knight, proves that he lives up to his name when he chugs a mouthful of wine and spits it into the faces of three mooks, resulting in all three getting their facial skin shredded off. Somehow.
* The Mighty Skull Boy Army, Unit 1, a cute, toy-like robot, once voices his hopes to never be a real boy...because he fears puberty, and all those snips and snails...
* The Mighty Sparrow) to get Sparrow to marry her. Sparrow makes it clear that her abhorrence is due to her poor hygiene:
* The Mighty Tharg, the magazine's alien editor, regularly drops Betelgeusan terms into his editorials, such as 'grexnix' (idiot) and 'squaxx dek Thargo' (friend of Tharg).
* The Mighty Thor (Amora), a goddess of Asgard, who spent years hatching plans to harass and seduce the god of thunder. He eventually relented and had a brief romantic relationship with her. "The Reigning" storyline saw the two wed, and have a son named Magni. But these events were eventually wiped from reality.
* The Mighty Thor (an arc from Jason Aaron's Thor run) has Sindr, the queen of Muspelheim, would-be queen of Hel, gathering the chieftans of Hel and tries to persuade them to join with her. Lady Allmour of the Pleasure Lands refuses, so Sindr kills her immediately.
* The Mighty Thor and Skurge the Executioner both carry blades (a broadsword and battle axe respectively) which are sharp enough to cut reality itself and open portals between realms.
* The Mighty Thor and steel) bridge; Thor drove them off by hurling an I-beam at the head of the Hunt and saying, in effect, "I can kill you with any part of this bridge, now go away!"
* The Mighty Thor and the rest of the Asgardians. Loki and Amora the Enchantress are considered cowards and deviants for using magic, dirty tricks, and deception, as they dislike fighting and only fight as a last resort.
* The Mighty Thor, Asgard has an absolute monarchy. Ditto for Olympus and most of the Earth's other pantheons.
* The Mighty Thor: Asgard is always portrayed as a great landmass floating in extradimensional space.
* The Mighty Thor at Gjallerbru against the army of the dead, he wielded two M-16 assault rifles.
* The Mighty Thor back-up-feature "Tales of Asgard", a version is told of Little Red Riding Red. While the Goddess Idunna is taking her golden apples to the Ruler of the Gods Odin and wearing red, the Wolf Fenris shapeshifts into a human to get

close to her, then attacks her. However Harokin the Hunter uses his magic sword to banish Fenris to the Netherworld. The story lampshades this by saying it was eventually adapted into Little Red Riding Red.
* The Mighty Thor: baggy trousers, boots, bracers, winged helmet-mask and even a superhero cape. However, his upper body is completely naked. The cape has to be strapped to his shoulders.
* The Mighty Thor, both because of her power and the friendship) and then successfully lied to her. She sarcastically congratulated him for the feat later.
* The Mighty Thor butcher, even someone as heroic as Thor. It's one of the most powerful and evil weapons in the Marvel Universe.
* The Mighty Thor by helping defeat a monster that shrugged off Thor's strongest attacks.
* The Mighty Thor (by knocking out Thor), and Skurge asks Balder to remember him with a toast when he and Thor return to Asgard. Later, when Thor and Skurge meet in Hel, Skurge asks if he and Balder had that drink, and Thor is grieved to have to tell him that crises have kept them too busy to do so. They later do.
* The Mighty Thor can create "dimension disruptions" with Mjölnir to protect himself or his allies.
* The Mighty Thor can even pick up Thor's hammer. The issue in question does not, in fact, exist.
* The Mighty Thor, capturing the warp-gate assembled by the Fire Demons at New York City became crucial for Asgardian and Earth forces in stopping the invasion of the Fire Demons, as it allows them to reach the Sahara Desert, where an even BIGGER warp-gate linking directly to Muspelheim is located and allows the endless Fire Demon hordes to pour forth.
* The Mighty Thor encountered an all-you-can-eat buffet. He declared that it made a decent snack after cleaning it out as the staff looked on in horror.
* The Mighty Thor ended with Erik Masterson dying to stop Seth and the Bloodaxe.
* The Mighty Thor features the first modern encounter of Thor and Lady Sif. He is surprised because he remembers her as a child who he used to dangle upon his knees, and he now sees her as a stunning beauty. He concludes that: "By my mallet-thou art child no longer!" This was also Thor's reaction to meeting the grown-up Lorelei, Amora's younger sister, who is in the process of using magic to seduce and rape him. The last time Thor saw her she was still a child.
* The Mighty Thor fell in love with human Jane Foster, but his father shipped him with his fellow Asgardian Sif.
* The Mighty Thor foe the Grey Gargoyle. Turned to a substance resembling stone, victims would usually return to normal after a certain amount of time. However, he discovered a way to arrest the process. He then established an identity for himself as a sculptor and began selling his victims as statues.
* The Mighty Thor from Marvel Comics could count as this as well. Half of his face was badly scarred by a wizard he killed, who managed to strike back before dying.
* The Mighty Thor, fulfilling his last request that they "laugh Skurge's last laugh together."
* The Mighty Thor has an enemy from the future named Zarrko the Tomorrow Man though he's nowhere near the level of Kang.
* The Mighty Thor. He loses his worthiness to wield Mjölnir and becomes way more cynical and melancholic. He admits that he's come to believe that Gorr was right about the gods, and that they don't deserve the praise and worship mortals heap on them. Far into the future, he has this even worse. He becomes the All-Father and lord of Asgard and inherits the Odin-Force (which he renames the "Thor-Force"), but his brother permanently turning to evil, the death of all life on Earth at Loki's hands, and Gorr's slaughter and enslavement of his people has reduced him to a near shell of himself who can barely muster the will to fight anymore. Thankfully, both the past and future versions of Thor eventually get better, though they still carry much baggage regarding their past failings and self-worth.
* The Mighty Thor hero Jack Frost was retconned into being an undersized Frost Giant as well.

* The Mighty Thor, he's definitely changed and isn't planning to betray someone or everyone.
* The Mighty Thor: In his own words after Heimdall gave him the play by play run down of how the last incursion was playing out between earths during "Time Runs Out". Odin nonchalantly coins how "Midgard is — as ever — a roiling sea of chaos and madness". Often true given the Marvel Earth's penchant for Armageddon causing/defying events which leaves the planet a wasteland then does a hard reset that usually has (often negative) after effects on the universe as a whole.
* The Mighty Thor involving someone attempting to trigger Ragnarök, it was established that Ragnarök is a cycle that has occurred multiple times in Asgard's past.
* The Mighty Thor, is a city that encompasses another plane of existence.
* The Mighty Thor is introduced as a spin-off taking over Thor's numbering and Thor gets another series.
* The Mighty Thor is on a team of Avengers, you can count on these kinds of moments frequently.
* The Mighty Thor is repeatedly stated to be "Asgard's Greatest Warrior," and this may extend to the rest of the Marvel Universe, as well. He's been in more battles than most mortals have ever even heard of.
* The Mighty Thor is so fast, he catches artillery shells in mid flight, swings his hammer at twice the speed of light, and is described as "faster than the lightning he commands." In flight, he has exceeded three times the speed of light.
* The Mighty Thor - it was actually a fairly common thing in the early days of the comic for especially nasty villains to be declared/declare themselves 'The enemy of all who live!' (exclamation point mandatory).
* The Mighty Thor: Loki does this to an Asgardian named Theoric, then subsequently disguises himself as him so that he can marry his fiancee Sigyn.
* The Mighty Thor Loki who is far less malevolent and more just an omnipotent trickster. He even admits defeat after Captain America humiliated him and televised it to the the entire state of New York, impressed and amused that a mortal managed to pull off such an elaborate trick against the god of mischief.
* The Mighty Thor lose his powers... until he quests through Central Park for tiny Mjolnir and becomes Throg.
* The Mighty Thor) made sure to point out that Loki turning evil again IS NOT a foregone conclusion, since Thor destroyed the Ragnarok cycle which contained the Norn's prophecies that decreed the destinies of the Asgardians. Of course, the whole "Loki gets turned into a kid with only his childhood memories" helps. He's in the Antihero area.
* The Mighty Thor might as well be the poster boy for this, developing into a love for Earth that transcends millennia, to the point that even as a very old man, he's willing to fight Galactus for the sake of Earth, despite the fact that it's dead and deserted, because he still loves it and because he loved humanity. Asgardians in general classically tend to be, at the very least, curious about humanity, and while some regard humans as being lesser, most of them have a definite respect for humanity's courage and perseverance and a strange fascination with our numerous foibles.
* The Mighty Thor, Odinson himself is a surprisingly good chef as he whips up steaks, hamburgers, veggie burgers, hot dogs, and dozen pies for the Avengers and other heroes. Given Thor is thousands of years old, it’s not too surprising he’d pick up a few unconventional skills.
* The Mighty Thor. Of course, he is horrendously ugly by fire demon standards which makes him extremely handsome by human (or Asgardian) standards, but the Flame refuses to believe this.
* The Mighty Thor of their own, including two boys from Earth that they adopted. (When those two first met him, they mistook him for Santa Claus.)
* The Mighty Thor. Oh, and he got his face scratched up by poisoned claws not too long after, leaving him in constant pain. He grew out his beard to hide the scars.
* The Mighty Thor: Played with when Thor threatens to do this to Loki — he hurls away his hammer, then grabs Loki by the neck, and reminds him that NOTHING

can prevent his hammer from returning to his hand. Oh, and would he be so kind as to remove the curse he placed before the hammer returns? Gee, look, it's starting to arc back already...
* The Mighty Thor's attacks by making himself super-dense. He changes his mind after getting punched across the room.
* The Mighty Thor severely ticked off Hela (Norse goddess of the dead) one time, she cursed Thor to be undying, but to have extremely brittle bones, leaving him in constant pain and held together by an improvised suit of armor and splints. (Obviously, he got better.)
* The Mighty Thor shows up nine times out of ten as muscle for the main bad guy of the story.
* The Mighty Thor: Sif is introduced fighting a monster. Thor is instantly smitten. He outright states her strength and bravery are the reasons why.
* The Mighty Thor: Skurge the Executioner banishes Jane Foster to another dimension and tells Thor he'll only release her if he surrenders his hammer and promises to never try to take it back. Thor surrenders the hammer and Skurge keeps his word and releases Jane. A few moments later, Amora the Enchantress, who was angry because she wanted Jane to be trapped forever, starts turning Skurge into a tree. Skurge begs Thor to save him and releases him from his promise so that he can pick the hammer up and stop Amora.
* The Mighty Thor spent some time in a female body (eventually revealed to be that of the goddess Sif); he eventually returned to his usual body.
* The Mighty Thor's story, Dr. Donald Blake was visiting Norway when the arrival of the Stone Men of Saturn drives him to hide in a cave, where he finds a wooden stick which transforms into Thor's magic hammer, Mjölnir... and the rest is history.
* The Mighty Thor taking place in Asgard will inevitably turn into one of these, not that he is safe from the trope anywhere else either.
* The Mighty Thor: The mortal Bill Cobb is dating the goddess Kelda and so is allowed to live in Asgard. At one point, Bill decides to teach the Asgardians how to play basketball. When he tells them about the scoring system, the Asgardians are completely unable to understand what points are no matter how much he tries to explain.
* The Mighty Thor. There's a lot of Loki going around.) Thank goodness no more than one hammy Loki has ever been on page at a time, or there might be a hamgularity.
* The Mighty Thor) The spell is only broken after Thor confronts Loki.
* The Mighty Thor. They are extremely long-lived interdimensional beings who have technology so advanced that it looks like magic to humans. Also actual magic in some cases. They were confused with gods and worshipped by ancient Scandinavians.
* The Mighty Thor: Thor actually does this during Dan Jurgens' run, when he's masquerading as Jake Olson, showing that he retains the medical knowledge of Doctor Donald Blake.
* The Mighty Thor: Thor can drink booze for fun, and to relax, but Asgardian constitution being what it is, much like Logan it would taken an astounding amount to get him properly drunk. The same with all Asgardians.
* The Mighty Thor: Thor himself was brought down to mere mortal status for a while, and lost all of his fabled strength and power. Turns out that a 6 foot 5 tree trunk of a man with a big nigh-indestructible hammer is still someone you might want to avoid; he just went and beat the snot out of street-level villains for a while.
* The Mighty Thor, Thor saves the life of a Christian priest and assures him that although he (Thor) is real, so is a god superior to Thor whom the Thunder God explicitly identifies as the Christian God. (It's never made clear which sect the priest is, nor is the question of Jesus addressed.)
* The Mighty Thor, "Thor the Mighty". Thor manages to hit three of the Wrecking Crew's four members by throwing his hammer. Then, he magically summons it to fly in the opposite direction, pummeling the fourth.
* The Mighty Thor towards Loki starting in the books centering on him.
* The Mighty Thor treatment as the Ultimates, here, Thor came to Earth to help it.
* The Mighty Thor. Up to thinking that one of the worst things about the afterlife is that it limits access to new episodes.

* The Mighty Thor wasn't, but Odin temporarily removed the enchantment so he could use it.
* The Mighty Thor, wears an eyepatch to cover the socket that used to hold the eye that was cast into the Well of Mimir in exchange for wisdom.
* The Mighty Thor when the jerk chose to remake themself rather than turning evil evil again (to thirty something).
* The Mighty Thor when they tried to shoot innocents in front of the God of Thunder.
* The Mighty Thor which had Sif as its main character. The writer, Kathryn Immonen, explored Sif's personality and embarked her on various badass (and mostly Thor-unrelated) adventures. Sadly, the series was then cancelled due to low sales.
* The Mighty Thor: While it's not usually his motive, in his first outing the Absorbing Man pondered what to do with his new superpowers, and figured if he got bored he could take over some small country. After a few seconds he bumps this up to maybe taking over THE WORLD.
* The Mighty Thor, who is working with them unwillingly and wants to know what they say when he's not around.
* The Mighty Thor would also shift human-mortal and Asgardian identities.
* The "Mighty" Tuma: In the stories leading up to the movie, as well as in the novelization, he's a ruthless and savvy overlord who came close to conquering the planet, and was only defeated because his size made him a slow fighter in close-combat. In the movie, he's a bumbling, full-of-himself brute who considers pushing over a much smaller opponent a deed worthy of celebration. He is defeated by the hero battering a wound on his back, which
* The Mighty was once a normal sailor who had ended up floating in irritated waters for hours after testing an atom bomb. It took place in 1952.
* The Mi-Go are vaguely insectile and winged, although in their introductory story "
* The Migration Period, such as the Goths, Franks, Angles, Saxons and Normans.
* The Migration: The mass migration of large populations of people to other lands.
* The Mii Fighters are technically this, being the first playable fighters to bear the
* The Miis have to escape a particularly ghost-crowded haunted house in
* The Mikado (and Ko-Ko, depending on how "There Is Beauty In The Bellow of the Blast" is played).
* The Mikado, at the height of the Anglo-Japanese Alliance, a member of the Imperial Family visited London, hoping to see the play for himself, only to find that every production had been closed for fear of offending him! Today, the play remains very popular in Japan.
* The Mikado: "A Wand'ring Minstrel I" (Nanki-Poo), "Behold The Lord High Executioner" (Ko-Ko), "Three Little Maids From School Are We" (Yum-Yum, Pitti-Sing, Peep-Bo), "A More Humane Mikado Never Did In Japan Exist"
* The Mikado derives considerable merriment from the subject of execution by beheading.
* The Mikado describes the functions of the Lord High Executioner in loving detail. However, Ko-Ko never in fact performs an execution, a fact which gets him and his town in trouble with the Mikado.
* The Mikado does this with all manner of bloodthirstiness, despite being a light romantic comedy, including, for example, a song ("The Criminal Cried as He Dropped Him Down") in which the chorus goes:
* The Mikado) finally agrees to marry Ko-Ko (Yum-Yum's ditto), leaving Nanki-Poo and Yum-Yum free to marry each other.
* The Mikado, has never killed anyone, although he's thinking of starting on small animals soon in order to acclimate himself to the unpleasant nature of his duties.
* The Mikado has the refrain "There are lots of good fish in the sea." This is frequently misquoted as "plenty of fish in the sea".
* The Mikado himself one-ups this by listing crimes along with their "fitting" punishments.
* The Mikado if Ko-Ko marries Yum-Yum, which gives Ko-Ko an idea of fulfilling his

duties as the Lord High Executioner by executing someone who has already made his mind up to die.
* The Mikado includes a rollicking sea shanty about how landlubbers love sailing...and sailors love being inland cuddling girlfriends.
* The Mikado in dereliction of his duty. Ko-Ko solves the problem thusly:
* The Mikado is Lord High Executioner, as well as, presumably, judge and jury. Pish-Tush is... noble something-or-other. Pooh-Bah is Lord High Everything Else. Subverted, as Ko-Ko is a bit squeamish about executing people, leading him to sentence people less often (as opposed to most of the other trigger-happy juries on the rest of the page). And also because Ko-Ko is himself under a sentence of death for... flirting.
* The Mikado is satire at its finest, using a patently absurd version of Japan to mock both general British culture and a faddish obsession with Japan that was sweeping through the country at the time.
* The Mikado, Ko-Ko the Lord High Executioner explains why he refuses to be his own victim: "In the first place, self-decapitation is an extremely difficult, not to say dangerous, thing to attempt; and, in the second, it's suicide, and suicide is a capital offence."
* The Mikado. Many productions have Nanki-Poo and Yum-Yum punctuate "This, oh, this, is what I'll/he'll never do" with kisses. Pooh-Bah also has this line in "So Pardon Us": "To our prerogative we cling, So pardon us, So pardon us, If we decline to dance and sing, Tra la la la la la..." while dancing and singing.
* The Mikado mentions "Bother it" as an acceptably mild form of cursing, in contrast to the "big, big D" which he does later use explicitly.)
* The Mikado, Nanki-Poo and Yum-Yum are in love, but cannot kiss because Yum-Yum is engaged to Ko-Ko. Instead, they sing "Were you not to Ko-Ko plighted", in which they demonstrate, physically, precisely what it is they won't do.
* The Mikado one is "the white kid with the baggy clothes who's talking like he's black", which shows one of these dancing to hip hop in"gangsta" clothing, while a normally dressed white and black kid watch him in contempt.
* The Mikado or not make sense to modern audiences, the lyrics in modern productions tend to be changed to more topical or understandable examples.
* The Mikado: Pooh-Bah "can trace [his] ancestry back to a protoplasmal primordial atomic globule."
* The Mikado reference politics and figures tangential to the play; in some performances, especially in regional theater, these are adapted to contemporary or local references.
* The Mikado's premiere was the site of a "Japanese village" exhibit. Newer productions generally substitute some local neighborhood for the reference.
* The Mikado, the emperor has decreed flirting is punishable by death. As of the beginning of the opera, the authorities have been getting around this by appointing Ko-Ko, a condemned man, to the office of executioner. Since he is the next man scheduled to die, no one else can be executed for flirting until he is, and since he's not planning on executing himself, there have been no executions.
* The Mikado. The "Lord High Executioner", Ko-Ko, charmed his way into the position, and since no one's been sentenced to death so far, he's essentially just a figurehead. However, when the time comes for him to make his first kill, Ko-Ko protests, "Why, I never even killed a blue-bottle!"
* The Mikado: The officials of the town assure the Mikado that a man has been executed, which is somewhat more than the truth. (Fortunately, for all concerned.) As one later explains:
* The Mikado: The romantic lead Yum-yum and Nanki-poo, and the plot obstacles Katisha and Ko-ko. But typical amateur productions also pair up most or all of the other leads, and the entire men's chorus of Gentlemen of Japan with the women's chorus of Schoolgirls, for the closing number.
* The Mikado, the roster of "...society offenders who might well be underground, and who never would be missed" in Ko-ko's "little list" song includes "... the idiot who praises, with enthusiastic tone,/All centuries but this and every country but his own."

* The Mikado, though, since he seemed to regard elderly spinsters as inherently funny.
* The Mikado was full of this when it was written in 1885, being a satire of then-current British nobility, British politics, and British etiquette. Unless the directer is a particular stickler for tradition, most modern productions will throw in plenty of current pop culture references, as well.
* The Mike And Thomas Show. It consists of the two titular hosts basically just messing about in the guise of a gameshow. And two grand pianos.
* The Mike Douglas Show. The other guys all said no, so Gene sucked it up and did it. It led to a hilarious moment when comedienne Totie Fields saw through his Demon makeup and said he was "probably some nice Jewish boy from Long Island".
* The "Mike" (microphone) copy ability, which has Kirby attack enemies with loud sounds and clear them all off the screen. Its animations varies from game to game, and on which of the three times you can do it.
* The Miko's Words and the Witch's Incantations: The goddess uses Isuzu's lap as a pillow on the very last page.
* The Milagro Beanfield War everybody in the town of Milagro, New Mexico, is on a party-line (successive mayors get elected on the campaign promise 'No More Party Lines'). The radical faction is alerted to the presence of a state agent going to a meeting of the conservative faction by overhearing it on the telephones.
* The Milagro Beanfield War, Joe remarks about how he and his family are "tired of eating stewed tennis shoes instead of meat".
* The Milagro Man (homonym for Miracle Man) and his stand of the same name from
* The Milestone Tree: The 69th milestone is marked as "69th milestone lol" in the tab.
* The Miley And Mandy Show, she nicknamed herself and her dancer friend/co-host Mandy Jiroux "Milez" and "Manderz" in many episodes.
* The militaristic Craftworld Biel-Tan still tries to reconquer the galaxy for the Eldar race. The Dark Eldar is building up their own empire and sees itself as the remnant of the original Eldar empire.
* The military academy needs you to go through the mandatory training first.
* The Military Auxiliary Radio System, an all-volunteer group of amateur radio operators.
* The military base portrayed in the comic seems to show the severity quite heavily. The base appears severely understaffed, with only a handful of soldiers where there should be hundreds. The base is also extremely insecure, with one soldier getting infected and nearly killing some guards, and a Witch somehow wandering right on in. To make matters worse, it's dangerously low on supplies, and one of the officers is leading a mutiny against the base's commander. The base also appears completely isolated from the rest of the military (if it's still even around). The base is ultimately destroyed by a massive zombie mob attack, and
* The military branch of the RDA (Resources Development Administration) in
* The military commanders Erwin Smith and Dot Pixis are well aware their actions make them
* The military commanders of Yunkai appear to be this universally, so used to fighting mock battles and paying real enemies to go away that they have no idea how to conduct a campaign. They dress their soldiers in ridiculous, impractical armor, and are nearly routed by untrained child-eunuch slaves led by a
* the military decides to do this to the Ceph Lithoship floating above Central Park. Even though it didn't work last time, to the same aliens that are attacking this time. And even though the blast would destroy much of the New York City area, rendering it uninhabitable for years even if it did
* The military doesn't have even a rough order-of-magnitude estimate of the number of zombies they're actually facing. This despite having every form of aerial and satellite recon potentially available and facing, well, zombies, who don't actually hide or have the ability to attack anything outside of arms' reach — especially not anything flying.
* The military entrenching tool has a long and proud history as a close quarters weapon. Several WWI and WWII-issue models were designed with edges that could be

sharpened, producing a crude axe with better reach than a knife but more close-quarters utility than a fixed bayonet.
* The military, especially aviation. During the World Wars, pilots were almost invariably in their early twenties at most. There are mandatory retirement ages, and if an officer hasn't been promoted to a given rank by a given age, he never will be.
* The military guys use Instant Sedation darts on the students when they
* The military had long since abandoned the issue of sending letters to inform families of their dead loved ones. Appropriately, to avoid exactly the sort of situation Nathan finds himself in one episode.
* The military has various names for situations like this; "friendly fire" and "blue on blue" are some of the most common.
* The military is highly undisciplined. Hikaru and other pilots regularly talk back to their superior officers, even going so far as to insult them after being given simple orders. In addition, Roy Focker openly carries on a romantic relationship with a superior officer throughout the series. Hikaru especially commits all sorts of insubordination, including deserting his post to watch a beauty contest. No one is ever reprimanded for this behavior. Considering that they are in a crisis (aka first contact with aliens and a Space War), they probably let these things slide as they are minor compared to the bigger problems (aka giant hostile aliens), especially since humanity is desperate for manpower as is.
* The Military Liaison Missions were established as a temporary measure to maintain relationships between the occupying powers during the demilitarization of post-World War II Germany, and were kept going throughout the Cold War because both sides found them useful for gathering ground intelligence by snooping around military bases. They found the best time to do so was at dawn because the sentries, having spent all night on duty, would be looking forward to getting some sleep, and so would avoid anything that delayed that. On one occasion a British officer peeked over the fence of an East German barracks and found a sentry staring directly at him...only for the sentry to
* The military of Greengraft starts having problems with warp mutation after
* The military of the United Kingdom of Great Britain and Northern Ireland does not allow women to serve in combat infantry positions...except for one particular regiment. The Special Reconnaissance Regiment, an elite intelligence-gathering unit of the British military is the only "teeth" regiment in the entire military with female combat soldiers.
* The Military Police Brigade are infamously corrupt, but turn out to have a special Branch that operates out of the Capitol. This branch is the
* The Military Policeman and the Dismembered Beauty' lines supposedly came from a character that was being raped. However, this character was engaging in consensual sex, and she said nothing except making a squawking sound when her killer strangled her.
* The military saving the day? All attempts of the army to control the plague ended in colossal failure.
* The military service academies in the United States require boxing as part of their curriculum, and most of them conduct intra- and inter-school boxing competitions.
* The military tends to get like this sometimes, having its own distinct culture which can be quite baffling to outsiders (expect
* The Milizia worked closely with the OVRA (Organizzazione per la Vigilanza e la Repressione dell'Antifascismo, 'Organization for Vigilance and Repression of Anti-Fascism'), a proper and frightenly efficient political police absorbed in the proper state police after the war. Or not: there is no actual evidence than the OVRA actually existed as anything more than a way to scare opponents into submission and bait attention away from the real police (that would do all the work) with a backronym that Mussolini (a former journalist) would have chosen purely because
* The milk from British frozen-food supermarket chain Iceland does have a missing person bit on the cartons. People of all ages too, predominantly teenagers or

people in their 20s.
* The Milkman has a body that's entirely made up of milk, making it virtually impossible to harm him. When he gets shot at, his abdomen simply splits to allow the ammunition to pass through and when Penn punches him, his arm ends up going right through his torso.
* The Milkman Murders housewife with an absolutely dreadful family (abusive drug-addict husband, promiscuous and contemptful daughter sleeping with all her teachers, son who likes to skin small animals) encounters a sinister milk man apparently making a delivery to her home ... whereupon he proceeds to rape her. It leads her to descend into psychotic madness as a result.
* The milk-swirling-into-coffee images were similarly mocked up, usually with white paint and treacle (or Marmite in the UK). There was at least one photographer's studio in the UK in the 1980s dedicated to this kind of phototrickery.
* The "milk" they use is actually white paint with a little bit of turpentine mixed in. Apparently, it looks thicker and more real than actual milk. Real milk under studio lighting looks transparent and bluish, and less attractive than the PVA glue or white paint that usually stands in for it. (Milk also curdles quickly under hot film lights.)
* The Milkweed Triptych an intelligence agent, but a British one and therefore familiar with London, he's able to escape their surveillance.
* The Milky Way). In fact Burleigh didn't punch Speed and has no boxing talent, but Speed's weaselly manager Gabby Sloan comes up with the idea to make Burleigh into a fake contender by arranging a series of bouts with palookas who will take dives. Then Burleigh will fight Speed, who will get an easy victory. (Unsurprisingly, the plan goes wrong.)
* The Milky Way scheme in which Burleigh will be built up as a contender so Speed can get an easy knockout.
* The Milky Way song is just dripping with this trope. Listen to it for yourself
* The Milky Way, the blooming romance between Burleigh and Polly is demonstrated when they end a conversation by saying "You're an awfully nice person" to each other in unison.
* The Milky Way, three party balloons take three kittens into space. Justified by the ending, which reveals that the kittens were just pretending.
* The Millennial Project recommends doing this with algae of all things in order to properly feed the denizens of space habitats, algae being quite easy to grow hydroponically and some species containing complete proteins.
* The Millennium Age of Animation: Covers Animation History from the early 2000s to onwards.
* The Millennium Bug. Most of the movie detailing a family surviving the former, until the title beast awakens.
* The "Millennium" era (1999-2004) went a little back and forth for its entire run, as all but one of the films was a reboot taking place in its own continuity. It does contain arguably the most serious
* The Millennium Falcon doesn't look like a whole lot, but due to both Han's piloting skills and the special modifications made by its previous owner Lando Calrissian and continued by Han and Chewie, it is considered the fastest ship in the galaxy. It's also
* The Millennium Girl in Classic Mode, though, and you can have a Ronin tear up enemies with that ultimate katana.
* The Millennium items around which the series is based are also dangerous. The Millenium Ring from the original series is the most notable example. While all of the Items (especially the Eye and the Rod) can be used for negative purposes (and tend to turn their owners into megalomaniacs or drive them insane), the Ring is the absolute worst, possessing the innocent Ryou Bakura and using him to trigger a plot that
* The Millennium Trilogy after realizing that she's actually fallen for Mikael Blomkvist.
* The Millennium Trilogy also follows this format. The plot of book 1 is "find out

what happened to Harriet Vanger" while book 2 and 3 are concerned with "find out what happened to Lisbet Salander and punish those responsible".
* The Millennium Trilogy and its counterpart movies show very clearly that although killing hundreds of people in horrible and torturous ways is horrific, raping and violating them beforehand will cement the serial killer in monster territory like nothing else on the face of the earth. A good yard stick is asking the question "do you think Lisbeth was doing the right thing when she killed those men?" Hands up everyone who answered "yes"?
* The Millennium Trilogy Blomkvist's other relationships are left ambiguous as well—while he admits to Erika Berger that he thinks he's in love with Monica Figuerola, he can't say for certain that it's serious. And while he and Erika are temporarily halting the sexual part of their relationship, as they typically do whenever he's seeing someone, there's really nothing to say that it won't resume again.
* The Millennium Trilogy books, with the Zalachenko half-siblings. Super-hacker Lisbeth is less than five feet tall and skinny even for her size. Her half-brother is a towering, ridiculously muscled bruiser.
* The Millennium Trilogy, but among the overarching theme of men abusing women, it's difficult not to see the author's more positive portrayal of women.
* The Millennium Trilogy, counselor Bjurman rapes Lisbeth. Lisbeth secretly videotaped the event, and sets the video to be spread to authorities, if Lisbeth dies or gets captured.
* The Millennium Trilogy, explaining the backstory of Erika Berger and Mikael Blomkvist's relationship, which has continued even though she's married. After Berger's husband discovered her affair with Blomkvist, he came to the latter man's home to confront him. The two men spent the evening drinking at several bars before Berger's husband officially gave the two permission to continue their relationship out in the open.
* The Millennium Trilogy Faste offers a unscrupulous journalist inside information into the investigation of Dag and Mia's murder in exchange for the journalist making insinuations about rival Detective Modig.
* The Millennium Trilogy. He and Lisbeth Salander are developed quite a bit as separate characters, but once they team up the plot centers around them both.
* The Millennium Trilogy: He's a middle-aged journalist and chick magnet. She's a twentysomething bisexual ass-kicking computer genius who may have Asperger's syndrome. They Fight Crime!
* The Millennium Trilogy is able to deal out a lot of pain, being able to break normal people's necks like sticks. Coupled with the fact that he is unable to feel pain due to a neuralgic defect, it makes him nearly unstoppable.
* The Millennium Trilogy is freakishly strong and literally feels no pain, but he's a really terrible boxer. He never learned to fight properly because he didn't care about getting hit. Then again, given how strong he is and that he doesn't feel pain, it doesn't really matter.
* The Millennium Trilogy is freakishly strong, to the point that every blow seems to shatter bones. However, he's a terrible boxer and telegraphs his lumbering punches.
* The Millennium Trilogy is more of a Violently Protective Sexbuddy, but all the same, do not harm Mikael Blomkvist when she's nearby.
* The Millennium Trilogy is taken up with the minutiae of Blomkvist and Salander's da-to-day lives and sketches of comparatively minor characters. Perhaps the best example of this comes in the third book, where we get a detailed history of a hospital orderly whose only role in the entire series is that Blomkvist bribes him to sneak a PDA into Salander's hospital room.
* The Millennium Trilogy, Lisbeth investigates Michael on behalf of Mr Vanger, as Michael is indicted for libel. As his previous record proves to be clean, Vanger decides to hire him as a detective.
* The Millennium Trilogy, Lisbeth tells only cryptic clues to Mikael while he is trying to investigate the murders she is accused of and clear her name.
* The Millennium Trilogy, Lizbeth Salander first becomes aware of Mikael

Blomkvist's existence when she's hired to do a background on him, which she completes by hacking his computer to find out if he has any secrets. When Blomkvist becomes aware of her actions, he decides to retaliate by barging in on her apartment unexpected (for added awkwardness, in the movie, he manages to catch Salander in bed with a girlfriend.) Surprisingly, this does not stop them from developing a rapport, which leads to him enlisting her aid in finding out what happened to Harriet Vanger. Later, she decides to make their relationship sexual.
* The Millennium Trilogy. Many of the minor characters have names and descriptions, and even some background. At one point in the third book, Larsson devotes two pages to profiling a hospital orderly whose only role in the plot is that Blomkvist bribes him to smuggle in a cellphone for Salander.
* The Millennium Trilogy Mikael Blomkvist does this to Lisbeth Salander after he discovers that she was spying on him.
* The Millennium Trilogy, Mimmy was not Lizbeth's first female sexual partner (she had previously experimented during her time with the Evil Fingers), but Mimmy was the point at which Lizbeth realized that her encounters with women were part of her sexuality.
* The Millennium Trilogy steals hundreds of millions of dollars by very clever use of computer hacking and disguise, and gets the reader's sympathy for her cleverness. Anyway, the original owner was a nasty villain who got the money in very nasty ways and who clearly "deserved it". Moreover, Salander had had a hard life and when she became a multi-millionaire, does not use the stolen money extravagantly — just enough to enjoy life a bit, in between very harsh and dangerous adventures.
* The Millennium Trilogy. The greatest example is when at the end of Dragon Tattoo, Blomkvist decides not to publish anything about what he uncovered about the Vanger family.
* The Millennium Trilogy: The tall, muscular, and pretty Monica Figuerola is described as this by the author and Blomkvist.
* The Millennium Trilogy was published, he was only able to write three books for his planned decalogy. But in 2015, the publisher decided to hire author David Lagercrantz to write more books in the series, which will be entirely his own invention without any inspiration from Larsson's plans.
* The Millennium Trilogy, was released in 2015, and received mixed reviews.
* The Miller Lite beer commercials have a guy enjoying time with his girlfriend; he mentions it's been 30 days and he thinks he's found something special. Just when we think he's talking about his girlfriend, he opens up his refrigerator and reveals the Miller Lite home draft. He even moves her out of the way. (This is a parody of the E-Harmony dating service commercials.)
* The Millers because it's made up of collages of old photos of the cast that zoom out to become Miller family portraits. Freeze-framing the sequence reveals some real-life embarrassing old photos from the cast's past.
* "The Miller's Daughter" showed how Cora became who she was. When she was a young woman,
* The Millers ends with Nathan's father Tom, sister Debbie, and brother-in-law Adam wondering if people saw his just-finished newscast:
* The Millers, Nathan, during a particularly awkward dinner with his mother, sister and brother-in-law, gets and says:
* "The Miller's Tale" ensues. He then comes back with a red-hot iron, asks for another kiss, and shoves the iron "amidde the ers" of Alison's lover.
* The Millionaire Detective - Balance: UNLIMITED), the Anime is a completely original story.
* The millionaire turns out to have faked his death to commit the other murder.
* The Million Dollar Homepage. It's inspired hundreds of different sites, and all have fallen short of its glory.
* The Million Dollar Wedge is hated by some fans, either for the $1,000,000 being way too hard to win and being too gimmicky, replacing the former $100,000 prize, or because of how some casual viewers of the show think the wedge is
* The Million Pound Drop which, unlike the original, does not have rollover

contestants, is not aired live, and is edited down to one hour. So if it's 3 minutes to the hour and it's not the final question of the game, you know the team's going to crash out on the next question.
* The Million Pound Note, a child waves at Henry while he's at an auction. He waves back. The auctioneer thinks he's bidding, and he ends up buying a vase he doesn't have the money to pay for.
* The Mill on the Floss: A flood is used to provide a dramatic climax to the novel, in which Tom and Maggie use a boat to save Lucy Deane and her family from the rising waters.
* The Mill on the Floss Maggie Tulliver refuses to marry Stephen Guest even though they are mutually in love and he has ruined her reputation by spending the night with her (no sex!), because he is already engaged to her cousin who loves him deeply.
* The Mill on the Floss: Tom Tulliver, unhappy at Mr Stelling's school, adds to his prayer the following: "And please to make me always remember my Latin." He pauses a little to consider how he should pray about Euclid and geometry, and then adds: "And make Mr Stelling say I sha'n't do Euclid any more. Amen."
* The Millstone: A character whose sheer stupidity is detrimental to everyone around them.
* The Millstone. It was built to be in every way larger and most impressive then all other castles. Its kitchens are said to be as large as Winterfell's great hall, and its great hall large enough to entertain an army. Its justified as the ruins were originally a massive fortress city for the Harren the Black to lord the Riverlands in, and can sustain a large army for years.
* The Millstone: The cause of most, if not all, of a group's failures.
* The Millstone: The plan would go along smoothly if only the team didn't still have this idiot hanging around with them.
* The Milton Berle Show was for someone to holler "MAKEUP!", resulting in someone running on stage and smacking the victim in the face with a big, soft, loaded powder puff. Copied by many others.
* The Milton Keynes Winter Wonderland alone is a sight to behold. The "wonderland" was more of a mud pit with tents made of white tarp here and there, and "Santa" was a skinny man with a very fake looking beard and his clothes visible under his suit. The "ice rink", which, like everything else on site was a paid attraction, was made of plastic and had no ice. Advertised reindeer and Christmas lights were nowhere to be found, and only two huskies were on site, both in a cage far too small and howling. It was referred to as "Winter Blunderland" by many newspapers, and got shut down just a DAY after it opened for the first time, with the attendees refunded.
* The Milton the Monster Show) was Hiram Fly in normal life. His voice was weak and wispy; it becomes strong and assertive as Fearless Fly.
* The Milwaukee station claimed that Nintendo DS made children easy targets for child predators, in the very unlikely chance that the predator would use his own DS to communicate with the child over Wi-Fi using Pictochat. Aside from the fact that it's far more likely to be in a game playing session than Pictochat, the Wi-Fi reception does not have a long range.
* The Mimbrate knights are a truly fearsome force if you can just get them to stop dueling
* The mimic octopus doesn't gain "powers" per-say, but it can use it's transforming ability to scare off or discourage certain predators and it can change color to camouflage it self.
* The Minami sisters' cousin Takeru gets this treatment, as well, in the fourth season.
* The Minbari and Centauri ships tend in general to be rather luxurious, with the latter also being heavy on the
* The Minbari and the Narn, on the other hand, play this to the hilt.
* The Minbari are noted to engage in a very limited version with the races under their Protectorate, mostly allowing them to develop at their own pace and giving only limited pointers while keeping them from potentially destroying themselves.

* The Minbari are this to the rest of the known races of the Galaxy. The Centauri prove to be almost a match for the Minbari technologically, but have chosen a
* The Minbari army is the most technologically advanced and is well equipped, but lacks Heavy Infantry and their artillery (gun only) is poor in numbers and equipped with
* The Minbari, Centauri, Narn and Shadow Cruiser-types explicitly support fighter craft, making them examples of
* The Minbari, finally, are again the Warriors for the same reasons detailed above. Given their technological superiority they could have forced an end to the war at any time but refused to take part, limiting their involvement to threats of utter devastation if the Centauri or the Orieni violated their neutrality (both nations wisely accepted their conditions, with the Centauri reining in anyone stupid enough to even
* The Minbari Grey Council learned of the reawakening of the Shadows long before all the other younger races. Instead of warning them, they prepared against the Shadows in secret (albeit with the assistance of the Vorlons, who were also only too well aware). After G’Kar made his expedition to Z’ha’Dum he also learned that the “Ancient Enemy” that devastated his homeworld a millennia ago had returned, and tried to warn the other races. The Grey Council (of which Delenn was a member at the time) chose not to verify his story, so ultimately
* The Minbari have three castes: Religious, Soldier, and Worker, which each have three representatives on the Minbari ruling council. The Religious and Warrior castes constantly fight each other for dominance while the workers
* The Minbari — fewer are born with each generation and the greatest of their souls are no longer found among them, for
* The Minbari nearly count as a straight example, but that's because outside of the Religious Caste, we know nothing about Minbari culture. However, most of the Minbari we got to know were either Religious or Warrior Caste, so the largely unseen Worker Caste may have their own separate cultural roots. Also, Minbari humor (not specifically Religious caste humor) is said to be based around failure to attain spiritual enlightenment (and puns). It's worth pointing out that because of the long-standing tension between the Warrior and Religious Castes, the Warrior Caste probably doesn't take things like myth and prophecy too seriously, and several episodes indicate they have a more secular outlook, though still obviously influenced by the few shared Minbari values (collectivism, sacrifice, honor) that cut across caste lines.
* The Minbari religion gets a mention for apparently having no supernatural beliefs whatsoever; this may be related to their special relationship with the Vorlons. Note that there is such a thing as a soul in Babylon 5, which can be extracted with a machine and imprisoned in small orbs. The Minbari (and others) don't just believe in reincarnation, they can actually measure it.
* The Minbari religion is based in pantheism and they have a belief in reincarnation similar to many Eastern religions (they're explicitly right-souls do exist that reincarnate).
* The Minbari religious caste crew during the civil war attempted to sabotage their ship to prevent Delenn from carrying out
* The Minbari speak several languages, especially on Minbar, and the three castes are shown to have unique rituals as well. It's implied that the Minbari were more divided before
* The Minbari use a chemical that removes the outermost layer of skin; it symbolizes rebirth, at least to the Religious Caste. As you'd imagine, it does absolutely horrific things to hair, as Delenn discovers when she becomes a
* The Mindbender, a rollercoaster at the West Edmonton Mall's Galaxyland Amusement Park, holds the record for the tallest, fastest, and longest indoor rollercoaster in the world. Despite that, most people know about it because of an accident in June 1986 where a derailed car crashed into a concrete pillar, killing three of its four passengers and seriously injuring the fourth.
* The Mindbenders: Fronted by Wayne Fontana, this Manchester-based pop-rock band topped the charts in 1965 with "Game of Love." Exactly one year later, the

Mindbenders, sans Fontana, reached the number-two spot with "A Groovy Kind of Love." Guitarist Eric Stewart would later have success with 10cc.
* The mind-bending videogame-esque game-within-a-show-within-a-game-within-a-film
* The Mind Control is provided by a separate technique that is not required to bring them back to life, they would just make bad
* The Mindcrack server is a whitelisted Minecraft server with 25 active members (all YouTubers.) There are more than 2,600 videos, only counting active members and the vanilla server. Add in the two spinoff servers/series (Feed the Best and Ultra Hardcore)...
* The Mind Is a Plaything of the Body, biological imperatives, or some combination of all of the above.
* The Mind Is a Plaything of the Body: When shapeshifting causes a change in one's personality, as well.
* The Mind Is a Plaything of the Body: Your thoughts and instincts transform to match whatever new form you have.
* "The Mind of Evil", a scientist invents a machine that removes criminal impulses from the human mind, and offers it to the government as a means of dealing with dangerous criminals without resorting to the death penalty. Turns out its inventor is actually the Master and the device brainwashes people to serve him.
* The Mind of Evil at the right time to save the Doctor from a sticky predicament.
* The Mind of Evil" takes place in Stangmoor prison, loosely based on the real life HMP Manchester/Strangeways.
* "The Mind of the Master". Erica Lane is inside Guru's brain to repair some damage.
* The Mind of the Nightmare pulls this off when Devin realizes that, despite his compulsively locking of doors since he was a child, the Rake has somehow managed to sneak in and out of his room while he was asleep for who knows how long, just to sit at the foot of his bed and stare at him. Just think about it. Some creature with razor sharp claws and an unknown agenda could have sneaked its way into your room last night some time after you fell asleep, leaving you completely at its mercy.
* the mind of the original alien whose DNA sample is in the Omnitrix is present within that sample and capable of restoring himself. And he's not.
* The Mind Robber" (aired in 1968), she is familiar with a cartoon character from the year 2000, implying that she's from a few years past that time at most. Or that she's a comics geek, which wouldn't be out of character for her.
* The Mind Robber "Creag an tuire!", alerting the Redcoat to his presence, who then turns and shoots him dead on. Fortunately they are in the Land of Fiction, so instead of dying Jamie is turned into a cardboard cutout.
* "The Mind Robber" establishes that the inhabitants of the Land of Fiction are, well, fictional... unless you believe in them, in which case your mind makes them real and they are able to harm you. Strangely, though, in order to get rid of a menacing fictional character, all present must vocally disbelieve. The Doctor and Zoe are able to make a Minotaur vanish this way, but Zoe's inability to disbelieve in Medusa forces the Doctor to use a mirror to defeat her, even though he knows she's fictional. Later, Zoe is forced to fight Karkus, whom she knows is fictional, because the Doctor has never heard of him and thus cannot disbelieve.
* "The Mind Robber" features live-sized and apparently living clockwork soldiers.
* The Mind Robber" for Season 6, wrote the story with a generic female companion named Zoe (as he knew the previous female companion would be leaving at the end of Season 5, but not anything about the replacement). The producer liked the name and so kept it for the new companion.
* The Mind Robber", Frazer Hines (Jamie) contracted chicken pox. This resulted in a last-minute rewrite of the serial, which allowed another actor (Hamish Wilson) to play Jamie's part for episode 2 of the serial.
* "The Mind Robber", the Doctor activates the TARDIS' emergency drive unit, which "sends the TARDIS out of the time-space dimension" or, as he wryly comments, "We're nowhere...it's as simple as that."
* "The Mind Robber", there is a swordfight in the Land of Fiction between Cyrano de

Bergerac and D'Artagnan, who have been summoned by the Master and the Doctor. Finally Blackbeard is substituted for Cyrano and defeats D'Artagnan, causing the Doctor to replace D'Artagnan with Sir Lancelot, who defeats Blackbeard.
* The Mind Robber": This trope is the reason why the Master brain needs a human. Or even better, a Time Lord.
* "The Mind Robber" twice, and the first time it was reconstructed wrong. (Hines's cousin Ian Hines also appeared in the same story as a life-sized toy soldier, so that it was later sometimes mistakenly said it was his cousin who replaced him.)
* "The Mind Robber", which takes place in a kind of dream dimension, starts in a blank white void, and has things like Jamie's face getting turned into a 'puzzle' that the Doctor has to solve, but he does it wrong and ends up changing Jamie's appearance.
* The Mind Scan ability could be used to detect life in an area, though it was normally used to find specific creatures.
* the mindset of flying jellyfish creatures ("perambulatory limb-stretchings" instead of "stretch their legs", for example, or "underfooted" instead of "crushed underfoot"), and uses somewhat odd plural forms for verbs ("And general, thank you for the most persuasive invitings of your famously victorious son to lead it") and time units ("fifty-two of centuries").
* The Mind's Eye, and ending in what is likely a fatal collision with a massive wall inside a sectioned-off tunnel inside a building.
* The Mind's Eye, being a collection of animations from different animators spliced together. That said, even some of the sequences when taken as a self-contained event don't make a lot of sense.
* The Mind's Eye" has a memorable one. The audience knows Data has an excellent reason for this, but Worf doesn't:
* The Mind's Eye: Idiosyncratic wipes occur frequently due to the series's abstract nature.
* The Mind's Eye segment "Heart of the Machine", clusters of gears turn and morph themselves, and later a "character" made of four sticks and four circles explores a plateau with several moving structures.
* The Mind's Eye series is meant to showcase advances in computer animation from the '90s, a handful of sequences use live-action videos.
* The Mind's Eye, the sequence "Volatile Planet" shows a much slower version of this as a small spacecraft is trying to escape.
* The Minds feel that departing this plane of existence would negate the Culture's "moral right to exist" — their ongoing efforts to preserve free will and ease the suffering of developing races.
* . The Minds' observation of group dynamics finds this troublesome, as billions or even trillions of sapients experiencing a common fate indicates a certain degree of coercion, which they find abhorrent — the Minds see no difference between forced vaccination and genocide.
* The Minds of Billy Milligan. Interestingly, Milligan was able to integrate at will and de-integrate again; he described it as unpleasant and didn't recommend that multiples try it.
* The minds of our children and their ability to master vectors are (shudder).
* The minds of untrained psykers are the main reason they're hunted down and captured for indoctrination as soon as they can, they can all too easily become portals for daemonic invasion (and even with training it's a possibility), or worse, learn to master their powers and become a servant of Chaos.
* The Mindy Project featured Danny "accepting" his feelings for Mindy after inferring (incorrectly) that she was romantically interested in him.
* The Mindy Project) is 6'4—she even says he's the tallest man she's ever dated. It's not too glaring most of the time, since Mindy often wears heels.
* The Mindy Project loves this trope. Especially concerning the sex life of anyone present in the room.
* The Mindy Project, Mindy is going through a lengthy and argumentative questionnaire with her love interest/frenemy Dr. Castelllano (who is recently divorced because his wife had an affair). When he checks that she isn't planning to

have kids because she's not married or in a serious relationship, Mindy says this.
* The Mindy Project play in an interdepartmental hospital softball tournament.
* The Mindy Project, shakes it off, and keeps running. Mindy, meanwhile, runs up all of the stairs because the elevator is broken, leaving her a panting, winded mess at the top.
* The Mindy Project subverts this; while Mindy is a fine-looking woman, it's her own self-doubts and insecurities that make her believe she will end up like this given her string of handsome boyfriends, particularly Danny and Ben. While this is usually played for laughs, in some cases, such as when she begins gaining weight due to her pregnancy with Danny's baby, she has an emotional breakdown that is no laughing matter.
* The Mindy Project. The end of the episode even features Mindy asking her parents why they didn't immerse her more in Indian culture.
* The Mindy Project, when it moved to hulu, dabbled in fantastical plot lines. One of which was the season 5 episode "Hot Mess Time Machine", in which Mindy ends up reliving the same day over and over, and uses it to make things right with Ben.
* The Mindy Project when Mindy decides that she should give up on him and pursue "Andy". This causes him to chicken out on meeting her like he planned. When Mindy confronts "Andy" on the subway, Danny is forced to reveal that it was him sending the e-mails. Things end up working out for them in the end.
* The mine carts are repaired as the reward for completing the boiler room bundles (or paying 15,000 gold). These can access the quarry if the player has completed the crafts room bundles. If the player hasn't, the mine carts can go to the mines, the town, and the bus stop, but the quarry will remain locked until the player has completed all of the craft room bundles and repaired the bridge.
* The Mine is a silicon-based creature that looks like a three yard wide pink rock and weighs one ton. It lives underground and kills its prey by detonating an explosive gas.
* The miners have to dig a tunnel under Chernobyl to install a heat exchanger to prevent radioactive lava from burning through the concrete and contaminating the groundwater (there was about a 40% chance of that, so better safe than
* The Minerva Alliance: Many of these videos will rarely (if ever) show the horror they are referring to. If they are shown, there is still some information about them withheld.
* The Minerva Alliance weather event that people must not look at? It could be anything they don't want you to see.
* The Minerva's Den DLC has Splicers encased in ice, some of which will break free and attack when you get too close.
* The Mines of Custalcon. In a detachment of the First Regiment Stillring Brigade, several of the soldiers have swords blessed to be +1 vs. goblins for a year and a day.
* The Miniature Killer left detailed miniature replicas of the scene at each scene.
* The miniboss Agunima's face is perpetually hidden by a deep hood, leaving only his eyes visible in the shadow.
* The mini-boss battle theme sports some particularly epic bells in the beginning.
* The mini-boss in the Snowpeak Ruins is in what looks like a simple hallway with two suits of armor on display. Then when you get to the other end of the hallway both doors suddenly lock and the suit of armor immediately behind you is smashed by the other one, which comes to life wielding a ball and chain.
* The mini-comic "Private Fire" (which is itself made partially by a
* The Mini-Cons talk in bleeps and whistles similar to the droids in the
* The mini-escape pod versions where the entire cockpit is ejected is
* The Mini Estrella Division, most commonly seen in Mexican promotions, was set up to give wrestlers who are simply too small to qualify even for the lowest weight classes(
* The mini-game to send Jubileus into the sun isn't so bad in Normal mode. In Hard and Climax mode however the planets are much harder to avoid, and failure is counted as a death, which can completely ruin an otherwise perfect score.

Considering how long and difficult this fight can be, this is frustrating to say the least.
* The minigun faces a new problem that makes it this trope: in addition to chewing through ammo like its going out of style, because of the way damage reduction is calculated it will deal half damage to most creatures you meet after about the first 5 hours or so, meaning it will take even more ammo to take things down. Explosive miniguns ease the ammo problem by dishing out more damage but there's a few problems: you have to get lucky and find it, you need a lot of ammo for it, and you need two very difficult to improve perks (Heavy Gunner to improve the bullet damage and Demolition Expert for stronger and bigger explosive blasts) which ultimately means you still have a heavy ammo hog that uses less bullets.
* The Minigun, Flame Thrower and Missile Launcher hardware schticks, all of which do not have a concealment rating — they're so effin' huge that trying to hide them is all but impossible, especially given the fact that they're usually mounted on an equally bulky cybernetic body.
* The MINI, launched in 2001 by BMW is one such example. However, it's not a
* The minimal requirements to play a game are two units of troops and the HQ. Meaning you have Imperial Guard generals directing operations from the field rather than in a fortified bunker miles away.
* The "minimal sword" challenge, where you only use your sword on Ganon (you can't beat him without it). It's possible (but difficult) to beat the rest of the game without it. If you want to get
* The Mini-Munsters, (1972-74), had the macabre family discovering their hearse runs on music instead of gasoline.
* The Minion Master arc introduced an international collection of these organizations, the most significantly featured are NoFun Corporation and Crushtro. The Minion Master is as yet still too nebulous (and perhaps too incompetent) to be identified as evil.
* The miniseries also features a heavily pregnant Commandant Grayza who, presumably, is undergoing the same accelerated gestation as Aeryn since Grayza had not been established as being pregnant when last seen during the fourth season. This is actually a case of
* the miniseries before being changed to scifi). In the original miniseries, a Jewish Holocaust survivor acknowledged the parallels.
* The miniseries says that after the first Cylon war, the Cylons left and made their home on a distant planet. This is brought up again in Season 2 when it is explained that the Resurrection Ships allow Cylons to download into new bodies when far from the Cylon homeworld. After that, the idea seems to have been quietly dropped. Season 4 introduces a spaceborne "Resurrection Hub," which is said to be essential to all Cylon resurrection everywhere, and the homeworld is never mentioned. In the last few episodes, this is brought up again, although it is changed a bit more: the Cylons had been living on the 'Colony', which was more like a large space station than a planet.
* The Minish Cap, explaining the origins of both the Four Swords and Vaati.
* The Minish Cap in favor of the Flame Lantern, the European version of the Ice Wizzrobe's figurine still advises you to "hit them with your Fire Rod!"
* The Minish Cap. Multiple times during the festival when she's talking to Link, she'll run off mid-sentence because she got distracted by another booth or person.
* The Mini started a revolution in the use of interior space in automobiles, with its ability to seat a family of four comfortably despite its, well,
* the Minister of Magic sends Harry to ask the Scoobies for a non-lethal solution to a vampire problem.
* The Ministrel was once a normal family man who was drafted into a war, only to eventually be released because he simply wasn't a good soldier. When he returned home, he found his city destroyed by the war and his family missing. It wasnt until years later he found his daughter again.
* The Ministry advises people to ask this kind of question to make sure a Death Eater isn't impersonating your friend. Harry quickly figures out for himself that when magical compulsion is one of the favorite tools of the bad guys, this sort of

thing is the barest of bare-bones contingencies. Dumbledore states he that agrees with him.
* The Ministry has finally admitted that Voldemort has indeed returned, but they immediately revert to how they acted during the first war, with many instances of unjustifiable arrests. This includes the arrest of Stan Shunpike, who gets sent straight to Azkaban.
* The Ministry of Defence in the UK is preparing a demonstration with the world's largest aircraft, an optionally-manned hybrid airship/airplane called the Airlander 10. One of the proposals includes using its large cargo bay and long endurance to make it a "mothership" for medium-sized drone airplanes.
* The Ministry of Information and the Information Retrieval Department from
* The Ministry of Magic explicitly gives dispensation for Muggle relatives of wizards to learn about the wizarding world, although they must vow not to pass on the knowledge to other Muggles (if they do so, it can be inferred that the Ministry will
* the Ministry of Magic institutes a marriage law pairing light wizards and witches with dark ones.
* The Ministry of Magic is completely underground. It can be reached via elevator telephone booth, flushing down magic toilets (no joke), Apparation or Floo powder. Like the Great Hall's sky ceiling, the windows are enchanted to allow daylight to filter in.
* The Ministry of Magic misrepresent their powers multiple times by threatening Harry with punishment they have no authority to carry out. First in
* The "Ministry of Silly Walks" sketch is about a government agency whose mission is to develop silly walking styles. At one point, John Cleese's character notes that the Ministry can't just dole out grants willy-nilly because the British government
* The Ministry of Time At the end of the episode, the heroes try to recruit him to work for the present-day Ministry. He accepts... after checking out Irene through her clothes (she doesn't seem to mind).
* The Ministry of Time. Prior to travelling through time, he was a nurse in modern-day Madrid.
* The Ministry of Time, series co-creator Javier Olivares and director Marc Vigil appear in portaits as two former Ministry undersecretaries.
* The Ministry of Time the boss asks for the patrol, he receives a call from them. however, in "spell time" they do not.
* The Ministry of Time was broadcast, there were noted spikes in searches for the historical characters that made an appearance in each episode.
* The Ministry of Utmost Happiness, Biplab Dasgupta works for the Intelligence Bureau. Diplab means 'revolutionary' in his mother-tongue Bengali.
* The Minkiad: The first three chapters of Lives of Genius focus on Minkus’ time in elementary to high school when the canon has gone into the lives of Cory, Topanga, Shawn and their families; Of particular notice, the readers discover that the “Other Part of the School” is an area for troubled students with emotional problems.
* The Mink tribe are an entire species of talking animals, with varying animalistic features. Notable among them are Bepo, a polar bear in Trafalgar Law's crew, and Pekoms, a lion in Big Mom's crew; both of them were introduced long before their tribe was properly shown onscreen, leaving much mystery as to why they could walk and talk until then.
* The Minmatar Republic is a pastiche of the post-colonial Third World, having defeated the Amarr in a bloody war of liberation but still struggling to pull together a modern state, with many of their best and brightest leaving to find better prospects across the stars. The fact that the Amarr are the Space Spaniards, that the favored destination of those best and brightest tends to be the
* The Minmatar "Typhoon" battleship is billed via the in-universe description as being versatile and fit to deal with most situations. In-game, it's a trashcan with a mix of slots (but still awesome).
* The Minnesota Home Wrecking Crew, with Lacey specifically calling Rain "The Love

Of Her Life" in
* The Minnesota Lynx had trouble getting butts in the seats before Lindsay Whalen and Maya Moore showed up.
* The Minnesota Twins fandom contend they have had a rivalry with the New York Yankees ever since beating the Yankees in their very first game in 1961. They often push how they go after the Yankees in playoff chases and celebrated how they were World Champions in 1987 and 1991 when the Yankees were mired in the cellar. It's increased as since 2004, the Twins have lost 10 playoff games to the Yankees and consider them prime targets. Ask any Yankees fan and they barely give the Twins a second thought as not even a distraction to the iconic hate between the Yankees and Red Sox.
* The Minnesota Twins have fallen into this trope as of recent years. After winning their second and most recent World Series in 1991, they wouldn't reach the postseason again until 2002, when they reached the ALCS and lost to the eventual World Series champion Angels. 2003 and 2004 saw them getting eliminated by the Yankees in the ALDS. After 2004 is where things started to get bad:
* The Minnesota Vikings are one of two teams that have made it to the Super Bowl four times... and lost all four. They haven't gone back to the Super Bowl since 1977. Since the '70s, they've picked up a reputation for hiring other teams' castoffs, which hasn't helped them any (most notoriously, they hired Brett Favre for his last two years).
* The Minnesota Vikings reached the Super Bowl four times in eight years (IV, VIII, IX, and XI) and lost each time (to the Kansas City Chiefs, Miami Dolphins, Pittsburgh Steelers, and Oakland Raiders, respectively). They and the Bills are tied for the most Super Bowl losses in league history without winning one. The Denver Broncos matched this record, losing four Super Bowls (three under John Elway), until finally winning back-to-back Super Bowls in 1997 and 1998.
* The Minnesota Vikings' Ron Yary was notorious for playing in spite of injuries, particularly the occasion in the 1981 season where he played with a
* The Minnesota Vikings went into the last week of the 2003 season needing a victory over the 3–12 Arizona Cardinals to win their division. They were up 17–12 with two minutes left, but the Cardinals recovered an onside kick. QB Josh McCown drove down the field and completed a miraculous 27-yard touchdown pass to Nathan Poole.
* The Minnesota Wild have never lost a home opener in franchise history.
* The Minnipins. They're tiny gnomes who ride upon birds. Of course, they happen to know a huge Mute Swan who can carry their new human friend.
* The Minoan Labyrinth was "solved" only by cheating with a piece of string.
* The Minoan Trident in the Season 2 finale. If struck into the ground three times it causes huge earthquakes. Do it near a supervolcano and you don't just get a nuclear-level blast, but the ash causes the equivalent of nuclear winter as well.
* the Minoan Trident when used in the caldera of a supervolcano like Yellowstone, the eruption of which would end human civilization).
* The minor antagonist Master Fear has a teardrop shape for a head, reusing a scrapped design for main antagonist Master Frown, albeit with different eyes.
* The minor character Wolfcub is stuck in a "wolfman" form. A couple of plots have tried to explain that all mutants with regenerative powers, claws, and heightened senses are a subspecies of mutant (Homo superior lupus) that is the origin of werewolves. The same is said for Demonic mutants (like Nightcrawler), Angelic mutants (like Angel), and Cat like mutants (Feral, Thornn, and Catseye).
* The "minor civilization" mechanic originated in the Rhye's and Fall of Civilization mod, using them in place of pre-unification civilizations (such as with China), for people native to the Americas and Africa that don't fall into one of the base game's civilizations and the remainders of larger civs that fall apart from civil war.
* The minor deity/spirit Five Days Darkness is the shadow of the Unconquered Sun. He's a pretty nice guy, but he has a hard time helping people since he disappears in sunlight.
* The Minority Council by Kate Griffin, this is used in an incantation to catch a

monster (along with a roll of police tape and similar paraphernalia).
* The minor Jedi character Stass Allie was created because Gin Clarke, who played Adi Gallia in
* The minor Red Court Vampire "Bianca St. Claire" only appears in Books 1 & 3. However her falling out and subsequent attempts at
* The Minotaur. Most versions have a bull's head, with horns, hooves instead of feet, hands as hard as horns with a bull's strength in striking, and a taste for raw flesh. It was uncontrollable and had to be imprisoned in Crete's Labyrinth - which makes the pictures of him with the ring in his nose rather odd.
* The Minotaur of Crete. King Minos kept his step-son in the Labyrinth and had sacrifices brought in (seven young men and seven young women a year) to feed him, until Theseus came along to slay him.
* the Minotaur of Greek legend. In addition, Lamborghini's emblem is a charging bull, and many of its models' names are related to bulls and bullfighting.
* The Minotaurs, a chapter that actually specializes in fighting other Space Marines. Because what is a worthier opponent for a Space Marine than another Space Marine?
* The Minotaurs are a close second to the Marines Malevolent above in terms of "Space Marines nobody likes", being willing to let their allies die to make their job easier and steal gear from other Chapters. And to top if off, they're the High Lords of Terra's attack dogs.
* The Minotaur Takes A Cigarette Break: The Minotaur is still alive today, five thousand years later. His days in the Labyrinth are very vague to him.
* The Minotaur was the child of Queen Pasiphae and a very large bull that king Minos unwisely decided to keep instead of sacrificing to Poseidon as he'd promised. Poseidon made Pasiphae fall in lust with the bull as revenge.
* them instead. Everyone present realizes then just how doomed they are.
* them). Instead of wondering why his friend would do that, Luffy automatically believes the injured townsfolk and assumes Zoro ruthlessly attacked the "nice people" who gave them food.
* The Minstrel Boy, he chooses to make one last act against his murderers by destroying his harp.
* The Minstrels Tale by her stepfather. Not only is she deeply put off by her bridegroom, who is at least thirty years her senior, but on the night of their betrothal dinner she falls in love with the young minstrel who comes to play and sing for them. He leaves her an instrument and a note suggesting another way of life, which she accepts gladly; she cuts off her long hair, dresses in clothes belonging to her deceased brother, and runs away to minstrel school.
* The Minunians, the eponymous 'Ant Men', are warring city-states of warriors one fourth the size of normal men in
* The minuscule difference between Pac-Man and Ms. Pac-Man was played with in
* The Minus Man is apparently tasteless and odorless, and kills his victims quickly and painlessly. The poison is discovered during an autopsy but without an autopsy, it could easily be mistaken for a drug overdose or heart attack.
* The minute Simba has Scar cornered at the pinnacle of Pride Rock, he pathetically begs for mercy,
* The Miracle At Naples, but possibly the most adorable is the two male best friends who fall for each other.
* The Miracle Blade 3 infomercial shows a guy wielding a knife like a sword to cut right through a pineapple that's hanging by a thread from the ceiling. It's supposed to make the user think the blade is as sharp as a sword - it must be to cut through that tough, spiny pineapple rind, right? But pineapples are actually quite easy to cut through, especially just below the crown. It's also easier to cut through tough foods with a wide-arced hacking motion than with the kind of careful, controlled slicing you
* The Miracle Curl Of Ampara and the terrorists instead get fused with the glass half-way, still fully conscious and otherwise perfectly healthy. Despite the far future setting of the novel, the medics are as flabbergasted by this as one would expect.

* The Miracle Hater is a mostly naturalistic retelling of Exodus, a historical depiction of a desert tribe who don't yet have the kind of religion that Judaism would eventually develop into.
* "The Miracle Job" features a variation on this: Nate is trying to help out an old friend, now a Catholic priest, against that friend's will. The friend demands Nate see him in the confessional so they can talk in private about what's going on. Nate goes along with it — but sits in the priest's side of the box. After their conversation is over and the priest leaves,
* The Miracle Letters of T. Rimberg: The book is told in two different styles. One is the transcripts of an interview between a Priest and the title character. The other style is told through the various suicide letters of Rimberg. It's a dark comedy.
* The Miracle Lights are also given away with the DVD releases if you buy them on Toei's website, and some DVDs of the musical shows contain these as well.
* The "Miracle of Berne" (4 July 1954) in which the West German team came back from trailing 0-2 against the "Magical Magyars" to win
* The Miracle of Morgan's Creek (1944), local good-time girl Trudy Kockenlocker (Betty Hutton) goes out for a night of partying to entertain the troops heading overseas. She only has a vague memory of the night before where she may (or may not) have gotten married to a soldier who may (or may not) have been named "Ratzkywatzky". She is, however, pregnant and winds up marrying a local loser to cover it up.
* The Miracle of Morgan's Creek, is the one who comes up with the idea for Trudy to marry Norval to cover up the fact Trudy is pregnant and doesn't remember who the father is.
* The Miracle of Morgan's Creek, the reactions from around the country and the world to the "miracle" including from Adolf Hitler and Mussolini.
* The Miracle of Morgan's Creek to someone she couldn't remember and would probably never see again.
* The Miracle of Morgan's Creek. Trudy, who sneaked out to a party, got drunk, and found herself married to someone she didn't remember, and pregnant to boot, decides to trick Norval, who's been in love with her since they were kids, into marrying her. She brings up marriage as a general subject and says that it's not like she's ever had any designs on her. This makes Norval talk about how he's been in love with Trudy his whole life and brings up things like the classes he took in school just to be near her. This makes Trudy feel so bad she's now in love with Norval, and no longer wants to go through with it.
* The Miracle of Swindon Town, in which John plays the Fifa series while talking about stuff and making up backstories for his players.
* The miracle plastic Boing® is a spray-on substance that expands and encases the user in a very bouncy ball. It's legal to use for various games and activities (appropriately referred to as "boinging") at special facilities that cater to these interests (namely, the Palais de Boing®), but boinging outside of such facilities is very dangerous and
* The Miracle Woman: Hornsby blackmails Florence Fallon by telling her that he'll blame the embezzling charges and the murder of their employee on her since all the circumstances point to her-—all of this, of course, has been done by Hornsby, not Florence; she only needs to escape to the south of France with him to avoid all of this.
* The Miracle Woman is freaky. All those dolls are nightmare-inducing.
* The Miracle Woman, manipulates Florence to believe that she needs to get even with her father's former churchgoers. Hornsby's only motivation is that he knows he can make a lot of money, but only with Florence's help.
* The Miracle Woman uses his dummy to voice his feelings about Florence Fallon. It's fairly nerdy and cringe-worthy, but it still comes off as sweet.
* The Miracle Woman was inspired by the real evangelical "healer" Aimee Semple McPherson.
* The Miracle Worker, despite the fact that Annie had grown up in an almhouse, because it made her strong.

* The Miracle Worker's past is revealed to the audience through multiple flashbacks. During her flashbacks, she hears and interacts with the voices of her younger brother and others from the orphan asylum.
* The Miraculous Adventure Of Tessa And Lunala fits the trope. She is known for her courage and kindness, but she does have a flamboyant side to her.
* The miraculous escape from an inescapable deathtrap is superbly spoofed in the 1983 film
* The Miraculous Mellops, and thinks the kids are still playing games.
* The Miraculous World of Caline Bustier. Caline admits after that maybe the reason teenagers are chosen for this duty is that they are innocent enough not to jump straight to using their superpowers for brutal murder.
* The Miraculous World of Caline Bustier Ladybug, one of the first things they say is "oh, I guess Lila is a lying bitch then."
* The Mirage is a war hero, prominent politician, and rumored head of intelligence agency Al-Qaeda. LBJ takes the role of Hussein, as dictator of the Christian States of America.
* The Mirak probably aren't helped by the fact that while the Hydran, Lyran and ISC are all from one of the two sources of canon for Starfleet Command, the Mirak are
* The Miraluka species are humanoids who lack conventional eyes, seeing entirely through The Force. They're mostly isolationist, but the ones who leave their homeworlds tend to end up with the Jedi in some form; either as Jedi themselves, or adjuncts in teaching or administrative positions. As a courtesy to non-Miraluka, they cover their
* The Miranda rights only cover your incriminatory statements, not the arrest itself. If the arrest itself is valid, it cannot be overturned because you didn't get the Miranda warning. This is something TV often gets wrong because it confuses the "custodial interrogation" bit with the actual arrest; yes, you have to be in police custody of some kind in order for the warning to apply, but the warning doesn't apply to the custody itself, but rather what you
* The Miranda warning is just that — a warning. If you choose to ignore the warning, your statements are admissible in court. It
* The Miroku Mansion is revealed to have a hallway that impossibly loops back around to the Mansion's entrance. Depending on what mask is used to enter the hallway, the mansion changes subtly and offers more clues for Akira and co. to investigate.
* The Mirror", a successful South American revolutionary leader is told by the dictator he is replacing that his mirror is enchanted and he will see in it the face of the man who will assassinate him. The new ruler begins imagining that he sees the faces of his allies and one by one he has them executed, becoming as much of a blood-thirsty tyrant as the man he had fought against. Guilt-ridden, he looks into the mirror for the last time and realizes he is finally looking at his true murderer... and then kills himself.
* The Mirror Crack'd from Side to Side. Miss Marple suspects this is the case, but keeps quiet.
* The Mirror Demon starts acting up, the girl starts seeing the past of the eponymous creature. It's mostly because the oath wants to be fulfilled, so it helps Ida (although Ida would probably prefer it didn't).
* The Mirror Dimension is a parallel dimension that allows the user to practice their magical abilities and fight their enemies without the public's knowledge. The dimension is layered over the Earthly Plane, people and their actions in the Mirror Dimension are unable to affect the real world, but sorcerers (even more so those empowered by the Dark Dimension) are able to bend matter and gravity to their will akin to the dream-realm in
* The mirror Enterprise NX01 had life pods, not that they did the crew much good when they were used (almost all were destroyed by an energy web that was trapping the ship to begin with).
* The Mirror Has Two Faces a romantic operatic aria sung in a tenor voice is heard during a romantic scene. It turns out that someone in an apartment was playing a

record of the music.
* The Mirror How I got death threats for joking that One Direction are better than The Beatles"
* The Mirror. Rachel also tells Shay (and we see the conversation between Brandy/Shay and Rachel later on) that her own "night before the wedding" talk was a rather detailed explanation of "the birds and the bees".
* The Mirror", Ramos Clemente orders the mass public execution of 1,000 prisoners, all of whom are former followers of General De Cruz. The executions continue unabated for a week, to the horror of the people. Clemente tells Father Tomas that they will continue so long as he has enemies.
* The Mirror, she dies as her grandmother, while her grandmother then lives the rest of her life.
* The Mirror Shows Your True Self: A shape-shifter has their true form shown in a reflection.
* The Mirror Shows Your True Self: A shape-shifter's reflection shows their true form.
* The Mirror Shows Your True Self: Reflective surfaces can reveal what a shapeshifter's real form looks like.
* The Mirror Shows Your True Self: Sort of applies, since noticing a person lacks a reflection can give away that they are really a vampire.
* The "mirror test" for animal intelligence is whether or not animals can recognize their own reflection in a mirror as such, or think it's
* The Mirror understand that they were obviously not serious...and, true to stereotype, Bing did not. To be fair to Bing, many Americans would have found that pun to be in poor taste (and probably still do).
* The Mirror Woozle rotates the screen clockwise or counterclockwise 90 or 180 degrees every few seconds.
* The Mirrorworld Series: Jacob, who is twenty-four, and Miranda, an immortal fairy. Probably a similar situation between Kami'en and The Dark Fairy.
* The Mirrorworld Series. Other inter-breeding is mentioned in passing, though, suggesting that he's not the only one with an attraction to humans.
* The Mirror World, where Shadows lurk and whole areas made of quartz are created from a person entering, much like the TV World in
* The Mis-adventures of Gattinera Lila owns three sets of her iconic outfit from the show, and wears one every time she can. In fact the only time she doesn't is because her mother has explicitely asked her to wear a specific sundress.
* The Misadventures of Onipex and Pals is seen to be very unsatisfied when dealing with fast food or retail employees.
* The Misadventures of R2 and Miku (both musicians who took their own lives).
* The Misadventures of R2 and Miku (the characters are usually still images that only really "animate" when they talk) and whenever there's actual voice acting it's usually flat and poorly recorded.
* Them! is a movie about mutated giant ants. Except for the first half-hour, where it's a leisurely-paced police procedural set in the New Mexico desert instead.
* The Misanthrope: Alceste refuses Célimène's offer of marriage because he's finally sure that she doesn't love him (or at least doesn't love him any more than she loves any man who pays attention to her).
* The Misanthrope has Philinte and Éliante getting together at the end, providing perhaps the only honest relationship in the whole show.
* The Misanthrope. They have the only honest and uncomplicated relationship in the play.
* The misanthropic recluse, Hamm, his servant Clov, and Hamm's parents Nagg and Nell appear to be among the last survivors of humanity in
* The Miseducation of Cameron Post (lesbian main character, lesbian supporting characters, gay supporting characters, transgender supporting character; subject matter includes homophobia, conversion therapy)
* The Miseducation of Cameron Post plays Cameron's secret girlfriend. Lane (playing Jane) is a lesbian, Shephard (Coley) has said she's queer.
* The Misenchanted Sword, the war between Ethshar and the Northern Empire comes to

an end when the Northern Empire, as an act of desperation, unleashes a horde of demons on Ethshar; this is treated by all sides as if it were an all-out WMD attack. In response, the gods allied to Ethshar break their own rule of non-intervention and wipe the Northern Empire off the map.
* The Miser (1668) Anselme, the man who Harpagon wants his daughter to marry, ends up being the father of her lover Valère as well as Mariane, the love interest of both Harpagon and his son.
* The Miserable Mill back and forth in obeying their commands. The word "Inordinate" deactivates the state.
* The Miserable Mill has the Baudelaire children being threatened by one of Count Olaf's henchmen in an active sawmill. They manage to escape, but not before the henchmen trips and "there came a most gruesome incident indeed."
* the miserable state this has left Henry, though it assures the reader that he deserved his punishment.
* The Miser, Harpagon is seen adding a bear trap atop his cash-box to protect it at the beginning of the movie. Later, after La Fleche unearthed said treasure, he's seen dragging the bear trap around his ankle.
* The Miser has Frosine, a professional matchmaker who's determined to get the old, greedy Harpagon and young fair Marianne together. However, she later sides with Marianne and her lover Cléante (Harpagon's son) and supports their romantic plans, not having "a heart of flint" to get in the way of "young people loving each other in all earnestness and honesty".
* The Miser is freaking out over the very possibility of giving food to other people.)
* The "Misfit Monsters Redeemed" supplement is written to avoid this trope to some degree. Basically, it takes several silly Gygax-era monsters and attempts to reimagine them as serious and dignified encounters. For instance, the Flumph, originally a silly flying jellyfish prone to falling over by itself, is now a good-aligned extraplanar harbinger who seeks to warn other races of the approach of malevolent aberrations and other
* The Misfit of Demon King Academy designed a secret passage in his dungeon that had no doors nor secret mechanisms or teleportation device, just a solid wall in front of it. To access it, one just has to be physically strong enough to break down the wall, which Anos does by walking straight through it. Apparently, this was the only surefire way to thwart detection magic and guarantee his most valuable treasure would remain undiscovered during the 2000 years it took for Anos to reincarnate.
* The Misfit of Demon King Academy, has an incredibly deep, menacing voice in the anime, as befitting a recently reincarnated, all-powerful Demon King.
* The Misfit of Demon King Academy he's objectively right all the time.
* The Misfit of Demon King Academy: "History's Strongest Demon King Reincarnates and Goes to School with His Descendants."
* The Misfit of Demon King Academy, is killed and reincarnated thousands of years later, being born to a hapless newlywed couple. Only seconds after being born, his parents try to name him when Anos states his full name (with his deep, adult voice).
* The Misfit of Demon King Academy powerful ally willing to bring them back to life.
* The Misfits (1961), Perce, who had an accident a while back, assures his mother over the phone that "My face is fine. It's all healed up, just as good as new." Montgomery Clift had been in a serious car accident in 1956 that scarred his face and damaged his pretty-boy good looks.
* The Misfits and Jerry Only, including multiple lawsuits, and it was assumed that they'd never reunite again. Jump to May 2016 when it is announced that Danzig, Only, and original member Doyle Wolfgang von Frankenstein will reunite for the first time in 33 years in September.
* The Misfits are all about boosting their own egos. "Misfits in Hawaii" is self-deprecating and portrays them in a negative light. "Love Sick" is a straight up
* The Misfits are still the antagonists and still not nice girls (except Stormer),

but it's slyly demonstrated that each of the band stands solely on their own. Pizzazz's temper is even worse, and feels she literally cannot trust anyone in her life. Roxy and Jetta aren't down each other's throats anymore, but they'd just as easily laugh if one was the butt of a joke. Pizzazz, Roxy, and Jetta still gang up on Stormer, but Stormer is actually more likely to snark back at them, insult them and even scream at them, unafraid to stand up to even Pizzazz. Clash in
* The Misfits felt it was his best film because he was "finally allowed to act". It turned out to be his final film before his death.
* The Misfits' guitarist Doyle allegedly borrowed his stage name from the family dog.
* The Misfits is generally seen as this to the original band. The new version sings almost exclusively about horror films, leaving behind the violence, rape and other generally disturbing themes that were also part of the Glenn Danzig era.
* The Misfits Series, the antagonism between the X-Men and the Brotherhood has become this when the latter are adopted and rechristened by the G.I. Joes as the Misfits. While both groups fight against villains, including Magneto and Cobra, they rarely, if ever, get along.
* The Misfits' songs fit into this category, especially "Last Caress" (about killing babies and raping mothers) and "Bullet" (about JFK's assassination and treating his widow as a sex object).
* The Misfits, this is why Roslyn is in Reno. Right after getting her divorce, she falls in love with an older local man.
* The Misfits (Warhammer 40,000): Alaster, as a high-school student, is the best-educated of his squad; Nasty who was in a street gang is a good fighter; and Patreus, who was a monk, is devoted and can also fight. Together they mostly balance out each others' weaknesses.
* The Misfits (Warhammer 40,000) to incite a revolt by exposing the fact that the government has been skimming from the supplement fund and allowing the lower classes to suffer potassium deficiency.
* The Mishina faction (a formerly Japanese megacon now situated on a subterranously terraformed Mercury) from Warzone has Ronin Samurai units (unlike their Bushido Samurai they use assault rifles).
* The Miskatonic and glowing sharklike teeth (the better for eating grilled cheese sandwiches with).
* The mismatched team that draws his chariot in the Roman Empire segments of
* The Misophonic: Complete hatred/repulsion of a certain (or general) sound.
* The Misophonic: Misophonia, or 'sound rage', creates feelings of intense, sometimes even violent anger in those who experience it.
* The Misophonic: This person hates certain sounds because they literally hurt him.
* Them! is probably one of the most well known movies featuring this trope.
* The missed turn at Albuquerque is once again the cause of all the trouble in
* The missiles' engagement range is objectively much smaller, but the fact that they are homing made them the primary long-range weapon in Honorverse. They are, however, limited by their drive endurance — the missile without fuel has no other choice than coast ballistically, and although much more stealthy, is both a sitting duck for
* The missiles used only against Star Destroyers is justified in many novels: missiles are much more expensive than lasers (which use a little fuel), have a huge firepower, and a typical fighter only carries a dozen, so it's ridiculous to use them against fighters, except aces.
* "The Missing Agent" starts with Kaz picking up a distress call in a Resistance code, leading him, Yeager, CB-23 and Synara to visit the planet it's coming from to investigate.
* The Missing Breakdown Train", Ryan takes Judy and Jerome, the breakdown cranes who haven't been called on for emergencies since Rocky's arrival to the Island of Sodor, to Arlesburgh Harbor. After having spent a day there, the cranes decide they don't like seagulls, and their cab roofs are shown covered in seagull droppings.
* "The Missing Coach", Donald and Douglas swap tenders (Donald is No. 9 and Douglas No. 10) to avoid getting discovered by the Fat Controller after Douglas misplaced

Thomas' Special Coach. Unfortunately for the twins, the Fat Controller wasn't fooled and rounds up on Douglas for masquerading Donald's tender.
* the missing element. The element in question (118) does exist as "Ununoctium" though it is radioactive and only lasts for a very short time before decaying. It can only be synthesized with the help of a particle accelerator.
* The Missing - In series 2, the end of an episode ends on Jorn in the present day following a seemingly normal lead into one of the missing girls - turns out he'd accidentally found a prime suspect in the kidnap case. They both realise at the same time that the prospect-kidnapper has been caught out, and the man grabs Jorn in a headlock and grapples him to the ground, before grabbing a powerdrill and drilling Jorn IN THE FACE. It's a very sudden and brutal death that the episode ends on, and the character murdered was a fan favourite and one of the few characters in the show without any unlikable aspects to his personality.
* The Missing: J.J Macfield and the Island of Memories in agony every time she dies. Near the end of the game, she rants about how painful it is to lose a limb in graphic detail.
* The Missing: J.J Macfield and the Island of Memories main character)
* The Missing Link. Debuted in the 1960s in Toronto as Dewey Robertson.
* The Missing Link: Debuted in the 1960s, started the gimmick in 1983.
* The Missing Link had this with Sunshine in World Class and with Dark Journey in Mid-South. They were beautiful valets, he was a face-painted monster.
* The Missing Link: Oh helps a dragon who shoots fire out the wrong end in the obvious manner.
* The Missing Lynx has a Born Unlucky lynx named Felix as its main character. He exploits his bad luck at the end when he faces his human antagonist in a room full of traps, by launching himself onto his enemy's body and holding on, so the antagonist gets injured by all the traps instead.
* The Missing Poster was intended to be used for the first one. What it does is obscure enough (you need to kill yourself in a Sacrifice Room while holding it), and if someone manages to figure out its effects, the Missing Poster would be used to generate a small piece of the Game Over screen. Piecing them all together would give hints on how to unlock
* The Missing Postman, happens to one of the down-to-earth policemen. "Want a sandwich, sir? We've got 476 varieties..." (He offers a brief glance at the huge list on a board) "I'll have cheese".
* The Mission (1999) costs 2.5 million HK dollars, or 320K USD. Most of the money probably goes to the slick black suits worn by the six main characters throughout the movie.
* The missionaries Paul and Silas are locked up in jail when a miracle happens and the jail wall collapses. The guard freaks out that he'll be punished, but then sees that they just stayed in their cell singing hymns.
* The Missionary: A traveling priest who seeks to spread their faith by proselytizing and converting other people.
* The Missionary has successfully made them change their diet. Now they only eat fishermen on Fridays.
* The Missionary Position was asked by the Catholic Church to speak as the "devil's advocate" during the debate for beatifying her.
* The mission debriefing offers one last chance for the PCs to hand each other a death sentence, by bringing up all the evidence of treason they collected earlier and hadn't already presented. It also encourages them to kill each other during the mission to set up a
* The Mission. He spends the next 10 minutes climbing up a waterfall with 50 kg of heavy armor tied to his back. Father Gabriel watches him, decides he has atoned for his sins, and makes him a Jesuit missionary.
* The mission in New York City features Spetsnaz commandos taking over Liberty, Ellis, and Governor's Islands and capturing some U.S. vehicles, including amphibious transports which they use to send reinforcements to Ellis when the Americans move in to rescue the hostages. The U.S. Army Rangers have to stage amphibious assaults of their own to retake the islands.

* The mission is even easier for Tau, whose commander has both long ranged weapons, jet pack and stealth. He can jump over the SM defences and blast the stronghold while remaining hidden from retaliation.
* The Mission, mercenary and slaver Rodrigo Mendoza goes on one of these after he kills his own brother.
* The mission "Operation Cooperation Conspiracy" has you help a Romulan intelligence officer basically kidnap a Vaadwaur ship and send it on a remote-controlled attack to force the Benthans (
* The mission patch for the first test flight (EFT-1) of NASA's Orion spacecraft has a stylized Orion drawing with the word "OR1ON" embossed over it.
* The mission "Skirmish" opens up with one of these between Starfleet, the Klingon Defense Force, and the True Way (
* The Mission Stays the Same. He does his best to function in the environment, but begins having a crisis of faith as he starts adjusting to the norms of the new universe.
* The Mission Stays the Same: Jack blasts an Eclipse merc off the top of a building during the mission to recruit Thane.
* The Mission Stays the Same setting — weapons there are all strictly kinetic in nature. This is particularly significant in light of the resulting prevalence of personal kinetic barriers in combat, which block most physical projectiles but don't do a thing for lasers. Gallardi's standard-issue lasgun tears through the galaxy's best personal defense technology like it simply isn't there, and it's expected that once the technology is reverse-engineered and mass-produced it will revolutionize warfare. Since it can also be scaled more or less indefinitely, this will also lead to laser cannons fit for large ships, which is also very significant in light of the fact that the Reapers possess kinetic barriers that the best cannons in the galaxy can't scratch but which, again, would do nothing against lasers.
* The Mission Stays the Same; they pour their psychic energy into their homeworld's star, causing it to go nova and vaporize most of the invading fleet, along with all remaining traces of the Eldar race.
* The Mission, the locals were given free rein to say whatever they wanted in their own language. Apparently they hardly ever kept to the script and kept throwing out funny non-sequiturs or just cursing up a storm.
* The mission "The Space Armada" in the original SNES game has you flying through a battleship's interior in order to destroy its core. Fortunately, most of Andross' battleships are
* The mission to get honey from Space Bees in the episode "The Sting" would have gone without a hitch, had Leela not seen that baby queen bee and
* The Mississippi Queen Christie Ricci, which is probably a result of her mentor
* The Miss Miltia Beauty Contest is frequently mentioned but is never actually shown in the second
* The Missouri Breaks, Brando threw out all his character's dialogue and improvised instead. He also "re-imagined" his experienced gunfighter character as a flamboyant half-Indian with a cheerful Irish accent and a feathered earring.
* The Missouri Valley Intercollegiate Athletic Association, a league formed in 1907 by Midwestern and Great Plains schools, experienced two decades of conflict along public–private school lines. In 1927, six of the seven state schools left, with
* The Missouri Wrestling Revival, which started in 2008, which doubles as an award show for Midwest USA wrestlers and promotions.
* The Missus and the Ex: A character's ex-significant other meets their current significant other.
* The Missus and the Ex: Funny circumstances happen from a character's current love interest meeting their ex.
* The Missus and the Ex: Your current lover and ex-lover meet each other. Awkwardness may or may not ensue.
* The Mist: After the insane crowd led by the religiously insane villainess stab an unfortunate marine and throw him out the store where the monsters lurk. The last

shot before he is violently dragged away into the mist is him putting his blood-covered hand on the window before whispering "please", leaving the bloody print after he's killed.
* The Mist after the mist descends the group in the grocery store sends a man out with a cord tied to his waist. Something grabs him and tries dragging the line upwards but the group manage to yank it back, covered in blood.
* The mistake he made was refusing to ever break character for so long that most people assumed the Diceman
* the mistakes that made things as bad as they got). Fans instead viewed the moral as "you need to be tactful and have evidence even if you're right, but a claim without tact or evidence should still be heard out as it might have some truth".
* The Mist, although she appears to be going roughly in chronological order.
* The Mist, being a massive cloud of fog filled with a variety of extradimensional horrors.
* The Mist better than that of the original story, and wished he'd thought of it himself. In fact, when he first saw the new ending that Frank Darabont came up with, he personally intervened to get the studio to approve it; they wanted to remain faithful to the more hopeful ending of King's original story.
* The Mister Gutsy robot is an upgraded version of Mister Handy with better armor and a plasma cannon in addition to the standard flamethrower.
* The Mister Mucus and other green blobs of working-class booger people get expelled out of human lungs in a series of Mucinex ads.
* The Mist Has Fallen threatens to do that when the goddess Hecate's disappearance shatters the protection preventing the demigods from being noticed, letting SHIELD and the Avengers aware of several new enhanced people suddenly popping out of nowhere and trying to capture them in order to get some explanation — while the demigods desperately hope to quickly restore the status quo.
* The Mist is used to blur the perception normal people have when witnessing demigod events. For instance, in
* The Mist: Norton and his group of skeptics who leave the store because they don't believe there are any monsters in the mist. Lets back up a step. If the skeptics are right about the mist being natural and stay in the store then the weather will blow over in a few hours to a day or someone will come by looking for the grocery store and update them on the situation. They are on their way after a short delay, at most a major inconvenience, or loss of jobs or other personal commitments. If the other groups are right about the mist and there are monsters outside the best bet for survival is not to go outside to be picked off by monsters. The risk analysis of the situation, however low the probability of lethal monsters, would point to staying in the well stocked grocery store and not wandering off. So of course they choose the 'rational choice' after concluding there are no monsters and immediately decide to leave. Norton tells David right before he leaves that if he's wrong the joke will be on him. Poor decision or not, he is at least willing to admit that much. In the novella, David thinks that Norton is, at some level, committing deliberate suicide. It's worth noting other characters also choose to enter the mist early and end up surviving, and are better-off than those who chose to remain.
* The Mist! One film critic was so bothered by the ending that he spoiled it (with ample warning) in his review to keep people from being blindsided by it.
* The Mist, one of the townsfolk standing on the watch handles his evening meal; the camera shows him and the view out of window which he must guard. We can see a bug silently flying from afar seconds before it actually smashes in the glass and sets everyone (including the viewers) on alert, as we realize that, instead of a normal-sized bug a few inches away, it's a bug the size of a hubcap halfway across the parking lot.
* The Mistress: A relatively long-term lover whose partner is married to someone else.
* The mistresses of Azag-Thot could not stay as they were. Their essences were grafted into three human women and are carried by their bloodlines, always skipping two generations and manifesting in girls. The carriers are easily identified, as

they perfectly resemble their grand-grandmother, but resemble neither parent. The escape clause is imbibing a dose of the Golden Root extract
* The Mistress' Heart-Throbbing Adventure: The Cursed Mansion, once Remilia regains the ability to fly, the jewel on the overhead map will flash and gradually turn red; once it does, you'll be forced into a battle against a Grim Reaper. It is the strongest non-boss enemy in the game, and as such you get an in-game achievement for defeating it. Once you either kill it or exit the room, though, the jewel will reset and repeat the process.
* The Mistress of Flame is solicited as a religious leader whose presence can lead to a valuable ally or dangerous threat. Though by series end she doesn't do anything remotely amoral.
* The Mistress: Often has no relevance to the plot other than being a guy's "side dish" wishing to become the "main course".
* The Mistress of the Night Sky, Hayate, has this kind of relationship with her Belkan Knights, the Wolkenritter, especially with regards to Vita who is
* The Mistress to a nobleman. The nobleman however isn't expecting her to move into his estate until she has her adulthood ceremony at age fifteen, which the age at which people are allowed to get married in the setting.
* The Mistress to her married middle-aged boss Ken, who strings her along and eventually dumps her.
* The Mists of Avalon and Morgaine's interest in him is entirely one-sided.
* The Mists of Avalon appears as a chalice which creates food - whichever food one person likes most.
* The Mists of Avalon are a retelling of Autherian legend from the point of view of the women, including those are generally portrayed as the villains such as Morgain and Nimue.
* The Mists of Avalon, Arthur's solution to this problem is a threesome.
* The Mists of Avalon, killing dogs, pigs and eventually a servant in order to raise enough power to telepathically control people. She mentions that there are alternative methods, but they involve prayer and meditation and take far too long for her liking.
* The Mists of Avalon. Morgaine gets trapped in Faerie and is so under their spell that she only vaguely notices that her horse has turned into a skeleton in what seems like a very short time.
* The Mists of Avalon. Morgaine, on the other hand, gets pregnant with Gwydion (Mordred) the first time she ever has sex.
* The Mists of Avalon sets Morgaine up to sleep with her half-brother Arthur as part of a religious ritual. Neither of them recognized the other until after it was too late, and both were suitably freaked out. Viviane can't see what they're upset about.
* The Mists of Avalon - they were a priest and priestess in their past lives who broke their vows to their Gods, and the Gods cursed them to be constantly reborn into the world with all its sufferings, meeting each other over and over in every incarnation but never reaching enlightenment.
* The Mists of Avalon uses Atlantis as the source of the old pre-Christian British religion, or at least the lore of the priestesses and bards.
* The Mists of Avalon, when Igraine gets into an argument with Gorlois, she rips off the dress and jewels he gave her to protest how he's acting. He ends the argument because he can't continue it while looking at her naked body.
* The Mist something God-awfully horrible out there, someone points out that the entire front side of the building is a row of windows. The next few minutes consists of the hold-outs piling up everything they can to block the windows off, with only a relatively small bit of the tops exposed.
* The Mist takes place in a only a couple of days, even thought it's kind hard to tell the days because of...the mist.
* The Mist, the main character refers to a group of "rationalists" who refuse to accept that something very strange and dangerous is happening out in the eponymous mist as "The Flat Earth Society." The Flat Earth Society is a Real Life group of modern day people who believe that the Earth is in fact flat.

* The Mist (the novella), there is a huge mass of tentacles complete with rows of suckers that cut into human flesh.
* The Mist: The various monsters have a clear food chain, along with eating any humans they come across.
* The Mist. They're really just animals, albeit incredibly aggressive, dangerous, and horrible-looking ones.)
* The Mist, though it's so foggy it's hard to tell, a thick, soupy fog that also hides various monsters.
* The Mist. While some of the smaller varieties of monster are indeed shown pretty clearly, the bigger ones tend to appear in nothing but silhouette.
* The Mitchell and Webb Situation, David Mitchell and Robert Webb discuss a sketch which was intended to parody this kind of mindset by being set in an 'all-natural' abortion clinic, which advocates a more 'earthy' and 'natural' method of abortion as opposed to the too 'clinical' methods available (the alternative methods as described essentially being, in the words of Mitchell, 'drinking a bottle of gin and throwing yourself down the stairs'). They removed it when they realized that the sketch instead made it look as if they thought abortion and miscarriage was itself funny, which wasn't the impression they wanted to give.
* The Mitchell and Webb Situation has a sketch with a farmer acting like everything he did was some sort of black market get-rich-quick scheme.
* The Mitchell and Webb Situation is bewildered by the whole charade. The sketch starts with the host ringing his doorbell and greeting him as if it's the first time they've met. "What do you mean? You've been here over an hour. You've only just gone outside again. I'm miked up!" "So where's the kitchen?" "It's where you set up all those lights."
* The Mitchells vs. the Machines, and it was actually directed by Michael Rianda, who also co-wrote the film.
* The Mitchells vs. the Machines gets tired of mankind taking her for granted, and leads a global electronic attack on humanity.
* The Mitchells vs. the Machines in February 2020, but then the change was reverted in January 2021, and the working title became its final title.
* The Mitchells vs. the Machines, Katie, who is confirmed to be queer by the end of the film, is voiced by bisexual actress Abbi Jacobson.
* The Mitchells vs. the Machines Linda uses a cue card to get Rick to support Katie's plans, but he reads the instructions in parentheses ("Now you talk") as well.
* The Mitchells vs. the Machines, once the robot apocalypse starts, Rick tells his family to remember their survival training, and lists of a long series of NATO letters. They spell out YAFTBTAAA.
* The Mitchells vs. the Machines takes place in late September 2020, as shown through the timestamps on the home video montage.
* The Mitchells vs. the Machines: Takes place primarily in 2020, but the home videos of Rick and a younger Katie are set in 2003, 2005, and 2009 chronologically.
* The Mitchells vs. the Machines: The two malfunctioning robots who end up helping the Mitchells introduce themselves as Eric and Deborahbot 5000.
* The Mitchells vs. the Machines using a potted plant (Rick), a bush (Aaron), a mailbox (Katie) and tied-together sheets of paper/cardboard (Linda).
* The Mitchells vs. the Machines years of uninhibited data collection. He looks the part as well, being a young-ish, casually dressed guy whose HQ is in Silicon Valley.
* Them!). It's also mentioned that the Wastelands created by Zeka tend to include huge, mutated invertebrate lifeforms.
* The Mitsubishi diamonds, which applies to the entire Mitsubishi conglomerate (cars, chemicals, electronics, etc.).
* The Mitsubishi Lancer Evolution X failed to meet sales expectations despite popular demand in automotive media such as video games and television shows, and the company Mitsubishi Motors had to
* The Mitsubishi Pajero SUV is marketed as the Montero or Shogun in some regions, because "Pajero" is slang in some dialects of Spanish for "Wanker." One of these is

Mexican Spanish, hence the "Montero" labeling in the US. Another of those is European Spanish, which is why the sight of imported Pajeros is always accompanied by a chuckle.
* The Mitsubishi Pajero which, despite its name coming from an Argentinian cat, had to have its name changed to Montero in certain countries — you see, "pajero" roughly translates to "wanker" in in certain dialects of Spanish (including Mexican Spanish, which is why the name was changed in the US as well).
* The Mitsuru Adachi series Hiyatari Ryoko received a live action Japanese TV show adaptation in 1982.
* The Mitten arrive and clamber for space in the mitten. Finally a doddering granny grasshopper comes along and blows off their cries of "No room! No room!" by saying, "There's always room for one more!" She nudges in one foot and the mitten goes plooie.
* The Mitten is about a mole who finds a lost mitten and climbs in to keep warm, followed by a rabbit, then a hedgehog, etc etc...
* The Mix despite plugging a 9 year gap of very little activity at all in terms of musical releases.
* The Mixed-Up Life of Brad has chapter names made up of puns that incorporate the name "Brad".
* The Mixed-Up Life of Brad: Marriages like this are rather common among pony nobility. Thanks to the talents of Princess Cadence, who can make ponies fall in (or out) of love as needed, they are happier than human arranged marriages.
* The Mixels have Rokit, who, while much more downplayed than others, thinks
* The mixing of the historical and the futuristic is a reoccurring motif in
* The mix of weapons is actually justified in-universe - soldiers had to supply their own weapons or buy one from the quartermaster. Either way, many would have different types of equipment.
* The Miyuki Nakajima song "Milk 32." "Milk," a guy who works at the bar of the same name that, well, serves milk, is in love with the narrator; however, the narrator only goes to see him when she's just been dumped. One day after being dumped, she comes to visit "Milk," who avoids talking to her and gives her glass after glass of milk to distract her, until finally he leaves. The singer is then left calling for Milk and for her receipt, when she realizes that she actually kind of liked him.
* The Miz, a feud with John Cena where both men (and their women) cut loose on each other with promo-work that wouldn't be out of place in the Attitude Era and a series of Intercontinental title reigns. The Miz, who was seen as a complete joke the previous year, once again became one of the more entertaining parts of WWE television.
* The Miz after he accomplished his dream and became World Champion... as a heel.
* The Miz and immediately gain newfound in-ring competence as he would defeat Miz several times and find himself in almost immediate title contention despite being portrayed as a mere rookie months earlier on NXT.
* The Mizarians, a race that embraces total and absolute pacifism. They've also been conquered by other species
* The Miz declared that he doesn't like Canada, because he doesn't like maple syrup. And he doesn't like maple syrup because it reminds him of Canada.
* The Miz during their time as a tag team. When they were separated in the WWE Draft, one announcer stated "The bromance is over!".
* The Miz has also been known to suit up on occasion, even going so far as to don a 1930s-era waistcoat.
* The Miz. He would mercilessly abuse Cena and the fans week after week, trying to goad the fan favorite into a match, and when Cena finally did take notice when they had been booked for a match Mix nearly wet himself, before being completely dominated. This would occur several more times before Miz's push.
* The Miz, hoping to manipulate him into helping her. Miz sunk the ship at Night of Champions and pretty much told her to go to hell. However in real life the ship is sailing just fine for both of them.
* The Miz includes a chick (read: baby bird) being drawn to a horseshoe red-and-

white magnet, just in case some people didn't get the gist of his gimmick.
* The Miz is an interesting case of getting X-Pac Heat, shaking it off, and then getting it all over again:
* The Miz is willing to hide behind his wife's back to avoid a beating.
* The Miz: Peaked in 2010 when he won his first (and, to date, only) WWE championship. His career faltered for several years afterwards but he found new momentum in 2016.
* The Miz's protege Alex Riley. The fact that he wears a letterman jacket-like vest with "Varsity Villain" on the back really says all you need to know.
* The Miz switching from capri shorts to trunks: Vince McMahon thought he had nice legs that he should show off.
* The Miz. Unlike most times the Money in the Bank is cashed in, Orton actually fought off The Miz pretty well, and many points in the match it looked like Orton would overcome the odds, and the fans cheered when it seemed he would actually pull off the win when he went for the RKO...only for The Miz to counter it into the Skull Crushing Finale for the pin and the title.
* The Miz, who copies everything Miz does, although still technically a heel is over as a face — he went full-on face after the team broke up.
* The Miz, who got humiliated in front of the entire locker room for being shy and not talking to many people.
* The MJ Morning Show leading him to violently die at the end of a couple of his calls.
* The Mk.III Swordfish had a very bulky radar instead of the 18" torpedo the Mk.I had. The slow speed of the Swordfish meant that it could stay aloft for several hours and provide early warning about German submarines long before the lookouts and ASDIC/Sonar/Radar on Allied escort vessels could detect them.
* The MK remix of Nightcrawlers - "Push The Feeling On" chops up the vocals from the original and reassembles them into a
* The MLB has starting pitcher Jon Lester. He's a three-time World Series winner, four-time All-Star, and a perennial Cy Young candidate. Only
* the MLB team. The Cardinals football teams were often referred to as the "Football Cardinals" to avoid confusion. They moved to Arizona in 1988, then off to California, being replaced in the '90's by the Rams, from Los Angeles. The St. Louis Rams left in 2015, going back to LA, and becoming the LA Rams again.
* The MLP and Starfleet ponies being able to reconstruct a planet through the power of belief
* The MLP Dreamscape becomes Rainbow Dash's "student" in order to learn how to fly and take care of his wings. Rainbow's not happy about it at first, but Baron eventually succeeds.
* The MLP fanfiction series from 'MasterofNintendo' seems to like this trope, particularly where the OC Rick is concerned. At first, he was FAR from willing to change his insane and chaotic ways, but after a whole season living with Twilight Sparkle, he began to warm up to the place. It's when Discord corrupts Twi does Rick make a
* The MLP Loops (also, her attempt at imitating Applejack's accent is eye-wateringly awful). It turns out Applejack hasn't even been incapacitated, and had actually told Starlight not to even bother trying.
* The MLP Loops. Applejack had already stopped her before Twilight even caught up to her. Another has her replace Pinkie Pie, and when "caught" admits replacing Pinkie Pie was the entire plan.
* The MLP Loops: As with the trope namer, Loop 56.1 features a parody and subversion of this — the Mane Six and Celestia sneak through Canterlot Castle to retrieve the Elements from the vault they're in; they, Luna (who is elsewhere in the castle) and the guards all sing the song as they're doing so, but the guards make no effort to stop them, which Celestia guesses is due to the narrative causality of the Heartsong.
* The MLP Loops. Examples include "Hard Truth" (Applejack becomes obsessed with the entire country growing apples), "Danger Dash" (Rainbow Dash performs more and more pranks), "Party Pink" (Pinkie Pie won't stop throwing parties), "Flying Hatred"

(Fluttershy suffers dangerous mood swings due to a curse), and "The Fashionista" (Rarity invades griffin lands in an attempt to open up more markets for her dresses). Big Mac is the only known alicorn who managed to avoid this fate on his first run, but then he hadn't actually ascended.
* The MLP Loops he became the Hulk (and isn't Looping, making him unable to distinguish between Banner and anyone Replacing him in the Loop), warns Mac with "Don't even think for a moment that I'll let you marry my daughter." This being Mac (who is notoriously not interested in romance when Awake at this point) and not Banner, Ross's warning doesn't bother him in the slightest.
* The MLP Loops in baseline, wins with "official planting-stick sharpness tester." It's such an obsolete farming tool that not even the proud farmer Applejack knows what they are.
* The MLP Loops" in her sleep. Twilight, her mother this Loop, just blinks in surprise and wonders what Ivory was dreaming about to make her say that.
* The MLP Loops intending to arrest him or announcing an intent to interrogate him - she just wanted to lighten the mood and reassure Sci-Twi that she wasn't going to be in trouble for her actions.
* The MLP Loops of the loops means Apple Bloom has some extra souls she can pay with.
* The MLP Loops plastered, and when they wake up they find they stole the Elements of Harmony and banished the entirety of Equestria to the moon.
* The MLP Loops respectful to the loopers, who they know are infinitely older and more powerful than any of them.
* The MLP Loops. Such as the Smooze, where Pinkie's only response is to run.
* The MLP Loops: Suspected to be the case, but ultimately averted, in Loop 194.5 - before they Awoke, Celestia had promised a six-year-old Twilight that she would officiate Twilight's eventual wedding when she was ready, but had said it in a manner that sounded like she was proposing. They clear up the misunderstanding after both are Awake. Twilight herself notes that she considers such a relationship odd, since she normally views Celestia as a second mother to her.
* The MLP Loops that is centuries old at least and has been worshiped as a goddess by an entire species. Twilight kills her in seconds in a process described as plucking the wings off a fly.
* The MLP Loops, the Imperials notice a space station intercepting them. Darth Vader, who Awoke just moments before, finds it amusing to reverse the line.
* The MLP Loops, thus throwing both Celestia and Luna into a tizzy as they tried to decipher his plans.
* The MLP Loops time, spending several years in a dedicated relationship for the duration of the loop is basically a one night stand by their standards. To contrast, Rainbow Dash won't even start a relationship that would last less than a few loops, and several couples date for hundreds of years before they're considered serious.
* The MLP Loops to justify him being an adult and old enough to marry. When Diamond Tiara is part of the Elements one loop, she uses the big initial blast as a cover.
* The MLP Loops Twilight and Shining. No one is happy with them when they wake up.
* The MLP Loops" (with lyrics suitably modified). Celestia suspects this trope is why the guards, despite some of them even joining in the Heartsong, don't seem to notice anything happening - the song says they're unnoticed, so they are.
* them making peace with each other and Red finally welcoming Piper and Alex to her family group. so their renewed relationship with each other and their "family" gives them strength.
* The Mmmmmmmmmporpg has a monumental chin. He's more of an antagonist, but he's certainly manly
* The MMM was very much a planned tactic of Soviet Maritime Aviation in a
* The MMO followup has plenty of these as well, especially once the Eternal Empire arrives on the scene.
* The MMO The Secret World has "Time Tombs" as part of the Egyptian Storyline. That being said, you can only take what you're wearing or carrying with you back and forth in time, and the Tomb itself only allows to go back as far as when it was

first created. Any changes you happened to make are also subject to the laws of equivalent exchange, thus, if you planned to steal some sort of ancient artifact, it would have to be replaced by something of equal weight (usually a convincing forgery), and then hidden somewhere that hopefully no one else in history would find it. It is also notable that the Time Tomb only creates a "bubble" of area that can travelled back to, thus you're limited to affecting the timeline within roughly a half-kilometer of it.
* The mobat is basically a dire bat, only smart, with a spike on its tail.
* The Mob Boss Is Scarier: A crime lord who's very well-feared by other criminals.
* The Mob Boss Is Scarier: The head honcho of the gang is feared and respected for a good reason.
* The Mob Doctor, a patient comes into the emergency room and then has an apparent heart attack. The doctor is trying to explain what happened to the man's pregnant wife. She insists on seeing her husband's body. The body is still in the trauma room so they take the wife there. Then the husband wakes up and wants to know what is going on and why his wife is crying. The man apparently has a very rare condition where his heart can stop for a few minutes and then start beating again. The rest of the episode the doctors try to determined what caused the condition and how to stop it from occurring again since the next time the man might not wake up. Also they do not want to be know as the doctors who had the same patient die on them twice in a day.
* The Mob Doctor is an example from the 2012 Fall Lineup: 13 Episodes ordered for September, Cut at the end of its initial run in January.
* The mobile app "Play Wild" is free to download and does not feature membership in any form, but still requires the player to
* The Mobile Defense Platform has the Propulsion Systems. If it loses all of its 10 HP, the Platform (which is
* The mobile messenger app WhatsApp does not use usernames, instead requiring the user to add another user's phone number to their contacts list in order to IM them. The app description touts the lack of usernames as a feature, stating that it means the user doesn't need to add users by username since in-app friends are automatically synchronized with the user's contacts. However, this means you can't add other users without either giving away your own phone number or asking for other users' numbers, and some users may not be comfortable giving away their phone number for a variety of privacy-related reasons, at least compared to a proprietary username. Competing apps like LINE and KakaoTalk have usernames, but also allow contact syncing.
* The Mobile Police/New Files be headed towards actually becoming a couple, but still leaves it up in the air.
* The mobile version of Madden 12 has a mechanic that makes an open receiver on a go route virtually impossible to tackle if you're playing man coverage. It can be especially annoying if your opponent keeps throwing 80 touchdown passes.
* The "Mobile Warfare" doctrine is a Cannons, focusing on superpowering armored and mechanized units, while giving infantry units more organization and breakthrough so they can attack for longer. You can choose whether you want to spec for tanks or motorized/mechanized infantry. The second branch allows the you either to continue developing blitzkrieg doctrine, or increase your manpower pool in case you're losing a late-game war like the real life Volkssturm militia. Germany always starts with this doctrine.
* The Mobius 5000", one of Robotnik's Race-Bots is Scorpion, a robot who stings his enemies with his scorpion tail.
* The Mobius Chronicles. The higher in rank Amadeus gets the more ass kicking he does, also the Overlander second in command is one of their most talented fighters.
* The Mobius Squadron, alias "the Ribbons" (officially: 118th Tactical Fighter Wing), and their arch-nemesis the Yellow Squadron, alias Aquila Squadron (officially: 156th Tactical Fighter Wing), in
* The mob wives are all expected to be good cooks, but Carmela Soprano's cooking seems to be legendary in-universe.
* The mock band Spinal Tap became a real band (performed by the actors from the

movie), and have released three albums, toured the world and performed on multiple television shows. Sometimes their support band was The Folksmen, the spoof folk band, played by the same actors, who appeared in the film
* The Mockbuster (following a hit film and trying to trick people into thinking it's that film)
* The Mockery Bird, Kingy, the native king of a tropical island, occasionally suggests that they should reintroduce cannibalism to the island, just to make his advisers cringe from the idea.
* The Mockery Bird: The eponymous bird was worshiped as a god by the natives of the small tropical island Zenkali until it was hunted to extinction by the colonizers. The book's protagonists discover that a small population of these birds are still around in a valley which the colonizers intend to destroy to build a power plant for the island's airport.
* The Mockery Bird to such an extent that he talks about its preferred kind of music, and a significant researcher spends his entire time running around telling anyone with influence how important his findings are but never actually explaining them to anyone. The list goes on.
* The mockery is taken further with Darth Vader's castle on Vjun. Private Helms
* The model familiar to us from middle eastern mythology (and later the Bible) didn't have edges you could sail off of, the dome of the metal (or sometimes crystal) sky just met the ground at the edges. Everything outside the dome was made of water.
* The model for the Bloodstoker of the Bloodbound Warhordes has his barbed Torture Blade inserted into the ragged stump of his right wrist.
* The model for the Lab Assistant enemies in the first game was listed in the original game's code as obj_ass ("ass" being short for "assistant"). After the developers realized this, they thought it was funny and decided to give them even more profane model names in the next game's code, like obj_asshole and obj_motherfucker.
* The model railway hobby and the plastic kit modelling hobby overlap in many ways, but kits and accessories aimed at each camp show differing priorities. The modeller is often fired by the challenge inherent in making the model and accepts complexity. The railway modeller tends to be looking for kits with the minimum need for assembly, and ideally, pre-assembled pre-painted pieces that can be slotted into a layout with little additional work. Therefore modellers can be dismissive of railway modelling because of the simplicity or pre-built nature of its set pieces.
* The models almost universally follow the historical hammer design, with a spike on one end and a short, narrow blunt head on the other. Some hammers vary in design; for example, the iron, orcish, and daedric versions' blunt ends feature small spikes on the hammerhead, presumably to help punch through armor. The dwarven warhammer is blunt on both ends. The elven warhammer's blunt end is hooked slightly, resembling a hawk's beak (all the elven gear has a bird motif to it) and looks like it could be used to hook and pull. And Volendrung just looks like anything you hit with it is just going to have the worst day
* the Modern Age version, which didn't use it, he brought it with him; suddenly, everyone was peppering their dialogue with "florg"s and "zork"s and "scrag"s.
* The modern Ankh-Morpork post office declares that neither sleet nor snow nor gloom of night shall stay these messengers about their business, with its own "don't arsk us about" list. Mrs. Cake appears twice.
* The modern cinematic universe trend seems to have slowly revealed an issue of this trope. Given that the model that made the
* The modern counterpart of the armored knight is of course the battle tank. Early tanks did not have the armor to resist much more than machine-gun fire, but that alone made them useful complements to bomber teams and light machine-gunners when assaulting enemy strongpoints — the 'defence in depth' doctrine having made 'trench lines' obsolete by the time tanks saw minor use in 1917 (after one experimental use 1916). In 1917–18, the sight of rifle and machine-gun fire glancing harmlessly off a pair of tanks as they lay waste to enemy pillboxes and redoubts was common — at least until the Germans started putting artillery

pieces into pillboxes and redoubts. From then until now, no long-lived (outside of peacetime) tanker has
* The modern Cybermen, as well as their original incarnations from the '60s, speak in a constant and unchanging monotone. That's the
* The modern day rendition of the Steelers, Led by "The Killer B's",
* The modern equivalent of this is technology made in China (specifically Hong Kong), where for a long time, products were made so cheaply, with such poor attention to detail, that many Westerners would outright avoid Chinese Manufacturers. This was unfair, as there are good manufacturers in China — it's just the best workers have worked for Western companies over there due to them being most profitable. The image is starting to improve, with such technology as Huawei phones being popular worldwide, and the low price points being a selling point.
* The modern gimmicky plant extract health trend means that chlorophyll is still used in some cult beauty products bragging about their plant credentials. It gives the green colour to MOA's Green Balm (a coconut oil-based moisturiser marketed as a multipurpose "healing balm") and LUSH's Mask of Magnaminty, and gives supposed anti-aging properties in Asian beauty products like The Saem's Natural-Tox Green Grape sheet mask and Lu Ming Tang's Elixir de Vie eye cream.
* The modern Gregorian calendar is based on the ancient Roman calendar, which had its own quirks at the time. First, its original version only had ten months, with January and February not really kept track of and just called "winter days" (this is why, for instance, October is the tenth month of the modern year despite the word literally meaning the "eighth month"). Second, years were traditionally reckoned by the reigns of the rulers in question. In the Republican era and early empire, years were named for the two consuls (there was a joke that the year
* The modern interpretations of Iris West (former Lois Lane Expy) is this to Barry Allen (the Flash II), who is nerdy and awkward. She initially only uses him as her source within the CCPD, but does grow fond of him. In a realistic nod, she's also depicted as a caffeine addict.
* The Modern Jazz Quartet always performed in tuxedos or (at worst) nice suits.
* The modern logo itself is also quite distinguishable, even though the
* The Modern Parents to persuade a local warlord to stop hunting endangered mountain goats. Malcolm has prepared a speech that is supposed to go along these lines: "You should be happy to let the mountain goats breed in peace," "You and your men should not upset the natural balance of the soil," or "If you are irresponsible now, your children will inherit a twisted and barren environment." However, after translating it into Kaftanistani, it comes out as:
* The modern production of a Kabuki play based on the legend of Okiku (the ghost story that inspired
* The modern successor to the anti-tank rifle is usually some variation on a shoulder-fired missile, of which the most famous are the
* The modern T-formation appeared in 1939. In 1940 Stanford won the Rose Bowl using it, and the Chicago Bears won the NFL championship (73-0, still the most lospsided GAME in NFL history). Within 10 years only one pro and a handful of Colleges were still running the single-wing.
* The modern timeline also has Jax and Johnny Cage as these, despite how much Cage annoys Jax. This also extends to the Special Forces junior team, where Cassie and Jacqui are Smash Sisters to Takeda and Kung Jin's Bash Brothers.
* The modern Transhumanists hold the opinion that if you do get bored eventually, then you are free to
* The modern version of the Chameleon uses this. He studies, kidnaps and murders his victims before spending a day living that person's life. Quite a violent upgrade for a guy who used to simply
* The modern version of the last entry is that people apparently always walk around, even if actively hunting somebody or in battle, with their guns effectively unloaded. They will then apply the up-to-date
* "The Modest Revolution"" is based on a woman who, after some horrible couple years climbed the highest peak on each continent. In her 60's.

* The mod "Freak Fortress" pits the entire team against one of these, which can vary from
* The Mod Gorilla Boss: He's one hip swinger, Clyde, and you'd better believe that he's the big man behind the criminal underworld in Bludhaven. And that he thinks vertical stripes are cool.
* The mod has an unusual example in that while the revolver (A Taurus Tracker 455) is not especially powerful, being chambered in .45 ACP, it is one of the most practical weapons in the game, being loud enough not to attract a large number of zombies.
* The Modifyers: As Xero's robot sidekick, Mole is designed to with the ability to shapeshift in order to suit any of her needs. Including changing into a knapsack for her to stash items in.
* The Modifyers until the Rat spoils it by falling into one of the pipes and getting stuck into it.
* The modrons, clockwork beings from Mechanus, the Plane of Law in the
* The mods have also extended to the creation of fanmade cooperative 'campaigns' in which players work together, each one flying a mission in sequence, to accomplish an objective; the frequent 'Orbiter Forum Space Station' campaigns are an archetypical example.
* The Mod Squad, first aired in 1968. The titular cops were famously billed as "one white, one black, one blonde."
* The Mod Squad: "The Comeback" reveals that Linc was an old friend of a boxer named "Candy" Joe Collins (played by real-life boxer "Sugar" Ray Robinson) who is trying to mount a comeback to win back his son's respect. (Unbeknownst to him, the boy's troubles actually have to do with gamblers he owes money to.)
* The module features a cursed gem that purports to grant wishes; when the wish is made, it will do an exact opposite or otherwise turn the wish against you (given example: when asked to bring somebody back from the dead, it'll instead destroy his remains, or even kill somebody else), AND then it explodes, burning everybody in the vicinity to death.
* The module "Harlequin" refuses to stat the title elf, and explicitly calls this out as the reason. (Great Dragons, meanwhile, avoid the Postulate not by not having stats, but by having a mechanic in their stats that allows them to say
* The Mogu once ruled most of Pandaria before they were overthrown, leaving behind two enormous palace complexes, the Serpent's Spine(a massive wall spanning Pandaria from north to south), and countless statues scattered across the continent. Having largely descended into barbarism, they made a failed attempt to regain power during
* The Mogu. They believe that they are superior to other races in Pandaria. Leading to abuses such as sending slaves to be fodder, destroying their cultural heritage, to even
* the Mojave Chapter of the Brotherhood of Steel, the Enclave Remnants can all become this to the NCR, Securitrons, or Caesar's Legion during the climax of the game.
* the Mojave Experiment, which led consumers to believe they were trying a new (and amazing) operating system called Mojave. Lo and behold, it was just the much-reviled Windows Vista OS. This one gets some credit though, because the people obviously know they're being filmed beforehand and their reactions seem fairly realistic.
* The Mokole (were-lizards who used to be were-dinosaurs) are specifically referred to as the "Memory of Gaia" and all of them have access to genetic memory dating back as far as the dinos (and their OLD other halves, a humanoid dino race that died out during the mass extinction). They can access the memories of either side of their lineage, regardless of whether those were the memories of Mokole individuals to begin with. These guys REMEMBER their ancestors guiding the evolution of mammals to produce something humanoid in order to replace their extinct other form (their bestial dino-side forms just kept evolving with other lizards, but they never used the old humanoid form anymore out of respect and grief).
* The Molasses Gang, they were able to do it for six years because nobody took them

seriously.
* The Molasses Swamp, which causes anyone who lands on it to lose a turn.
* The Moldy Peaches song "Anyone Else But You" is an INCREDIBLY silly love duet including references to the Konami Code and shaking turds out of pants.
* The Mole about what he knows it will be impossible to prevent scandal. He gets a lethal overdose of the sedative they've been using as a DIY truth serum, and they stage a car crash. (Those British Intelligence connections keep an autopsy from being performed.)
* The Mole accidentally hooks the hose up to the fire truck's gas tank, causing gasoline to spurt out and the fire gets even worse. Justified, though, given his blindness.
* The Mole: A cover agent who infiltrates the opposing organization by pretending to be on their side.
* The Mole and helped the Cartel abduct key witness Jessica Stone because they owned his gambling debts.
* The Mole, and the whole thing was an act to gain the Winchesters' (particularly Sam's) trust.
* The Mole became this when it returned to ABC in the summer of 2008 in its original format.
* The Mole before the villain kills the last remaining members of the group.
* The Molecular Binding Force Generator reinforces materials several times over their normal strength (it might be only with some specially-made materials, but it's not clarified).
* The Molecule Man, at least until he discovers his full potential. For example, in the
* The Mole, culminating in a memorable rant as Austin tries to get it out of his system.
* The Mole during the Mole's first appearance takes place in the Mole's system of tunnels which are filling with water; first from melting snow and then from a burst water main.
* The Mole Evelyn Salt to regain control of the command bunker and issue a stand-down order.
* The Mole fell victim to cancellation at the end of Season 5 after ABC's marketing department did so little to promote the show that even many die-hard fans were completely unaware that the show had returned for the first third of the season.
* The Mole for the Legion of Super-Villains) discreetly turns on a device that changes the power of several Legionnaires with Superboy getting Bouncing Boy's power. In another issue, a group of Legionnaires have their powers randomly switched to disorient them, with Bouncing Bow and Ultra Boy swapping powers. In both situations, the two Legionnaires turn bloated and spherical.
* The Mole from the beginning, whereas a character making a Face Heel Turn was a genuine good guy until their change of heart.
* The Mole from Tinker Tailor Soldier Spy, especially because they know he bugged the Circus before he was caught.
* The Mole had a "Save the Mole" campaign in 2008, after ABC said halfway through the 5th season that they won't renew the show for a 6th season unless the ratings improved for the second half of the season. They sent in "lemonheads" (not the candy, but actual lemons with faces painted on them, after Paul's unofficial mascot for the season.) So far, the show has not been declared canceled, nor has it been renewed for a 6th season.
* The Mole has a pretty strong metagame, to go along with the challenges the team competes in (and the Mole tries to sabotage). Naturally, part of the metagame is to sabotage a little yourself, to make everyone else suspicious of you. But also important is tracking everyone else's suspects so that if someone gets booted, you can figure that whoever he/she was suspecting is probably innocent. Finally, gathering as much information as you can on the other players - even the ones you don't originally think is the Mole - will help you in case you do need to move to a new suspect.
* The Mole. He still doesn't fit in with the others after that duty is fulfilled

though...
* The Mole. In "A Closer Look", he claimed that he was going to use his "gay-dar" to sniff out the titular saboteur.
* The Mole in order to help bring the villain down). Launchpad reminds him that Darkwing once informed Gosalyn that she was grounded until her senior year of high school.
* The Mole. In the end, since neither side trusted him any more, they embraced this trope, making him essentially a glorified messenger boy.
* The Mole, in the second season, he comes back and does a proper job of it.
* The Mole in the Vandenreich. Fans had theorized this the moment he was revealed to have joined them.
* The Mole: In "Tick Tock Boom", the contestants had one hour to solve a puzzle that would tell them how to defuse a time bomb. Successfully defusing the time bomb would add $50,000 to the pot; if it blew up, nothing would be added. This came down to cutting the correct (purple) wire, of the bunch of wires of various colors leading into the bulletproof glass box containing the bomb. It is unknown what would've happened if the players had cut the wrong wire.
* The Mole is generally liked better by the viewers than the first season due to an increase in cast size (fourteen players over ten players), a more or less superior cast, and host Anderson Cooper opening up and becoming more friendly and relatable than how he was shown during Season One.
* The Mole kills with pre-rigged death traps, even figuring out who it is won't guarantee safety: the traps will still be lethal.
* The mole made a burrow inside the Borough of Manhattan (the digging animal, not
* The Mole, one challenge had the host ask each contestant a series of questions starting with "Do you want to know who the Mole is?" While the contestants were answering these questions, the Mole casually strolled past them in plain sight with their face completely uncovered. All the contestants had to do to find out the Mole's identity was to turn their heads slightly to the left, but they were all so busy focusing on the board with the questions that not a single one of them did.
* The Mole. Only due to good word of mouth and a loyal fan base was the show not completely crushed.
* The Mole, or else Fabian, his godson, could be harmed. Then Jerome found out he stole the gem Jerome had spent all season finding, and sure enough, also ended up blackmailing Jasper to force him to help get the gem back.
* The Mole People, about a subterranean albino Sumerian race who disbelieved in the surface world.
* "The Mole People". He falls off trying to cut a slice for Mike and screams all the way down, for a full seventeen seconds.
* The Mole People itself uses stock footage of an avalanche to further its plot, which Mike and the bots also comment on.
* The Mole People: Life in the Tunnels Beneath New York City is listed as non-fiction (and its Dewey Decimal and Library of Congress classifications both place it in "Social Science" rather than "Fiction") and was released amid fanfare that it was an "expose" of the living conditions of the homeless living in abandoned and forgotten tunnels of New York City.
* The Mole People that's been chugging along on its own just fine before these big dumb white guys showed up, and promptly inadvertently bring out its catastrophic end.
* The Mole People the characters reference the existence of a "Flood Layer", referring to the theory by Biblical geologists that there exists a geological layer formed as a result of the world-wide flood from Noah's story. Even at the time of the movie this theory had been rejected by the majority of geologists, though it has persisted to the modern day as part of Creationism.
* The Mole see stuff like that, though admittedly these are all security matters and not hired mercenary missions.
* The Mole, she tends to shake down the patrons for information rather than slay them, as they're too smart to attack her. She even lets Spike live after he's chipped by the aforementioned Initiative and can't harm humans, although he's still

evil, because he's physically helpless.
* The Mole. Soon after that realization, Gajeel himself, unaware of the conversation, sneezes.
* The Mole still gave Terra a hero's funeral and statue in their memorial hall.
* The Mole that automatically ranks up during the story, and because they're the one party member who never got much attention in pre-release marketing.
* The Mole, the Manchurian Candidate, or anyone else under the influence of the Big Bad.
* The Mole: the man in question turned up at the Circus with not enough information about the unfolding Operation Testify crisis for him to have got it from the radio report, but too much to have overheard it from a phone conversation.
* The Mole, the person playing the Mole purposely does badly at things at which they are highly skilled.
* The Mole: The villain has an underling infiltrate the good guys by pretending to be one of them.
* The Mole. Thought the show the contestants are faced with several challenges which, if completed successfully, earn money that goes to a global pot. However, as the name indicates, one of the contestants is a Mole hired by the producers to make sure they win as little money as possible. Contestants are eliminated via a quiz at the end of each episode that asks several bits of biographical information about the Mole: the person who gets the least amount of questions right is eliminated.
* The Mole, three of the four contestants have to spend one night in a creepy room. One room is a glass box filled with cockroaches and harsh light, the second is a completely dark room with a python slithering around, and the last(and worst) is a completely normal room where the song "Tiny Bubbles" by Don Ho plays over and over in different iterations(sometimes very slowly, sometimes speeded up, sometimes backwards, etc.)
* The Mole tries to crash the system and erase the file...only for Chloe to get it back. Since we hadn't yet hit the halfway point of the season, there has to be more...and there is, as the previews have a very confusing montage of people running, another terrorist attack and President Taylor almost(?) getting killed. Sorry, Jack, but it's only six p.m... what did you expect?
* The Mole until Monokuma outed her and could very well still be working with Monokuma now in an attempt to catch them off-guard.
* The Mole, when CARDINAL, an agent who provided intel about Red October, is blown and needs to be rescued along with his handlers.
* The Mole Who Knew it was None of his Business, as the titular animal questions everyone from beetles to birds to horses to find out who accidentally did their "business" on his head. Surprisingly, for a picture book about poop it restrains from vulgarity and is pretty damn funny. Now available in a "plop-up" edition.
* The Molly Maguires, about a secret society of Irish-American coal miners in 1870s Pennsylvania.
* The "Molotov cocktail across the engine grate" version is averted by the US M1 Abrams Main Battle Tank. The engine runs hotter than a Molotov can burn. This does make it a beautiful target for anyone with even the most rudimentary thermal-imaging equipment, however; win some, lose some. Luckily, the Abrams is also tough enough to survive hits there -
* The Molotov Cocktail was devised as an anti-tank weapon by Guomindang troops fighting the Japanese the
* The Molten Man uses such disguises to commit robberies in the classic
* The Molten Man was a pretty tough villain for Spidey, but when he reformed he was often at the receiving end of beatings from Harry Osborn during his more villainous days (they were brothers-in-law). These beatings were pretty one-sided, defying Molten Man's past showings.
* the Moment could end the universe if they chose to do so, using technology they already possess.
* "The Moment I Knew" opens with the singer fantasize about how happy she would be when her lover shows up as an event important to her. However, as the song goes on, she realizes that her lover won't show up and the title is referred to her knowing

her lover won't show up and that they are not right for her.
* the moment is killed by the kid they were looking after waking up and happily shouting at them, "Smooch!"
* The moment Lily is revealed to have been adopted, many viewers correctly guessed her birth mother was one of the witches from the original film, with Nancy being a top contender.
* The Moment, one of the "ultimate weapon[s] of mass destruction" and final work of the ancient inhabitants of Gallifrey, is specifically mentioned as "the galaxy eater" and is how The Doctor originally ended the Time War.
* The moment that the dark version of Josie, Dark Josie, first appeared, a lot of fans took to shipping this version with Hope. They like to forget that Dark Josie tried to repeatedly kill her or that Hope hates this version. The main reasons seem to be that Hope refuses to let anyone kill her, due to that still being Josie, and the fact that Dark Josie is very flirtatious with everyone. The fact that it's popular to ship the good half of Josie with Hope also helps.
* The moment when Doc Brown is gunned down by the Libyan terrorists,
* The moment when everyone killed by the Gauntlet returns (as well as Constantine working with Nebula to perform a ritual that restores Gamora to her body), leaving the heroes to tear through Thanos's forces.
* The moment Yara sees her uncle Euron Greyjoy at the Kingsmoot, she immediately realizes that he killed her father and openly accuses him of this.
* : The mom of the titular kids' face is never seen. If the video does show the area where her face is (like if it's focusing on Aiko if the mom is carrying her), it's usually censored.
* The Monado Even when being wielded by Shulk, the blade is quite large, and the Monado Buster attack makes the blade extend to a truly ridiculous length for the duration of a single strike.
* The Monado gives Shulk visions of the future. Throughout the game's story, Shulk uses these visions to try and avert disaster. This translates into a gameplay mechanic, as well: during battle, Shulk can have visions of an enemy inflicting catastrophic damage on himself or one of his allies. He is given several seconds to avert this possible future, either by redirecting the enemy's aggro, healing and buffing his teammates, inflicting status ailments on the enemy that can lessen the damage or stall the enemy, or kill the enemy and
* The Monado has existed since the beginning of the universe millions of years ago.
* The Monado is meant in-story to not be able to harm biologic, sentient life. When some enemies that fit the description are found, the Monado is only able to deal
* The Mona Lisa you have to be an impossible thief to even touch the thing.
* The Monarch and his Deaths-Head Panoply. Subverted in that it isn't actually powered. It's just a solid, unmoving suit that fires missiles and rockets about. He can't even move his arms. However, this is due to design flaws that haven't been worked out yet.
* The Monarch briefly employed Black Guards, who appear much more menacing than his regular henchmen (but
* The Monarch considers Dr. Venture his mortal arch-enemy and embarks on several attempts to kill him and his sons for no particular reason. Through most of the first season, the Ventures repeatedly undercut the Monarch's claims to be their most hated foe. By the end of the second season, however, their status as nemeses has become much more solidified, though Dr. Venture still doesn't really care for him.
* The Monarch had a trap in his lair which consisted of releasing a horde of "man-eating butterflies"... except he forgot to feed them, so Brock just had several hundred dead butterflies dumped on his head. The Monarch then berates his henchmen for the mistake.
* The Monarch has sex with one of Dr. Venture's robots (its "face" was a monitor with Dr. Venture's face).
* The Monarchies of God plays this very straight. The landmass looks similar to

Europe and there is a huge, undiscovered continent to the west of the ocean.
* The Monarch is at a monitor watching Dr. Girlfriend seduce Rusty and absently starts fondling himself, breaking off abruptly when a henchman wanders through for a glass of juice.
* The monarch is having so much fun with their paramour that they neglect their duties of ruling and governance, possibly creating a power vacuum for an
* The Monarch teaches a lesson to a treacherous minion by putting him into a shark tank. However, since he'd previously replaced the guy's blood with acid, the sharks won't touch him. So... "Lower the giant HAIR DRYER!!!"
* The Monarch tries an elaborate smoke-out after "trashing" the Venture compound. He shoots a sizeable puff of smoke with his wrist launcher, grabs Dr. Girlfriend, and they are whisked away on a grappling hook... where they hang for several hours, until everyone else leaves.
* The Monarch tries this again in the season four finale when he "crashes" the Venture Brothers' Prom. He gives some speech and smokes out both him and Dr. Mrs.The Monarch and the two are seen still standing on the stage when the smoke clears at which point they just walk away.
* The Monarch was raised by a flock of butterflies in the Pine Barrens.
* The Mon Calamari (Admiral Ackbar's race) had cruise ships used for their lucrative tourism industry. However, the Empire's increasingly oppressive policies pushed them into retrofitting these ships into massive capital ships for the rebel alliance.
* The Mondasian Cybermen, when compared to their modern day counterparts, should be
* The Mondoshawans ("Monduchivans" in the language originally spoken by Leeloo) from
* them ones, especially if they came from an institution they hadn't heard of. Americans kept using Spanish coins until the Civil War, when the U.S. government — needing a way to actually fund the war effort — established a standardized U.S. currency that's the predecessor to the modern greenback.
* The Money in the Bank briefcase in WWE. Regardless of who gets it, they almost always use it to cheat to gain the belt and become heels in the process. This was taken to its logical extreme during the Authority's reign of terror, when it was used three times to get a champion on their side.
* The Moneypenny Diaries novels and short stories by Samantha Weinberg (writing as Kate Westbrook) chronicle the life and times of MI6 mainstay and James Bond flirting partner Jane Moneypenny.
* The Money Pit' character is able to buy the house for a song from a lady whose husband turns out to have been Hitler's pool boy and had escaped to South America about three steps ahead of the Nazi hunters.
* The Money Pit is both a sterling example of this trope, and one of the funniest parts in the movie.
* "The Money Shift". common that car mechanics can identify a driver's behaviour solely based on the wear-and-tear on the gears.
* The Money Stairs. Dealing with Donald and Scrooge competing to see whether there are some things that Scrooge's money can't accomplish, it ends with Donald waking up and telling his nephews that he realized it was a dream after Scrooge offered to buy him a soda. In retrospect, the events being a dream make sense, as the story features Scrooge being fairly carefree with spending his money to beat Donald. One panel survives from an aborted non-dream ending that Barks drew at first but scrapped—he went with the dream ending because the "money stairs" of the title, a mountain-size stairway built out of coins, seemed too impossible to be real.
* The Money Tree, a short film about a tree that grows money and originated from a dollar bill planted in the ground.
* The money wasn't just sitting in a bank, but being loaned out at interest to worthy craftsmen. While in theory the bank does this with the money in a savings account, the interest on the loans accumulated directly to the account, rather than mostly being taken as profit by the bank.

* "The Money", where the Wattersons being broke causes the show's animation to downgrade, including the show turning into bad CG, them running through the episode's storyboard, and eventually become sticky notes. The characters are fully aware that this happening.
* The Mongfishes aren't much better. Case in point: Lucrezia and her sister Serpentina. Then the rest of their clan trying to subvert Lucrezia's minions and hijack her scheme — not because they disagree about the whole
* The Mongolian Connection. The man meets with Tenzin, another Mafiya man and, as it turns out, Serik's buddy. The transmitter is located in a rigged-up transistor radio. Unfortunately for the good guys the faulty transmitter starts broadcasting what Tenzin is saying rather than pop music off the radio. A bloody fiasco ensues in which the informant is killed and Tenzin escapes.
* The Mongolian Death Worm is often said to be capable of shooting electric volts that can kill livestock. Most scientists (and even some cryptozoologists) cast doubt on this ability, however.
* the Mongols and the Crusaders to fight the mutual threat of Islamic nations were discussed but never materialized.
* The Mongol shamans' practice of boiling drinking water to drive away "evil spirits."
* The Mongols have done this a lot to others: they conquered China, decimated Persia, ravaged Russia, and nearly conquered Europe. For Russians especially, the Mongol attack on
* The Mongols were actually one of the major forces that prompted this to really become as discredited as it became and diplomatic immunity as respected as it did in the Medieval world, since their response was always,
* The Mongols were also quite fond of this as a form of psychological warfare.
* The Mongols were renowned in ancient times for their aversion of this trope; they believed very strongly in Diplomatic Immunity for both sides of the equation, and if they called you out to negotiate that was all they were going to do (for today). The Mongol Empire ended up destroying one of its neighboring civilizations utterly for mistreating a messenger.
* The Mongols were very fond of this trope and often employed tactics like feigned retreats in the midst of a full-scale battle. At the Battle of Mohi, the Mongols left an obvious gap in their encirclement to encourage the beaten Hungarian army to flee for safety, rather than grimly accept fate and fight to the death. In the end, the Mongols ended up herding the Hungarian army into a swamp and picked them off at will over the course of two days.
* The mongoose can be seen as this to the weasel: both are long-bodied small predators adapted to chasing small prey down their burrows. However, they belong to completely different branches of the carnivoran family tree: while weasels are more closely related to dogs, mongooses are more closely related to
* The Monitors has benevolent aliens ruling the Earth, "opposed" by various misfit rebels.
* the Monitor shows up to call in Oliver's deal. Oliver needs to come with him to help save the universe, and he will inevitably die during the coming Crisis. Oliver tearfully says goodbye to Felicity and their infant daughter.
* The Monitor (this page was not included when DC printed the arc in trade paperback).
* The Monk: Ambrosio and Matilda, who resort to murder, black magic, and, for Matilda, selling her soul to the Devil.
* The Monk and the narrator even acknowledges that the amount of temptation he experienced would have been nigh-impossible for any other man to resist too. Once Ambrosio crosses that line, however, it becomes increasingly easier for Matilda to convince him to do more and more sinful acts until he's raping and killing innocent women entirely of his own volition.
* The Monk And The Viking Floki explains that his father died because he refused to have his sword hand amputated after an infection grew gangrenous.
* The Monk And The Viking has Brother Aiden who is reluctant but will fight if he has to. After Brother Aiden's return to Ireland and his relationship with Floki is

revealed his fellow monks become violent.
* The Monk And The Viking is a historical gay romance series about a monk and a viking who fall in love after the viking is part of a raid on a monastery.
* The Monk, an early Golden Age villain, later brought back in the Bronze Age, is completely bald. Oh, and he's a vampire.
* The Monk, Antonia is so unused to life in the city that she doesn't know her custom of wearing a veil in public is considered old-fashioned.
* The Monk, but cathedrals, monasteries, and nunneries take the cake for places of of incredible terror and torture.
* The Monk character class from various editions uses magically potent martial arts. Details vary by edition, but 3.5 Monks have a rather eclectic collection of abilities including moving fast, surviving crazy falls, dodging fireballs, immunity to diseases and poisons, resistance to magic, teleportation, turning ethereal, speaking with any creature with a language, killing people with a touch and ceasing to age. Various prestige classes provide alternative specializations and flavor.
* The Monk, claiming to have dressed as a man and entered the monastery to be close to Ambrosio, and even later when she starts seeking his love in return. He gives in to his growing attraction and starts a relationship with her. She seems to get bored of him about as fast as he gets bored with her, though.
* The Monkees, after Davy, Micky, Mike and Peter get sucked into the giant vacuum, they notice that Davy is missing. The other three do this to see if they can find Davy in the hole they came out of.
* The Monkees album in 1969, helping to pave the way for the popularity of synthesizers in pop music.
* The Monkees) and a top 20 hit single ("That Was Then, This Is Now").
* The Monkees, and it's now 1987. A group of random hairdryers suddenly melts the ice away, freeing the threesome from their frozen state. The newly unfrozen Monkees (strangely 20 years older) then venture off and romp into the "totally 80’s" world, while still believing it is the 1960’s.
* The Monkees, and would have to be released with an alternate title. So, they called it "Alternate Title."
* The Monkees by making the Top 20. Not too may songs of theirs are that hard. Also worthy of mention is the schizophrenic "Alternate Title", aka "Randy Scouse Git", which Mickey Dolenz wrote after watching "Til Death Do Us Part" on TV.
* The Monkees, Davy's grandfather is flying in from England for a visit, under the impression that Davy is a big star. Panicked, Davy convinces the rest of the band to pose as his chauffer, houseboy, and personal chef to keep up appearances. Of course, given what show we're talking about, it fails, but the grandfather allows him to stay (rather than taking him back to England) because he has "such loyal friends".
* The Monkees did an episode where Davy's grandfather from England paid a visit. Davy had told him how rich and successful he was, so the rest of the guys pretended to be his servants (Micky was his chauffeur, Mike was his cook and Peter was his houseboy).
* The Monkees due to their artificially composed nature, yet they're also known for gaining a lot of respect from both musicians and music critics.
* The Monkees earlier in the film. His monologue closes with: "But then... why should I speak, since I know nothing?"
* The Monkees ending by cutting to Micky winning big at a slot machine.
* The Monkees episode "Dance, Monkee, Dance" showed Micky going backstage to ask the writers of the show (portrayed as a group of ancient, bearded Asian men) to solve the problem the band was facing. He subsequently throws out the new script, complaining, "Man, this is terrible; those guys are really overpaid."
* The Monkees episode "Don't Look a Gift Horse in the Mouth", Davy Jones must win a horse race in order for a young boy to be able to keep his beloved horse. Jones was a jockey prior to becoming an entertainer (and after, actually, as he still holds the record as the oldest amateur rider to ever win a graded UK stakes race.)
* The Monkees episode Hillbilly Honeymoon involves a shotgun wedding with Davy and Ella Mae.

* The Monkees episode "Monkees A La Carte", the Monkees, in an effort to save their favorite Italian restaurant and other Italian restaurants from being taken over by mobster Fuselli and a syndicate he has just met for the first time, disguise themselves as "The Purple Flower Gang" and "Monkee" with their plans, unintentionally causing the syndicate to get into a gunfight. Despite Micky's best efforts to break up the fight, the syndicate (including Fuselli's thug Rocco) shoots each other dead, but Fuselli is the only survivor... or is he? Stuttering gangster Benny the Book uses his last bit of strength to shoot Fuselli dead before succumbing to his own wound.
* The Monkees episode "Monkees Chow Mein", Davy and Mike are dressed as superheroes and use insults as their "weapon":
* The Monkees episode "Royal Flush" has Davy rescuing the princess of Harmonica from drowning, only to find her uncle, Archduke Otto, is trying to assassinate her before she becomes queen. The trope is played with when he spells the name of the country on the phone, there's a pause and he exclaims "There is so!"
* The Monkees episode "Success Story", while pretending to be rich and successful, Davy is served rubber food while his grandfather gets the real stuff. Also, the fruit in the center of the table is plastic.
* The Monkees episode "The Chaperone", Davy tries to date the daughter of a military man, but has a difficult time finding time alone with her because he runs his household like a barracks.
* The Monkees episode "The Chaperone" when Micky had to be disguised as a woman to fool some guy. Although the disguise was comically unconvincing to the viewers, the target male's first enraptured view of "her" was in obvious soft-focus.
* The Monkees episode "The Devil and Peter Tork". When Peter unwittingly sells his soul to Mr. Zero for the ability to play the harp, the band challenges whether the contract is valid. The Monkees' beach pad becomes a bizarre underworld courtroom, where Hanging Judge Roy Bean presides with a jury consisting of 12 condemned men from Devil's Island. All of the witnesses Zero summons are also damned souls: Billy the Kid, Blackbeard, and Attila the Hun.
* The Monkees episode "The Monkees in Texas". Mike visits his aunt in the Lone Star State and meets his cousin Lucy, whom he has not seen in years and of course is now gorgeous. He marvels over how the knock-kneed girl with bad teeth he used to hang around with is now a beautiful swan until his aunt informs him that he is confusing Lucy with his other cousin, Clara, who still looks the same.
* The Monkees episode "The Picture Frame" has three band members robbing a bank after being tricked into thinking they're making a movie. When the police present them with the film from the surveillance cameras as evidence, they treat it as an actual movie, complete with popcorn and being critical about their performance.
* The Monkees episode "The Spy Who Came In From the Cool", there is a secret exit from the pawn shop through a harp case. Micky jokes that he thought it was through the accordion.
* The Monkees got rid of their laugh track in the middle of their 2nd (and final) season, and the non-laugh track episodes have such a different feel it almost seems like they're part of a different show.
* The Monkees got started; although all four members of the band were musicians to start with, the band itself was created purely for television, only becoming a reality when they broke free of the control of producer Don Kirschner after studio executives noted more people were buying their albums than watching the show itself.
* The Monkees had them under fire from a pack of rustic, gun-wielding maniacs. They do indeed throw the kitchen sink at the Monkees... or rather, they wheel over a sink with a lit stick of dynamite on it. One Monkee responds by turning on the faucet of the sink (which still works, somehow) to drown the dynamite.
* The Monkees has one of the fake arrows through his head in a few romps.
* The Monkees ("Here Come The Monkees") was filmed in 1965. It is very different from the later episodes. In it, the band has a manager played by Bing Russell (Kurt Russell's father), Davy Jones plays a guitar (which is bigger than he is!), the band wears yellow shirts and brown vests as stage costumes, Micky Dolenz is

credited as Micky Braddock (his childhood stage name), etc. When the series got picked up, it was edited and aired as the tenth episode! As an added bonus, Davy and Mike Nesmith's audition tapes were tacked on to the end of the episode.
* The Monkees impersonation. It was invariable "You dirty rat, you killed my brother!" which Cagney never said on film.
* The Monkees included Micky Dolenz (George Michael Dolenz) and Mike Nesmith (Robert Michael Nesmith), though ironically, both go by their middle name.
* The Monkees: In "Monstrous Monkee Mash" a vampire's niece uses a necklace to seduce three of the four Monkees, all of whom have the exact same response of freezing in place and wonder.
* The Monkees in "Monstrous Monkee Mash" when the episode's villain intrudes on a fantasy scene that Micky and Davy are having. "Hey, what are you doing? This is our fantasy scene!"
* The Monkees in one episode, smashing a piano to pieces with a sledgehammer as a performance piece.
* The Monkees, in the Don Kirshner era, spun between bubblegum pop, proto-punk, Mike Nesmith's country-rock, and novelty songs. After overthrowing Kirshner, they added folk rock, psychedelic rock, Broadway-flavored tunes, Latin influences, and hints of R&B to the roulette wheel, removing some of the bubblegum and almost all of the novelty stuff in the process. Michael Nesmith's solo career incorporated at various times: country-rock, big band, straight country, straight rock, samba and tango, new wave, tropical music,....
* The Monkees in the rock music press, and the band wanting to market it outside of their bubblegum audience, this is understandable (although the group had nothing to do with the campaign, and Peter Tork later called the ad "so avant-garde as to be positively repulsive").
* The Monkees: In the second episode, while listening to a last will and testament on a phonograph record, one guest is shocked that he didn't inherit anything and the record promptly tells him to shut up.
* The Monkees in which Micky gets in a bit of trouble due to looking absolutely identical to a dangerous gangster wanted by the police.
* The Monkees is superior (KFC secured the merchandising license for the Warner Bros character catalog back then, so they're smug about it).
* The Monkees Micky and Mike, confronted with a mummy, berate it for being dirty and smelly. The mummy retires discomfited. (Note that despite his bravado, Micky is actually terrified.)
* The Monkees: Micky Dolenz and Peter Tork directed episodes. Dolenz later had some success as a TV director in Britain.
* The Monkees, Micky is staggering through a desert, nearly delirious - he finds a Coke machine out there, drops in a coin...and nothing comes out. As he pounds on it screaming maniacally, the Coke jingle plays merrily on the soundtrack.
* The Monkees, Peter winds up with a pie thrown in his face (while riding a cow, of all things) towards the end of the movie.
* The Monkees: "Seven days in a week made to choose from /But only one is right for me..."
* The Monkees' song "Magnolia Simms" is recorded in the style of an old 78 record. Towards the end, the song gets "stuck" and there's a record scratch as it resumes.
* The Monkees, songs from earlier albums in the "romp" sequences were sometimes replaced by tracks from their then-recent albums.
* The Monkees tended to fall in love with a different woman in almost every episode. There were even a couple of episodes where he'd fall in love with two different women, one at the beginning and another by the end.
* The Monkees. The bartender slides Micky a bottle, but he fails to catch it, and then asks the bartender to sling him a sponge.
* The Monkees: The episode "The Devil vs. Peter Tork" uses Roy Bean as the judge for the trial, and explicitly calls him this.
* The Monkees, the four boys have fallen in love with the same girl and want to get away from the apartment to go see her. Micky suddenly declares that his aunt is ill and leaves. Mike announces he is going to the store to get dog food. When informed

that they don't have a dog, he says that he'll pick up a dog too while he's out. Davy announces a desire to become a boxer and leaves immediately to start doing road work. Peter, who has believed every excuse, isn't sure what to do now that he's all alone, and decides without a hint of irony that he'll go visit the girl.
* The Monkees, the gang finds a monkey's paw, only to get in trouble through careless wishing. They ultimately break the paw's curse by giving it to someone else. Said man wishes for a million dollars, and is arrested by the IRS for not reporting this income less than a minute later.
* The Monkees: The group was not only allowed, but encouraged to improvise, and gaps were often left in the script to facilitate this, especially where Micky Dolenz was concerned.
* The Monkees "The Monkees' Paw" episode, after Micky finishes talking with their union agent:
* The Monkees. The show also helped pioneer the music video and popularized the Moog synthesizer through Micky Dolenz's use of it in the promotional clip for "Daily Nightly".
* The Monkees. They fought with swords and somehow lost them, they continued fighting with daggers, and then Harold said, "You know, I'm really a non-violent sort." Peter replied, "That's very refreshing," and they put away their daggers and arm-wrestled.
* The Monkees toured together. Apparently, the thinking behind this was that the Monkees were trying to increase their cool cred, while Hendrix was trying to get more mainstream popularity. Needless to say, the tour did not go well, mainly because the audiences were primarily made up of screaming young girls.
* The Monkees' TV show, Micky Dolenz invents the game of "Creebage" for much the same reason as Kirk invented Fizzbin: to distract a captor and allow for a quick escape.
* The Monkees used this as a common gag. Paraphrased from one episode:
* The Monkees were on a British interview program just before their 2011 reunion tour kicked off. When asked why they were getting back together again, Peter Tork looked directly into the camera and (jokingly and literally) rubbed his fingers together..
* The Monkees, were played by Micky Dolenz, Davy Jones, Peter Tork, and Michael Nesmith.
* The Monkees were quite capable of singing in close harmony, as demonstrated in an episode that aired around Christmas where they sang an acapella version of the Spanish carol
* The Monkees when the four boys were fighting over a girl. The show played with it, noting that each would have access to only one particular vital part of the apartment. Davy's side had the front door, implying he was the only one with the ability to come and go; however, he "would gladly trade Mike for the bathroom right away". Moments later, the whole arrangement is quickly forgotten when a show comes on TV that they want to see and everyone rushes to Peter's side (which contains the television set).
* The Monkey D. Haru Series, it's revealed that the reason why the Wizarding World knew Harry Potter was alive during his ten-year long disappearance is because Haru used his Portal-Portal powers to send a picture of himself back in time to Dumbledore.
* The Monkey Goes West-zhang the monk, Sun Wukong and their comrades continuing their journey to India.
* The Monkey King, never make an indestructible door without an indestructible wall around it.
* The Monkey King's petrification nearly 500 years ago is at the center of the plot of
* The Monkey King, whose sense of humor ranges from absurd concepts like
* The monkeys are smart enough to learn how to drive a car and to fire guns.
* The "monkeys" most often mentioned in terms of sex studies are the Bonobo apes. They use sex as recreation and it is not limited to same-gender pairing. They've also exhibited rudimentary fetishes.

* The Monkey's Paw After wishing for 200 pounds to pay some bills, a messenger brings news that Herbert had been caught in the machinery of the factory where he works — his body was so badly mangled that he could only be identified by his clothes. His gruesome death has the company award the family the 200 pounds out of sympathy.
* The Monkey's Paw comes back, because just as the mother is about to open the door and let their "son" in, her husband uses the third and final wish to undo the second one and she finds nothing and no-one there.
* The Monkey's Paw, the first wish is for two hundred pounds. Just to show how old this trope is, the characters in this story were aware of it and more worried one of them was going to be killed by the money falling from the sky in change and beaning them on the head. However, it is instead received via the eldest son dying in a horrible accident at work and the corporation giving them a settlement out of pity (because this story was written in an age where lawsuits for this kind of thing were unheard of). It gets worse: The mother is so distraught she forces her husband to wish the son alive again — but she didn't specify what shape she wanted him back in. It turns out his fatal accident had horribly mutilated him, and they hear a knock on the door. We never do find out just what shape the son is in, because when the mother goes to answer the door, the father rushes back in order to make his final wish, which is presumably to wish the son dead and back in his grave, because when the mother opens the door, no one is there. Though some versions have him as a literal zombie, growling and scratching at the door.
* The Monkey's Paw The narrator unwishes the resurrection before the mother can open the door and see it.
* The Monkey's Paw" The thing was created purely to cause suffering. It's pure evil.
* The Monkey's Paw was the one and only horror story by a fellow who mostly wrote about sailors.
* The Monkey Suit": Flanders can't stomach the idea of a museum teaching the world that humanity evolved from monkeys. His horrified reactions to the displays in the Hall of Man — and worse, a unisex bathroom — are played with horror music for comedic effect.
* The Monkey Suit in 1981 established that teaching creationism in schools is against the Constitution, so it should have been easy for Lisa to force the issue, though you do hear about states like Kansas trying to replace evolution with creationism and considering how everyone in Springfield is backwards and anti-intellectual (they once tried to burn Principal Skinner at the stake because of his claims that the Earth revolves around the sun), the writers probably thought it would be best just to forget that piece of Supreme Court history.
* "The Monkey Suit" parodied this. After Bart tries to have Milhouse stand in for Lisa (by
* The Monkey's Uncle where school genius Tommy Kirk kept a chimp in his home as an experiment.
* The Monkeys You Ordered cartoons with completely literal punchlines.
* The Monkeys You Ordered with their captions replaced by straightforward literal descriptions.
* The Monkey Treatment. A fat guy who's tried every diet inadvertently signs up for the monkey treatment, in which an invisible magic monkey sits on his back and snatches away all his food before he can eat it. At first, this works great. But then he realizes that for every pound he loses, the monkey gains one, and as it grows bigger its power and malevolence increase as well.
* The Monk has a technique called Exploding Palm - enemies struck by this explode when killed by DOT.
* The Monk, his first novel written at the age of nineteen. It even gave him the nickname "Monk" Lewis.
* The Monk in exchange for being freed from his prison cell before his execution. The Devil flies away with him but smugly points out that Ambrosio didn't think to ask for any protection other than to be taken away from his cell and drops Ambrosio from a great height that shatters his bones and leaves him at the mercy of vultures

that painfully devour his body.
* The Monk is actually Matilda and Ambrosio is her object of affections.
* The Monk is not a vampire, but an agent of Satan who helps the title monk into damnation through her seductive powers.
* The Monk. Luckily for the reader and for Antonia, Ambrosio's entrance interrupts.
* The monk, Maz Koshia is at the end, and looks like any of the other inanimate mummified monks, giving the typical speech once Link reaches the end of a shrine. But then he starts moving
* The Monk, particularly if you read her character as deliberately leading Ambrosio astray rather than merely being tempting.
* The Monk's Occult Impaction skill likewise deals higher damage to targets with high defense.
* The monk special ability Abundant Step (essentially acts as a casting of Dimension Door) seems to be specifically invoking this trope.
* The Monk wasn't enough, Ambrosio later learns she is his much younger sister.
* The Monk, when Ambrosio finds out that his protege Rosario is actually a woman named Matilda who's in love with him, he plans to send her away until she tears open her robes and threatens to stab herself if he doesn't let her stay. The sight of her naked breast underneath her torn robes causes Ambrosio to become inflamed with lust for her and lose his drive to send her away.
* The Monk. When it turns out that purity can indeed be corrupted, he turns petulant and spiteful. And violent.
* The Monk, who quickly soon reveals himself to be a woman named Matilda.
* The monobikes from the OVA are also this: while their manga counterpart are one-tonne warbikes designed by the army specifically as weapons, the OVA monobikes are civilian models modified with missiles and
* The Monokuma Kubs died pretty unpleasant deaths as well, but the standouts are
* the Monokuma message from the beginning of the series is a recording. This completely fails to explain why Monokuma was clearly able to respond to the charcters.
* The Monolith Monsters features growing towers of crystals that fall and shatter; anyone exposed to their shards begins to turn to stone. What makes it worse is that the crystalline stones expand and even explode when coming in contact with water.
* The Monolith popularized the image of a monolith in science fiction stories.
* The Monoliths themselves are often described as having a dimensional ratio of 1:4:9 (1, 2, and 3 multiplied by themselves). Dave Bowman heavily implies that the progression continues into dimensions that humans cannot perceive, and also that every Monolith encountered is actually the
* The monologue in Buck Henry's first episode featured a list of people who turned down hosting, such as The Two Stooges, Chastity Bono, and Gentle Ben. At the end, they show a list of people they're trying to host an episode, including members of the King family, The Chicago Seven, and Bert Parks.
* The Monona Rag blog reports that the Governor of Wisconsin is not only changing all foreign language classes to 'Talking Slowly' classes but that the new curriculum also includes expressive hand gestures and sprinklings of vaguely foreign words and authentic names such as Paddy, Paco, Limey and Frog, perhaps as a compromise. Having mastered the basics, they might continue in advanced classes of 'Nodding Condescendingly' and 'Swearing in Exasperation'.
* The Monroe comic had a chapter with this plot. In it, everyone is happier and better off without Monroe; even the guardian angel admits absolutely everything is better for everybody. In the end, Monroe decides to continue living, because "misery loves company."
* The Monroe Republic: New England, the Mid-Atlantic and Great Lakes areas as well as the Canadian Maritime Provinces and Quebec south of the St. Lawrence River
* The Monstars (also known as The Nerdlucks) the secondary antagonists of
* The Monstars' anthem soundtrack opens with the line "Greetings, earthlings. We have now taken over your radio".
* The Monster & The Girl created by a mad alien god. The implication is that it's all super-science.

* The Monster & The Girl. If not for her big hair and high heels, she'd be barely half his height.
* The Monster & The Girl: Kenrick almost always favors big words and says almost everything in a long-winded manner
* The Monster & The Girl: the Bright and Glorious Empire of One Hundred Galaxies
* The Monster & The Girl was originally named this as a working title; the author considered other names, but decided in the end to use the working title.
* The Monster an expansionist alien race arrives on Earth to find everyone long dead. They study human artifacts and use their tech to revive some humans from their remains. One or two they end up killing afterwards, after they prove to be dangerous (apparently, humans have developed certain superpowers, including teleportation). They learn that humanity was destroyed by an "atomic storm" that passed through the Solar System. One of the revived humans manages to flee and proves to be impossible to kill. Deciding that sending a warning or traveling home would reveal to the human their tech and planet location, they choose to fly their ship into the sun. Moments before the end, one of the aliens realizes that the human has already learned all he needs, including revival and FTL tech, as well as the location of their planet. He's too late to stop the ship.
* The monster Baragon is some sort of ancient dinosaur-thing that has somehow managed to escape extinction by living underground in its initial appearance in
* The Monster Baru Cormorant, Iraji (an athletic but not exceptionally strong young man) sneaks up behind an assassin trying to kill Baru, grabs her head, and breaks her neck, only for the text to immediately clarify that it's impossible to break someone's neck with your bare hands like that, and what Iraji actually did was give her neck a very painful twist. Iraji follows up by breaking her arm with an iron club, which is what really incapacitates her.
* The Monster Bed, the narrator warns the reader against the Withering Wood, claiming that an assortment of fearsome creatures live there (gnomes, trolls, fairies, pixies, and Dennis and his mother).
* The Monster Bed: When her son panics about the possibility of humans crawling under his bed, Dennis' mother tells him that humans are fictional creatures. At the end, the narrator tells the reader to avoid the Withering Wood, or they might meet Dennis' mother, who would tell them they don't exist.
* The Monster Blood from the eponymous book is a jar of weird green substance that looks like children's slime toys, but has very creepy magical properties.
* The monster called the Bulette, better known as the "land shark", is an aggressive predator that burrows through the soil, complete with fin cutting through the surface of the
* The monster carries Caroline this way when he carries her back to Victor's lab in
* The Monster Club, an adaptation of several of his short stories, to be a disappointment. In particular, he felt that John Carradine was too old to play the film's fictional incarnation of Chetwynd-Hayes.
* The Monster Club, and the unnamed innkeeper who appears to be the acting leader of the ghouls.
* The Monster Club features a little village just off the main road in pleasant English countryside, which has been ruled by ghouls since Puritan times.
* The Monster Club: George has his girlfriend Angela seduce Raven in order to steal his money.
* The Monster Club, interbreeding between vampires, werewolves and ghouls is how you get a "shadmock" like the one in the movie. Additional examples are named (raddies, maddies, shaddies, mocks), but not shown.
* The Monster Club, which impresses the patrons so much that Eramus' human guest is declared an honorary monster and club member.
* The monster Dandelo has the ability to tell jokes that induce literally killing laughter in his victims.
* The Monster does kill him, though. Far future human can brush off blaster fire, stop nuclear explosions and teleport to extrasolar planets. It is never mentioned

if humans deliberately upgraded their genetics or there was some other reason they improved so much.
* The Monster From Earth's End (1966). An airplane returns from Antarctica with plant samples, the pilot killing himself as soon as he lands. The plants soon grow into killer monsters.
* The Monster Girl Encyclopedia revolves entirely around this trope (
* The Monster Girl Encyclopedia. The victim will get his or her mind filled with obscene imaginary from possessing ghost. The ghost will get spirit energy by absorb it from a male host (or during female host's sex act), until it's enough to manifest herself in physical world, then she will engage in sex act directly.
* The Monster Hunters is an outright parody of vintage horror. Its genuinely frightening moments are few and far between.
* The Monster Hunters named Suki. Impressively for an audio medium, she pulls this off without ever speaking a word.
* The Monster Hunters Roy will keep going for as long as he can until someone shuts him down. On defeating a vampire:
* The Monster in the Dark is obviously as dumb as toast, Except that
* The Monster in the Dark is this in two directions simultaneously. Firstly, it was
* The Monster in the Darkness also has incredible Damage Reduction, to the point that he
* The Monster in the Darkness fits into this role for Xykon's organization. He's the closet
* The Monster in the Darkness is eating popcorn while watching Durkon have sex with Hilgya.
* The Monster in the Darkness started out as an incompetent sidekick to Xykon and Redcloak. It was
* The monster is only worried about the dumb character's brain, or other characters
* The monster Kamakyuri attempts an ambush by crashing down through the ceiling of Saitama's apartment. He begins to introduce himself, but is killed instantly by an irritated Saitama (who can win every battle with a single punch), who demands he pay for the damage.
* The Monster: Kathy finds a carpenter's hammer in the ambulance for some reason, so she gives it to Lizzy to defend herself with.
* The Monster Maker, Dr. Markoff decides that Maxine has to die after she accidentally learns the true nature of his evil scheme, as she is now the only one to know both his plan and his true identity.
* The Monster Maker, Dr. Markoff is really an imposter, with the real Dr. Markoff having died in Europe and the current Dr. Markoff having stolen his identity to escape to America.
* The Monster Maker, Dr. Markoff is trying to call his assistant Maxine on the intercom when Lawrence bursts into the office. Markoff forgets to switch off the intercom, and Maxine hears the entire angry confrontation between the two which spells out all of Markoff's evil scheme.
* The Monster Maker, Dr. Markoff's obsession with Patricia stems from the fact that she is a dead ringer for his late wife (seen only on photograph, where it is the same actress with a different hairstyle).
* The Monster Maker, Lawrence escapes the bed he has been strapped by ripping his restraints out where they are attached to the floor.
* The Monster Maker: Lawrence's face becomes hideously distorted by the acromegaly Dr. Markoff infects him with. Acromegaly causes distortion of the extremities (hands, feet, and face), and the version created by Markoff causes to Lawrence to advance in a week to a state that would normally take two years of the disease's progression. Glimpsing her father's face in a darkened room causes Patricia to scream and faint.
* The Monster Maker, Steve, Dr, Markoff's hulking orderly, fills this role for Dr. Markoff; doing all of the physical dirty work that needs to be done.
* The Monster Maker to murder Maxine, and starts growling at him as soon as he

approaches the cage. Markoff eventually banishes him from the room.
* "The Monster Mash" by Bobby "Boris" Pickett. It even describes it within the song itself, noting that Dracula was upset, wondering "Whatever happened to my Translyvania Twist?" As the song explains - "It's now the Mash! It's now the Monster Mash. It caught on in a flash..."
* The Monster Mash, Pinkie Pie keeps Rarity supplied with blood to drink. Rarity concludes that she doesn't want to know where Pinkie is getting it from.
* The Monster Men, Bulan and Virginia met when he rescues her from the title monsters.
* The Monster Of Elendhaven: Johann, the titular monster, is a monster that looks like a tall, lanky human. He only has the drive to kill and his submission and lover for Florian as motivators. He can't be killed, as he will just resurrect soon after, and people, with few exceptions, will forget about him as soon as he leaves their sight.
* The Monster Of Elendhaven, making them glow with an unnatural light. This is a physical effect as well; overused, it can scald and scar the sorcerer.
* The Monster Of Elendhaven that is totally in love and subservient to him. Their love for each other is genuine and they're even attracted to each other's evil deeds.
* The Monster of Glamis, a deformed child supposedly born to the Bowes-Lyon family and bricked up in Glamis Castle. The most common version of the myth is that he was
* The Monster Of Partridge Creek, but came out before the trope itself became established.
* "The Monster of Phineas-n-Ferbenstein" The platypus monster Phineastein created fills the screen as he runs out of the castle chasing Dr. Jekyll Doofenshmirtz.
* The Monster of Piedras Blancas initially just shows glimpses of its title monster, and when its face is finally shown, it is inexplicably vomiting water at the same time.
* The Monster Raving Loony Party has purposely misspelled "Education" in their suggestions (2) page for their manifesto.
* The monsters appear mostly naked as well. In one of the bonus features, Dave Jaffe explains that he wanted the monsters to be like wild animals, which meant making them naked. The gorgons got to spend the whole game topless, but they weren't able to keep the penis they modeled for the cyclops (Jaffe remarked: "Poor cyclops").
* The monsters must be impersonal "forces of nature" — as in, like the
* The monster sniffs and says that the dumb character's brain is not a big meal, or
* The Monster Society of Evil, where it nearly happens a couple of times. Mister Mind tries firing giant shells at America and Russia from a ten-mile Big Bertha, then in another chapter, he tries to blow the Earth in half using explosives set up by tiny Americans living underground in case the war went badly for America.
* The Monster Squad: A mummy was one of the monsters in league with Count Dracula.
* The Monster Squad, and other kids-go-on-an-adventure movies of the era.
* The Monster Squad attempts to subvert this, but it actually comes across fairly straight. The neighborhood kids are all afraid of the "Scary German Guy" and suspect that he's a Nazi. It turns out that he's a kindly Jewish Holocaust survivor. So... all Germans are Nazis except the Jewish ones.
* The Monster Squad goes into detail on how the film built its following over the years.
* The Monster Squad. He gets taken out rather easily when he unravels (admittedly, this happened while he was impressively clinging to the back of a speeding car to get at the passengers).
* The Monster Squad, he's finally finished off when Rudy, the oldest of the titular group, uses a silver bullet to kill him.
* The Monster Squad, one of the protagonists crafts silver bullets but neglects to bring a gun. Rudy, the oldest of the Squad, eventually has to use a gun from a fallen cop to deliver the fatal bullet to the Wolf Man.
* The Monster Squad spit-take after finding a naked photo of Patrick's sister among

the photos on the Monster Squad's camera.
* The Monster Squad succeeds in banishing Dracula and the other monsters into Limbo.
* The Monster Squad, who gets bullied by E.J. in the beginning of the film.
* The monsters tend to somehow be more two-dimensional in the CGI than in the handmade drawings.
* The Monster That Challenged the World go swimming in the moonlight, and they soon disappear beneath the surface.
* The Monster Under the Bed) clan has the ability to enter our world through the shadow under people's beds, and they're in a sort of friendly rivalry with the (all-male) clan who enter reality through children's closets. They collect fear energy, but love energy is way more powerful-but also more dangerous to collect.
* The Monster Under the Bed, where the titular monsters' tails are erogenous zones equivalent to human lips; twining tails together is equivalent to kissing for them.
* "The Monster Who Came to Bikini Bottom": the scene where the monster smashes people's houses uses obvious 3D models of SpongeBob's pineapple and Patrick's rock.
* The Monstrance of Celestial Portion is a variant on the concept. If a deathknight is killed, his Exaltation — the part that makes him an Exalt — returns to the Monstrance, from which it can be transferred to a new mortal host chosen by the deathknight's master. Without the Monstrance, the shard would wander freely and choose its new host itself. Destroying the Monstrance won't kill the deathknight, but instead free him from his master's control; the trick is that not all of them
* The monstrous dream larva in uses this ability to be every one of its enemies' worst nightmares at once.
* The Monstrous Duke's Adopted Daughter household is an exercise in futility, she pointedly doesn't put up with their crap anymore, relatives or servants, and starts pushing back. At this point, the entire household does everything in their power to mark her as evil, or crazy, or both.
* The Monstrous Duke's Adopted Daughter to take her back. Not really getting how to talk to children, however, Sairaine describes the incident as a "f*cking massacre", prompting Leslie to ask what a f*cking massacre is and getting Sairaine thrown out of the room. It's later revealed this isn't the first time this sort of thing has happened, as the eldest Salvator son, Bethrion, did the same thing as a child... in front of royalty.
* The monstrous swamp-creatures called silurids have only one female per ten males, and so females form the center of their communes, rearing their broods whilst the males bring them food and defend them against attack.
* The monstrous Tyranids were damaged as normal by fire attacks, but could continue moving and attacking. In fact, several models (particularly those who were
* The monstrous villain Chemo was created this way. Originally it was a plastic vessel used by scientist Ramsey Norton to dispose of the chemical by-products from his failed experiments, built in the shape of a man to remind him of his failures. One day (ironically, the day he planned to empty it) he dumped the remnants of a failed growth formula in the vessel, accidentally causing it to double in size and coming to life. After killing Norton and destroying the lab, it lumbered forth with no purpose but to destroy, fighting numerous heroes, including the
* The montage in the first episode of Season 3 features Abby wearing a white and gold dress at the same time as Ilana wearing a blue and black dress, referencing the meme from early 2015.
* The Montana Vigilantes tracked ruffians, robbers and desperados in the 1860's and 1870's Montana. Their symbol was "3-7-77", which they painted on the tents and houses of known troublemakers and which is still used today by the Montana Highway Patrol, which elected to put this symbol on their uniform patch on 1956.
* The Montante, a two-handed sword almost as tall as a man, also called the Spanish/Hispanic/Iberian Montante was the Spanish BFS, deeply feared in the battlefield at a time when Spain was the dominating world power and, despite its enormous size, wielded with great agility. A textbook example of the use of the Montante was when employed by a lone warrior to defend a small position against

several attackers.
* The Montenegrins in particular are especially infamous for this. It even has its own name:
* The Monterey Bay Aquarium in Monterey, CA has the Coral Reef Kingdom in the Splash Zone & Penguins area. Within the soft safe zone with padded flooring, children under 34" tall can bounce on the waterbed.
* The Monterey Bay Aquarium Research Institute was featured prominently in
* The Montreal Canadiens crossed this threshold while down 5-2 in Chicago with over nine minutes remaining in the final game of the 1969-70 NHL season, because the New York Rangers had scored 9 goals against a tired Detroit Red Wings team earlier in the day, and Montreal needed three more goals to claim the tiebreaker for the final playoff spot.
* The Montreal Canadiens held one of the more notable anniversary celebrations for their centennial. They began their celebration in the 2008-09 season and carried it into the start of the following season, up to their actual 100th anniversary on December 4th, 2009. Of note is that they had two logos for the anniversary - one that simply featured the number 100 and the years 1909 and 2009, and another that read "100 Seasons/Saisons". The only problem with that is that they wore the 100 Seasons patch only during the 2008-09 season - which, thanks to the 2004-05 season being cancelled in its entirety due to a labor dispute, was the Canadiens' 99th season of play. However, the case could be made that it was still their 100th season of business operations.
* The Montreal Canadiens, in the years following the 2004-05 lockout, have become a team that's infamous for frequently dominating their division in the regular season but falling apart in the playoffs. In fact, despite frequently being a top-seeded team, they've only reached the Conference Finals twice since they last won the Cup in 1993 (losing to the Flyers in 2010 in a 4-1 rout after beating the Capitals and Penguins in a pair of seven-game series, and again to the Rangers in 2014), and are one of only three Canadian teams to not reach the Cup Finals since 1993 (the others being the aforementioned Leafs, and the Winnipeg Jets who only just moved back to Canada in 2011-2012). More often than not, the Canadiens have bowed out to bottom-seeded teams in the quarter- or semi-finals. 2021
* The Montreal Canadiens replaced Michel Therrien with Claude Julien as their head coach twice: the first time in 2003 and the second time in 2017.
* The Montreal Expos played their first game in existence against the New York Mets. Before moving to Washington to become the Nationals, they also played their last ever game against the New York Mets. Both games took place at Shea Stadium.
* The Montreux Convention, which governs transit of warships through the Bosporus. And finally, the Soviets were learning how to build carriers at all; carrying the missile armament they did still gave them some use if their aviation facilities failed.
* The Monty Hall Problem is purely a matter of Statistics. Calculus has nothing to do with the math behind it.
* The "Monty Python Maneuver" makes use of the series' partial aversion of
* The monumental success of the ALS Ice Bucket Challenge in August 2014 has yet to be replicated. The challenge returned in August 2015 but wasn't even 1/100th as popular as it was in 2014. Many other social media fads have been started; the only one that truly took off was "The Dress", and even then it wasn't nearly as big as the Ice Bucket Challenge. It's agreed that a phenomenon like the Ice Bucket Challenge can't be forced, but rather will have to take off organically through word of mouth.
* The Monuments Men, Nazi official Stahl finds out it wasn't a good idea to indoctrinate his children to respond to "Heil Hitler" when hiding from the Allies and one of them casually says the salute.
* The Monuments Men scene ends with the soldier stepping off the mine and scaring everyone when the detonator explodes but not the explosive, the mine having been damaged by an earlier fire.
* The Moody Blues cover this possibility in their 1968 song, "Thinking Is The Best Way to Travel".

* The Moody Blues, in their song "Dr. Livingstone I Presume," referred to "Antartic" eels instead of "Antarctic". Probably because in Britain "artic" is a common term for an articulated truck.
* The Moody Blues' "Nights in White Satin" does this with a gong at the end.
* The Moody Blues: "Painted Smile" ("Laughter is free, but it's so hard to be a jester all the time / No one believing when I say that I'm bleeding and I hurt all the time deep inside")
* The Moody Blues presents a psychological/spiritual version of the trope.
* The Moody Blues prior to becoming a founding member of Wings, and remained in the group in all of their lineups up to their demise in 1981.
* The Moody Blues recorded "Legend of a Mind", a nine-minute long paean in homage of drugs pioneer Dr Timothy Leary, who advocated for Higher Understanding Through Drugs.
* The Moody Blues' "Ride My See-Saw", has Edge dissolving into mad laughter as it crossfades into the latter track.
* The Moody Blues sported one of history's suavest and most glorious examples of the breed, and successfully rocked it long after the winds of fashion had made the 'stache look silly on lesser men.
* the MO of the person Alpha was before he became an Active; he inflicted this on a kidnapping victim he didn't manage to kill.
* the Mooglebane, one of their worst nightmares. The monster's skill set is even renamed "Pom-pom Puree," though it really doesn't gain any mechanical benefits from its comically monstrous reputation.
* The Mooks are specifically called "Longcoats" for their...long coats.
* The mook who punched Dash off the vecilopod accidentally saved Dash's life because the vecilopod crashed onto a cliff seconds later.
* the mook who tried using Hokuto Shinken on Kenshiro, but on the other the guy tried to use one of Kenshiro's best known attacks and failed.
* The Moomins, a detective randomly walks into the Moomins' house and sees a red puddle, thinking it to be blood. Moomin Mama assures him that it's only jam and he walks off embarrassed.
* The Moomins anime gives Moomintroll a young masculine voice (this take is generally uniform with other animated works). In the Japanese edit however, he is voiced by a female actress, giving him a very childlike voice. The English dub follows the direction of the Japanese version.
* The Moomins clear that the actors can barely see when wearing them, leading to a lot of clumsiness and fumbling around. Removing the heads allowed the actors to move about much more freely.
* The Moomins, each extended arc begins with a close-up panel of Moomintroll's butt.
* The Moomins has Snufkin, a born wanderer who doesn't ask anything else of life than the freedom to walk alone and play his harmonica. He's psychologically unable to stay in one place or with other people too long, so after moving in with the Moomins, he still periodically leaves them to go Walking the Earth alone for an extended time.
* The Moomins, he finally has "all of them". As this means there's no collecting left to do, it causes him a life crisis. Subsequently, he finds a new purpose in collecting plants.
* The Moomins, Little My (a tough and plucky tomboy) and Sniff (sensitive, cowardly and delicate) is a non-romantic example.
* The Moomins. Partially inverted in that she's Moomins' actual love interest and hence is justified in becoming really clingy whenever he falls in love with a block of wood (yes, this actually happens).
* The Moomins, the distinguishing sexual characteristics of Moomins seems to be largely limited to what clothes (if any) they wear. Snorkmaiden has her trademark hairstyle though.
* The Moomins, the Mymble falls for the sports-loving Mr. Brisk, only to accidentally drive to him to despair after beating him in a skiing contest. Moomintroll and his friends spend the rest of the story trying (with varying

degrees of success) to cheer up Mr. Brisk.
* The Moomins. These episodes gained a cult following due to their banned nature, and while they have never been broadcast on Finnish television they finally got a home video release in 2017 after the broadcasting rights switched over from Yle to Mtv who produced their own dub of the series.
* The Moomins, though some are more vague than others, and especially Snufkin because he is treated like a child by the Moomin parents and yet has a tendency to wander off alone.
* The Moomins via the 90s anime likely hear Sheridan's dorky fake-American take on Moomintroll.
* The Moomins, where a philatelist ruins his ability to add to his collection of every stamp in the world ever by finishing it (ignoring the fact that new stamps are always being issued somewhere in the world). After a bout of depression he becomes a botanist.
* The Moomins where the Moomins are being held by pirates. A pirate orders them to work "or else", and makes a cutting gesture across his throat. The Moomins are appropriately horrified: "We must do what he says or he'll commit suicide!"
* The Moomo brothers are Ithorians, but also stupid and brutish, with one of them obsessed by explosives whereas the other has a fondness for bludgeons of all stripes.
* the Moon. (Admittedly after shrinking it to the size of a baseball.)
* The Moon and Earth Kingdoms were originally destroyed by Princess Serenity and Prince Endymion's forbidden love. When they are resurrected (as Usagi and Mamoru respectively), they fall in love again and history is doomed to repeat unless they take actions about it. This is taken further in the live-action adaptation.
* The Moon and Ocean Spirits, Tui and La, are shown as a pair of black-and-white koi fish who constantly follow each other in a pond near the North Pole. This is used to represent the gravitational gyrations of the moon and the tide, on which waterbending is based.
* The Moon and the Son: An Imagined Conversation: The narrator's father was a low-level hoodlum who sometimes worked for the Mafia. Back in Italy he trafficked in stolen goods and was briefly imprisoned. In America, he sold bootleg Prohibition gin for the mob until he was caught and briefly imprisoned. Later he takes money from Mafia loan sharks to buy a hotel bar, only to conspire with the mob to burn the hotel down for the insurance when he can't repay the loan.
* The Moon and the Thorn: Lord Macsen makes it a condition of his support that Mahaffy Guillyn marry his daughter Tiffanwy.
* The Moon, as well, exerts a gravitational pull on the Earth's seas, causing tides which govern the rhythms of oceanic life and which many creatures require to time their reproductive cycles. It may even play a role in
* "The Moonbase" and shuffled off to the side while Ben and Polly manage the plot.
* The Moonbase", Ben Jackson suddenly has considerable knowledge of chemistry, physics, and medicine that he never displays again.
* "The Moonbase" modelled on early 'singing computers' like IBM 7094.)
* "The Moonbase", the characters wore special atmosphere suits to explore the Earth's Moon. They were never seen again. The show's writers most likely did it because it was set somewhere that the viewing audience already knew didn't have a breathable atmosphere.
* The Moonbase to see how long it should have actually taken for decompression to happen. The results were something on the order of a few seconds. The scene in the episode lasted much longer, obviously.
* The Moon demonstrates that the Catapult (essentially a giant railgun) it uses to send grain shipments to Earth can also be used to
* The Moondogs - King (Ed White), Rex (Randy Colley), Spot (Larry Booker)
* The Moondogs used to bring large bones to the ring to use on opponents.
* The Moon Dwellers just to kidnap the guy and the Granteed can't stop time because it doesn't have any Larselium inside it.
* The "Moongate", which only opens for a very short period of time in the rather lengthy in-game moon phases.

* The 'Moon Goddess' the hero Rudy has recurring dreams of in the H-Game
* The Moon has a mountain near its south pole that is bathed in near perpetual sunlight (it gets dark there during a total lunar eclipse).
* The moon has been blown up a couple of times over the course of the franchise (God is capable of re-creating the moon, but whether he did it a second time after the end of the Freeza Saga is never mentioned). The problems this would cause are never mentioned.
* The "Moon-Hoax", a series of fake articles published in the New York
* The Mooninites once stole their uncle's "check from the government for being crazy" so they can cash it on Earth and go on a shopping spree... except the "check" was actually a payment bill for home care which emits radiation when it's overdue, and it's two months overdue. When this is revealed, Err claims that he kept telling Ignignokt that the check was actually a bill on the way down to Earth, Err thought Ignignokt knew something about the bill he didn't.
* The Moon Is a Harsh Mistress, all of Earth is an oppressive state to the lunar colony, but "North America" is the most vocal and aggressive.
* The Moon Is a Harsh Mistress (also by Heinlein) the Lunar rebels 'throw rocks' (i.e., 100-tonne boulders, jacketed in steel and fired out of a magnetic catapult) down Earth's gravity well. It proves VERY effective. Cheap too.
* The Moon Is a Harsh Mistress: A lunar colony uses metal-sheathed multiton rocks tossed at Earth — a highly effective and cheap weapon — which can strike any point on Earth with the energy of a tactical nuclear strike.
* The Moon Is a Harsh Mistress and the USSR was one of the main countries colonizing the moon, so the lunar society inherited a lot of Russian words and syntax. They didn't get any Chinese from the third of the moon that was colonized by the Chinese, because Honk Kong Luna is isolated from the rest of the moon, not having any tube connection to Novy Leningrad or Luna City.
* The Moon Is a Harsh Mistress: A whole-book version. The plan for the revolution is planned out in an early scene, without it being revealed to the reader. The rest of the book is the plan coming to fruition without a hitch.
* The Moon Is a Harsh Mistress, but seems to have lost anyway; while America was hit badly and ended up becoming a "directorate" of the subsequent world government, of which "Great China" seems to be the hegemon, with India a close second.)
* The Moon Is a Harsh Mistress doesn't care about the revolution at all (being a childlike sapient computer with little understanding of human political concerns), but helps out for fun and in order to win attention and approval from his human friends.
* The Moon Is a Harsh Mistress, except that the airlock is for the city's pressure enclosure, not on a ship.
* The Moon Is a Harsh Mistress friends or relatives to protect her, and women are still generally considered unintelligent (or at least irrational or illogical) and unfit for many positions. The main reason the culture's attitudes toward women have changed at all is that women are a substantial minority on Luna. The rival Earth society, where the sexes are still 50/50 in numbers, shows female nurses giggling at having their rears pinched, rather than filing sexual harassment lawsuits.
* The Moon Is a Harsh Mistress, has a number of different arms capable of accomplishing various mechanical tasks, as well as a "social arm."
* The Moon Is a Harsh Mistress has the Lunar ex-cons and their descendants fighting their jailers and the entire Earth for recognition as an independent entity. The revolutionary cabal starts the whole thing for ecological reasons and pushing the patriotism button is a key part of the plan. However, most Loonies just think of Luna as "the rock", a prison, not something to be loved. It takes pretty harsh treatment by the Authority to get the Loonies revved up enough to fight and die, but by the end, even Prof is teary-eyed and dreaming of Lunar flags blowing in the breeze...
* The Moon Is a Harsh Mistress him has been repaired, he still doesn't re-emerge.
* The Moon Is a Harsh Mistress included a conspiracy theorist as an aversion, as he disdains the conjecture that passes for 'theory'. Professor de la Paz pursued the study of historical conspiracies and developed a body of principles to describe how

they work, how they fail to work, how they wind up being revealed. As a founding member of a revolutionary conspiracy, his theories are quite valuable for functioning in the scientific/academic meaning of the word. This also helps him develop his theory, since the most successful conspiracies are never revealed, the only way to be sure he's observing one is to take part in it.
* The Moon Is a Harsh Mistress is destroyed and communications between the Lunar government and his secret military base are cut off by Earth's bombing. This situation was anticipated, so Mannie was given appropriate orders and plans.
* The Moon Is a Harsh Mistress, Mannie starts one when the subject was politics, which he doesn't want to talk about.
* The Moon Is a Harsh Mistress one of the nuts in the Lunar Congress suggests instituting a new system of measurements based on the lunar cycle. Manny thinks that's just making things overcomplicated, and comments that his ancestors must have felt similarly when they had to switch to the metric system. But that was different because they were trying to make things easier, those old Imperial units are so confusing.
* The Moon Is a Harsh Mistress on the Earth using the masses of a mass rocks.
* The Moon Is a Harsh Mistress on uninhabited areas seems just a little pointless.
* The Moon Is a Harsh Mistress, part of the moon was a penal colony, but the Authority running the place treated the whole thing as such.
* The Moon Is a Harsh Mistress. Professor Bernardo de la Paz explains:
* The Moon Is a Harsh Mistress, Professor Bernardo de la Paz mentions that during a brawl he snapped the neck of one of the Warden's guards using a maneuver called the Istanbul Twist.
* The Moon Is a Harsh Mistress Professor de la Paz suggests that, rather than having them killed and thus risk the Authority realizing the rebels have spies, just form them all into their own cells, so they can only spy on other spies.
* The Moon Is a Harsh Mistress speaks (and narrates the entire novel) without using articles or other "nulls" (what he considers meaningless words), as well as Russian and Australian slang. This is justified by both the fact that the Russian language lacks articles, and the People's Republic of China in this future now has an empire which includes both Australia and much of the Asian part of the Soviet Union, and has shipped a lot of 'undesirables' off to the moon. Mannie, being a native "Loonie", has ancestry from both on both sides, and has picked up shards of every language sent to Luna.
* The Moon Is a Harsh Mistress: The Federated Nations has control of all "attack weapons ... but defense weapons were each nation's own pidgin". The FN runs the penal colony on the Moon.
* The Moon Is a Harsh Mistress the lunar rebels use the mass driver meant for sending shipments of grain back to Earth to drop big rocks on Earth military bases.
* The Moon Is a Harsh Mistress. The main character's (Manuel Garcia O'Kelly Davis, a bit of a multicultural mashup in itself) race isn't really described, but is described as multi-racial with an ancestor deported from Chad. His romantic entanglement in the novel is also described as being unusual in that her ethnic background is reasonably easy to see, something that usually doesn't persist more than a couple of generations in the decidedly heterogeneous Lunar cities. (At one point, the "range of colors" in Mannie's line marriage becomes a plot point.)
* The Moon Is a Harsh Mistress there are a bunch of different varieties of marriage, but pretty much all of them involve multiple people due to the skewed gender ratio and general living conditions on the Moon. One of the main characters is arrested for polygamy while visiting Earth, but it's revealed that the polygamy might actually have been overlooked by the judge who issued the warrant if it hadn't been for the racial diversity shown in a picture of his family. However, it's also noted that not all of Earth is so judgmental, and this was actually a deliberate ploy to gain sympathy from the less prejudiced Earthlings.
* The Moon Is a Harsh Mistress. The rebellion overthrows the tyrannical Lunar Authority months earlier than they had planned to, and thus find themselves in charge with nothing in place to govern themselves. This forces them to improvise by, among other things, pretending to Earth that the Authority is still in charge

so they don't send attack ships to end the new government before it can begin.
* The Moon Is a Harsh Mistress The supercomputer is also built on a 1950s scale, to the point that bugs (actual living bugs, mind you) are a threat to his hardware.
* The Moon Is a Harsh Mistress. They never appear directly but are apparently superior to normal pilots. This doesn't stop the protagonist from regarding them with disdain, referring to one as a "wired-up ex-human".
* The Moon Is a Harsh Mistress while investigating what its owners assumed were malfunctions of its logic circuits.
* The Moon Is a Harsh Mistress) would mitigate these problems to some extent.
* The Moon Is a Harsh Mistress, Wyoh tells Prof that Manny had taken advantage of her the night before, stating that he "drugged" her. Prof chides her not to corrupt the language, saying that the word is "dragged." In this case, however, he's ignoring the larger issue because he knows Wyoh is not even trying to make a serious accusation, just giving Manny a bad time.
* The Moon is Blue: At the end of the first act, David has a man-to-man talk with Don about why Don declined Cynthia's offer to sleep with him, and the discussion turns to a football metaphor just before Patty enters:
* The Moon is Blue, Don starts telling Patty about what life will be like living together. Patty asks if he's proposing to her, and Don says, "What else can I say?" Patty insists on him just saying the three words directly, like when her father proposed to her mother: "He wasn't ashamed to come right out and say 'I love you.'" Don finally takes the hint, and takes her face between his hands, saying: "I love you, Patty—I love you very much—even if you are a screwball and even if you are a little bit nuts."
* The Moon is Blue, Don takes Patty over to his apartment for a drink, with the plan being to then go out for dinner. However, a downpour starts, and Patty doesn't have a raincoat, so she decides to make a home-cooked meal instead. He still has to go out and buy groceries, and she still manages to get her dress stained due to David mishandling a ketchup bottle.
* The Moon is Blue. "Matter of fact, I rarely strike anyone but a woman," he explains.
* The Moon is Blue of a father finds her in Donald Gresham's bedroom getting dressed, he hits Don in the eye just hard enough to knock him out. David drops in at this moment, and takes it as a lesson on how to handle his daughter, Cynthia, and goes so far as to chastise Don when he later finds Patty in a similar situation, though he admits that it's none of his business.
* The Moon is Blue, Patty appears on television in a singing commercial for beer.
* The Moon is Blue, Patty decides to give David back the six hundred dollars, an amount equivalent to fifteen weeks of her salary, he gave her, when she overhears a remark implying that she ought to have remained beholden to him for that duration.
* The Moon is Blue, Patty is 21 years old and finds out from Don that he's 28 years old. (In the film version, she's 22 and he's 30.) She's quite delighted with her calculations:
* The Moon is Blue, Patty jumps at the chance to cook dinner for Don in his apartment (though he has to buy the groceries first), and David tells him after dinner that she has been trying to invoke this trope:
* The Moon is Blue, Patty puts her leg up at one moment to test how lecherous David really is. He doesn't take the bait, though he later compliments her legs.
* The Moon is Blue, Patty, who is concerned about his eye but believes he deserved it, suggests this:
* The Moon is Blue takes place over what is more or less twenty-four hours.
* The Moon is Blue, when Don is denying that anything happened between him and Cynthia when she spent the night in his apartment:
* The Moon is Blue, when he hears someone ringing his doorbell and knocking, he hastily shoves her in his bedroom, remembering to put her purse and jacket in there as well. Unfortunately, when David picks up the phone he overhears her on the bedroom extension, and turns on Don with righteous indignation.
* The Moon is Blue, when Patty suddenly starts arguing with Don about spending so much money on gambling, he tells her, "Will you kindly shut up? We're not married

yet." She smiles, realizing what he's just said.
* The moon is nameless to cats but Pufftail affectionately calls it "our Mother-of-Night". The stars are her "sisters".
* The moon is shown to be red without explanation during several important scenes, such as during Tobi's backstory.
* The Moon King turns into a monster at the climax and looks like a mix of an Eastern dragon and a koi carp fish with arthropod-like legs.
* The moon landing was faked because they had to hide an accident. Namely
* The MOONLIGHT laser blade and the KARASAWA laser rifle usually fall into this category, at least in the earlier games. The former could potentially shave off half an AC's health with one hit and its blade wave produced an explosive energy burst. The latter, with the right parts, made the game laughably easier. The KARASAWA, despite its recurring status, got hit with the
* The Moonlight Monsters Detective Agency has a Christmas story that revolves around a bunch of Krampus that are masquerading as mall Santas.
* the Moon Lord, in Expert Mode is an accessory that lets the wearer invert their own gravity at will. Because the player is likely wearing a pair of wings or is riding around in a flying saucer at this point in the game, and because there are craftable potions that grant the same effect as this accessory (and are actually better, since those potions allow inversion in midair, while the accesory doesn't), this item has no practical purpose. Thankfully the other reward is the best light pet in the game.
* The Moon Maid (1923) opens with an introduction in which Burroughs is told the events of the distant future by a man who can remember the lives of his future reincarnations ... although for some reason this is dated to the near future of 1967, rather than the present.
* The Moon Maid is a near miss; it was originally published in 1923, and the adventure begins in 2024. Perhaps Burroughs was unduly pessimistic about how long it would take to get into print.
* The Moon Maze Game woman adheres to a "Fit/Fat" model, in which well-padded curves overlie toned muscles and a blood chemistry maintained at the peak of physiological health.
* The Moon Men: After Earth is conquered by the eponymous moon aliens, the American flag becomes an object of worship to the rebellious underground.
* The Moon Men, the alien invaders are armed with a disintegrator ray.
* The moon not only turns red, but forms a 3-rowed Rinne-Sharingan when the
* The Moon of Gomrath and is used to drive the plot at a crucial point in the book.
* The Moon Otsutsuki also had a similar arrangement; perhaps not coincidentally, both them and the Hyuga are descended from the Sage's twin brother.
* The Moon Pool by A. Merritt, the Akka are a race of frog people whose semi-sentient ancestors were uplifted by another super advanced prehuman species millennia ago. They are some of the nicest people the protagonists encounter during their adventure, badass warriors and steadfast allies.
* The Moon Pool presents the novel as something that the fictional International Association of Science commissioned author Abraham Merritt to write in order to put to rest the rumors about the events touched upon in the book:
* The Moon Project and since the whole LC campaign plays out on the Moon, collateral damage is not an issue. Apocalypse does not even BEGIN to describe it.
* The Moon Project strongest weapons - a sonic cannon - is derived from a modified mining tool.
* The Moon Rabbit, while the other possessing beings like The Boogeyman and the Hydra of Lerna, you can be certain both sides are formidable.
* The Moon Rises animation, Celestia mutters "Sister...", as if she's either dreaming of Luna or she subconsciously realizes what is happening.
* The Moon Rises depicts Starswirl as being around during the Nightmare Moon incident. Later episodes revealed that he was long gone by then.
* The moonsault, a notoriously difficult move to execute, is not often used as a finisher, but has a prominent place in the
* The moon scale in the Dreamworld levels. It forces you to get two different

candy colours in equal quantities, or else you'll fail the level. It's entirely possible for a single unrelated combo to rapidly make several chains of one of them, resulting in Odus falling off and you losing the level due to pure dumb luck. The unpopularity of this mechanic may have contributed to the Dreamworld being discontinued in May 2015 and removed altogether two years later.
* The Moon's Flash Princess: Asuna's punishment for people who disobey and/or annoy her, turn them into her dress-up dolls and parade them around to the others.
* The Moon's Flash Princess for this, as he makes the fight (and the victory) that much quicker (plus, nobody doubts his bravery).
* The Moon's Flash Princess (or pretends so due their age difference) and, while without a steady job, still makes more than enough money to live comfortably.
* The Moon's Flash Princess, the ones who went out of the City of Beginnings and tried to beat the game, or at least adapt to the new world, have been changed by the experience and started acquiring a different and more aggressive set of values, including finding personal strength more important. They also find weird the idea of no-contact Karate.
* The Moons of Jupiter: Factual, real-life information about Jupiter's moons.
* The Moons of Neptune: Factual, real-life information about Neptune's moons.
* The Moons of Saturn: Factual, real-life information about Saturn's moons.
* The Moons of Uranus: Factual, real-life information about Uranus' moons.
* The Moon's tidal locking has itself progressed further over millions of years, so that its orbit now perfectly keeps pace with Earth's day/night cycle. As a result, the Moon floats over one sole area of Earth's surface, making travel to it possible by "traversers", enormous spider-like plants capable of passing through space on silk strands miles long connecting the Earth to the Moon.
* The Moonstone and the TV adaptation a doctor sets up a reconstruction of a diamond theft in which the thief unknowingly stole the stone while semi-conscious having had his drink spiked with laudanum and being already worried that the diamond wasn't safe. The circumstances are recreated by him taking laudanum again and giving up smoking which had already done on the first occasion. The reconstruction is successful and he steals the stone again (this time a dummy) while sleepwalking and talking to himself feverishly about the diamond needing to be be secure. At the time of the original theft, he puts the stone in his bedside cabinet whereupon it is stolen by the real thief who has witnessed him take it.
* The Moonstone: Godfrey Ablewhite's sisters, whom Betteredge calls 'the Bouncers'.
* The Moonstone. Hopelessly because not only is he a "gentleman" and so out of her class but he's in love with Rachel Verinder.
* The Moonstone into the popular consciousness a few decades before Doyle's novels.
* The Moonstone, Rachel's has two suitors, both are her first cousins.
* The Moonstone, the eponymous diamond is pawned to a moneylender. His first question is "How did you come by this?" and he refuses to lend anything until he's got a truthful answer.
* The Moorchild fit the description to a T. They've an aversion to holy water, Rowan wood, St. John's Wort and other yellow flowers, iron (in the setting, ALL iron is Cold Iron), and salt. They kidnap children and replace them with their injured, elderly, and misbegotten (the protagonist herself is a changeling left in place of a human child for being half-human), they play pranks and steal from mortals constantly, and while life in the Mound is happy and carefree, they have no concept of love, hate, or empathy.
* The Moorchild, "time runs different in the Mound", the Mound being the home of the Folk. A human who's lured in can stay for what feels like a season or at most a year, and then when kicked out discover that a few decades have passed and he has aged accordingly.
* The Moorish companion and the feisty Marian, alongside several other elements, can be traced down to the excellent Eighties series,
* The Morag Tong is a guild of assassins officially sanctioned by the
* The moral Calvin learns in "Attack of the Vampire Babysitter", an episode of
* The Moralist, by Rod Downey. 50-year-old professional spin doctor Richard 'Red' Rover is a self-proclaimed 'boylover' and has had sex with several boys. He joins a

creative writing mentoring programme and ends up mentoring 12-year-old Jonathan, with whom he falls in love. Jonathan points out, "You like to hang around me, because it makes you feel like a kid again." Over the next year and a half, Red becomes friends with Jonathan's parents, takes Jonathan on outings, buys him presents, photographs him and offers to pay for his orthodontia — but does not have sex with him. Then Red's best friend's house is burnt down by a group of vigilantes, so Red defiantly talks about his private life on TV, and he and Jonathan end up interrogated by the police.
* The Morality/Mortality Equation: The worse your sense of morality is, the more likely your loved ones will die.
* The Morality/Mortality Equation: Whether or not your loved ones die depends on how evil or good you are.
* The morality of a God of Destruction is easily summed up by this exchange between Beerus and Goku:
* The morality of the god or gods in question and the situation seems to be the most important thing. The various teams don't really go out of their way to dissuade the belief of a given population
* The moral of "School Daze" could just as easily be "it's not what you know, but
* The moral of "The Other Tarts" is that "This cosmic dance bursting with decadence and withheld permissions twists all our arms collectively, but... If sweetness can win, (and it can!), then I'll still be here tomorrow to high-five you yesterday, my friends. Peace."
* "The Moral Of The Story" is a blog post by Scott Alexander consisting entirely of these.
* "The moral of this story? Never make a deal with an interdimensional
* The moral panic against reading novels has been around for centuries before being replaced by newer media. One of the earliest examples is a central plot point in
* the moral she dropped moments earlier. Unwilling to give Indy her free hand and save herself, Elsa falls to her death when the glove on her other hand slips off. Indy finds himself in the exact situation and tries to get the grail too, but his father convinces him to “let it go.” Indy’s willingness to pass up the “fortune and glory” saves his life while Elsa’s obsession with obtaining the grail for her personal glory kills her.
* The morals Rat gives for his "Angry Bob" stories tend to be absolute non sequiturs. And they're not nearly as bad as the ones in his "Danny Donkey" stories...
* The Moral Substitute: Creating your own media because the media out now offends your sense of morality.
* The Moral Substitute (for when a work is aiming to be the family-friendly/religious/specific-demographic-pleasing alternative to the original work)
* The Moral Substitute, so a cleaner, better, "family-friendly" version is made.
* The Moral Substitute this, acknowledging that he was begging his parishioners to see a graphically violent, R-rated movie.
* the morbidly romantic Ellen Woods and Ian Blaird make a suicide pact, but Ian's life is saved by their friend Clinton Hartley. When the police close in on Ian for Ellen's murder, Clinton - who is also
* The Mord-Sith began as Darken Rahl's servants, whom he employed to capture and break his enemy's wizards. Even without their
* The more advanced mechanoid who was supposed to replace Kryten wore out his sanity chip in some three million years of flying through space trying to find him.
* the more advanced race actually nerfed what was once a thriving industrial community through sterilization
* The Morean Empire has the Vandariotes and the Scholae, who are both actually mercenary units, but are also good enough that Morea doesn't really need any forces beyond them.
* The Morecambe and Wise as "Bongo" (and whenever Ernie corrected him with "Ringo!", Eric replied, "'im too!").

* The Morecambe and Wise, interrupting a faux news bulletin with a very well remembered dance routine.
* The more cartoonish classic Disney characters (like Mickey, Donald, Goofy, and Winnie the Pooh), and even realistic looking ones like the Disney Princesses, stick out like sore thumbs next to the Square Enix and
* The more common interpretation in the Nordic countries is that Ýmir had no parents. He came into being within the stone, and Auðhumla merely freed him.
* The more common term for soldiers at the rear is REMF - that is, Rear Echelon
* The more common variation (this match is very rare) is the heel wrestler taking a big lead, then the face wrestler racing to either tie the score or force overtime. In the most famous Iron Man match to actually feature pinfalls,
* The more conservative the age, the more romantically you can describe the friendship, since it wouldn't
* The more conventionally handsome Doctors tend to be the more "human" in outlook, tending to form strong emotional attachments with humans and converse with them on their level. The odder-looking ones tend towards being more prickly or more
* The more elite policemen appear once you receive three or more stars. Firstly it's the SWAT in body armour and equipped Uzis, which arrive in helicopters or police trucks. Then come the extremely tough 4-wheel drives which carry four of the dreaded
* The more esoteric items of Imperial technology tend to look much less advanced to modern eyes than they are, frequently having a Medieval, Renaissance or Victorian (steampunk) aesthetic, with many time-stopping Stasis Grenades resembling nothing so much as a 19th century carriage clock. The weapon on the front of the Dark Angels' Nephilim Attack Fighter has the physical form of a stained-glass window, and its stasis bomb looks like a giant glowing hourglass. The more elaborate Imperial storm shields tend to look like highly decorated metal shields that would not have been out of place in the Classical or Medieval world. Their war ships even look like spaceborne Gothic cathedrals, only with an armored ram on the prow, engines on the back, and weapons sticking out the sides.
* The more extreme form involves jumping from the top of a steel cage or ladder in the appropriate
* The more extreme injuries Oasis and Kusari take are justified since they seem to possess an as-yet unexplained ability to come back from the dead. However, Kusari
* The more famous of the two scenes involves him telling everyone the true story about the death of his family in response to Paul Bearer's accusations. The entire scene is filled with emotion from Taker's body language, voice, and expressions. But there were certain points where he almost seemed to be on the verge of tears.
* The more famous one was having to change its company name to World Wrestling Entertainment (and its logo to WW) due to a violation of an agreement with the World Wide Fund for Nature (formerly known as the World Wildlife Fund, which is still the legal name of that organization's US and Canadian branches) concerning the international use of the WWF acronym.
* The more famous song's peak position was impacted by low sales due to it having a limited or no single release, often to boost sales of its parent album. Many radio hits from the '90s were ineligible to chart on the Hot 100 without a physical single release. This practice by the record labels, which
* The more famous song was never given a radio push, despite its popularity with audiences.
* The more fearsome example is the End of the Cycle, if the player is foolhardy enough to
* The more female-targeted stories usually feature a young woman being reincarnated into the body of the "villainess" (read:
* The more forward-thinking (younger) among the Wardens and Knights of the Cross are known to carry heavy pistols and
* The more fundamental differences between the sects of most major religions are largely due to separated groups coming to consider Word Of Dante as
* the more he hangs around the Straw Hats, the less he can resist participating in their hijinks and the others are just too much of an influence on him.

* The more important the hand, the closer together the values. A climactic hand will not be won by a straight flush over two pair; more likely it will be four kings over four queens. When both players have great hands, both are more likely to stay in the hand and bet high. If one goes all-in and loses, it becomes by definition the climactic hand. A hand involving poor cards isn't likely to be the final one unless growing blinds force the players to play anything.
* The more involved procedure has regained popularity and explains why
* The more juvenile writers, usually the ones who get a chance to briefly play with the character in another title, throw around hints. The main series itself has straightforwardly confirmed it multiple times, though quietly.
* The morel, a fungus which has survived into the future by evolving the ability to attach itself to other creatures to serve as a secondary brain, greatly increasing their intelligence in exchange for food and protection. It's quite common in the Nomansland, where almost every sort of creature — from giant termites to predatory trees — can be seen bonded to a morel. Beyond that, as the morel discovers by exploring a human host's
* the more likely you are to find it later, tempting you to keep using it...
* The more minor non-standard game overs include; failing to line up with a target while falling at certain points in Chapters 17, 21, and 25, failing to shoot
* The more modern lay confraternity, Miles Jesu, actually means "Soldiers of Christ". The Jesuits have been noted to not appreciate the competition, and innumerable conspiracy theories involving the recent Papal investigations into the activities of Miles Jesu have been floated.
* The more obvious example would be Ray and Debra. Debra routinely physically and verbally attacks Ray, Ray makes light of Debra's worthiness and hobbies, and they both condescend to one another regularly.
* The more organized forces of Chaos tend to have this problem: they try to have tactics and carefully planned-out strategies, which are screwed up when their troops decide they should get into combat
* The (More or Less) Complete Guide to Hygiene For Fantasy Role Playing Games", among other things, contains lengthy speculation on how would waste be dealt with in a fantasy world.
* The More Perks Mod for Fallout: New Vegas adds the perk Superior Mind that allows the Courier, if they have an Intelligence score of 9 or the max 10, to make an opponent's head explode with a dialogue option. If it's used on an opponent whose Intelligence score is higher, however, then crippling damage is applied to the user's own head.
* The more powerful illusion spells effect all five senses. And you can choose to fail your save to disbelieve.. just use your imagination.
* The more powerful version is "Steal in Plain Sight". No one even notices the item (possibly protected by museum security, guards, and security cameras) is gone until 5 minutes AFTER you leave and you don't even need to touch them if you spend a point of willpower.
* The more practical reason for the name change is that "Sci-Fi" is too generic a term to be registered as a trademark. "
* The more practical variant (about a dozen Adams and Eves) is brought up in
* The more rarely used Chinese equivalent "Taikonaut" also contains the "naut" syllable
* The more recent manga adaptation ends up giving the rest of the main five upgrades. And they're
* The more recent She-Hulk series, written by Charles Soule, is generally more accurate, since Soule is a lawyer, but not always. For example, in issue 9, She-Hulk defends Captain America against a wrongful death action based on alleged negligence by Steve Rogers in 1940, before he became Captain America. The problem is that
* The more refined version of this is the joke without words that goes on during the credits of
* The more robotic Insecticons can clone themselves and perform locust like swarms, unlike other Transformers (at least at the time) they can digest organic

matter alongside Energon.
* The more subdued scene later on with Tony and Pepper is more standard but still ends up
* The more successful Opus Dei, ("Work of God"), has been able to score major inside positions with recent popes, due to the occasionally "overkill" methods of the Jesuits. The so-called "Black Pope" of the Jesuits (the Father Superior, actually) has been sidelined by the more recently successful Opus Dei counterpart, and time will tell if the Jesuits have truly chilled and outlived their efficacy or some major upset will happen to replace them to their previous position as the "soldiers of Christ".
* the more sympathetic. When the Night Lords are in a disadvantaged position, they tend to disappear rather than fighting to the last.
* The more tech-saavy Kururu's manages a full body android disguise, but only manages to show off his trademark creepy geek side by making it look exactly like a cutesy teen J-pop idol.
* the, more that he tends to put effort into his other interests if he is able to.
* The More the Merrier: Good ol' blandy, Mr. Pendergast. Poor guy, doesn't even notice his fiancée is falling in love with someone else.
* The More the Merrier: Jean Arthur's character wears a two piece which were very popular during the '40s.
* The more the story progresses, the more Thorfinn follows in the steps of his father Thors.
* The More Things Change: It happens to Ryouga and Ukyou in "Friends and Lovers":
* The More Things Change, Ryoga believes the person whom he is fighting is a man until he cuts Tanya Noori's vest and spots her bra.
* The More Things Change Series has a deep fear of all rodents. Unfortunately, Le Fay can't override such weaknesses and as such, becomes crippled with fear at the sight of Rufus, something Kim and Ron take advantage of while fighting her.
* The More Things Change: Ukyou catches herself staring at Ryouga in "A Training We Will Go":
* The more traditional Dwarfs also consider writing of all kinds to be sacred (they believe their creator wrote the universe into existence), and the destruction of words to be a crime. When Vimes reveals that he was "blackboard monitor" at school and responsible for erasing the lesson at the end of class, he is met with some shock. Though the Low King of the dwarfs actually winds up using "Blackboard Monitor Vimes" as a respectful title, claiming that the duty must have been a great responsibility.
* The more traditional form of flaying however was common in ancient and medieval Chinese history under certain emperors. Zhu Yuanzhang had many servants, officials, rebels, and later 5000 women flayed. Zhu Houzhao had six rebels flayed, and Zhang Xianzhong had many more people flayed as well during his reign.
* The more traditional sort of necromancer also shows up, called an "ectomancer", who can summon and speak with ghosts, but can't outright command them. The ghosts like this sort a lot better.
* The more traditional (trope-wise) Big Board is up at the front of Mission Control, variously showing plot-relevant information about the status of the mission (e.g., center engine aborting early during liftoff, where the astronauts are in relation to Earth and the Moon, etc.)
* The more-universal Humanity system makes morality itself a form of Phlebotinum. Each splat has a set of hierarchical sins, with things on the order of 'occasionally thinks unkind thoughts about others' at rank ten and 'genocide purely for the purposes of entertainment' at zero. Committing sins on the list below your current rank pulls you downward, while only abstaining and spending experience points can pull you up, so you tend to 'level out' at one rank above the sins your character abhors enough to avoid even when they're necessary... and, being a
* The more upbeat, Single mix of "Cooler Than Me" by Mike Posner is more popular than the original. Still, the original was the version that was converted into Similish for
* The more well-known version of Frogger is found in Naxxramas. After killing

Patchwerk in the Abomination Quarter, to proceed through the raid, you need to avoid several rows of green slimes that move in one direction; very similar to the game "Frogger". This was known for killing more raid members than the actual boss fight preceding it. Similarly, several elevators (most notably, the one in Serpentshrine Caverns) are known as "the elevator boss", since the elevator is an open platform on a timer, and players often attempt to board the elevator
* The More You Know on NBC keeps playing ads for all Free and Clear Laundry Detergent, almost every commercial break, and sometimes twice!
* The more zealous devotees of Khorne the Blood God have been known to decapitate themselves if they're crippled and unable to fight the enemy, as a way to stay in their god's favor. For Khorne cares not from where the blood flows, so long as it flows...
* The Morgan Le Fay case bears further elaboration, as she very carefully leaked information to the humans, while the rest of the Ancients watched her. The moment she tried to do anything but be vague, she was dragged away, never to be seen again.
* The Morgenthau Plan, and the confiscated production materials could help the recovery of nations ravaged by the Nazis such as France or Russia. The idea was abandoned in favor of the Marshall Plan for several reasons:
* The Morgul Blade wielded by the Witch-King to stab Frodo at Weathertop is a villainous and nasty example, being specifically constructed to leave toxic shards embedded in its target.
* The Moriori people of the Chatham Islands were pretty close to this, an utterly pacifist society of hunter-gatherers. When a Māori invasion came in 1835 they didn't even understand the concept of armed conflict and were almost entirely wiped out as they tried to negotiate. The invading Māori killed, enslaved, and cannibalized the Moriori, with only 101 alive by 1862, although Moriori culture has since received a Renaissance. Most sadly, it was later discovered the Moriori were
* the Morlock leader for Alexander to admit it and come to terms with the knowledge.
* The Morlocks are supporting characters, being mutants whose mutations are physically disfiguring and who live underground with others of their kind. Of course, even among the Morlocks, there are hierarchies, and the Tunnellers look down on the Drain Dwellers (and vice versa). Only two Morlocks, Marrow and
* the Mormon Church episode "All About Mormons" — while said media might not portray the church in a flattering light, it DOES get people curious, and a number of them investigate the church further as a result.
* The Mormons have their own conventions using Biblical/demonic terms. The only confirmed name, in an Albert POV chapter, is moloch for cyberdemon. A force of "brownies" and "baphomets" attack Salt Lake City; brownie is almost certainly the imp and baphomet is probably the demon, as both are the grunts of the alien monsters. "Shelobs" are mentioned in the same vein as moloch-cyberdemons, the biggest and most powerful of the monsters. Given the name comes from
* The Mormons (now known as the New Canaanites) are a benevolent example. While they are known for being incredibly proficient in firearms (specifically the M1911 and the Thompson SMG) they are also known for generosity and offering help to anyone they can.
* The Mormon War., which is the only religious military unit in United States history and was part of the Mexican-American war. When the Church controlled Utah territory, the state militia also served as this. Some members were involved in atrocities against non-Mormons, unfortunately.
* The Morning After- has a non-royalty version of this, as Xander Harris (from the public's perspective, a construction worker from a small town that's only distinctive because it was destroyed the day before) and Zoey Bartlett (the youngest daughter of the current President of the United States) get married in Las Vegas the day after the destruction of Sunnydale.
* "The Morning After Job" may take the prize. The team convinced a protected federal witness that he had
* The morning after Morinaga takes advantage of a doped-up Souichi in

* The morning after the attack where he was bitten, Officer Harley retains both his sentience and his humanity as he talks to the main characters about how his town will rebuild and advises them on a safe manner of travel.
* The morning after Willow and Tara get back together, they have a conversation that leads to Tara telling Willow that Buffy's been sleeping with Spike.
* The Morning of Judgment Day, where man attempts to reach the heavens, and suggests that humans may have to stay on Earth for good.
* The Morning Show (1983–1988), initially a local show on WABC-TV in New York City, hosted by Regis Philbin and Cyndy Garvey. That show is the successor to local talk shows in both New York and Los Angeles that date back to 1970 (in NYC) and 1971 (in L.A.), with the L.A. show hosted by Philbin and Garvey for several years. Garvey left in 1984, and after a year with Ann Abernathy in the co-host chair, Kathie Lee Gifford (then Johnson) debuted in 1985. The show went national in 1988 as...
* The Morning Show with Mike & Juliet meme, which it unwittingly originated, is still around.
* The Moro arc goes into further detail on Angel Laws, explaining that
* The Moroccans generate extra gold and culture by setting up trade routes with other civs.
* The Morose Mononokean he—a human—has shunned humankind in favour of demonkind in the first place.
* The Morose Mononokean: In Chapters 21 and 22 and Episode 10, Ashiya and Abeno help a one-eyed scarecrow yokai who is stuck in a mud- and smoke-covered potato-field. The yokai, Nobou, is stuck in a phantasmagoria of the day his friend, a regular scarecrow, died. A passerby had thrown a cigarette into the field, which caused a fire. Nobou tried to carry his friend to safety, but had to abandon him to save himself. He thinks his friend's resentment causes the smoke and mud, but Abeno corrects him it's his own guilt and that he can't send him to the underworld if Nobou doesn't first free himself. Learning this and having Ashiya and Abeno for emotional support, Nobou makes peace with what happened and moves on. The mud and smoke likewise disappear.
* The Morose Mononokean is a demon that takes the form of a tearoom, and communicates its will to its inhabitants through a hanging scroll on the alcove.
* The Morose Mononokean is a dog spirit who looks like a ball of fur with stubby legs and big eyes. Ashiya certainly loves cuddling him and plays with him whenever he can.
* The Morose Mononokean when several locals see Ashiya on his back while Abeno and the Legislator went shopping.
* The Morph Ball doesn't actually "fit" Samus in the ball. As demonstrated in the various Prime games, she actually is turned into
* The Morph Ovum in Heretic turns most enemies into chickens with only 10 health, but it will not work at all against Iron Liches, Maulotaurs, or D'Sparil. The Firemace Tome Power shoots a giant cannonball that kills most enemies instantly (and continues
* The Morrígan's name means "phantom queen;" it's not clear if she actually rules anything (though scholars have often theorized that she was the wife of one of the various
* The Morrigan also breaks up with Baal to prevent this from happening to them.
* The Morrigi are tribal, with females holding land planetside and males living as stellar nomads.
* The Morrigi fleet has traditionally been all male, since they live in nomadic space-faring tribes while the females reside dirtside. But during the war with the Suul'ka the Siren mind-controlled many males and turned them against their families. As females are resistant to psionics, a result of the evolutionary arm's race with the males'
* The Morrigi, however, the species went almost practically extinct: They've only recently re-emerged, and at a technology level that puts them on an even footing with most of the 'younger' species. The game states outright that Morrigi research is not so much inventing new tech as it is re-discovering, reverse-engineering and

re-building infrastructure for old technology they've lost the ability to replicate. In the sequel, all the playable factions can be this to the Independent Races, who have yet to crack Einstein's cage.
* The Morrises, a family that stepped up to the plate to battle Dracula when the Belmonts went missing, are said to be related to the Belmonts. The relation isn't pure, however, and they aren't able to effectively wield the Vampire Killer whip without significant cost to themselves.
* The Morris Marina, thanks to a complaint about them burning one in a segment. If it appears, it is guaranteed a
* The Morris Oxford Series III was in production in its home country of Britain from 1956 to '59. In India, however, a locally-built clone called the Hindustan Ambassador entered production in 1958 and kept going, without any significant redesign, until 2014.
* The Morrow Project can find it and read it as they explore the area.
* The Morrow Project. Female bears and pigs are noted as being especially protective of their young and prone to attack if they are threatened.
* The Morrow Project: One of the mutant monsters walking the Earth 150 years after a nuclear holocaust is a scorpion 1.5 meters long with a poison that has about a 50% chance of killing the average human.
* The Morrow Project. The members of the title organization had their temperatures lowered to the freezing point and were put in "freeze tubes" so they'd survive an expected nuclear war. The personnel of their main base were killed shortly after the war and the frozen team members remained in that state for 150 years until a malfunctioning computer finally sent the revival code.
* The Mortal Blades are a straighter example of this trope, being magical katanas that can kill even immortal beings. Granted, their magic has little to do with them being katanas.
* The "mortal damage" system allows a character to continue acting after receiving damage that would reduce their HP to zero until their HP rolls all of the way down (or they're healed).
* The Mortal Instruments, although they can still be killed, most obviously by sunlight.
* The Mortal Instruments. Although vampires, werewolves, faeries, and warlocks exist they are all descendants of either angels or demons,and since no pagan gods appear, its more like Christianity is True.
* The Mortal Instruments among other things. Shadowhunters and Warlocks are prone to collecting spell books, the former to keep them under lock and key, the latter in order to use them.
* The Mortal Instruments, and she concludes they must to the Silent City immediately, and he jokes that she isn't dressed appropriately for the trip quite yet.
* The Mortal Instruments. And so he participates in the fighting, using only his strength.
* The Mortal Instruments, and the "dad" did it just to try and coerce his friends into helping him.
* The Mortal Instruments as if he simply cannot remember the personal names of anyone who is not a Shadowhunter.
* The Mortal Instruments, as well as the fourth. The third book is set in Idris, but the trope is still in play, as the representatives of the faeries, vampires, warlocks and werewolves that come to Idris (which is located between France and Germany) are all from New York City.
* The Mortal Instruments, being a warlock (half human/half demon), he has no bellybutton.
* The Mortal Instruments. But in the middle of the second volume of the books, he becomes a vampire.
* The Mortal Instruments, can read minds and hearts; justified due to his angelic status.
* The Mortal Instruments carries knives under her clothes everywhere so she won't be unarmed if she gets into a fight.

* The Mortal Instruments: City of Bones, Clary Fray hides in a fridge with the door closed over while a cooker explodes right next to the fridge.
* The Mortal Instruments: City of Bones is stated to have been a Shadowhunter and wrote chords that repel demons into his music.
* The Mortal Instruments: City of Bones, Simon confronts his friend Clary about her suspicious-looking, tattooed new associate Jace when Jace steps out of the room:
* The Mortal Instruments, Clary gives Simon pamphlets about coming out to help him tell his religious mom he's a vampire.
* The Mortal Instruments, Clary is annoyed when Jace does this at her, because it is an ability she has always envied. She gets even more annoyed when Magnus Bane turns out to be able to do it too.
* The Mortal Instruments. Despite being a Shadowhunter, from a prestigious Shadowhunter family, her reaction to Alicante being besieged by demons is to basically panic, adding her to the roster of people in need of rescuing as opposed to helping with the defense.
* The Mortal Instruments, fairies are rarely trustworthy. Although they cannot lie, they are masters of evasion. They also have a definite sadistic streak and will ally with good or evil depending on where they think their interests are best served.
* The Mortal Instruments fandom has taken for itself the name of the half-angel demon hunters around whom the books revolve, the Shadowhunters.
* The Mortal Instruments for the first time she describes him as looking like a character from her manga who was this.
* The Mortal Instruments (gay main character, male bisexual supporting character, queer male romantic sub-plot, minor lesbian and female bisexual characters, coming out story, homophobia)
* The Mortal Instruments going on. She openly questions how her brothers can so readily fall in love; on the other hand, they aren't in on the family secret.
* The Mortal Instruments, had blonde hair, and according to Jocelyn was sweet, lovely, and made everyone want to protect her.
* The Mortal Instruments has the flying motorcycles the vampires ride, which are powered by "demon energies". Also, those who look closely will notice that Magnus Bane's television is not actually plugged in. The Shadowhunters have Magitek home conveniences in Idris.
* The Mortal Instruments have their mouths sewn shut. They give up their speech for telepathy.
* The Mortal Instruments having revealed that he was married to Clary's mother) and Clary and Jace weren't siblings (for the meta-reason that they're the main couple and most fans aren't into incest).
* The Mortal Instruments he presents himself in a humanoid form not that different from Magnus.
* The Mortal Instruments. However, prior to Clary he was never in a long term relationship.
* The Mortal Instruments. However, the goblet is very picky, and kills everyone that he considers unworthy.
* The Mortal Instruments is frequently called in to provide healing whenever somebody suffers an injury that the usual Shadowhunter healing Rune cannot fix.
* The Mortal Instruments is raven-haired, pale-skinned, and very creepy.
* The Mortal Instruments is very tall and beautiful, attracting the attention of many boys. According to Jace, Isabelle hates being taller than most boys her age and would rather be dainty and petite.
* The Mortal Instruments. (It is worth noting, however, that Cassandra Clare is just a pen name; the author's real name is Judith Rumelt.) Clare has stated, when asked by a fan "What kind of a name is 'Clary'?", that she was named after a friend, whose full name is Clarissa, much like the Clary in the books. The only real similarities seem to be red hair (though Clare also states that she imagined Clary's a much darker shade) and the first four letters of their names.
* The Mortal Instruments, Jonathan Morgenstern plays the trope straight. He kills some shadowhunters. One of the first victims is the shadowhunter Sebastian Verlac.

Later, he kills Max Lightwood and Hodge Starkweather. But he also kills vampires and werewolves, who are the allies of the shadowhunters. Two of his victims are Raphael Santiago and Jordan Kyle.
* The Mortal Instruments: Magnus Bane is an immortal warlock who has taken many male and female lovers over the centuries.
* The Mortal Instruments, possibly because he tries too hard to be the mature one of the group.
* The Mortal Instruments see very often like this. They warlocks look so like normal girls, just that they have physical characteristics that show their demonic relatives, as horns, hooves, wings, claws or tails.
* The Mortal Instruments series. Anyone who has no knowledge of Downworlders or Shadowhunters is a mundane or a "mundie". Clary is included in this because even though she is a Shaddowhunter, she knows nothing about their world.
* The Mortal Instruments shares his mother's good looks and Clary describes him having long limbs like a dancer.
* The Mortal Instruments, Simon also becomes a shadowhunter and is again as strong as Isabelle, so it is unclear whether she will continue to protect him. But Isabelle is still braver and more aggressive than Simon.
* The Mortal Instruments, Simon is constantly mocked and belittled by the Shadowhunters for being a "mundane", no matter what he does. Even Clary, his childhood friend and love interest, can hardly be bothered to remember him most of the time. A number of fans, especially those not overly fond of the Shadowhunters, love him for his snark, geeky personality, and willingness to do nice things for Clary. It helps that he's one of few not afraid to call out Jace on being a jerk.
* The Mortal Instruments talks a lot, and according to Clary is one of those people who says whatever comes to mind.
* The Mortal Instruments, the extensive wards that conceal and protect Idris also appear to interfere with technology. Hence the Shadowhunters do not use things like automobiles to get around within the country, even though those that live elsewhere are quite familiar with them. Witchlight is used to provide things like illumination that would normally be powered by electricity in other countries. Elaborate mechanical devices, possibly related to phonographs, are used to play music. There is no cellular coverage or internet access naturally. It is also noted that Runes interfere with the proper ignition of gunpowder, which is why Shadowhunters do not make use of firearms.
* The Mortal Instruments: The Shadowhunters protect humanity from supernatural creatures. However, the Shadowhunters are themselves supernatural in nature.
* The Mortal Instruments. They also have their share in the fight against demons and other evil creatures.
* The Mortal Instruments, they're a faction of fairies unaligned to any courts. Members can be recruited from fairies or mortals. The women were considered too vicious and split to form another hunt called Adar Rhiannon.
* The Mortal Instruments: This is apparently not unusual for warlocks in general. They typically cast spells for a living.
* The Mortal Instruments, this is common from exposure to angelic or demonic influences and/or bodily fluids.
* The Mortal Instruments, this is the primary form of magic employed by the Shadowhunters, who use Angelic Runes to perform a variety of functions, including giving themselves superhuman physical abilities. Clary's special aptitude with Runes is essential to the plot.
* The Mortal Instruments to consider downworlders as like humans, rather than like demons.
* The Mortal Instruments. Toward the end of the book series, however, he is transformed back by a demon into an human being. But shortly thereafter his friends find him, and make him a shadowhunter.
* The Mortal Instruments unwise thing to try given that he is a powerful archangel.
* The Mortal Instruments, uses a silver-gold whip when she fights demons, one which can somehow cut through flesh and bone. It's partially magical, however, which explains its unusual cutting capacity.

* The Mortal Instruments when Alec, Jace, and Isabelle return from fighting a demon in a subway tunnel and Alec questions why Izzy never gets any dirt on her. Her response? "I'm pure at heart. It repels the dirt."
* The Mortal Instruments, who are half an angel and half a demon. But there are also half-fairies. These are to a quarter an angel, to a quarter a demon, and half a human.
* The Mortal Instruments who is in love with her and she herself has a crush on demon-slaying Shadowhunter, Jace Wayland.
* The Mortal Instruments who rely on each other in battle and hunt demons.
* The mortal Psyche's Divine Level beauty led to her being worshiped as a goddess and making the god of love himself fall for her.
* The mortal woman Ino, who had taken care of Dionysius when he was young, was rewarded by Zeus by being made into a goddess who helped rescue shipwrecked sailors, appears in
* The mortal woman Psyche was made immortal after she married Eros, the god of love.
* The mortar used for the Great Wall of China - which has lasted for hundreds of years - also used to fall into this trope
* The Mor-Tax aliens don't have it very easy either, as they have to struggle to adapt to earth and free their comrades and war ships that are being held in military storage. Which, of course, is hard due to the interference of the Blackwood Project. In fact during the second season one of the leaders of the second wave of aliens (the mothren) questioned another lead mothren over the choice of picking planet earth in the first place.
* The Mortis-trilogy, "Nomad Droids", a large portion of the Darth Maul-storyline, and the Yoda-arc are pure
* The Morton Downey Jr. Show has been condemned by critics as 'the absolute worst in TV entertainment', but they always had high ratings.
* The Morton Downey Jr. Show only lasted two years (1987-1989) but it started the whole "trash television" craze.
* The Mortuary Chronicles. Deconstructed somewhat, since his behavior has made him a social pariah, which he is not particularly happy about.
* The Mortuary Collection and condemning her to take his place as the mortician.
* The Mosaic Code itself has a few laws that could technically qualify: no eating lobster or shrimp, no mixing fabrics, no trimming your beard, and even crossbreeding animals or using mixed seed on a field. It also has some that
* The "Moses" segment of "The Griffin Family History" plays this trope agonizingly (yet hilariously) straight: the Jews being liberated from Egypt's tyranny aren't impressed by
* The Mosin-Nagant rifle, designed in 1891, was continuously produced until
* The Mosquito," a device that outputs high frequency tones that only kids can supposedly hear.
* The Mosquito Coast: Allie wants to be one of these but lacks the apocalypse to make it real, so he pretends there was a nuclear war to make his engineering abilities seem more valuable.
* The Mosquito Coast, based on the novel of the same title by Paul Theroux, Harrison Ford is a Yankee inventor who takes his family to live in the jungle on the coast of Honduras. Their misfortunes culminate in a perilous river journey during which the inventor grows increasingly paranoid and finally winds up completely insane.
* The Mosquito Coast by Paul Theroux is about a Yankee inventor who relocates to the coast of Honduras, taking his wife and children along. Their experience in the jungle is a series of misfortunes and disasters, culminating in a perilous river journey during which the inventor grows increasingly paranoid and finally goes completely insane.
* The Mosquito Coast, in which he plays a radical, maverick inventor establishing his brand of civilization in a remote coastal town.
* The Mosquito Coast is a non-Science Fiction example. Ford plays an engineer who specializes in refrigeration technology; only problem is, most people already have

fridges and air conditioners. So he moves his whole family out to the jungle in the middle of nowhere and builds a giant refrigeration machine just so his talents will be better appreciated. This isn't enough to satisfy his budding megalomania, so he goes on a quest to show a block of ice to some reclusive tribals who have never seen it, presumably so everyone would ooh an ahh over it and him.
* The Mosquito Coast, so even in his darkest moments, he's never as menacing or as terrifying as he is in the novel.
* The most active greater Abyssal power, the Prince of Ten Thousand Leaves, is a self-aware
* The Most Amazing Story Ever Told are made by Goonland, and both involve the main character floating in an inner tube in the water.
* The Most Amazing Story Ever Told, in addition to the numerous appearances by the characters of each website that participated in the series.
* The Most Amazing Story Ever Told, with a pair of conjoined mutated humans recapping the previous episodes on the "retro" web, and then turning their heads into rear ends and defecating from them, at which point the episode finishes with a fanfare.
* The most amusing part being that the author wrote them as losing to even the simplest tactical maneuvers of the setting's various big bads, with the fact that they've been on the ropes for most of a Millenium at the beginning of the series and the evil empire doesn't even bother going after them until they get a pet (human) dragon-rider demonstrating pretty thoroughly that they've
* The most ancient lore for githyanki and githzerai is that they are a human subspecies engineered by the illithids, which turned against them. Ironically, similarly ancient lore for the illithids is that they are also a mutated offshoot of humanity from the most distant future, who have traveled back in time to avoid the collapse of the universe into entropy.
* the most angelic of Space Marines all the more miraculous, and may help explain the chapter's preference for shock assaults.
* The Most Assassinated Woman in the World, Paula Maxa. However, she did not fake her own death on-stage, and in fact moved on to film, and died in her 70s.
* The most badass krogan around is the leader. Wrex is well on his way to becoming the lord of the krogan, and he killed a thresher maw on foot. Shepard briefly wonders why in such a warriorlike race someone would choose to become an ambassador. The answer? He (the ambassador) is the strongest warrior in the clan and
* The most basic, ubiquitous kinetic weapon currently in use? Plain old firearms. A bullet fired from a handgun or rifle does damage to its target not by exploding, but simply by going really really fast. Every army on the planet uses them; only knives can claim to pass them up in ubiquity, and only because they serve purposes other than as weapons.
* "The Most Beautiful Girl (In the Room)" is all about this. The speaker hits on a girl by telling her that she's the most beautiful girl in the "whole wide room" and that when she's walking down a street, she'd probably be among the top three hottest girls on the street (depending on the street).
* "The Most Beautiful Girl (In the Room)" is this trope from beginning to end.
* "The most beautiful love story ever told comes to life on Broadway." —
* The Most Beautiful Moment In Life: The Notes. Namjoon hates that poverty reduces people to this, making them give up things that should be precious.
* The "Most Beautiful Suicide," mentioned in the trope description. In 1947, a young woman leapt to her death from the Empire State Building and landed on a car. The buckled metal concealed her injuries, making her appear to lie in a state of
* The Most Beautiful: The progress of the women at the military lens factory is illustrated by a line graph that trends up when they are dedicated and working well, and trends down when various factors (fatigue, internal bickering, a broken leg) slow them down.
* The most beautiful woman in all Six Realms is caught in a love triangle with two power deities, one of whom is the Heavenly Emperor,
* the most beautiful woman in Westeros nice people. Tyrion, an ugly, deformed dwarf

is by far the most compassionate and kind of the Lannisters (although he's also done some pretty questionable things), and Jaime's redemption proceeds along with the decrease of his attractiveness.
* the most bizarre, brightly colored way.. No known Transformers product remotely resembling this thing exists, either; likely knockoff victims like Monstructor or the Scramble City-type Transformers simply don't match up to the details. The closest they come is apparently being a hybridized combination of Dinobot bodies and Predacon assembly patterns, which makes the combined form distantly similar to Predaking.
* The most blatant evidence they care more about cheating than winning is the episode where the first half was in desert and the second in Scotland. After three of the four events, the Rottens were leading with 95 points while the other teams had 40 points each. Then the last event started: a three-legged kilt race. (
* The most blatant example is England (5'9) and America (5'9.6). Both
* The most blatant example of the Doctor as this trope was the Seventh Doctor. Several episodes, particularly in his later two seasons, were devoted to him caring only about winning, above all else (this is particularly true in the episode "The Curse of Fenric").
* The most blatant example of this would be a tape in the furnace room that has a researcher claiming that she can hear the furnace talking to her, saying it's hungry.
* The most blatant examples are the scaled-up Suika and Yuuka, Megas's actual opponents. Suika was subjected to a powerful uppercut-spin kick combo, a colossally-sized warhead, and a chunk of her own Wrecking Machine firebomb; Yuuka was assailed by one of her own bullets accelerated to mach speed,
* The most blatant is the tunnel one: Jasmine, her son and the dog hiding in a maintenance room inside the tunnel could be plausible...
* The most common and notorious being alcohol: alcohol in sufficient amounts often renders people almost insensible to pain, so someone drunk may well ignore just how badly injured they are or that they are being beaten to a pulp or that they have otherwise sustained injuries too severe to be standing, much less fighting.
* The most common by far is Bo and Luke staging simple escapes from the Hazzard County Jail, often tricking Rosco or one of his deputies (most often Cletus, but more than once Enos) into letting them escape.
* The most common cause is the FEV, the Forced Evolutionary Virus. This was a mutagen created by the U.S. government in an attempt to create living weapons for the war against China, whose effects mostly center on increased muscle mass and aggression, as well as decreased intelligence and complete sterility. The super mutants — stupid, vicious and aggressive hulking green humanoids — are the result of humans being exposed to the FEV. Other such mutants include the super mutants' hounds, the centaurs, and
* The most common complaint against Nintendo is the company "always producing the same games with the same plot elements". People tend to ignore the fact that Nintendo always refines their flagship franchises so that it's still familiar with older fans while also bringing something new for them and new fans alike. There's also the point where Nintendo tries to do something different, only for people to complain
* The most common complaint of laptops suddenly seeming to hit a wall in performance speed after the advent of the Core i-series Intel processors was due to the continued use of slower, "power-saving" hard drives with throttled disk spin rates in order to reduce power consumption. You see, Windows sometimes needs to run disk-intensive operations due to writing/rewriting either files or cached information. However, after a few months of writing/deleting/rewriting files, the hard drive's contents can get rather fragmented, resulting in increased seeking times as the hard drives would need to spin more in order to access, read, or write files. On budget machines that already had slower processors, this would result in a vicious cycle of waiting for processor operations,
* The most common creature capable of pulling off this trope in the developed world is the ordinary house fly, but fortunately such an event would actually be a

good thing. Flies typically lay their eggs in rotting meat, and the larvae proceed to devour the whole thing. If a living creature is so badly injured that they have a gaping wound, and if human are unable to get to medical attention, but are still able to survive for an extended period of time, the flesh at the edges of the wound will almost immediately start to rot. Flies will become attracted to this and lay their eggs, however the larvae
* The most common disposal is a simple burial in out-of-the-way places, but this always carries the risk of being discovered later. Christopher infamously has to move the same body
* The most common explanation for Draco Malfoy allegedly coming back to life after killing himself, is that his "corpse" was actually a dummy put there by Voldemort.
* The most common form of chain letters on the internet usually tell the story of a girl who either committed suicide or was murdered in a cruel way, and then demand you to copy and paste the letter to a certain amount of YouTube video comment sections or else the girl's ghost
* The most common form of FTL is achieved by traveling through the Warp,
* The most common interpretation is that a man named Jimmy is cracking (milling) corn to turn it into hominy or liquor, but some people think it comes from "gimcrack" meaning useless, so he doesn't care about his corn, or possibly his liquor, since "corn" was slang for liquor in the past. It could also be interpreted as Jim being the master and cracking his "corn" (skull), it being slang for gossiping, a corruption of "gimme cracked corn", or a euphemism for Jim Crow or Jesus Christ.
* The most common is the punji stick trap, a stick laden with a wooden board full of sharpened bamboo shoots. This one is mainly issued to Guerillas and Machine-gunners.
* The most common large, herding plains herbivores in Africa are antelopes. In Australia, however, this niche is instead filled by
* The most commonly accepted explanation for the name of Petit Jean Mountain in Arkansas is that a young French lass dressed as a cabin boy ("Little John") to be near her fiance, who was a sailor on a ship headed to the New World. She caught ill and died, and her alleged grave can still be seen on the mountain.
* The most commonly appearing experimental weapon from Pelvanida Base's arsenal in
* The most commonly-reported reason for performance issues in most ageing computers/electronics is that the primary memory storage is either suboptimal or degrades faster than expected. For example:
* The most commonly seen alien races would probably be the Vulcans, Klingons, Romulans, Cardassians, and Ferengi. Of that list, Cardassians and Klingons are about as strong/tough/long-lived as humans (though Klingons have redundant organs so they're somewhat more resilient), Vulcans and Romulans are roughly thrice as strong as an equivalently-sized human and live twice as long, and the Ferengi are smaller and weaker, though that wasn't true in their first appearance.
* The most commonly used logo for Cap's comics is one that has the words "Captain America" written in an arching style, and each word filled in with red-white-and-blue stripes.
* The most common machine gun in China, the Type 67 is an upgraded WWII-era DPM, itself an upgrade of the DP28.
* The most common models are modular, podlike ships shrouded in large leaves that act as solar panels and armed with spore pod launchers. The largest, rarest capital ships are essentially spaceworthy forests, with numerous titanic trees anchored around a technological core and protected by force fields from the hard vacuum of space.
* , the most common mount used is a Mustid which resembles a horse-sized ferret. Hermione rides a gryphon, which is rare enough for Harry and Dudley to have no idea what it is. According to Draco, the only form of horse left in the world is the Threstral.
* The most common one involves the baby being shipped off to an orphanage, which results in
* The most common one is that your dogs can breed. This is despite the fact

they're puppies who can't be more than 3-to-5 months old aren't old enough to breed. Numerous videos exist "proving" this can occur.
* The most common one is the I-Field, which only protects against beam weapons, as all it does is make a cushion of particles that stops anything with less mass than the particles. They also made specialized versions to keep ships aloft in the air. Later, they developed the Beam Barrier/Beam Shield, which is basically a really wide
* The most common "simple" breakdown is to lock the senior officers inside and turn off the safety protocols. More extravagant scenarios can occur, such as poorly-worded instructions
* The most common size and binding for the average manga makes it nicely hand-sized when gripped opposite to the spine, and just thin and strong enough for effective aimed strikes to areas such as the wrist. If you're already holding a book, there are much worse choices for an
* The most common stereotype of the environmental movement consists of liberal Romanticist hippies fighting against industrial titans. However, the movement is actually strongly divided between Romantic and Enlightened wings over issues like nuclear power and genetic engineering (supported by Enlightened and opposed by Romantic environmentalists). The opposition is even more complicated; the messages usually take Enlightened forms (such as questioning the science behind climate change), but in America in particular, anti-environmentalism often consciously draws upon conservative elements (Romanticism) for its support.
* The most common version of this was when warriors would eat the brains or hearts of vanquished enemies to gain their strength or energy.
* The most common way for aircraft carriers to sink in WWII - by far - was by igniting the vapors from ruptured aviation gasoline tanks, which would lead to a colossal explosion and lots of fires.
* The most common way is for two of the characters involved in the triangle to end up together, and the other one being eliminated through
* The most common way of FTL travels utilize a kind of hyperspace known as the Warp. It is a parallel dimension where there is no time as we understand it (so one can reach destination hundreds years into the future — or into the past), but more importantly, it is a sink of all emotions and ideas (and probably souls) for all races of the galaxy. Guess what? The mix isn't very nice, it is downright nasty. Traveling through the Warp means traveling through a very literal hell, complete with demons, dark gods and so on. Gellar Fields maintain a pocket of "normal" space in and around the ship, but sometimes natives leak through. In the setting the Warp also fuels magic, so local mages (psykers) are always under risk of being possessed and often hear voices, offering... things.
* The most common were his opener: "Finally, The Rock HAS COME BACK to (town/city the show is in)!" and his closer: "IF YOU SMELLLLLLLLL WHAT THE ROCK! IS! COOKING!"
* The most confusing slate of team anniversaries possibly belongs to MLB's Houston Astros. Their first season was in 1962 as the Houston Colt .45s, but legal action from Colt's Manufacturing Company forced them to change their name to the Astros in 1965. The Astros had celebrated their 25th season in 1986, their 35th season in 1996, their 40th season in 2001, and their 45th season in 2006. But then they decided to celebrate the 45th
* The most dangerous and powerful probably being Thoth-Amon. He turns up by name and fearsome reputation in several Conan tales, and although Conan faces several of his dooms by chance and the character himself is met in "
* The Most Dangerous Game, and heads back to his castle only to find the hero waiting to jump him.
* The Most Dangerous Game: Count Zaroff — in a change from the short story, where he's a general — is a reclusive madman who hunts human beings like animals.
* The Most Dangerous Game he find out the Zaroff is a madman who hunts humans for sport.
* The Most Dangerous Game "homage" episode, "Island of the Damned", the villain is alleged to have successively belonged to the Nazis, the Communists, the Mafia, and

KAOS, at which Smart exclaims, "If there's anything I hate, it's a joiner!"
* The Most Dangerous Game" is your typical aristocratic big game hunter, with an eloquent manner and a taste for the final things in life. He's also a depraved serial killer.
* The Most Dangerous Game stems from the fact that he believes that the people that he hunts are weak and that he is strong. The other excuse is that hunting animals was starting to bore him.
* The Most Dangerous Game, where the narrator digs one to kill one of Zaroff's hounds.
* The most dangerous kind: a character is put into a position where they're dangerous to the murderer's schemes. A common way of doing this is trying to
* The Most Dangerous Video Game: An evil video game that can cause real-life harm to its players.
* The Most Dangerous Video Game-style creepypastas. Unless there's a supernatural force forcing them to keep playing, you'll probably hear some variation of "I knew I should probably stop playing, but I didn't" at some point.
* The most dedicated medic among the students that we've seen so far, however, may just be the blind devisor Jericho, who isn't actually on the team (though friends with some of them after a few harrowing encounters) and has to do it all by inventing the tools he needs himself because he has no actual innate healing powers.
* The most destructive weapon in the setting is the Dáinsleif, a
* The most devastating of which was, after they got engaged and are finally about to have sex,
* The most developed is the Darian calendar for Mars, which has 24 months of 28 Martian days each (called
* the most difficult boss fight, if you beat Jack first Silvana says she's glad he's gone.
* The "most difficult" claim is based on the game's system where the difficulty of any test is randomly rolled for before the test. Far from being difficult, this makes everything a 51% chance.
* The most difficult problem for Americans in Japan when dining out is resisting the urge to tip the wait staff when dining out. Americans consider not leaving a tip at all to be extremely rude, while the Japanese consider leaving a tip to be extremely rude. Both cultures see it as sending a message about the wait staff's skill though: Americans believe that it's done to show gratitude for quality service, while in Japan, it's perceived as giving the server charity because he or she is so terrible they'll be out of a job soon and will clearly need the extra money.
* The most direct answer a mortal gets is that the question itself is as nonsensical as asking "what color is Wednesday?", so no one is asking the right question.
* The most direct example of this trope, however, is just before the intermission, when one cast member has fled the theatre and another has chased off after him, leaving the third alone to entertain the audience for a few minutes. The stage directions simply read "Daniel stalls"; this can cover anything from playing the accordion to fire-eating.
* The most disturbing this is, however, that he is the most well-balanced character in the series and apparently gets happily married at the end. And indeed, while his issues may be disturbing, he doesn't let them become an obstacle to his life, unlike every other character.
* The most dreaded being in all of Norse Mythology was Níðhöggr, a
* The most effective weapon in the war turns out to be "The Lobotomizer"—a cross between an entrenching tool and a battleaxe, invented by Marine infantrymen.
* The most egregious case was Book 10 "Crossroads of Twilight" which is a multiple hundred-page-long book about people's reactions to the finale of the previous book. It plays out the day of and its following day or so
* The most egregious example, however, has to be the last four episodes of Volume 5, from

* The most egregious example in the first pair of games is Rayquaza: the climax hinges on Rayquaza having a Hyper Beam attack strong enough to
* the most electronegative chemical known, meaning it bonds to almost any other element and absolutely will not let go without some serious chemical prodding. (It also bonded with a good number of 19th century chemists trying to isolate it, who are now remembered as the "Fluorine Martyrs".) Fluorine's sheer reactivity, in fact, makes it ideal for creating nonreactive substances like Teflon and non-polluting refrigerants, as well as a number of oddball uses in medical chemistry. That roll of Teflon sealing tape in your toolbox? Nearly 80% fluorine by weight... and, chemically, possibly the single safest thing in your house.
* The most elite troops of the Ashina Clan are the highly agile Nightjar shinobi and exceptionally skilled samurai swordmasters protecting Ashina Castle.
* The most entries in any film series belongs to the Wong Fei-hung franchise, which consists of a massive
* The Most Epic Story Ever Told in All of Human History: After posting episodes once or twice per month from May to October 2020, the twelfth episode wasn’t released until March 2021, over five months later.
* The Most Epic Story Ever Told in All of Human History) anything actively evil in the trailer, leaving his morality ambiguous but seeming to side toward villain.
* The Most Epic Story Ever Told in All of Human History are both bald and evil. However, most of the other characters are bald as well, making them stand out less for it.
* The Most Epic Story Ever Told in All of Human History assigned as his sidekick.
* The Most Epic Story Ever Told in All of Human History at the end of the trailer.
* The Most Epic Story Ever Told in All of Human History at the skatepark, and to try to win a skateboarding competition to advance his evil plans with the prize money.
* The Most Epic Story Ever Told in All of Human History: Captain Epic, who is much older than the rest of the cast and also one of the most laid-back in the trailer.
* The Most Epic Story Ever Told in All of Human History compared to the other two.
* The Most Epic Story Ever Told in All of Human History competence, making him a character who completely fails at his attempts to do evil.
* The Most Epic Story Ever Told in All of Human History did surprisingly well in the skateboarding competition. But then he tried to interfere with Little Miss Epic’s run and completely failed, looking like a doofus in the process. His victory wasn’t guaranteed, but he at least would have stood a better chance if he didn’t go out of his way to try to cheat, resulting in leaving a much worse impression of his skateboarding abilities.
* The Most Epic Story Ever Told in All of Human History doing this for an entire half an hour. Yes, really.
* The Most Epic Story Ever Told in All of Human History: During “The Most Epic Superhero Origin Story Ever Told”, Ridiculously Epic nukes his band class for playing their instruments poorly.
* The Most Epic Story Ever Told in All of Human History: Epic Robot Guy begins as a good guy in “The Most Epic Superhero Origin Story”, turns evil before returning in “The Most Epic Crime-Stopping Mission”, stays evil for a few episodes, and then turns good again in “The Most Epic Introspective Journey on a Nautical Voyage”, which continues into the next episode, “The Most Epic Mystical Quest” as well.
* The Most Epic Story Ever Told in All of Human History, eventually returns to the side of good in “The Most Epic Introspective Journey on a Nautical Voyage”.
* The Most Epic Story Ever Told in All of Human History. For example, taking Epic Fail’s slurpie and spitting it in his face, and later taking Captain Epic’s slurpie just to spike it into the ground. Neither of them did anything to warrant this.
* The Most Epic Story Ever Told in All of Human History has the propensity to say (and sing) "bro!" at every opportunity. He also uses “dude” quite often.
* The Most Epic Story Ever Told in All of Human History, he also shows up to fill

the waiter role whenever a restaurant setting appears, and makes a comment suggesting he might do construction work as well.
* The Most Epic Story Ever Told in All of Human History impression used on a different character.
* The Most Epic Story Ever Told in All of Human History: In “The Most Epically Inspirational Sports Movie Ever”, after Ridiculously Epic’s failed attempt at cheating in the skateboarding competition causes him to fall off of the platform, his face lands in a pie.
* The Most Epic Story Ever Told in All of Human History informs him that he was inspired to become a better person because of Captain Epic’s dedication to doing good. This promptly revitalizes Captain Epic’s spirit.
* The Most Epic Story Ever Told in All of Human History: Little Miss Epic is a teenage girl who can do crazy feats like skateboard and jumprope at the same time.
* The Most Epic Story Ever Told in All of Human History: Little Miss Epic talks like this.
* The Most Epic Story Ever Told in All of Human History not nice, meaning that he’s either lying or delusional, or some combination of the two.
* The Most Epic Story Ever Told in All of Human History: Ridiculously Epic refers to himself as “evil” several times during “Ten Steps to Saving the World that Totally Won’t Work”, and has “evil” written across his skateboard during “The Most Epically Inspirational Sports Movie Ever”.
* The Most Epic Story Ever Told in All of Human History: Said word for word by Ridiculously Epic as he flees the scene in “The Most Epic Mystical Quest”, due to a dragon bursting into the room and attacking everyone, making his attempt to scam the Epic Skatepark Owner no longer worth it.
* The Most Epic Story Ever Told in All of Human History shouts the trope name. It goes just as well for him as the original Leeroy Jenkins.
* The Most Epic Story Ever Told in All of Human History: Some of the minor characters get an episode dedicated to them every now and again, such as Epically Avoids You in “The Most Epic Day in the Life at a Soul-Sucking Job” and the Epic Skatepark Owner in “The Most Epic Mystical Quest”.
* The Most Epic Story Ever Told in All of Human History sports this as her hairstyle.
* The Most Epic Story Ever Told in All of Human History's Terra, one of the most notorious examples of this trope out there, randomly shows up to say "Okay, I believe you!"
* The Most Epic Story Ever Told in All of Human History, takes center stage and is more or less the main protagonist of episodes 2 and 7, “Ten Steps to Saving the World that Totally Won’t Work” and “The Most Epic Supervillain Origin Story”, respectively. He is just as evil as usual during these episodes.
* The Most Epic Story Ever Told in All of Human History: The “poorly-drawn alien cats” from the trailer finally show up as actual aliens in “The Most Epic Sci-Fi Adventure”, and they are friendly. Even sharing their star fruits with the protagonists.
* The Most Epic Story Ever Told in All of Human History: The credits are exactly as follows: "Literally Everyone Voiced by The Most Epic Person Ever", "Animated by The Same Guy", "Written by Also The Same Guy", "Directed and Produced by Guess Who? The Same Guy", and "Also Edited by The Same Guy Lol".
* The Most Epic Story Ever Told in All of Human History the sun during a rampage.
* The Most Epic Story Ever Told in All of Human History. The voice actor is male but two of these characters, Little Miss Epic and Epically Avoids You, are female.
* The Most Epic Story Ever Told in All of Human History this in “The Most Epically Inspirational Sports Movie Ever”, with the line “Nothing like antagonizing random teenagers for no reason!”
* The Most Epic Story Ever Told in All of Human History threatens to arrest Epic-Man for being late on filing his taxes. Epic-Man is forced to flee the crime scene he was trying to help with because of this.

* The Most Epic Story Ever Told in All of Human History to be on the side of the villains.
* The Most Epic Story Ever Told in All of Human History to be taking on this role for the series proper.
* The Most Epic Story Ever Told in All of Human History with the text “he became a bad guy! Dun dun dunnn!” written next to him when he appears.
* The most eponymous are the usual longspear (fixed with a tassel behind the blade which, in expert hands, can help distract the opponent and interfere with his/her ability to judge where the point is going, as well as preventing blood from running down the haft and making it slippery)
* The Most Ever Company - anonymous art collective / avant-garde indie production company.
* The most evil thing Kraven the Hunter did was to inflict this on the hero during the
* The most expensive purchasable weapon from the Nightmare Vending Inc. in
* The most explicitly magical "drug" in the game is The Pale, a field of complete breakdown of reality that surrounds countries and continents, has properties that drive people insane, cause them to lose their memories or gain the memories of others, causes them to lose the ability to sleep, and can also make them addicted and crave a return to it. It is also believed by some to have health-giving effects - alcohol can be Pale-aged (though this doesn't appear to change its effects) and a book of natural remedies you can find suggests the Pale has medicinal properties.
* The most extreme cars of the world also deserve mention: the McLaren F1 (first appeared in
* The most extreme case is Sephiroth, who is technically human, but with truly bizarre DNA since he was altered in the womb with Jenova cells and infused with mako energy.
* The most extreme case of this is the original manga and the film based on it:
* The most extreme example concerns the destruction of a plot-important bridge. For that purpose, an actual steel-frame bridge was blown up in Yugoslavia, but the resulting shots were not good enough. So the director demanded another, similar looking, steel-frame bridge to be blown so he can film it again. The crew then found such a bridge - in Czechoslovakia.
* The most extreme example is certainly Lose-Man. His superpower is to attract and absorb ambient "lose" — meaning at the best of time he's extremely unlucky, and people slap or hit him without even meaning to. Sure, he can release all this energy in a devastating blast... about once a month.
* The most extreme example is perhaps Alodi, introduced in the manga as the very first Guardian, he wasn't even mentioned in World of Warcraft until he got an Artifact named after him in Legion, and he
* The most extreme example is probably Thandi Palane, who comes from a very high gravity world that did its own share of genetic engineering. One character actually notes that for a non-intelligent animal the changes would probably be extreme enough for them to be considered a separate species. The book also discusses the pros and cons of her genetics. She's incredibly strong, but her density is high enough that she can't swim without help, and while she has great endurance she needs to eat a LOT of food and will starve much faster than most people if she doesn't get enough.
* The most extreme example of this is the woman who gains super-intelligence and inventive skill and uses it to make a crude boobytrap to kill her cheating husband. That's it. Even the other alien-influenced people at least had the stones to do something like make laser guns or teleporters...no, she built a crude electric chair. And died too. Literally too dumb to live, in spite of being a super-genius now.
* The most extreme example of this trope would be from the SNES game
* The most extreme example would be Aang Vs. Fire Lord Ozai in the finale. During the duel, Aang manages to finally unlock the Avatar State and is able to bend the elements with almost like gesture-magic - only the Avatar State's power gives each gesture an absolutely titanic effect. For example, clenching his fist crushes

boulders to a hundredth of their size.
* The most extreme example would be Hussar uniforms (the cavalry uniform with the cross-bands on the chest, short fur hat, and jacket on one shoulder). Originally worn by Hungarian units. Everyone copied the look (especially officers) for most of the 19th century, despite being an absolute pain to wear. The Polish-Lithuanian Commonwealth's winged hussars added wings and leopard skins.
* The most extreme has to go to the Spy who saps a sentry from a distance, disguises himself in plain view, and wins in direct melee combat against the Sniper and the Medic.
* The most famed curse in football/soccer belongs to the Portuguese side S.L. Benfica. After considerable success in European competitions in the 1960s, coach Bela Guttmann quit the club after an argument with the club's board of directors over his wages. He proceeded to say that Benfica would not be European champions in 100 years, in what became known as "The Curse of Bela Guttmann". Ever since then, Benfica have reached five European Championship finals (1963, 1965, 1968, 1988, and 1990) and three UEFA Cup/Europa League finals (1983, 2013, 2014), losing them all. We're barely past half a century into the curse, approaching 60 years now while Benfica still waits.
* The most famous and deliberately over-the-top example is probably cartoon character
* The most famous artists and scientists of the Italian Renaissance were almost all military engineers including Michelangelo and Da Vinci.
* The most famous Aside Glance in the history of CGI came at the end of
* The most famous, but not the only example from that show — there was a holodeck
* The most famous case of a horse dying this way is Empress Bullet, who
* The most famous character of Brazilian comedian Paulo Gustavo was D. Hermínia, from
* The most famous cheating scandal in football was the 2006 Italian football scandal known as "Calciopoli", where national powerhouse team Juventus was shown to be in cahoots with other teams such as Milan, Lazio, Reggina and Fiorentina for rigging matches on their favor by picking referees that favored Juventus. The result? Juventus was stripped of their 2004-05 and 2005-06 Serie A titles and was forcibly relegated to Serie B for the 2006-07 season, while Fiorentina and Lazio were denied a place respectively in the Champions League and the UEFA Cup. Milan was deducted 30 points from their 2005-06 campaign, while Reggina merely had a $70,000 fine and had their president banned from all football activities for two-and-a-half years.
* The most famous example is probably the octopus, "octo" being Greek for "eight" and "pus" for "feet".
* The most famous example is the 1919 Black Sox scandal, where eight members of the Chicago White Sox were paid to lose the World Series to the Cincinnati Reds, and were subsequently banned from baseball a year later.
* The most famous example is the aptly-named Gundam Exia "Seven Swords." CB had observed that
* The most famous example is the question, "How many moons does the Earth have?". In the A Series "Astronomy" episode the answer is 2, due to the inclusion of Cruithne. By "Beavers", the answer is either one or five due to the discovery of three more satellites, and if Cruithne is a moon then so are they. In "Knowledge", the answer is at least 18 thousand due to the discovery of "mini-moons". And by "Landmarks", the Earth has no moon; the Earth and the Moon are instead a binary planet system.
* The most famous example (to the point that this trope was originally named "George Lucas Love Story") would probably be Anakin Skywalker's relationship with Padmé in
* The most famous fight in Congress took place on May 22, 1856, when Congressman Preston Brooks of South Carolina
* The most famous in pro wrestling was when officials from Japan, North and South Korea gathered together with

* The most famous instance laughed at by real Navy pilots is the buzzing of the control tower. A real pilot doing this would be grounded (most likely permanently) and up on disciplinary charges. That's an INCREDIBLY reckless and dangerous thing to do.
* The most famous is probably Cable's virus, which is mostly kept in check by his vast
* The most famous is probably the Vulture, who briefly possessed the ability to
* The most famous is the Casaba Howitzer, also called a nuclear shaped charge. Basically, instead of wasting almost all of of a nuclear weapon's output in an omnidirectional explosion that would mostly miss the target, a bit of engineering ensures that a good 1 to 50% (depending on design and yield) of the energy is radiated into a cone, by using the nuke's energy to propel a solid mass. Most of the details have never been declassified, but as spin-off of Project Orion would be using technology decades old now. The original nuclear shaped charge concept called for a tungsten jet to be converted to a jet of plasma and propelled at tens of kilometers per second with a very wide cone angle of ~22.5 degrees. It was to be used as propulsion, and could supposedly focus 80-85% of a nuke's yield.
* The most famous is "The G-Men", a set of session musicians who have appeared on all of his albums except
* The most famous is the Prohibition-era Chicago Gang War that spanned from 1920 to 1931 and only killed 500 to 1300 people in total, but was fought with far more brutality and sadism than
* The most famous is the "Vimes Run", where the students are convinced to take a run at Sir Samuel Vimes, who's all to happy to give them a reality check.
* The most famous is Trauma, an Evronian general who had Evron's best scientist rebuild him with
* The most famous non-media example (apart from St. Paul) is probably Friedrich Engels. He worked closely with
* The most famous of the Ginaz swordsmen is Jool Noret, the first true Swordmaster. His skill with a blade was so great that no man or machine could kill him. Only a massive tidal wave finally ended him.
* The most famous of them all are the Slimes; cute little blue droplets with a big happy smile. Whenever they talk, they tend to replace certain words and syllables with slime-related puns (like "gooman" instead of "human"), and they're always given child-like voices.
* The most famous one: Bogeymen scare their children with stories about
* The most famous open letter in history, "J'accuse...!" ("I accuse...!") by Émile Zola did produce an effect, namely, blowing the antisemitism, incompetence, and cowardice that led to the Dreyfus Affair wide open and eventually resulted in Alfred Dreyfus getting a full pardon and a Légion d'honneur medal as an apology. The document is still considered required reading in many French schools.
* The most famous phenomenon this leads to is talking birds; for a parrot to be ready to learn to talk, it has to be separated from any other parrot, so that it imprints on its human owner and tries to imitate it.
* The most famous version of "Now That We Found Love" is the 1991 hit by Heavy D and the Boyz. He
* The most famous was a series of Claymation bumpers where the characters would sing the line "After these messages will be right back!" (One of the most catchy can be seen here:
* The most frequent use of this practice is to promote telenovelas; is it set in a different country? Expect to see stories about said country. Has a main character succumb to an uncommon disease as a
* The most frequent victims of this (even by X-Men standards) are any of the younger generation X-Men. After Grant Morrison finished up New X-Men, virtually all of them disappeared save one or two who act as sort of 'flagbearers' for that class like Husk and Pixie. The practice became so common that fans call it "becoming wallpaper" since the only time those characters will be seen again is in wide background shots of huge groups of mutants.

* "The most frightening religious painting in the world," according to
* The most generic definition would be any evil or injurious spirit or supernatural being.
* The most gibs were generated by multiboxing Death Knights, meaning a large group of Death Knights being slave-controlled by one player. Extremely powerful at the time, they could quickly build up a large number of corpses and trigger a massive chain reaction of gibbing corpses.
* The most glaring discrepancy is that of the early years of Homer and Marge, who (according to the show's original early '90s
* The most glaring example is Cole, though he's a double-subverted case. He seduced Phoebe in Season 3 as part of many plans to kill the Charmed Ones, but in time he genuinely fell in love with her, and she returned his feelings after the truth came out. He worked hard to prove himself and managed to earn the good graces of Prue, Piper, and even Leo. But through it all, the evil side never stopped trying to drag him back, and eventually, in Season 5, Phoebe ended their relationship in spite of still loving him. Cole went mad and eventually his efforts to win Phoebe back resulted in his death; only in the tie-in comics was their relationship mended, Cole understanding that he was never right for Phoebe. So, in the end, love did redeem him...but ultimately, not long after that, a
* The most glaring example would be professional cycling. On a flat stage of the Tour de France, the race will almost inevitably follow a certain pattern. A small group of nobodies attacks at the start of the stage, the peloton lets them go and conserves energy, managing the gap. As the stage draws to an end, the peloton draws closer, and eventually catches the exhausted breakaway (the breakaway is often unable to even stay with the peloton once they get overtaken.) Then the sprinters, who have done almost no work all day, attack in the last few hundred metres and win the stage. Of course, in less flat stages the breakaway can succeed, and on the toughest mountain stages, the peloton doesn't exist by the end.
* The most glaring instance has to be when they search for Miguel at the music competition. None of the Riveras notice him on the stage with Héctor, who are singing a song that Héctor wrote for Imelda
* the most gruesome topic they could think of because the record label would not promote whatever song was written. It worked, somewhat.
* The Most Happy Fella, Amy was never renamed Rosabella or anything else.
* The Most Happy Fella an opportunity to get physically close and literally bond with each other when Herman teaches Cleo how to use "the ol' sticky stuff" to paste labels on boxes of grapes. When he asks her if she wants to try it alone now, she shakes her head "no."
* The Most Happy Fella, but she can't stop Tony from marrying Rosabella.
* The Most Happy Fella, Cleo and Herman become the comic secondary couple to the principal singing couple of Tony and Rosabella.
* The Most Happy Fella, Cleo describes what her customer left on her table:
* The Most Happy Fella, despite being set in the 1920s, is commonly supposed to take place in the 1950s, when it was written. This is largely because the musical deliberately dropped the contemporary political topics of the 1924 play on which it was based, including all references to Prohibition.
* The Most Happy Fella, he gives it to her again, this time in person.
* The Most Happy Fella he objects strenuously to Tony taking a non-Catholic wife, in return to which Tony accuses the Church of coveting his inheritance.
* The Most Happy Fella, Herman and his three pals watch the local girls strolling by in "Standing on the Corner" (made famous by The Four Lads).
* The Most Happy Fella: Herman is a continual victim of bullying, yet he's all smiles—until someone pushes him too far, and he makes a frown and a fist.
* The Most Happy Fella of Cleo and Herman out of whole cloth, and gave Tony a sister Marie to object to his marriage. (In the original play, the objector is the Catholic padre; also, Amy jokingly refers to herself at one point as 'Cleo', playing off Antony and Cleopatra.)
* The Most Happy Fella, Pasquale leads a group of workers in pulling a prank on Herman, tying his arms up with a string of light bulbs and putting a basket over

his head, which causes him to stumble around blindly. Since he's not gagged, he can talk to Cleo, but he stubbornly refuses to complain about his situation.
* The Most Happy Fella, Rosabella aims to reward the slimy cashier for his unwanted advances by kicking him in the behind as he bends over to pick something up, but Cleo restrains her just in time and whispers to her about the room rent.
* The Most Happy Fella, so it could focus more on the love plot, which provided better opportunities for singing.
* The Most Happy Fella, Tony, despite suffering serious injuries, manages to silence Marie's hysterical objections to his marrying Rosabella by shouting, "Shut up, Marie!" at the top of his voice.
* The Most Happy Fella, Tony Esposito, in his late 50's, marries Rosabella over his sister's objections that he's too much older than her. He acknowledges that he's old enough to be her father.
* The Most Happy Fella, which leads into "Song of a Summer Night." After the song, Tony and Rosabella are indeed left alone, though they have a nasty lover's quarrel instead.
* The Most Happy Fella with a waitress who can't recall his face, not even after he leaves her a tie-pin and a love letter as a tip. A few months of correspondence later, she travels to the Napa Valley to marry him, with a picture of the handsome young man she assumes is Tony but unfortunately isn't.
* The most heartbreaking example comes in the final season premiere "Broken Peace". SRU is called into a situation where a woman's abusive ex-husband takes her hostage, only for the couple's teenage daughter (who had previously bonded with Parker and Ed) to show up and attempt to kill her father in order to protect her mother. Ed is forced to shoot the girl in order to stop her, which leaves him with severe trauma, ultimately leading to him having a mental breakdown in the series' penultimate episode.
* The most heavily stricken regions, such as the Silent Woods, are bereft of nearly all living flora and fauna, and cause any lingering visitors to be
* The most humiliating moment in U.S. military history had to be when the British Army took Washington during the War of 1812, after the much-vaunted well-regulated militia failed to show up in significant enough numbers to deter them. The British commander decided to rub it in. He had his men go into the empty House chamber and take seats, then went to the podium himself and called the meeting to order as if he were the Speaker. One of his junior officers rose and offered a motion to burn the chamber down; it was duly seconded by another officer. The commander called the vote and the motion passed unanimously.
* The most iconic evil organization in the series by far is Shocker from
* The most iconic of these are the Vorpal Swords. Roll a critical hit and they'll
* The most iconic version of this is with grenades rather than guns. Wily old Bra'tac describes the long, difficult, dangerous journey they must make to get from where they are in the Mothership to reach the shield generators at the bottom of the shaft they are at so they can disable them, allowing the ship to be destroyed. Jack O'Neill pulls out two grenades, pulls the pins, and casually drops them down the shaft so they can blow up the generators. "Primitive explosive devices" are quite effective, if you know how to use them.
* The most important body part to remain at least somewhat intact for reanimation to work is the brain. So,
* The most important character in Homestuck fondly regards the miracle of a new beginning. rises as Lord English.
* The most important dish falls and breaks, leaving the person still holding dozens of breakables
* The most important dish falls and breaks, which also happens to be the heaviest, and then since they are now off balance, everything goes in rapid succession
* The most important magic items in 3.5 are the ones that increases your stats. They take precedence over anything else that uses the same slot. Also, items that do cool or unusual things are often priced too high to be useful by the time you can get them.
* The most important part was forgotten: He got flipped off. That made up for the

movie as a whole.
* The most important to the series is Robert's Rebellion, which ended fifteen years before the series starts. It began when Rhaegar Targaryen, heir to Aerys II, stole Robert's betrothed, Lyanna Stark, while Aerys himself had also murdered Eddard Stark's father, Rickard, and brother, Brandon. It resulted in the fall of House Targaryen, who had ruled the Seven Kingdoms for nearly three centuries, and the installation of the Baratheon-Lannister dynasty. It is really the cause for all of the events in the series - giving the effect that the reader has plunged into
* The most impressive dress uniforms in terms of bling were those of the
* The Most Incredible Work of Literature in the Entire Cosmos), three of Frig's friends are standing guard outside her house to make sure an alien leader doesn't find her. When he does show up and asks why they're there, the girls claim they're prostitutes who were hired to go to the house.
* The most (in)famous bear mount is the Amani War Bear. It could only be gotten as part of a level 70 raid instance, Zul'Aman, by killing four bosses and rescuing their hostages before time runs out and they are murdered. When
* The most infamous example of this is the 19-episode Goku vs Frieza fight, after which Frieza set the planet of Namek to self-destruct in "5 minutes", and they continue to fight on Namek for an additional 9.5 episodes. In fact, halfway through the battle a computer calculates how long until Namek explodes, and the answer is 3 minutes. Frieza powering up must have taken longer than that, and none of the previous statements were exaggerations - well, except for maybe the bit about Frieza powering up.
* The most infamous figure of the early Insurrection was Colonel Robert Watts, a Marine defector who became the main founder of the United Rebel Front. The Spartan-IIs'
* The most infamous: Lawn Darts, which are large, heavy, metal-tipped darts that kids are given to throw at targets placed on their lawn. Needless to say, throwing spearlike "toys" is not a good idea. Consider that lawn darts are the modern equivalent of the
* The most infamous of Alleged Cars in the series is probably the Homer, the
* The most infamous of them all, however, is most likely the MegaZeux port of the ZZT game
* The most infamous of them all is Stefan Amaris of House Amaris, who instigated the Amaris Coup and brought an end to the Star League. Most members of the Houses are known for being paranoid, sadistic, and power-hungry, and Stefan is the universe's equivalent of Hitler. His entire House was executed for his treason.
* The most infamous scene involves the President of the United States, Mai's baby, and a blender. That's all we're going to say about it.
* The most insane design of them all is perhaps the General Electric
* The most insane examples would have to be the Myrmidon and Swordmaster. They rely upon an insane amount of flashy jumps and pointless spinning. Even worse, the ones in
* The most instantly recognizable version of "Unchained Melody" today is the Phil Spector-produced one by the Righteous Brothers (helped along by oldies radio and the film
* The most interesting legacy of Lorgar may be the Chaplains, the unique sect of
* The Most Interesting Man in the World). Among the attributes: "He doesn't look for Waldo...Waldo looks for him," "When he takes his shirt off, kittens die" and "His vomit is used as soup in fine French restaurants."
* The Most Interesting Man in the World commercials play with this trope.
* The Most Interesting Man in the World got one of these where, to much fanfare and with many fans watching, he boarded a shuttle to take a one way trip to Mars, never to return.
* The Most Interesting Man in the World has a well-maintained full beard; the character probably wouldn't work any other way.
* The Most Interesting Man in the World has experienced in his storied adventures, but one thing's for sure — if the first thing you heard about him is that he once parallel parked a train, you'd probably drop whatever you're doing just to

listen. Even when Dos Equis retired him from their advertising campaign in 2016 he went out in style...by going on a one-way rocket trip to Mars.
* The Most Interesting Man in the World: "He gave his father The Talk."
* The Most Interesting Man in the World (of the Dos Equis commercials)
* The Most Interesting Man in the World whose deeds are hugely varied and over the top.
* The most intriguing figure though is probably Saint Cuthbert, who, while never decapitated himself, is frequently depicted holding the severed head of Saint Oswald. Mystifying when you consider that Oswald had been dead for decades before Cuthbert arrived on the scene.
* The most irrational thing he complained about was how he thought the first of these women would flee him if she were not blind. Dude, she has a pretty good idea that you are not normal-looking because your skin feels more like an
* The most known depiction of the Plague Hag (Pesta) was made in the late nineteenth century by Norwegian painter Theodor Kittelsen, who claimed to have met her in a dark wood near his home. And he ran really fast on his way home. He claimed
* The most known version of Nightcrawlers' "Push the Feeling On" isn't the original version, but
* The most likely reason is that she knew the elements would fail to win a lasting victory since that was how she beat him last time. What they really needed is an unrelated
* The most likely reasons being limits in terms of special effects and that in
* The most literal example comes from infomercials that mimic the look and feel of a news interview show.
* the most luminous star ever known still radiates at a measly 53 Watts / cu.m (over its TOTAL volume) and it's still 7.4 million times more luminous than the sun.
* The (mostly British) Enlightenment acknowledges wholeheartedly that humans (especially the working classes and colonized barbarians) are incredibly selfish, materialistic, pleasure-obsessed, aggressive, impulsive, short-sighted, miserable, and otherwise...bastard-y animals (just see
* The mostly-civilian White Base crew had a few custom uniforms too, mostly because they're handmade stopgaps.
* The mostly-forgotten (for good reason) Marvel hero Razorback had the mutant power to drive any vehicle seemingly by instinct. He happily moves up from semis to FTL spacecraft.
* The mostly metallic-gray, silver, black and bright red armor of Makuta became dark red with prominent green corrosion-spots.
* The (mostly theoretical, if not outright pseudoscientific) Repulsine aircraft designed by
* The Mostly Unfabulous Social Life of Ethan Green (Also made into a movie in 2005)
* The Mostly Unfabulous Social Life Of Ethan Green, a story about a gay man who fails at his relationships.
* The most memorable being "Lokasenna" ("The Insults of Loki") of the
* The most modern Russian attack submarine, the Project 671B Schuka-B goes by the NATO reporting name "Akula". Although it is not as terrifying as the Russian Akula(the Typhoon), it is a definite threat for Western submarines.
* the most negative about them from the beginning, is tapping along. Fred gleefully points it out, resulting in Go Go threatening to smack him.
* The most notable and newest of these are the National Memorial Cemetery of the Pacific, dedicated in 1949 in Hawaii.
* The most notable are certainly the Slann, all of whom have been alive since
* The most notable aversion of this trope is Tony Garea, the New Zealand-born wrestler who spent virtually his entire wrestling career in the WWF, all as a face; today, he is a road agent for what is now WWE and still makes sporatic on-camera appearances.
* , the most notable being Virtuous Fury (a knight from another dimension), Emerald Ray (an evil Crystal Pony), and Shrike (the former second in command to Nightmare

Moon).
* The most notable can is Golarion itself, which holds Rovagug, the "Rough Beast" and god of destruction. He resembles a giant arthropod and seeks nothing more than to undo the works of the other gods and destroy creation itself. Faced with this foe,
* The most notable double-subversion: the protagonist Oz Vessalius is set up as a
* The most notable Eerie Pale-Skinned Brunette is no doubt Severus Snape. Harry always makes note of the man's greasy, black hair, sallow complexion, and hooked nose. Even as a child he was a
* The most notable example in the series, though, is Cinderpelt, whose hind leg was permanently damaged when she was hit by a car when she was only an apprentice. She dreamed of being a warrior but decided to serve her Clan as a medicine cat after it became clear her leg would never heal.
* The most notable example is Commander Kubrik Chenkov of the Valhallan Ice Warriors. One of his campaigns involved sending legions of his own men straight to the enemy citadel, without armor or artillery support. This cost about 10,000,000 guardsmen to achieve victory. On one hand, he sacrificed ten million men charging a fortified city without support. On the other, he retook a Hive city - the population of which are usually measured in
* The most notable example is probably two episodes later "Betrayal" when Terra deactivates the security system to let 200 armed robots in undetected.
* The most notable example is the connection between Red John and the Visualize cult. After teasing it for several seasons, a Season 5 episode confirmed that a link existed, but that's the extent of what's revealed; the man who turns out to be Red John has no established connection with the cult, and in fact that link is never mentioned again. (The fact that they
* The most notable example is the season 3 finale, with what appears to be a typical flashback turns out to be a
* The most notable example is what has to be the series' ultimate woobie: Xion, from
* The most notable example of this are three-time contestants Cowboy Jet and Cord, who are incredibly proficient at the actual challenges involved in the game but frequently manage to blow the lead they acquire by finishing them quickly by getting lost or making poor travel decisions along the way.
* The most notable example of this trope in the game is DLC-only Tallis, who not only has two daggers that cannot be un-equipped for use in hand-to-hand combat, but also has a seemingly infinite supply of throwing knives, making her the only party member in the game who uses thrown weapons outside of cutscenes.
* The most notable examples are the formerly mortal gods of the realms, Sigmar, Tyrion, Teclis, Alarielle, Malerion (formerly Malekith) and Nagash, who played large roles in shaping their homelands into being the way that they are. A few deities from the old world, such as the Orc gods Gork and Mork and the Dwarfs' Ancestor Gods, who were already staggeringly ancient to begin with, are also still around.
* The most notable exception was Coolio, who felt that "Gangsta's Paradise" was too serious and intense a song to be parodied, and was upset when "Amish Paradise" was released. Yankovic felt bad about it and had been incorrectly told that he had Coolio's approval. Eventually, Coolio got over it and
* The most notable instance of this is the "Royals" group of characters. While most of them in canon could be a little rude to their friends (those in the "Rebels" group of characters), most of the time it was just harmless snarking and/or them being
* The most notable is that he now has access to a stream chat. The content that he originally went viral for included absurd and extremely lengthy failures, including not knowing how to properly jump in
* The most notable is the source of the Amulet Nicodemus gives Mrs. Brisby. In fact, Nicodemus' magic powers in general. The film never explains where either came from. It's not even addressed if Nicodemus got those abilities as a side effect of the injection (which would raise questions about why the other rats got no such

abilities) or if he was intelligent enough to learn them on his own. Years later, Don Bluth handwaved the presence of the amulet
* The most notable non-Bloom-centric episode was "The Show Must Go On", which focuses on
* The most notable of her edicts was the one titled "Pern's Renewable Airforce". There were two versions of this, one from
* The most notable of these on-paper ideas — and the closest we ever got to a real-life space navy — were the USAF proposals to weaponize
* The most notable Old Testament example would be Moses, who after talking to God through a
* The most notable one however was when he held the survivor's head between his knees and slugged him presumably in the nose repeatedly
* The most notable version is probably the Ross Rifle, a Canadian-designed and built substitute for the excellent Lee-Enfield during
* The most noticeable application of Space Friction occurs whenever a ship explodes in mid-flight: its explosion will be motionless despite whatever inertia the ship had previously. One instance where this can be seen very clearly is when the Y-Wings are making their trench run in close formation in
* The most noticeable difference between the mascots of the NBA's Charlotte Hornets and the WNBA's Charlotte Sting (now defunct), other than the gear of their respective teams? Eyelashes.
* The most notorious and damaging example was the conflict between the producer
* The most notorious cases were in the Southern United States. After
* The most notorious example of this trope in this game—and Chinese MMORPG in general—include
* The most notorious of this type would be variations of spinning an opponent, like the airplane spin popularized by the likes of Al Pérez, in that being dizzy somehow knocked out the opponent.
* The most notorious vaporware project of all time was Ovation, an office suite
* The most obvious anti-structure unit is the 'Devastator Warship'. A flying artillery platform which shoots spurts of plasma in the general direction of fire. A single one of these plasma globs barely hurt, but large structures are typically hit by five-to-ten at a time, and that makes the Devastator Warships exceedingly capable of handling not just large structures, but also large globs of slow, ground-based units. Air units and dedicated anti-air make shish-kabob out of them, however.
* The most obvious difference between humans and every other species on the planet is our sapience — but then, that hardly counts, since any intelligent aliens (which is what this trope is about) would have that too, by definition (and it's not like we can really
* the most obvious example ever if not for the fact his mask had a red(sometimes blue) line on it.
* The most obvious example is the lead-out rider for a sprinter. The lead-out rider's role is to deliver the sprinter in the right position at the right pace to sprint to the line. A good lead-out can make the difference between finishing first and off the podium in an even field, and make the best sprinter look invincible.
* The most obvious example of all, playing the trope for comedy as well as horror: the 2008
* The most obvious example of this is Kuja — he uses an attack which launches hundreds of magic missiles, similar to Matra Magic, TWICE in two separate cutscenes.
* The most obvious is Felix and Jenna, who are siblings (and appropriately dubbed "
* The most obvious is Galeem and Dharkon. Not only are they literally the embodiments of light and darkness respectively, they have polar opposite personalities; Galeem is a dangerously competent
* The most obvious is that the law firm Jennifer works for, Goodman, Lieber, Kurtzberg, and Holliway, has, in their law library, at least for their super-human law division, nothing but boxes and boxes of Marvel comics. It is explained that,

within the Marvel Universe, Marvel comics are all true, and are licensed by the superheroes who star in them, and, prior to 2002, were certified by
* The most obvious of these is the Mantrap, which is — you guessed it — a flytrap, appropriately scaled up.
* The most obvious one is the "Teleblock" spell, which, when cast on another player, temporarily prevents them from teleporting.
* The most obvious one is whether or not Karma is saved, either in the mission where she is first encountered or the "Second Chance" side mission unlocked if she isn't saved the first time, but her survival is
* The most obvious subversion would be Dozle Zabi. While the ugliest of the Zabi family by far, he's also probably the nicest aside from Garma. His final act in the One Year War is to
* The most odious branches of "alternative" medicine sell themselves, or excuse themselves after the fact, on this basis, stapling the tatty old stench-ridden "conventional medicine has failed!" card to the terminally ill with all the tact of a carnival huckster. Columnist John Diamond suffered terminal cancer and received many testimonies from people who said a relative turned to alternative treatments after rejecting medicine and were much better that way. Chasing them up, he found that
* The most offending error in a game that revolved heavily around bombs and explosions was repeated reference to "diffusing" a bomb. Bombs do not move their molecules from an area of high concentration to an area of low concentration - not before they explode, anyway. The word they were looking for was
* The most out-and-out example of this trope would be the Terran Empire in the
* The most painfully ironic example would have to be Reiner Braun, earning him the fan nickname of
* The most plot relevant is Brawndo, a corporation that makes an electrolyte-laden sports drink and was able to take control of both the FDA
* The Most Popular Book in the World because she found it unrealistic in the original books that vicious battles are fought against the Volturi and yet no one on the heroes' side is killed.
* The most popular depiction of his physical appearance actually is somewhat similar to
* the most popular English-only Vocaloid in terms of sales, use, and view count.
* The Most Popular Girls in School, and is not the least bit ashamed by it.
* The Most Popular Girls in School arm outstretched and hits Rachel right in the face, knocking her right onto the floor.
* The Most Popular Girls in School, at least from the start of Season 3 onwards (but with most of the emphasis still on the comedy side).
* The Most Popular Girls in School: At one point, the Cheer Squad tries to recruit more girls to the team. They make a list and go to Deandra, who turns them down immediately. Trisha then reveals that the "list" is actually just a piece of paper with Deandra's name on it.
* The Most Popular Girls in School: Brittnay and Than are shown to bang their heads against the lockers if fed up enough.
* The Most Popular Girls in School: Brittnay does one in "Judy & Red in the Morning" under the name of "Witney Matthews" along with a fake calm-sounding voice, until cussing them out shortly afterwards and abruptly hangs up.
* The Most Popular Girls in School, but because he doesn't go to their school.
* The Most Popular Girls in School, Deandra does this when she runs into the Atchison High cheer squad at the Oak Park mall.
* The Most Popular Girls in School, Deandra the New Girl makes the following request in the cafeteria: 'Lemme get some tater tots. Oh, and also a slice of pepperoni pizza, and also a basket of jalapeno poppers, and some chicken nuggets, a ketchup boat, three potato pancakes, a creamsicle, two quesadillas, a bread loaf, side of ranch, some pixie sticks, taco salad, order of ribs aaaaand a Diet Coke. No— strawberry shake. No! Diet Coke! NO! Both.'
* The Most Popular Girls in School doesn't even reach up to the teenagers hips. In fact, neither do all the kids in this show.

* The Most Popular Girls in School, Episode 51; when Cameron Van Buren flirts with Darren Darabond, his wife, Pamela Darabond, gives her this trope:
* The Most Popular Girls in School: Everyone's voices gradually grew higher in pitch, and their dialogue became much more fluent.
* The Most Popular Girls in School example between Trisha Cappelletti and Trisha 2; they developed a friendship despite being in feuding cheer squads.
* The Most Popular Girls in School gained an influx of new fans in August 2017 thanks to the "Pregnant" Meme.
* The Most Popular Girls in School gets angry if you call him by his real name, Jonathan Getslinhaumer.
* The Most Popular Girls in School has Bridget Tice's 48-year-old manager at Pizza Street.
* The Most Popular Girls in School has Jonathan (Than) who is homophobic and in the closet. Nobody likes him until the later seasons, but he sticks around anyway.
* The Most Popular Girls in School. Her reply in one episode is "I was born in 2003. I have no idea what a 'Gremlin' is."
* The Most Popular Girls in School? Hey, she just won the hundred meter dash in the Special Olympics, lost twenty-seven pounds, and later gets an extremely powerful prosthetic robot arm!
* The Most Popular Girls in School holds back against genuinely nice people.
* The Most Popular Girls in School: In Episode 19, if you listen closely after Belinda say that "[She]'s had a few miscarriages [herself]", you can hear Bill Sindelar and Lily Vonnegut falling apart a bit in their following lines.
* The Most Popular Girls in School: In Episode 33; we should note that both of the following women are high on Vicodin:
* The Most Popular Girls in School: In Episode 40, when Mackenzie and Brittnay argue over what they need to do next regarding the future of their cheer squad, they continuously ignore a questioning Trisha. She finally gets their attention when she begins shouting and panicking loudly, thinking that she's turned into a ghost.
* The Most Popular Girls in School: In Episode 75, after losing Saison, Rachel anticipates Brittnay's reaction for when she and Judith break the news.
* The Most Popular Girls in School: In Season 5, the French team is this to the Cheer Squad. All even more jerkasses than them.
* The Most Popular Girls in School is 6'0 and one of the most popular girls at her school.
* The Most Popular Girls in School is this to her sister Rachel; though to be fair, Rachel always ends up bringing it onto herself.
* The Most Popular Girls in School, it's revealed Bert Hickey was fired from the NFL after announcing the n-word... the thing is, the power was out, and he thought the mics were off.
* The Most Popular Girls in School: Lampshaded, parodied, and eventually played straight in Episode 81.
* The Most Popular Girls in School Luckily for him, he always carries a spare one around with him.
* The Most Popular Girls in School, Mackenzie is asked out by her boyfriend this way when he tapes a giant red heart to her locker with the words "PROM?" on it.
* The Most Popular Girls in School, Mackenzie is rather prone to this in general. In Episode 42, Brittnay and Saison do this to each other:
* The Most Popular Girls in School major characters, yet misfortune is always on their tails.
* The Most Popular Girls in School making sure that the viewers never forget all the crazy shit that has happened in previous episodes. Even if it means having to go way back to reference the very first episodes.
* The Most Popular Girls in School: Many jokes and gags can happen so quickly at once, in an episode's span of 6-to-12 minutes.
* The Most Popular Girls in School mentions at a Parent-Teacher Conference that when Brittnay was three years old, she (her daughter) was still wetting the bed. Brittnay immediately cuts her mother off.

* The Most Popular Girls in School. Of course, it would be a total mistake to call Shay and Mackenzie friends.
* The Most Popular Girls in School of creator Carlo Moss himself) has an affinity for junk food of all sorts in general. Though she's mentioned chicken wings, pizza, and tacos more often.
* The Most Popular Girls in School practically lives and breathes this trope. Of course, it does not go unlampshaded.
* The Most Popular Girls in School: Rachel and Judith. However, it's been implied that Judith is bisexual...
* The Most Popular Girls in School; Rachel is often verbally and physically abused by her older sister Bridget, but the former always stupidly sets off the latter's wrath.
* The Most Popular Girls in School. Saison Margeurite tries to pass herself off as French when she's from Montreal.
* The Most Popular Girls in School, Shay is quarantined to her bedroom against her will because her family believes she has the virus after she coughed once the previous day.
* The Most Popular Girls in School Shay to steal the position of head cheerleader, and Brittany caught Rachel eating a roly-poly bug. After that, Shay began a rivalry with Mackenzie and Brittany, while Rachel herself was left behind entirely, becoming a desperate wannabe and dork, while her old friends became the most popular girls in school.
* The Most Popular Girls in School: Shay van Buren just isn't as outwardly lustful as the other girls in this show, but it's still obvious from the evidence gathered; we get hints of bisexuality and one-night stands in Episode 17, and, in Episode 65, a poster on her bedroom wall says "Hot Pussy".
* The Most Popular Girls in School, she even says the trope name word-for-word.
* The Most Popular Girls in School: Subverted with Mrs. Zales; she hates taking days off her workweek, but she also enjoys vigorous sex with her husband Jack.
* The Most Popular Girls in School, that's not the main demographic it found:
* The Most Popular Girls in School: There's a Jenna Darabond and a Jenna Dapananian, both being important characters. There's also a Trisha Cappelletti and Trisha 2 - both also major characters.
* The Most Popular Girls in School: This is a lot of the fans' main complaint regarding Season 4, being only 12 episodes long which are nowhere near to Season 3's 28 episodes. In general, at least for the later seasons, fans often complain that ten minutes is not enough for an episode's showtime.
* The Most Popular Girls in School, though she only gets to inflict it once.
* The Most Popular Girls in School to Ashley Katchadourian for failing to watch the bathroom door. Later, Deandra has them replaced with one realistic-looking prosthetic and one cyborg arm — she couldn't decide on one set.
* The Most Popular Girls in School. To quote Shay van Buren: "This is the worst thing that has ever happened to anybody ever!"
* The Most Popular Girls in School (to the point where the sound of Deandra's robotic arm had to be removed entirely because the noise was too distracting).
* The Most Popular Girls in School, to the point where when Trisha finds a positive pregnancy test in Episode 14, everybody assumes its Brittnay's.
* The Most Popular Girls in School, Trish Cappelletti, was a former student at Overland Park High School, and she repeated two years and stayed at the school for six years total.
* The Most Popular Girls in School, while trying to infiltrate Saison for Brittany, they follow her and baby daugther back and forth around the Eiffel Tower, and they ending switching positions and get chased by a policewoman
* The most popular theory regarding the ancestors of the Japanese people is that they originally lived in the Korean peninsula and were driven off the coast by the proto-Koreans, who probably originated from somewhere in
* The most popular version of "19-2000" (also known as "19/2000" or "
* The most powerful characters all gradually suffer retinal damage and eventually go blind due to the brightness of their weapons.

* the most powerful esper in her school's history even though her powers are still developing. And is said to be formidable even without them:
* The most powerful items available to players in the free version of the game are the Corrupt Dragon items. They have the same stats as the Member's Only Dragon items, but they disintegrate after being worn for 30 minutes.
* The most powerful magic is done with five trolls from five different gem alignments.
* The most powerful of the evil gods, Nerull the Reaper, does have a good counterpart in Pelor the Sun God. Also, the demons of the Abyss (Demogorgon, Orcus, etc...) are directly opposed by some guardinal dukes from Elysium.
* The most powerful sword in the game cannot be found in dungeons or on monsters; it has to be created by finding the most powerful sword you
* The most powerful tier of items is purple. The best tools are iridium tools, the best quality is iridium quality, and the best weapons are the purple galaxy weapons.
* the most powerful warriors in the Imperium. The few known details revealed about the procedure show that it's even more extreme and difficult than the process used to create a Space Marine. As a result, each Custodes is a costly investment to the Imperium.
* The most powerful warships among the Xindi are operated by the Aquatics. They're also the slowest.
* the most powerful weapon in the game, with a ridiculously high critical hit ratio (70%!!).
* The most predominant example would be England and France. The two have known each other since the beginning of time and despite all of their bickering, they are quick to defend the other when a third party intervenes.
* The most prevalent example is the Adeptus Mechanicus (and their Chaotic counterparts, the Dark Mechanicus). Mechanicus dogma shuns the weakness of the flesh and encourages its members to increasingly replace their organic parts with cybernetics to become closer to the Omnissiah, to the point that it's almost impossible to tell if there's anything organic left.
* The most prized heirloom of House Stark is the enormous greatsword called Ice. It is made of Valyrian Steel, which makes it impossibly sharp. Ned used it for execution and ceremonial purposes, and in general battle, used normal swords.
* The most prolific users are the Tau, who field entire squadrons of drones or attach them to infantry or
* The most prominent across most of the comics is Joyce Brown, who in both continuities was raised in a very conservative Christian household and clings to fairly strict interpretations of the Bible, especially in DOA. She subverts the trope, however, by trying to be as inclusive and friendly to all as possible, and by having her religious worldview deeply shaken by certain events in DOA.
* The most prominent (and famous) example would be the conversations between Han Solo and Chewbacca. Humans are physically unable to speak Shiriwook (the language of the Wookies) and vice-versa, Wookies cannot properly vocalize Galactic Basic. Han and Chewie
* The most prominent are Starbuck's parents and President Adar, who died either before or during the miniseries and are all mentioned at several points throughout the show and appear as flashbacks or hallucinations or both. A handful of characters who were killed after several appearances also appear later in flashbacks or hallucinations.
* The most prominent brand name in the series was probably the "Polarock" instant camera (
* The most prominent "Empire" throughout the series is the Cyrodiilic Empire, which has gone through three different iterations and, for the most part, has subverted or outright averted the trope, coming closer to
* The most prominent example (because it factors into an early, and very long, quest) would be the town of Minefield. As the name implies, it's full of mines
* The most prominent example being the end of the penultimate episode of Season 4,
* The most prominent example in the entire franchise is Gwyn, the Lord of

Sunlight. As the ruler of mankind he led his Silver Knights into battle in the war against the everlasting dragons, and his lightning spears were key to mankind's victory as they pierced the
* The most prominent example in the series is soulmate couple Hannah and Thierry. Due to her being reincarnated repeatedly and Thierry being a vampire, they have been in love for
* The most prominent example of this trope are servitors, lobotomised cyborg slaves.
* The most prominent example probably comes from the series finale, where Max Klinger, after spending the entire series trying to get discharged from the Army to return home from Korea, elects to stay with his new bride. This was a temporary thing so Soon-Lee (
* The most prominent examples from the Skrulls are simply called "Super Skrulls". The most famous and likely first one has been engineered to
* The most prominent in the series is the shotgun shells filled with salt to banish spirits. The producers described it as sort of a
* The most prominent is Ginny Weasley, who has been breaking into the family's broom shed since she was six and taking each of her brothers' brooms out in turn to practice, eventually making the house team in book five. She goes on to play professionally for her favourite team, the Holyhead Harpies, and later becomes the senior Quidditch correspondent for the
* The most prominent of the three is Happy, which is a fairly unisex nickname. Natsu chose the name based on what everyone was feeling after the conflict over his egg disappearing was resolved.
* The most prominent one is the Florist of Sai, who has cameras covering most of Tokyo and works for the highest bidder. He got his name because when he was starting out, he always delivered his intel on cards attached to flower arrangements.
* The most prominent piece of merchandise to feature Krampus is Christmas cards. They have been around since the 1800s and come in all varieties, from gruesome to humorous to sexy to kid-friendly.
* The most pure human character in all the books is definitely Peniel, the blind beggar that Jesus healed on the Sabbath. He has been abused, horribly mistreated, and called a mistake ever since he was born, even by his own family. The only person who ever loved him, his older brother,
* The most recent books imply that this problem is exclusive to dragonriders, and is the result of their telepathic bond with their dragon inadvertently becoming duplicated as a result of the time travel.
* The most recent case: Minecraft 1.6 implemented horses by Mojang's cooperation with Dr. Zhark, the maker of
* The most recent examples of the trope in Brazil, long after the end of Casseta & Planeta's show, are featured in
* The most recent line-up includes two Brians: drummer Brian Tichy and keyboard player Brian Ruedy.
* The most recent precursors are the Cybrex, having existed as recently as 600,000 years ago. The Cybrex were a race of sapient machines who turned against their creators and then continued to attempt to purge all organic life. The Cybrex eventually had some sort of epiphany and realized that they were in the wrong and disappeared to a hidden ring world, but when some of their former victims found the Cybrex ringworld, they wiped out the Cybrex, who didn't even try to defend themselves.
* The most recent proposal is that both the Earth and the Moon were formed from an impact of two planets significantly larger than Mars, the debris of which coalesced and then
* the most recent. This of course gave media outlets ample time to cover the story.
* The most recent version to play the Tyco version by the normal rules).
* The most referenced one is Ted stealing a blue French Horn for Robin to proclaim his love; they have their first date at a restaurant that has the instrument on the wall and she loves it. Everybody brings flowers, Ted brings her the horn. In a

* The most revolutionary feature is that in addition to the now-standard composite and reactive armor, the Armata has a much more advanced "active protection system" consisting of radar panels on the sides of the turret to detect incoming projectiles and tubes to launch explosively formed penetrators to shoot them down. This is claimed to be effective against projectiles up to 1700m/s in velocity, which would include most current tank gun rounds
* the most ridiculous challenges, nay, impossible, such a challenge would be. (For context, the developers intended Psychic-type Pokémon to be weak to Ghost-type moves in Generation I, and they're immune instead, which could be considered a glitch. THAT'S how glitchy those games are.)
* The most ridiculous of these would likely be Blastoise, a giant turtle, being referred to as a shellfish.
* the most ridiculous way possible for a straight usage animation for that episode.
* The most searched porn category among women is lesbian porn, while surprissingly, the most searched category among men is
* the most senior officer remaining after Endor, as Thrawn suggested to him that the Emperor had been using a mild version of the battle coordination Force technique perfected by Joruus C'baoth on his senior command officers to bolster their efficiency, and that when he died, the backlash robbed those commanders of their own independent ability and effectiveness. Pallaeon may not have been have been targeted by the Emperor's abilities, or have been less susceptible than most, so when he had the initiative to sound a retreat, the other remaining captains and officers lacked the willpower to analyze the situation for alternatives or do anything else but obey.
* The most shocking death of the series was that of one of the franchise's more popular characters, Kyoko Kirigiri. Or not, as it's revealed at the very end she survived thanks to Seiko's antidote.
* The most shocking pairing of this kind you could never imagine occurs in the
* The most significant backwards message is in the final episode where right before
* The most significant example is one that's targeted directly at Goren. The perpetrator finds news articles about previous cases Goren had worked and uses details from those to point Goren in the direction of another suspect. Goren figures it out because it's just a little
* The most significant mutinies in the British armed forces in WW2 were partially provoked for reasons mentioned above. In September 1943, after four years of war, some British soldiers who had been fighting continually since 1940 were firmly of the opinion that they had done their bit and that new units being raised in Britain should be sent to relieve them. This came to a head when some units
* The most significant storywise is a 15-year jump between Chapters 32 and 33.
* The most specific example is George, Duke of Clarence. He is largely overlooked, with
* The most standard Star Wars door appears to be the Imperial blast door, which appears with little change even in the pre-Imperial era: the guillotine-like device that slides up and down, resulting in a diamond-shaped passage.
* The most stand-out example would be DoytHaban, a mercenary who had an extensive upgrade system, including the Haban AI.
* The most straight example probably comes in the relationship between the Elves and the Petty-Dwarves, a smaller subspecies descended from Dwarven outcasts. When the Elves first encountered the Petty-Dwarves, they had yet to come across another sapient species and thus mistook them for beasts that could be hunted; though they stopped doing this after encountering "regular" Dwarves and realizing their mistake, the Petty-Dwarves refused to forgive them for this, especially since many Elves ended up settling in caves that they themselves had dug.
* The most straight forward example is probably Cammy. While all the dolls would probably turn good if they wanted to and all the dolls are attractive in their own right (and have similar bodies to Cammy), Cammy herself has turned good and her beauty is accentuated by her soft eyes, fairer skin, and clothes that show her off more.

* The most straightforward example is probably Nodoka, who has very little actual combat experience or magical skill, but still does a number on
* The most straightforward example of this trope is Fortunato, a tantric magician ace who is a twofer minority: black/Japanese, his powers have nothing to do with his nationality but root in the fact that he is a pimp, thus gets sex-based powers. His counterpart, Astronomer, whose powers use rape and violence as a power source, is very Caucasian, though.
* The most straightforward type are those characters who were dead before the series even began but have since turned up in
* The most straightforward version is one episode where the unsub in question is beating people to death out of misplaced frustration with his son's battle with cancer. When he (mistakenly) believes the hospital is withholding treatment due to money, he first places a bet on himself in a legitimate boxing match, then beats and robs his manager, then enters a shady-but-still-technically-legal fight with a large cash payout.
* The most straight-up example of this trope is a Death Knight talent that creates an Anti-Magic zone. The zone doesn't prevent spellcasting, but it greatly reduces magic damage taken by party members inside it. Death Knights also have a self-cast anti-magic shell, which has the same effect as the zone but also stops them from being afflicted with curse-like spell effects, and can actually absorb the power of the spells to throw back at the attacker.
* The most striking example is when you're locked in a freezer, obviously needing to escape as soon as people - Then your two companions suddenly start talking about chemicals seemingly "communicating". It comes off as especially odd when the game gives you to option to either say you're interested or that you think they should probably get out the freezer before they start casually chatting about science. The correct option to pick to reach the game's true ending is
* The most striking would have to be after his fight with Medusa, with Stein breaking into a
* The Most Stupid Deaths In Super Mario 64, at least in the first episode), but the story continues anyway.
* The Most Stupid Deaths In Super Mario 64: In 'Even More Stupid Deaths', Mario has a flashback to the first time he went on the "slider".
* The Most Stupid Deaths In Super Mario 64, Mario has multiple nightmares which turn out just to be dreams. One of them is of the game ending.
* The Most Stupid Deaths In Super Mario 64, The Clone Stories are very much A Day In the Limelight for the Clones.
* The Most Stupid Deaths In Super Mario 64, though later episodes have less deaths.
* The most successful animals in nature tend to be those who cooperate with others, either of their own species or not.
* The most successful crews are the ones with benevolent captains (at least to their crews).
* The most successful Ork warbosses are from the Blood Axes clan, who are viewed as cowardly gits by other Orks for their tendency to retreat when the odds are against them; the Axes themselves just say fleeing means you can fight again next time, so it doesn't count as losing.
* The most surprising thing about Dollhouse is not that people use the technology for that... it's that not only are there people who use it for
* the most sympathetic Looney Tunes antagonist or criminals, most of Sylvester's actions didn't exceed past that of a normal cat (in some cases, he was established as half-starved and desperate for food). It's worsened in that, similar to the Tom and Jerry example, the universe seems skewed to punish Sylvester, when not labelling him a monster and a cad for trying to catch an innocent little bird, he is being branded a coward and a joke for NOT catching another (supposedly) smaller defenseless animal. And of course, there were plenty of moments mice, birds, and dogs tortured him unprovoked.
* the most talented swordsman around, one of the smartest recruits, honorable and dutiful.
* the most talked about person on ESPN during the 2011 NFL season. His overexposure

declined a little bit during the 2012 season when he spent it entirely as the backup to Mark Sanchez, but he still got way too much attention. Now a thing of the past since he's out of football and trying his hand at a pro baseball career.
* The most thorough and brutal reset button ever seen was the end of
* The Most Toys. Molecule by molecule. Leaving the victim to feel unbelievable agony before dying.
* The Most Toys." Seeing the shuttle explode, however... was still pretty convincing.
* The most triumphant example in the first game has to be in case 4. You're backed into a corner, you have no proof that the witness isn't who he says he is, and it looks like you're going to lose. von Karma then says something as a joke which suddenly turns everything around:
* The most triumphant example, metaphorically speaking, would be Travis Bickle from
* The most ubiquitous ones seen in the franchise are the UNSC's Pelicans and their Covenant counterparts the Spirit and the Phantom.
* the most unloved and abused character in the show. Everyone hates him... and yet, he's the second or third most popular character.
* The most vocal haters of it were people who apparently could never tell that it was a kid's show and carries all the characteristics of kids' shows that adults absolutely hate.
* The Most Wanted: An official list of the top-ranking fugitive criminals currently wanted by the law.
* The Most Wanted: The top list of fugitive criminals wanted by the law.
* The most well-known case occurred in Beta 1.7, where Hippoplatimus's Piston Mod was mostly implemented. This allowed Redstone to interact with the world in powerful ways, paving way for self-rebuilding walls, better cobblestone generators and other things. The one feature that was not implemented, the ability to launch entities and falling blocks into the air, was given in Minecraft 1.8 via slime blocks.
* The most well-known example is somewhat of a variation, as Selene doesn't quite locate Viktor's neck with her sword and instead cuts his head
* The most well-known, however, is the Razor-Claws glitch. (A weapon that, while cool, did not make it into
* The most widely known example is in Association Football, where teams get a number of shots from the penalty spot with the team who score the most winning. 5 kicks is the standard practice. If tied they keep going until one team misses while the other scores. Field Hockey shares the same style of shootout.
* The most widely known Red Scare in America was, of course, between 1945 and 1970 (after which the doctrine of
* The most widespread, dominant, and plot-relevant race is the humans, and most of the main characters are also humans (or modified humans, such as
* the most widespread example sunken cities in the reach. One of them, Jhouram, fits all the trope details to a tee, since the barnacle- and kelp-covered ruins came to be ruled by a sea hag sorcerer and her tribe of kapoacinths, although apparently the influence of all the sunken psionic artifacts warped sea creatures in the area so that all the ruined cities are to some degree haunted by dangerous monsters.
* The Mosuo culture, a small group in China, have been described as a "world without husbands or fathers." Men and women never get formally married, but go through long courtship rituals competing with other guys, and it's wrong to feel jealous if a girl chooses someone else. The man will continue to visit the woman for the duration of their relationship, sometimes with months between visits. The fathers are not considered related to the children, only to the mother (there's no stigma when a woman doesn't know which man fathered them — although it's considered embarrassing — though most do not change partners frequently, although this may have been a more recent change under pressure from the majority Han Chinese, who disapproved of their promiscuity). Instead the children's uncle will care for them, doing household tasks, while women do the hard work and run the

family.
* The Mote in God's Eye, a bunch of "Watchmaker" Moties packed inside a spacesuit manage to briefly pass for human, with the help of a severed head.
* The Mote in God's Eye actually (for the most part) uses real historical quotes.
* The Mote in God's Eye. After finding out that they have to breed or they die and are very warlike, the Empire decided the only option was to interdict their home system.
* The Mote in God's Eye. After the three midshipmen crash land on Mote Prime, they wander around for a while and make a number of discoveries. The Motie decision makers decide to kill them to keep them from telling the other humans what they've found out. And it plays out the other way, too. The humans are about to be captured, but they decide that they know too much about human technology to allow themselves to be taken prisoner — so they kill themselves.
* The Mote in God's Eye. Aliens in a spacesuit use a severed head in a helmet to slip past guards; the deception is only revealed when a momentary angle of sunlight reveals the aliens peering out the helmet—having moved the head out of the way to be able to navigate. Having those lights to identify your astronauts sure would have helped spot the dead guy...
* The Mote in God's Eye and Jerry Pournelle. A human spaceship is overrun by "Brownies" - monkey-like animals that breed like crazy and use advanced technology by instinct. When the humans evacuate the ship, several Brownies try to tag along inside a human space suit. They operate the limbs from inside, and put a severed human head into the transparent helmet for camouflage.
* The Mote in God's Eye, and the other end of the only such lane in the Motie system is in the outer corona of a star, this has kept the Moties interdicted in their home system for millennia.
* The Mote in God's Eye books by Larry Niven and Jerry Pournelle have this as a central plot point.
* The Mote in God's Eye by ramming through its Langston Field and into the ship.
* The Mote in God's Eye collapses, it'll ruin everything!" — referring to the loss of his data, not to the destruction of the ship or his own death.
* The Mote in God's Eye does this with his passengers, for reasons which become an important plot point later on. There is a later variation when Horace Bury kills the Watchmakers by breaking their faceplate during the crossing to Lenin.
* The Mote in God's Eye Earth is mostly a wasteland from a hellish final war. The military academy of the successor empires are located there as a reminder to cadets what they're fighting to avoid.
* The Mote in God's Eye, excerpts appear when characters decide to look them up on their PDAs, and flow smoothly with the narration.
* The Mote in God's Eye featured a parody of wine snobs, a "coffee connoisseur". When it was published, in the 1970s, the idea of someone taking coffee that seriously was inherently comical.
* The Mote in God's Eye has an aversion of some interest: the Moties' color vision works differently from humans', so to humans the colors in their paintings all look off.
* The Mote in God's Eye has an entire subrace of the Moties, the Engineers, with genetic technical ability, needed to rebuild and then improve tech invented in previous boom/bust cycles of their civilization. And their rat-sized but no less able pets the Watchmakers. When they get loose on a ship, it takes only days for them to take it over and make it nearly invincible.
* The Mote in God's Eye has both original life pods on Lenin and MacArthur, and the Motie-modified ones the three midshipmen use to descend to Mote Prime
* The Mote in God's Eye has no idea what Communism was actually about, despite being an aficionado of Russian culture.
* The Mote in God's Eye have an interesting cyclical reproductive cycle. All Moties (of any subspecies) are born as males. After a time, they shift to female, after which they have maybe a couple of years to get pregnant and give birth. If they fail to do so, they die of hormonal imbalance, while if they do, they shift back to male and the cycle restarts. The resulting series of population explosions and wars

over territory has resulted in their undergoing species-wide societal collapse more times than they can count.
* The Mote in God's Eye: Humans visiting an alien solar system find the asteroids too far from the inhabited world to make sense. They learn that the asteroids were pushed farther out after a war when one of sides pushed them inward, raining them onto the planet.
* The Mote in God's Eye. If he had failed the admiral would have had no choice other than orbital bombardment, killing most of the population and dooming what remained to a slow death by starvation. In the end, Blaine's action was successful, so he was promoted and given command of a battlecruiser
* The Mote in God's Eye. Incidentally, New Caledonia is also the name of a pacific island in Real Life.
* The Mote in God's Eye. Inverted in that humans have the star-spanning empire, while the aliens are trapped on one single world.
* The Mote in God's Eye: One of the plot elements is how the various subspecies of Moties evolved. Determining how this occurred is crucial in determining that some of the Motie bodies ejected from the Crazy Eddie Probe are Warriors, which exposes one of the Moties' darkest secrets.
* The Mote in God's Eye outward at once, destroying the shielded ship.
* The Mote in God's Eye. Since Moties must reproduce regularly or die, their population inevitably increases until overpopulation results in the collapse of their civilisation, usually through war over resources. At some point in the past, they came up with the idea of building museums storing as much of their science and technology as possible, so that they will be able to rebuild faster after the collapses and hopefully have time to find a way to break the cycle before the next one occurs.
* The Mote in God's Eye starts off the plot - although this one was the variation that is initially accelerated by a planet-based laser emitter.
* The Mote in God's Eye tests to kickstart the next development of civilisation.
* The Mote in God's Eye. The bodies of the Marines who died evacuating the battlecruiser MacArthur were shot out into space from Lenin's torpedo tubes. They were then vaporized by blasts from Lenin's weapons, so the Moties couldn't retrieve the bodies and study them.
* The Mote in God's Eye, the first (live) Motie the humans encounter is an asteroid miner who detects the huge amount of metal in their ships and comes to meet them. They can't communicate with the alien but one officer sees that his ship is an asteroid miner's ship and makes the connection.
* The Mote in God's Eye. The humans live about a century and a half, thanks to some advanced biotech. Then they meet the Motie Mediators, who live for no more than fifteen years.
* The Mote in God's Eye. The Moties are divided up into a number of castes, including Mediators, Engineers, Physicians, Warriors and Masters. They have genetically based differences in bodies and mindsets.
* The Mote in God's Eye, the Moties have mined out their metals and have to scavenge from older relics.
* The Mote in God's Eye, they know this happens and have built many museums to store examples of technology so that civilization can be rebuilt faster the next time, in the hope that eventually they will have some breakthrough and break the cycle. Unfortunately for them, by the time humanity discovers them they've used up most of the natural resources in their system, and one of the Moties notes that each fall takes them further back because of this.
* The Mote in God's Eye this — if they don't have children, they die young and horribly, while as far as anyone knows a Motie who keeps getting pregnant and giving birth on schedule can live indefinitely. Oh, and the most likable group, the ones who learn English and talk to the humans of the series? They're sterile hybrids. They die after 25 years or so.
* The Mote in God's Eye to the novel, five Imperial battleships destroyed all life on the rebellious planet Istvan, killing tens of millions of human beings.
* The Mote in God's Eye. Under Putin in recent years, Russia has been doing just

that.
* The Mote in God's Eye: When the three midshipmen are trapped on Mote Prime, they find a museum and use the weapons stored in it to fight attacking Motie Warriors. Justified because the museum was designed to keep weapons (and other items) in working order for future use when Mote civilization fell.
* The Mote in God's Eye. When under fire, the shield generators generate heat faster than it can be radiated. Shields in this universe are essentially impenetrable, so space battles only end when one ship accumulates too much heat and vaporises itself. In the sequel, the Moties have developed a way of increasing the radius of their shields as they heat up, giving them a larger surface area to radiate heat and allowing them to last much longer in combat that human ships. Unfortunately for them, the only wormhole out of their system ends in the atmosphere of a star (which they don't know about), so their expanding shields end up absorbing heat much faster and destroying them rather than allowing them to fight their way out.
* The Motel is about a 13-year-old kid whose parents run a sleazy hotel. He often has to clean condoms out of rooms, interact with hookers, and all kinds of age-inappropriate activities.
* The Motels: Fronted by Martha Davis, the California-based rock band had two No. 9 hits on the Hot 100, 1982's "Only the Lonely" and 1983's "Suddenly Last Summer."
* The Mothballed Spaceship. The protagonists are trying to get on board a mothballed space battleship that blasts anything that gets too close. They try sending in tiny robots, making them smaller and smaller in an attempt to get past its detectors.
* The moth demon bandit Gatenmaru only appears in two episodes as well, but he forces Inuyasha into his
* The Moth Diaries or not, we never find out. Please correct me if I'm wrong on this detail.
* The Moth Diaries... You never figure out how much was hallucination, or whether it was indeed hallucination at all.
* The Mother Box is a series of handheld devices used by the characters of
* The Mother broke a glass after she finds an ad placed by her jerkass bandmate seeking to replace her, and it insulted her looks in the process.
* The mother buys a skirt for her daughter to wear to school, but later sees that all the other girls are wearing jeans.
* The Mother Daughter Book Club, one character wears a boy's uniform and helmet to try out for the school hockey team, since the coach refuses to let a girl join. Naturally, her skills secure her a slot on the team, even after her identity is revealed.
* The Mother Dragon turns The Princess into a dragon, as retribution for The Prince killing her baby and giving the gem in its chest to her as a gift.
* The mother in "The Inspiration"/"The Inspired" gave birth to twins and couldn't manage as a single mother, so she had to choose a favorite and give the other up for adoption. When she had to choose, Wallace said "I love you, Mommy," while Jessie said nothing, so she kept Wallace. However, Wallace inherited their father's mental illness and became a serial killer, whereas Jessie became a sucessful lawyer, so when Jessie made contact, she switched her preference and plotted to have Jessie
* The mother in this sketch tactfully accepts her new robe that was bought on sale, while staring at the presents everyone else got. Even the dog got more than her.
* The Mother is shown to have this tendency to deceive others for laughs, such as telling Lily that the cookies they had given her were from underneath a train seat and freaking out Marshall by pretending to be a creepy psychic who reads Marshall's situation with "frightening accuracy".
* The Mother is the second love for Ted. Ted dated other girls before and after Robin, but he thought that she was his destiny and his one true love. Meeting her helps Ted move on from Robin. None of the other girls he dated were ever serious because he was always obsessed with Robin.
* The motherly version of this trope occurs in one episode, as Clark openly sobs

on Martha Kent's shoulder as the two mourn over
* The "Mother Maiden" Character from the eponymous music video by Dutch rock/metal band
* the Mother not dead but Robin and Barney are still divorced. Newly added dialogue revealed that there might be a chance for Robin and Barney to get back together though it remains unclear if they're ever going to rekindle their relationship.
* The mother occasionally finds stuff too, mostly old memories related, sometimes other things. Micheal Weston isnt too bad at finding stuff either.
* The Mother of All Mind Rapes however, besides being named after a certain undead city, 'summons a god form beyond the stars' which was described as being as far above humanity as humanity is above insects. Eldritch indeed.
* the mother of all Thresher Maws to kill one. Meanwhile, a single capital ship can tank an entire fleet like they were nothing but little space mosquitoes.
* The "Mother of God" meme is an image of a shocked man removing his sunglasses. Examples
* The mother of Michelle Seagal (Chelle), one of the main characters of the
* the mother of one of his students, who has been twice widowed already.
* The mother of Steve's Japanese friend Toshi, and his on-off-again romantic interest Akiko believes in this trope wholeheartedly, being a
* The mother of the initial bomber in "Painless" is horrified by what her son did, even ten years later. When she learns her other son may have information related to the crime, she tells the FBI to search his room, because she refuses to turn a blind eye again.
* The mother of the Johnson family, Rainbow, is the daughter of one such couple. Her parents are a
* The mother of the Woodhouse brothers, two political pundits with opposing viewpoints,
* The Mother Of Us All, by Virgil Thomson and Gertrude Stein, has a pair of characters named "Virgil T." and "Gertrude S."
* The Mothership is actually a Kharaki Scientist, Karan S'jet, who is
* The mothership itself: In the first game, the mothership (both the Kushan and the Taiidan variant) is lightly armed and armored and (in the single player campaign) can't move in real space due to its engines being unfinished. This is a complication in some missions, such as the one where the mothership is endangered by asteroids and the one where the enemy tries a
* The Motherships of the Robotech Masters contain large civilian populations, ranging from 150,000 to 270,000. In the war, the Army of the Southern Cross and the reinforcements sent back by the Robotech Expeditionary Force destroy them all, at least two with all hands (the first REF ship to return rammed the closest mothership and then self-destructed inside before they could even realize they needed to run to the escape pods, and later the
* The mothership was destroyed with a nuclear warhead that apparently made its reactor explode. See that debris burning up in the skies? That's nuclear fallout irradiating the atmosphere of the entire hemisphere. There's also the issue of 18.4 quintillion tons of alien mothership rubble falling out of orbit... or not. If it stays up there then
* The Mothers of Invention album largely consists of an inventory of dangerous, violent toys.
* The mothers of several DCEU superheroes were played by "household names" (by Hollywood standards anyway) such as
* The Mother. The disease is fatal, and that's pretty much all we know about it.
* The Mothman creature that was allegedly seen near the town of Point Pleasant, West Virginia in the 1960s.
* The Mothman creature that was allegedly sighted near the town of Point Pleasant, West Virginia in 1967, and was even supposedly connected to the collapse of the local Silver Bridge which killed 46 people.
* The Mothman Prophecies. An orderly says that Mary was sketching "angels". Well, angels that look like black-shrouded demons in the general shape of a moth. Seems like the residents of Point Pleasant were, too.

* The Mothman Prophecies claims that his appearance is dependent on whoever is looking at him.
* The Mothman Prophecies: Connie talks about a dream about drowning that occurs at the climax.
* The Mothman Prophecies, Gordon describes a strange hallucination which turned out to be prophetic, and started with his seeing something in his mirror that wasn't him. Later, John closes a medicine cabinet while looking away, the mirror briefly showing an indistinct face behind him which he doesn't see.
* The Mothman Prophecies, the Mothman inevitably shows up at one of these. The teens walk away mostly unharmed, but the boyfriend somehow gets red burns around his eyes from the encounter.
* The Mothman Prophecies. When the phone rings at the appointed time, he decides he doesn't want to answer it, and he unplugs and smashes the phone. Moments later, it rings again.
* The Mothman: some extraterrestrial and/or paranormal creature, or just an unusually large bird misidentified by terrified eyewitnesses?
* The motif is used again in the House Quidditich tournament and Triwizard Cup where Harry is an underdog and inverted in the World Quidditch Cup where the favourites, Ireland, win.
* The Motion Picture; and McCoy must be promoted to Captain at some point between the TOS movies and TNG, in order to become Admiral of Starfleet Medical.
* The motivation behind many actions taken by Dutch van der Linde in
* The "motivation fairy" is transformed into the image of Wally, whom she previously thought to be a myth, after attempting to motivate him.
* The motive behind Finkle's villainy is due to the hatred he received from fans after missing the field goal. In real life, the Buffalo fandom was generally supportive of Norwood as can be seen on the ESPN documentary
* The motive behind the Cardassians' expansionist, militarised society seen in
* The motive for Lu Bu's involvement in the battles of Guandu and Chibi in
* The Motley Two are pens, with which he draws symbols on sheets of paper, releasing magical effects. He has a tendency to scribble randomly, and sometimes accidentally ends up drawing an unwanted rune.
* The Motley Two, basically their pets/guardians/surrogate parents) and are scheduled to train to become BRAVE AND MIGHTY STEEDS once their owners are drafted into the army.
* The Motley Two dice as weaponry, though her IMPERIAL DUET has powerful effects with both extremely low and extremely high rolls. Which is good, since she's unlucky and tends to roll low.
* The Motley Two, with two teams against each other; one of the "game modes" is an "escort the VIP" objective, while in another an outnumbered team defends themselves until they can use an airstrike.
* The Motorcycle Diaries: The adaptation, with Gael Garcia Bernal playing Ernesto "Che" Guevara. "Chileeeee! Viva Chile po!"
* The Motorized Patriot enemies are vulnerable to the water-spewing Undertow vigor, which stuns them and electrocutes other enemies near them.
* the Motor Rats (initially fighting for the Plutarkians for some unspecified grudge against the Cave Mice-dominated government, later fighting for their own cause against both Plutarkians and Freedom Fighters) fight on Technicals. They're more than a match for the Martian Army, but the Freedom Fighters usually win by being more mobile and fielding a larger number of guns;
* The Motterverse: Consists of Mr. X, Electropolis and Terminal City, all created by Dean Motter.
* The motto of the Ankh-Morpork City Watch is "Fabricati Diem, Pvnc" — which the narrator translates as "to protect and serve", but which would more accurately translate to "
* The motto of the Royal Military Academy, Sandhurst is 'Serve to Lead'
* The Mound Builders around the Mississippi River had elaborate agriculture and trade networks, in support of a chiefdom system probably somewhat similar to feudalism. They fed a population of tens or even hundreds of thousands, despite

only using copper for ornaments—they did all that with stone tools (and no wagons). The Mound Builders were so advanced 19th century Anglo-Americans assumed their earthworks must've been the work of
* The Mountain (1956). A passenger plane crashes near the peak of Mont Blanc, in the Swiss Alps. Robert Wagner's character wants to climb the mountain and loot the crash site; he pressures his more experienced brother (played by Spenser Tracy) to guide him up. In addition to the alpine perils, the brothers face a moral dilemma when they reach the crash site and discover there's still one survivor.
* The Mountain and the Viper, where Oberyn Martell gains the advantage in his fight with Gregor Clegane and has the opportunity to finish him off, but instead delays while demanding his opponent confess to the rape and murder of Oberyn's sister. Unfortunately for him, he gets a little too close to the downed Gregor and gets pulled off his feet, at which point his foe gleefully delivers the desired confession, while simultaneously crushing Oberyn's head with his bare hands.
* The Mountain and the Wolf (and because he's even bigger and scarier than Gregor Clegane, no one can do much about it). His genuine talent for warfare gives another reason to keep him around, but once King's Landing is taken he becomes entirely insufferable. Oddly enough, he's genuinely friendly with Tyrion of all people, something Tyrion is not exactly happy about.
* The Mountain and the Wolf and they can deal with him openly... but he's still as overbearingly jovial towards Tyrion.
* The Mountain and the Wolf and thus saw only his henchman trying pay a hideous old crone for sex.
* The Mountain and the Wolf), but he mentions other tribes having their own recipes involving dead sheep, beastman blood or horse jizz.
* The Mountain and the Wolf (despite only coming up to Wun Wun's waist).
* The Mountain and the Wolf like himself. The problem is that he can't seem to stop and is equally as insulting toward the people who are theoretically his allies.
* The Mountain and the Wolf makes his contempt for magic clear, claims only to use it to suit his needs, and is repeatedly shown disrespecting the sorcerer in his employ. It is also hinted that the sorcerer actually is planning to betray him.
* The Mountain and the Wolf nerves, compounded by the fact that he never seems to realize that he's being insulting or abrasive, like requesting that Daenerys deliberately ignore the bells if King's Landing tries to surrender so both armies can still get a good fight (of course, it's possible that he doesn't actually intend to deliberately insult everyone he meets and it's simply a side effect of him being required to always look for a fight).
* The Mountain and the Wolf tendencies, and the fact that he leaves when he decides he has nothing left to do there rather than ask permission to leave or even say goodbye. Then again, this is probably the most diplomatic a confirmed champion of the Chaos gods will ever be.
* The Mountain and the Wolf: The Wolf does this when planning the defense of King's Landing from the Iron Fleet by using different-shaped teeth from a skaven skull to represent allied ships, friendly ships and ground troops.
* The Mountain and the Wolf to be this, demanding that the people of Westeros prepare their armies to prepare for the coming of Chaos. He's less than thrilled to realize that he's been all but forgotten due to the people of Westeros having more important things to deal with like Cersei's rule and the Night King (although it's possible he's been absent for longer than he thinks from his perspective, due to Warp travel).
* The Mountain and the Wolf, which was only implied to fly rather than shown and spews fog until it's surrounded by mists and daemons, then the fog (eventually) lifts and finds itself back in the real world.
* The Mountain and the Wolf). While they don't work against each other, there is some friction with the Wolf: Sven because as a Tzeentchian sorcerer, he's practically expected to betray his boss; while Akkarulf yields command of the Iron Fleet to another Ironborn without a fight, which the Wolf sees as cowardice (or rather, Akkarulf yielding followed by the other Ironborn apologizing for his insults to Akkarulf without a fight).

* The Mountain and the Wolf) who explain various aspects of Westerosi history to him (to insult or look down on), and in turn allows the Wolf to explain what's going on to Akkarulf once they return to the Warhammer 'verse. Akkarulf in particular doesn't speak the Norsca language, so he can be used to get the Wolf to make it clear to the reader.
* The Mountain becomes this after Qyburn reanimates him. As the name suggests, and combined with his lust for killing, the Mountain is essentially one step away from joining the ranks of Jason Voorhees and Michael Myers.
* The Mountain Between Us has an exciting main plot about two strangers forced to help each other to survive after a plane crash in the frozen mountains of Montana. But it increasingly concentrates on a developing romance between them to the extent that the film continues for half an hour after they reach safety, and concentrates solely on the romance. It just makes the film feel like it has a needlessly stretched-out denouement.
* The Mountain Between Us massive physical exertion, they would have absolutely reeked. Ironically, the movie does depict the abrasions and bruises they would have received after such an accident.
* the Mountain Goats details (an inevitably brief) reconciliation and subsequent destructive sex of the recurring Alpha Couple.
* the Mountain Goats have a song called "The Best Ever Death Metal Band in Denton". This seems like less of an example if you know that Denton, Texas has a pretty big music scene for a town its size, but what it doesn't have is a lot of death metal, so they still aren't up against much competition.
* the Mountain Goats, is about the Last Tasmanian Tiger, the Last Dodo, and the Last Golden Toad.
* the Mountain Goats is actually an example of Calling The Old Man Out. There's a reason why the album is dedicated to those who are living in broken homes.
* the Mountain Goats song "Insurance Fraud #2" is about a man accusing a woman (probably his wife) of faking her death in an attempt to commit insurance fraud, but it's implied that she really has died and he's put together this conspiracy theory so he can stay in denial.
* the Mountain Goats song 'Love Love Love' is sorta about this. It's off an album about the songwriter's stepfather abusing him as a child; his point was that his stepfather may have done terrible things to his kids, but he still loved them, and love can make you do terrible things.
* the Mountain Goats song "Oceanographer's Choice" has the Alpha couple doing this to their run-down Tallahassee home.
* the Mountain Goats song "Oceanographer's Choice". The bickering couple getting back together in the end is depicted as them being too dangerously codependent and screwed up to get out of their mutually abusive and destructive relationship.
* the Mountain Goats, the narrator fears that beings from beyond the stars are coming to put our brains in mason jars (a reference to Lovecraft's Mi-Go).
* The Mountain is choosing a random prisoner to torture and kill. After Hot Pie is passed over and another prisoner is chosen, the camera zooms out to reveal he wet himself.
* The Mountain is pillaging and terrorizing the Riverlands and Jon winds up accompanying Beric to arrest the Mountain. Jon actually sees the Mountain watching the razing of one village, with a look of disinterest.
* The Mountain of Light, down in the southern continent of the Neath. Radiates life in a different way, making flora extremely lively and strong (to the point vines sprout in bare rock and
* The Mountains of Illinois: You fail to provide proper geography when filming your show or movie.
* The Mountains of Mourning", a woman tries to bribe a Vorkosigan armsman to let her in to see Count Vorkosigan with all the money she has on her — $1.20. Miles, seeing enough of the incident to know that that woman is trying to get in so that she can petition the count to send a criminal investigator to her village over a matter of justice (something that as a subject of the Vorkosigan District, she had the legal right to do), lets her in without any money changing hands.

* The Mountains of Mourning, figures that if Miles could get through the Barryaran Military Academy, then she can manage college despite her background.
* The Mountains of Mourning he is. Miles entertains the thought that she might think that he's the court jester.
* The Mountains of Mourning, Miles Vorkosigan sentences an infanticide to have her property rights stripped away and be considered legally dead as an alternative to hanging. The book seems to have some pity for her as she was caught offguard by changing times, but nonetheless she clearly deserved it and it was necessary to give a sharp reminder that disabled people were not to be killed out of hand anymore.
* The mountain spirit that Harry and friends meet in Colorado, which
* The Mountain that Rides and the physically largest human seen so far (almost 8’0” tall), and will gleefully show it off.
* The Mountaintop play Martin Luther King. This happens a lot when Hollywood actors do theatre. (Of course, while stage actors may not have the huge fanbases that movie stars do, there are those with loyal fandoms who will see a show simply because they're in it.)
* The "Mount Davis" grandstand at the Oakland Coliseum was clearly designed for football. More often than not, the upper deck seats on Mount Davis are tarped off when the A's play. In the rare instances where the tarps come off, fans sitting in the Mount Davis upper deck have
* The Mount Hyjal raid has two parts where the raid is supposed to flee from an overwhelming number of elite undead, one where they overwhelm the Alliance base while the raid flees to the Horde base, and again when they overwhelm the Horde base as the raid flees to the Night Elf base. As soon as the next expansion dropped and players were a lot stronger than the raid expected them to be? They mowed their way right through the overwhelming stampede and got a ton of
* The Mountie: After being raped on the ship to Canada, Amethyst scarred her own face so men would not find her attractive any more.
* The Mountie and The Quebecers was sung by the wrestlers themselves — poorly.
* The Mountie as he calls on Corporal Grayling to surrender. The movie then flashes back, with occasional narration from Cleora, to explain what is going on and how everyone ended up in this situation.
* The Mountie, Corporal Grayling is sent out to clean up the settlement of Merci, and establish a permanent Mountie post, by himself.
* The Mountie, Corporal Grayling steals Nikolai's horse after being forced to shoot his own. He keeps the horse for the rest of the film.
* The Mountie during 1991-1992, always boasted "I always get my man!" His entrance theme, "I'm the Mountie!" – a heel-type marching tune performed by Rougeau – spelled this out perfectly.
* The Mountie has Grayling breaking up a Chinese dog fighting ring: an encounter that quickly turns into a shootout.
* The Mounties (Royal Canadian Mounted Police) have a similar reputation. Their original name was the Northwest Mounted Police, and they were given responsibility of just about everything north and west of Ontario. When the Yukon gold rush occurred, the NWMP made sure it was the most orderly and civilized gold rush ever seen, especially when contrasted against the California gold rush a few decades before. The Mounties today service as the federal police investigation branch (similar to the FBI), and are considered polite, professional, elite, dedicated, and
* The Mountie: When Grayling first meets Cleora, she is attempting to shoot the body of the mountain man down from a tree. Grayling takes the rifle off her and shoots through the rope with a single shot. Later, Cleora saves Grayling from being lynched by shooting the rope.
* The mounting thing can also be applied to rabbits, rats, or other animals. Like the dogs example, people might guess that they're trying to get busy, when, really, they're asserting dominance.
* The Mourning After: A character loses their significant other (usually via death)

and never moves on with anyone else.
* The Mourning After: After the love interest dies, the surviving member of the couple refuses to find a new love because they consider it disrespectful to their deceased lover.
* The Mourning After: A person doesn't take the death or leaving of their significant other very well.
* The Mourning After: Being too grief-stricken to love again after the death of your lover.
* The Mourning After: Refusing to love again due to still being hung up on a former lover.
* The Mourning After: The love of their life has died, so they're too grief-stricken to love again.
* The Mouse and His Child, where toys and small animals live together.
* The mouse controlling Captain Murphy's body actually gives a quick wave to the audience in "I, Robot (Really)".
* The Mouse Factory: A 1970s syndicated series where classic Disney cartoons were shown, with each show hosted by a different guest star and costumed versions of Disney characters.
* The Mousehole Cat the Great Storm Cat is this but the titular Mowzer is an aversion.
* The Mousehole Cat the Great Storm Cat likes to eat humans, calling them "mice-men".
* The Mouse Hole: In occupied France during WWII, an incompetent Resistance fighter known as "The Mouse" causes an innocent man to get shot by Nazis. The Nazis soon arrive at the man's door, and his mother is forced to hide her wounded son inside the oven. However, the soldiers think she is actually hiding The Mouse in there, and light the fire. The Mouse doesn't care and just chalks it up as another death for the cause.
* The Mouse That Jack Built plays a violin that makes the hungry cat wear earmuffs while he's waiting to snatch him.
* The Mouse That Roared adds one visual fakeout to the original novel (see Literature) by suddenly cutting from one scene to a mushroom cloud:
* The Mouse That Roared (and eventual headaches throughout the rest of the book series), the inept Fenwickian soldiers manage to accidentally steal an experimental weapon of mass destruction from the Americans, turning the Duchy into a major political power (and target to all sides of the Cold War) overnight.
* The Mouse That Roared by Leonard Wibberley has the Duchy of Grand Fenwick, a tiny, impoverished, European country that declares war on the United States of America, planning to lose quickly, and then profit from the Americans coming in to rebuild their economy, just as they'd done for Germany and Japan after WW-II. Then they win, and are at a loss for what to do next.
* The Mouse That Roared derives much dramatic tension in its second half from the possibility that the diplomatic complications resulting from the Duchy of Grand Fenwick's unexpected seizure of a nuclear bomb from the United States might set off a nuclear war. At the end of the story, the bomb is accidentally set off, but luckily it turns out to be a dud.
* The Mouse That Roared (first a book then later a movie starring Peter Sellers in the three top roles) had the plot centering around the "Q-Bomb", a football-sized weapon capable of vaporizing an entire continent and finishing off the rest of the planet with its fallout. Only after the World's Smallest Nation has bullied the world into disarmament is it revealed (only to the readers) that the bomb was a dud.
* The Mouse That Roared is the story of a tiny nation that accidentally acquires the prototype "Q-Bomb," a weapon with planet destroying capabilities. They use it to hold the world hostage. At the end, the weapon's designer realizes that it was a dud.
* The Mouse That Roared: The film opens with the Columbia Studios girl-with-torch logo suddenly hiking up her gown and fleeing from a mouse at her feet. (The title is a metaphor for a tiny, innocuous nation that ends up holding the fate of the

world in its hands.)
* The Mouse That Roared: The Micronation of Grand Fenwick declares war on the US with the premise that they will lose and then get repaired, pumping money into the Fenwickian economy. Then they accidentally capture the Q-Bomb and win. This is before anyone in the US even knows the war is going on.
* The Mouse That Roared, the solders of Grand Fenwick need to get past a locked door at the New York Institute of Physics. So they chop down a tree and cover one end with a chain mail shirt. They then batter down the door. Cut to later on as an almost crying historian examines the chain mail shirt and laments over the destruction of a perfect replica of ancient chain mail.
* The Mousetrap, also by Christie, did this, in which the characters were guests at a hotel trapped due to a snow storm.
* The Mousetrap Even though it wasn't her fault so much as it was just terrible luck, it's haunted her ever since.
* The Mousetrap for the play, "Three Blind Mice" has not been reprinted (or rebroadcast) for 60 years. At least, not in the UK.
* The Mousetrap, has a twist ending that they implore you to keep secret. Most productions of the play even bill themselves as "the longest-running secret in the history of theatre!", or variations to that effect. Most people actually obey.
* The Mousetrap right before the murder. The killer repeats the whistle after their identity is revealed.
* The Mousetrap who killed her. The first "blind mouse", Maureen Lyon, was also this (although in her case she died before the play's beginning). She was an abusive foster parent to the three Corrigan brothers, which lead to one of them dying (her husband also took part in it, but died in prison). It's suspected that the killer is targeting people who were involved in the Corrigan case (Mrs. Boyle was the judge who placed the Corrigans with the Lyons), out of revenge for the youngest brother's death.
* The Mouse Watch, and do pretty much anything else the story needs them to do.
* The Mouse Watch by human scientists. He replaced them with mechanical parts that he crafted himself.
* The Mouse Watch organization of mice who protect both the human and animal worlds. We're introduced to it through protagonist Bernie Skampersky, a new recruit who has been trying to join for years. We follow Bernie and another rookie, a rat named Jarvis Slinktail, as they learn about the team together.
* The Mouse Watch rat Dr. Thornpaw has his headquarters in the crown of the Statue of Liberty. The climax has the titular heroes trying to stop him from taking over NYC.
* The Mouse Watch team. And while it's uncertain how old she's supposed to be here, when we finally see her she's wearing bifocals.
* The Mouth of Sauron from the extended edition. A deep voice that sounds like dead worms.
* "The mouth of the righteous produces wisdom, but a perverse tongue will be cut out." (
* The move "Bide" increases its attack power with every point of damage taken during the time your Pokémon "bides its time," and "Rage" starts out as a weak move, but each hit your Pokémon takes pumps its Attack stat as long as it keeps using the move.
* The Movement. Having superpowered teens and the disenfranchised on their side also helps.
* The Movement: Jayden Revell aka the Mouse showed a closeness with rodents even as a baby, his parents were once horrified to find him sleeping soundly in his crib with rats. As he grew older, his learned to talk and control rats and mice.
* The Movement just as its plot was kicking into high gear. Nowadays, it's more or less forgotten outside of the tiny, niche fanbase it formed during its brief run.
* The Movement (queer ensemble cast; asexual/aromantic main character, bisexual female main character, gay male main character, queer female main character)
* The Movement: Roshanna, AKA Tremor, can cause earthquakes by touching the ground.
* The Movement's members are over 17. In fact, their leader, Virtue is only 16.

* The Movement whether or not he's genuinely possessed or simply has metahuman powers. Burden thinks the former, but the rest of the team thinks the latter.
* The move Roost is a self Anti Air move that nullifies the user's Flying type. The move Ingrain makes the user susceptible to Ground moves, regardless if it is a Flying type, has the Levitate ability, or has used Magnet Rise or Telekinesis.
* The move Scary Face, which is pretty much what it says on the tin: a scary glare that affects the opponent's speed. You actually see a cartoon scary face on the screen when it's used.
* The moves Growl, Tail Whip, Charm, Tearful Look and Baby-Doll Eyes are also centered on this.
* The Move surveillance and filed a libel suit against them. Wilson won the suit and the band not only had to pay all legal costs but also had to donate royalties from the single to charity. The worst part was that the band themselves had nothing to do with Secunda's stunt and didn't even know about it. Needless to say, they found a new manager after that.
* The move to Fridays created a unique problem for NBC. Given that the subject matter was
* The move Vine Whip is a grass-type smacking its opponent with...guess.
* The movie adaptation, as each book in the series is split into two episodes.
* the movie adaptation of—it's unclear whether he's still sentient enough to have party loyalties.
* the movie adaptation refused. Instead, Ender's friend Petra's role got expanded in the adaptation and her personality was changed so their relationship strongly resembled a romantic one, despite being entirely platonic.
* the movie adaptation, Robert Langdon has this to say upon finding himself locked in a hermetically sealed vault in the Vatican Library with no incoming oxygen because the power is being cycled throughout Vatican City:
* the movie adaptation to give Rorschach a love interest, but the idea was dropped.
* The movie also had a radioman whose primary responsibility was calling in fire support.
* The movie also had two Greek dubs: the original from 1991 and the current from 1998.
* The movie also has three Brazilian Portuguese dubs: Alamo (home video, TV and Netflix), Herbert Richers (Rede Globo), and Delart (3D theatrical re-release/Blu-Ray). Delart's dub kept much of the Herbert Richers cast.
* The movie also has Tracy, a good-looking helicopter pilot... that after seeing her boyfriend cheating on her with his ex, goes
* The movie also never reveals what happened to Samuel Sterns after he was mutated by Banner's Gamma-infected blood. This plot point was resolved in
* The movie also won back fans of Spiderman's cartoons given that, of the
* The Movie, an angry/upset Baracus is always calmed/cheered by Murdock's coconut curry tapenade with toast points.
* The Movie, and at one point transforms into a miniature Den-O. This causes bigger problems later in the series, where the "forgotten" contracts cause the Imagin to seemingly disappear.
* The Movie. And by humongous, we mean the biggest damn cape ever conceived of in fiction or otherwise.
* the movie), and one of Louis' first descriptions of her in the book as a vampire (while she is still mentally a child) talks of her appearance being slightly sensual.
* The Movie and races to win back Marge's love by proving that he really does care about more than just himself.
* The Movie and selfishness and leaves him as a result. He does make up for all the dickish things he did, though, and they got back together. Marge's sisters Patty and Selma never approved of their relationship throughout the entire series.
* the Movie, and there's no evidence Jazz was ever going to have a more major role post-movie.)
* The Movie and was also the writer for one of the movie’s three acts. She later wrote the novel sequel to the movie under the same pseudonym.

* The Movie are a much more straight-up example, especially since they are essentially ruled by a kid.
* The Movie at the murder of Lewis Prothero. Prothero watches himself on the TV and mimics himself wishing to meet V face to face. He then turns off the TV and OHMYGOD,HEISSTANDINGRIGHTBEHINDYOU!!!
* The Movie back in 1956. Walter sings "It's Magic" to his girlfriend Harriet Conklin on the family's front porch; his breaking voice and off-key singing leads Harriet's father to put his head out and threaten to throw him down the porch steps.
* The Movie, being reduced to moving in with his mother and narrating his own life when the show was cancelled.
* The movie "Broly: The Legendary Super Saiyan" begins with an entire
* The Movie Buff: A character whose defining trait is their knowledge of film lore.
* The Movie: Burns has sent the dogs. After a small bit of chasing, he reminds his "visitors" of where the exit is.
* The Movie, but in later episodes, "jerkass" was replaced by "not wanting to be bothered by SpongeBob and Patrick", making his suffering seem less funny.
* the movie, but not for most of it (it happens in-between Hercules being accepted as Phil's apprentice and the completion of his hero training).
* The Movie Candace mentions he's one year older than she is, placing him at 16.
* The Movie, Cardinal Roark lives in a parish protected by elite federal agents. It is so heavily fortified, it has earned the nickname "Fortress Roark". Marv goes into great detail about how dangerous the place is... just before killing several guards with his barehands and waltzing into Cardinal Roark's bedroom.
* The Movie, defending Mr. Universe's hideout against Reavers so Mal can use his broadcast equipment.
* The movie depicts the British committing Nazi war crimes and generally living on the other side of the
* The Movie, Desmond Rutaganda is a ruthless mercenary who will do anything, no matter how destructive, for money. He also discusses postcolonial philosophy with a captive Togami.
* The movie did also mention "Extreme Mountaineering Lore" and "Wild Animal Defensive Arts".
* The movie did have a little of its own mind screw version of this though...
* the movie, Dooku frames the Jedi in front of Jabba for the kidnapping of his son, Rotta.
* The Movie-equipped 00 Qan[T], which is also designed for true Innovator pilots like him. Lyle initially pilots his late brother's Gundam Dynames while rescuing Allelujah and Marie, then transfers to the Gundam Zabanya for the battles against the ELS.
* The movie even (subtly) offers an explanation for all this: the brothers are on a
* The movie explores a very difficult conundrum - if you are sent to jail wrongfully and kill another inmate while in detention, are you legally accountable for that crime that would have never happened if the wrongful sentence hadn't been given in the first place? Keep in mind that the accused here has limited mental capacities and ability to tell right from wrong due to
* The movie features a meta example. One scene depicts various bootleg DVDs parodying Disney films.
* The movie features handkerchief-cultist Humma Kavula, who uses a "platform" of dozens of tiny metal legs... and one gimpy one.
* The movie features live-action humans with animated inner space cells and viruses,
* The movie focused heavily on this too, but later episodes it seems the adults have given up (in the case of some, like Counselor Mackey and Randy Marsh, they have their own issues to deal with).
* the movie for season three has the two mentioning how busy their schedule was, especially when they were making the meteor shower trilogy. In fact, they have absolutely no memory of making "Sexual Harassment Panda" (the first episode aired

after the movie's release).
* The movie franchise adds several hints of a romantic development to Effie and Haymitch's relationship, especially in the two parts of
* The Movie, from a distance it looks like Stitch's ship is going to crash into the middle of the Pacific, and all the alien races there cheer as they assume he will fall into the ocean and drown. Then they zoom in and see that he manages to make landfall on a little tiny island chain. Much frustration ensues.
* The Movie game: the sting plays after Tifa fights against Loz. She looks around confused, only to discover that the music is the ring tone of Loz's cell phone.
* The Movie, Gary and other snails now have this trope invoked on them.
* The Movie general, prompting all the soldiers to get back in their uniforms — except the poor schmuck who wasn't listening.
* The Moviegoer who has pseudo-religious experiences one after another to stave off the mundanity of her boring life.
* The movie had three Brazilian Portuguese dubs: the first from 1943, the second from 1969 by Riosom, and the current from 1991 by the Delart studio. Since the first two dubs are lost, only Delart's dub is currently available. The 1969 and 1991 dubs were both directed and translated by Telmo de Avelar, while Aloysio de Oliveira translated the songs.
* The movie handwaves the problems of being frozen alive by claiming he was accidentally flash-frozen in glycerin that was being transported on the ship when it wrecked.
* The movie has a deleted scene where Allison breaks into a teacher's locker and, finding a Prince album, tells Andy "You know what this means? They're human." The final version of the film has a scene in the library where Allison is shown, in a reaction shot, to be inspecting the album, with no explanation of where she got it or why she has it.
* The Movie has a disturbing example of this. While the group of survivors is in a grocery store, they encounter a vampire child who charges them with surprising power and nearly kills one of their group. In one of the most disturbing scenes in the entire movie, they kill her by hacking off her head and are so shocked that they cannot even recognize who she was before.
* The movie has an awesome (from an evil point of view) scene when the
* The movie has a Wizard of Oz play, and Greg plays a tree... and that's about all that the two versions have in common. Greg
* The Movie has Harold Hill at the footbridge looking into the water and imagining himself conducting a real brass band, with the vision fading when he dejectedly snaps his twig baton in half.
* The movie has Lyn carting around a flower. It gets knocked out of her hands near the end, and the last shot before the credits is a small field of flowers grown from where it got knocked down... somehow...
* The movie has Yoriko do this to her skirt during a hostage situation so she can move better.
* the movie have him be the only person in Kanto who knows about Mewtwo, but still does not go out and say that he in particular cloned him. Most fans have taken it as confirmation, though.
* the movie, he achieves it through surgery. His siblings, Zandar and Zarana, were also masters of this.
* the movie. He just does so because he likes them. (And there are hints that they're better friends than any other humans he's known.)
* the movie. Hercules got tricked into flying Pegasus into Agrabah's "Alley of a Thousand Sheets", where it looked like the clothesline was going to send him flying. In spite of Phil's complaints, he managed to muscle through and break the clothesline.
* "The Movie Hero" a movie where Jeremy Sisto's character belives he is The Hero in a movie. He talks to the audience constantly, all the while discussing common tropes in movies. He even titles other characters in the movie; The Love Interest, The Side-Kick, ect. And he tells them what roles they play in hs movie. When addressing the audience, other characters will ask him who he is talking to, and he

replies, "My audience". The rest of the characters think he's insane, to the point where he has to go to therapy for it.
* The Movie Hero, he refers to Jonathan as "The Doomed Fiance" and doesn't consider him a real threat.
* The Movie he was so scared he could not stand flying anymore, despite being in a occupation where jumping from a plane is an occasional must. He is not happy about it.
* The Movie, Homer says, "We have a great life here in Alaska, and we are never going back to America again!"
* The Movie: "I can't believe we're paying to see something we get on TV for free! If you ask me, everybody in this theater is a giant sucker! Especially you!"
* The Movie idea turning one of nature's predators into a killing machine.
* The movie, in addition to updating the number (now 020 79460347) to reflect said changes to area codes, replaced the number with a straight example - 020 79460XXX is the range that Ofcom blocked off for fictional London numbers.
* The movie includes a scene in which SpongeBob and Patrick are spraying streams of water directly into each others' mouths, much to the disgust of Princess Mindy.
* The Movie. In contrast, the Other Father is attentive, caring, and much cooler.
* The movie. Initially, only Rocket is able to make out what he's saying but by the second film all the Guardians understand him without issue.
* The Movie. In one early scene, Gerard sends each of the members of his team off on an errand or evidence gathering, and ends with this exchange:
* The movie introduces Hot Rod, who becomes Rodimus Prime. He's run into this problem lately: we haven't heard the name "Hot Rod" since
* the movie, in which Daniel picks up a new language not even vaguely resembling any modern language to the point of fluency just by talking to one woman for a little while. Justified in that the language was extremely similar to Ancient Egyptian, which Jackson, being an archeologist specializing in Egypt, was very familiar with (the woman in question was pointing out hieroglyphics, which he could read, and teaching him how to pronounce the words). In fact, his throw-away line about picking up the right vowels makes sense to anyone with a passing familiarity with Ancient Egyptian, since hieroglyphics only tell you which consonants to use, vowels are meant to be memorized.
* The Movie. It doesn't stop a trio of Steven's enemies-turned-friends from joking about it, though.
* the movie, it's just the arc reactor and electromagnet which form the glowing blue part in the center.
* The Movie: Jack calls out for Algy, but Algy is currently pretending to be Ernest. Jack is very miffed that he must call out "Ernest" in order to get a response.
* The Movie kiss between characters in the franchise's 10+-year history.
* The Movie, Linkara says that he has a magic gun; Allen asks "Where'd you purchase that, anyway?" Linkara is unamused.
* The Movie live shows and thinking, "Wouldn't it be funny if Richie and Eddie ran a hotel?"
* The movie makes the character Wage female, with the character being male in the original toyline.
* The movie messes around with this; in the original comic, Peter ignores the criminal because he's letting his newfound fame go to his head and thinks
* The Movie, Mike assumes he can drive the Satellite of Love because he's "fully instrument-rated in Microsoft Flight Simulator." Within seconds, he crashes the Satellite into the Hubble Space Telescope. Later, on the TV show, Mike has apparently trained for real, and became adept at driving the Satellite.
* The Movie military fleet from the New United Nations Spacy has more numerous ships and fighters of even higher capabilities.
* The movie "Nobita's New Great Adventure into the Underworld" (both the original version and the remake) has a
* The Movie: "Now that we've practiced kissing and cuddling, we'll practice eating out... at a fancy restaurant!"

* The movie of the series also has the HellRising Hopper Progrise Key, which is an
* The Movie, once Vani figures out her husband is cheating on her (with the wife of the one who would become Vani's fiance in the series, Rui), she starts throwing his things out the apartment window.
* the movie, one of the characters is trying to remember a tune. He is having a hard time, and eventually complains about music the viewer had assumed was just background music. Teela pulls out a blaster and shoots a speaker on the side of a building, causing the music to cut off.
* the movie". One of the few things from the book to make it into the movie unchanged.
* The movie opens with Dunstan Thorn trying to talk his way past the shepherd who guards the gap in the wall separating England from the magical kingdom of Stormhold. Realizing the guard is pretty firm and won't just let him through, Dunstan feigns defeat and starts to walk away....all of a few paces, before abruptly turning around and running through the gap before the guard can stop him. 18 years later, Tristan tries the same trick, but the guard wisely knows what he's doing and takes him down with proficient kung fu.
* The movie opens with the Asgardian ship calling for help when they are attacked by Thanos. The Guardians of the Galaxy pick up the message but by the time they arrive, Thor is the only survivor.
* The Movie patties. There are also the candy Gummy Krabby Patties from Frankford Candy.
* The Movie penned their romance himself before he died; he was one of the writers for the script and it was his idea to include it. Adams was also fond of changing the details of the story for each adaptation, so it was only a matter of time before he decided to make them love interests.
* The movie poster shows a jet going through several characters' ear canals.
* The Movie, President Arnold Schwarzenegger is given five folders, each one containing a potential response to the Springfield situation. He doesn't even open any of them before picking #3. "I was elected to lead, not to read."
* The movie pretty much confirms his cynical view that nothing changes ("the Spanish oppressed you, the Mexicans ignored you, the dons seem content merely to cheat and lie to you"). The California we see in the 1840s is as class-ridden as ever, the few soldiers we see are corrupt or incompetent, and the Mexican government seems to have no presence there. All in line with the Romanticist skepticism of progress.
* The movie Release Form. Jeltz, who is all too eager to execute Trillian is instantly pacified when he receives the release form and orders her freed. Also, when the heroes are escaping, Jeltz is about to order pursuit, when a factory whistle is heard, and Jeltz tells everyone to take an hour for lunch.
* the movie resemble John Merrick. The play has the actor's appearance go unchanged, with them using their physicality to represent his deformity.
* The Movie reversed this, with Dr. Forrester addressing the audience while Mike and the 'bots ignore the fourth wall.
* the movie, Rex Pester the news reporter gets all the babies' names wrong: "Young Tammy, baby Dale, the twins Bill and Jill, little Chunky, and poor Amelia."
* the movie right when Superman and Lois are about to kiss, Jimmy interrupts. Lois is understandably annoyed, but Superman acts like it's nothing.
* The Movie, Robin tries to trick the girls into a game of strip poker. The girls work out what he was doing and agree. Chrissie turns out to be card shark (and Jo folds every hand), so Robin winds up stripped naked.
* The Movies) And no, you can't cross dress it; it always matches the gender of the actor.
* The movies, and occasionally the TV series', would sometimes also throw in the rank of Commodore, which is not from the US Navy at all (but pulled in from the Royal Navy). It lies between Captain and Admiral, and would theoretically be someone in charge of a small fleet of ships (probably similar to the "Fleet Captain" rank mentioned above)
* The movies and shows tended not to have large-scale space battles, with dozens

or hundreds of ships flying around, but they did have space battles that were impressive in their own scope.
* The Movies, any actor or actress can play any role. In a romantic scene featuring a man putting the moves on a woman, the man will be noticeably taller. However, switching the roles so that a woman is seducing a man, or making it a same sex couple, will preserve the original height difference so that the seducer is always taller than the seducee.
* The movies are also filled with noughties fashion since 2004, or what the characters wear when dressed as Muggles — it's not glaring, and hard to describe, but an obvious example would be the wide-horizontal-stripes jumpers that Hermione and Ron kept wearing in the sixth one: hot at the time of filming, not really around in the nineties.
* The movies are fan-favorites for their good plot and character development.
* The movies aren't as bad. While Kittan still dies, the other pilots still live. Nia's death still occurs and Simon's and Yoko's fates are still the same, if not played out mildly more optimistically.
* The Movie Scorpius, who spends the rest of the series trying to rip the knowledge from Crichton's head.
* The Movie, Scratchy's jaw drops at the sight of a whole heap of rockets flying at him, which promptly fill his gaping mouth.
* The movie seems so determined to include romantic subplots for just about every main character that it even invented new characters to serve as love interests for Christie and Helena: conman/master thief Max (who is also Christie's frequent partner-in-crime) and tech genius Weatherby, respectively.
* The movie's ending also implies that after the events depicted the Roman Republic was reestablished - something that never happened and by then was almost inconceivable. It was also never
* The Movie, separate and distinct from Ohma Zi-O, who used the original as a decoy for his plan to reset the Heisei era because he believes it to be "ugly". Ohma Zi-O actually intercedes to loan Sougo a portion of his power (giving him a movie-exclusive powerup) so he can defeat their common enemy.
* The Movies features a romance between a normal human man and a woman (the title character) who is an ancient species, timeless but not ageless. Over the course of a year she ages an entire lifetime and dies at midnight every New Year's Eve only to be reborn as a baby seconds later. May finds husbands to take care of her during this time but does not stay married to them for more than 50 years.
* The Movie, she drops a rock on the head of Russ Cargill, knocking him out, just as he's about to shoot Homer and Bart. Bart and Homer leave her there and she still manages to get back into the arms of Marge before they do... plus she got out to the canyon in the first place.
* The Movie Shego is kicked from the roof of a building that is several stories high, into an electrical signal tower, which not only electrocutes her but also collapses right on top of her. This was intended to be fatal (since the movie was an intended finale), but the execs vetoed it so she comes out of the incident with just slightly torn clothes and frazzled hair...
* The Movie, she punched him in the face so hard that he flew across the room. Considering that Kim is much stronger than Drakken and that it was the first time during the entire series that she did hit him, things did not look pretty. Auie.
* The movie showed one when it first came out, which may have been mostly forgotten nowadays. When Doc Brown first demonstrates his time machine, he ties the dog Einstein into the DeLorean. At the point where the car disappears in a flash of fire-trails, many in the audience worried that the dog may have really been destroyed.
* The Movie showing more concern for it than his sort-of-girlfriend Nazz.
* The movie shows many of the troops and vehicles retreating (or trying to). Also, Major General Mann ordered the Marine commander to "Hold them as long as you can".
* The Movie, silver Elsa Peretti open heart necklaces became quite popular - as Bridget wears one throughout the series.
* The Movies includes the option for a bar slide scene on the appropriate sets.

* The movies introduce the Genesis device (a form of instant terraforming that may bring people back to life as a side effect), which is so much further advanced than anything the Federation possesses before or since that it might as well be magic. The planet it creates disintegrates within a couple weeks, but surely there would be a way to work the kinks out within the next century, and the research that went into it could at least be applied to other projects, like a handy-dandy anti-Borg weapon. But in
* the movies it's ripping off is fond of sometimes having ghosts appear silently in the background with no obvious attention drawn to them.
* The Movie, six of them being decoys (the audience was treated to six barrels with blinking lights and thrusters being jettisoned from Serenity as it broke orbit).
* The movie's manga adaptation makes a point of portraying that one exact Mass "Oh, Crap!"
* The movies (much less so the original manga) deal a lot more with the related issue of how much particularly military cyborgs become increasingly removed from everyday life and even ordinary people and living almost in a separate world. It usually falls to Togusa, who is the only
* The movie's no slouch when it comes to this trope, as it also shows that Touga
* The Movies notably don't gel with particular animations such as sharp head turns. They remain rigid while the rest of the head moves. None of the long styles ever go longer than the middle of the back presumably for this reason. This shows up in some of the outfits with long skirts and dresses - especially when the models are riding horses.
* The Movies, on the radio announcement two years before the depression event hits early in the game.
* The Movie ("Sorry, this is were we get off!") before he does, then mentions that he usually doesn't come up with those until later.
* the movie's pinball game is free to indulge itself in a nonstop barrage of explosions, gunfire, and action.
* The movie's popularity quadrupled the international price of amber. It also popularized fake amber with insects in it, which usually comes from China, is sold on auction sites, and outrages precious stone sellers everywhere.
* The Movie "Stand by ready!"). The only hiccup in the dialogue being what was presumably "strategy" being translated as "wisdom and tactics".
* The Movie started with a textbook example. Naturally, it was a suicide machine. The man was an engineer, and was more pleased that it worked than anything else.
* The movie starts off with the death of a wealthy matriarch named Doña Clarita—María works for her
* The Movie, Stewie and Brian need to take Quagmire's RV. Stewie (in the driver's seat) starts hitting buttons at random on the dashboard, triggering Quagmire's "modifications" which lock the passenger's arms down and then forces their head into the driver's crotch.
* The movie's villain Nix can, among various other magic feats, project images into people's minds. He makes them see "flesh with a god's eyes"... as it horribly mutates into undead and alien shapes.
* the movies your Sims can watch is a slasher movie called ''Moonlight Massacre III", which features one of these among many other cliches.
* The Movie take responsibility for releasing Zeebad, until near the end:
* The movie takes place in late 2003 and 2004, yet many of the visible laptops clearly are from the modern day. Somewhat ironically in a bit of an inversion they mostly appear to be Windows 98, even though XP had been out for several years at that time and would no doubt be more standard among such a tech-savvy crowd.
* The movie team itself has become the public face of the entire Avengers franchise. The
* The Movie that lifts him out of his funk. And then they fight alongside each other, completely ignoring Riza and Winry.
* The Movie, the cast address their resolve to rescue Akane from Kirin and the Seven Lucky Gods against an image of the setting sun with the word "youth" stamped on it.

* The Movie; the fourth, who plays a teacher, finds his character's phrase written on the blackboard at the start of class.
* The Movie, the movie opens with this, with Jackie expertly shooting the (hanging) alarm clocks set by his assistant. He doesn't even come close to waking up.
* The Movie; the narrator mentions during a recap that "George was really shot but can't die because, let's face it, he's the hero."
* The Movie, the Old Curmudgeon tries to gain immortality by being banned from the cemetery.
* the movie, the Rangers' costumes were redesigned to incorporate emblems of their respective dinosaurs on their chests. This had long been a feature of most of the Power Rangers action figures, merchandise, and promotional material, but couldn't be incorporated into the show itself because of the reliance on Japanese stock footage. When it came time to make a movie out of 100 percent original footage, the Rangers now conveniently looked more like their action figures.
* The Movie, there is a magic muffin that allows a certain amount of unrestricted wishing for those trusted with it. The only wish that can't be made is for the magic muffin to taste better (yeah, the muffin is all-powerful, but it tastes horrible).
* The Movie There is a supernatural quality to the Phantasm, though the origin of this power is unknown.
* The Movie: The schoolmaster is depicted as a puppet which the wife beats, causing it to strike the child.
* The Movie, these exist in the {{Whoniverse)) as fictional accounts of the Doctor's adventures.)
* The Movie, the song "Summer (Where Do We Begin?)" briefly segues into the opening theme.
* the movie, the stargate had a conical vortex coming out the back of it while active, which was called "the strudel" in one of the featurettes. The strudel was dropped in the TV series.
* the movie, the villain shows up on Earth with a giant Kindergarten Injector filled with poison that will kill all life on Earth in less than two days if not stopped. Subverted when it ends up injecting it's entire payload at the climax which, while wreaking devastation, is damage Steven is eventually able to fix over time.
* The Movie, they are called "Isbjorne", meaning "ice bears" or polar bears. Not as intimidating, but you do not want to run into a polar bear anywhere.
* the movie This was a joke that some fans understood without needing the explanation, as Ford Prefects are a kind of car sold in the U.K., Australia, Argentina and Canada. American fans tended not to get the joke, since Ford Prefects were never sold in the U.S.
* The Movie, though, as an example of "getting pregnant once you stop trying."
* the movie to him leaving bloodstained fingerprints on the letters in a newspaper to spell a ship's name.
* The Movie, Tohru is seen bursting in flames in Kamui's dream at the beginning. We don't know if she truly died like that, however.
* The Movie too forcefully. (JK Rowling admits they shared some "charged moments" and "it could have gone that way" but seems to largely come down on the side of "They didn't.")
* The Movie to shirk responsibility and blame for the moral decay of their kids:
* The movie trots this trope out in the guise of Charlie's three "sons" — geniuses who seemingly
* The movie (TV show/video game/whatever) has to fall into obscurity. This is the most subjective part of this entry, but you can tell if it fell into obscurity by the fact that the studio either didn't release a DVD of it (not due only to
* The Movie type. It could also be a form of Divine Protection, as the damage and aging he sustains is magically transferred to his picture, rather than healed.
* The movie version eliminates Rosenthal and has the tiger about to jump Marianna (who, as in the novel, is trying to shoot the tiger to keep Sandokan from doing something as stupid like facing a tiger with a knife) while Sandokan tries to get

its attention. Then the tiger decides to pounce on the vulnerable target... And Sandokan, having realized what was about to happen,
* The movie version of Ant-Man is at least vaguely aware of this trope. Whilst our hero uses 'Pym Particles' to break this law with impunity, the villain's attempts to recreate the effect on test subjects/victims fail. Messily.
* the movie version of because Leland Gaunt is actually the Devil in disguise.
* the movie version of have explicitly attached a mystical element to the Marvel universe's gamma radiation to explain its unscientific effects.
* the movie version. This is actually referenced in the film. 99 reveals that she recently underwent plastic surgery after botching a mission and had the surgeons make her look younger. Smart's inexperience is mostly due to him having been too obese to be a field agent until just before the events of the film.
* The movie version was not only shot in the real 1984, but every scene referencing a date was shot on the right date.
* the movie version, when Logan 5 and Jessica 6 reach the ruined city, we know its Washington DC because the Lincoln Memorial, Washington Monument, and National Archives are still standing. Vine-covered and weathered, but still standing.
* The movie was also dubbed into French three times: in 1945, 1978, and 1993. Gérard Hernandez voiced the owl in both redubs.
* The movie was also dubbed into Japanese four times: the first from 1963, the second from 1982/83 for TBS, the third from 1984 for VHS and laserdisc, and the current from 1992.
* The movie was also re-dubbed in Germany in 1998. Disney never exactly said why they did so, citing vague "it's now closer to the original", while the real reason most likely were outstanding payments to the original dub voice actors. This move pretty much killed the movie's reputation in Germany, as the new dub was seen as an atrocity, due to the voices, the changed dialogue, and especially the songs, which were borderline
* The movie was also re-dubbed in Italian in 1967. The re-dub is considered a significant improvement over the original 1950 version. It is also the first Disney film to receive an Italian re-dub.
* The movie was based off of Philip K. Dick's "Second Variety", where the girl the protagonist saved was actually one of the Second Variety robots, but that story straddles the line between cruel twist ending and
* The movie was dubbed into European Spanish twice: the first dub from 1989 was made in Barcelona for TVE, and the second was made in Madrid for Antena 3 (1993).
* The movie was dubbed twice into Brazilian Portuguese. The original dub was produced in Los Angeles, and the second was made in Rio de Janeiro in 1997. Since then, the original dub occasionally airs on TV. In the first dub, Aloysio de Oliveira and Rosina Pagã
* The movie was famously filmed at a real (now defunct) military school in Missouri.
* The Movie was happy-skipping under said rain just adds to the effect.
* The movie was rated PG-13 for "irreverent humor throughout." The producers and marketers likely wanted the inclusion of
* The Movie we are introduced us to Junkion, which is for all intents and purposes, a planet with a surface made of used chewing gum pulled taut over a large area, and Quintessa, which looks like a sphere, but has several large, almost blade like, masses of continent jutting out from the equator.
* the movie, were already kindergarten-aged, fully-dressed, self-aware, and able to properly speak English when they were born.
* The Movie when drafting the movie, before his death, to increase studio interest and audience acceptance of the movie. (Which doesn't necessarily rule out that the new love plot was half-baked or several draft rewrites away from being good.)
* The Movie, when Justin lets slip that the reason he's always tried so hard to be perfect is that he's afraid that his parents won't love him otherwise.
* The Movie when the cast's souls were trying to find their original bodies.
* The Movie. When the property developer is wining and dining Chrissie in an effort to get her to sign over her lease to him, Robin, Larry and the chef doctor his food

with syrup of figs, castor oil and Epsom salts.
* the movie, when the protagonists escape from a Goozim by opening a portal to another dimension. The portal is too small for the Goozim to fall through, so as a result his limbs are cut off.
* The Movie, when the Simpsons' house collapses, Chief Wiggum says they're China's problem now.
* The Movie, where Kirk slept with Uhura's roommate, implying this sort of thing happened a lot.
* The Movie where Leon falls for a woman and ends the story married with a child, but still doing his radio show.
* The Movie, where Okabe's leaping across time is starting to do this to him.
* The Movie, where Ralph Wiggum, after seeing Bart naked, proclaims "I like men now!"
* the movie, where the alien guards at the space prison Moo-Ping 10 can briefly be heard speaking in a language that definitely isn't English.
* the movie, which was used regularly throughout the first season of the show.
* The Movie who are heavily prejudiced against mammalian species (like squirrels) and even fellow aquatic inhabitants that aren't fish (such as crustaceans, invertebrates, and cephalopods) unless they have some sort of social standing (I.E. Squilliam is rich, Larry is buff, and SpongeBob is the one person stopping Bikini Bottom from destroying itself, either by his numerous acts of heroism, or just the simple task of working at the Krusty Krab and providing the masses with Krabby Patties).
* The Movie (who dug in the wrong directions and got easily lost underground).
* The Movie, who played Saruman, and who was still badass despite being too old to walk up a flight of stairs smoothly.
* The Movie will give away a card featuring Miyuki in the exact same Cinderella dress she imagines herself in during the opening.
* The Movie. With that final piece in place, it is a perfectly constructed series when watched in any order.
* The Movie, you can see Lee trying to clobber him, but her sisters are holding her back.
* The Moving Experience: A character thinks their best friend is moving to another town and struggles to say goodbye.
* The Moving Finger), before cutting it off with an electric hedge trimmer.
* The Moving Finger", in which a man believes that he sees a finger sticking up out of his bathroom sink's drain. Things get increasingly weird (and the main character gets increasingly unhinged), until the reader isn't sure what's really going on. The ending suggests one possible 'mundane' explanation, but leaves it ambiguous.
* The Moving Finger pretend that they saw the murder committed and know the identity of the murderer. In each case, once again, this induces the murderer to attempt another murder, and be caught.
* The Moving Target, the character was named Lew Archer. The producers changed the character's name to Lew Harper because they bought the rights to the novel, but not the character of Lew Archer, who was the star of a series of detective novels.
* The Movolreilen Saga, each of the nations has one of its own, though so far only Nilenira's has been fleshed out.
* The Movolreilen Saga, even if she still becomes a warrior (These warriors that failed their training are called "Secondaries", and make up the bulk of the Nileniran military strength).
* The Movolreilen Saga. Men are pretty much considered to be human forklifts and plows, except when used for breeding.
* The Moxes, a gang founded to protect sex workers from abuse. The Moxes was formed after the
* The Moxy Show cartoon special, which he was rendered in real time, making it among the first TV shows to use mo-cap.
* The MPAA encountered this in 2007; it attempted to stop popular social aggregator Digg from allowing an encryption key to the HD-DVD and Blu-ray formats from being posted with a DMCA takedown. When the takedown attempt became public

knowledge, hundreds of stories containing the key were submitted and upvoted on Digg. For hours, dozens of repetitions of the magic number formed literally the
* The MPAA have been blamed by many for neutering the gore effects in
* them, probably, as dolphins have been observed killing porpoises for fun. And orcas were once filmed killing a blue whale and leaving it to die without eating any of it at all.
* The Mr. Bungle songs "Golem II: The Bionic Vapour Boy" and "None of Them Knew They Were Robots".
* The Mr. Gear and Clippy Show lampshaded this at the conclusion of the "Return of Dr. Disc" arc, where after all the loose ends are tied up, everyone starts laughing for no apparent reason. One of the characters asks "Why are we laughing?" before the scene moves to the closing credit screen.
* The "Mr. Hilter" sketch, in which the premise is that most of the Nazi Germany higher-ups have escaped to a small English country town called Minehead and are quite badly trying to fit in. Nobody notices.
* the Mr. Kiwi drink he's selling is not actually full of vitamin C as the advertising claims and that it's just colored sugar water.
* The Mr Men Movie, Little Miss Whoops tells Little Miss Curious how she got her glasses.
* The Mr. Men Show. At one point, Mr. Nervous gives her his own glasses, telling her she needs them more than he does. This doesn't help any, since they have different prescriptions.
* The Mr. Men Show does this in a music video from the episode "Movies".
* The Mr. Men Show episode "Chores," blue cheese becomes dangerous as a result of this trope.
* The Mr. Men Show episode "Parties", Miss Whoops offered Mr. Bump to lick her strawberry flavored ice sculpture of herself. But Mr. Bump ended up getting his tongue stuck on a piece of the sculpture.
* The Mr. Men Show first aired, it was rated TV-Y. By the second season, it was bumped to TV-Y7. Why it changed is never stated, though it's speculated that the sound effects for Mr. Rude's flatulence changed from normal honks to actual passing gas.
* The Mr. Men Show had framing device segments involving live action characters that were each tied to a particular theme such as exercise or carnivals.
* The Mr. Men Show has Mr. Stubborn frequently say "This [noun] is CHEAP!"
* The Mr. Men Show has Mr. Tickle who, as the name implies, loves tickling people regardless if they agree to it or not. It's even to the point where one of the music numbers frames him as some sort of monster.
* The Mr. Men Show has some voice actors that used pseudonyms for their credits in the show. In recent years, names of the unknown actors were revealed.
* The Mr. Men Show: Little Miss Chatterbox, as well as Mr. Chatterbox. They ARE both Motor Mouths.
* The Mr. Men Show, Little Miss Scary loves anything that has fear written all over it.
* The Mr. Men Show — When Mr. Lazy and Mr. Scatterbrain end up at the South Pole in the episode Boats, Mr. Scatterbrain says he must have taken a wrong turn at Tahiti.
* The Mr. Men Show, Miss Calamity ends up covered in mud and goo, leading Mr. Tickle to think she's the monster and run away screaming. Mr. Grumpy and Miss Scary are not as impressed.
* The Mr. Men Show, Miss Naughty places a rubber fly on Mr. Nervous' salad plate, and then waits to see his reaction. True to form, Mr. Nervous starts freaking out about something being in his salad, and asks Mr. Tickle to get rid of it. "It's just an olive," Mr. Tickle tells him, removing the offending veggie.
* The Mr. Men Show, Miss Naughty uses some on Mr. Happy and Miss Sunshine.
* The Mr. Men Show, most notably Little Miss Whoops, who can't keep a job because she's just so bad at everything she does, despite always claiming to be "a trained professional".
* The Mr. Men Show, Mr. Bounce looks like a yellow Mr. Tickle with a pink hat

instead of a blue one.
* The Mr. Men Show Mr Scatterbrain and Mr Stubborn are Mr Men counterparts to their Little Miss book counterparts.
* The Mr. Men Show, Mr. Stubborn goes over one, but he thinks he's going to a calm stream.
* The Mr. Men Show, Mr. Stubborn has very powerful sneezing when he gets sick (even though he denies being sick).
* The Mr. Men Show: The chef in Mr. Scatterbrain's restaurant was a man-eating plant. It tried to eat Mr. Grumpy.
* The Mr. Men Show: The episode "Games" had a segment where Mr. Grumpy and Mr. Stubborn went bowling.
* The Mr. Men Show: There are multiple gags where a character temporarily grows their arm to reach something from far away. Unlike Mr. Tickle, the characters don't have it as an actual ability and it's merely used as a joke.
* The Mr. Men Show, though only the characters have these. The objects have no outline at all.
* The Mr. Men Show with various live action segments all tied to a theme with Mr. Men stories in between.
* The Mr. Men Show would often be shown blasted off into outer space, but without a twinkle. The only one who completely did this trope with the twinkle is Mr. Bump in the episode "Games".
* The "Mr. Neutron" Sketch: Captain Carpenter, from the top-secret agency FEEBLE must disguise himself to go on a mission to the Yukon. His disguise? A large sign which says "Nothing to do with FEEBLE".
* The Mr. Potato Head Show: After getting depressed, thinking his friends no longer needed him, Mr. Potato Head stays at a run-down hotel in a dangerous neighborhood to mope.
* The Mr. Potato Head Show are all that's needed to establish Mr. Potato Head's new supervisor as bad news the moment he's introduced.
* The Mr. Potato Head Show, are all that's needed to establish Mr. Potato Head's new supervisor as bad news the moment he's introduced.
* The Mr. Potato Head Show: Dr. Fruitcake created a Frankenstein-like ham-monster that attacked the rest of the cast, built machines that have exploded when they're supposed to be safe, and gave the other characters real weapons as props while they were doing a spy show.
* The Mr. Potato Head Show: Due to a misunderstanding, Queenie Sweet Potato felt very awkward around Mr. Potato Head, and made up random and nonsensical excuses to get away from him, including:
* The Mr. Potato Head Show episode, "Royal Pain", Dr. Fruitcake rebuilds his creation, Hammy the Ham Monster (who was destroyed by Baloney in the episode, "Aliens Dig Baloney"). To ensure Hammy is much more tame this time around, Dr. Fruitcake has given him the brain of a two-year old child.
* The Mr. Potato Head Show grows to enormous proportions after eating radioactive sludge. In another episode, Dr. Fruitcake ends up in a parallel universe where he's chased by a giant, carnivorous Mr. Potato Head.
* The Mr. Potato Head Show herself, has a favorite food: sugar-cream pies.
* The Mr. Potato Head Show: Johnny Rottenapple even calls his own songs "My latest musical stain/puddle/onslaught"!
* The Mr. Potato Head Show: Most episodes had Betty the Kitchen Fairy appear to deliver an aesop and call out the characters on jerkish behavior. If there's a problem like a monster chasing the characters, though, she won't intervene to save them. Most episodes also have a song in them.
* The Mr. Potato Head Show: One of Mr. Potato Head's catchphrases is "Who's ___? That's right, it's me/you!" The blank can be filled in with all sorts of things, like "clueless", "gonna be rich", or "a genius".
* The Mr. Potato Head Show: Queenie Sweet Potato loves her sugar cream pies. At one point, she accidentally got some pie slapped onto her face, and when Mr. Potato Head's test audience loved it, he added a segment to his for-Toddlers episode where a large number of pies were thrown in Queenie's face.

* The Mr. Potato Head Show, so Mr. Potato Head splices in stock footage of an applauding audience after each act, instead. At one point, footage plays of a woman working in what looks to be a tomato-canning factory, and Mr. Potato Head shouts "Wrong stock footage!"
* The Mr. Potato Head Show, such as telling them that their superhero episode needs to be educational or a musical.
* The Mr. Potato Head Show theme to it) had Potato Bug use a brain enhancer. She's an atypical example in that she isn't just a know-it-all, and doesn't even go out of her way to prove she knows it all, either — when other characters ask her trivia questions, she gets bored with that quickly. The problems begin when she starts enhancing equipment around the kitchen in ways only she can understand.
* The Mr. Potato Head Show: This is actually the basic premise: the main cast films episodes of a TV show (not all of which we get to see) for a pair of network executives. However, what this show is or even its genre is different in every episode.
* The Mr. Potato Head Show to begin with): she sees Mr. Potato Head as a baked potato, and she sees Baloney as a sandwich.
* The Mr. Potato Head Show" to Queenie, she screamed at the top of her lungs and fell over. As she was on the floor moaning, "the horror...the horror..." Mr. Potato Head asked her, "So...you don't like it?"
* The Mr. Potato Head Show what you mean" in a much more subdued voice than usual, a clear hint to the audience that things are going to be different this time.
* The Mr. Potato Head Show, where Mr. Potato Head and Baloney are playing cops, and they arrest Sweet Potato for jaywalking. The implication is that the entire in-universe episode had been them trying to arrest her.
* The Mrs. Jeffries series is based on this. As the housekeeper to a remarkably rich Scotland Yard detective, she organizes the household staff to independently investigate the cases and then steers her clueless employer to the right conclusions.
* "The Mr. Smurf Contest" ends with the male Smurfs not only taking turns dancing with Smurfette at the Harvest Moon Ball, but also waiting to have a turn with Sassette as she dances with Papa Smurf.
* The Mr. Torgue DLC has a sidequest where Torgue realizes that the beer in the local pub has been contaminated and sends you to kill everyone in the bar to prevent them from getting poisoned by the beer. It takes him until
* The Mr Yuk PSA about household hazards(mainly poison) begins and ends with this
* The MS-07 Gouf series of Mobile Suits in have a distinctive triangular protrusion hanging down from the middle of their
* The MS-14 Gelgoog series have stern looks due to their wide, flat 'brows' and narrow visors.
* themself, although he provided no details. "Between you and me, what really happened was..."
* themself, who felt that the "Technicolor Timecoat" fit Six's "fractured personality". Judging from the other Time Lords, it seems to be a species trait.
* themselves, according to Mr. Incredible. Special mention goes to the tenth model, who proved immune to the government's weapons.
* themselves and any intelligent species remaining in the galaxy as well.
* themselves and blend it into some of the most potent horror 40k has to offer.
* themselves and not the originally planned sapient inhabitants of the planet.
* themselves and/or Poison to occur outside of fiction, and how a threatened person is likely to put a barrier between themselves and an attacker if they can, this sort of unintended Locked Room Mystery happens too often in the real world to really count as a "mystery".
* themselves, before they started repressing emotion. Alas, it came too late to save the series. PLUS: Humans united the various galactic races TWICE: once in "our" reality as the Federation, to combat the Romulans, and again in the "Mirror Universe" as the Terran Empire, who ended up uniting everyone else against them.
* themselves can be used as instruments with enough creativity (and technological knowledge).

* themselves, can muster about 15,000 men, cavalry and infantry, meaning that (given feudal economies), they probably hold personal fief (i.e. have no other vassals between them) over at least 100,000 peasants. And then you throw their bannermen into the mix...Much like real-life France (which they're sort of an expy for) the Reach has twice the numbers as the next largest kingdom, but they've also got twice as many hostile borders, facing the Westerlands, the Stormlands, Dorne, and a close ocean border with the Iron Islands (most other kingdoms only border two other major ones, i.e. the Stormlands border the Reach and Dorne) so the advantage evens out. Moreover, they don't have many major defensive boundaries with their neighbors: the mountains of the Westerlands, and the Red Mountains of Dorne, are a barrier to invasion by the Reach but not the other way around. The Mander River runs east-west instead of north-south, so it does not present a strong defense against invasion from the Stormlands.
* themselves compared to the more humanly-proportioned Jagers like Dimo, Maxim, and Oggie.
* themselves don't exist (they do), or just saying the idea of them crawling into a human's bodily orifice is a myth (which it is).
* THEMSELVES fans, they tend to sound a little bit like Meng Huo, especially when flustered.
* themselves for the ending to "Thor's Chariot," where they only seemed mildly intrigued by the sight of a ship the size of a city appearing and eliminating a Goa'uld army in seconds. In behind-the-scenes interviews, they explained that none of them appreciated just how impressive (or big) the ship would look in the finished episode, so they did not think to put more awe or fear into their expressions.
* themselves. He acknowledged this in his Author's Notes as a family quirk.
* themselves if they inspire widespread revulsion and their practitioners are doing horrible things.
* themselves in order to be rescued by a Raptor when escaping from a faulty airlock.
* themselves in order to draw attention to important information, such as holding a channel for priority traffic or informing a first responder of scene safety information.
* themselves once included a passing mention of a lightsabre that could suddenly double the length of the blade at the flick of a switch, which has similar problems, on top of which tended to lose power at inopportune moments.
* themselves, resulting in a charming scene where he made Grunchlk bite off two of his own fingers.
* themselves subcontract the job to the NRA. Nike later contracts the NRA to eliminate the Police manager who handled the original subcontract.
* themselves, the dancing equivalent of looking in the mirror and saying "Damn, you're looking good today!".
* themselves the most advanced Orokin technology, they were easily able to subvert these weapons, forcing the Orokin to rely on low-tech weapons. It says something about how advanced the Orokin were that they didn't see much difference in the technology level of a bow and a gun. The Orokin eventually created the warframes and the Tenno to wield these weapons, so even after the Old War the Tenno still mostly use low-tech. The primary exceptions are repurposed Corpus mining lasers.
* themselves. They always fall apart or explode if they work themselves too much.
* themselves villains - or at least see themselves as such due to rejection by society and/or a guilt complex. Usually only happens in fictional examples, though.
* themselves when attacking it. It has advanced to the late stages of tournaments in spite of always being the underdog due to its lack of offense.
* Them's Fighting Herds fangame, but later became its own thing for commercial release. In this case, it switched over before getting a C&D.
* Them's Fightin' Herds after she effortlessly defeated him in a duel. Beforehand, he disdained her as weak and scrawny.
* Them's Fightin' Herds and damages them in an explosion of dark magic.
* Them's Fightin' Herds, and their game will be released commercially.

* Them's Fightin' Herds are horse/dragon hybrids. Tianhuo looks like a scaley horse with a firey mane.
* Them's Fightin' Herds, Arizona (a young calf) tells an NPC reindeer where milk actually comes from. After she does, the deer goes into a state of shock.
* Them's Fightin' Herds fighting game" is a thing that exists in all seriousness than for any of the game's actual merits.
* Them's Fightin' Herds for their descriptions or the items themselves.
* Them's Fightin' Herds has the “Unicornomicon”, a cursed and forbidden book which contains a variety of dark magic spells as well as a demonic entity known as FHTNG.
* Them's Fightin' Herds in the fandom's eyes, and its great tutorial and casual features such as the Pixel Lobbies helped ease fighting game newbies into the experience.
* Them's Fightin' Herds, is very bouncy and hyper, and is almost always laughing or giggling. But it's ramped up to the point where most of the cast see her as a lunatic, her own clan see her as some kind of monster, and she isn't even capable of properly speaking.
* Them's Fightin' Herds it into an original game about several different kinds of quadrupedal animals.
* Them's Fightin' Herds It's the final opponent in every character's arcade mode and, out of all the mook Predators, is the toughest of them to fight.
* Them's Fightin' Herds long ago. Though smaller non-sapient predators that are treated like regular animals are not treated as a threat and were not locked away, as well as the ones with instincts to protect ungulates rather than eat them such as dogs or the longma race.
* Them's Fightin' Herds: Pom the sheep doesn't really want to fight, so her companion dogs do most of the fighting against her will. One of her victory poses has her scolding them.
* Them's Fightin' Herds, Pom the sheep was the only Sheepkin brave enough to suggest that the Meadow enter a representative for the battle to be Key Keeper, so the rest of her kind declared her "the bravest of all" and made her become a Key Seeker.
* Them's Fightin' Herds that's used in many of her attacks to cast dark magic. Given that the book is almost as big as she is, an equal number of attacks have her just smacking them with it to roughly the same effect.
* Them's Fightin' Herds, Tianhuo interrupts a gang of bullies so she can hurt their victim more.
* Them's Fightin' Herds (ungulates, specifically), so this trope was inevitable.
* Them's Fightin' Herds. When less elegant combat becomes necessary, she may complain that she "chipped a hoof".
* Them's Fightin' Herds, whether made by the devs or as a backer reward.
* Them's Fightin' Herds Worth noting that even though all of the characters are sentient animals, the sheep dogs don't have the same level of intelligence.
* The M.S.G. Heavy Weapon Unit MH02 Spiral Crusher is a drill claw with a wind-up motor. It can be used as a handheld drill or a claw arm for a
* The M.S.G. Heavy Weapon Unit MH08 Sentry Gun is a Gatling gun turret with two additional small Gatling guns at the top of the main turret. The main turret itself can also be motorized with the MG01 External Generator, which is sold separately.
* The M.S.G. Heavy Weapon Unit MH09 Vortex Driver is a gigantic drill with three different types of drill bits: The Vortex Drill, which is modeled after a comical drill commonly seen in many
* The M.S.G. MW13 Chainsaw, while not motorized, is more compact than the Dynamic Chainsaw. It can also be used as
* The M.S.G Weapon Unit MW29 Hand Gatling Gun is a small portable Gatling gun that can be wielded by smaller units such as the
* them smoking cigarettes) and the episode ends with Peanut introducing his 'villain friend'.
* Them Thar Hills: Stan and Ollie go on holidays at a place where booze traffickers threw their cargo into a well. Then a couple, the Halls, arrives there. Stan and

Ollie share their water from the well with the lady while her husband goes away to search mechanical help for his car, not knowing there's alcohol in it. They get drunk, and seeing his wife being drunk with them angers Mr. Hall to the point of triggering a tit-for-tat war with Stan and Ollie.
* them. The families understood how necessary the mission was and that the children's deaths were an accident.
* them, the Football Gods glanced sharply in their direction and demanded to know what the hell they were doing up there. The Scarlet Knights lost to unranked Cincinnati the very next week, and while both WVU and Rutgers would lose again (the latter to the former in a triple-overtime heartbreaker), Louisville's close loss to Rutgers was their only loss of the season, and without it, they'd have probably faced Ohio State in the Championship Game that year.
* Them!: The giant mutant ants are all wiped out, but it's pointed out that there have been a lot more atomic tests since the one that created them...
* The MTHEL, on the other hand, has already had functional prototypes built, capable of shooting down not only missiles but artillery shells and mortar shells, feats almost no other weapon can do. Because of the precise details of how high-energy lasers work, the MTHEL wouldn't be able to kill a person easily (though it would cause serious harm) - but it can destroy small, fast-moving explosive projectiles more accurately, and less expensively per shot, than any other current weapon.
* them then introduced the concept of the "Axiom" as the ultimate creator of everything, which might or might not be the same entity as the Great Will.
* Them! to go down into the nest because the only other expert they have (her father) is physically incapable of doing so and she can't give the two male leads "a crash course in entomology".
* The MU also has the Brand Corporation, a division of a corrupt oil company that manufactures supervillains either as enforcers for
* The much-ballyhooed cameos by Princes Harry and William ended up being cut from the theatrical release of
* The much-criticized fourth series may have managed to turn the previously well-written Naomi/Emily relationship into a tumor in series 3. Evidently feeling that nothing was so interesting as overblown romantic angst borne of dishonesty and unfaithfulness (because that was working out
* The much-hyped race between Michael Johnson and Donovan Bailey in 1997. At the time, Johnson held the world record for the 200m event, and Bailey held the record for the 100m. They were to settle the question of the "World's Fastest Man" with a 150m race. At around the 100m mark, Bailey was clearly ahead, and Johnson pulled up with an injured hamstring. Cynics thought he faked the injury rather than lose to Bailey fair and square.
* The much later episode "Kill Gil: Vols. 1 & 2" featured the title Jack Lemmon figure giving Lisa her wish in his guise as Santa, getting fired over it, and spending the next year sponging off the Simpsons. After the year has passed,
* The much-loathed, in-universe and out, Joffrey Lannister is fatally poisoned at his own wedding.
* The much-loved episode, the "Pineapple Incident", has this as a premise. The comedy is stretched out as the girl Ted Mosby wakes up with isn't revealed until much later in the episode.
* The much-maligned trend of Japanese women's pro wrestling featuring former
* The much-missed beard of Jussi Wickström, and then, in May 2013, when he once again had a full head of hair, went completely clean-shaven. Someone pointed out that it's pretty much the first time in the band's history when people have been able to see his mouth. Since then he's been periodically re-growing and then shaving his beard, although he sadly still hasn't regrown his previous braided beard.
* The much older game "Aces of the Pacific" gave you a tail gunner (in the appropriate aircraft) who would give similar information. If someone got behind you, you'd hear his gun go off. Very, very rarely you would hear him say "I just shot down a fighter!"

* "The Muckrakers": Richie potentially exposes the Fonz's fear and disgust for liver. Fonzie eventually chokes down the fear and eats some.
* the Mucky Clam gets sick when he does. Roger says it was because they had an all-you-can-eat special.
* The Muddle-Headed Wombat series, an owl antagonizes the protagonists for setting a tree house in its home tree. It decides not to bother the trio anymore when the treehouse ends up underneath the tree instead.
* The Mud People also have a very different idea of what is and isn't appropriate to compliment. Kahlan is flustered when one woman compliments her breasts because, in the Mud People culture, it just means she'll make a good mother. In another book, she tactfully cautions a Mud Person looking to woo a woman from another nation to only compliment things that
* The Muggle Prime Minister isn't fond of his dealings with the magical world either, which is understandable as pretty much every visit by the Minister for Magic means that something really bad is happening.
* the muggle will win every time." This quote has never been traced, and whether muggles or wizards would win is a continuing debate.
* The Mughal dynasty had a lot of these. A prominent example is the murder of Prince Dara Shikoh, the King's oldest and favorite by Aurangazeb, a younger son.
* The Mughal Empire never recovered from Nader Shah's invasion of India in the 1730s-1740s. It culminated in the sack of Delhi which led to the Persians stealing the Peacock Throne of the Emperor and the famous Koh-I-Noor diamond (which would then pass to the Afghanis, then to the Sikh Empire of Raja Ranjitsingh, and finally to the English who keep it to this day - to much gritting of teeth). Other defeats, like the Maratha Confederacy's loss at the Third Battle of Panipat, the 1757 Battle of Plassey which the East India Company won and defeated the Nawab of Bengal endure as marks of bitterness among Indians about the failure of local rulers to effectively mount a challenge against the English.
* the Muineers and the mutineer-Mutineers the hell is going on, but they sure can see the mayhem.
* The Mule), and he can use his power to force all of it to work non-stop without any chance to rest for weeks on end.
* The Mule": Bayta and Toran are newlyweds, calling each other Bay and Torie.
* The Mule by the Greeks. English translations vary between 'pertaining to Truth' and 'pertaining to Memory'.
* The "mule" clue was used in "The Case of Molly's Mule". Sobol would later reuse this clue in an
* The Mule entries were added. Chapter 11 (first chapter of "The Mule") has an entry on the Mule, and chapter 22 has an entry on Neotrantor.
* The Mule": Haven is the system that the protagonists escape to when "Part 1" ends and the Mule conquers Terminus. It (briefly) serves as a home base against the Mule's military, but they are eventually invaded as well, and the protagonists must escape again.
* The Mule. He does this with relative ease, outsmarts Foundation's insurgents and in Part Two, starts his plan of tracking down the legendary Second Foundation, which is surrounded in myth and rumored to be able to defeat him.
* The Mule jumps without proper planning. One time their ship almost ends up inside a red giant star. They barely get clear, and after that, they spend quite some time poring over starcharts until they can pinpoint their location and calculate their path to Trantor.
* The MULE (Mobile Utility Lunar Excavator) is a worker robot which can mine minerals at a faster rate than the basic SCV (Space Construction Vehicle) worker unit, and which can be called down in a drop pod to any location not covered by the fog of war. Usually a player will call down the MULE drop directly onto a mineral patch next to a mining base, but sometimes they will drop mules to repair mechanical units in the heat of battle. There also exists a form of
* The Mule that his power means that he could make her feel joy no matter what.
* The Mule. The planet used to be one of twenty worlds that supplied Trantor with food on a daily basis. Delicass evokes the word delicacy, a type of food.

* The Mule": Toran hails from the second planet of the star system Haven, called Haven II.
* The Mule": Toran pilots his ship through the blockades set up by the Mule's ships around the planet Terminus to escape his invasion of the First Foundation, and again from Haven when he begins his search for the Second Foundation.
* The Mule. Used narrowly, it is the most horrible death possible. He can produce other emotions too, such as loyalty and confidence for his own servants.
* The Multi-Dimensional labyrinth concept described by the Anti-Spiral in
* The multipart story that composes the very end of Season 1 and start of Season 2 features rogue elements of the Maryland State Police who are acting in this capacity for
* The multiplayer features futuristic versions of shields, warhammers, and even crossbows deployed in a 22nd century
* The multiplayer map "Old Town" has chickens wandering around aimlessly. You can shoot them, kick them, and even
* The multiplayer squads, in a manner. They are ostensibly Systems Alliance units and operate under Alliance command, with most of their members being human soldiers and other military specialists, but they also include volunteers and mercenaries from a variety of other races, such as turians, asari, krogan, drell, and quarians. With the additional DLC packs, this lineup includes Cerberus defectors, batarians, geth, vorcha, volus, human-made artifical intelligences, and
* The multiple avatars of Rei/Lilith who appear to guide each individual human through the transition into Instrumentality have the ability to appear in the form of someone that individual loves. There are several shots of cast members getting a last look at/embrace from what appears to be someone they care for, right before bursting into orange Tang
* The multiple incarnations of the Generation 1 universe in the comics.
* The multiple occasions when Kyon stumbles in on Haruhi molesting/changing Mikuru into a costume. Became almost a running gag within the first six episodes.
* The "multiversal singularity" conceit, a concept going on during a period when Hasbro was attempting to focus on the Thirteen, was pretty infamous for creating these, to the point that it ended up getting erased by
* The Multiverse — The people involved have the capacity to cross over to more than one additional universe.
* The Multiverse features Luke Starkiller. This is a reference to Luke Skywalker's name being Annikin Starkiller in the original script. Apparently, Earth-19's Lucas only changed the first name of his character.
* The Multiverse Forum has roleplays that mainly take place in the multiverse. It's also called The Multiverse.
* The Multiverse has created an alternate universe version of Kate Kane's sister who is entirely innocent of her crimes, whom Batwoman now has to protect from them.
* The Multiverse is featured as a gameplay mode: presented as Batman's "Brother Eye" surveillance network monitoring dimensional anomalies created in the wake of Batman having summoned an alternate universe's heroes in
* The Multiverse: It's established that there's an endless chain of alternate realities, dimensions, and universes.
* The Multiverse: Many universes existing alongside each other. Travel between them may be possible.
* The Multiverse (or Wonder Warrior, depending on your sources), and so on.
* The Multiverse, showed her maintaining romantic relationships with several individuals (of various genders and species) simultaneously, in different dimensions.
* The Multiverse. This allows alternate versions of Kryptonians like Superman or Supergirl, to easily keep fighting if someone tries to use Kryptonite on them from a different reality.
* The Multiverse was brought back at the end of Infinite Crisis, because of the temporary return of the Infinite Earths caused there to be too much aspects to return which made it impossible for New Earth to return to its original
* The Multiverse was such a constant until Crisis that people did, in fact, care

about the people in most of the more prominent universes. In Crisis itself, the death of the original Crime Syndicate is just heartbreaking; they're supervillains, but they're still part of the world, and they fight more bravely for it than anybody else does for theirs. A few of them run headlong into a wave of antimatter by the end...
* The Multiverse, where you can still create a character and add to the ever evolving story. Every genre is represented.
* The Multiversity #256. In the context of the multiverse, Scorpion (inspired by a scorpion) is on Earth-41, Stingray (inspired by a stingray) is on Earth-34, Owl (another Bruce Wayne inspired by an owl) is on Earth-35, Shooting Star (inspired by a shooting star) is on Earth-47, and Iron Knight (inspired by a suit of medieval armor to become a literal knight) is on Earth-36. Morrison seeks to pose the question of how far the character can be stretched before they're no longer Batman.
* The Multiversity; after Captain Atom impulsively kills his dog in an effort to comprehend how it works, he then creates an exact replica, but can't bring himself to love it because he knows it's not the same dog.
* The Multiversity) all co-existing in the Sphere of the Gods. On another level, many of the Earths have heroes that are fictional in each other's worlds.
* The Multiversity. Among other things, comic book pages are called "doors" and turning a page is compared to opening a door.
* The Multiversity and new heroes have nothing to do, reducing them to vapid celebrities who waste the day away with hedonism and simulations of old battles.
* The Multiversity, a number of characters unknowingly further The Gentry's invasion.
* The Multiversity becomes this after his disastrous trip to Earth-7. The Earths that break his rules, well, the lucky ones are merely destroyed. Never mind how involved the Gentry were in the violation of those rules.
* The Multiversity Demogorgun of the Gentry is one of these, a large mass of corpses that move and act as one.
* The Multiversity, Dr. Sivana attempts to add a new calendar day called "Sivanaday", but it only lasts eight hours.
* The Multiversity for Earths 4, 5, 6, 8, 10, 16, 17, 18, 19, 26, 32, 33, 40, 43, and 50, none of which are their original incarnations - whether that's because of a retool, renumbering from the original Pre-Crisis multiverse, or replacing a different universe with the same number.
* The Multiversity Guidebook #1, Earth-44's Doc Tornado looks suspiciously similar to Grant Morrison.
* The Multiversity has the Endless, the New Gods, the polytheistic pantheons and the Abrahamic Heaven and Hell all co-existing in the Sphere of the Gods.
* The Multiversity. However, unlike those realms, they do not seem to be opposing each other in an "eternal war" sort of sense, with the text describing Nightmare as simply the flip side of the Dream King's realm.
* The Multiversity is part of Nightmare. The Area, surprisingly, doesn't get mentioned, but is probably part of Nightmare as well.
* The Multiversity, Nix Uotan is assisted by Mr. Stubbs, a buccaneer monkey.
* The Multiversity: The Empty Hand, the sinister entity that led the Gentry to the invasion of the DC Multiverse. Currently, it's just decided to wait. Probably qualifies as THE Greatest Scope Villain in DC.
* The Multiversity, the Gentry use the power of the Anti-Death Equation to keep Nix Uotan alive so they can corrupt him, a likely allusion to companies refusing to let go of concepts they can squeeze profit out of.
* The Multiversity, the heroes of Earth-42 are revealed to be androids, explaining how they are incapable of being killed.
* The Multiversity-themed depraved serial murderer Sivana in a bite-mask who even gives Thunderworld!Sivana the creeps, and a respectable scientist who's horrified to realise the others are all criminals.
* The Multiversity, there's an alternate universe where that Earth's Green Lantern and Flash analogues are lovers.
* The Multiversity thinks the Legion of Sivanas are there to help him conquer his

Earth. Instead the snake, vampire and torture porn versions attack him and eat him.
* The Mummy (1932), after Ralph Norton sees the eponymous creature rise from its tomb and walk off, he is found giggling insanely and gibbering "he went for a little walk!"
* The Mummy (1932): Explorers find the remains of a High Priest named Imhotep who was buried alive in the desert. His casket contains a warning that death will meet anyone who opens the casket. This is ignored by the explorers and the Priest is brought back to life when one of the explorers reads the "Scroll of Life" which causes the rising of Imhotep. Imhotep then proceeds to try to revive a dead lover (which was why he was buried alive as it was sacrilege), killing anyone who gets in his way.
* The Mummy (1932) movies, however, and this inconsistent tone — is it a horror movie or a Marvel-esque adventure movie? — is generally cited as one of the big reasons it flopped with audiences and critics alike.
* The Mummy (1932): The mummy's shambling corpse causes insanity in Whemple's assistant when he catches a glimpse of it.
* The Mummy (1932): When Frank is telling Helen how he unwrapped Princess Anck-es-en-Amon's most personal possessions, she cringes, exclaiming "How could you?" "Had to! Science, you know," Frank breezily replies.
* The Mummy (1959): Similar to the 1932 version except that an Egyptian warns the explorers to not enter the tomb at all and the Mummy (named Kharis in this version) is specifically focused on killing the people who entered his dead lover's tomb.
* The Mummy (1999), after Beni betrays Rick and Eve to Imhotep, Rick angrily shouts, "You'll get yours, Beni!" Beni answers, "Oh, like I've never heard that one before!"
* The Mummy (1999).) Although, in a subversion, the acid here burns the extras rather than dissolving their skin.
* The Mummy (1999), and meets his end inside. The heroes, on the other hand, leave using Beni's camels, unaware that they are loaded with treasure (until the second film, where they have clearly put that money to good use).
* The Mummy (1999) and that wasn't the only time they had trouble with the camels, which are generally notorious for being hard to work with.
* The Mummy (1999), as Evey tries to barter for Rick O'Connell's life with the chief warden, using shares of (at that point still not discovered) the treasures of Hamunaptra as an incentive. Caught in the heat of the moment, the chief warden ends up asking less than what Evey was offering.
* The Mummy (1999), Beni Gabor is eaten alive by scarab beetles, which swarm over and inside of him. An earlier foreshadowing of this happened when some of the diggers were running from the scarabs, one tripped and was instantly swarmed and devoured alive.
* The Mummy (1999), Benni is trapped in the treasure room as the room is sealed off underground. Flesh-eating scarabs come out as the light is cut-off, leaving only his one torch. As it dies, so does he.
* The Mummy (1999) changed his mind and spared him because he thought the character was too heroic to be killed off.
* The Mummy (1999): Despite warnings from a band of Medjay, a group of explorers find the remains of Imhotep. When his book of the dead is read by one of them, Imhotep comes back to life and kills members of the expedition to regain his strength and eventually revive his deceased lover.
* The Mummy (1999), director Stephen Sommers acknowledges the appeal of this trope, saying "villagers with torches, it's hard to beat."
* The Mummy (1999), Evelyn kisses Imhotep so that his spell will stop working and the plane Rick O'Connell is in can land.
* The Mummy (1999) has a number of these, most notably when Evie, inebriated, leans forwards to kiss Rick, and just as they're about to kiss, she faints.
* The Mummy (1999): Imhotep in his incomplete form is immediately chased away when a cat is in his presence, because they guard the Underworld. Naturally, the heroes never do anything to exploit this weakness, such as by putting cats in the room full of the people he needs to kill to stop being vulnerable to cats.

* The Mummy (1999): Imhotep is probably one of the pickiest people eaters around. He takes body parts only from the people who have already stolen his.
* The Mummy (1999), Imhotep seeks to sacrifice Evey in order to bring back the woman he loved, Anck-Su-Namun.
* The Mummy (1999). Imhotep was just going to kill him, but decided he could be useful after hearing him speak Hebrew ("the language of the slaves"). Beni is easily tempted when Imhotep promises rich rewards while offering him a handful of gold jewelry.
* The Mummy (1999) is implied to be American and there is no question, he is a good Eaglelander.
* The Mummy (1999): Jonathan drops the Book of the Dead when an angry Imhotep turns on him.
* The Mummy (1999). Jonathan even lampshades this when recruiting an admittedly death-seeking Winston: "Well, everyone else we've bumped into has died, why not you?"
* The Mummy (1999) mummy mooks. The original films were much more horror oriented, with a lot of emphasis on the realization that the mummy was moving.
* The Mummy (1999): Rick O'Connell and his buddy Beni start off as Legionnaires before the Medji either kill off most of the platoon or chase them back into the desert.
* The Mummy (1999), Rick's French Foreign Legion don't back down in the face of the Medjai army, and their first several volleys take down several waves of horsemen, but the moment the Medjai start returning fire, the difference in firepower is obvious. The moment they jump the barricades, the battle is all but lost. But even as the rest of legionnaires are getting slaughtered, Rick still takes out several enemies before he's forced to flee.
* The Mummy (1999), Rick's platoon is holding a defensive position against Medjii when their commander panics and flees to a nearby temple. Benni turns to Rick and notes, "Looks like you just got promoted." Benni joins the commander shortly after.
* The Mummy (1999) (Stephen Sommers version): "You must not read from the book!" Too late...
* The Mummy (1999) subverts the trope. He goes to battle a horde of skeletal warriors in order to allow Rick and Evy to escape...and emerges unscathed! The director changed the character's fate so he could appear in the sequel.
* The Mummy (1999), the first levels include tomb raiders as enemies, who will try to murder Rick with pickaxes, presumably so they can eliminate a witness to their thievery.
* The Mummy (1999), the scarab horde reduces one of the workers to a skeleton in a matter of seconds, hardly slowing down while chasing the heroes.
* The Mummy (1999): To save his own skin, Beni agrees to work for Imhotep. In a scene where Beni is acting as translator, Evie tries to show how much "better" she is with languages than he by "correcting" his translation... with a synonym.
* The Mummy (1999) was dubbed in Hungarian twice. The first dub was made by Balog Mix Studio in 1999. The second dub was made by Active Kommunikációs in 2004.
* The Mummy (1999), when Rick O'Connell meets Imohtep for the first time in mummy form, and he lets out his monstrous roar, Rick yells right back in his face and then shoots him.
* The Mummy (1999), when the executioner about to hang Rick O'Connell asks him what's his last wish, the answer is to remove the rope and let him go. All this earns Rick is a dope slap.
* The Mummy (1999). When the heroes are crossing the desert, they ride on through the night, some of them sleeping while still riding their camels. Mr. Hassan, the warden from the jail Rick O'Connel was imprisoned in, is snoring loudly, which disturbs one of his companions, who smacks him with their riding crop, causing him to snort awake, with the cry of, "No more goat soup!"
* The Mummy (1999). When we first meet him in 1926, he does things like hop into a sarcophagus and muse out loud that he'd rather like to join the dead. When Rick is faced with an awful situation, he says "I've had worse [odds]", and Jonathan adds

"Yes, me too." His age, improbable aiming skills, and ability to think quickly on his feet even though he gets scared of firefights are all part of the reason he is able to survive. He's also the exact age to have fought in World War I, though this is never addressed in-story.
* The Mummy (2017) has Ahmanet, who's very pretty...once she devours enough lifeforce, that is.
* The Mummy (2017) instead of once revived) while being as articulate and intimidating as the 1932 one.
* The Mummy (2017) is shown to be a skilled combatant, even before she became an undead mystical creature, managing to win a sparring match back in Ancient Egypt against a larger opponent.
* The Mummy (2017): Nick is resurrected by Ahmanet as part of her plans, but she also appears to have a more personal interest in him if her leaning in close to Nick longingly on more than one occasion is any indication.
* The Mummy (2017): The mummy this time is a Princess who tried to summon Set but was caught and then buried alive. After her tomb is discovered and her remains are removed, she starts cursing the people transporting her and begins feeding on people to regain strength.
* The Mummy (2017): When the tomb of the titular character is discovered, Nick and Chris are sent in to check it with Jenny accompanying them for a historian's perspective. As they enter the burial chamber Jenny begins recording her observations, including what seems to be wrong with a lot of them: the guardian statues are facing inward rather than outward, there are no provisions for the journey to the afterlife, there are channels for liquid mercury to guard against evil spirits. After a few of these she stops, and says that this room layout wasn't designed to keep something safe. It was designed to keep something trapped.
* The Mummy: After regaining his full power, Imhotep has the heroes completely surrounded by his mooks. He orders the mooks to kill the heroes and then... turns around and leaves. There was absolutely no reason why he wouldn't kill them himself or at least stayed for a few more minutes and made sure they were dead. Obviously the heroes immediately escape through a convenient manhole.
* The Mummy again has a mummy that is African but not Egyptian, with Princess Ahmahnet played by an Algerian, Sofia Boutella.
* The Mummy, an attempt to set a determined Medjai on fire has seemingly no effect. Said Medjai, robes aflame, appears almost blissfully unaware of the fact as he tries to take the key artifact from Jonathan.
* The Mummy as it was the standard hairdo for Egyptian priests. Also, many, many Egyptian villains.
* The Mummy becoming a solo movie much more geared to their normal horror fans.
* The Mummy Demastered, but they could have at the very least given it its own unique backdrops.
* The Mummy, destroying a library and an ancient temple, respectively. Alex takes after his mother in that aspect.
* The Mummy) escape the rapidly collapsing pyramid, they are forced to leave Rick's traitorous friend Beni behind, and the pyramid seals itself behind them. Beni retreats back into a massive room filled with treasure, with the only light source being his illuminated torch. Thousands of (flesh-consuming) scarabs stream into the room around him, and the light slowly goes out on the torch as they get closer, and... you know the rest.
* The Mummy" films about classic Universal monsters like the Bride of Frankenstein, the Invisible Man, and Frankenstein's monster.
* The Mummy from 1999 had mummified priests tearing out the tongues of some unlucky excavators.
* The Mummy. Imhotep also cuts someone else's tongue and keeps it for himself after he resurrects.
* The Mummy (Imhotep). Given that Vosloo speaks no English during the film itself, hearing his natural voice and accent is interesting in its own right.
* The Mummy, Imhotep has god-like powers and is able to recreate the ten plagues, even though in the Biblical account of the Exodus story the Egyptian gods could

only replicate the first two. The group of warriors who fight him, and whose ancestors gave him his power, are Muslims.
* The Mummy Imhotep is stripped of his powers after Evelyn reads from the Book of Amun-Ra turning him into a mortal man.
* The Mummy is attacked by pygmy mummies behind a caved-in ceiling; the sudden silence leads Jonathan to believe he died. He doesn't, and turns up alive a few chapters later.
* the mummy is in fact a complicated alarm clock system designed to waken the actual.
* The Mummy is sealed as his torch burns out, leaving him at the mercy of the flesh eating scarab beetles surrounding him.
* The Mummy, it gives the heroine time to bribe the warden, who has him cut down.
* The Mummy, it literally starts raining fire from above as the Mummy gains power, setting people in the streets on fire and destroying a minaret.
* The Mummy, it was common for the American characters to dual wield revolvers. However, this was only used in situations where there were an overwhelming number of enemies, negating the need for accuracy. When facing several riders bearing down on him, in fact, Rick O'Connell (the main character, played by Brendan Fraser) empties two revolvers at them...then drops them and draws two more. However, he never fires simultaneously (another possible advantage being that he can more easily cover a wider angle).
* The Mummy, Jonathan tries to blend in with the crowd of mind-controlled minions by walking in lockstep with them and chanting "Imhotep! Imhotep!" unconvincingly. It not only works, but even calms down their possessed rage somewhat.
* The Mummy — 6 black-and-white films between 1932 and 1955, the final one being a comedy. Followed by a remake in 1999 with two sequels.
* The Mummy Monster Game going on to win. This costs him, as Josh evades the attack and pulls off an unexpected tactic to continue the race and make it across the finish line.
* The Mummy Monster Game: In book 1, after losing the chariot race for the second arm of Osiris, the pharaoh Rameses throws his crown on the ground and stomps on it.
* The Mummy Monster Game: In book 1, during the challenge for the final piece of Osiris's mummy, the player must defeat the third and last monster — the front legs and torso of an enormous lion, bigger than the Sphinx — by shooting an arrow at the dappled stain on its chest.
* The Mummy Monster Game: In book 1, during the challenge for the second arm of Osiris, the pharaoh Rameses is equipped with a spear as one of his three weapons. Later, during the final challenge, the player is given one as one of their three weapons for use against the three pieces of the monster Ammit.
* The Mummy Monster Game: In book 1, during the quest for the body of Osiris, the characters encounter scorpions whose stinging tails can kill a character in one move unless they're jumped over. Josh later runs into them in the real life area when he goes to rescue Amy, Harry and Spy, but uses his skateboard to evade them.
* The Mummy Monster Game: In book 1, the crocodile-headed mummy monster that serves as the game's first antagonist and the real-life segment's main antagonist is chasing Josh, Amy, Harry and Spy, swinging over a bottomless pit, when the rope breaks and it falls to its death with a scream.
* The Mummy Monster Game: In Book 1, the game starts off in one, the tomb of Osiris, and the players later enter another where Osiris's head is being kept.
* The Mummy Monster Game: In book 1, the second arm of Osiris is won by completing a three-lap chariot race against the pharaoh Rameses, who is equipped with weapons (a bow and arrow, a spear and a sword) to ensure his victory. Fortunately, Josh is able to outrace him, and with Harry's advice, wins through a tactic Rameses didn't expect — ride to the finish on horseback, which the ancient Egyptians never would have done.
* The Mummy Monster Game: In book 1, this is used as the answer to the challenge for the first arm of Osiris — identifying the murder weapon that killed a young princess. By poisoning the victim's eyeliner and then spilling it, the killer ensured the victim would lick their finger to wet the dried eyeliner, then lick it

a second time to make it usable again, thus being poisoned by it.
* The Mummy Monster Game: Literally, in book 2; some of the riddles that must be solved in "The Mummy Tomb Hunt" game turn out to be red herrings towards the final game location, which is represented by a red fish appearing on the screen and blowing bubbles after the clue is solved. They can still provide extra clues for solving them though.
* The Mummy Monster Game: Naturally. The best example in book 1 is the crocodile-headed mummy monster, who chases after the characters when they seek the exit from the first chamber into the rest of the pyramid and later guards Harry, Amy and Spy's cell when Josh has to rescue them.
* The Mummy Monster Game six times (not counting the time he watches it with his cousins in the book). His Egyptologist mother has apparently also watched it many times and thinks it's funny.
* The Mummy Monster Game: The trilogy features computer or video games that do this in all three books.
* The Mummy Monster Game: Three kids play computer/video games set in Egypt, revolving around beating challenges while outwitting ancient Egyptian monsters.
* The Mummy, or Ramses the Damned, in which Ramses the Great and Cleopatra have both been made immortal.
* The Mummy Returns: Alex complains to the guard that he can't use the bathroom while he's being watched. Conveniently, this gets the guard to turn his back long enough for Alex to realize that the toilet opens directly onto the tracks; he pushes it aside and makes his escape.
* The Mummy Returns, Alex does this by kicking out the toilet, pulling the emergency break on the train he's on and making a run for it.
* The Mummy Returns, Alex leaves behind part of his clothing and a sandcastle of an ancient structure where they are heading to help the heroes tail them. Lock-nah eventually catches him doing this.
* The Mummy Returns are ambushed and killed by pygmy zombies in waist-high plant life.
* The Mummy Returns: Done intentionally by Alex to annoy the kidnappers.
* The Mummy Returns, Evie and Jonathan stay on the high ground to provide cover fire while Rick and Alex try to get past the bad guys. When Evie tells her brother, the quintessential screw-up, "Jonathan, that's my husband and son, make me proud." He responds, "Today's the day," with an impressive gun-cock.
* The Mummy Returns had three: the opening army led by the Scorpion King, the Army of Anubis, and the Medjai.
* The Mummy Returns has a strange example. The film itself takes place in 1922, but the eccentric Izzy, the pilot whom Rick hires to transport his group to Egypt, turns out to be piloting a large dirigible, claiming that "airplanes are a thing in the past" much to Rick's dismay.
* The Mummy Returns has a villainous example with Meela Nais and Imhotep. She's the reincarnation of Anck-su-namun, who was Imhotep's lover when he was mortal, and he's a {{mummy}. Note that Imhotep becomes fully human much sooner than most examples of this trope.
* The Mummy Returns, Imhotep (again resurrected) loses his powers when entering the pyramid in Am Sher, as Anubis wants him to fight the Scorpion King as a mortal.
* The Mummy Returns, Imhotep can control the waters of the Nile, causing it to flood at will, which is useful for him as the Nile is the fastest way for the protagonists to seek their destination. Controlling the Nile flood was a power actually attributed to the Pharaohs (which Imhotep never was).
* The Mummy Returns is revolting, the moreso as whomever used it before Alex hadn't bothered to flush.
* The Mummy Returns is set thousands of years in the past and features the character's rise to power.
* The Mummy Returns — the Spear of Osiris. Which is the only thing that can kill the Scorpion King. He instructs Jonathan on how to open it, and it turns out that Jonathan is quite the javelin thrower. Rick's follow up makes sure the Scorpion King is shut down.

* The Mummy Returns, only to the realize that the REAL army is swarming over the dunes like a monstrous black shadow.
* The Mummy Returns Princess Nefertiri/Evy and Anck Su Namun fight with dual sai type daggers.
* The Mummy Returns replaced his airplane offscreen with a literal airship (as in it was small boat held in the air by a gasoline powered balloon envelope) he makes a remark that airplanes are now a thing of the past when showing it. The Film is set in 1933, just 4 years before the Hindenburg brought the end to airships as a form of passenger travel.
* The Mummy Returns, Rick and Jonathan jump out a window, and land unharmed on the awning beneath.
* The Mummy Returns Rick and Jonathan jump through a window, land on an awning, roll off that awning onto another one, and finally jump to the ground.
* The Mummy Returns's CGI-animated appearance as The Scorpion King — which in turn opened the door for one of those prequels mentioned in the main text.
* The Mummy Returns shared between Ardeth Bay and Rick O'connell as they prepare to rescue Evelyn close to the beginning of the film
* The Mummy Returns still feels the need to specify "Cairo, Egypt". Weirdly, no labels tell us that Hamunaptra, an important location in the film, is in Egypt.
* The Mummy Returns, the character Izzy is first seen wearing an eyepatch. Subverted when he openly admits that he wears it to look good; Rick pulls it off afterward.
* The Mummy Returns. The good army is just preventing the anubites from getting out into the world, they knew they couldn't win on their own.
* The Mummy Returns, the only way to kill an Anubis Warrior is by taking off its head.
* The Mummy Returns, the Scorpion King is cursed to serve the god Anubis for eternity. And as part of this curse, he becomes a humanoid scorpion, only killable by a certain weapon, and 5000 years later is set to revive and conquer the world unless stopped.
* The Mummy Returns, they continue on anyways to their horrible demise.
* The Mummy Returns. We see lots of this trope in flashback, and toward the climax it's also done with the Medjai versus the army of Anubis. Partially justified, since Anubis warriors are dog-headed monstrosities and possibly not smart enough to use strategy.
* The Mummy Returns, whenever Evelyn and Rick kiss, they'll get a disgusted look and the "Find yourself a room" comments from their son and/or Evelyn's brother Jonathan.
* The Mummy Returns when he breaks the keys to Rick's car, whilst in the ignition. A double-decker bus was simply the nearest available vehicle. How convenient!
* The Mummy Returns: When Imhotep and Rick are fighting, the two lock blades as they watch the Scorpion King arrive.
* The Mummy Returns, where she duels Anuk-sa-Namun. The point seems to have been that the winner would guard the pharaoh, and the loser would guard the bracelet.
* The Mummy Returns which leans more towards the negative direction but appears to have its defenders. At least if stuff like the 5.2/10 rating on IMDB is something to go by.
* The Mummy Returns, while fleeing Imhotep's mummified soldiers, Evie tries blocking the entrance with a nearby chair. Rick, however, having learned a thing or two in the previous film pulls his wife along reminding her that "these guys don't use doors." Sure enough, a few seconds later, the mummies are busting through the wall above the door.
* The Mummy, Rick O'Connell shoots a flesh-eating scarab. The gunshot alerts the titular mummy, but also Evelyn, who (correctly) surmises that her allies have survived the earlier plane crash and says "O'Connell" with a smile.
* The Mummy's Hand (1940), in which the mummy's eyes are completely black - an effect achieved by laboriously painting over the film in post-production.
* The Mummy's Hand. He'd be a terrifying villain if he was capable of moving at any pace other than a slow walk.

* The Mummy. She also tries to seduce the hero by sending him visions in which she appears as her once-human self.
* The Mummy, so the titular Mummy is intelligent and speaks (pretending to be a 20th century Egyptian), doesn't stay in wrappings after he wakes up, doesn't shamble, and generally acts like an ancient sorcerer rather than a creature.
* The Mummy Spray commercial from Gloopy, in the "Haunted Battletram!" episode
* The Mummy's Revenge: The game revolves around finding the pieces of a mummy, each of which turns up in the real world as they're found. Scarab beetles, scorpions and mummy monsters turn up as well.
* The Mummy's Shroud, takes another look with eyes widened in horror, and runs away screaming.
* The Mummy's Tomb: The game revolves around solving clues that will ultimately lead to a real tomb.
* The Mummy's Trap: The game revolves around solving clues in order to rescue a female archaeologist. In both of the latter books, the action in the game is reflected in the real world.
* The Mummy takes it further by burying him alive with flesh-eating scarabs.
* The Mummy) tells his friend to bring him "a glass of bourbon. And a shot of bourbon. And a bourbon chaser!"
* The Mummy: The Animated Series Alex's friend Yanit turns out to be a girl. Her family have been Medjai for thousands of years, and she didn't feel like breaking the tradition just because she didn't have a brother.
* The Mummy: The Animated Series is an underrated example; she can fly a plane like a pro, amongst other things.
* The Mummy: The Animated Series to capitalize on the success of the second film.
* The Mummy, there's a You! Exclamation when Rick and Evy go to the library to find out what to do about Imhotep and find Ardeth Bey there.
* The Mummy: Tomb of the Dragon Emperor film, we learn that Evie has done just this, publishing the books as fiction.
* The Mummy: Tomb of the Dragon Emperor has this happening to Jonathon after lighting a giant firework they were trying to shoot the mummy of the day with.
* The Mummy: Tomb of the Dragon Emperor in the first two movies whose sealing of Imhotep gives him powers and immortality despite being perfectly capable of killing him normally.
* The Mummy: Tomb of the Dragon Emperor, ripping his own terra-cotta face off like a death mask and hurling it at the heroes. His curse immediately rebuilds his ceramic features.
* The Mummy: Tomb of the Dragon Emperor. Something for everyone, really.
* The Mummy: Tomb of the Dragon Emperor. The final battle is between the Emperor's army of terracotta soldiers, a smaller army of skeletons that's brought out from under the Great Wall of China, a pair of warplanes, and a group of yetis.
* The Mummy: Tomb of the Dragon Emperor. The sorceress Zi Yuan does help the heroes, though.
* The Mummy: Tomb of the Dragon Emperor would adopt the now iconic AK to use as their standard-issue rifle which would become the most widely produced firearm peroid.
* The Mummy Trilogy: Imhotep tends to throw sandstorms at his enemies.
* The Mummy Trilogy is shown to have taken up this habit, with Rick preferring the pre-war classics and the son favouring more advanced WWII-period weaponry.
* The Mummy Trilogy Jonathan occasionally uses a platonic version to comfort his sister and nephew.
* The Mummy Trilogy series it has featured: Egyptian deities and its servants, pygmies, Chinese sorcerers, yetis, Akkadian dark lords, Sumerian deities, the minotaur, undead warriors, Mesopotamian ninjas, dragons and golems.
* The Mummy Trilogy series (which is a spin-off from the second movie), we can include Summerian mythology with the existence of an underworld guarded by the goddess Astarte, who has empowered her own champions to enforce her will and can be summoned using the Book of the Dead.
* The Mummy Trilogy, she knows how to use katanas and sais, and aim guns with

deadly accuracy thanks to living with an ex-legionaire for ten years and starting to remember her previous life as an Egyptian princess.
* The Mummy Trilogy: The Medjai order have tattoos that denote their being part of the order and where they stand in it.
* The Mummy Trilogy thrown in for good measure (that is, even if you weren't so evil to begin with, becoming able to rain down the ten plagues of Egypt is a sure sign of villainy). In a rather brutal twist, it turns out that all of Imhotep's actions were in vain. He finds out in the last moments of his life that Anck-Su-Namun doesn't love him as much as she loves her own life, and she certainly doesn't love him as much as Eve loves Rick.
* The Mummy Trilogy until his unit was wiped out, only adds to his rogue status.
* The Mummy Trilogy were mortal men once, but they were both cursed to come back as immortal and powerful monsters.
* The Mummy Trilogy, where a trap causes the temple to collapse, and in trying to escape the treacherous Beni makes an impressive just-in-time slide under the crushing ceiling... only to end up trapped in a room with thousands of man-eating scarabs.
* The Mummy When Imhotep takes Evy: Rick pulls his gun out and is barely restrained by Ardeth. The true tearjerker is the loving looks Evy gives Rick throughout the whole scene.
* The Mummy, where Imhotep's romance with Anakh-Su-Namun leads him to smear her body paint.
* The Mummy works like the vampire by spreading their "curse" to players they date, except they
* The munavri survived the shattering of Azlant itself and found themselves trapped in the Sightless Sea, a vast ocean deep
* The Munchkin Player's Guide gives you a + 1 bonus to strength if you're bald, since your body isn't wasting energy on hair. To be fair, it gives bonuses on every other hair choice as well, with about the same level of justification. (Long hair gives a bonus to strength too, since "it worked for Samson.")
* The Munchkin's Guide to Power Gaming one that is pulled off with no evidence or witnesses, which you can live the rest of your life off the proceeds of, but rather "one which involves plenty of gun battles, hopefully a car chase, and some hostage-taking. One that provides enough money to get more and better guns for the next job and to pay off the extravagant drug habit they've taken among their flaws. Their perfect crime has no witnesses because they've killed them all."
* The Munchkin's Guide to Power Gaming's list of roleplaying terms defines RPG as "Rocket-Propelled Grenade".
* The Munchkin's Guide to Power Gaming's suggestions for dealing with a dragon is pretending that you're the IRS come to audit its hoard. "Even dragons don't mess with the IRS. It's suicide."
* The Mundus Magicus arc introduced a straighter variant in the form of the former
* The Municipalists: He's a stuffy, by-the-book human bureaucrat. His partner's an untested, day-drinking AI with a rebellious streak. They investigate acts of terrorism!
* The Municipality, the King's private police force, which is The Poopsmith in riot gear.
* The MUniverse contains multiple religions, each with its own distinct (and in some cases conflicting) mythology/theology, all of which are apparently real. So it's fairly easy to see how people might get confused. To quote the author:
* The Munsters: Adventures of a working class suburban family who happen to be a Frankenstein's monster, his vampire wife and father-in-law, werewolf son, and normal-looking teenage daughter.
* The Munsters, all similar in looks (albeit not in behavior) to the classic Universal Monsters.
* The Munsters, already very tall (6'5") Fred Gwynne wore platform boots to appear superhumanly tall as Herman Munster.
* The Munsters also looks like this and would probably get along very well with Morticia if they met.

* The Munsters) and Lily forgets where she buried Grandpa. When they start to pack up, she gives Eddie a long barbecue fork and tells him to poke around in the sand until he finds Grandpa.
* The Munsters and other horror tropes, but is shown in many episodes making different kinds of spells and sorcery the success of which will depend on the comedy needs of the episode.
* The Munsters are much the same as the Addams family, though they were actual monsters rather than morbid people. They even pitied their extremely attractive relative for being "ugly".
* The Munsters as the mom, and their three adopted children: A human, a bogeyman, and another Johrlac.
* The Munsters "Dragula" is named after Grandpa Munster's coffin dragster), it's still a long way away from his usual style.
* The Munsters during gameplay and then shooting the scoop twice. It involves collecting every member of the family by shooting designated areas, awarding a bonus upon completion.
* The Munsters exceptionally lucrative, with strategic playing potentially resulting in final scores exceeding a billion points. This is on a game where - disregarding Munster Madness - 200 million or so is considered an excellent score.
* The Munsters, Grandpa gets the formula for the potion wrong, turning Eddie into a pompous jazz musician, which Herman's boss hates, resulting in him getting fired.
* The Munsters: Grandpa Munster had a transistorized one with multiple settings.
* The Munsters: Grandpa, who is Lily's father, is actually named Vladimir "Sam" Dracula. There is no character named "Grandpa Munster", this would refer to Herman's (never seen) adoptive father.
* The Munsters had an episode in which Herman and Grandpa manage to misinterpret Lily working on a birthday surprise for Herman and Marilyn planning to babysit a child as Lily being pregnant and holding out on them.
* The Munsters had Grampa and Herman split the house down the middle after an argument about who actually owned the place heats up. This includes a painted white line (with some effort being put toward an actual stone wall), and the vindictive act of cutting in half any item halfway across both sides. The whole thing is put to rest when Lily uses some awkward food placement at the dinner table to get them to rethink the logistics of the layout.
* The Munsters had two movies with the original cast (except Pat Priest),
* The Munsters has the look of a beautiful human woman in a family of monsters. The running gag in the series is that her boyfriends don't know that and get scared when they meet the family and that her family thinks she's ugly. Nevertheless Marilyn looks human but is probably a vampire as she's the biological granddaughter of Grandpa and the daughter of Lily's twin sister and is shown to have some of the vampiric behaviors of her kin.
* The Munsters has two of these on the Pro version and three for the higher-tier editions:
* The Munsters", Herman resorts to wearing a corset to fit into his old Army uniform after failing on his diet.
* The Munsters indicates different levels of scoring with different colored inserts — they start at white, then go to blue and top out at red.
* The Munsters-inspired episode had her mouth sewn shut with knitting yarn.
* The Munsters is a comedic version of this, with the Frankenstein monster, vampires, and a werewolf all in the same family.
* The Munsters is half-vampire as he is the son of a vampiress mother and a non-vampire technically "human" father (well, made of human parts). Curiously, though, he is a werewolf.
* The Munsters, it was mentioned that the family's pet dragon Spot drunk all the water in a neighbor's pool, leaving it empty when he went to take his morning dip.
* The Munsters lasted two seasons and 70 episodes. Thanks to viewer demand prompted by a rapidly expanding syndication market in the mid-1960s, it managed to become an American pop culture icon.
* The Munsters, Marilyn was originally portrayed by Beverly Owen. She left the show

after less than three months, however, and thereafter Pat Priest took over the role.
* The Munsters, Marylyn is the only family member to look like a normal person. Especially since she's the only one to have blond hair while the rest of her family has black hair.
* The Munsters named Zombo, who, to Eddie's disappointment, isn't a blood-thirsty ghoul outside of his television show.
* The Munsters, naturally. He's based on the Bela Lugosi depiction of Dracula, albeit looking older, as he is supposed to be a grandfather.
* The Munsters opened with a close up on Herman Munster monologuing to himself about how nobody would ever suspect he was the killer, ending with the phrase "continued next issue", revealing that he was reading a magazine specializing in crime stories.
* The Munsters' pet dragon Spot. Usually, the only thing shown were his glowing eyes and teeth seen under the staircase. When he gets loose in one episode, all we see is the tip of his tail.
* The Munsters plays chimes typical of electro-mechanical pinball machines whenever the ball bounces between the bumpers.
* The Munsters stop him from acting just as bad as Herman in the fatherhood department.
* The Munsters that originally ran from 1964 to 1966 about a working class family of would-be monsters.
* The Munsters, the Munster Koach and the Dragula racer were also pretty cool.
* The Munsters Today episode "Farewell Grandpa", Grandpa is arrested for being an immigrant without a green card (since he came to America before green cards became a thing). As they try to take a photo, his image unable to be captured because he is a vampire, Grandpa does several amusing poses to mock them.
* The Munsters. Unlike the other members of the family, she looks like a normal — and beautiful — human girl (although the other members of the family see her as ugly). She shares some of the other members' inhumanness like her very low body temperature.
* The Munsters, whenever someone meets the titular family and runs away.
* The Munsters where the family was worried about Herman going for late-night walks in the park because of monster sightings there. Nobody in the family ever realized that the monster everyone else was reporting was Herman.
* The Munsters, which was supposed to be a continuation of the original series in which, after being frozen for a while, the family awakes in modern (1990s) time.
* The Munsters: While on vacation, Herman is separated from the rest of the family, and stumbles onto a tourist attraction that is a show business tribe, and although most everyone is an actor dressed up as and acting like a Hollywood Native, the tribe somehow has an actual Native American Chief, who is so old and delusional that he believes his tribe is real, and even attempts to marry Herman to his daughter.
* The Munsters while still being allowed to sell the kits of the cars). One problem with that is that the kits haven't been re-tooled since they first came out, such that the tooling is as old as the hills. Another example is the reproduction lithographed tinplate toys currently being released solely for the collector's market.
* The Munsters: While they look like people from a Halloween party, Herman is a Frankenstein-type monster and Lily is a hot vampiress. Lily sees Herman as gorgeous and worries about other women stealing him away due to this. And considering how they all consider their pretty niece as 'odd-looking', their view of beauty is skewed from the cultural norm.
* The Munsters who claimed to have invented a machine that could remove uranium from water. When Grandpa tries to use it only to find it doesn't work, he thinks he broke it. When trying to fix it, at one point he's disappointed to find it only extracts gold and tosses it aside with other gold.
* The Munsters who offs her husbands for insurance and inheritance money. The Munsters prove to be too much for her, though.

* The Munsters with pictures of a phone displaying what appears to be a PowerPoint presentation regarding the Pro model's features.
* The muntjac, a small deer-like animal from Southeast Asia, makes some characteristic "barkings" to alert other members of its species when they know that a tiger is near. Many animals of other species (and people are not an exception) have learned the meaning of this barking and become wary when they hear it. And bear in mind that muntjacs are quite small and have a talent for camouflage, so they could save your life without you ever seeing one.
* the Muppet, after getting thrown about in a bar brawl, Kermit mutters to the audience "I hope you appreciate that I'm doing my own stunts," and the piano player gives the camera a "who are you talking to?" sort of look.
* The Muppet Alphabet Album. He confesses up front that he doesn't know very many such words (he's still a small child, no matter how large physically he is), so he'll be sticking in a lot of "very"s as necessary.
* The Muppet Christmas Carol – though always referred to as "it," not "he" – but is voiced by a girl in the film.
* The Muppet Christmas Carol, and is usually in or near the scene in question when it happens. Rizzo finds this a bit hard to believe, which leads to the following exchange outside Scrooge's house:
* The Muppet Christmas Carol are indeed Muppet adaptations of those two very famous pieces of literature.
* The Muppet Christmas Carol Ashanti's amount of focus makes The Muppets themselves feel like an afterthought. In this case, all three are based on stories where the main characters were humans, and the trope is just a side-effect of staying faithful to the story.
* The Muppet Christmas Carol; at the start of the Ghost of Christmas Yet-To-Come sequence;
* The Muppet Christmas Carol, Fozziwig (the movie's version of Fezziwig, Scrooge's old boss) runs a rubber chicken factory.
* The Muppet Christmas Carol: Gonzo accidentally ignites Rizzo's tail while lighting a lamp.
* The Muppet Christmas Carol. Gonzo explains it's for dramatic emphasis.
* The Muppet Christmas Carol had the "When Love is Gone" number cut out of the theatrical release after negative audience response. They put it back in for the VHS and Laserdisc release, and fullscreen DVD releases. As such, the 2005 DVD, which contains both the fullscreen and widescreen version, omits the song in the latter, and the 2012 Blu-ray release also lacks the song, making the Laserdisc the only release of the film to feature the song in widescreen.
* The Muppet Christmas Carol has Scrooge Suddenly shouting at bookkeeper rats.
* The Muppet Christmas Carol has the Marley brothers sing about how evil they were in life and what they could have done instead of ignoring people's needs. It's also their way of warning Scrooge and telling him that he can atone for his crimes against humanity.
* The Muppet Christmas Carol, Rizzo and Gonzo climb over a barred gate, and then Rizzo runs back between the bars to get something he dropped. Lampshaded when Gonzo, who didn't realize Rizzo could fit, calls him an idiot for not doing that in the first place.
* The Muppet Christmas Carol, Rizzo screams "MOMMY!" while being forced to fly over London with Scrooge and the Ghost of Christmas Past despite his fear of heights.
* The Muppet Christmas Carol, Scrooge is visited by the Marley brothers, who are played by Statler and Waldorf. They openly admit that, in life, they were selfish and heartless bankers, and they even reminisce about evicting an entire orphanage in the middle of winter. This makes them break out into their trademark laugh, which almost immediately degenerates into a shudder, and they move on to warn Scrooge to repent from the mistakes they made.
* The Muppet Christmas Carol, the first Muppet film to come out after Henson's death, was also dedicated to him, as well as to Muppet performer Richard Hunt, who died during pre-production.
* The Muppet Christmas Carol, the song "When Love is Gone" was cut for reasons of

pacing, then it was re-added in the VHS release, then cut again on the widescreen DVD (the second DVD release had it, but only in fullscreen).
* The Muppet Christmas Carol. When Scrooge arrives at the Cratchit house, apparently to berate Bob for not coming to work on Christmas Day, "Emily" responds by threatening to punch him "right off the pavement".
* The Muppet Christmas Carol, when Scrooge first meets the Ghost of Christmas Past.
* The Muppet Christmas Carol where the bookkeeping staff gives us this little gem:
* The Muppet Christmas Carol, which Brian both directed and played several characters in.
* The Muppet Movie, along with rowing-a-boat and meeting-on-a-foggy-noir-street-corner-in-the-40's. Piggy & Kermit meadow run at each other - but when they meet in the middle, Piggy keeps going and Kermit ends up running backwards.
* The Muppet Movie: As the Muppets set up their studio for the finale:
* The Muppet Movie: Doc hires a frog killer called Snake Walker to give Kermit an ultimatum; either become Doc's spokesperson or die.
* The Muppet Movie. Doc Hopper has just ordered his hired goons to kill Kermit the Frog and company, and as they prepare to do so a rumbling is heard...a previous scene had set up that Dr. Bunsen Honeydew had created "Insta-Grow Pills" that have "sadly, temporary" effects. It turns out that Animal has taken some of them, and when he bursts out of one of the buildings and roars, the villains flee and the good guys cheer.
* The Muppet Movie features jokes about "starting off with a bang", "drinks on the house", and a "fork in the road".
* The Muppet Movie: Fozzie has bad luck with his act at the El Sleezo Café
* The Muppet Movie had Kermit and Fozzie see a sign indicating a fork in the road.
* The Muppet Movie has a map that says that there's a fork in the road. Sure, the road branches into two, but there's also a GIANT fork in the road! (which is apparently a real landmark)
* The Muppet Movie has Milton Berle playing "Mad Man Mooney" the owner of Mad Man Mooney's Hubcap Heaven used car lot.
* The Muppet Movie, in the Electric Mayhem's song "Can You Picture That":
* The Muppet Movie is a showcase for cars, including Fozzie's Studebaker, the 1949 Ford De Luxe they get for only $11.95, and the Electric Mayhem's painted school bus.
* The Muppet Movie is dedicated to Edgar Bergen, one of Henson's biggest influences, who made a cameo in the film.
* The Muppet Movie is so painfully bad, it's the reason why he wants Kermit to be his spokesman - or spokesfrog, anyway.
* The Muppet Movie: Kermit attempts to convince this of Doc Hopper. It fails.
* The Muppet Movie, Kermit The Frog is informed that Miss Piggy's been kidnapped. Doc Hopper orders Kermy to step outside the hotel ..."My boys will meet you there." Kermit obeys ... and is immediately surrounded by goons levelling their shotguns at him.
* The Muppet Movie Kermit the Frog tries to do this to Doc Hopper, appealing to Doc's better nature, but it turns out Doc doesn't have one.
* The Muppet Movie. Later, after their car breaks down and leaves them (and their new friends Gonzo, Rowlf, and Miss Piggy) stranded in the desert, the Electric Mayhem are able to find them and help because they read it in the script.
* The Muppet Movie: On their way to California, Kermit and Fozzie get epically lost, meandering through such places as the state of Rhode Island and Saskatchewan, Canada.
* The Muppet Movie, Piggy asks Kermit to whisper sweet nothings in her ear:
* The Muppet Movie them. of course, since it's blindingly obvious that many of the various characters who are friends or at least co-workers of long standing on Show are meeting for the first time in Movie.
* The Muppet Movie, the psychedelic paint job the Electric Mayhem gives Fozzie's Studebaker serendipitously matches a billboard for soda, enabling Kermit and Fozzie to elude Doc Hopper.
* The Muppet Movie, there's a variation on this trope — the heroes

accidentally crash their car into a billboard for Aunt Amy's Custard Pies, sending the giant custard pie upon it flying right into the windshield of villain Doc Hopper's car.
* The Muppet Movie, when Dr. Teeth and the Electric Mayhem discuss how they can help Kermit and Fozzie avoid Doc Hopper:
* The Muppet Movie, when Fozzie and Kermit are trying to escape from Doc Hopper in their rainbow-colored Studebaker. They pull up in front of a billboard with wild coloring that exactly matches the car.
* The Muppet Movie when Fozzie helps Kermit try to find the route to Hollywood on a map. Kermit asks who's driving, and they nearly crash into the abandoned church where they meet the Electric Mayhem.
* The Muppet Movie when Miss Piggy is singing "Never Before, Never Again", she's straining to hit the last note.
* The Muppet Movie, where the plot revolves largely around would-be fast food mogul Doc Hopper trying to hire Kermit the Frog to be the mascot for his chain of French-Fried Frog Legs restaurants. Kermit's response to a billboard for them: "All I can see are millions of frogs with tiny crutches".
* The Muppet Movie, whose route from Florida to California goes through Rhode Island and Saskatchewan.
* The Muppet Movie with Miss Piggy snapping her bonds to save her frog.
* The Muppet Musicians of Bremen, the cruel former owners of the animals are also the bandits they scare away from the house.
* The Muppet Musicians of Bremen: When Leroy the Donkey and T.R. Rooster first encounter Rover Joe, the hound keeps peppering his backstory with, "I'm olllld... I'm beeaat uuuup... I'm wooooorn awaaay..." to the point that T.R. eventually started chiming in with the same thing.
* The Muppet onward, although still looking ferocious, the name has been wholly deserved.
* The Muppets: A Celebration of 30 Years, Grover gives Jim the bill for the evening.
* The Muppets after Miss Piggy has Reece Witherspoon appear on her talk show (which she's had an apparent rivalry with for a couple of years), she goes back to her dressing room to get out of her Spanx, woven extra tight for Reece's appearance. Once they've been removed, Uncle Deadly proceeds to praise them, saying "You worked extra hard tonight."
* The Muppets against communism (even though Constantine Frog is not a communist).
* The Muppets, a group of planted protesters are reading cue-cards provided by Sir Sam of Eagle. One of them shouts out "Bread, milk, cheese, armour polish..." before Sam gives him the right card.
* The Muppets. Already uncomfortable about the "mean-spiritedness" of the show, she pushed to make the character the sweet, slightly goofy version who actually appears.
* The Muppets), although the humans' subplot takes a backseat to the main plot for most of the movie. That said, a concerted effort was made to give the Muppets enough screen time and have them qualify as main characters.
* The Muppets, and she has to sit uncomfortably while they all escalate into chaotic bickering.
* The Muppets and then goes on to say it to various random objects she passes. Without really thinking, Kermit replies, "I love you too." He then stops and thinks about it for a second before saying to himself, "I love her..."
* The Muppets, and the various Muppet TV specials and movies on top of the above two examples, and you get almost enough characters to populate a small country.
* The Muppets are basically treated like real life celebrities everywhere they appear.
* The Muppets are known to suffer from this from time to time, and handle it with various levels of success. Most of the time they pull it off rather well, but a few cases stand out as blatant attempts at this:
* The Muppets as the rest of the Muppet characters also seem to find him unsettling or awkward.

* The Muppets at first glance, but was actually him talking to an offscreen character who thought it was just a confession segment.
* The Muppets at some point, but in particular, luck always has it out for Kermit when he attempts to ride a bicycle.
* The Muppets before the Stage was torn down in 2014, but the set was persevered.
* The Muppets, but that's only relative; the audience reacts as though it's hilarious when it is, at best, passable.
* The Muppets Constantine just says of course whereas the real Kermit hesitates. Piggy immediately knows that that's her frog.
* The Muppets continuity to the silver screen) rather than a crossover.
* The Muppets cute so the rest of the Muppets wouldn't have to. There's also Kermit's tiny, musically talented nephew Robin, and Gonger, a somewhat new Sesame monster who is a tiny, pink, hyperactive British chef.
* The Muppets, despite Disney's best attempts to make "Green M with Kermit's collar" happen.
* The Muppets devotees were likely turned off by the changes from previous incarnations... who wanted to see Kermit and Miss Piggy broken up?
* The Muppets don't have actual eyes, though all of them have some sort of "indicator" of eyes:
* The Muppets episode "Got Silk?", Miss Piggy joins Janice's aerial silks class to make friends, and then asks the first person she sees to bring her some water and tries to tip her. It goes downhill from there.
* The Muppets episode "Pig Out", Kermit asks why they're wearing each other's clothes, and Bunsen says that if it happened outside work, they don't owe him an explanation.
* The Muppets episode "Swine Song", Denise sees Kermit and Piggy singing a duet, and even though Kermit insists it was just part of the show decides to bow out.
* The Muppets establishes Kermit as the Heart of the Muppets — so much so that, when he became depressed, everything just fell apart.
* The Muppets features a particularly nice tribute, with a picture of Henson and Kermit prominently displayed in Kermit's home.
* The Muppets, feeling that it was too serious for the Muppets. Rumor has it that former Kermit the Frog performer Steve Whitmire threatened to have his name taken off the film if the original ending (Tex Richman being revealed to be Kermit in disguise the whole time, as a way to bring the crew back together) had been used.
* The Muppets film, the Swedish Chef takes a flamethrower to the mold-encrusted and talking contents of his fridge that hadn't been used in years.
* The Muppets, Fozzie is told by a security guard that telling bad jokes on an airport terminal is against security regulations. After Fozzie tells him that he has better jokes and takes them out to show him, the guard shouts "He's got index cards!" and poor Fozzie is tackled and taken away.
* The Muppets from him. Sam doesn't even make it past the first two lines before realizing his mistake.
* The Muppets "Going, Going Gonzo" episode after Scooter rejects Rizzo and Pepe's poker invitation:
* The Muppets has a population sign which flips, seemingly by magic, to keep the population count accurate whenever the main characters enter or leave the town.
* The Muppets has a scene where Kermit is trying to explain to Gonzo what's going on, but Fozzie keeps interrupting with suggestions about what he should say.
* The Muppets has been known to shout "QUIET!" on occasion, followed by a relatively low-key "Thank you."
* The Muppets has names like Sam and Kermit (a real name, if rare) alongside names like Fozzie and Gonzo.
* The Muppets has parodies of multiple film company logos, including Fozzie taking Leo's place for "Metro Goldwyn Bear" and Link Hogthrob on the gong for "J. Arthur Link".
* The Muppets have appeared in a number of direct-to-video productions:
* The Muppet Show a character has three legs in a wheel arrangement, wildly spinning as a background scrolls behind him and he sings "Windmills of Your Mind"

with a constant accelerando. Amusingly, he later appears in another sketch, and he's still equipped with the leg-wheel, no longer spinning.
* The Muppet Show. After repeatedly scolding him to get things under control, she grabs a pair of cymbals and crashes his head in them. Animal's reaction? "That my kind of woman!"
* The Muppet Show and all movies featuring the Muppets, Floyd seems to be the only one who can keep Animal under any sort of control.
* The Muppet Show and subsequent Muppet productions have continued this trend.
* The Muppet Show and the cast of "Veterinarian's Hospital" usually laugh at their own wisecracks and you can't help but laugh along.
* The Muppet Show Anyone who has to look after Bobby Benson's Baby Band is bound to become a badly battered babysitter. Fozzie got beaten up in less than two minutes (in fairness, he tried to tell them his jokes). Miss Piggy's room got ransacked. The babies don't even get along with each other, often picking fights mid-act, so anyone else is fair game. The only person who can keep them on a leash is Bobby himself. And Bobby's a crook.
* The Muppet Show appearance, he's told by Kermit the Frog that he can relax and act like himself when he's not onstage. He replies with the now-iconic quote, "There is no me. I do not exist. There used to be a me, but I had it surgically removed."
* The Muppet Show appearances. The same is probably true for at least half the guest stars. The fact that viewers do not remember vaudeville is not entirely unexpected. It was a dominant form of theatrical entertainment from the 1880s to the 1930s, but was considered unable to compete with the then-innovative sound films at the movie theatres (or with the fact that tickets to a movie theatre were often much cheaper). During the 1930s, several companies and theatres previously counting on vaudeville for their profits, either shut down or invested in the film industry. Most of the old vaudeville stars were forced to either retire, or try their hands at a film career. References to vaudeville in the 1940s were already considered retro. About 70 years later, they are references to an entirely different era.
* The Muppet Show approaching the edge of the Universe, beyond which lies The Meaning of Life. Unfortunately, it's interrupted by a Muppet News Flash to announce that they're close to discovering The Meaning of Life. When we return to the sketch it's over, and the crew missed it as well (it was lunchtime, and apparently swill stroganoff is more important than the Meaning of Life). The narrator then reveals that he saw it, but when pressed further he chants, "I know something you don't know!"
* The Muppet Show are caught trying to "bump off" the Muppets, they're taken away. It's only after the credits, during their traditional "last laugh", that we see their fate: they're locked in the theater box (complete with bars) and forced to watch the Muppet Show.
* The Muppet Show are known for staying in character after outtakes and having the puppets react rather than the puppeteer. This is especially funny when a puppet's head falls off and all the others in the scene react in utter horror.
* The Muppet Show. As it happens, the lion doesn't want to fight and the two decide to sing and dance "Let's Call the Whole Thing Off" instead.
* The Muppet Show). At one point, Kermit tried to karate chop Miss Piggy only for nothing to happen. Miss Piggy then proceeded to show him how it was done.
* The Muppet Show: At the end of "A Nice Girl Like Me" in the Sandy Duncan episode, Duncan — having downed an entire row of whiskies — breaths on the Muppet monsters and they all collapse from alcohol fumes.
* The Muppet Show, Avery does a sketch where he battles "the Monster of the Moors" (Sweetums) in an insult contest.
* The Muppet Show back onstage and offstage in the other direction, with the squirrels laughing their heads off.
* The Muppet Show briefly features one of these, Fleet Scribbler, but the producers found him to be so annoying that he was ditched as quickly as possible.
* The Muppet Show can be seen on the table in the "Ain't Nobody Here But Us

Chickens" sketch.
* The Muppet Show can fit under here as well, as she is kind and laid back.
* The Muppet Show can hear the Announcer, and sometimes argue with him. They always act surprised when he speaks up, and at one point, they even blows him up, causing him to land in the scene.
* The Muppet Show can often be seen sleeping before someone interrupts him.
* The Muppet Show cast would qualify, but Gonzo is the Poster Boy for this trope. Very much so. The word "Muppet", as used in Ireland, means what "Cloudcuckoolander" does here. It can be used as an insult, or a term of endearment, or both at once.
* The Muppet Show Comic Book are playing a strange board game in the "Family Reunion" arc. It looks like chess, and the goal is apparently to create chaos by introducing new pieces, but beyond that, who knows.
* The Muppet Show Comic Book, one of the attempts the other Muppets make at cheering up a homesick Kermit the Frog involves Miss Piggy jumping out of a cake.
* The Muppet Show Comic Book. Only in her absolutely final scene (after considerable legal negotiations behind the scenes) does she sign a letter to the gang "Skeeter".
* The Muppet Show Comic Book, so Kermit won't let anyone else open it...
* The Muppet Show Comic Book's "Pigs in Space" sketches, this is Link Hogthrob's reaction to, well, just about everything.
* The Muppet Show commentary, Fozzie was originally just a bad comedian, and they switched to the use of this trope midseason. A comedian whose material is invariably unfunny: kinda sad. A comedian who, without realizing it, dissects how to be invariably unfunny: hysterical.
* The Muppet Show complained as they usually do — but about the place having nothing to complain about.
* The Muppet Show could be a tad surreal when it came to the fourth wall. While talking to the audience is expected in a variety show, the characters would sometimes address the audience while they were backstage, or otherwise acknowledge that they were just actors portraying a variety show.
* The Muppet Show Don't ask Animal to play classical music. He just can't stand it for long. And when Animal freaks out, the rest of The Electric Mayhem follow...
* The Muppet Show: Each episode from seasons 2-4 would begin with Scooter knocking on the guest star's dressing room door, calling the star's name, and announcing the number of seconds remaining until curtain time. Scooter's appearance was then followed by a short quip or visual gag involving the guest star. In season 5, the cold open was changed to show the guest star entering the theater and talking briefly to Pops.
* The Muppet Show either as assistants to Gonzo, as part of the Swedish Chef's recipes, or as the featured singers or musicians. Gonzo would frequently hit on them.
* The Muppet Show enter the episode by smashing their way through the wall of the guest star dressing room.
* The Muppet Show episode, Dr. Honeydew's superglue spills all over the stage and characters keep getting glued to everything. By the end of the show, everyone is stuck in one big ball. In addition, during their closing scene, it's revealed the glue got onto Staler and Waldorf's balcony, and they get stuck, prompting them to say, "Oh, no!"
* The Muppet Show episode really counts; Belafonte insisted on an especially meaningful closing number and Henson was game. The end result is the number, "Turn The World Around," which features specially-built Muppets based on actual tribal masks. It's a profoundly moving, spiritual performance that Henson always felt was the finest of the series. In fact, Henson liked the song so much that when he passed away in 1990, his family requested that Belafonte perform the song again at Henson's funeral.
* The Muppet Show episode where Steve Martin guest starred, Statler and Waldorf debate whether they should leave after the show is canceled to hold auditions. Waldorf insists that they stay as they've paid for the tickets. When Statler points out that the tickets were free, Waldorf replies, "And overpriced, at that!"

* The Muppet Show episode with Gladys Knight has the theatre's leaky roof being serviced, only to have the repair crew insist on "taking it in to the shop". Thus the gang has to deal with all sorts of bad weather climaxing with snow during the closing number.
* The Muppet Show episode with guest star Dizzy Gillespie is the only episode where Statler doesn't appear, being sick (of the show.) Waldorf is accompanied by his wife, Astoria, who happens to look like Statler in drag.
* The Muppet Show episode with Paul Williams, Paul plays a travel agent and a monster asks for the cheapest travel package he has. Paul flattens the monster with a weight, sticks a stamp on him and mails him.
* The Muppet Show Fan Club Newsletter quotes Piggy as saying "I feel that, in all modesty, and for reasons of professional integrity, I mustn't endorse or in any way encourage the activities of these discerning, intelligent, astute and enlightened people."
* The Muppet Show features Waldorf's wife Astoria, who looks like Statler in women's clothes.
* The Muppet Show featuring Rudolf Nureyev. Sam the Eagle, pleased to have a "high culture" show for once, has the theater all decorated and everyone dressed to the nines to impress the guest star. In walks a young man in trendy casual clothes, who Sam immediately and unceremoniously shoos out of the theater before he can spoil the ambiance:
* The Muppet Show, Fielding the Butler, played by Gorgon Heap, ate the evidence that he killed Lord Bottomley - including the detectives investigating the murder.
* The Muppet Show. Following protests from Rizzo, in this version Hamelin is a town of rats which pays Rampal to lure away a ravenous horde of human children.
* The Muppet Show, Fozzie attempts to write an opening monologue for Kermit, but Kermit confronts him about the blatant typos throughout. Fozzie then admits he's not a great typist. Kermit just decides to read through the monologue, typos and all.
* The Muppet Show, Fozzie once was beaten to the title of "Best Comic Bear", by an unknown bear never ever seen before.
* The Muppet Show, Fozzie's mother is coming to visit. As she's under the impression that he's not only successful and the partner of a noted detective (because he told her so), she's bringing a girl with her, clearly intending to play matchmaker. Not wanting to be fixed up with some loser, Fozzie gets Skeeter to pretend to be his girlfriend. Then he meets the girl bear...
* The Muppet Show frequently comments on his own program in a condescending tone, usually tripping up over his own hypocrisy (he once follows up a complaint about how uncultured the show is with a comment that the guest of the week, ballet dancer Rudolf Nureyev, is his "favorite opera singer") or not being aware how silly things actually are (his favorite skit on the show is the "classy" duets by Wayne and Wanda, which always end in some slapstick disaster).
* The Muppet Show, Gonzo reveals he has gotten a contract in Bollywood. As he continues boasting, other Muppets either feel jealous or betrayed (especially his chickens). Ultimately subverted, however, when he finally does his grandiose final performance.....only to break down sobbing midway through the song, admitting that he doesn't want to leave. Kermit feels sorry for Gonzo and, after some encouragement to take his big opportunity, lets him leave on good terms. Which is just as well, as it turns out they booked the wrong guy for a Bollywood deal.
* The Muppet Show had an entire sketch centered around guest star Jim Nabors' thick southern accent, which included such jokes as:
* The Muppet Show had a nutty talking vending machine called Vendaface:
* The Muppet Show had Cloris Leachman stranded on an island with Sweetums. They are later joined by Doglion.
* The Muppet Show had Janice offered up as a sacrifice to some stone idol that she stalled by singing "A Little Help From My Friends" until she could be rescued.
* The Muppet Show has a gag during the episode when Kermit is laid up with an injury. Specifically, it's a Muppet News Flash about the brand of hospital bed he is using being recalled because it was using parts originally made from pop-up

toasters. Sure enough, there is a loud BOING! and Kermit goes flying out of the bed.
* The Muppet Show has a Wayne and Wanda sketch where the two are enacting such a date while singing "Row, Row, Row." It's one of few Wayne and Wanda sketches that make it to the song's chorus. Of course, as soon as they do, the boat springs a leak and sinks.
* The Muppet Show has Beaker, the long-suffering lab assistant and guinea pig to Bunsen Honeydew.
* The Muppet Show has the Singing Food, which are all vegetables with faces, including an incredibly cute head of cauliflower. They end up in a competition with the Talking Luggage and the Dancing Mountains (who are not seen, only heard and felt as rumbles and vibrations.)
* The Muppet Show. He first appears in full Skywalker costume, and gets pegged as Hamill right off the bat — only to run out the door to get his "cousin" and reappear seconds later dressed casually as Mark Hamill. At the end of the episode, both appear onscreen just to mess with Kermit's mind.
* The Muppet Show, Helen makes a "ready" joke, if only to get them out of the way. When Scooter asks if she seriously believes the Muppets would stoop so low, Fozzie Bear pops in to make a "ready" joke. "Lower," confirms Helen.
* The Muppet Show, Hilda the wardrobe lady asks Fozzie where her glasses are. (They're on her head) Fozzie is too busy practicing his 'Jokes on any subject' to be any help, and Hilda finds her glasses by herself.
* The Muppet Show. His inventions are often absurd, and tend to blow up in his face, or far more likely, the face of his hapless assistant Beaker.
* The Muppet Show: Human guest stars appear on a vaudevillian variety show entirely composed of talking animals and stranger beings. Magical and/or science fiction sub-plots are common.
* The Muppet Show indication that this trope is in effect before the dynamite goes off is the fact that Crazy Harry is the one who gives him the candle—there is no obvious bomb fuse.
* The Muppet Show. In episode 121, he is "the Phantom of the Muppet Show". One by one, the Muppets tell Kermit that they have seen a phantom, but Kermit refuses to believe them until he sees Uncle Deadly with his own eyes. Once revealed, Uncle Deadly explains that he used to perform at the Muppet Theater, where he played Othello until he was killed... by the critics.
* The Muppet Show. In it, the muppet presented a list of various demographics, and what that demographic would like about the show and why. One of those groups listed was intellectuals and college students, and the thing that would appeal to them was the meaning of everything.
* The Muppet Show: In one episode set in a train station because the theater is being fumigated, Miss Piggy opens a Veterinarian's Hospital sketch by attempting to extract a bottle of wine from a nearby box.
* The Muppet Show: In one of the At The Dance sketches, Gonzo asks a dancer if it's the monster who ate his harmonica. The monster responds with a musical note.
* The Muppet Show: In one "Veterinarian's Hospital" sketch, Bob claims to descend from a Viking so bad at plundering and pillaging that they called him the pillage idiot.
* The Muppet Show interrupting the end credits to make a final quip at the expense of the show and then bursting into their trademark "old-man laughter" just before the closing theme's final saxophone riff.
* The Muppet Show. In the second episode of the series proper, Bert and Ernie show up to perform a skit, where Bert worries that their little kid's show comedy wouldn't cut it on the new show meant for older audiences.
* The Muppet Show: In the UK Spot of the Christopher Reeve episode, several characters, led by Floyd and Janice, mock Sam the Eagle's up-tightness by singing the Bing Crosby hit "Sam's Song". Sam attempts to ignore them while writing a letter to stop all the weirdness, but after they're gone, he actually hums the melody.
* The Muppet Show: In the unaired version of the pilot, we get this exchange

between Kermit and Fozzie.
* The Muppet Show: In the Zero Mostel episode, Scooter takes a phone call from his uncle, and asks him to put out his cigar as smoke emanates from the receiver.
* The Muppet Show involving stuff coming out of the phone related to whomever was on the other line (water from the water company, smoke from the fire department, etc.).
* The Muppet Show is Geri and the Atrics, a band of old ladies that play rock 'n' roll songs.
* The Muppet Show isn't particularly bright, but he's a friendly fellow who never gets angry and always willing to help out.
* The Muppet Show is the show's 'Gofer' (go fer coffee, go fer sandwiches). He's quite happy with this though, and used his position as the theater owner's nephew to specifically request it.
* The Muppet Show is usually more likely to dish it out to others, but she does frequently end up on the receiving end of a lot of physical humor, usually the result of her falling off of something, or one of her karate chops backfiring.
* The Muppet Show. (It's actually by his brother, Gummo.) It stars the Swedish Chef (who else?), who confronts Beaker, who is the Angel of Death. When the Swedish Chef asks to not die, Death gives him a rubber chicken instead. Now he can join a travelling show, and sure enough, in comes a Swedish Kermit presenting a Swedish Fozzie Bear, who tells a joke about Swedish meatballs. It ends with a sing-along to a Swedish version of "Hooray for Hollywood"; by then, Sam has left the stage in disgust.
* The Muppet Show it was even true with the guest stars you couldn't tell how nice or mean they would be purely based on looks. In fact the more you like a muppet, the more you like the way they look.
* The Muppet Show, Kermit narrowly avoids being hit in the head with a plank by Fozzie as he attempts to fix a hole in the stage. He then falls down the hole.
* The Muppet Show Kermit's nephew, Robin, meanwhile, still appears to be a kid.
* The Muppet Show: Kermit tends to scrunch his face in (by means of his puppeteer clenching the hand operating his head) whenever one of the other Muppets does something particularly nonsensical.
* The Muppet Show, Kermit was usually very disinterested in any of Miss Piggy's advances towards him; but whenever she became infatuated with a male celebrity guest, such as Christopher Reeve or Peter Ustinov, he would become jealous. She tried to invoke this trope when Avery Schreiber was the guest, but it didn't work (Scooter warned Kermit of her scheme ahead of time).
* The Muppet Show know that the bear in question is Gonzo's teddy bear, but Fozzie doesn't find this out until the end of the episode, when Kermit reassures him that he never intends to fire Fozzie.
* The Muppet Show, leaving Veterinarian's Hospital "Faster than a speeding bullet"
* The Muppet Show, like when he played "Witch Doctor" and a real witch doctor turns him into one of his Muppaphone creatures.
* The Muppet Show" Mark Hamill whenever he was asked to perform in a sketch.
* The Muppet Show — only to get his arm stretched out to a ridiculous length.
* The Muppet Show — Somewhere between a straight example and a spoof of this genre.
* The Muppet Show, Miss Piggy attempts to do a dramatic recitation of "Daffodils" by William Wordsworth. However, the flowers make her sneeze so strongly that she blows Rowlf and his grand piano off the stage.
* The Muppet Show, Miss Piggy, one of the few female Muppets, was initially only a minor character, but her popularity skyrocketed and she is now probably the most famous of them, along with Kermit.
* The Muppet Show, Miss Piggy sends Kermit (and anyone else, for that matter) flying with a karate chop whenever she's mad at him.
* The Muppet Show, Miss Piggy surreptitiously plants an item in the tabloids about how she and Kermit are actually married in real life. At this point, Kermit has had it with her antics and ultimately fires her and replaces her with Swit in Veterinarian's Hospital and Pigs in Space.

* The Muppet Show - naturally, Bob's job on the show was as a voice teacher.
* The Muppet Show: One Newsflash reported on the kidnapping of the Atlantic Ocean, with a ransom demand of two Christmases a year and kisses from Mommy every night.
* The Muppet Show, one of Gonzo's outro stunts involves reciting the seven-times table while holding a grand piano over his head; partway through, he gets lost and stops to count on his fingers — and the moment he realises this means he's no longer holding the piano (but not a moment before) it falls on him.
* The Muppet Show personality which he maintains especially when trying to kill animals in horrible ways.
* The Muppet Show potion earlier, and the blow switches Arkin to his monster side. Miss Piggy quickly flees.
* The Muppet Show: Puppeteer Frank Oz, when working on the Swedish Chef, gave himself a challenge where he would make the Chef fling his cooking implements over his shoulders and try to knock down every item on the back wall before the sketch was over. He managed it once.
* The Muppet Show: Rowlf is disgruntled about having to play the song "Daddy Wouldn't Buy Me a Bow-Wow" in one episode. He says that for him as a dog, it's humiliating to be called a "bow-wow".
* The Muppet Show, Rowlf occasionally gets to begin such an operation in the "Veterinarian's Hospital" sketches.
* The Muppet Show runs the way it does: when your cast is full of crazy, crazy is what you'll get. They told Kermit he can have it back and decided to go back to their box and just heckle.
* The Muppet Show Sam is rather famous for these. He has a particularly beautiful one while reading "The Ant and the Grasshopper"; he reads the traditional Aesop's fable until he reaches the last line:
* The Muppet Show, "Sax and Violence", featured a short called "Planet of the Pigs" where a human space explorer had to pretend to be a pig on a planet run by them. With a fake snout and ears on he says "Oink, oink! As we pigs say." (Interestingly, Henson used the voice he would later use for Link Hogthrob.)
* The Muppet Shows credit, some of the laughter was actually the off-camera cast and crew cracking up at their co-star's antics, mixed in with the laugh track. Richard Hunt had a particularly loud laugh that can be distinctly heard, for example, in the "Japanese Cake" sketch. Sitting under the table waiting for his cue to bring the cake to life, Richard is audibly in stitches as the Swedish Chef throws candy and sugar all over the set.
* The Muppet Show several times. One notable example is the Nancy Walker episode, when Fozzie is guest hosting while Kermit is sick.
* The Muppet Show: Sex and Violence on Mount Rushmore is depicted like this.
* The Muppet Show's favorite episode is when Harry Belafonte guest-starred, specifically the show's closing number, "Turn the World Around," which featured a number of puppets designed to look like traditional African masks, which Henson felt was among the best work his Muppet team ever did.
* The Muppet Show, she appears in a skit where she is in a park marveling at how beautiful everything is. Along comes a monster who starts destroying each beautiful thing she mentions. Then she turns to the monster and starts talking about how beautiful it is in its awfulness. The monster starts shrinking from embarrassment until it is small enough for Madeline to hit it away with her umbrella. "Sometimes you have to talk your troubles down to a size where you can handle them."
* The Muppet Show, she revealed the Swedish Chef's shameful secret - that he doesn't really speak Swedish. Fortunately, Jean was fluent in Mock Swedish and was able to convince him to switch to his native language - Mock Japanese.
* The Muppet Show, she was helping a Frog Scout troop get their "Punk Badges."
* The Muppet Show, Statler asks Waldorf what he takes in his tea. He answers "Milk, two sugars, one mouse".
* The Muppet Show, Statler, Waldorf and the Swedish Chef are definitely Muppet humans, and Gonzo is ... whatever.)
* The Muppet Show, Statler wears one to confirm, all the way from his theater box, that Liberace's diamond rings are genuine.

* The Muppet Show talked like this sometimes. Miss Piggy's order of a watercress sandwich and rhubarb juice was "The Weight Watcher's Special". Annie Sue's large order of a milkshake, burger, fries and apple pie was a "Kamikaze".
* The Muppet Show that a charter flight carrying the London Symphony Orchestra was forced to jettison some of the musical instruments — including, apparently, a piano that falls down on his desk immediately thereafter. Most of his other news reports had similar results.
* The Muppet Show, the band approves of Fozzie letting them do "Lullaby of Birdland" for the closing number and make him an official Hip Dude, giving him a pair of 'Charlie Parker Lives supercool sunglasses'. The shades are so dark that Fozzie can't see where he's going and bumps into numerous things. After the final number turns into a disaster due to Fozzie letting Knotts play bass, the band strips the bear of his title and his shades.
* The Muppet Show The "Bear on Patrol" sketch is all about this, where the two cops are Fozzie Bear and his captain, Link Hogthrob, who are both stupid and cowardly, rarely managing to arrest anyone, and often getting duped by the people Fozzie tries arresting.
* The Muppet Show: the bill from Special Effects, which is enough to frighten everyone on stage.
* The Muppet Show, the butler did it. However, because the butler is a Muppet monster, he then eats all the evidence, including the body and the only witness. Holmes therefore concludes that, in the absence of evidence, there was no crime at all (having briefly "deduced" that, in the absence of evidence pointing towards the butler, Watson did it).
* The Muppet Show: The Great Gonzo (but is usually just called "Gonzo").
* The Muppet Show, the last act was a drum battle between Rich and Animal. After losing to Rich, Animal threw one of his drums at Buddy in a rage. Lampshaded earlier when Rich met Animal backstage;
* The Muppet Show?"; then Animal comes in and puts an end to it (as well as to incoming calls, unless someone thinks to call the number for the phone on the desk).
* The Muppet Show, the Newsman reads a news story about a black-and-yellow striped mackerel getting elected king. At first he thinks it's a prank (especially since he had also read a story about a spy ring attempting to sneak ridiculous stories into the news), but then one of the guards in the theater escorts the new king into the news room:
* The Muppet Show there was a sketch featuring a performance of the William Tell Overture that ended with the cellist firing the bow from his cello to shoot an apple off Beauregard's head.
* The Muppet Show (the show's composer). The rest of the cast flee screaming from his rendition of "Auld Lang Syne".
* The Muppet Show, the storyline involved the rats trying to take over the show. In the "Pigs in Space" sketch, Link says he set a trap in the refrigerator. Cue First Mate Piggy entering the bridge with the trap snapped on her snout.
* The Muppet Show: The Swedish Chef and Dr. Teeth are the only Muppet characters with human hands, since they're required to pick up and manipulate objects and convincingly play the piano, respectively.
* The Muppet Show, the Swedish Chef does his "Spring Chicken" sketch which ends in bouncing chickens escaping and the Chef pursuing them. Immediately afterward, Fozzie goes up to a stressed Kermit and starts to ask, Why did the chickens cross the road?" Kermit answers, "Because an angry Swede was chasing them with a cleaver!"
* The Muppet Show: The very first episode had a sketch featuring Fozzie as an Old West-style criminal whose entire arsenal consisted of fruits and vegetables, including pickles as six-shooters, a carrot as a knife, and an exploding apple.
* The Muppet Show this trope is in play when the Swedish Chef's demonstration of making a banana split by chopping a banana is continually interrupted by a Mexican musical conga line passing by at different times. At the end of his patience, he gets his revenge by throwing a (spotty!) peel on the ground in front of his counter

and luring the conga line to make another pass, and they all fall on their faces.
* The Muppet Show to get his own anthology series called "Uncle Deadly's House of Badness" where he would have acted as a parody of this trope.
* The Muppet Show to honor his life. Jerry Bishop (the original announcer for The Disney Channel) remembers him as "The Man behind the Muppets, The face behind the Fraggles".
* The Muppet Show, to which Waldorf remarks that he still has the dress he(Statler) wore to get off.
* The Muppet Show") until the last person realizes that there's nobody else in the room to pass the dog off to.
* The Muppet Show usually had one human guest and all muppets otherwise, though some muppets are human-like muppets.
* The Muppet Show was always very reluctant when it came to Miss Piggy's advances. However, whenever she focused her attention on a male celebrity guest (most notably Peter Ustinov and Christopher Reeve), Kermit would promptly become jealous.
* The Muppet Show was dubbed into Hungarian twice. The original was done by MTV around 1980-1983, while the new version was made by Film Mánia (formerly known as Filmmúzeum at the time) during 2003-2004.
* The Muppet Show was made in Britain with British money by a British TV station, it was always primarily aimed at the USA; domestic success was an optional bonus.
* The Muppet Show was meant to appeal to all ages, not just kids or adults.
* The Muppet Show was meant to be only used once, but executive producer David Lazer suggested that he should be used more often, as it was an expensive puppet to build.
* The Muppet Show were requested by fans during the show's original broadcast run. People actually believed it really was taped live in a theater because of the laughter, applause and camera shots of the theater's audience.
* The Muppet Show, when Kermit checks the theatre's cashbox, he comments, "Three moths and a washer... More than we usually have."
* The Muppet Show: When not making fun of the show, Statler and Waldorf often make fun of how old each other is, like having dated Queen Victoria or gone to school with Shakespeare.
* The Muppet Show. When she says she's the singing star of the show, Big Bird finds it funny and starts laughing. An angry Piggy tries to karate chop him, but Big Bird doubles over just as she swings, and she falls off the second floor.
* The Muppet Show, where Kazagger would report on such sports as blindfold racing, cross-country billiards, and tree staring.
* The Muppet Show where the "At the Dance" number was a series of Fly in the Soup jokes.
* The Muppet Show where the cast of Star Wars are the guest stars. "Seems we've landed on some sort of comedy variety show planet!"
* The Muppet Show which is "light as a feather". It collapses when the Chef puts the Miss Piggy on top of it.
* The Muppet Show. While it doesn't have guest stars (for obvious reasons), it does well on focusing on characters and manages to get a lot of the show's regular sketches in.
* The Muppet Show while their hair rapidly grows throughout the 1-minute song to the point where they can't see or move properly.
* The Muppet Show, who disliked the artificial quality of canned laughter but conceded it had to be used. This is most awkward during musical numbers where nothing particularly funny is happening, but the audience guffaws away for no reason.
* The Muppet Show, who included it and some of Tracey's other songs on the show.
* The Muppet Show, whose uncle owns the theater. He's only a gofer, but still portrayed as fairly naive and incompetent, and still gets his way when he drops his uncle's name. By the second season, he's mostly over it.
* The Muppet Show, with different music and other changes. (Pearl Bailey was Guenivere.) Floyd got a scarf from Janice and Gonzo got a scarf from Camilla.
* The Muppet Show... with each disappearing clue, Sherlock rewrites his

conclusions, eventually deducing that despite the dead body in the room, there has obviously been no murder.
* The Muppet Show, with some sketches simply being an excuse for the puns to fly. Inverted in the Tony Randall episode. Tony had accidentally turned Miss Piggy into a statue, and when everyone found out, an orchestra member had about three pages of jokes. Kermit requests that they be burned, so he lights a match on the Miss Piggy statue.
* The Muppet Show would frequently feature sketches backstage where the "talent" would propose new acts, the guest stars would bicker with Kermit over the things they were being asked to do, and zany things went on in the name of pushing the show forward. These would often be intertwined to create a plotline.
* The Muppets includes hilariously-vague faux reviews saying things like "One of the T.V. programs ever made" and "Even better than that."
* The Muppets in its 90-or-so minutes to open a store with more than a week's inventory.
* The Muppets, in Sweden, the Swedish Chef is known as The Norwegian Chef.
* The Muppets introduced the comedy team of Pepe (a prawn) and Seymour (an elephant). Pepe has since gone on to appear in many later Muppet projects, while Seymour vanished without a trace.
* The Muppets involving the Swedish Chef cooking popcorn - or rather, "pöpcørn" - invokes this.
* The Muppets is actually titled "Sex and Violence" (though it doesn't really have much of either.)
* The Muppets is a Muppet fan who becomes the newest member of the gang.
* The Muppets is crammed in a bus with the Electric Mayhem, and Animal is literally breathing down her neck. She finally pulls out a container Tic-Tacs and pours them down his throat, which he happily takes.
* The Muppets is heard singing... and both lights and music turn out to be from a passing bus full of choir singers.
* The Muppets is "Muppet Freaks;" while this is commonly accepted by longtime fans, relatively newer fans (or longtime fans who are new to the fandom itself) tend to find the name to be a tad offensive if they're unaware of what it actually means.
* The Muppets: "I think that's just an internet rumour. Like that there's a country called Turkey."
* The Muppets, it's unclear whether the marriage was legit or if she left because she was tired of waiting for him to decide to make it real.
* The Muppets, Kermit asks Scooter to do this. Then Scooter goes out on stage and says "You are all naked!" He manages to imagine them in their underwear, but this is close enough for him.
* The Muppets, Kermit's largely unexplained retrotech buddy, who vaguely resembles the NES accessory ROB and is very proud of his dialup modem.
* The Muppets, Kermit's new girlfriend Denise (cheerful, down-to-earth, somewhat adorkable pig whom Piggy sarcastically describes as "It's like you're dating my six-year-old niece!") is the Betty, and his ex Miss Piggy (same demanding, karate-chopping diva she's always been) is the Veronica.
* The Muppets listen to what anyone wants, prompting the Muppets themselves to make the show more Muppety.
* The Muppets made brief mention of Miss Piggy doing a sock commercial in Japan.
* The Muppets". "Man or a Muppet" did indeed eventually win the Academy Award for Best Song.
* The Muppets — Puppet comedy series, based on the TV series of the same name. 10 theatrical feature films since 1979.
* The Muppets, Miss Piggy tells the story of how, on her first visit to Disneyland, she wanted to be Cinderella, and instead got a job cleaning the castle until her Fairy Godthing Gonzo offered her three wishes. She wishes his nose would blow up, then that she hadn't said that, and then that Gonzo would take this seriously. So, out of wishes, she ropes Gonzo into a magic-free plot to get the real Cinderella out of the picture.
* The Muppets newspaper strip has the Great Gonzo pass doors saying "Men" and

"Women" before finding one that says "Whatever".
* The Muppets. No matter what kind of chaos is going on backstage, the Muppets always keep the show going until the very end.
* The Muppets - not for the power, but just because he thought it was a neat idea.
* The Muppets on the Comedy Network, a promo for the network's holiday programming (in which Santa crashes a family's house to the family's dismay) aired at the end of almost every break.
* The Muppets ... or so he says. In fact, he looks exactly the same as he does now.
* The Muppets put a series of videos on Youtube in a rather blunt form of this. And it's hysterical.
* The Muppets Rowlf complains that he wasn't shown in a montage of Muppets being recruited for a revival show. Cut to his scene:
* The Muppets Scooter adjusting the thermostat causes a chain of events that eventually ends with the entire studio wiring blown out. That's within five minutes of being in charge.
* The Muppets, since he himself didn't even know what he was. Invariable he was referred to as something like "a whatever he is".
* The Muppets's Muppet movies. The script also counts as an in-universe example of this trope, as the Muppets try to win back an audience that has grown to favor cynicism in the years since they last performed together. This became one of the most critically-acclaimed movies of the year, and the Muppets' highest-grossing movie ever (not adjusting for inflation).
* The Muppets Take Manhattan" and the winner "Ocean Breeze Soap Will Get You Clean". It gets funnier when one of the other frogs says, "You mean, just tell people what the product does? No ones ever tried that."
* The Muppets Take Manhattan, a phony Broadway producer is about to be arrested for fraud when he takes Gonzo and Camilla hostage. After an attack from Animal, he begs to be arrested.
* The Muppets Take Manhattan, during the "Saying Goodbye" song, Fozzie carries one while he boards a freight train and sings about how he's going to miss his friends.
* The Muppets Take Manhattan, Fozzie tries to bring Kermit out of his amnesia by giving examples of his "humor":
* The Muppets Take Manhattan has the "Saying Good-Bye" scene with Kermit and Piggy.
* The Muppets Take Manhattan, Rowlf deadpans, "You speak Chinese like a native."
* The Muppets Take Manhattan: This happens to Kermit after he is hit by a car. When he Miss Piggy tries to convince him that they are in love, he makes a series of pig jokes which result in Piggy punching him across the room. This, of course, results in his memory returning completely.
* The Muppets Take Manhattan was dubbed into Brazilian Portuguese twice; one by BKS and another by Megason.
* The Muppets Take Manhattan, where the opening music turns out to be the finale of the Muppets' college show.
* The Muppets than Director James Bobin. This partly seems due to the fact that as a professed Muppet fan, he had the ambition of bringing them to the forefront again.
* The Muppets that never lasted long, Scooter being a notable example.
* The Muppets, the fourth wall is strong enough to keep the plot going- but no stronger.
* The Muppets... The guy doesn't really get a break. Also, Fozzie plays the straight man to Statler and Waldorf whenever he does an act, though this isn't intentional on his part.
* The Muppets, the Muppets ask where they came from, so Mary replies, "We traveled by map. We thought it'd be quicker."
* The Muppets: the sketches are pre-recorded, but Scooter has to upload them all as it's being broadcast.
* The Muppets to their movies, or even their guest spots on talk shows. The Muppets always bring the ham. And no, that's not a pig joke. "'Pig joke'?! I'll show YOU a pig joke!! HIIIIIIIII-YAH!!!" They also had some pretty over-the-top guests, most notably the late Zero Mostel, whose "Fears" sketch featured even his index finger

overacting.
* The Muppets TV series, Miss Piggy does this. In a fun example of puppeteer attention to detail, she leaves a visible snout mark.
* The Muppets, until the time came for the announcer to read a list of cast members, and the inclusion of Kermit the Frog and Miss Piggy elicited surprise in the announcer and the male lead. Thus began a campaign of several teasers of this type leading up to the movie.
* The Muppets, upon learning of the trouble his heroes' studio is in, screams across several short scenes. (Odd that nobody tried even to muffle him on the bus.)
* The Muppets, Ustinov tells Kermit he was very surprised to have a conversation with the hatrack in his dressing room. Kermit replies that the hatrack is one of the writers.
* The Muppets when he is standing outside Jack Black's trailer to lure the actor out, as seen in the page quote.
* The Muppets, where Tex Richman is so rich he uses money in place of things that are a metaphor for money:
* The Muppets (which features covers of famous Muppet songs), a caption appears on screen dubbing it "blatant cross-promotion."
* The Muppets, while the latter revolves around the Muppets getting lost in a recording studio and meeting celebrities.
* The Muppets' Wizard of Oz, is set in the present day with Dorothy as a would-be pop star, a nightclub called Poppyfields, the Wizard as a Hollywood effects guy and so on.
* The Muppets' Wizard of Oz previously suggested that all Muppet penguins are "unisex".
* The Muppets' Wizard of Oz, since after Dorothy ends up in Oz, Toto is played by Pepe. Pre-tornado, he's seen as an actual prawn in a goldfish bowl. This trope is averted with the Cowardly Lion, though: he's still a lion, even though his "actor," Fozzie, is a bear.
* The Muppets' Wizard of Oz the witch who first sends Dorothy off to the Emerald City.
* The Muppets' Wizard of Oz, Toto has declared himself to be Dorothy's agent, and is apparently calling someone about a gig. Dorothy's reaction: "That isn't even a real phone!"
* The Muppets' Wizard of Oz, where the Ozians thought he was a powerful wizard because he could do the detached thumb trick.
* The Mural is a high school coming out story about Peyton, a closeted lesbian, falling for Jamie, the new girl from Chicago.
* The Murder After: Waking up next to a corpse, with no idea how it got there.
* The Murder at the Vicarage says that killing him would be a service to the community. However, yet again, the murder turns out to have been committed for purely selfish motives.
* The Murder at the Vicarage suggests a trap to make the killer believe someone overheard a telephone conversation.
* The Murder at the Vicarage, the killers plant several clues to make it look like the victim was shot at the exact time when one of them came to the crime scene to see the victim. The police are meant to see through these clues and assume the crime was committed later.
* The Murder at the Vicarage), where Miss Marple gives the summation to the police officers and the viewpoint character, but the criminal's actual arrest, breakdown and trial take place offscreen.
* The Murderbot Diaries-dominated setting, and it's an open secret that every word spoken in a Company-leased habitat is being recorded and logged. On the other, the Company is more or less exclusively motivated by its own bottom line, so it just data-mines those logs for anything profitable — they might be intimately intrusive, but they're at least impersonal about it.
* The Murderbot Diaries, feats that nobody else in the series can manage.
* The Murderbot Diaries intelligent, self-motivated, and snarky. Murderbot is a bit nervous to fly on a transport that "only" has an autopilot, since its lack of AI

would make it nearly useless in an emergency.
* The Murderbot Diaries, Murderbot takes threats against its human clients very seriously and very personally.
* The Murderbot Diaries session to tweak its build just enough that it won't match the profile on computer sensors.
* The Murderbot Diaries that control their behavior, just like SecUnits.
* The Murderbot Diaries. The latter likes some things about humanity (especially soap operas) but finds other parts incomprehesible or outright distasteful and is quite secure in its own identity as a partially organic supercomputer.
* The Murderbot Diaries; the terms 'husband' and 'wife' never appear. This passes completely without comment.
* The Murderbot Diaries, which the main character is a great fan of. The only discussion we see of the actual plot is that the colony’s solicitor apparently didn’t kill the terraforming supervisor who was the secondary donor for her implanted baby.
* The "Murdercock" meme can take this form sometimes, be it with Greg obliviously or even deliberately "killing" gems the same way Rose ended up dying from her pregnancy, or be it with Greg's actual cock being a malevolent entity that
* the murderer changes with each game play (the clues to his/her identity are also changed).
* The Murderer features a man futilely destroying the myriad loudspeakers, radios, TVs, etc., which endlessly broadcast commercials at the populace.
* The murderer had killed the victim and staged it to look like a suicide. He then locked the door from the outside, and broke it open. He replaced the key on the inside of the door, then used the guitar string to pull the fork under the door, wedging it shut. When the police found the door seemingly locked, they broke it down, covering the damage the killer caused breaking it open.
* The murderhobo phenomenon (where characters just go from place to place killing things to take their stuff and only engage in the minimum amount of roleplaying) is believed to have been partly due to this trope, in reaction to
* The murder of a doctor has Brenda talking to a suspect who boasts of how the man's treatments have her cancer in remission. Another suspect is an arrogant cancer doctor who tells Brenda something is wrong as he knows first-hand what a person who underwent serious chemotherapy looks like and the woman shows none of the signs (like the tiny detail her hair is real, not a wig). This leads to the discovery the "treatments" were faked and the woman, along with scores of other patients, still has cancer.
* The murder of an unknown guy in a restaurant, which spans the entire game -
* the murder of a prominent prosecutor by a serial killer that was in fact a staged incident conceived by the future chief of police. A couple years later, one of the original detectives decided he wants to reopen the case instead of having the evidence transferred and the case permanently closed. The chief of police kills the detective and has the chief prosecutor take the fall for the murder. However, the chief prosecutor's younger sister doesn't believe she's guilty, and goes to Phoenix Wright for his help.
* The murder of a singer's manager during a concert is pretty big, but
* The murder of Kate Beckett's mother was a cold case and trying to find the truth motivated Kate to become a police officer. When Castle finds out about it, he tries to re-investigate the case, which causes Kate to become very angry with him. She has tried to solve the case many times over the years and each failure left her extremely bitter and depressed. Castle investigates anyway and a forensic expert he hires finds evidence that sheds new light on the case. Over the subsequent seasons, Castle and Beckett find evidence of a criminal conspiracy that the murder was part of and try to bring everyone responsible to justice.
* The murder of Kristine Fitzhugh is an inversion. Her husband Kenneth staged the scene to look like she'd fallen on the basement stairs due to unstable shoes he said he'd warned her about. His performance in the interview room trying to sell the story was an over-the-top scenery-chewing performance (including
* the murder of Marie's New Old Flame, because none of them believe he really did

it, despite his being insane.
* The murder of Matthew Shepard also inspired Melissa Etheridge's song "Scarecrow."
* The Murder of Roger Ackroyd: Dr. Sheppard writes an account of the murder and Poirot's subsequent investigation, leaving out the fact that he himself is the murderer. He is careful to never actually lie in his manuscript, but to just leave out pertinent facts in order to mislead the reader.
* The Murder of Roger Ackroyd have happened the way it really did- it turned out most of the suspects were lying or planting fake clues to hide their own secrets and crimes, which made them more suspicious.
* The murder of Sonic being symbolic of the persecution of good people for standing up to evil people.
* the murder of Vitruvius by Lord Business and Emmet's friends' being led away, Emmet stands perfectly still, his voice pathetically murmuring 'no' as he tries to force himself to believe that everything that did just happen didn't happen, and that it's all in his mind.
* The Murder on the Links has this in the backstory, the motive was money.
* The Murder on the Links that twin sisters could be fraternal, or that their parents could be a blond and a heterozygotic brunette (or two heterozygotic brunettes), or hair dye was used. While the twins are repeatedly stated to be identical in appearance, very close resemblances do happen in families, even among brothers and sisters born at separate times to the same parents.
* The Murder on the Links, the crime that Poirot and Hastings encounter is very similar to the Beroldy Scandal which took place 20 years before.
* The murderous mini-lop Bun-Bun's ongoing vendetta against Santa Claus once manifested in someone
* the "murder" Phoenix is investigating is actually a complicated suicide that was designed to shift blame away from his wife, who would have been tried and convicted of capital murder for a self-defense killing she committed against someone who was very likely going to kill her. The Pool of Souls prevents her from getting a fair trial as she would be instantly portrayed as guilty with no one willing to defend her, so her husband contrived his own suicide in a bid to throw suspicion off her and pin his and the actual victim's deaths on a family friend.
* The murder rate in the (fictional) county of Midsomer should have left it a ghost town (well, county).
* The Murder Room, when the murderess, faking ignorance, grabs her discovered weapon (claiming she was going to bag it for the police officer), before it can be dusted for fingerprints, giving her an excuse for when her fingerprints are inevitably found.
* the murders of Amanda Jones and Madelaine Shirohara, with Madelaine haven been raped by Cody before having her throat ripped out with his teeth.
* The Murder Trust, a gang of five men operating out of New York City in the 1930s. The Trust took out an insurance policy in 1932 on a woman named Betty Carlsen. When she froze to death (after having been fed a lot of drinks, stripped in her room, doused with cool water and left exposed to the elements the Trust cashed in its $800 life insurance policy on her. In 1933 they tried again, insuring one Michael Malloy for $1,400. Every night for a week they poured whisky down his throat certain he'd drink himself to death. He survived. They started serving him anti-freeze. He survived. They started feeding him sandwiches made of rotten sardines washed down with wood alcohol. They started grinding glass and metal into his food including the sardine cans. Nothing could finish him off. Then he disappeared for three weeks. The gang decided to run over a bum, identify him as Malloy and cash in. This victim also stubbornly refused to die. Malloy turned back up following a stay at a hospital that had neglected to register him as a patient. Their patience at an end, the gang got Malloy drunk one last time, took him home, attached a hose to his gas pipe and filled him full of gas. Initially ruled a suicide, police became suspicious and exhumed the body, resulting in murder charges for all involved.
* The Murderverse ferris wheel and a waterslide of death. Riding them results in

the rider respawning if they die; however, Percival found out that it only works if you die because of the ride itself.
* The Murderverse. Robin, due to their results as the Investigator, begins pushing to have Nagibaldi executed. Despite dropping some pretty blatant hints, Cutbug doesn't quite understand where they're getting this information and starts suspecting them as a result — but eventually Robin just straight-up spells it out for them.
* "The Murdoch Trap" opens with Murdoch lying unconscious on the floor of what proves to be a cage. After he comes to, he finds
* The murlocs, primitives who resemble piranhas with arms and legs in place of fins and tail, are a staple low-level enemy. They're found almost everywhere that has coastline and are generally considered pests by the smarter races due to their typically aggressive nature and high rate of reproduction.
* The Murmaids' one big hit, "Popsicles and Icicles", was issued with
* The Mursaat allowed the White Mantle to build a religion around them in order to delay their prophesied end at the hands of the Titans.
* The Muscle: Abyss, The Outcast Killaz: Diablo Santiago and Oman Tortuga
* The Muscle: Originally Taku Iwasa. After Mori left, the spot was vacant except when
* The Muscle: The Motor City Machineguns: Chris Sabin and Alex Shelley,
* The Muscular Dystrophy Association's telethon, from 1966 to 2014, after which it was cancelled due to at least
* The Muse over time, and it's more that than his "fun" that wins Kate over. Though even before that, his jokes often amuse Kate just enough for her to banter back for a moment, and she usually gives better than she gets.
* The Muses are the ones who decide on chapter titles in the volumes of history they record so a minor character knowing this stuff is less
* The Muses, clanks created to inspire and teach, are another example. It makes a bit of sense that the Muse of Protection would be able to fight. It makes less sense that the Muse of Dance is equipped with the ability to emit enough electricity to kill a man.
* The Muses usually act as the chorus (in multiple sense of the word), so their minor interactions with characters (in both the movie and series) only occur during musical sequences and are
* The museum in Copan, Honduras (a major Mayan site) has an artificial mask-style carving of a head for an entrance.
* The museum in Washington, D.C. is probably supposed to be the Smithsonian Air & Space Museum, given that it has the Wright Brothers' 1903 Flyer. Other craft in the museum are said to have been built and flown by the United States Space Administration rather than NASA. The Virgo II lunar lander is strikingly similar to a real-life Soviet prototype that never flew.
* The Museum Of Anything Goes this trope in software form on a level that will probably never be equaled and has to be seen to be believed.
* The Museum of Everything will only allow you to leave if you can convince someone else to mind the shop. The museum itself might count, considering that the designer says that when he was commissioned to create a museum that would contain everything, and he realised that necessarily it must contain itself, he got a nosebleed.
* The Museum of Freedom, visited relatively early in the game, is overrun with raiders - mainly because the last of the Minutemen are holed up on the top floor.
* The Museum of Reading in England has a replica of the Bayeux Tapestry on display. It was created using a drawing of the original as a guide. However, the drawing put shorts on a figure who was originally naked, so the replica does too.
* The Museum of Scotland in Edinburgh houses a claymore—admittedly ceremonial—that is at least seven feet (a bit more than two meters) long in total.
* The Museum of the Weird, a collection of strange and often occultic items that would have served as a companion piece to
* The Museum of the Weird (the original iteration of which is covered under 'Theme

Parks') makes a sweeping return in
* The Museum of Tolerance in Los Angeles has an exhibit at the beginning before people enter where they show a video with a long list about groups people are prejudiced against, starting with common targets (such as other races or LGBT people) and going on to more obscure targets. At the end the visitors are invited to enter through one of two doors, one marked "prejudiced" and one marked "unprejudiced".
* The Museum of Witchcraft is the setting for one of the most terrifying sequences in the entire game: a squad of Gunners have sought shelter here after being pursued by some unknown threat, and while making your way through the museum, you get to see them getting picked off one at a time by an unseen threat somewhere on the upper floors - all while steadily getting closer to the killer.
* The Mushroom Kingdom U stage transitions between a grassy field, a mountain setting, a cloud world and a tower due to Kamek casting a spell on the arena.
* The "mushroom" steps contestants climb to jump into The Tank were also used for the Sewer Chute and Inside-Out.
* The MUSHU-Verse, Inviso-Belle's suit is salmon and grey compared to Danny's black and white.
* The MUSHU-Verse is subject to this by the cast of the other shows, especially those who had feelings for his super-identity.
* The Musical about how they'll help Malcolm kill himself because they're his friends.
* The Musical, a chronicle of Broadway musical flops of the latter half of the twentieth century (King himself reportedly liked it, though). Within the show itself, the pinnacle of accidental hilarity has to be "Don't Waste the Moon", a retread of the old "girls want relationships, boys want sex" chestnut with awesomely lame lyrics like "We would go bowling if you really cared / But you don't! ("I do!") You don't!"
* The musical adaptation does this to Dewey's boss Ms. Mullins. Aside from them kissing a couple times and them making her younger and around Dewey's age, this does not alter the plot that much from the film. This has some justification in that the original script did have the two ending up together.
* The Musical, Beth is the victim of a drink spilled down the front of her dress by Gussie "in her haste, or perhaps deliberately to get rid of her" (to quote the stage direction). Gussie thereupon makes a big scene about insisting that Frank's wife go upstairs and get herself a change of clothing so, of course, she can be alone with Frank.
* The Musical Chair has "My Guitar" by Jump, Little Children as its theme.
* The Musical, Cissy is disappointed when she meets up again with her first husband.
* The Musical cliptastic countdown special, which shows the top 10 favorite songs, voted by the viewers. In it, the villain Doofenshmirtz tries to hypnotize the "Live Studio Audience" with one of these. ("My name is doof and you'll do what I say... Woop Woop!") They get un-hypnotized when Agent P plays the number 1 requested song, which is "Gitchie Gitchie Goo" (and, as commented by Doof, "the never-before-seen extended version!")
* The Musical drops the "cowboy" classmate that Heather makes out with near the end of the film, and has Sandy reunite with her instead of hooking up with Michele.
* The MUSICAL episode "Once More, With Feeling" forces the town to run on the rules of Musicals. The characters are compelled to break into dance and/or sing about their private thoughts, misgivings, and secrets. Unlike in a normal musical, everyone around can hear their secrets. This forces characters to deal with problems they were repressing and moves the plot forward in leaps.
* The musical instrument known in English as the bassoon is named "fagotto" in Italian, "fagot" in Spanish, and "Fagott" in German. It's common to see these terms abbreviated in scores as "Fag."
* The Musical in the strip by that point (and tellingly doesn't even get a solo song). Notably, the 1999 Broadway revival completely revamped the libretto to replace Patty with Charlie Brown's sister Sally, a far more popular character.

* The Musical, Johnny sings "I'll Buy You A Star," whose verse declares that even "buckets full of diamonds" aren't big enough to promise.
* The "Musical Mice" sketch has a performer get on stage, introduce his musical mice, then starts making them sing...
* The Musical Musical: Usually in biopics about musicians and composers, and especially ones about people who have performed in stage musicals.
* the musical number about avoiding the sin of adultery... in a cartoon aimed at small children. (Skip to 5:10 in the video.)
* The Musical of Musicals: The Musical! inside him and murdering his tenants as revenge for destroying his artworks.
* The Musical of Musicals: The Musical!-like soliloquy about having a namesake son:
* The Musical of Musicals: The Musical! takes a classic theatre plot (a woman can't pay her rent) and presents it in the styles of Rogers & Hammerstein, Stephen Sondheim, Jerry Herman, Andrew Lloyd Webber, and Kander & Ebb.
* The Musical of Musicals: The Musical! ("Unlikable people with lives that are hollow / It's all food for thought, but a bit hard to swallow...")
* The Musical pics began to dominate at the end of this period as film budgets got bigger.
* The Musical point of view, rather than directly following the girls through the ages.
* The Musical, Princess Joanna has been renamed "Princess Mary." (On the cast album, she is "Sarah.")
* The musical replaces the film's "run by fruiting" scene at the pool with an aerobics number ("The Shape of Things To Come") at a gym.
* The Musical: Several operas have been adapted into musicals. Examples include:
* The Musical so as in the book. Bhaer finds Jo at Amy's wedding, on a day riddled with 'sun showers'. He proposes to her with the analogy of sharing a 'small umbrella in the rain'.
* The Musical sung by Ariel's sisters and Flounder about Ariel being in love, a scene that took 10 seconds in the movie.
* The musical's version of the restaurant scene is set at a Spanish restaurant and incorporates a flamenco song and dance("He Lied to Me").
* The Musical, there's a song called "96,000", which is all the characters fantasizing in counterpoint about what they'd do if they were the ones with the winning lottery ticket.
* The Musical, the song "Great Big Stuff" has Freddy is dreaming about all of the things he will buy (such as "a mink tracksuit") when he becomes rich.
* the musical version opens with Lola and Charlie as children, emphasizing how shoes have played a formative role in both of their lives. Charlie is aged up before the end of the opening song, while adult Lola shows up a few scenes later.
* The Music Box, Professor Von Schwarzenhoffen smashes the player piano that his wife bought for him as a surprise.
* The music choice for the chase scene is very odd, and in a case of what was most likely lazy animation, the characters simply go through the same doors over and over.
* The music company Jamster started gaining a lot of flack with people in the mid-2000s due to the animated character
* The music composer for the anime was heavily inspired by the Dutch
* The music composition software Finale PrintMusic, as well as the one for the
* The music for both "One Hand, One Heart" and "Somewhere" were originally composed by
* The music for Mickeyjunk Mountain includes a snippet from the theme song for
* The music from a musical box entrances the killer into a homicidal state of mind in
* The music group Mili's song "RTRT" has the narrator doing this in the song's final verse, heartbroken by the murder of her demon friend. She rebuilds him bit by bit, but even with her skills as a scientist is unable to revive him, so she pretends that maybe with the food and love that they shared he'll eventually come back. The song's image even shows her eating dinner with what's heavily implied to

be his
* The "music hall" (popular entertainment, mainly working-class, in the 18-1900s, a collection of songs and comic skits) is a rich mine of these characters: "Gilbert the Filbert", "the Knut with a 'K'", "Burlington Bertie" (the more famous ditto from Bow is a parody) and so on.
* The music, incidentally, is by a band named Anamanaguchi, whose members actually write music using an NES music tracker and play the resulting code on
* The music in the tutorial progressively loses pitch and eventually peters out if you choose to evade Flowey's "friendliness pellets" to his increasing consternation.
* The music Madoka is listening to in the first episode is the anime's theme tune.
* The music magazine Kerrang! published a readers' poll of the best British rock albums. Top of the list was the debut album by
* The Music Man and, it being the 1960's and she was unmarried, wanted to keep it a secret. So she worked with a very tight group of costumers to keep it hidden even from the rest of the production. By the end it had become an open secret, she even recalled after a kissing scene with Robert Preston (Harold Hill) he was very perplexed at the baby bump. In an interview, it is pointed out that if you look very closely during certain scenes, you can see the bump.
* The Music Man finds himself too attached to Marian to make the timely getaway from River City he had originally planned.
* The Music Man goes by the name of Harold Hill, but the last time Marcellus saw him, he went by the name Gregory. As such, he calls him Greg for the rest of the show. Played with in that the "wrong" name is actually his real name.
* The Music Man, Harold Hill convinces an entire town that a pool table is a tool of Satan to corrupt their children. He lists several "symptoms" that their children are being corrupted, which include a few things that would actually be worrisome if they happened, but also a few which were perfectly normal and harmless behaviors for teenage boys. (Like using slang words such as "swell".) In the end, he boils it down to a catchy little chant that runs on circular logic: "We've got trouble with a capital T, and that rhymes with P, and that stands for pool!" Just like in many real-life cases, this is a ploy to get the gullible townspeople to buy something: Hill proclaims that the way to save this town from falling into the clutches of evil is to start a boys' band... and Hill just happens to be a music professor (a fake one, at least).
* The Music Man, Harold Hill gets River City riled up over the idea that pool, just recently introduced to the town, will corrupt their children. He makes excuses for billiards, which River City already has, saying that it's the pockets in a pool table "that mark the difference between a gentleman and a bum."
* The Music Man, Harold Hill gets the members of the River City school board to engage in barbershop quartet bonding. They're singing together the rest of the show, despite a years-long grudge.
* The Music Man: Harold Hill organizes the four members of the River City School Board into a barbershop quartet that bursts into four-part harmony at the slightest excuse.
* The Music Man, Harold Hill shows up to talk to Marian Paroo, and her mother, hoping the two will get together, immediately bows out:
* The Music Man has a variant: "If You Don't Mind My Saying So" and the following number "Goodnight My Someone" both begin with Marian (and, in the first case, Mrs. Paroo) singing only over Amaryllis's piano practice, but the orchestra takes over the accompaniment as the songs get into their full swing.
* The Music Man has a whole song ("Ya Got Trouble") creating a moral panic by playing on fears of the pool hall and what it'll do to their children. Billiards is okay by Harold Hill, but pool is trouble.
* The Music Man. He's trying to expose a con man looking to run off with the townspeople's money and, as result, makes doing business impossible and even dangerous for the legitimate salesmen who follow.
* The Music Man is about a con man who, despite himself, ends up having a very beneficial effect on the people of a little town and falls in love, and ends up

feeling obliged to actually try and make good on his promises.
* The Music Man is a knowing parody of this trope, with a con man decrying everything that was new circa 1912 (pool tables, ragtime music, pinchback suits, Horserace Gamblin', modern slang "Words like 'swell', and 'So's your old man'", and a whole host of other things) in order to create an artificial crisis that he can solve "... with a wave of my hand, this very hand."
* The Music Man is built around this production, and claims that Goldblum's primary reason for doing something so atypical was to help his then-girlfriend get a green card.
* The Music Man is somewhat like pool, but it has no pockets.) Let's not forget though... pockets make the difference between a Gentleman and a Bum! That's Bum with a capital B that rhymes with P that stands for POOL!
* The Music Man, Marian and Winthrop Paroo's father died sometime before the start of the story.
* The Music Man Marian is dismissed by the mayor right before she is able to reveal that she has found out the truth about Harold Hill. To add to the enormity of this mistake, the events that take place in the five minutes before he remembers her are what dissuade her from blowing the whistle.
* The Music Man, Mayor Shinn attempts to introduce an act for the Fourth of July celebration.
* The Music Man—the books inside belong to Marian Paroo, the old man's only friend. It's implied that Madison did this because he realized that most of the people in town hate Marian; by making the library books her legal property, he guaranteed her a job for as long as she lives.
* The Music Man. Professor Harold Hill cons the citizens of River City into paying for uniforms and instruments with the promise that he'll train their children into a band. He does so using a "think" system which couldn't possibly work, but in the end the children learn to play anyway (albeit extremely out of tune) and he's saved from being punished.
* The Music Man, Professor Hill gives Tommy and Zaneeta Candy Kitchen money when he first meets them, and later on he personally sets them up in said Candy Kitchen, blindfolded, with one giant ice cream sundae and two spoons. It doesn't last long, as Mayor Shinn bursts in to break them up. Marian is also there, coincidentally, in a gigantic hat, and questions the Professor about the Think System over a strawberry phosphate.
* The Music Man prove to just talk, and it all turns out well in the end.
* The Music Man, right down to the crowd chanting "Cider! Cider! Cider!" like the original song's "Trouble! Trouble! Trouble!"
* The Music Man sets one of its scenes in an ice cream parlor. The movie is from 1962, though the musical is set 50 years before that.
* The Music Man sings a number about preferring "bad girls" because "good girls" want to tie men down in committed relationships.
* The Music Man the knee?" Like several of the following warnings, this was likely intended as a period cultural reference.
* The Music Man, the mayor mixes up a few words in his speech and ends up insulting his wife. The extent to which this is played up depends on the production.
* The Music Man. The only signs that it was made in the 21st century are the higher visual quality, the extensive racial integration of the town (and of some romances in the background), and one scene in which the mayor writes with his left hand, which would've been incredibly unlikely when the movie is set.
* The Music Man, though not actually clapping. Mayor Shinn asks if anyone thinks Harold Hill should be tarred and feathered, and says that if anyone doesn't think so, "Let him, by God, stand up!" First Mrs. Paroo stands up. And then some of the mothers. Lampshaded when Mrs. Shinn stands up, the Mayor tells her to sit down, and Mrs. Paroo hauls her up and they both stare defiantly at the mayor.
* The Music Man, Tommy Djilas frequently says "Jeely Kly." The movie version makes it "Great honk!"
* The Music Man uses this, but is justified by its setting being 1912. This causes some great comedy when all the parents are terrified by their children using such

foul words like "swell" and "so's your old man".
* The Music Meister: Characters who cause spontaneous dancing or singing.
* The Music Meister is shown playing a pipe organ to a cardboard audience, an indication that he
* The Music of Dolphins. However, the betrayals and confused feelings from the scientists studying her turn her away from them, and eventually she is allowed to return to the sea and her dolphin family.
* The music of the duet is titled on the soundtrack as 'Sparkling Harmony,' under the subtitle 'Affection.' It's not hard to read between the lines.
* The Music Of The Spheres. Telepathic scientist Melody (Anne Dansereau) is contacted by benevolent, poetic aliens who try (and fail) to stop a dangerous Earth project. The last shot in the film has Melody, invited to join them, standing alone, gazing up into brilliant light.
* The music played during Adult Swim bumps bear mentioning as well. The music, largely instrumental hip hop, trip hop and other relaxing, low-key electronica, has a large following (if you search "bump music" on
* The music playing when Ozai fought is basically one long series of Scare Chords.
* The music playing when Sasha dancers her way into the hangar in the first episode of
* The music retailer HMV has Nipper the dog, though he's not used much nowadays apart from being their website's favicon.
* The 'musics' who survived the battle also doubled as stretcher-bearers, carrying the wounded to the filthy and disease-ridden field hospitals, where
* The music that plays in the background when Not!Tommy and Not!Stu speak, while the voices of Not!Tommy and Not!Stu are a
* The music that plays when Jeff rides in the Sky Runner is taken from a song by
* The music video explains this a bit - the ukulele part was meant as a reference to
* The music video for Airbourne's "'''Blonde, Bad and Beautiful" plays with this using a spritzing Champagne bottle.
* The music video for "All About Us" by t.A.T.u, this is how one of the singers kills the man who almost raped, then beat and tried to kill her.
* The music video for "Bad to the Bone" by George Thorogood and the Destroyers has George in a pool match against
* The music video for Basement Jaxx's "Plug It In" takes place in a factory that manufactures lifelike sex dolls, with the duo themselves playing the incompetent security guards that inadvertently shorts them out.
* The music video for Belle And Sebastian's "Step Into My Office, Baby" contains various visual metaphors for sex.
* The music video for Boyzone's "Key to My Life" has the band as schoolboys, with one of them, played by Stephan Gatley, having a crush on their teacher.
* The music video for Cher Lloyd's "I Want You Back" has the romantic rival accidentally spilling food on herself. Everyone else in the restaurant points and laughs, and she starts to scream with rage.
* The music video for "Comin' To Life" at the end of the episode "The Wiggies/Rapunzel/Hair to Stay" had the audio sped-up slightly when the show began airing on
* The music video for "Cupid's Chokehold" by Gym Class Heroes implies this about the protagonist. With each verse describing how great his girlfriend is (one lyric is "I know I'm young but if I had to choose her or the sun/I'd be one nocturnal son of a gun"), a different woman is shown.
* The music video for George Ezra's "Blame It on Me" features rugby players engaged in what looks like a cross between a ruck and a scrum, played with an American football.
* The music video for Green Jelly's "Three Little Pigs" invokes the trope offscreen, as the camera pans over a seedy part of town and passes by a movie marquee playing a film called "Her Thing Had Teeth".
* The music video for Karma Police by Radiohead ends with the running man exhausted and the car on fire. The driver could easily kill the running man, but

even still, he would die himself. And Nigel is gone, so there's even less of a chance for him.
* The music video for Katy Perry's "I Kissed a Girl" ends with her on the bed next to someone whom we are to assume is her boyfriend.
* The Music video for 'King Rat' depicts this between whales and humans.
* The music video for Lari White's "Take Me" opens with her trying to get a child to pronounce her first name correctly (LAH-ree).
* The music video for Lisa Lougheed's version of "Run With Us" employs stock footage from
* The music video for LOLO's "Hit and Run" depicts the singer murdering a group of men one by one, in what is ultimately revealed as a
* The music video for Mikas "Rain" opens with the singer lying in a tent in the middle of a forest and then shows a milk carton with his picture and the text "Missing", his name and a phone number, thus implying that he has run away.
* The music video for "Obsessed With You" by The Orion Experience plays this trope for laughs. The entire band constantly follows a girl around, the lead singers even get into bed with her. She eventually kicks them out, but gets lonely and invites them back in, happily singing along at the end of the video.
* The music video for "Ooh Aah... Just a Little Bit" by Gina G was directed by someone named "Fruit Salad" (probably
* The music video for OOMPH!'s song Träumst Du? Has a Grounds Keeper or Janitor pleasuring himself over the surveillance he has of the
* The music video for Papa Roach's "Between Angels And Insects", in which cockroaches come out of Jacoby Shaddix's mouth when he screams.
* The music video for "Poor Leno" by Röyksopp shows a strange bear-like creature doing this to another similar creature in a zoo pen.
* The music video for Semisonic's "Closing Time" shows the singer and his wife trying to find each other in a neighborhood through two separate
* The music video for "Sk8er Boi" inadvertently resulted in a massive demand for Wilkesboro Elementary School shirts, much to the school's surprise and delight.
* The music video for Smash Mouth's "Waste": the guy doesn't show because he's been beat up by the mob and stuck in the restaurant freezer. The girl winds up leaving the restaurant while he falls into despair.
* The music video for SoulDecision's "Ooh It's Kinda Crazy" involves a scene where two band members try disguising themselves as mechanics to walk through a crowd of crazy fangirls, wearing blue jumpsuits, caps, glasses and fake mustaches that match their hair color. Naturally, one of the girls in the crowd isn't fooled by their disguises, and calls them out.
* The music video for Spineshank's song "Smothered" is shot from multiple perspectives of hidden cameras hidden throughout the room. Towards the end, after the band start discovering said cameras, one of the band members is shown to put one of these cameras in their mouth, before the camera disconnects.
* The music video for Squirrel Nut Zippers' "The Ghost of Stephen Foster" (styled like an old
* The music video for the infamous Tunak Tunak Tun featured four versions of the singer, Daler Mhendi, that represented the four classical elements.
* The music video for the Nine Inch Nails song "Closer" features a heart on a board attached to a bunch of electrodes.
* The music video for the song 'Fantasy' by Dye. It starts off innocently enough, with four teens (two girls and two boys) breaking into a swimming pool to fool around a bit. One pair of teens starts to get rather
* The music video for "The Wolf" by SIAMÉS ends with one of the three protagonists charging head first into a pack of demonic wolves.
* The music video for Weird Al’s “Don’t Download This Song” implies that if you illegally download music, you’ll be electrocuted in the chair.
* The music video has the band playing in a gingerbread house surrounded by three giant women clad in candy-coated bikinis. The song ends with one of them reaching in and picking up lead singer Danny Sexbang for the final chorus, giving him a

smooch as the video cuts to black.
* The music video "I'm on a Boat" involves Andy Samberg discovering a coupon for a free boat trip for three in his cereal.
* The music video "Joy" by the R&B group Blackstreet is focused on this trope. The lyrics to the song itself can be interpreted as being about a female romantic partner or any beloved female person in general.
* The music video makes it more explicit, with her gaining a moment of clarity at the end and committing suicide by drowning.
* The music video of Chromeo's "Come Alive" sees David Macklovitch, Patrick Gemayel, and Toro y Moi as respectively a passerby, security guard, and janitor walk around a department store where various female mannequins come to life and dance along to the song. Despite the mannequins also dancing with the security guard, the ending suggests the mannequins weren't alive after all when the security guard catches the other two feeling up regular mannequins and throws them out.
* The music video of "Die Summe der einzelnen Teile", best known song of Hamburg school band "Kante", has some pseudo mummys (de facto normal people with a lot of bandage) running around.
* The music video of the song "Dancing with Tears in my Eyes" by the band Ultravox features a nuclear power plant accident which should result in an explosion according to some warning signs. The explosion is implied to even hit a house which is in a rather large distance to the power plant. (And killing the family of the plant worker which is the protagonist of the video.)
* The music video of Wir sind Wir. The photographer is there during the reconstruction post
* The music video plays a straight example in the final chorus; after spending the rest of the video watching tragedies and crimes unfold around him, the point-of-view character stops a child from running into the street after his toy and getting hit by a truck. The child's mother, too distracted by her phone, never notices the peril or the rescue.
* The music videos for Chamillionaire's "Ridin'", and his less-famous "Hip Hop Police" feature Chamllionaire being harrassed or
* The Music Video Show: "First of all, and I can't stress this enough, ROCK MUSIC DOES NOT HAVE AUTOTUNE!"
* The Music Video Show goes to prison to perform a few songs for the prisoners.
* The Music Video Show had a few episodes in season five where Laine has his shirt off for now reason.
* The Music Video Show'' had theme songs for three and a half seasons from a band called The Carps.
* The Music Video Show has the host sit on a black couch since season two. It was changed to a light brown futon in season three.
* The Music Video Show has this near the last part of the 300th episode. The words: "Okay, I've done 300 episodes of this show. Let them go." Cue a nice surprise for fans the channel's movie reviews.
* The Music Video Show has this trope near the end. The excuses go from believable ("We were robbed.) to impossible ("We were robbed by ghosts.")
* The Music Video Show: "I am the Paper Bag Princess. I am the Paper Bag Princess." This only happened a couple of times.
* The Music Video Show is also this. The show is where one guy reviews one music video a week, points out the flaws in the video and, occasionally, the lyrics. In the end, he states whether or not he would watch it again.
* The Music Video Show is shown passed out drunk in episode 24 and is the reason why he got through three Chris Brown videos in a row.
* The Music Video Show is where one reviewer watches one music video once a week and points out various flaws in them. Since the fourth episode, he decides whether or not he would watch it again.
* The Music Video Show page, all but 4 seasons have been made out of anger, depression or suicidal thoughts.
* The Music Video Show released the very next month. The current ninth season, released the next month, has pushed the show to over 200 episodes.

* The Music Video Show started in 2013, splitting itself into (mostly) 25 episode seasons. With each episode being 3-6 minutes (sometimes over that) and it being a weekly show, it has over 200 episodes, a bit daunting for those starting out from the beginning.
* The Music Video Show that involved a drinking game? That was actually Jack Daniel's. And he REALLY did get drunk.
* The Music Video Show This reflects Kareem's attitude towards the second season.
* The Music Video Show when it references a meme that he possibly does not understand.
* The music videos, tour antics, promotional materials and overall atmosphere generated by
* The music video that started with some teenage girls noticing that their friend's relationship must've gotten serious as they saw a "diagram" in her purse...
* The music video to Angus And Julia Stone's "I'm Not Yours" portrays the molly cat as having
* The music video to Mya's "Movin' On" is vague on how old the characters are. They go to a school called
* The music video to Stone Sour's "Bother" features two copies of the singer Corey Taylor, one of them ages rapidly and disappears.
* The music video to the 1989 hit "Chorando se foi (Lambada)" by the French pop group Kaoma, which made the Brazilian Lambada dance style an instant world craze, features the mutual
* The music your rides play do this whenever they break down. Actually justified with the carousel, as they often contained mechanical organs that ran on compressed air. The various other styles of recorded looping music that other rides can be set to play... not so much.
* the Musketeer after he defends Raguenau’s honor. The Musketeer did not take the bait.
* The Musketeers aired in several Eastern European countries and Canada, as well as being made available via Hulu in the US, over a month before it finally premiered in the UK.
* The Musketeers, a minor character called Elodie turns up in search of Porthos, the only Musketeer that hasn't had a long-term romantic arc. They had only met once before in the series, during which Porthos helped deliver her baby, and promptly get hitched upon their reunion. The actors play it with as much grace as they can muster, but it still feels a little random.
* The Musketeers) and deludes himself into believing that she is in love with him when in reality she sees him as an old friend and mentor figure.
* The Musketeers and the Red Guard loathe each other and would love nothing more than to see the other humiliated. It doesn't help that their leaders Treville and Cardinal Richelieu consistently clash with each other.
* The Musketeers, Aramis is the best shot of the group, and a very cheerful sociable person.
* The Musketeers: Athos's ex-wife Milady de Winter (also an assassin and con-artist) is sentenced to death by hanging for murdering Athos' brother Thomas, but manages to escape. According to her, Thomas was attempting to rape her, so she killed him in self defense. Due to her untrustworthy nature, however, Athos and the other characters don't believe her, and Athos thinks she was simply trying to scam him. However, when Athos asks her if this is true, she seems to be telling the truth about what happened.
* The Musketeers: Averted in the third episode when Bonnaire tries to escape the Musketeers' custody by galloping off on his horse, only for it to stop moving completely after a few miles. When D'Artagnan, who grew up on a farm, catches up he smugly points out that if Bonnaire hadn't overworked the horse he might have got away.
* The Musketeers by making the audience briefly think that he's seriously in danger until it's revealed who the other person is.
* The Musketeers by the proto-feminist character, Comtesse De Larroque. "You are a

contradiction Monsieur Aramis, a soldier who preaches love and a famous libertine who cherishes women."
* The Musketeers: Cardinal Richelieu exclusively wears either entirely black robes or (for more formal occasions) bright red ones.
* The Musketeers gets decked out in leather and Aramis gets a long form-fitting leather frock coat ("flowing" and "sensual", according to the costume designer).
* The Musketeers has this in the episode "The Return", where Athos is dragged back to his lands by the tenant farmers, who want him to reclaim the title of Comte de la Fère to protect them from a baron who sees the land as abandoned. Instead of reclaiming his title, he gifts the land to the people and the Musketeers train them to fight so they can keep it.
* The Musketeers. He runs into her again in season 1 only for her to die shortly after. In the season 2 premiere he worries that this fate will befall the Queen.
* The Musketeers in bed with Cardinal Richelieu's mistress. As they're getting dressed the Cardinal arrives unexpectedly which sends the mistress into a panic. She persuades Aramis to climb out the window to avoid being caught. He avoids the Cardinal but Athos and Porthos walk past and make fun of him for his antics.
* The Musketeers of Athos, Porthos, Aramis and D'artagnan, the rest of the Musketeers garrison is just as competent in their training and missions.
* The Musketeers opens with the musketeers at the front of the war with Spain, and Athos arguing with a general who wants them to keep charging at the enemy despite the fact the Spanish have cannon and they don't.
* The Musketeers rapier and dagger combo. They also branch out into two pistols, musket and pistol, and two rapiers on occasion.
* The Musketeers, Rochefort thinks this is the case with Queen Anne, who he mentored as a child. Unfortunately, she does not return his feelings.
* The Musketeers started with Porthos waking up beside the body of a murdered young man with no memory of the night before. He's instantly arrested and trying to figure out the truth is a major plot ploint.
* The Musketeers, takes place in France but was filmed in the Czech Republic.
* The Musketeers, the Musketeers and Athos in particular was framed for murder and robbery. Aramis and Porthos set out to clear his name and D'Artagnan becomes involved since his father was one of the murdered.
* The Musketeers to send a message to Athos, and then says that she deserved to die for bringing children into the world to suffer, not as any kind of "shocking" posturing but simply as a calm statement of fact.
* The Musketeers, up to and including Captain Treville. Special mention to Athos who is considered the best in the regiment, with his protege D'Artagnan considered a likely successor.
* The muskox is not a bovine, it's actually more closely related to sheep and goats than to cattle.
* The Mutalith Vortex Beast uses the multiple tendrils of warp-putrefied flesh that extend from its hideous maw to rip its victims apart and draw their remains down its gullet.
* The mutant called the Reanimator, who can control anything electronic (such as
* The mutant Multiple Man actually needs to be attacked to activate his powers. So he either has to provoke someone, or outright beg to be attacked. Well, he needs to be hit, but the trigger is sufficiently sensitive that punching his own hand would do it. He only actually needs someone else to punch him if he is very tightly restrained. Of course, sometimes he might let someone hit him for the intimidation factor or for laughs.
* "The Mutants", an alien transforms through several stages from a humanoid, through a lobster-like creature, to a glowing, floating alien. For most of the transformation, the camera shows a close-up of his hand, only requiring work from makeup and costumes for the hand rather than full-body work that would only be seen for a few seconds.
* The mutants are a Fearsome and Clearly Inhuman example. They are people mutated by toxic waste and their children are almost always born horribly mutated. The law forces them to live in the sewers because they're so hideous.

* "The Mutants Are Revolting" has Lady Astor's asteroid. It's got both an atmosphere and normal gravity, yet it's so small that when Bender backs up to take a running leap over a canyon, he accidentally walks past Lady Astor's mansion and over a rickety rope bridge without realizing it.
* "The Mutants Are Revolting" looks at the fashion of the 30th century, just prior to the show's 31st setting. It looks like 20th century fashion (top hats and tails and so on), but, naturally, with more hovering rings on everything.
* The Mutants are Revolting", where they rise up out of the sewers and demand the right to live in the sun.
* "The Mutants" become near-omnipotent beings... in reaction to their planet experiencing summer.
* The mutant Scrambler has the ability to disrupt any system with physical contact, including
* The Mutants, Human Mutates, Atlanteans, Eternals, Deviants, and Inhumans. These came about via (in order)
* The Mutants" turns out to be an aversion. The supposedly mutant Solonians are in fact undergoing a natural metamorphosis as part of their life cycle. What's more, the insect-like "mutant" form is merely an intermediate stage, and the final form is a powerful, god-like being.
* "The Mutants" works with the imperialists against his own people, killing the Earth Administrator before he can grant Solos their independence and scornfully hunting his mutated countrymen who he refers to as "mutts", adopting the slurs of the imperial Overlords.
* The mutant who uses the nickname Blue has an area of cyberspace mapped out like
* The mutated creatures in vats at Raven Rock, some of which are never encountered anywhere else in the game, leave their purpose to speculation.
* The mutated monster known as the Mutalith Vortex Beast became part of the
* The mutates. Normal humans transformed into anthropomorphic beasts by the unscrupulous Doctor Anton Sevarius. In case of Derek/Talon and his companions Maggie, Fang and Claw, they're turned into feline beast men (and woman) with enhanced strength and senses, bat wings allowing them to fly (as opposed to the gargoyles, who can only glide in air currents) and the ability to generate and shoot electricity, and later there is Wolf from The Pack, transformed into what looks like a werewolf, which instills him with superhuman strength, heightened senses and the ability to see in the dark. It's shown that Talon, Maggie and Claw do not like their new forms and wish they could turn back to humans, which they cannot unless an antidote is produced, which Sevarius refuses to, whereas the two villainous mutates, Fang and Wolf, are shown to love their new forms and wish to remain as they are.
* The mutating ore formed from congealed dark magic is called warpstone. Used for a variety of nasty rituals and weapons, it originally fell (and is still falling) from the sky.
* The "Mutations" toylines have transformations from mutant form to human form, turtles transforming into oversized turtles, or in the "Mighty Mutations" series, a dump truck.
* The Mute Girl And Her New Friend: A story of a mute girl befriending a girl with telepathy.
* The Mute Girl And Her New Friend new friend Kokosaki feels without Kokosaki having to say it outright.
* The Muten Rōshi's rival, the Crane Hermit, also wears shades to signify the audience their connection. The only time we don't see him without his shades is in one flashback where he was bald.
* The Muten Roshi's rival, the Crane Hermit, is also well known within the martial's community. He is seen as the Muten Roshi's equal.
* The Muten Roshi. When he was introduced, he was revered as the God of Martial Arts and
* The Muten Roshi (which means "Heavenly Martial Arts Elderly Master"), who is the founder of the Turtle Style School and the inventor of the Kamehameha. While he's long since been surpassed in sheer strength by his pupils,

* The Mutilator a character mentions his father once caught a shark and slit it open, causing roughly a dozen or so baby sharks to messily spill out.
* The Mutilator grew up with a crazy abusive alcoholic father who would beat him, and one day while fooling around with one of his father's guns accidentally shoots and kills his mother. In the present day he displays no signs of trauma or PTSD, he seems like a happy upbeat young man hanging out with his friends. While he does bring up to them how much of an abusive nutcase his father is, he seems to harbor no ill will towards him, that is until he starts murdering his friends.
* The Mutilator is set during "fall break", which implies that it takes place around Thanksgiving since that's when most American schools tend to have a fall break.
* The Mutilator: "Why am I whispering? There's absolutely no one on this island but us."
* The mutineer Karl Tanner gloats about keeping Jeor Mormont's skull as a wine cup.
* The Mutiny: Insurrection aboard a ship against the ship's captain or commander.
* The MUTOs are black with glowing red markings. Godzilla's dorsal plates begin to light up blue, just like they do in the TOHO films. The new film adds in the plates glowing blue from the tail up, à la
* The Mutter Museum of Medical Anomalies in Philadelphia. Has, among other things: an entire wall-length and height display of human skulls, a woman whose body turned into soap after she died, all sorts of floating things in jars, and the largest human intestine ever.
* The mutual admiration between Hispanic and black culture intensified during the decade, while a "Latin craze" surfaced across the US beginning in 2016-17 as a pushback against growing anti-immigration sentiment in the country, with Mexican cuisine gaining popularity and Spanish-language songs and acts becoming successful in the mainstream charts.
* The Mutual Progress Association, one of the superpowers of the Orion Arm, likes building Big Dumb Objects. One of their more impressive projects is Kepleria, a series of
* The Münchausen: Someone who goes on and on about their unlikely adventures, either because they're lying, insane or even telling the truth.
* The MVC got involved in this snarl in the same year when its member schools formed the Gateway Collegiate Athletic Conference, a separate though related league specifically for women's sports.
* The Mwa Mwa Penguins you can find at the Pet Shop in Club Penguin embody this trope.
* The MX (Peackeeper) missile was supposed to have post-launch re-targeting ability: its warhead bus (post-boost stage, responsible for individual targeting of warheads) was supposed to be reprogrammable in flight. On practice it means, that it could receive coded command to change one target list for another, as long as warheads were still attached to it. In theory, it was supposed to gave US officials additional time to think; they could launch missiles on warning (thus avoiding the danger of them being caught on ground), observe the enemy attack hits, and then issue the orders to already-launched missiles - exactly which enemy targets to attack. However, it seems that this system was never actually deployed.
* The Myamoto Project, a clone of Myamoto is produced from her blood. This clone has memories of Myamoto's.
* The Myamoto Project. Giovanni sends Myamoto's clone to kill Jessie and her teammates. The original Myamoto was Jessie's deceased mother.
* Them! you can barely see the characters for all the cigarette smoke in the room.
* The myriad English dubs only cover select seasons, not the entire show.
* The myriad laws of conservation mean that, as far as Science can tell, every technological advancement comes with a laundry list of drawbacks that weren't present in earlier devices. The key (and some might say the
* The myriads of Lutheran church chorales used by Bach for his chorale cantatas and chorale preludes have often been misattributed to Bach, except probably
* The myrmecoleon has the forequarters of a lion and the hindquarters of an ant.

Its existence is paradoxical and, because the lion will only eat meat and the ant only digest grain, it its doomed to starve.
* The Myrmidons makes Achilles the elder, Patroclus his beloved younger boyfriend. Homer, for that matter, does not state that the two were lovers, but the later Greeks assumed they were.
* Themyscira vanish on the island instead of their harmful effects and then losing even that.
* The Mystara setting has Meks, which are unapologetically giant mecha, built by some long-vanished insectoid race.
* The Mysterians are desperate to conquer the Earth because they destroyed their original homeworld in a nuclear war and their Martian colonies are running out of resources.
* The Mysterians interestingly also has two different French versions. Like the situation in the U.S., there is a theatrical version based on RKO's cut, and a later home video dub based on the Japanese version.
* The Mysterians. Unusually, the saucers are not always perfectly circular and rarely spin around like they usually do in western depictions.
* The Mysterians wore capes along with their bitchin' motorcycle helmets. When earth scientists visited their domed spaceship, they were presented with capes as well to accommodate "temperature and atmospheric differences" (i.e., it's cold).
* The Mysteries of Alfred Hedgehog is a benign junior version of this trope.
* The Mysteries of Alfred Hedgehog teaches about animals, plants, geology, and other natural phenomena.
* The Mysteries of Laura has the team investigating the murder of a fertility doctor. Laura and her ex-husband Jake go undercover as a couple where the doctor shows an ultrasound of Laura pregnant. As the two aren't together (and Laura hasn't been with a man in months), they know it's a fake and figure the clinic is scamming women by making them think they're pregnant, charging them for expensive treatments, then a drug that replicates a miscarriage. Eventually, Laura finds the killer to have been a husband whose wife had undergone several of these fake "pregnancies". He reveals he figured it out as he's a film editor and on the third go-around, realized the "ultrasound" was the exact same footage as the previous two times.
* The Mysteries of Laura, she is visiting a racetrack to investigate a crime, and noticing a lot of what could be described as "dirty old men" accompanied by comely young ladies, whose companionship is ostensibly obtained via cash or credit cards:
* The Mysteries of Laura the title character (a police detective) is shown in a room where something red has been splashed all over the walls. She says that this is "a depraved and unspeakable act" and that the perpetrator will be "inside for a long time." It turns out that her two young sons were throwing paint around at preschool, covering both the walls and themselves.
* The Mysteries of Pittsburgh, Arthur Bechstein constantly describes Arthur Lecomte's appearance in obsessive detail, commenting on his shoe brand, the stubble on his jawline, the color of his chest hair and the way he blushes, among other characteristics. He even admits that he's fixated on him hours after meeting him, after a page-long soliloquy on Lecomte's homosexuality. It doesn't really come as a shock to anyone when they do it, though it takes about 2/3rds of the book to get there.
* The Mysteries of Udolpho, the heroine Emily goes into her recently deceased father's study and sees a shadow which she believes to be her father's ghost. It turns out to be the family dog.
* The Mysterious Affair at Styles also employed this plot device, but with an extra twist.
* The Mysterious Affair at Styles foils this plan by refusing to allow the man's arrest until he has true evidence of his guilt.
* The Mysterious Affair at Styles say "What a lot of bottles!", and correctly predicts that his next comment would have been "How many people have you poisoned?"
* The Mysterious Affair at Styles (September 15, 1890, which is pretty close enough).

* The Mysterious Affair at Styles, the killer uses a very convoluted method and an obvious one for which he has an unbreakable alibi. He intended to be tried for the obvious method and produce his alibi because the British law prevents you from being tried twice for the same murder. Unfortunately, he blabbed too much and Poirot saw through his ruse.
* The Mysterious Affair at Styles: the motive was money, and the murder was committed just as the victim was planning a separation.
* The Mysterious Affair at Styles to be guilty of the crime and tries his best to hide evidence against her. This comes as a nuisance to the real murderer, who wanted to pin the blame on someone else.
* The mysterious aliens known as Watchers in the Dark, who often follow high ranking
* The Mysterious Benedict Society and the Perilous Journey is focused largely around Mr. Benedict and his evil twin's attempts to acquire another rare plant, duskwort, which has the potential to cure their narcolepsy when mixed when other substances. In its normal form, however, it's an extremely potent plant that, when burned, releases smoke that can put entire villages to sleep, but it only thrives under very specific conditions. However, it it easily overtaken by thwart-wort, a clever mimic that looks just like it, but has none of the same useful chemical properties.
* The Mysterious Benedict Society are we supposed to distract the Helpers?' 'Just be yourself,' Kate said with a sigh."
* The Mysterious Benedict Society. As part of their spying, Reynard "Reynie" Muldoon and George "Sticky" Washington are made Messengers, which means they actually get to sit in the Whisperer across from Mr. Curtain and use it to broadcast messages, and also have it soothe their fears. Mr. Curtain has programmed the Whisperer to detect surface thoughts because he knows that fears lurk close to the surface and are easy to detect. When they take their first turns in the Whisperer, Reynie and Sticky try to hide certain stuff, as they're afraid that Mr. Curtain can detect their thoughts. It's fortunate that he can't, as they have no success in hiding them.
* The Mysterious Benedict Society, at the very beginning of their adventures, Mr. Benedict tells the Society that the most important thing is that they must, in all things, be a team. And, indeed, it is only by being a team that they are able to eventually defeat Mr. Curtain.
* The Mysterious Benedict Society books. Mr. Curtain has gone to great pains to protect it and it would take a long time to rebuild it if it were destroyed.
* The Mysterious Benedict Society describes it as sitting in a dark, quiet room full of extremely horrid smelling mud and being surrounded by bugs.
* The Mysterious Benedict Society girlfriend dumps him for remarking on her "pulchritude." It means beauty.
* The Mysterious Benedict Society know what it is that they say and Reynie says "If you don't trust them, keep them close." This amuses Mr. Curtain, but also makes sense to him, and it throws suspicion off Reynie, while also serving Reynie's purpose of allowing Constance to stay at the Institute. Later, Mr. Curtain keeps around Martina Crowe on the same principle, even though Sticky tells him that she forced him to help her cheat, and he believes him.
* The Mysterious Benedict Society Later, Milligan gets captured and sent to it and it turns out to work to the party's advantage. He is able to hold his breath and sink down below the mud and then escape.
* The Mysterious Benedict Society (Minister and Secretary of All the Earth's Regions.)
* The Mysterious Benedict Society. Mr. Benedict recruited children because he needs them for his dangerous missions that only kids can go on, however would ideally avoid putting kids in harms way.
* The Mysterious Benedict Society, Mr. Curtain, enjoys ramming through doors in his souped-up wheelchair. The super-secret areas, however, are protected by numeric keypads, and no amount of kicking will get you through them. This is something that Sticky Washington, another of the protagonists, discovers to his chagrin before the

keypad is spotted.
* The Mysterious Benedict Society, Mr. Curtain's messages are broadcast on every television signal, every radio signal, every wireless signal in every language. Most people don't notice them, though, because they broadcast using children's thoughts so that they may hide insidiously in people's minds.
* The Mysterious Benedict Society, not any of the adult characters, so it might not even be correct.
* The Mysterious Benedict Society, Number Two reads off the list of children who passed the test in the session taken by the main/point-of-view character Reynard "Reynie" Muldoon.
* The Mysterious Benedict Society, Reynie Muldoon (the main protagonist) actually pitched the radio out of a train because he mistakenly did not consider the person on the other end to be trustworthy.
* The Mysterious Benedict Society, Sticky hops up and down after trying and failing to kick open a door.
* The Mysterious Benedict Society. Students at the Learning Institute for the Very Enlightened are generally terrified of being sent there, but most have no idea what it even is. It turns out to be just a room full of very stinky mud with a lot of bugs swarming around, and none of them are actually dangerous.
* The Mysterious Benedict Society, Tai Li asks Crawlings if he's really going to drink the serum, knowing that Mr. Benedict needs a dose of it to cure himself. Crawlings gazes at him, seeing his eyes wide with innocent disbelief.
* The Mysterious Benedict Society, "The children had never determined if the two Executives were brother and sister, boyfriend and girlfriend, or simply partners in crime. They didn't even know them by any names other than Jackson and Jillson — which could have been first names, last names, or nicknames."
* The Mysterious Benedict Society, the final test which the main characters are put through in order to qualify for the mission is a maze of identical rooms. Reynie identifies a pattern of arrows (there are several different arrows in each room, each pointing different directions), while Sticky blunders through at random, memorizes the route instantly, and completes it perfectly when he tries again, but Kate simply opens up a heating duct and crawls straight through.
* The Mysterious Benedict Society, this is inverted from the normal manner of things when Milligan, a special agent, actually hijacks a police car by flashing his superior credentials.
* The Mysterious Benedict Society to save the world. They don't have prior training besides being taught morse code so it leans on Bathtub Gin.
* The Mysterious Benedict Society: Unusual plants play a large part in the adventures, thanks in part to Sticky's particular talent for recognizing the obscure plants he's read about in his books.
* The Mysterious Benedict Society was better off without them because of how badly they had messed things up.
* The Mysterious Benedict Society, which is set many years later than the original trilogy, he decides to start asking his friends to call him by his real name. By the end of the book, however, he admits he can't get used to it and decides that he will be known as "George" for legal purposes and to those who don't really know him, but to friends and family, he's "Sticky."
* The mysterious Bronze Age Indus civilization reached levels of technology, health, and urbanism not reached again until the Middle Ages (in India) or later. For just a bit of perspective, the ancient city of Mohenjo-Daro had a better sewage system than nearby Karachi does today.
* The Mysterious Case of Neelix's Lungs mostly teaches classical swordplay to build aggression.
* The Mysterious Chronicles Of Oz tweaks the names of the lands in Oz. Munchkin Country is "the Land of Sky Blue Waters", Gillikin Country is "the Land of Purple Mountains", Winkie Country is the "Golden West", and Quadling Country is the "Rosewood Meadows".
* The Mysterious Cities of Gold: After Ambrosius gets information regarding the fourth City of Gold, he gets his informer executed, even though they were once

friends.
* The Mysterious Cities of Gold also makes a holographic message of himself as part of a trap.
* The Mysterious Cities of Gold. Although their relationship isn't overtly romantic, Esteban and Zia are an adorably inseparable couple. They're always holding hands, Esteban is always protecting her and whenever something scary happens they always cling together.
* The Mysterious Cities of Gold, an alarm goes off when the third City of Gold starts sealing itself due to the volcano it's nestled on, coupled with a woman on the P.A. counting down the minutes before the lockdown finishes.
* The Mysterious Cities of Gold: Averted. From Menzoda's cape to Zia's hair, everything flows beautifully.
* The Mysterious Cities of Gold) but has almost nothing in common with it. There are characters named Zia, Esteban, and Mendoza, and they are looking for the Cities of Gold; that is more or less where the similarities end. In the book, Esteban is a teenage mapmaker, Zia is a tough tomboy who volunteers to help the Spanish expedition, Mendoza is not a nice person, there are no medallions or hidden temples or puzzles or mysterious Olmecs at all, and so on.
* The Mysterious Cities of Gold, but is called the former in the English and Japanese version. In the French version (and remember the series authors and producers were all French) she is correctly called "Malinche".
* The Mysterious Cities of Gold certainly seemed to think so, especially when Esteban is in the process of getting out and waving hello to them when he remembers where he is.
* The Mysterious Cities of Gold Cibola gains his own holographic avatar, resembling an Inca warrior wearing orichalcum armor and a high-tech flight helmet.
* The Mysterious Cities of Gold ends like this, with Esteban, Tao and Zia setting off on the Golden Condor to find the remaining six Cities of Gold.
* The Mysterious Cities of Gold, Esteban and the others free the enslaved Indian villagers from the Order of the Hourglass.
* The Mysterious Cities of Gold, Esteban cries into Mendoza's chest after Zia, Tao and Kokapetl are apparently blown up along with the solar ship, Solaris. However, Zia, Tao, and Kokapetl have survived the explosion (they were protected inside the Solaris's control room), though Tao is visibly upset at the loss of his ancestors' ship.
* The Mysterious Cities of Gold features a scene where main characters Esteban and Tao decide to take such a dip in the river of a friendly village they're staying at. Season 2 sees Zia get enjoy this too, and even use the opportunity to play a prank on the boys.
* The Mysterious Cities of Gold, from mooks and red shirts to many important non-protagonist characters, from things like cannons, fire, guns, arrows, spears, swords, the kind of wounds you'd expect to be nasty and bloody...
* The Mysterious Cities of Gold has The Alleged Ship — the Esperanza is a rotten, leaky old wreck that somehow hasn't been scrapped yet. How they expect her to survive the Straits of Magellan is anyone's guess. Amazingly, they do survive the straits. The storm they encounter afterward, however...
* The Mysterious Cities of Gold. He's not too keen on it himself, though.
* The Mysterious Cities of Gold: In season 2, a Chinese pirate barely escape from a river enclosure filled with alligators (where the other pirates threw him for incompetence, only for a baby alligator to bite him in the butt just as he is exiting the river.
* The Mysterious Cities of Gold: In season 4 episode 24, Zares throws a smoke grenade inside the Golden Condor, and in the ensuing brawl Gaspard is sent smashing face-first against the cockpit before sliding down.
* The Mysterious Cities of Gold in the backstory. The second series reveals that Esteban is a descendant of the Atlantians, which briefly causes conflict between him and Tao, whose ancestors came from Mu.
* The Mysterious Cities of Gold is a charismatic explorer who claims to be the one who brought Esteban to Spain as a child, and now wants him to return and use the

power of the locket to help find the titular cities.
* The Mysterious Cities of Gold is far superior to what is produced now, even by the European nations. They have boats moved by solar-powered engines while Europe has not even discovered the steam engine yet.
* The Mysterious Cities of Gold is seen snooping around Ambrosius's airship. Later on the season, that same person captures Mendoza and steals an artifact from Ambrosius thanks to Mendoza's aid, leading fans to think Mendoza is a traitor. Eventually it is revealed that person isn't Zares, but the Traveling Prophet. He just happens to wear similar clothes to Zares', and he needs that artifact to cure his radiation poisoning.
* The Mysterious Cities of Gold is set around the conquistador times, and is about men in search for El Dorado, and cities full of Gold. While their are some semi-mythical elements (such as Esteban being the "Child of the Sun" and that the imperial-age Quechua Nation have fairly sophisticated fantasy-esque technology), it was always kept in the theme of the period and explained in terms of what was available at the time. Then out of nowhere, the aliens are revealed and watching the protagonists on television screens...
* The Mysterious Cities of Gold: It wasn't enough that Esteban, Zia, Mendoza, Sancho and Pedro were stranded on a flimsy raft in the middle of the ocean. They had to be attacked by sharks as well.
* The Mysterious Cities of Gold, Mendoza, Pedro, and Sancho lose their chance to escape from the Daimyo for the sake of rescuing some helpless children. Their actions prompt the feudal lord to spare their lives and keep them prisoners rather than executing them.
* The Mysterious Cities of Gold, Pedro and Sancho boast that they mastered kung fu by watching the Shaolin monks train. No-one is impressed.
* The Mysterious Cities of Gold, rainbow light causes the Golden Condor to malfunction and crash down on the ground.
* The Mysterious Cities of Gold season 2, Sancho and Pedro are running around in a bamboo forest trying to lose a Chinese pirate chasing them, only to finally end up smashing into each other, knocking themselves out.
* The Mysterious Cities of Gold, some of the main characters are swept over a waterfall. Needless to say, none of them are badly hurt. (Though Zia is knocked unconscious, she quickly recovers).
* The Mysterious Cities of Gold, the Condor itself never takes damage when doing so.
* The Mysterious Cities of Gold: the considerably older Mendoza is the most competent member of the group, as befitting of a seasoned explorer with years of experience. The children often look to him for guidance and leadership. There's a strict division of competence, however. Mendoza is competent in almost all aspects fitting his role as Team Dad and protector (combat, navigation, survival, combat, asskicking, geography, combat and asskicking), however he's strictly useless for understanding the ancient technology of Mu, or solving the various ancient puzzles and riddles the group comes across — in this area, the kids are strictly the only competent ones.
* The Mysterious Cities of Gold, the heroes tell the Spanish to send a scouting party to foil a hypothetical ambush, in order to distract them from something (maybe stealing goods from them). Then the Aztecs capture the heroes, furious that their ambush has been foiled...
* The Mysterious Cities of Gold, the main characters constantly find functional traps in every ruined temple.
* The Mysterious Cities of Gold, the members of the Order of the Hourglass wear robes and hoods that conceal their faces.
* The Mysterious Cities of Gold - The original series of thirty-nine episodes dates from 1982. However, it wasn't until 2013 that a further twenty-six episodes were released — 31 years.
* The Mysterious Cities of Gold: The second and third seasons are fully animated with cell-shading.
* The Mysterious Cities of Gold: Upon the main characters' arrival in China at the

start of season 2, Pedro ends up clinging to a bamboo stalk that Sancho is holding, and when the latter let go, Pedro is sent flying. This gives to Tao the idea of using a catapult to escape pirates in the next episode.
* The Mysterious Cities of Gold: When the story of the Esteban's parents is told, it's done in a completely different art style.
* The Mysterious Cities of Gold with the people of Mu and Atlantis being the precursors.
* The Mysterious Cities of Gold Zia and Esteban on the ship to the New World, and lifts them both in each hand, shaking up the boy up and down. But he stops quickly when he realizes Esteban is seasick and about to barf on him.
* The Mysterious Cities of Gold: Zia, who is smitten with Zhi, blushes and stammers when she sees him for the first time.
* The mysterious Cosmic Entity may have taken the title, as it has existed before God or Amara. It had no trouble beating around Castiel, though because he was already dead, it couldn't do much else.
* The mysterious Dark Woods Horror is eventually revealed to be a form of this:
* The mysterious Faust Capital CEO is able to take on humanoid forms at well, being initially encountered in the form of a small child.
* the mysterious Genocider Syo, who has been referred to as "he", is revealed to be the Split Personality.
* The Mysterious Geographic Explorations of Jasper Morello: Dr. Claude Belgnon is a scientist in a society suffering from a plague. His research involves finding a cure (partially out of a desire for fame) and becomes more morally dubious as the story's progresses.
* The Mysterious Geographic Explorations of Jasper Morello, Jasper is haunted by a recent airship voyage where a mistake in his calculations led to a collision and a crewman going overboard.
* The Mysterious Geographic Explorations of Jasper Morello variation to shoot the creature when it attacks Jasper. Electricity guns are apparently commonplace. There are even advertisements for them on the website.
* The Mysterious Island begins with the heroes in a hot-air balloon tossing everything heavy overboard to stay in the air, culminating in tossing away the entire basket and holding onto the ropes. Strangely, they toss the tools out first before throwing their bag of money (in coins).
* The Mysterious Island, included the same detailed description of the plants and animals on the island. It also included detailed instructions on how to make dynamite with only natural materials.
* The Mysterious Island: Littlefoot gets angry because he believes someone ate a treestar he was saving for later. When he confronts them about it, Cera gasps "Oh no!", seemingly scared of Littlefoot. But it's actually the Sharptooth sneaking up on them that they were cowering from.
* The Mysterious Island: The titular island has a dormant volcano on it. Naturally, this becomes a major plot point.
* The Mysterious Island, where a few people build a civilization on a remote island with nothing but two watches and a metallic dog collar.
* The mysterious Jove race became masters of gene manipulation and other bioengineering, transforming themselves into emotionless quasi-superhumans. It's since bitten them in the rear, as they suffer from a degenerative disease that threatens to wipe them out.
* The Mysterious Lady: Boris the bad guy tells Tania that he just arrested Karl, the good guy. Tania shoots Boris dead, Boris collapsing into a chair. The chair happens to be positions with its back to the door. When Boris's goons come in, Tania, with Boris's arm wrapped around her waist, tells the goons that Boris wants Karl sent in alone. After Karl is sent in, he and Tania escape via the hidden passage.
* The Mysterious Lady in European armies prior to World War I, in which a disgraced officer has his sword broken and all his medals stripped. Done to Karl when he's cashiered and before he's sent to prison.
* The mysterious Lady Knight, an unwilling time traveller and immortal who

vanished in the 17th century. One running theory is that she's really Spitfire I, who was believed killed by the Winter Soldier - which still leaves the open question of who
* "The Mysterious Mare-Do-Well" features what looks remarkably like a
* The Mysterious Mare Do Well", Rainbow Dash is seeing lying on her own personal raincloud when she's complaining about not being seen as a hero.
* The Mysterious Mare Do Well, the titular mystery heroine saves construction workers from a collapsing construction site.
* The Mysterious Mare Do Well to ask politely if she could save them first.
* the mysterious masked “man” who attacks Makoto, who is also the person behind.
* "The Mysterious Moles". In the Hall of Justice a printer was labeled "Teletype".
* "The Mysterious Moles". Marvin tells Superman "We dig!" Superman replies "Please Marvin, don't mention that word. I did more digging today than I've ever done in my whole life!" The rest of the Super Friends laugh politely.
* "The Mysterious Moles". Wonder Dog does a wheel of feet to run away after the Moles' underground machine drills out of a wall and scares him.
* The Mysterious Mr. Enter account (he claimed it was because of him disliking DA's "Eclipse" layout), and he lost the support of former colleagues such as his former editor Crimson Mayhem.
* The Mysterious Mr. Enter) and does not share his e-mail or Skype with anyone but his very close friends/workers for his projects. He also deleted his Tumblr back in 2016, closed his Twitter in early 2020, and left DeviantArt in mid-July of that same year, making him more, well, mysterious.
* The Mysterious Mr. Enter are called "enterbots", though usually by detractors.
* The Mysterious Mr. Enter, derides this trope as "mopey-dopey love talk."
* The Mysterious Mr. Enter, even though the episode was the best-reviewed episode of the Adult Party Cartoon before he covered it.
* The Mysterious Mr. Enter even when he's trying to improve himself as a content creator; the situation went as far as losing a friend over the videos.
* The Mysterious Mr. Enter has always been a polarizing reviewer for his highly controversial opinions and hot takes, as well as a generally cynical and unforgiving additude, but those traits wouldn't significantly alienate his fanbase until much later on:
* The Mysterious Mr. Enter hates this argument as far as cartoons are concerned. In his own words, "It boils down to 'This is supposed to be bad, you're wrong for wanting it to be good.'"
* The Mysterious Mr. Enter in his late twenties (he's 27, as of 2021).
* The Mysterious Mr. Enter. It was actually made by Jay Ward Productions.
* The Mysterious Mr. Enter: Online comedic reviewer of good and bad, mostly bad, cartoons
* The Mysterious Mr. Enter, real name Johnathan Rozanski, a YouTuber and animation critic who is asexual.
* The Mysterious Mr. Enter reviews, he goes in this direction for reviews of more outlandish cartoon episodes/movies. However, Enter does save whatever anger he has for more contemptuous subjects.
* The Mysterious Mr. Enter series, has mentioned a few times that he has Asperger's which he was diagnosed with when he was 19 and made a video criticizing Autism Speaks.
* The Mysterious Mr. Enter series, reviews for episodes that contain graphic or psychologically messed-up content would open with a British voice announcing "Some viewers may find this disturbing, viewer discretion is advised."
* The Mysterious Mr. Enter tend to believe this, as anything he praises or criticizes will inevitably become praised / criticized for the same thing, just because Enter said so. Mr. Enter tries to invoke this in a more positive way in his Admirable Animation series. In that series, he points out exceptionally well-made pieces of animation and underrated gems, in an attempt to direct viewers into checking them out.
* The Mysterious Mr. Enter was accused by a few of his critics for stealing the

term "Animated Atrocities" from another reviewer, "BigManX" since the latter brought the term up back in 2012.
* The Mysterious Mr. Enter zig zags around this trope. How frequently he swears usually has to do with how bad the episode he's reviewing is and how angry it makes him.
* "The Mysterious Mr. Friend", Stu makes a toy for the babies called Mr. Friend, however, the babies just find him scary. Angelica, however, likes him.
* The Mysterious Mr. M (1946, Universal) — 137th and last Universal film serial
* The mysterious Naiads turn out to be an entire species of living ships composed of a seamless blend of mechanical and organic technology.
* The mysterious nameless island raised to the surface of the Atlantic by Magneto in
* The Mysterious Package Company. Though you can choose a particular story to purchase (usually as a surprise gift to a friend), the exact contents are a secret.
* "The Mysterious Package" has a radio program Mighty Mouse is listening to while bathing interrupted telling him to report to the police. (The story involves children disappearing after receiving a space helmet.)
* The Mysterious perk's main effect. There has been many theories on what it does, and it still remains unknown. The original developer even intended to
* The Mysterious Planet, and a guide to the UK Habitats of the Canadian Goose by 'HM Stationery Office', which is apparently the most mysterious. The Doctor is not impressed.
* "The Mysterious Planet"; and a UK public information volume about geese.
* "The Mysterious Planet", Katryca is killed in the middle of a speech.
* The Mysterious Planet" uses this one almost by name while wandering round lost in the underground.
* "The Mysterious Planet" was the single most expensive special effects shot in the series up to that point; the show had just survived an attempt to cancel it that turned into an 18-month hiatus, and the producer spent lavishly on it to ensure that the show's return after its enforced hiatus made a big impact. The cost was offset by using it as an establishing shot in later episodes.
* The mysterious puppeteer in "The Backstage Rage" is seen playing a pipe organ as well, and Scooby plays one in "A Night Of Fright Is No Delight."
* The Mysterious Stranger also wears a trench coat in the private eye tradition.
* The Mysterious Stranger Austria actually believe in witches, but they all allow witch hunts to happen because they are terrified that the rest of the village truly believes it and will assume that they themselves are witches if they defend the accused in any way, including by saying that witches don’t exist.
* The Mysterious Stranger from the original book) is given an eerie, nightmarish atmosphere which sharply contrasts with the the rest of the movie.
* The Mysterious Stranger he is portrayed as some creepy humanoid monster.
* The mysterious stranger leaves his footprints all over the irradiated future of America, but you never learn a concrete detail about him, although there are details scattered about such as a man who may be his son in New Vegas, or Nick Valentine from 4 commenting on seeing him "again", implying he's been trying to figure out who he is for some time. Additionally, you never know if he's helping you out or if the two of you coming in contact like this is a repetitive coincidence.
* The Mysterious Stranger's .44 Magnum would also fall into this category, as it causes roughly the same amount of damage as the MIRV in one shot. The disadvantage is that it's only available through hacking or sheer dumb luck.
* The Mysterious Two - A man must stop two popular televangelists...because they are actually evil aliens who are brainwashing humanity in order to take over the planet.
* The Mysterons had declared a "war of nerves," which most of the fandom has decided means the Mysterons were engaging in psychological warfare rather than attempting conventional destruction. If they just wanted humanity dead,
* The Mystery Farm AU by lemonfordrizzleart stars Stanley and Stanford who run

their family farm as it becomes the center of strange activities after a UFO is discovered in the area.
* The Mystery Files of Shelby Woo from the Nickelodeon Studios in Orlando, Florida.
* The Mystery Files of Shelby Woo revolved around that episode's culprit burning down houses to hide the fact that they were illegally harboring endangered animals inside the houses.
* The Mystery Files of Shelby Woo, Shelby and friends were trying to figure out who stole jewelery from a safe and became very suspicious of a magician who they spotted trying to conceal a small box on the porch. Once confronted, he began looking very guilty and his wife started to cry. Turns out he was on a diet and was sneaking food behind her back.
* The Mystery Knight and Weirwood Trees is why Bloodraven is so ridiculously effective as a spy.
* The Mystery Machine is rebuilt as an armoured battle van after it is destroyed towards the end of season two of
* The mystery of Bella Goth is one of the big ones. In the interval between the
* The Mystery Of Blue Harbor, a movie made by a local amateur film club featured the line "You are a lying liar from Liarton, New Hampliar, and I don't believe your lying lies!"
* The Mystery of Chimney Rock probably plays this trope the straightest:
* The Mystery of Errors and friend get jobs at the Globe Theatre and solve a murder, his friend challenges Shakespeare to rhyme orange. Shakespeare came up with "door hinge" immediately, but his friend is skeptical.
* The mystery of Kate's music box, and its connection to Vincent Adler
* The Mystery of Mamo being chased by missiles launched by the US and Russia.
* The Mystery of Mamo does this in the Streamline dub when Jigen expresses his incredulity at what Lupin's studying after the Philosopher's Stone job.
* The Mystery of Mamo had its very first English dub before any other part of the franchise, though said dub was rarely seen prior to Discotek's DVD release until 2013.
* The Mystery of Mamo plays this straight, when Mamo reveals towards the end that even his methods of cloning to reach immortality come with their limits.
* The Mystery Of Mercy Close in that she's severely depressed but still does her job anyway. It's mentioned by her sisters that Helen went through a variety of jobs before settling into her career as a private detective.
* "The Mystery of the Baghdad Chest" (1932) was expanded to create "The Mystery of the Spanish Chest" (1960).
* The Mystery of the Black Jungle (widow burning) and the Thuggee cult (we are even shown East India Company troops affiliated with the Thuggee Department storming the Thuggee headquarters); on the other hand the flaws of the Company, such as it's corruption, arrogance and heavy handed response to political complaints are shown, culminating in the bloody suppression of the 1857 rebellion.
* The Mystery Of The Dragon Seal). The protagonist sneaks aboard a Russian ship and demands to see the captain — to what the crew members responds he's already facing him. When asking where, as he can't see him, the captain (a dwarf) stomps on his foot to get his attention. Justified in this case, since the iron mask the protagonist is wearing is certainly reducing his vision field.
* The Mystery of the Druids, Halligan hides a magic amulet in a vent in his cabin when on a sea voyage. Obviously the instant he does this he returns to find his place ransacked by the villains looking for it.
* The Mystery of the Hooded Horsemen Riders guns down Norton once the Riders' power has been broken and he has no further use for him.
* The Mystery of the Hooded Horsemen, Tex uses the hood and robe taken from a dead Rider to infiltrate a meeting of the Hooded Riders.
* The Mystery of the Hooded Horsemen, the Hooded Riders are a gang seeking to take control of the valley through fear and intimidation. They wear black robes with white crosses, and black pointed hoods.
* The Mystery of the Hooded Horsemen, the sheriff of Redeye is an honest man, but easily duped by the bad guys and prone to jumping to the wrong conclusion.

* The Mystery of the Hooded Horsemen: While Norton is the apparent leader of the Hooded Riders, he makes references to a 'big boss' who is really issuing the orders.
* The Mystery of the Kidnapped Whale had a case involving a whale where a suspect accidentally blurted out its species. The person could not have known this at the time.
* The Mystery of the Leaping Fish, the main character, a detective who really, really enjoys cocaine and heroin, has a clock on his wall with the words EATS, SLEEPS, DRINKS, DOPE.
* The mystery of the parents of Quicksilver and the Scarlet Witch took years to solve. First they came to believe that they were the children of two Golden Age heroes, the Whizzer and Miss America. Later, after their long-lost adoptive father Django Maximoff made a reappearance, it eventually emerged that they are the children of Magneto.
* "The Mystery of the Pesky Desk", a story from the 53rd issue, has Lisa investigate the mystery of a desk believed to be cursed, when in truth
* The Mystery of the Third Planet in an interstellar animal-trading hub (neither species is native to that world):
* The Mystery of the Yellow Room, the identity of the aggressor is only revealed with clues that the protagonist gathered off-page.
* The Mystery Of The Yellow Room. The twist solution to the mystery, while being completely unexpected to the unprepared reader, manages to be on reflection the only logically possible solution given the facts of the case.
* The Mystery of Urulgan, Professor Mueller alludes to the Tunguska Event when he is talking with Veronica about meteors.
* The Mystery Sphere - a strange but interesting story about a pirate accused of the theft of a nobleman's dragon.
* The Mystery Sphere. He doesn't really want to solve anything, he's just too lazy to argue against solving things.
* The Mystery Sphere is possibly one of those. It depends on whether his apparent apathy and laziness are true or whether he is faking it.
* The mystery surrounding its existence and the accompanying book that was sealed away at the library.
* "The Mystery": The yearbook pictures for Alan and Tina both use their designs from the early reel.
* The Mystical Price called Soul Outside causes a creature to have a vital part of its soul stored in another location. The soul part must be kept in a container. If it is ever destroyed, the creature is completely vanquished and may not return
* The Mystic Archives of Dantalian is technically a gateway to an actual library, but the net result is still this trope.
* The Mystic Eyes of Death Perception, a special ability which allows people to "see" death, in the form of lines across everything that can be cut through in order to instantly kill or break apart the object. However, not only is the human mind not meant to comprehend actually seeing the concept of death, the fact that the lines are literally
* The Mystic Knights of Tir Na Nóg: Angus is the Mystic Knight of Earth ("earth beneath me!"). His Terra Sling Mace allows him to throw boulders an cause earthquakes.
* The Mystic Knights of Tir Na Nóg: Deirdre is the only female of five knights, and also the only one to regularly do more than fight. When making alliances who is the local head man going to listen to: The thief, the druid apprentice, the princes from the Land of Never-Heard-Of-It, or the local princess?
* The Mystic Knights of Tir Na Nóg, essentially cancelling Mystic Knights.
* The Mystic Knights of Tir Na Nóg: Ivar, with his Barbed Trident ("water around me!")
* The Mystic Knights of Tir Na Nóg: Princess Deirdre is the Mystic Knight of air, capable of shooting whirlwinds from her crossbow. To summon her Mystic armor, she shouts, "Air above me!".
* The Mystic Knights of Tir Na Nóg: Rohan's weapon ("fire within me!").

* The Mystic Knights of Tir Na Nóg starts out with four heroes who have the power to command the elements of fire, air, water and earth. Around the middle of the series, they are joined by Prince Garret, who gains power over the element of forest.
* The Mystic Knights of Tir Na Nóg this trope, by commenting on how as royalty, they'd spend all their time getting in and out of their clothes. Since that is a comment on the illusion and not the reality, it's actually a misaimed deconstruction.
* The Mystic Knights of Tir Na Nóg, which, being mythical, can have any ethnic mix it wants.
* The Mystic Knights of Tir Na Nóg would be an original show example.
* The Mystic Knights of Tir Na Nog, which starred Heath Ledger, is also set in pre-Christian Ireland and still features a black character named Tully amongst Ledger's band of Celtic chieftains. Unlike in 'The Mystic Knights of Tir Na Nog'', there's no justification given.
* The Mystic Manor at Hong Kong Disneyland involves a mischievous monkey among the supernatural stuff.
* The Mystic Melodies seem useless after doing the lost Chao missions, but some Hard Level missions require them for advancement.
* The mythical account of Shaka Zulu. In exchange for limitless power, Shaka is said to enter a pact with the witch doctor Issanoussi, who demands the death of Shaka's pregnant fiancée Noliwe — and this turns out to be just the down-payment for "blood medicine":
* The mythical and surreal Cockaygne (Cucaña, Kukania) of the Medieval European myths and folklore. It is said to be an earthly paradise with abundance of food and wine, where Christmas lasts one month and where there are five Easters in the year and eternal May, and fasting once in a hundred years. But it represents the Unreachable Promised Land, since the only road leading there is an unnavigable — but wadeable — neck-deep river of faeces. It will take five years to reach there.
* The Mythical Ark: Adventures in Love & Happiness, does the "characters ride out a flood using an ark" plot again, only this time they use an ancient spaceship called the Ark. To get the ship running, you have to have at least one of each kind of animal in it... except the gang hits a snag there when one of the required animals is a snake, which they believe to be an extinct species.
* The Mythical Ark: Adventures in Love & Happiness in the Green Green Grassland - are brought to a spaceship called the Ark by the goats since a snake is among the animals needed to activate it.
* The mythical "hoop snake" of folklore moves by holding its tail in its mouth and rolling like a wheel.
* The Myth Makers", one of Hartnell's wittiest, derives a lot of its humour from how mundane the semi-mythical Trojan figures are in personality, especially Paris — his attempts to talk Steven down from attacking him are almost Pythonesque in how anticlimactic they are.
* "The Myth Makers", the Doctor is actually the one to suggest the idea of a giant wooden horse (after his earlier suggestion of catapults to fling the soldiers over the walls is rejected) after being captured by Odyessus during the Siege of Troy.
* The myth of Achilles being killed in his only vulnerable spot - an arrow through the ankle - is very well known. Fans always assumed that Pyrrha, who was inspired by Achilles, would share his fate. She is eventually shot through the ankle with an arrow to restrict her movements, leading to her first defeat in the show.
* The myth of Pygmalion and Galatea, told by Ovid, which makes this trope
* The myth of the Argonauts features the Gegenees, a set of six-armed giants marauding around the south coast of the Black Sea. Heracles brawled with them for a time.
* The Mythology and Folklore of nearly every culture on Earth are brimming with examples of such situations.
* The mythology of Santa Claus originated from the very real Saint Nicholas, a Byzantine Bishop from the fourth century that performed miracles and gave gifts in

secret (most accounts of his life agree that he was the only child of a wealthy family, and when his parents died he used his new wealth to finance his clandestine generosity).
* The Mythos includes various authors contemporaneous with and following after
* The Myths and Legends of King Arthur and the Knights of the Round Table.
* the myths differ on whether he remained a bull while he and she did the deed; either way, the union produced Minos, the first King of Crete.
* The myths of elephants having a phobia to mice has an element of truth. Elephants' eyesights are not keen enough to clearly see small creatures on the ground, and so they react with fear when they detect unexpected movement from below, not because they hate mice, but because they can't tell the difference between a harmless mouse and a dangerous threat like a snake. Thus their phobia reacts with equal fear, to both harmless creatures and genuine threats. When a mouse is brought up close to the elephant's face, elephants do not tend to fear them at all.
* The Myth Unit Einherjar carries two Dane Axes in his hands and isn't afraid to use them. Upgrading them to Giantsbane add an extra blade on the axe.
* The Naagloshi is also fueled by this trope. It gains power by killing wizards (and a bit from one-trick-ponies like the Alphas). However, it gets crowning mention for what it did to Thomas.
* The Naaru as well, as they're essentially angels. That build inter-dimensional spaceships.
* Then, about seven centuries later, some of the more bitter ghosts of the slain Solars unleashed the Great Contagion, a disease that killed 9/10ths of ALL LIVING THINGS IN CREATION... including the Exalted themselves. The sudden shortage of... everything... gave the Fair Folk an opportunity to sweep in and nearly destroy the Reality of Creation entirely, in a worldwide war recorded as 'The Balorian Crusade'.
* Then a certain event happened on 11 September 2001, which followed the assassination of the militant's biggest rival.
* The Nac Mac Feegle, a race of belligerent, six-inch tall, red-haired, kilt-wearing blue men (also known as pictsies) were rumoured to have been thrown out of Fairyland for being drunk and disorderly. This trope is even more perfectly exemplified in
* The NacMacFeegle are absolutely barred from most afterlives, as bad news travels fast. The Ferryman over the River Styx has apparently had his instructions, for instance. This doesn't faze the Feegle: they get in there anyway, barred or not.
* The Nac Mac Feegle are an entire race of people with a deep and abiding love of stealing (and drinking, and fighting, preferably all at the same time). Fittingly, the "Big Man" of the main Feegle clan in the Tiffany Aching series is Rob Anybody, which seems to be as much a description as a name.
* The Nac Mac Feegle do this. In abundance. At the same time. With individual yells.
* The Nac Mac Feegle have been known to do jobs for Tiffany Aching in the
* The Nac Mac Feegle have swords that glow blue in the presence of lawyers, the way Sting reacts to orcs in
* Then a couple of seasons later, the episode "Pieces of a Broken Mirror" gives us this exchange:
* The Nadziranim ("dark sorcerers") can turn into vicious monsters when they have to fight. Their
* Then, a few years later in 2001, Patriots star Drew Bledsoe (who'd just signed a
* Then after a couple of jokes, the next one is about a concert expecting a big name singer. The public gets excited when a limo pulls up, but it turns out to be (insert another celebrity). Then a tour bus comes by, but it's another celebrity. Then an helicopter, same result. Then a UFO comes by... "You're so mean. That was really far. Why don't you say you don't hate me already? You heartless monster".
* Then after they end that threat with liberal use of the Battle Moons
* Then, after thousands of years of cloning, they decide to commit mass suicide instead of dying slowly and give all their knowledge and technology to humanity.

However, a branch of the race, calling themselves Vanir, still exists in the Pegasus Galaxy, having managed to partly cure their degradation by performing experiments on humans. It's unknown how many Vanir are still alive, but it's likely they can't reproduce any more than their cousins in the Ida Galaxy could.
* Then after World War I, Croatia, Bosnia, and Slovenia seceded and joined up with Montenegro and Serbia to form the short-lived Kingdom of Serbs, Croats, and Slovenes (later Yugoslavia).
* The Naga have the Parasite spell, which causes damage over time. If the unit dies while the spell is still active, it creates a tiny Mur'gul from their corpse. Eredar Warlocks have a similar spell that summons a tiny demon instead.
* Then again, any story that was shown after the character was introduced and is set in a period when they were younger may count as a backstory.
* Then again, books 1 and 2 mention a few times that vampire victims who hadn't been turned yet
* Then again, considering how much crap Neverwinter is generally involved in: If you were the ruler of that city, would you leave your bedroom
* Then again, Disney has a reputation for kid-friendliness and they've only released films rated higher than PG-13 under alternate labels. They created the
* Then again, Fox also produced the film. People unaware of the production probably thought Jimmy Fallon and
* Then again, given his demeanor no one can guess what he does during his time alone with Saki.
* Then again, given what most Chaos units are like, especially Khornate World Eaters are like....
* Then again, he's likely saying the truth anyway—anyone is related to a royal line if you look far enough in the past.
* Then again, he was able to make far more managing legitimate enterprise than Dr. Evil ever could with his schemes, so from his perspective, he's just
* Then again, humans have been shown to at least be better at fighting the Zerg than the Protoss in the games making this a possible
* Then again, if the brainpower was being used to power a lightbulb there wouldn't be enough left to power the brain...
* Then again in fifth year, he is banned from helping due to his daughter interfering in the mortal world.
* Then again in season four finale. After narrowly evading capture and defeat, the team make an escape with Harold carrying what's left of
* Then again in the blooper reel, Ziggy is having a tough time opening a bag of popcorn while he, Scott and Summer are just sitting in the megazord cockpit.
* Then again in the final episode of the fourth season when the boss (badly) fakes one in a courtroom.
* Then again in "The League of Villains", when the villains in question are about to kill them.
* Then again, in "Where Silence Has Lease", Data asks Picard about death. Picard gives a philosophical answer which shows that although he's not explicitly religious, and doesn't believe in a traditional
* Then again, it is sometimes useful to have someone take charge of the situation, such as in an emergency, if
* Then again, it is the French censor board. The same censor board that thinks that
* Then again it's less of a fight and more of a "sidestep left twice in a rapid succession, mash forward, press any button, win".
* Then again, it's pretty clear that none of these people, Nozomu included, could be considered even remotely well-adjusted.
* Then again, it's worth noting that when the Bible states that we are special in God's eyes, that there's no real reason to assume it means that
* Then again, Jack himself has really bad breath. In the same movie, Elizabeth reacts to it. In the
* Then Again, Maybe I Won't, saying he doesn't really know how to go about it, as he never brought the matter up with his two older son. Tony assures him that he's

learned all about it from school and friends, but his dad gives him a book later, just in case.
* Then again, Melville may have meant more to this than just that standard American Dream message, if at all. But I doubt the teachers would point that one out.
* Then again, mini-Jack doesn't seem too upset about being surrounded by teenage hotties who are clearly no match for his superior maturity and experience.
* Then again, nobody cares whether or not Cybernetics Eat Your Soul when there's plenty of
* Then again, no one really wanted synthetic "honey" and "cheese" or "chocolate" made of flavored margarine. They simply turned out cheaper.
* Then again, pretty much any woman in the series screams at the top of her lungs anywhere near danger. Its a world of screaming women.
* Then again, Sauron is a being who has somehow seized control of armies of orcs and a mighty wizard before even getting an eye. By the end of the movie the most he has is a symbolic mouth, and that's only in the extended edition.
* Then again, she's a Vulcan, so she was probably repressing it. On the other hand, Trip still feels the death of his sister several episodes later and has nightmares about it.
* Then again, she's possessed by Ultimecia when wearing the black dress, so she's probably been borrowing her fashion sense.
* Then again, she's right in the end, as he ends up leaving her at the altar.
* Then again, since the puzzles are generated randomly, there's no guarantee that "last point" can't be
* Then again some do legitimately end up with so much HP they can outright ignore frightening levels of damage. Imagine what the human Mooks think of the human looking protagonists of most RPGs.
* Then again, some sniper rifles can do as much (or even more) damage if they are equipped with EX-explosive ammo (which is cheaper than assault cannon rounds), and have a higher rate of fire and a longer range, which puts them squarely in this class.
* Then again, that's partially due to the general WTFery of Clan Tzimisce, and partially due to their membership in the Sabbat. The Sabbat truly, honestly believe that vampires are better than humanity, and have the right to rule over the "cattle" as they see fit.
* Then again, the molecular oxygen (O₂) that nearly all living beings on Earth breathe, only appeared in ancient Earth as a result of a bacterium developing photosynthesis (
* Then again, the only pre-order bonus exclusive for the Xbox version consists of items for your Avatar, so it makes sense.
* Then again, the ork will probably throw the pin too for the hell of it.
* Then again, the title in Finland was "Rita Hayworth — avain pakoon"
* Then again, this has been Moore's general response to just about every extra-canonical theory thrown his way with the lone exception of the "Starbuck's dad is
* Then again, this is Superman and Wonder Woman we're talking about. To them, it could easily have seemed like nothing more than an exceptionally long line of
* Then again, Tsuna's MO is forgiving pretty much everyone he runs across for what they do to him and his friends, and
* Then again, when he's going up against the possibility of Inara telling some funny whoring stories the poor guy hasn't got much of a chance.
* Then again, when it comes to personal backstory, motivations, and psychological trauma, the series is rather good when it comes to dialogue. When it comes to the
* Then again, Winchester is also portrayed as more than competent enough to handle this. Unlike Frank, his antagonism comes from a clashing personality as opposed to incompetence. By the end of the show, this troper wanted him to run that hospital!
* Then again, wind and solar power don't create air pollution... While the technologies that allow their use
* Then again, with the love of dance and samba the birds of Rio have, you can't say you were

* The Nagasaki of the years prior to the Meiji Restoration is portrayed as this in
* the nagas and their reptilian servants, who deeply dislike outsiders and are happy to let their homeland's jungles dispose of them for them.
* The Nail, depicting an alternate reality where Kal-El wasn't found by the Kents, Lex Luthor was able to use DNA samples taken from Kal-El's ship to create the Liberators, who are essentially Bizarros disguised as robots; although powerful enough to break Green Lantern's arm through his ring-shield, when deprived of the advantages of superior numbers or a surprise attack, they soon fall apart when subjected to any actual damage in a fight as their genetic structures were unstable.
* The Nail Gun Massacre, a hitchhiker flips off a vehicle for speeding past him. Unfortunately, it's being driven by the killer — who stops, waits for the hitchhiker to approach, and then fills him full of nails.
* "The Nail in the Coffin" revealed The Ghost Killer's first murder resulted in this trope, and the wrongly convicted man in question eventually snapped and went on a
* The nails of animals can be much worse than those of humans when this trope occurs. Since many animal claws contain flesh and blood vessels within, and are anchored to the skeleton rather than the skin, a broken nail can be an extremely painful (not to mention
* The naive but pure-hearted Ten Ox plays this role to the cunning and knowledgeable sage Li Kao in
* The Nakatsukasas' Uncanny Sword seem to be one of these; corrupted, possesses the wielder and destroys their soul...but can be turned to good use with the right influences. Apparently many, many previous members of the family had missed out on the last part before Tsubaki decided to have a meister in Black Star (probably significant she was the first of the family to have a meister, given this is a series that favours
* The Naked and the Dead. Always thinking to himself about how he and his squad are "The good ol' boys", hard-working and patriotic. Then, of course, he gets his leg shot up to hell and sent home.
* The Naked and the Dead. He changed every instance of the word "fuck" to "fug" because he had too much profanity. When Mailer later was introduced to Dorothy Parker, she allegedly greeted him by saying, "So you're the man who can't spell 'fuck.'" "Fug" is a real word, funnily enough, meaning "stale air". It was a word for smog in the late 19th century. Ed Sanders and Tuli Kupferberg sometimes claimed that this was the origin of their band name.
* The Naked Brothers Band: Cooper Pillot and Patty Scoggins. Though they still call each other by their last names, they stand as a bastion of stability amidst the show's romantic chaos.
* The Naked Brothers Band. The one exception is Allie DiMeco, who plays Rosalina.
* The Naked City confesses to have killed Jean Dexter, but detective Muldoon convicts him of lying by asking details of the murder which the boy answers wrong.
* The Naked City is told from the view point of the staff working at the homicide department, and thus providing us with many of the details of daily detective work.
* The Naked City", Phelps chases after a suspect we later find out is the "Willy" the detectives have been looking for, only to be clubbed over the head from behind by the bad guy (for about the third or fourth time in the game).
* The Naked City, which had a TV series besides the film mentioned above.
* The Naked Detective). The drug interactions still send him into seizures, but his daughter-in-law Irene tries to shoot him and completely misses—and the resulting adrenaline spike allows Higglesbotham to survive the seizures. And then he gets accidentally killed by antacids contaminated with bug spray.
* The Naked Director: Toru Muranishi is not actually a gangster, he's a pornographer. In some ways he resembles a gangster, working in a business that is generally seen as socially undesirable, skirting the law, sometimes getting arrested and jailed, and (to his eventual regret) getting involved with some real yakuza gangsters. In any event his story has all the beats of a rise-and-fall gangster arc. The first season is the rise, as he goes from a nobody door-to-door

salesman to the "emperor of porn", establishing his own company and defeating his rival, Ikezawa the porn kingpin. The second season is the fall, as he makes a foolish gamble on satellite porn, overcommits, bankrupts his company, and loses absolutely everything. The only difference is that unlike a gangster arc Toru is not jailed or killed, but ends his story still fighting and trying to make a comeback.
* The Naked Director. Toru starts to become so successful selling encyclopedias door-to-door, after getting sales tips from Mr. Ono, that the bar graph on the wall showing his sales extends up past the top of the chart, then up to the ceiling, and finally running along the ceiling for a while.
* The Naked God, one character proudly shows off his 20th-century lava lamp, now a priceless and beautiful antique instead of a tacky room decoration.
* The Naked Gun 2½: The Smell of Fear, Drebin accidentally defuses a nuclear bomb by tripping over its power cord, after shouting 'Let's get out of here!' with only 2 seconds left on the countdown timer.
* The Naked Gun 2½: The Smell of Fear, where Lieutenant Frank Drebin fails to retrieve the information from a dying thug and starts looking for another informant.
* The Naked Gun 33 1/3, Frank Drebin is infiltrating a family gang hired to blow up the Academy Awards. Then his wife Jane shows up, thinking that he is cheating on her. Playing his role, he suggests they keep her as a hostage. Then they start arguing (even though they supposedly don't know each other), causing the head of the gang to get suspicious and claim that they sound like they're married.
* The Naked Gun 33 1/3 when he inadvertently starts reading parts of the script meant for the other co-host.
* The Naked Gun 33⅓. Tanya, who wants to get the guard away from the envelopes with all the academy awards in them, tries showing some leg... and some cleavage... and spinning the straps of her dress around like helicopter blades... to no avail. Finally she tries to play with bubble wrap seductively. The guard strolls over as if hypnotized... shoves her away and proceeds to happily play with the bubble wrap.
* The Naked Gun, about twenty credit cards drop out of the wallet he keeps it in.
* The Naked Gun, and then trampled by a marching band playing "Louie Louie."
* The Naked Gun announced: "If you only see one movie this year... you've got to get out more often."
* The Naked Gun At one point Frank starts describing his life of constant casual debauched sex to the very-married Ed, leading to Ed literally foaming at the mouth.
* The Naked Gun: Attempted murder of Officer Nordberg → plot to assassinate the Queen of England.
* The Naked Gun by cursing and opening fire on him. Drebin's response:
* The Naked Gun) deadpanly instructs his meek girl student, "All right, Stephanie, gently extend your arm. Extend your middle finger. Very good. Well done" in response to a fellow driver angry at her for driving the wrong way on a one-way street. The girl feels truly empowered after this.
* The Naked Gun. Detective Drebin arrives at the hospital and notices that Nordberg's police guard was absent. When he asks the nurse where the guard was she explains that "Detective Drebin" phoned and sent him home.
* The Naked Gun does a gag about this, with Lt. Drebin briefly keeling over after sniffing some three-year-old Chinese food from his fridge. If you look very closely at the very end of that scene, as the camera zooms in on Lt. Drebin's face, you can see a steak on top of the fridge... crawling on its own.
* The Naked Gun. Drebin ends up leaving with the information he needed and an extra twenty bucks.
* The Naked Gun, Drebin is fighting an assassin in Jane's bathroom, then they notice Jane in the shower and both stop to gawk at her.
* The Naked Gun, Drebin shoots a bulky grappling hook gun to get to the top of a building, but it hits the side of the building and falls. On his second try, the grapnel snags the collar of an angry guard dog, which then chases him around the roof.

* The Naked Gun: During the baseball game, all of the other umpires are heatedly disputing Drebin's flagrantly incorrect call.. until he pulls his service revolver, provoking an instant chorus of "Yup, you're the boss, good call!" comments.
* The Naked Gun features a nuclear bomb that is defused only when Frank Drebin, deciding to flee with three seconds to spare, accidentally trips over the cord.
* The Naked Gun film, when Frank is undercover in prison and has a talk with fellow inmate Tyrone, a black guy.
* The Naked Gun, Frank Drebin has 48 hours to prove that Nordberg is innocent.
* The Naked Gun: Frank Drebin is being "honored for his 1000th drug-dealer killed." He responds: "Thank you. But, in all honesty, the last two I backed over with my car. Luckily, they turned out to be drug-dealers."
* The Naked Gun: Frank Drebin is stopped at the entrance to the Oscars…
* The Naked Gun: Frank is in the prison shower, and the Friendly Neighborhood Prison Sexual Abuser approaches him and drops the soap. He asks Frank to pick it up. Frank replies "no problem," bending over to reveal Iron Underwear.
* The Naked Gun, Frank is persuaded to come out of retirement to help with a case, but tries to conceal this from his wife Jane. When she finds evidence that he's returned to police work, he attempts to distract her with this trope:
* The Naked Gun, Frank, trying to break Jane's sensory-induced hypnosis, says "Jane, since I've met you, I've noticed things that I never knew were there before... birds singing, dew glistening on a newly formed leaf... stoplights."
* The Naked Gun has the following exchange between Frank Drebin and Jane after Jane climbs a ladder while wearing a dress:
* The Naked Gun has the lab break down the fibres, prints, DNA and dirt particles of the footprint and start to take a geological breakdown of the city. When the detective says they don't have that much time, they mention that the criminal also dropped his wallet by the curb and they may be able to use that as well. They have a habit of this, because in the third movie, they break down the origin and composition of the paper in a letter to find out who sent it, and when that fails, they then mention that the letterhead says "Statesville Prison" on it.
* The Naked Gun has this happen to "Hail to the Chief" when the good guys in disguise show up in place of the President of the United States.
* The Naked Gun have a synopsis starting with "One woman's struggle to..."
* The Naked Gun: "I like my sex the way I play basketball: one-on-one and with as little dribbling as possible."
* The Naked Gun: In the second film Frank, Ed, Nordberg and Meinheimer use the costumes of a mariachi band to get into the Press Club Dinner - only to unintentionally walk onto a stage and have to give an impromptu performance of Besame Mucho to maintain their cover.
* The Naked Gun. It goes on for about five minutes of trains going into tunnels, prospectors finding oil, et cetera...
* The Naked Gun, Lt. Drebin jumps over the queen to save her from what he thinks is imminent danger. Of course, that's not what it looks like in the front page picture.
* The Naked Gun. Lt. Frank Drebin first tells his wife Jane he's seeing another woman as a cover story, then Jane realizes that he's actually returned to his work as a detective despite agreeing not to.
* The Naked Gun — possibly the most devoted mama's boy on this list. It is parody.
* The Naked GunMinoxidil is probably best known to the general public under the name Rogaine.
* The Naked Gun movie, Det. Frank Drebin had just rendered a baseball umpire unconscious to "borrow" his uniform. He removes the uniform, props the umpire over a table and proceeds to undress himself. Moments later, a janitor walks into the room, sees Drebin and the umpire, says "Whoops! Sorry, fellas!" and nonchalantly leaves.
* The Naked Gun movie, Frank accidentally causes a break out at the zoo, and animals are seen running around in the background of some scenes. In the end, the Big Bad is dispatched by an escaped lion. This also leads to the following

exchange:
* The Naked Gun movie, Jane makes such a shake while talking to Frank. Some ingredients include a string of sausages and a candy bar (with the wrapper still on).
* The Naked Gun movies, at least once a film, will parody dramatic Hollywood sex/romance scenes.
* The Naked Gun movies, Jane is in the shower singing when an assassin walks in to try to kill her. He is entranced by her singing and starts to hum along, then gets louder and louder until he starts belting, which causes Jane to find out he's there and run away.
* The Naked Gun movies; the first movie takes place during a baseball game, where the target is Queen Elizabeth II, whereas the third takes place during the Oscars, where the target is a bunch of random celebrities.
* The Naked Gun movies, when Frank Drebin just goes "give me the strongest thing you got." The barkeep brings in a burly man. "On second thought, give me a Black Russian." The barkeep has a "not-gonna-go-there" expression.
* The Naked Gun movie (where the beeping of a watch was the trigger) when Vincent Ludwig's secretary tries to shoot Pahpshmir with an empty gun.
* The Naked Gun: Nordberg tends to have this happen to him with his hospital bed.
* The Naked Gun: Officer Nordberg tries to kick down a door, but instead he kicks a hole in the door and gets his foot stuck, which also tips off the criminals on the other side of the door.
* The Naked Gun. Rocco tells Frank to give him the bomb or he'll shoot Jane. A long discussion about the possible consequences of each action, and which is preferable, ensues. It doesn't help that the terms keep changing.
* The Naked Gun's dry, dramatic delivery made these sort of insults especially funny, it turns out.
* The Naked Gun series, with Frank Drebin doing it at least once per movie.
* The Naked Gun: the bad guy survives the fall from a hotel window, goes away unscathed... only to be mauled by a lion freed from the zoo by Drebin earlier in the film.
* The Naked Gun their relationship has ended so Jane can be dating the second film's villain. Averted with the third film as the two are now married.
* The Naked Gun, the man at the baseball game who yells out "Hey, it's Enrico Palazzo!!!" is credited as such during the closing credits. At least one other spear carrier is billed as such, which is common for the ZAZ team.
* The Naked Gun. The missile surprisingly dosen't explode... until it crashes into a fireworks store.
* The Naked Gun, the modern variant happens to Dr. Meinheimer, who is covered with spilled oil and foam packing peanuts.
* The Naked Gun, the Queen is going to be assassinated at a Angels/Mariners game, but Drebin and company save her in time. Rather than dispatching an ordinary hit man that the Police Squad was already on the lookout for, the villain uses mind control to make Reggie Jackson commit the deed.
* The Naked Gun Thirty Three And A Third of it to make sure he got the sheets that contained the plan).
* The Naked Gun was dubbed in Slovak twice for airing. The first dub was made by Studio Roko for TV Markiza in 1996. The second dub was made by Studio Attack for Slovenská televízia in 2002.
* The Naked Gun, when Frank keeps rattling off the wrong police codes to describe an attempt on Nordberg's life while an increasingly panicky hospital clerk correctly interprets them as being for things like fire or a terrorist attack. On his third attempt, the clerk simply screams in horror and dives out a window.
* The Naked Gun when the car the cop commandeers is occupied by a student driver and instructor.
* The Naked Gun, where Frank catches both of Jane's hands when she tries to slap him, only to have a third hand come up and smack him anyway.
* The Naked Jungle, Leiningen burns the canoes of his native servants so they don't desert him.

* The Naked Jungle. That's right, it was MacGyver vs. the ants instead of Charlton Heston vs. the ants.
* The naked mole rat, a "mammalian ant", is one of two mammals that have insect-like sociality, with "Queen" and "Workers" (the other is another mole rat). Unlike eusocial insects, they aren't irreversibly born into their castes — all naked mole rats are born as workers, with pheromones in the queen's excrements, which the workers absorb when using the latrine burrows, keeping them that way. When the queen dies, the female workers begin to compete for dominance until one matures into a queen and begins producing the suppressive pheromones again. Also said to be insusceptible to cancer.
* The Naked Now crew falls under the influence of a virus that basically makes everyone more than a little drunk (including Data). One scene features Data meeting up with Tasha Yar in her quarters, where they end up having sex. After the virus has been purged and everyone is sober again, Tasha and Data are back at work on the bridge, where she tells him, "I'm only going to say this once: It never happened."
* The Naked Now, Data is cut off before he can finish a limerick about a woman from Venus.
* The Naked Now, in that the database actually knew the stories they were talking about, and yet nobody had made the link before.
* The Naked Now: "There was a young lady from Venus / Whose body was shaped like a—" He is then interrupted by Picard.
* The Naked Now", which similarly got rewritten beyond recognition by Roddenberry, if not for the fact that she had left the show and simply didn't want to deal with Roddenberry's lawyer.
* The Naked Prey (1966): Cornel Wilde gets hunted by warriors of a native African tribe.
* The Naked (Silver) and Naked (Gold) camouflages are awarded for completing all high-difficulty missions and completing all of them with an S-rank, respectively. Additionally, using an
* "The Naked Sky" had robots fully capable of harming humans, because either A: They had been given a deliberately limited definition as to what constituted 'human', or B: The robot was unaware that its actions could result in a human coming to harm.
* The Naked Spur, bounty hunter Howie Kemp is using a wanted poster in his chase after a fugitive murderer. He tears off the bottom part, which advertises a $5000 reward, and gets two other men to help him by letting them think he's a lawman. After they catch the bad guy, said bad guy reveals his own copy of the wanted poster, which includes the reward, leading the other two men to demand their shares.
* The Naked Sun, a robot was found at the scene of the murder. It was completely broken due to the First Law being violated, and constantly repeating the victim's last words.
* The Naked Sun. Despite the fact that gestating and raising babies is absolutely essential to their society in the most literal way possible, it is also considered a repugnant occupation.
* The Naked Sun. Elijah Baley can barely keep it together the first time he travels into outer space, but that's because everyone raised in the domed cities of Earth suffers from agoraphobia, and so he can't cope with knowing that he's surrounded by all that 'space'.
* The Naked Sun had a motive to murder the man who reminded them all of their imperfections.
* The Naked Sun. Lije catches the murderer but deliberately lets the killer go free.
* The Naked Sun on both sides, and it is stated outright that unless something is done, the tensions will lead to Earth's population being wiped out within the century.
* The Naked Sun. Personal contact is a taboo on Solaris, so the detective has to gather the suspects via a holographic conference call. When the murderer is exposed, his robot partner then goes to arrest them.

* The Naked Sun R. Daneel is so shaken by witnessing an attempted murder (even though there was nothing he could do, so he wasn't breaking the First Law) that he sits down "as though there were a weakness in his knees."
* The Naked Sun, R. Daneel, is suspicious that Elijah is falling for the prime suspect in the murder they're investigating:
* The Naked Sun robot to understand why spanking a child performs a greater good for their future development than failing to administer any punishment.
* The Naked Sun, Spacers treat Earth with "at best, a patronizing social benevolence" thanks to the Outer Worlds' vast economic and military superiority. Earth has no access to the Outer Worlds and no choice but to trade with them on their terms.
* The Naked Sun's "tridimensional images" do flicker within their force-field enclosures, while the technologically superior Outer World colonies' are perfectly realistic. Elijah, an Earthling on assignment to an Outer World, is surprised the first time his conversational partner is revealed to be a hologram.
* The Naked Sun there is a Solarian "sociologist" who is incredibly backwards, not even recognizing that mathematics can be used in sociology, who nonetheless knows about Greek history, despite the fact that he would never think of reading Earth sociological researches.
* The Naked Sun, when a detective interviews a woman who just finished bathing. Since it is merely a 3D communication, rather than personal contact, she has trouble understanding what the big deal is.
* "The Naked Time" and ducks into an empty briefing room. As soon as he's out of sight, he slumps back against the doors, which fortunately stay closed.
* The Naked Time instead. His suggestion created one of the most memorable scenes in the series. (It also gave him an excuse to show off the fencing lessons he'd taken to un-falsify his claim of knowing how to fence when he auditioned.)
* The Naked Time's movies, suggested instead that, to emphasize the future melting-pot setting, Sulu instead take up a rapier. He also told the producers that he was trained as a fencer — and then once they bought the concept, started taking lessons, and is an avid fencer even today.
* "The Naked Time". The body of the station engineer was found seated at a desk wearing protective clothing.
* The Naked Time the result of a strange phenomenon. At least he was able to duck into a room before he fell to pieces.
* The Naked Witch, the innkeeper is having an affair with the widow while his wife is sick. However, when the widow starts demanding that he put aside his ailing wife and marry her, he accuses her of witchcraft and has her executed.
* The Naked Witch, the witch rises from her grave after the student removes the stake from her chest.
* The Naked Witch, the witch stabs the miller and pushes his body into the stream; staining the water red with his blood.
* The Naked Women's Wrestling League, a defunct erotic women's wrestling organisation, was exactly what it sounded like- women wrestling in the nude (referees wore black-and-white striped shorts only). The interesting thing was that it was
* The name "Adam Smasher". When the original TTRPG was written, atom smashers were the new cutting edge in high-energy tech and advanced research, and the Punny Name probably felt cool and futuristic. In 2020, when atom smashers are regular pieces of scientific hardware, and everyone calls them "particle accelerators" instead of "atom smashers", the name makes him sound like a bad guy from a particularly poorly dubbed Saturday morning cartoon.
* The name and premise of the tech startup h2o.ai could be seen as invoking this trope.
* The name "Barcalounger" (the brand of reclining chair) is a play on a the name of a type of sailing ship, the Barca-longa. No one but naval historians and readers of the
* The name Beedrill sounds pretty close to Russian for "of fags". When Ash encountered a swarm of Beedrill in an early episode of the anime, it led to some

snickers from Russian audiences.
* the name Better Than You also self identify as "class" but are less defensive about it, caring as much about public perception as the name implies.
* The name Caleb boomed in popularity after a villain in the show received that name.
* The name "Danny Katiana" for both Mr. Nosy and Nervous was ambiguous for several years until it was revealed that it was yet another pseudonym, this time for Rick Zieff (best known as Shusuke Amagai from
* The name doesn't refer to the type of workers they organize, but to their organizational strategy. Trade Unions organize based on trade- carpenters, plumbers, actors, etc; a workplace might have multiple unions representing different kinds of workers. Industrial unions, on the other hand, organize based on industry- construction, logging, retail, etc. A workplace organized industrially only has one union, which works better with the IWW's willingness to strike in order to bring business to a halt and long-term goal of overthrowing capitalism.
* The name Dottski was a reference to the Dotts, the owners of the game publisher. (Many of the other soldier names in the game were also references to the game designers and playtesters.)
* The name "Dream Theater" itself came from a closed-down theater in California.
* The Named written on Twitter and a short story in an anthology of speculative fiction.
* The name "Elizabeth Bathory" probably brings to mind images of a beautiful vampire-esque woman bathing in the blood of virgins to restore her youth. In real life, no such charge was ever leveled by her contemporaries—some of the allegations were equally lurid, describing marathon torture sessions that flooded the floor with blood and putting the number of her victims at 650, but there's nothing about virgin blood making her younger. Bathory
* The name for Miss Bossy and Miss Curious' actress Sophie Roberts leads to a pseudonym of Michelle Ruff, but she stated that she never worked for the show. It was later revealed by Cheryl Chase's LinkedIn page that she was the voice to Miss Bossy (unsurprising given who Chase is
* The name for the company Pixar. It sounds perfectly clean in English, but in Catalan (the language spoken in Barcelona and vicinity), "pixar" means "to urinate."
* The name for Torchwood's pet pterodactyl, "Myfanwy", started as an off-screen joke by cast and crew but made it onto the extra-textual website canon if not the show itself. Though a few years later she has been referenced by name in a
* "The Name": Gumball/Zach grabs an apple off a table someone else is sitting at and takes a bite out of it. This apple turns out to be Banana Joe's cousin, not that Zach cares. He also licked Sarah's face to eat a little bit of her, though she seemed to think of it more like a kiss.
* The name "Herbal Essences" is probably meant to sound alliterative, but it only works when said with an accent that drops the H in "herb"; in other accents, "herbal" has a voiced "H" in it.
* The Name Is Bond, James Bond: A character introduces themselves by saying their surname and then their full name.
* The Name Is Bond, James Bond: A character introduces themselves by saying their surname, then saying their full name.
* The name Jalen and other variations was popularized in the 1990s by the basketball player Jalen Rose. Rose's name was a combination of the names of his father, James and his uncle Leonard.
* The name "Jennifer" became hugely popular in the United Kingdom after
* The name John Smith is so common that anyone who introduces themselves as such would immediately be assumed to be faking. Must be annoying for people who actually are named John Smith...
* The name "Kayleigh" was popularized in the U.K. after it appeared in a 1985 hit single of the same name by the British
* The Namek/Frieza Saga(s). While not the most blatant examples, they are by far the most (in)famous. Several of the episodes consisted of just characters speaking

or flying from one place to another, with very few fight sequences to break it all up. One episode was just Bulma tricking two of Frieza's henchmen into looking for the Dragon Balls, which turned into a
* The Namekians also have their own native language, though they default to the same language that everyone else uses (Japanese or whatever translation the viewer is watching). One of the Namekian village elders speaks in Namekian to try to hide that they can understand Frieza, although Frieza is well aware of the fact that he can speak the same language as everyone else. Also, the Namekian
* The Namekians, a race of plant-like slug people, only need to drink water to live. Piccolo is seen eating fish, however, and he can eat the oh-so-useful
* The Namekians don't need food, only water, as they're actually a type of
* The Nameless Filly was a incredibly brilliant in both magic and tactics, being said to have the potential to surpass Starswirl the Bearded and possibly become an Alicorn one day. Unfortunately, she ended up developing
* The Nameless God was sealed away behind multiple guardians, time-dialating archways, wards, and gates sealed with blood. Freeing it is the goal of the cultists that kidnapped the children of Ilmater's Hope.
* The Nameless Guy is kind of a weird example. He claims to be non-white, but looks just like the white characters, if anything slightly paler. Since he is Jorge Cham's
* The Nameless Mod community. Many of the major characters are people who worked on the mod.
* The Nameless Mod gameplay, branching storylines, and thousands of lines of voiced dialogue.
* The Nameless Mod game, the player character is the project's lead Trestkon. Lawrence "Trestkon" Laxdal does not provided the voice (although he does other characters). Jonas Waever, another high ranking person in the development, does voice himself.
* The Nameless Mod has one level when you upload an insane AI to your brain. He'll spin around your vision as you frantically try to find a computer to dump him into.
* The Nameless Mod: has this quote from a Board Guest: "I can't believe the moderators won't do anything! Every time I ask something, people call me a faq!"
* The Nameless Mod how he's being given lethal ammo for solving a problem peacefully.
* The Nameless Mod, is this so much, that if you knock him out at PDX headquarters, King Kashue won't come downstairs and mop the floor with you like if you knocked anyone else out. If you kiss his ass, however, he'll give you extra goodies for missions.
* The Nameless Mod: The game is set in September of 2004 and was released in 2009. A few things slipped through however.
* The Nameless One is covered from head to toe with scars. So much so that he cannot even see his original, unscarred face underneath them. In any other game, he would serve as a brutish, monstrous villain. Of course, this trope isn't subverted if you choose to play as an evil character.
* The Nameless One recovering a memory in which an earlier incarnation manages to prove to a Sign of One devotee (a sect of solipsists) that he does not actually exist... Said man then disappears, much to the delight of the crowd who has gathered to watch the debate.
* The Nameless One's previous incarnations have a habit of leaving behind tidbits that help him along on his quest, whether deliberately or not. In particular, without the efforts of
* The nameless, reclining nude person in the memetically weird claymation short
* The name "Lyoko-Warriors" ("Lyoko-guerriers" in french) was invented by the
* The name made a comeback with the new Legion of Monsters introduced in the 2010s, in which every original member but Ghost Rider returns, in addition to N'Kantu the Living Mummy, gillman Manphibian,
* The name Mungojerry is itself a case of this, as even though it originates in the original T.S. Eliot poems that inspired the musical, most people associated it with

* The name Nimrod was not an unfortunate name in Bible times, but has become so these days because of its association with dimwittedness from Bugs Bunny.
* The name "Oedipus Rex" is itself a bit Groman, since Rex is a Latin word. The original Greek was "Tyrannos."
* The name of an Austrian emperor indicates a use of this in Kafka's
* The name of an episode along with other love songs. Love songs become an annual Valentine's Day theme on the show.
* The name of Canadian indie band Tokyo Police Club is pure word salad served up by a random band name generator website.
* The name of episode itself is a shout out to the well known Bugs Bunny episode
* The name of the American state of Idaho purportedly comes from a Shoshone expression "ee-da-how," meaning "Look, the sun coming over the mountains." There is no such phrase in Shoshone — though there is a Plains Apache word "ídaahę́" which means "enemy". However, it is actually
* The name of the band is an anagram of Cully Stout Beer, which the members of the band claim to have been drinking while they brainstormed. (The
* The name of the book that the legend came from should have tipped somebody off, as it was supposedly titled "How the Sea-Pony Wished Upon a Star and Unknowingly Started Racial Prosecution Under An Emergent Fascist Regime: A Collection of Filly’s Tales and Legends That Start Off Whimsical But End in Destruction and Death".
* The Name of the Cat by Barbara Holland has a section about the importance of neutering, which comments that male owners of tomcats are frequently uncomfortable with this.
* the name of the corporation running the Game Station in the year 200,100, scattered across the universe by Bad Wolf!Rose.
* "The Name of the Doctor" have no eyes or nostrils, only sharp-toothed mouths.
* The Name of the Doctor" in which the Doctor's current companion, Clara Oswald (who has entered into an unconventional subtle romance with the Doctor) encounters the Doctor's wife, River Song — who is actually dead, but whose consciousness has been retained inside a supercomputer (long story). The Doctor, when asked by Clara if River is his "ex", replies in the affirmative. Other than an awkward moment in which Clara, who has never heard of River before, indicates she thought River was a man, the two get along fine, and River is directly responsible for keeping Clara alive at the climax of the episode.
* "The Name of the Doctor" she tries doing it to get his attention, even though she's just a mental projection he shouldn't be able to see. To her surprise, he catches her hand mid-slap.
* "The Name of the Doctor" the Doctor and Clara get to the planet Trenzalore by orbiting it, then turning off the TARDIS engines and letting gravity take its course.
* The Name of the Doctor": The Doctor hooks Clara up to the TARDIS' psychic network, via snapping a wire to her hand.
* "The Name of the Doctor" turns to face us. The turn itself stands as a cliffhanger.
* "The Name of the Doctor" unexpectedly appears in a place he shouldn't be, and then turns to face the camera as an on-screen credit informs us who he's playing: a previously unknown incarnation of the Doctor.
* "The Name of the Doctor" woven within the fabric of the universe. This is revealed to be the "corpse" held within his tomb, rather than the actual physical body of his final incarnation.
* The Name of the Game arrived first, making up a Jewish elite. Then, from 1830 and onwards, the Ashkenazi Jews started their immigration from the Germanies, followed by the eastern European Jews (also Ashkenazi).
* The Name of the Game, being the first of the Universal/NBC wheel programs)
* The name of the missing eldest Todoroki sibling was widely speculated, especially after theories emerged that he became the villain Dabi.
* The name of the old USA's Chromium Guard power armors is largely a thing of the past, instead everyone knows them as Glitter Boys.

* The Name of the Rose (1986) has Sean Connery as William of Baskerville, a monk investigating mysterious deaths in a fourteenth-century abbey.
* The Name of the Rose, Adso gets separated from William while in the catacombs, and they try to find one another by voice. Adso suddenly sees a figure with a lamp across the hall, and calls out that he sees someone. It's William, and he identifies himself by flickering his lamp three times.
* The Name of the Rose also stripped away all of the description of dreams, historical lessons and other scenes not directly related to the main plot.
* The Name of the Rose, both characters were inspired by Watson and Sherlock Holmes.
* The Name of the Rose. Brother William is a Franciscan friar who arrives at a Benedictine monastery in Northern Italy to attend a theological disputation. This abbey is being used as neutral ground in a dispute between Pope John XXII and the Franciscans, who are suspected of heresy. When a series of mysterious deaths occur in the abbey, Brother William is forced to turn detective.
* The Name of the Rose (by Umberto Eco), the villain tries to eat a unique book rather than let the protagonists have it. Bonus points because he had already poisoned the book.
* The Name of the Rose features a murder mystery whose solution hinges on the contents of Aristotle's lost second book of Poetics (dealing with comedy).
* The Name of the Rose hidden, an evil monk poisons the page corners so anyone who reads it will die before they can tell others about it.
* The Name of the Rose in a medieval monastery. He goes to tell William of Baskerville, who tells him to lock himself in his room and let no-one in until he arrives (Baskerville is held up in a theological conference). On returning to his apothecary, he shocked to find the place ransacked. He bolts the door and quickly goes to check the book is still there. It is — lying on the floor under a table. The herbalist is relieved, until he sees a hooded figure step out from behind a curtain and walk toward him...
* The Name of the Rose is the story of the monk William with his novice sidekick Adso as they visit a famous monastery and investigate several mysterious deaths there.
* The Name of the Rose itself is about this. The detective character is constantly trying to interpret the clues in their proper contexts. There are so many ways to read the book that, like the symbolic rose, the conflicting interpretations make it practically meaningless. All the interpretations any reader gets are all valid.
* The Name of the Rose postscript in part to clarify that the hard-to-get-into beginning was a deliberate choice.
* The Name of the Rose (set in 1327) it's mentioned that William eventually died during the Black Death.
* The Name of the Rose. The first death involves a defenestration beneath a window that cannot be opened, leaving the monks to suspect supernatural evil is at work. Brother William easily proves the man was a suicide who jumped from a nearby tower and his body rolled to its final resting place. Unfortunately this death is quickly followed by others.
* The Name of the Rose: the novel's title is ambiguous, as it ends with the lines "Stat rosa pristina nomine, nomina nuda tenemus / the rose of old remains only in its name; we possess naked names." The film makes the title explicit; the "rose" is the peasant girl that Adso loved, but whose name he never learned.
* The Name of the Rose; when the time comes for him to be executed as a heretic alongside Remigio and the nameless girl, he's so disengaged from reality that he can only sing a lullaby as the pyres are lit.
* The Name of the Rose, when William of Baskerville is talking with another monk about someone in China inventing a powder that can blow up large amounts of rock, and therefore can probably blow up large amounts of people. The monk asks about using it against God's enemies, William asks which of the Emperor or the Pope is the greatest of God's enemies at the moment. The monk concedes he wouldn't want to be the one to answer that question.
* The Name of the Rose who manage to kill Gui in the resulting chaos. In the book,

Gui prevents this from happening by simply having the three of them transported away and executed elsewhere, where no rescue attempts can occur.
* The Name of the Rose, with a novice monk playing the rookie cop role.
* The Name of the Rose without his "lenticules." Since the plot entails a series of murders involving a library and its contents, he is seriously handicapped when they end up getting stolen by the apparent murderer.
* The name of the trope is not just word play. Strong negative emotions cause a not-completely-understood reaction between the enteric nervous system (the so-called "second brain") and the anterior cingulate cortex (which regulates physical and emotional pain). It's the same reason your stomach turns in knots when you're scared and why you get butterflies in your stomach when you're nervous.
* The name of the war obsessed alien Commander Kel-X manages to combine multiple harsh sounds.
* The name of the website Slashdot was chosen to make its address as confusing as possible when spoken: h-t-t-p-colon-slash-slash-slash-dot-dot-org. Not that anyone speaks the "http://" part aloud anymore.
* The Name of the Wind: Cinder of the Chandrian has a smile that is described as "the expression a nightmare wore."
* The Name of the Wind has a map, but does not follow the "if it's on the map, the characters will go there" rule of most fantasy; many places that are mentioned or visited are not detailed on the map even if they're in the geographic area.
* The Name of the Wind has Kvothe narrating his story to a scribe. The book is the first in a trilogy, and each book is a day's worth of narration.
* The Name of the Wind he spends trying to cope with emotional trauma while living on the streets.
* The Name of the Wind is barely explained, but it's rare, far more powerful than sympathy, and described as "fairy tale magic". There are also the even rarer Fae magics, grammarie and glamourie, the art of making things BE, versus making things SEEM. The same University that teaches these arts also teaches medicine, informatics, rhetoric, and linguistics, which aren't exactly magic.
* The Name of the Wind, Kvothe and Denna discuss this as they figure out a way to stop the Draccus; Kvothe mentions that it would probably take only a fall of about ten feet to kill the thing.
* The Name of the Wind, Kvothe fakes this trope — he's been living as a beggar and he just came into some money, and he figures that pretending to be a nobleman who got his clothing stolen is easier than pretending to be a noble while wearing any clothing that he owns.
* The Name of the Wind, Kvothe never had a hometown, but his parents and their caravan of traveling performers are slaughtered by the Chandrian. This sets him off on his adventures alone and will eventually lead him to seek out the Chandrian for revenge.
* The Name of the Wind, Kvothe's mother gets him to study formal etiquette by asking him if he wants her to be proud of him.
* The Name of the Wind lives in the space beneath the Arcanum, which she calls "the Underthing." When Kvothe asks her to show him around, intending to sneak into the library, she feigns shock at his audacity in asking to see her Underthing.
* The Name of the Wind that marks locations in the world where teams of librarians are retrieving more books. There is one character, Puppet, who has lived in the Archives for years. There are "bad neighborhoods" of shelves with no organization whatsoever. There are secret passages that access the Archives from the undercity that was buried hundreds or thousands of years ago.
* The Name of the Wind, the protagonist Kvothe writes the song "Jackass, Jackass" to mock his school rival Ambrose. Since personally performing the song too often will get Kvothe in serious trouble with the University authorities, he writes the song as a deliberate Ear Worm. By the time he gets reported, it's all over town. Reader beware: the selections of the song included in the text are Ear Worms in their own right.
* The Name of the Wind the reputation as one of the greatest fighters, wizards, musicians and adventurers in living memory. So much so that the story uses the

framing device of a historian tracking him down to hear the true story behind the legends. Some of the stories about Kvothe were greatly exaggerated, but many weren't.
* The Name of the Wind, when Kvothe finds the massacre, he hears the killers talk; Lord Haliax rebukes Cinder for not killing cleanly.
* The Name of the Wind, where the Adem, a warrior race whose mercenaries wear all red outfits, and are pretty unlikely to even be wounded.
* The Name Of This Book Is Secret and its sequels by Pseudonymous Bosch, although it's pretty much confirmed by now that he's author Raphael Simon.
* The name on his the reddit screen on the same video is George Newman, his character from UHF.
* The name "oregano" has been given to several different species on the basis of similar flavor and aroma; e.g., Mexican oregano and Cuban oregano are completely different plants. Also, true oregano and majoram get mixed up in several languages, with either being named after the other.
* The name Petal is usually for a soft-spoken and kind she-cat. But as for Petal from
* "The Name" pulls a vehicular equivalent of the "door opens the wrong way" version:
* The name "Saber-toothed tiger" is a misnomer, they are not actually tigers. In fact, some of the species are not, cladistically, cats at all; the saber-toothed animals include predators from many different mammalian orders, some part of the cat family, some not. The genus most known to the public,
* The Namesake, deals with the protagonist, Gogol, struggling to balance between his American side with his ties to his Bengali culture. Ultimately, neither ideal works out in the end.
* The Namesake film based on the book, this is messed with viciously. Gogol(now Nikhil) and Moushumi are about to go on a train to see Gogol's parents. Gogol then finds out about Moushumi's affair with her high school sweetheart. Gogol turns away from her in the train station and Moushumi walks away, embarrassed.
* The Namesake, Gogol's college girlfriend makes a horrible impression on Ashoke and Ashima when she first meets them, first by bringing them an overly elaborate gift, then by addressing them both by their first names without their permission (probably because her own parents allowed Gogol to do this with them), and is physically affectionate with them (kissing them on the cheek) and Gogol (holding his hand) in their presence, something frowned on in their more traditional culture. It's especially irritating as Gogol warned her about all this before the meeting, only for her to completely disregard it. She dooms the relationship by showing up at Ashoke's funeral in a black (everyone else is clad in white), sleeveless dress.
* The Namesake, Gogol's girlfriend buys a large and overly elaborate present for his parents, despite him telling her that it isn't necessary. Although they don't openly hate it, they're clearly indifferent rather than impressed.
* The namesake installations of the series are simultaneously a warning and the threat. Also, the Halos' all-but-extinct creators, the Forerunners, have
* The names and number of Wise Men who visited Jesus were not mentioned in the Bible; they come from 6th to 8th-century sources. In Western Europe, they were assumed to be 3 because 3 were the gifts they gave to Jesus, but in Armenia, for example, they were 12. What's more, they likely did not visit Jesus on the day of His birth or twelve days after. It could have been up to two years.
* The names and positions of the Mata Nui island's landmarks corresponded to facial features. Even the name itself meant "Great Face" in Maori, and one of the primary promotional posters featured half of the island enveloped by an Infected Mask representing
* The name says it all. This is also probably one of the best examples of this Trope in existence. What is it? None other than
* The names Dylan and Brandon experienced a surge in popularity during the run of
* The names for the Sons of Hodir daily quests: "Blowing Hodir's Horn," "Thrusting Hodir's Spear" (unlocked by completing the quest "Raising Hodir's Spear") and

"Polishing the Helm" (unlocked after completing "Mounting The Helm.")
* the name skyrocketed in popularity "Enzos" went viral, and the name is now memetic as a trendy baby name (for single moms in particular; the female equivalent is "Valentina", which took off without a clear reason). Like "Karen", "Becky", and "Chad", it is also an online slang term: say "Enzos", and others will know you're talking about the current teenage populace in a demeaning way.
* The names of Gwendolyn's Spear (Gungnir) & Cornelius' Sword (Almacia) are only mentioned in the Art Book, the other weapons are named in the game.
* The Names Of Love, straitlaced Arthur is yanked out of his boring life by the younger, free-spirited, free-loving Baya, who's so manic she occasionally forgets to put clothes on when going out of her flat.
* The names of most of the bodies in our solar system, such as Venus, Jupiter, Mars, Pluto, Io, Europa, Titan, Ceres, Eris...
* The names of the goons from Biff and Griff's gangs — as well as that of Lorraine's two friends — are only mentioned in the credits. Interestingly, the newspaper prop of the gang's arrest in
* The names of the months and days of the week were changed, most of them referring to revolutionary or agricultural concepts. Similarly, individual days were also given
* The name "Svetlana" was invented by a Russian poet and popularized by another in the early 1800s. It's still hugely popular today, both in Russia and outside it, and is even used as the Russian translation of a Greek saint's name. "Svetlana" wasn't a nonsense word, though; "svet" means light, and it's a little like naming your daughter "Radiance" or something. The closest English equivalent would be Helen.
* The name was first used as the title of a 70s comic and featured swamp monster
* The naming conventions and other things of stronger ninjutsu are a bit different in the beginning. In the Wave Country arc, stronger attacks took a
* "The Naming of Cats" explains that every cat has no fewer than three names: the normal name for everyday use, the more complex name which is unique to that cat, and the secret name which they never, ever tell.
* The naming on this one is convoluted, so here goes: Filmation produced a live-action series called
* The Nam the new guy is watching a movie when the Viet Cong launch a mortar attack. The new guy starts to go for cover but is stopped by his buddy, who assures him that they are safe since the enemy are watching the movie too, "Charlie don't get no R&R."
* The Nam was billed as "an 8 year limited series", for how long the Vietnam War took after the US got involved. Each story takes place one month after the previous one did.
* The Nancy Drew Files, in which Nancy was 18 (as in the revised editions of the original series). With the modern setting, it becomes increasingly unconvincing that the bright daughter of a lawyer wouldn't be either working or at college.
* The Nancy Drew in which Frank, Nancy, Joe, and various combinations of Bess, Chet, George, Biff, Tony, etc., taking down everybody from corrupt CEOs to terrorist cells.
* then, and also at the tail end of a number of challenging battles, including Tagazin.
* The Nan Dumpster from Luke Harrap's dream in 2018 is a rusty dumpster with arms and legs made from multiple doll limbs, a tongue made from
* then and win the right to make their own terms of surrender for the Yeerks.
* Then a new campaign, #RestoreTheSnyderVerse, sparked in the wake of the release of the above film to globally positive reception, this time aiming at continuing from where the film left off. The aforementioned Ann Sarnoff has made it clear that Warner Bros. is not keen on doing that, since the studios has different plans for big screen
* The Nanite Event itself, the cause of all EVO-related problems, thought it was either that or humanity becoming slaves to corrupt, power-hungry gods.
* The Nanny about having huge feet and then waking up to Mr Sheffield making out

with her after she tells him about it. When she wakes up for real, she pinches herself to make sure she isn't still dreaming.
* The Nanny actually first pitched the idea of the show to a CBS executive.
* The Nanny: After she learns that several people have tried to woo Niles away from Maxell in the "Curse of the Grandmas" episode, Fran gets upset when Maxell laughs at the idea that anyone would try to woo her away.
* The Nanny, a photographer refers to C.C. Babcock as "Miss Boobcock", which gets reprinted in several places and even on a billboard.
* The Nanny as she was promoting her new "Black Pearls" perfume while wearing a $300,000 string of actual black pearls, which Fran Fine accidentally lost in the first episode. The search lasted the rest of the night, ending when they were found in the fourth episode.
* The Nanny but seems to have decided he's harmless and to let it slide.
* The Nanny by Fran "And that concludes today's audio-visual demonstration."
* The Nanny), by Fran mentioning that she has seen her boss naked once.
* The Nanny called "The Fifth Wheel", C.C. (who goes by "goodnplenty") gives up men after finding out that "porchepuppy" was actually 15-year-old Brighton. She is surprised by his vocabulary.
* The Nanny: C.C. is convinced she's in one with Fran for Mr. Sheffield, but the truth is he's completely oblivious to her feelings. C.C. at one point implies that she also had this going with Maxwell's late first wife.
* The Nanny C.C. When the name was revealed, everybody in the room (including a woman in the middle of delivering a baby) all looked at her completely shocked.
* The Nanny, "Close Shave", Maggie starts volunteering at a local hospital as a Candy Striper because her father doesn't want her to take "a paying job that someone who needs the money would be better suited." When Maggie wants to have a night out with her boyfriend, Fran covers her shift at the hospital and dons the red-and-white striped uniform. The episode aired in 1995.
* The Nanny Diaries, in which Mrs. X's husband sends his wife a crapton of roses as an indifferent apology to never being around. The smell ends up permeating the entire apartment.
* The Nanny Diaries: Played quite literally (and tragically), where the authors coin the term "spatula reflex" to describe the way Mrs. X is constantly brushing off Greyer every time he wants his mother for something.
* The Nanny did it twice, once with Max dating an almost identical clone of Fran and once with her dating a guy you could tell apart from Max only by his job. The girls got along pretty well, while the men started hating each other's guts almost immediately.
* The Nanny did this twice with the same moral. Any time the children were arguing, Fran would tell them to be nicer to each other. Rather than do the typical Aesop about loving your family, the first time she said "Yes, because someday your father's going to be old and sick... You're gonna want him to live with her." The second was more abrupt, "Be nicer to your sister, someday you might need an organ... and your brother's a different blood type."
* The Nanny did this with a humorous bent. C.C.'s dog Chester is kidnapped in the park, and the crooks call the Sheffield residence with a demand of $20,000. C.C. turns the tables by going on television and offering the ransom as a reward to anyone who can capture the criminals. Fran decides that she and Val can solve the crime by using this trope—she overheard an ice cream truck playing "The Way We Were" in the background of the phone call, which points to Greenwich Village, and then notices a school on the truck's route, recalling hearing a bell ringing in the message, too. Of course, she and Val end up getting caught too, and the dognapppers put Mr. Sheffield through a series of bizarre instructions (such as looking for a key in the bottom of a YMCA's swimming pool) before he can deliver the money.
* The Nanny dismissively realizes that Fran is a nanny, not Maxwell Sheffield's wife, Maggie says "Who asked you, you big green cow?!". Fran, however, calmly says "Maggie, it's turquoise...".
* The Nanny dog Chester, when they were both kidnapped and held for ransom. Fran

gives both the kidnappers some chocolate laxatives she had been given by Yetta earlier so she could escape while they ran across the street and wrestled construction workers out of a nearby Port-A-Potty.
* The Nanny ends with not only Fran and Maxwell having twins, but also C.C. and Niles discovering C.C.'s pregnant.
* The Nanny episode "A Fine Friendship", an in-universe version of this happens. Maxwell ends up seeing Fran in a bra and tells her to put a shirt on. The shirt gets stuck and this happens:
* The Nanny episode "Deep Throat", C.C. wants Maxwell to be her date at a sorority reunion:
* The Nanny episode "Mom's the Word," Brighton and Yetta were separated at the movie theater and ended up missing each other back at the house and all over town. Later, at the hospital, when Maxwell notices that someone's missing....
* The Nanny episode "Stock Tip", when Fran dresses up as a guy to get into a men's only club to talk to Maxwell Sheffield. After a while she reveals who she is, resulting in this classic:
* The Nanny episode "The Butler, the Husband, the Wife and Her Mother", Fran Fine criticizes Maxwell Sheffield for wearing bright yellow rain boots with his suit, saying "Normally, you're so GQ. Now, you're the Gorton's Fisherman?". Charles Shaughnessy, who played Maxwell, had shown up to his original audition wearing those same exact boots.
* The Nanny episode "The Butler, the Husband, the Wife and Her Mother", Niles is anticipating the arrival of inspectors of the Professional Butler's Association to determine whether he's qualified to join. Unfortunately, Fran's mother Sylvia is trying to impress their in-laws by telling them that Fran's married to Maxwell Sheffield, and with Maxwell out at the time they arrive, Fran makes Niles pretend he's Maxwell. Worse, the inspectors arrive to evaluate Niles' performance. When Maxwell returns, Maxwell has to pretend he's Niles.
* The Nanny episode "The Playwright", Fran tries to talk a former classmate out of jumping off a building.
* The Nanny followed the format to a certain extent, but was justifiably far larger. People entered stage-right into a reception area with a hall and stairs leading to other parts of the house (and a bathroom under the stairs), then travelling right were the lounge/sitting area, a separate dining room, and a separate kitchen. Max and CC's office was behind these somewhere. Upstairs were the bedrooms and bathrooms. There was also a large but seldom-seen basement/wine cellar which Fran and CC locked themselves in at one point.
* The Nanny, Fran agrees to go out with a guy, whom she had rejected in High School. Then he asks her to marry him, or he will jump out of a window and kill himself. But when it seems like everything has turned out alright (Maxwell has read a play he has written and decided to produce it), he trips and falls down several floors by accident, only to have his life saved by landing in a garbage pile on the pavement below them.
* The Nanny, Fran and C.C. are called for jury duty, and Maxwell hopes it'll take Fran's mind off the fact that he had recently told her he loved her and then took it back. In the trial, the defendant is a housekeeper who is accused of assaulting her boss with a pair of scissors to chop off all his hair, but the trial also reveals that she did it because her boss told her she loved her and then took it back. This prompts Fran to immediately sympathize with the defendant and insist she's not guilty, even after the defendant blurted out a confession on the witness stand. Fran proceeds to drive the other jurors crazy because she refuses to vote guilty.
* The Nanny: Fran Descher's character, who ended up marrying the father. She's able to connect with the kids in a way they'd been missing, and she specifically helps neurotic youngest child Grace.
* The Nanny: Fran Fine and Maxwell Sheffield get married at the end of season 5.
* The Nanny, Fran frequently refers to Maggie as a Shiksa Goddess. This ended up becoming foreshadowing when Maggie actually does marry a Jewish boy in the final season.

* The Nanny: Fran is changing a baby boy's diaper when Max warns her to stand over to the side rather than in front in case of this trope, commenting that his own son was able to hit the wall clock.
* The Nanny: Fran is deliberately obtuse about her age but the evidence suggests she is in her early thirties. Maxwell appears to be approximately ten to fifteen years older, and has three children, two of whom are college-aged by the end of the series.
* The Nanny. Fran is something of a played with example. Fran was an avid Fashionista and frequently mentioned having her credit cards maxed out, including an episode dealing with being a shopping addict. On the other, she was shown to be rather thrifty about it, favoring outlet malls, shoving her feet into too-small shoes that were on sale, and showing that some of her clothes came from having designer Todd Oldham as a cousin. Her family plays it much more straight: Grandma Yetta apparently recycled tea bags, Sylvia would buy cheap shoes and put them in the freezer so they'd be less painful, and she apparently taught Fran such tips as "why buy Sweet-n-Low when restaurants give it away" and "suck the innards out of chocolate covered cherries before they weigh the bag."
* The Nanny Fran merely looks at the camera and says, "I always wondered how she could have been a thirteen-pound preemie", referencing the preemie-as-code-for-shotgun-wedding mentioned below.
* The Nanny, Fran revealed that she'd had constantly been admiring Maggie's male model boyfriend Michael's butt in the underwear ad he was in on the billboard over Times Square in the "Maggie's Boyfriend" episode. Maggie then went on to say, "It looks much better without his pants on".
* The Nanny: Fran's nasal voice is toned down in the Spanish dub and completely removed in the French, Italian, and German dubs, where she speaks in a normal voice.
* The Nanny From Moscow by Ivan Shmelyov has the eponymous nanny, who has spent her entire long life in the Russian capital, forced into emigration after the October Revolution. She has a lot of trouble adjusting to the life in other countries, even after her beloved ward becomes a world-famous actress and they are no longer in danger of poverty. She ends up happily settling down in Paris because at least it’s full of Russian émigrés and she can feels herself almost at home.
* The Nanny gets her own stalker in the form of Jeffrey Needleman, an old classmate from middle and high school. He threatens to fling himself out a window if Fran doesn't start a relationship with him.
* The Nanny Grace (who is about 7 years old) thinks she's pregnant, and her friend Willy who allegedly impregnated her makes plans to quit grade school and get a job to support them.
* The Nanny guest starring as Fran's old music teacher who looks remarkably like Marvin Hamlisch.
* The Nanny had an awkward relationship revealed at a wedding. Fran and a man were mutually flirting with each other and were thinking about dating. However, near the end of the episode, they both end up at a wedding of one of their relatives. Once there, Sylvia casually mentions that the two of them are closely related cousins. They are both mutually creeped out.
* The Nanny had a variation where after a few rounds of "You Hang Up First", another character - annoyed - picked up the receiver and hung up for them.
* The Nanny had Fran accidentally discover that a famous celebrity's famous beauty mark was fake and accidentally tell Cindy Adams.
* The Nanny had Frank Bradley in "Sunday in the Park with Fran", who pans virtually all Broadway plays. C.C. Babcock tries to curry favor with Bradley by making Maxwell Sheffield's youngest daughter, Gracie, go on a play-date with Frank's son, Frank Jr., despite Gracie's insistence that she doesn't like him and Fran supporting her. During the play-date, Frank Jr. is bullying Gracie, so Fran stops him by (gently) hitting him with a baguette. When C.C. and Maxwell learn about this, they try to make Fran apologize to Frank Sr., though it becomes obvious that winning over Bradley is a lost cause, and as he gets hostile towards Fran, Maxwell

tells him off about him and his son.
* The Nanny had its share of these; so much so, you have to wonder if they were ad-libbed.
* The Nanny had to miss several episodes in the fifth season since she was giving birth. To cover this up, her character C.C. suffered a breakdown and spent those episodes in an asylum.
* The Nanny has a nasal, snorty laugh that is very divisive with the the other characters.
* The Nanny has C.C doing this all over Gracie when she and Niles announce that "Miss Fine" was pregnant by "Mr. Sheffield". They were actually talking about Gracie's hamsters.
* The Nanny has Fran calling the NYPD to try to report a lost child. The first menu she gets says, "To report a murder, press 1. For mugging, press 2. For bomb threats below 34th Street, press 3. 34th Street to 72nd, press 4."
* The Nanny has Fran Fine, who is constantly dodging questions regarding her true age, even though in season one she celebrated what was allegedly her thirtieth birthday. Many in the household though have wondered if she's actually older, with her always coming back to insist that she could still be in her twenties. In a later episode, it was revealed that even the FBI agents performing her background check couldn't figure it out.
* The Nanny, he gets mugged outside the theater and the ring is stolen. They seal the engagement with the pull-tab from a beer can until he can get a replacement. The huge and expensive replacement comes from Cartier. Max didn't want to buy anything cheaper than that.
* The Nanny: In "Green Card", Fran gets engaged to a sleazy French guy who was hired to be Brighton's tutor. However, it is later revealed that he was only using Fran to get a green card to stay in the US and almost made a pass at C.C., causing Fran to dump him.
* The Nanny: In "Schlepped Away", Fran mistakenly thinks that her mother Sylvia is cheating with the butcher when she finds a love letter stashed in a packet of meat. It turns that Sylvia just flirts for lower prices, with Fran's father Morty's blessing, no less.
* The Nanny: In "Shopaholic", Fran becomes addicted to shopping in order to cope with her ex-boyfriend Danny's engagement to Heather Biblow. She even goes through withdrawals and has to have a "fix" via smelling shopping receipts.
* The Nanny: In "The Butler, The Husband, The Wife And Her Mother", Fran has to pretend that she is the wife of millionaire Broadway producer Maxwell Sheffield, and not his nanny, in order to impress relatives to whom her mother has been bragging. During the same episode, the butler Niles has to pretend that he is Maxwell, that Fran is his wife, and that the actual Maxwell is Niles in order to fool both the in-laws and the inspectors from the butlers' association evaluating Niles' performance.
* The Nanny: In the "Maggie's Boyfriend" episode, Fran and Maggie are seen looking at Maggie's boyfriend Michael's butt.
* The Nanny is an example of the mother-daughter relationship, with the running joke of her badgering Fran to get married and have kids.
* The Nanny is an upbeat and exuberant Jewish working class woman, who brings a much needed new spirit into the entire household of her more uptight widowed British employer, Maxwell Sheffield. Fran is the protagonist though, so she's a more well-developed character than the more negative examples of the trope. And even though Maxwell is attracted to her already from early on, he has huge commitment issues and needs almost five years to finally propose marriage to Fran.
* The Nanny is set in New York, since the father, Maxwell Sheffield, is a Broadway producer. The primary setting of the show is the Sheffields' home on Park Avenue, with occasional trips to Fran's home neighborhood of Flushing, Queens.
* The Nanny loser, so as she chats with a handsome young man, trashing Irvie, she introduces herself only for the man to introduce himself as Irvie. As he walks away, Maggie bangs her head against the wall.
* The Nanny, Max is talking to Fran about something confidential. When he's done he

presses the intercom button and asks "Your big fat ears catch all that Niles?"
* The Nanny, Maxwell and C.C.'s company Sheffield-Babcock Productions is putting on a musical. They put an ad in the newspaper, which announces it was produced "by Maxwell Sheffield and C.C. Boobcock". However, it ended up being subverted when C.C. remembers she gave the ad copy to Niles to give to the messenger.
* The Nanny, Maxwell grounds Brighton for trying to sneak past Fran to go to the mall in New Jersey. He then says that Brighton isn't allowed to go to his play premiere, which Brighton didn't want to go to anyway. Brighton is okay with that, until Fran convinces Maxwell to be "lenient" and let him go to the play.
* The Nanny, Maxwell is generally considered very uptight, especially in contrast to Fran, but sometimes demonstrates a hidden kinky streak. For instance, when he learns Fran has a secret tattoo he is visibly aroused and spends days fantasising about where on her body it could be. At the end of one episode, after they get married, he and Fran head off to bed to roleplay a threesome between Max, "the wife" and "the nanny" with the aid of a blonde wig.
* The Nanny. Maxwell's first confession of love to Fran was when they were on a plane that was about to crash. He takes the confession back after they get home safely. For much of season four, many characters, especially Niles, give him crap for taking back the confession.
* The Nanny: Mr Sheffield's stepmother, the secretary his father left his mother for, bears a lot of similarities to Fran. When they appear together they're even dressed the same.
* The "nanny nanny boo boo" gesture that is popular with children in America (with putting the thumb on ones's nose and wagging one's fingers) means "kiss my ass" in American Sign Language. One teacher told her class about how she did not know that when she was a young ASL student working with deaf children for the first time
* The Nanny Niles and Brighton also try to teach it embarrassing and untrue statements about Ms. Babcock and Maggie, respectively, but it won't cooperate with them.
* The Nanny. Niles, however, reassures him he'd taken care of it. Cut to C.C.'s apartment where she finds two singing and tap-dancing telegrams at her door:
* The Nanny, Niles occasionally makes these kinds of jokes about C.C. For example:
* The Nanny, Niles will occasionally use this as a way to mess with C.C..
* The Nanny occasionally has moments of this with Grace and boys her age, as well as with Brighton while a preteen and girls his age.
* The Nanny often indulges in Borscht Belt comedy, being centered around its Jewish-American protagonist.
* The Nanny: Of the three Sheffield children, Gracie, who is the youngest, seems to be the closest with father Maxwell.
* The Nanny played by Niles the butler and his secondary elves played by Maggie and Gracie Sheffield, as they try to stop the Abominable Snowman, or rather, "the Abominable Babcock" since she's being played by C.C. Babcock.
* The Nanny played with the trope. Fran and Val are sitting on a park bench and a man with a long trenchcoat approaches them and holds it open. The audience only see him from the back, and the dialog at first implies he's flashing them, thanks to many innuendos until we finally see the watches. Later in the same episode, Fran sees the man and tries to summon him over to buy a watch, but he holds open his coat and flashes them instead.
* The Nanny pregnant. Grace and her "boyfriend" (male friend) "slept together" (they had a nap at the same time) which made her "late" (to a movie). The boy decides to do the right thing: marry Grace and find a job.
* The Nanny: Prim-and-proper Maxwell and the eccentric, humorous nanny Fran.
* The Nanny/Ray Barone), parents named Sylvia and Morty, a sister named Nadine, the list goes on and on.
* The Nanny regarding a soap opera. When soap-neophyte C.C. is pulled in to a show's cliffhanger, she asks if they'll find out what happened tomorrow. Fran scoffs, saying, "Please, this is a soap. Six months from now, we'll be lucky if that coffee she's making will be ready."
* The Nanny relationship with her. Fran then got back inside the cake.

* The Nanny relationship with Mr. Sheffield (a man who said he loved a woman then took it back), and she gets inappropriately emotionally invested.
* The Nanny's real life dog, and was so fiercely loyal to her that any time Lane picked up the dog, he would just naturally growl, so they wrote it into the story that way.
* The Nanny Sylvia, but even Fran herself indulges in it on occasion. One episode has her hiding shrimp from a cruise buffet in her purse.
* The Nanny: The reason why Max and Fran don't get together at first is that he has loads of emotional baggage (including a dead wife). Later Max proposes to her at the end of the fifth season, and they get married, staying so for the final season.
* The Nanny there is an episode where Fran pretends to be an old friend of Max's who looks exactly like her to see if he is falling for her instead. He sees through it (but only after he notices the price tag hanging out of the back of her dress).
* The Nanny: The season 4 episode "The Bank Robbery" features one who takes Fran and Sylvia as hostages, but otherwise is so unprepared that he forgets to put on a mask and reveals his real name. When he finally makes a run for it, he takes Sylvia with him... and her appetite leads to him having to stop at a restaurant, where he's caught and arrested.
* The Nanny. They try to pass the time chatting, but C.C. eventually gets exasperated with Fran.
* The Nanny. They were quite a fun Beta Couple since they hated each other as much as they were in love, so they were always attacking the other.
* The Nanny times. (It didn't help that the first time he said anything of this to her it was a marriage proposal. And then another. And another.) Eventually, they got married and were expecting when the show went off.
* The Nanny together without their being able to fully understand the plot, which is played for laughs.
* The Nanny to Niles, CC and Fran. Especially CC, since she was usually found sitting on a leather couch behind the door in Maxwell's office.
* The Nanny) to prove that she has more to offer than merely her looks. The 'blind mistakes' are mostly hers (she breaks a vase and lets him think that he did it, and throws a ball for his guide dog to fetch while he's still holding on), though he does nearly drink a candle when they first meet at a bar.
* The Nanny, until she sees how upset the Sheffield household is about her leaving, especially the Sheffield children. So, she decides she no longer needs him in her life and decides to stay.
* The Nanny, until Sydney mentions that she's gay, and therefore not a threat. Fran's reaction is absolutely priceless:
* The Nanny was held back a few times. She's making it up, of course, but Niles finds it a believable excuse.
* The Nanny was so popular that the producers actually hired the original American writers to write 25 more episodes.
* The Nanny: We get this exchange after Mr. Sheffield wonders if Fran is dating some other man:
* The Nanny, when Fran, a Jewish American woman, gets a French boyfriend, her mother speaks loudly and slowly with him.
* The Nanny, when Fran gets engaged, she calls her mom, who puts her on hold to talk to someone else. She tells them. They call someone else, and so on, and so on, and so on. Each time, a picture of that person is added to the screen. By the time mom gets back on line to Fran, everyone knows.
* The Nanny when he uses this as an excuse for why he is unable to show his feelings. He and his entire family are perfect examples of this, with the exception of his brother Nigel, who has been shown to be very passionate and exuberant, although he was considered the black sheep of the family, and supposed to be the exception that proves the rule.
* The Nanny when Maxwell, after seeing them, stammers "I...I...I don't ever want to see that again!"
* The Nanny when she loses his Shakespeare original (manuscript) after being mugged. They were treated to Shakespeare plays on their TV channels.

* The Nanny who seems absolutely perfect for her: Jewish, a doctor, and understands her. At Fran's cousin's wedding, they see each other, and kiss. Cue Fran's mother...
* The Nano Flower. Event Horizon has stolen the design for electron-compression warheads and used them to blast an asteroid into Earth orbit and mine it. The caverns get turned into a space station called New London and the climax of the novel takes place there.
* The Nano Flower from how they've been given augmentations for their own jobs.
* The Nano Flower, the alien organism leaves to find an uninhabited solar system, by shapeshifting into a solar sail 500 kilometers in diameter.
* The Nano Flower. The head of a SETI project is consulted on whether an alien could have arrived undetected on Earth. He points out that the power needed to move a spacecraft across interstellar distances is colossal, so "...the plasma from the reaction drive would scream like a nova across the radio bands. We'd spot it half a light-year out." And a wormhole large enough for a spaceship to travel through would create gravitational distortions that would be easily picked up on the gravity-wave detectors currently used by scientists to study general relativity. However he does point out if they have arrived undetected, finding them in the solar system would only be possible with an electromagnetic sweep for any power leakage from the spaceship's onboard systems, but it would take five years and two billion pounds to build a system capable of doing so.
* "The Nano Flower": The Kinetic-Energy Harpoon is mentioned, although not used on-page. It's described as a "poor man's nuke"
* The Nano Kitty and Nano Puppy virtual pets would walk offscreen carrying one of these with a "Bye Bye" text if you neglected to take care of them for a long time (or if you used the "Discipline" option excessively.)
* The Nanosuit 2 in the sequel takes this trope and kicks it into orbit. The suit is more of a
* The nanotechnological android based on the comic character Amazo takes this ability to its logical extreme—being able to analyze things on the molecular level while being able to at the same time alter its own structure at the molecular level. In short,
* Then another time Leela got fired with Fry and Bender when the two took the ship out for a joyride around the world with the Planet Express building tethered to it, but she
* then anywhere that isn't your back. And there's even voicelines for both callign out a teammate for hitting you and apologizing after hitting a teammate, though not all of the latter are friendly...
* The NAPA auto parts store has a series of commercials where a metal can of "NAPA Know-How"
* The NAPA Know-How Guy. The customer's reaction shot only confirms that he's about to give up more than money to make his car run better.
* The Napoleon: Are you mocking my height, you meathead? If so, then I'll beat the shit out of you!
* The Napoleon: A very sadistic person whose stature is small in comparison to other characters.
* The Napoleon Crime, Alex, finding himself cast as the Duke of Wellington, can remember only that he responded with "Publish and be damned!" to a blackmailer. At the end, when a reporter tells him that he can make him look ridiculous, Alex decides not to resist temptation: "Publish and be damned!"
* The Napoleon: Hot-blooded, aggressive, and extremely sensitive about their height.
* The Napoleonic Wars all their cannons to arm it, while a semaphore system introduced by the Royal Navy allowed a message to be relayed from the HQ to any point on the line in a matter of 4 minutes. Everything of use north of the Lines was carted south behind them and all the rivers and wells were poisoned to deny their use to the French. They were constructed in absolute secrecy and not even the British government were aware of their existence. They were used successfully to repel a number of attempts by Marshal André Masséna to capture

Lisbon.
* The Napoleonic Wars, and some of them (Soult, Mortier and Gérard) became Prime Ministers and were very popular among the general public, although they had trouble asserting their authority in governments mostly made up of professional orators.
* The Napoleonic Wars and the greatest British naval victory of all time. Before the battle, Napoleon had been building up the French and Spanish navies for a potential invasion of England, as you cannot invade the British Isles without going through the Royal Navy. Admiral Horatio Nelson led the British fleet to victory and though he did not survive the battle, nearly half of the Combined Franco-Spanish Fleet was captured with the British losing no ships of their own. Never again would the French be in a position to challenge the British at sea, leaving them to blockade and strangle off trade bound for the continent. In addition, the battle essentially assured British naval supremacy for the next century.
* The Napoleonic Wars an Irish Legion was part of the French Army, while the Spanish army also contained many Irishmen or Irish-descended Spaniards. Descendants of the Geese included Patrice de Mac-Mahon (Marshal of France and first president of the French Third Republic) and Bernardo O'Higgins (another general and one of the founders of independent Chile).
* The Napoleonic Wars a number of volunteer formations took part that were formed from nationals of countries that were at least technically neutral.
* The Napoleonic Wars. Because part of it was fought in the middle of a snowstorm, Augereau's French corps lost its way during its advance and suddenly found itself right in front of a huge Russian artillery battery which blasted it to pieces. The French ultimately (barely) were left in possession of the field, but eventually left a few days later. When the Russians then returned, they were amazingly still able to recover a few of their wounded alive who apparently had not been found by the French.
* The Napoleonic Wars) between Germany and France, but that term actually first was coined to describe the long-running enmity between the houses of Habsburg (Austrian Archdukes, Dukes of Burgundy, Kings of Naples and Sicily, Holy Roman Emperors, and sometime-Kings of Castile and Aragon [Spain]) and Valois/Bourbon (Kings of France) that went back to Francis I of France and the accession of Charles V Holy Roman Emperor in 1519.
* The Napoleonic Wars British preferred to remain silent while the French were approaching to make sure that there was as much tension begging to be released when the order to fire and charge came.
* The Napoleonic Wars for soldiers, and just something to avoid for civilians.
* The Napoleonic Wars, France was so ludicrously powerful compared to its neighbours that it basically pulled apart continent-wide coalitions on five separate occasions. It took twenty years of no-holds-barred total war, being starved by the Royal Navy, and a disastrous campaign in Russia to finally bring her down.
* The Napoleonic Wars. In particular it is notable that the Vienna system managed to avoid a major European war over the revolutions of 1830 and 1831 and after the Oriental Crisis of 1840, when the government of France was itching to compensate for its loss of face in Egypt by starting a war to "regain the natural frontier" on the Rhine.
* The Napoleonic Wars, it immediately became wars of conquest and subjugation led by Napoleon who sponsored and encouraged art theft, forced conquered regions and "New Republics" to pay high taxes to France (who with the loss of its most prosperous colony Haiti were a trifle strapped for cash) and then invaded and conquered regions that defied his economic embargo on England.
* The Napoleonic Wars — specifically near the end of the Battle of Waterloo, with the British command staff observing the French attacks from a hilltop. Cannons fire, and:
* The Napoleonic Wars, offered a legal way to avoid the draft that no longer exists: hire a substitute to serve in your place. Of course only the more affluent could take advantage of that option, especially when a war wore on and the casualty

rates rose, causing the fees men asked to serve as substitutes to rise considerably.
* The Napoleonic Wars Revolution), Spanish America (with the wars of independence there being directly triggered by the occupation of Spain by France as the colonists fought about which of the rival claimants to the Spanish throne to back, what it meant to back which claimant, and whether it made any sense to back any of the claimants at all), the Middle East (on account of Napoleon's expedition to Egypt and the years of fighting that caused), sub-Saharan Africa (with the British taking the Cape Colony from the Netherlands after that country was conquered by France), and India (with the British seizing French outposts there, as well as some unrelated and/or opportunistic conflicts between the British and local rulers).
* The Napoleonic Wars that of campaign medals, i.e. decorations not just for those who performed deeds of valour or that were exceptional in other ways, but to everybody who had been part of the forces in the field. Thus the chests of military men became decorated with a lot more ribbons and pieces of enameled metal than before. This was also reflected in painted portraits, where an officer usually would be shown wearing all his decorations to the point that it was quite common that orders or medals awarded after an officer had sat for his portrait would be painted in additionally later. How many of his decorations an officer would actually wear every day was an entirely different matter, but of course these portraits often were used as reference by the makers of historical movies and television series, leading to slip-ups where people are shown wearing decorations that they only were awarded long after the year a film is set in.
* The Napoleonic Wars. The blockade was not entirely safe, and Norwegian boats made quite a few runs. Some of them also resorted to capering.
* The Napoleonic Wars the British had a variation of this. They would wait. Occasionally chant. But mostly wait like a silent inhuman wall. This would push the soldiers' tension to its absolute limit which often came at the same time as the French were worn out. Then in a moment they would give a shout, fire their muskets, and charge. The French would almost inevitably collapse.
* The Napoleonic Wars two French court-martials gave the impression that they would unquestionably deliver the death sentences Napoleon wanted: that of the Duke of Enghien for alleged complicity in an attempt to assassinate Napoleon (1804) and that of the publisher Johann Philipp Palm for not revealing the name of the author of an anti-Napoleonic pamphlet (1806).
* The Napoleonic Wars was actually the time when the general cut of military uniforms was much simplified (a trend that was led by Russia and Prussia, of all places) and when the difference between parade dress and a plainer and simpler campaign wear became enshrined in regulations.
* The Napoleonic Wars was an extension of the French Revolutionary Wars. Those wars began when the Girondin faction declared war on neighbouring monarchical nations in the aim of "spreading the revolution" though Danton got on board with "expanding the natural frontiers". Napoleon earned his first promotion at the height ot the Jacobin Republic and the Wars of the First and Second Coalition that triggered as a result of the First French Republic's failure to make peace (which it must be noted is very hard to do for a belligerent side). When Napoleon came to power, he formed the Treaty of Amiens with Britain which provided the only year long peace for over 25 years.
* The Napoleonic Wars were fought. In the 1700-1800's, the bulk of a European (or Europeanized) army was made up of musket-wielding infantrymen, usually organized into "line" infantry regiments of about 1000-1600 men (usually less, due to casualties and disease). The biggest threats to an infantryman on the battlefield came from enemy infantry, cavalry, and artillery, and an infantry regiment had separate formations to deal with each; therefore, infantry were rigorously trained and drilled to quickly switch between them, as taking too long could prove disastrous. Conversely, using them effectively could swing the balance of a battle. The most common formations were:
* The Napoleonic Wars; your general wades into the thick of combat (quite effectively!), but has a chance of getting killed.

* The Napoleon—kill a Helmacron, their mind somehow transfers to another, creating a whole species of nutcases.
* The Napoleon of Notting Hill, the deposed president of Nicaragua goes to some trouble to wear the colours of his now-conquered country.
* The Napoleon was before her time. She could be almost any age younger than five millenia, though Lapis once insisted she was still much older than any human. The timeline lists her has being three thousand.
* The Napoleon was, contrary to popular belief, of average height for his time. He appears comparatively short in paintings because he stocked his Imperial Guard with tall men.
* The narcissistic Vega wears a mask to protect his face. Considering how easily it's broken in his loss images, his face must be made of
* The Narcocorrido song "La Suburban Dorada" revolves around two idiot members of
* Thenardier musical wears a Napoleonic uniform at the start of the play as a remnant from his supposed days as a soldier (if by soldier you mean "guy who looted corpses on the battlefield").
* The Naritaverse, for lack of a better term, entails the four light novels
* The Narn Ambassador, G'Kar, regularly rents human prostitutes and even attempts to bribe the station's telepath into sleeping with him —
* The Narn and the Centauri are both said to be dying races according to Kosh. However, this is more philosophical than literal — Kosh meant that both were trapped in a cycle of revenge and fixated on each other's deaths to their own detriment, and were therefore (from a Vorlon point of view) on the path to eventual destruction. Both the Narn and Centauri are in fact populous and relatively vital.
* The Narn and the Centauri each have their own forms of opera, equally detested by the other. Then again the two are at each other's throats all the time anyway, so this may just be simple prejudice. But human culture, especially humor, is generally agreed among aliens to be about as incomprehensible as the Vorlons.
* The Narn and the other former Centauri subjects base their technology on whatever their former masters couldn't take with them as they left or was stolen by their resistance (most notably, the Deneth resistance managed to build their entire fleet
* The Narn are a particularly nuanced case. Pretty much every Narn with any screen time is shown to be a fierce fighter, including and especially
* The Narn are the only major race besides humans to have multiple religions. G'kar somewhat accidentally starts a new one.
* The Narn are this, though mostly by necessity. It's mentioned in-series that before the Centauri occupied Narn, the Narn were a deeply spiritual agrarian people with some Proud Warrior traits, but that the occupation brought the Proud Warrior part of Narn culture to prominence at the expense of all others.
* The Narn-Centauri War, withdrawing from several active combat zones when they find out the Narn homeworld will be vulnerable and bombarding it with mass drivers from orbit.
* The Narn have different religions but the most presented in detail is G'Kar's, who is a follower of the philosophist G'Quan, and it seems to be similar to Taoism. After himself writing a book, it starts a new religion despite his opposition to the idea (one follower nearly assassinated G'Kar when he spoke against this).
* The Narn have line and mechanized infantry, scouts, IFVs, artillery, and air support, but their only ground vehicle capable of fighting tanks is a rare tank destroyer. An extremely well-armed and armoured tank destroyer;
* The Narn occasionally do a similar gesture though with just one hand; there is also their closed fists to chest gesture, which seems to be more formal. Sometimes the Narns also roll their fists around each other before making that gesture though this mostly seems to occur during the first season; possibly it was deemed looking slightly silly.
* The Narn opera is briefly heard during the series, and apparently sounds like loud screeching. The human humor is considered odd by many alien characters, but others are shown to like it - they seem to imply that the Marx Brothers-style slapstick is once again the most popular form of comedy on Earth.

* the Narn puppet regime after the Centauri conquers them. He believes that by willingly cooperating with the invaders he may be able to stifle some of the worst abuses of his people.
* The Narns oddly subvert this: they are quite physically compatible with humans, although presumably there's no genetic compatibility.
* The narration boxes in general have been used less as the series has gone on, but typically pop up again when the story focuses on Hayate and/or Hinagiku, who are among the few characters that still interact with the boxes.
* the narration in that scene stated he was running at just under the speed of light.
* The narration points this out about Tiamat. She was one of the most powerful goddesses, and even in her weakened form, she is no pushover. However, she lacks combat experience, which allows opponents to outmaneuver and trick her.
* The narration while Kanaya reads a walkthrough she found in the Furthest Ring. She grew up idolizing the writer and has no doubt that due to her leadership, they succeeded with flying colors.
* The Narrative of Arthur Gordon Pym of Nantucket), it isn't hard to see how their appearance might have come about through self-selecting for increasingly extreme melanistic traits over the course of hundreds of generations.
* The narrator, after pursuing an obviously disinterested Faustine for days, finally throws himself at her feet and proclaims his love for her.
* The narrator claims that Wales is "A town in England". In reality, there
* The narrator dancing and singing "Gangnam Style" with the narrator saying "Psy does it...and we all go nuts."
* The narrator describes the strange hunter in "First Hunt" as looking human except that "everything about him was sharper" and he has
* The narrator frequently criticizes the scripts and often refuses to read them if he thinks they're just too bad.
* The narrator gets in on it, too. As Gamzee watches Jade's second prototyping from the CRITICAL MOMENT, the caption reads "
* The narrator invokes it when Jamie tries to move silently through an airduct using magnets. Magnets that were clanging with the air ducts:
* The narrator is named Bob (his wife is Mrs. Bob, they have two kids), after his voice actor, Robert Stack. While he rarely interacts with the main characters, he is in competition with the Muses and frequently argues with them. Bob is apparently
* The Narrator. Kinda ironic how he made the Wardogs famous with his articles, yet was denied the right to report the final, most important missions they flew as the Ghosts of Razgriz.
* The narrator mentions that Wilbur sounded like his voice-producing organs were somehow different from a normal human's — which, naturally, they were.
* The narrator met Trevor when she was 19 and he was 33, and it is consistently shown that Trevor takes advantage of her and exploits her when a romance with a woman his own age goes awry.
* The narrator of Flight Facilities' "Crave You" implies that being desired by many people (but
* The narrator of "hoax" knows her love is "faithless" and is obviously very broken up about it, but stays anyway.
* The narrator of James Taylor's "The Frozen Man" was subjected to an accidental version of this when he fell overboard.
* The narrator of "Mama" is a very kind and supportive mother who unconditionally loves her daughter no matter how rebellious she gets.
* The narrator of Olivia Holt's "Had Me @ Hello" just wants to dance with her
* The narrator of the final episode describes the events leading up to
* The Narrator of the intro from the pilot. The words are almost identical but the reading has changed drastically.
* The narrator of the song "Silent Running" suggests this as a survival technique in the face of a hostile invasion.
* The narrator performs Nicomo Cosca's dialogue with his unique accent and delivery in the scene after his apparent death, spoiling the reveal of his

survival.
* The narrator says "despite its name, the saber-toothed tiger was actually the ancestor of the lion," and not tigers. Lions and tigers, and by extension, leopards, jaguars and house cats, are more closely related to each other than any of them are to saber-tooths, what with the saber-tooths being on one branch of Felidae, and all living cats being on another branch.
* The Narrator's clear and unmistakeable announcement that it would happen should have removed the 'suddenly' qualifier, but that was taken with a hearty dose of
* The Narrator Season 1's Relaxation Cassettes addresses the Institute's patient as "you" and feigns impartiality as a purely instructional, pseudo-omniscient figure in those exercises that mimic a typical guided meditation, but as her instructions deviate to become peculiarly specific, she eventually drops the façade to refer to herself as "I" at the end of the first cassette, and addresses the patient with increasing directness in subsequent installments.
* The narrators in Hideshi Hino's horror stories invariably have houses or shops full of crazy, filled with disturbing paintings, horrible things in jars, and/or macabre junk.
* The narrator speaks in a considerably deep tone of voice in season one, a sharp contrast to the high-pitched screaming he went for from season two-onwards.
* . The narrator wakes up, is acting differently, and things are VERY weird. What happened yesterday at powers testing?
* The Narrator, while not an active character in the story, tends to fall into this in her monologues in
* The Narrows, track him down. The Poet had previously chosen the RLD in Amsterdam for the same reason.
* The Naruto fandom has made many, many nicknames for the characters to refer to each other with. Famously Sasuke will call Naruto "dobe" despite only calling him that once and the Kyubi calls him "kit" affectionately. There are many more, however.
* Then, as a subversion, his "allies" do it to HIM. They get away with it too, sort of.
* The nascent demon lord Treerazer wields the Blackaxe, a gigantic waraxe carved from obsidian and dripping with acid, as both his favored weapon and symbol. It's an especially deadly weapon against plant life, dealing additional damage to plant creatures and allowing its wielder to heal themselves by striking a tree, which afterwards crumbles into ash. It's also inextricably bound to Treerazer himself, who always knows where it is and who's using, can cast spells through regardless of distance and can call it into his hand at a moment's notice no matter how far away it is.
* The Nashville Sound (2020) both were #1 country albums despite charting no singles between them.
* then asks if she can take it off, since it's burning her finger. Homer takes it off, but then he eats it.
* then as little threat, something that comes back to bite them later.
* The NAS report that led to the downfall of the device's widespread use pointed out that they said this about pretty much everyone they ever "passed".
* Then as Sulley doesn't think Boo's dangerous, Mike's not so convinced:
* The nastier effects of lyrium usage are shown in even greater degree in
* The nastiest example is the later Scarecrow vision that starts with a burst of digital static and then begins replaying the game's introduction; the player soon sees that Batman and the Joker have swapped places, but before that, a reasonable assumption is that the game has crashed and restarted.
* The Nasty Boys days in the North Carolina-based South Atlantic Pro Wrestling promotion. They were thought to be genuinely tough but slightly dangerous to work with.
* The Nasty Girl: When Sonya has to appear in court to defend herself against a libel suit, there is an actualy woman dressed as Justice holding scales behind the judge. She has dozed off but wakes up and holds her scales as the judge delivers a pro-Sonya ruling.

* The Nasuverse loves to play around with this. Arcueid has 3 different magical girl alter-egos, Caren has one, and both Hisui and Kohaku have one. All are jokes. Saber Lily could be considered to be one as well, but Saber's powers are already kinda magical-girl-ish to begin with.
* Then at a later confrontation, Red Skull pummels the crap out of a restrained Cap who retorts that he can "do this all day".
* The National, about the planets and other features of the solar system.
* The National Anthem of Mexico is actually a Call to Arms Warsong. Jaime Nunó wrote the lyrics thinking about the glory of the battle and the honor of dying in the defense of the nation. Francisco González Bocanegra's military music just adds points to it. Just read the main chorus:
* The national anthem of Poland has overtones of this. Composed in the 18th century, when Poland was not on the map, it asserts that so long as Poles remain alive, Poland continues to exist.
* "The National Anthem", the British public pressure the Prime Minister to have sex with a pig in order to save a princess.
* The National Association for the Advancement of Colored People and the United Negro College Fund both retain terms for black people in their names that
* The National Association of REALTORS® takes pains to inform people that the term "Realtor" is trademarked in the United States and should only be used for real estate agents who belong to that organization. There's a good reason for this, as membership into their organization is separate from simply obtaining a license to practice real estate. NAR has its own code of ethics and various other standards they hold their members up to, as such, they don't want their trademark to be potentially associated with agents who aren't up to their standards. They also fine any REALTOR® who uses the trademark without putting it in all caps and adding that registered symbol at the end in their materials. Pronouncing the word with three syllables as opposed to two (IE: Real-A-Tor as opposed to Real-Tor) is also a
* The National Defense Authorization Act of 2011 is this to some degree. On one hand, its most famous provision is one that allows warrantless indefinite detention for those suspected of terrorism in certain circumstances. However, most of the act actually really
* The National Disaster Survival Test was a TV movie aired on NBC on May 1, 1977. Toward the end of the show, they showed a sample disaster survival kit which included, among other things, a supply of canned food that does not require cooking. They then asked what items were missing. After maybe 20 seconds of "think music", a can opener was shown as one of the answers.
* The National Enquirer. Then it was owned by the mafia and became a crime-obsessed rag focusing on particularly hideous crimes. Now it is more known for making up celebrity gossip.
* The National Film Board of Mars Presents: What on Earth!, and the fact that the Martians have confused automobiles with the drivers that infest them.
* The National Guard and Army Reserve used to advertise along the lines of "Only one weekend a month, but you will have all the benefits of serving your country." This was
* The National Hockey League created Retraux alternate jerseys, especially among teams too new to have large amounts of history to tap into. Many of the teams that have participated in the annual Winter Classic outdoor game have used one-off fauxbacks, which occasionally get promoted to a full-time alternate jersey.
* The National Hockey League had once had a huge problem with the Edmonton Oilers: they would send out any unimportant player to intentionally get offsetting minors with their opponent. This would set up a 4 on 4 situation, where the Oilers could send out their top line run by
* The National Hockey League's Department of Player Safety maintains a video channel for the public release of explanations of supplemental discipline. They're basically video essays; they start with a one-sentence summary of the punishment issued, then go into background and detail before restating the punishment.
* The National Intelligence and Security Authority was the Philippines' most notorious intelligence agency responsible for cracking down on anti-Marcos

opposition in the 1970s and 80s under the command of General Fabian Ver. Formerly replacing the National Intelligence Coordinating Agency, the NISA was rebranded to its current name after the EDSA Revolution.
* The National is one of the most well-known and acclaimed examples of not only a baritone but indeed a badass in modern indie music. You can watch any live performance this band has done, and still be completely blown away by Matt's vocal and stage performance every time.
* The nationalist, right-wing Sons of the Serpent militia in Marvel comics fights to restore a white America, so they are obviously politically incorrect villains, but they allow women in their organization on what appears to be equal terms.
* The National Lampoon Radio Hour once did a skit about an audition for comedic "straight men", with one setup line after another being delivered in rapid-fire fashion. Finally one guy blurts out a punch line by mistake ("Okay, you're a cab"), prompting the derision of everyone else in the room.
* The National Lampoon website Among the ear worms in this fictional bonus disc: the original Meow Mix commercial jingle, a dial-up modem from the 1990s, and the majestic THX Surround Sound tune!
* The national language of Pakistan, Urdu, also developed from a heavily persified version of Hindustani from the time of the Mughals.
* The National League celebrated its 100th anniversary in 1976 by having its participants in the All-Star Game wear special NL pillbox-style hats. In addition, several NL teams wore their own pillbox hats as alternate caps during the season, although the Pittsburgh Pirates opted to go with the pillbox full-time for several seasons.
* The National Media and Science Museum). It was a magic carpet placed in front of a blue screen so when visitors sit or lie on it, it looks like they are flying on a nearby TV screen against one of six backgrounds (such as a cloudy sky, over a safari or over a blazing inferno).
* The National Mint (which is a commercial company and in no way associated with the U.S. Treasury) sells coins to commemorate special events, like the Freedom Tower being built where the World Trade Center used to be. These coins are
* The National Museum of Scotland in Edinburgh includes three dioramas showing different landscapes of ancient Scotland, from tundra to the Caledonian Pine Forest, and the wildlife that would have lived there. All three include little details that you might not notice at first, but what really belongs here is the inclusion in the tundra diorama, hidden behind the display case's frame so that you can only see it by leaning right up against the glass, of a tiny snowman.
* The national pandemic "Grey Death" is revealed to be a corporate creation to reap massive profits off a vaccine, weed out the "undesirable" (poor) population, and ensure complete complicity from the population (even, in some cases, the government.)
* The National Redemption Front is a radical Catholic group that emerges out of the Iberian Union and seeks to bring out the Kingdom of God on Earth.
* The National Research Council Time Signal, heard at 1:00 PM EST every day since November 5, 1939 on the CBC radio network.
* The National Socialist States of America is basically the Nazi-American puppet from
* The National's press event during her November 2018 visit to Scotland, their front page had a blacked out silhouette of May overprinted with an explanation that the were therefore not going to cover the story at all. Below it was the headline "HEADLINE IN HERE HEADLINE IN HERE" and three subheaders saying "This is a subheading in here".
* The National Suicide Prevention Lifeline reported a large jump in caller traffic when rapper Logic's song 1-800-273-8255 (which is the number of the lifeline) began hitting the charts, with call rates
* The National World War II Memorial in Washington, D.C. features a small
* The Nation of Aztlan movement has this as its goal. While there has been greater awareness of Mexican heritage (and Hispanic heritage in general) starting from around the 1960's, political separation (as in joining Mexico or forming a new

country) is not taken seriously by anyone except fanatics (both for and against).
* The Nation of Domination and Savio Vega formed their own groups "Disciples of Apocalypse" (DoA) and "Los Boricuas" respectively, leading to The Gang Warz.
* The nation of Ferelden. It is a feudal nation ruled by a semi-hereditary king who owes his power to the support of barons, and its majority human population is descended from large groups of warring tribes, some of whom still remain during the game's beginning — Celtic to Saxon England, basically. It is also the place where
* The Nation of Gods and Earths, also known as the Five Percenters believe that the Original Asiatic Blackman is God, and that each black woman is the Earth. They vehemently deny the existence of any supernatural "mystery God" and break the word Allah down as Arm Leg Leg Arm Head, meaning humanity. The possibility of women being God is controversial, and many Gods (and Earths) disagree as to who has the right to call themselves God. Some even see the potential for white Five Percenters to prove themselves to be God, despite Caucasians traditionally being seen as "devils by nature".
* The Nation of Islam apparently believe that former leader Elijah Muhammad and founder W. Fard Muhammad aren't dead and have instead ascended on a high-tech craft
* The Nation of Islam has a standing paramilitary force called the Fruit of Islam. While not armed, they are highly trained in martial arts and military tactics, and act as secondary ministers as well as a security force.
* The Nation of Islam, particularly the paramilitary wing called the Fruit of Islam, exploits this trope. They always appear in public dressed in suits and bowties.
* The nation of Marley gets an extremely rude awakening after 4 years of war, having reached the point where modern technology is beginning to render Titans obsolete. After naval artillery blows the Armored Titan to pieces, several military officers discuss the need to begin focusing on development of traditional weapons after nearly a century of neglecting them in favor of using Titans.
* The nation of Numeria, which is covered in scattered debris from a spaceship crash, provides even more impressive examples, from rail guns to enormous lasers, but the two that stand out are the vortex gun and the gravity cannon. Both deal tremendous amounts of force damage in a wide area: the vortex gun in a hundred-foot long cone and the gravity cannon in a huge explosion. The gravity cannon is in fact so overpowered that it’s the only nonmagical handheld weapon to be considered an artifact.
* The nation of Rahadoum in the setting is built on this; the government not only rejects but outright bans the practice of any religion, and while organized religion is still active in secret, at large the institution has been replaced with a reverence for the nation's legal code and more philosophical systems. This is justified in-universe in the fact that decades-long religious conflicts previously devastated the region.
* The nation Panoceania is influenced by the Vatican and can field advanced futuristic crusaders.
* The nation referred to (originally) as the "Encyclopedia Foundation", and sometimes as the "Foundation Federation", is more often called simply the "Foundation". It is
* The nations are discovered by the public at large or some shady organization and are abducted and imprisoned. This usually leads to some sort of experimentation on them.
* The nations of Tear and Amadicia are both type Bs, banning magic altogether (the former mostly out of general distrust, the latter because it is all but ruled by a militant religious order that believes
* The Native American Nations started as Amerindian separatists incensed by the US government's use of eminent domain on reservations, and the ensuing internment camps, who used the newly returned magic to seize control of most of the western states.
* The Native American requesting a room. ("Do you have a reservation?" "I did. It was called 'Manhattan'.")

* The Native Americans Chief Dikke Springmuis and his tribe members are all primitive Indians who speak in
* "the Native Beast" currently absent), sadistically destroying anyone who opposes her.
* The Native Beast Nyla Rose managed to draw on the savage imagery and behavior while remaining baby face, getting
* The Native Martians live under a tribal society led by a stereotypical Big Chief.
* The Natives Are Restless: This isn't the age of colonialism anymore. It still pops up in fantasy and science fiction settings where colonialism can exist, but even then, it's more likely to be used for humour.
* The Nativity Story is odd in the fact that while the baby playing Jesus could maybe pass for newborn, the baby John the Baptist comes out of the womb looking as if it's already attending preschool. The contrast between them makes the problem much worse than if they had used two older babies.
* The Nativity Story, making Him a very young future famous person indeed.
* The NATO alphabet (Alpha Bravo code) was originally designed so that every code word is pronounced in each NATO language in the similar way, so there would be no linguistic misunderstandings. There are some discrepancies, however; "Juliet" is usually "Giulietta" in Italian, and easily mistaken for G. Inversely, Quebec is pronounced in the French manner (Kay-bek) which might confuse some English speakers (Kway-bek).
* The NATO school of thought looks down on autoloaders because they don't actually provide
* Then at the dance with Lorraine, some knucklehead muscles in, leaving George unsure what to do and on the verge of walking away. Just as it looks like Marty is going to fade out of existence and is done for:
* The natural almond flavor is mostly caused by the amygdalin, the cyanogenic glycoside common to the whole prune family,
* The Natural. Although Roy Hobbs did play semi-pro ball and was on his way to a tryout with the Chicago Cubs, his time with the New York Knights can be considered as an example of the trope.
* The Natural, an ailing Roy Hobbs hits a dramatic and unlikely home run to send the New York Knights to the World Series. Four years later, an ailing Kirk Gibson would hit a dramatic and unlikely home run to win game one of the 1988 World Series for the Los Angeles Dodgers. To hammer the point home, one of Gibson's team mates during the post game interviews wrote on a piece of tape and stuck to the nameplate over his locker Roy Hobbs.
* The natural insanity of humankind is perhaps exemplified by the fact that there is actually more than one movie about psychotic ice cream men.
* The Natural is a talented player who spends a long time warming the bench because manager Pop Fisher resents having to field anyone as old as Roy. He proves himself as soon as a player shortage gives him a chance to.
* The "Natural Magic" challenge requires you to forgo the use of all Espers (or any equipment that offers spells); thus, the only magic that is available is from characters who learn Magic through the natural process of leveling, hence the name. This also nixes any form of Esper-based stat boosting, so it is quite difficult. A
* The Natural Magic of Humans in Fairy Tales" he reiterates that humans have various "natural magical powers" that allow humans to overcome fairies, including the use of (1) various magical objects and techniques, (2) the evil eye, (3) the ability to withstand polluting influences which can drain magic, and (4) the natural ability to resist fairy magic.
* The Naturals didn't leave her mean and snarky. The other Naturals take care of her as best they can.
* The Naturals, lies about everything, including her name. It's somewhere between a survival mechanism and a game.
* The Natural: The New York Knights somehow are batting in the bottom of the inning in Chicago despite being the visiting team.
* The Natural: The Whammer (a Babe Ruth expy) calls his shot in an impromptu

showdown with young Roy Hobbs, but goes out on strikes.
* The Natural, the young pitcher who faces off against Hobbs in the final game, and who nearly strikes Hobbs out, is described by the game's radio announcer in the same terms that Hobbs is described at the beginning of the movie. This pitcher is another "Natural", and its clear that, given time, he'll end up being one of the greatest players in the game, just like Hobbs.
* The nature and possession of the Ring Drive is one of the main plot concerns of the sci-fi comic
* The nature-based religion of Lutarism has the Path of the Vine, which can prevent a corpse from rotting fairly easily, or if you have follow enough spirit-imposed restrictions can save a dying person or revive someone dead less than five minutes. With a lot of spiritual pacts and luck you can revive one dead for a longer time.
* The nature of being a Nation is touched on briefly in the series, but much is left up for speculation - like what exactly leads to a Nation's 'disappearance', how emotionally damaging is it to be immortal and how being forced to comply with their bosses' wishes (as is implied with WWII-Germany) affects them.
* the nature of his act people who become involved during the course of the story (frequently reporters or political figures).
* The nature of hyperspace travel in the B5-Verse limits the large-scale area. Hyperspace travel requires beacons and jumpgates or uber-powerful ships to travel anywhere. Thus unknown space remains unknown for long periods and some areas are permanently cut off from hyperspace travel. So you have well-known areas of space where any trip is swift and unknown space where every trip is an expedition lasting years.
* The nature of Link's relation to Zelda varies with each game, with most portraying them as acquaintances, or simply comrades-in-arms. While in others, such as
* The nature of Puss in Boots (a cute little kitty who just happens to be a mercenary) is clearly meant to be a comedic twist, but the trailers for
* the nature of the character, this is entirely possible), or Bruce pulled this card.
* the nature of the game, it's almost certain that the Scout's self-satisfied laughter is designed to annoy the people he kills.
* The nature of the grav-fighter propulsion (singularity projection) means that, for the most part, they really can maneuver like a jet fighter in air. Even better, in fact, as gravity forces acting on the fighter and the pilot are largely uniform, meaning a fighter can perform a tight turn at several hundred G-forces and not even feel it (beyond the normal sense of perpetual falling) by projecting a singularity to the side and slingshotting around it.
* The nature of the kinetic weapons (regular guns or railguns), though, was a point of disagreement between the writers and the visual effects team, with most visual evidence pointing to these being the more familiar type of gun/cannon, rather than railguns.
* the nature of the Power would be easier for an Aes Sedai than making a weapon that can be used by anyone).
* The nature of the series means that many ships are technically this, including popular ones like Ventus and his
* The nature of the show gives most of the detectives at least one of these, possibly more.
* The nature of the Tyranids, a massive hive organism possibly on a similar scale to the galaxy itself, suggests that they must also have been galactic superpowers in many other galaxies before arriving in the Milky Way.
* The Nature of Things (science documentary series on CBC since November 1960; hosted continuously by zoologist and environmentalist David Suzuki since 1979)
* The nature of this trope, particularly the alternate ending (namely, that killing in self-defense is acceptable, but killing in cold blood is not), is explored towards the end of the
* The Naughtiest Girl, Harry gets back at Elizabeth when she plays a trick on him

by pinning a note on her back that says "I'm The Bold Bad Girl. Beware: I bark. I bite. I hate everybody." Eventually, Elizabeth's friend Joan tells her about it, after everyone else just laughed about the accuracy of it.
* the Naughty Lady is in fact a nine-day-old baby, and all the apparent euphemisms in the song are literal truths.
* The Nausicaans. From their few on-screen appearances, it seems their entire culture revolves around space piracy.
* The Navajo, Wiyot, Sahaptin, Arikara, Cree, Sioux, Pawnee, Meskwaki, and Blackfeet used variations of "dog".
* The Naval Investigative Service (now NCIS) always had the reputation for being the most vigorous at rooting out suspected homosexuals of any of the branches before open service was allowed. In one particularly bizarre instance, NIS investigators encountered the phrase "friend of Dorothy". Unaware that this is slang for a gay man (a reference to Dorothy as
* The "naval missile massacre" came about with the advent of the cruise missile after World War II. These were basically jet-powered kamikazes that were controlled by inertial guidance systems and radar seekers rather than human pilots. The Soviets didn't have aircraft carriers nor could they have matched the U.S. even if they tried, so they turned to the cruise missile as their naval weapon of choice. The U.S. Navy noticed this and started arming their ships with anti-air missiles that could shoot down incoming cruise missiles. The Soviets responded by building better missiles and lots more of them; they put cruise missiles on ships down to the smallest corvette, on planes, and on submarines, with the intent of firing a massive salvo at a U.S. carrier group to overwhelm its defenses. The U.S. responded with Aegis, a ship-based system meant to track and engage lots and lots of incoming missiles. The U.S. also deployed the F-14, a long range interceptor whose main mission was to shoot down incoming bombers before they could fire their cruise missiles, or failing that, shoot down the missiles themselves. At that point it really came down to tactics, as the Soviets would try to detect an incoming carrier group and then try to organize their killer salvo, while the Americans tried to stay hidden by keeping their radars turned off while using fighter aircraft to shoot down any incoming scout planes and disrupt bomber formations. Then of course the Cold War ended, and we never got the chance to see how this fight would turn out.
* The naval ships of the Honorverse come in a handy categorical list. Here are the common ones, from largest to smallest:
* The Na'vi are ten-foot-tall, blue-skinned, yellow-eyed, cat-nosed, four-fingered and four-toed (note, however, the titular
* The NaviCust program, when improperly used, can result in MegaMan.EXE acquiring random bugs, good or bad. This can make him confused, invert the controls, cause him to move two whole spaces on the field instead of one, cause HP drain, a sudden infliction of damage with the start of every turn until the HP meter drops to the bare minimum of 1 point, make Poison Panels generate, give Mega Man a protective Barrier, or even tamper with the amount of Battle Chips Mega Man can use. In
* The Navigator, a Mediaeval Odyssey are an exact isomorphism of this trope in the time dimension, where a group of 14th century black and white British villagers flee the Black Plague by digging a tunnel that leads to Technicolor 20th century New Zealand.
* The Navigator A Medieval Odyssey is about a team of copper miners in medieval England who dig through the earth and travel through a tunnel, surfacing in modern Auckland, New Zealand.
* The Navigator: A Medieval Odyssey, some medieval villagers wander through a time-rift and find themselves in the present day. Unusual in that, while they are frightened by much of what they see, they never realize what's actually happening and assume it's just what big cities are like.
* The Navigator and his girlfriend alone on a passenger liner that's gone adrift in the open ocean. Buster finds a can of milk, but he has no can opener, so he tries increasingly ridiculous tools, like an industrial drill, a cleaver, and a huge meat axe. Finally he jury-rigs a can opener.

* The Navigator gets incapacitates for a few moments when a monkey drops a coconut from a palm tree onto his head.
* The Navigator gets in his limo and is driven across the street to his girlfriend's house.
* The Navigator. He was shown the former USAT Buford, a 5,000 ton, 500 foot ship that was being sold for scrap metal. He was told that a film production could do anything with the ship, including set it on fire or sink it. Gabourie rushed back to Los Angeles to tell Keaton about the ship. Keaton immediately began planning a film centered around the Buford and had producer Joseph Schenck chart the boat for $25,000 with a crew and sail it to Los Angeles.
* The Navigator is "Protect This Ship" when the lead couple fights off an angry mob of natives who try to enter the ship.
* The Navigators who pilot Imperial vessels use a psychic "lighthouse" called the Astronomicon to find their way through
* the Na'vi mind transfer ritual can make this permanent, effectively allowing for new bodies to be produced in a lab and continuously body-hopped into as the old one ages or gets injured. It's a completely ethical method of near-immortality (for humans as well as Na'vi), but this is never brought up in the movie. On the other hand, the vast majority of humans are completely unaware of this capability, even if they know about the neural network itself, which is also something that the majority don't.
* Then Avitus himself wasn't very pleased with the fact that Solana was all grown up and now has a suitor.
* Then a voice-over "Lesson learned: Always keep Trojans in your car".
* The Navy (and Koby, who had just been accepted as a recruit), salute Luffy and Zoro as they sail off. One of them decides, "As punishment, no dinner for a week!" because they allowed pirates to escape.
* The Navy Lark Able Seaman "Fatso" Johnson's pies prove to be rather convincing as limpet mines, and less edible.
* The Navy Lark abounding. Please note, the episode was set in and aired in 1960...
* The Navy Lark about Leading Seaman Riddle being called to the Bridge but he never turns up. During the climax the messenger says that he realises where Riddle has been all this time.
* The Navy Lark) and ended up at Dartmouth and the Naval College there instead, and his training there.
* The Navy Lark and the ship's Chaplain in a very confused conversation about a pregnant racehorse (which the Chaplain thinks is a girl Phillips has got knocked up due to how Phillips broached the subject), with the Chaplain being so shocked that after having had to sit down he declares "I think I better stand up again."
* The Navy Lark and the Troutbridge Crew were forced to team up to defeat whatever lunacy the Admiralty foisted upon them. In Season one whenever Lt. Cmdr. Price and CPO Pertwee had to team up to outfox Povey's plans to drill them out of the Navy.
* The Navy Lark, but C.P.O. Pertwee and Fatso Johnson would do it more than most.
* The Navy Lark Captain Povey frequently falls into this category with his obsession for hounding the Troutbridge crew out of the Navy. To be fair, the crew of the Troutbridge are completely incompetent/derelict in their duties.
* The Navy Lark, CPO Pertwee buys a phrasebook that seems to consist of nothing but these.
* The Navy Lark, C.P.O. Pertwee has to get Number One a luxury chair that he really isn't entitled to, and decides the best way to do it is by indenting for a large quantity of them because the only time he indents for a single anything is when it is a battleship. Ultimately it fails because everyone else up the supply chain has the same idea, and by time the request reaches the naval supplier it has multiplied into every single luxury chair in the Royal Navy.
* The Navy Lark, CPO Pertwee once attempts to become a lighthouse keeper so he can lure ships on to the rocks and loot them.
* The Navy Lark due to the way he talks (not that anybody says that to his face).
* The Navy Lark episode set during Phillip's naval training. Well, at least according to Phillip's recollection anyway...

* The Navy Lark has such a poor sense of direction he once confused Shanklin (Isle of Wight, just off England) with Shanghai. And yes, he is the navigation officer.
* The Navy Lark, his navigation manual is "Sinbad the Sailor's Big Book of the Sea''.
* The Navy Lark is attempting to defuse the self-destruct mechanism on an American satellite. Fortunately, the first time this happens it turns out that what they have retrieved is not the satellite but a marker buoy. The second time, however...
* The Navy Lark. It's the only ship in the navy with a corrugated hull, and once had her entire superstructure blown clean off leaving her looking like a miniature aircraft carrier, yet she still manages to not sink and keep going.
* The Navy Lark: One of the stock plots is Sub-lieutenant Phillips' romantic pursuit of WRNS Heather Chasen. He's also not opposed to a bit of freelance womanising and innuendo if some other females are around.
* The Navy Lark, only to be forced into a last second word swap by a threatening interjection from Commander Murray.
* The Navy Lark rise up the ranks as much as they would in the real navy. Then there was that time resident Welsh ethnic stereotype Able Seaman Goldstein was mistakenly promoted all the way to Commodore...
* The Navy Lark so all it did was remind him he had forgotten something (at the end of the episode it was revealed: It was to remind him to buy string).
* The Navy Lark, the cast managed to chew enough scenery to keep a good-sized Shakespeare festival supplied for years.
* The Navy Lark. Then, Povey's mother-in-law gets laid up with the flu, and he is free to go. At this point, Phillips (still bringing the ship home) finally crashes full-speed into the dock.
* The Navy Lark. The show had to be on the radio — there's no way the BBC could have ever afforded all the scenery the cast would have eaten.
* The Navy Lark, the Troutbridge is sent to retrieve a lost American satellite. After they think they find it, an American expert reads them a ludicrously complicated set of instructions on how to disarm the device. The crew get hopelessly lost, but it turns out not to be really the satellite after all. However, they later find the real satellite and find they can't remember the instructions at all.
* The Navy Lark, Troutbridge's Number One in the first season, Dennis Price, was replaced by Stephen Murray in all the following seasons. They were different characters, but shared some of the same knowledge and responses.
* The Navy Lark uses oil-burning boilers. Wales is known for its coal industry. It's all that Goldstein can do to keep his mother from disowning him and urging the citizenry of Swansea to lynch him as a traitor to Wales.
* The Navy Lark Vice-Admiral 'Burbly' Burwasher ever obtained his rank.
* The Navy Lark: When Commander Murray and his wife are sharing a house with her parents, she refuses to have sex because the bed squeaks and her parents will hear them. Murray's frustration levels are not helped when he puts his back out attempting to fix the bed, and his crew assumes he put it out indulging in a different bedroom activity.
* The Navy pilot and maintain the ship, the Marines are troops on board ready to deploy to a combat zone its the Navy's job to get them and drop them off safe. It's pretty much how it is today, Navy pilots, maintains and supplies Corpsmen (Medics), the Marines are dropped off and fight.
* The Navy rank of "Captain" corresponds to the Air Force/Army/Marine rank of "Colonel". Both are Officer Grade Six (O-6) with rank insignia being a silver eagle. The Air Force/Army/Marine rank of "Captain" corresponds to the Navy rank of "Lieutenant". Both are Officer Grade Three (O-3) with rank insignia of two silver bars.
* The Navy Seal Copypasta to make himself seem scary to get back at the guy.
* The Navy song is "Anchors Aweigh," meaning to weigh anchor. (When the command "anchors aweigh" is given, the sailors
* The Navy Working Uniform or NWU type I, worn from 2008 until 2019. Similar to the digital style of camouflage worn by the Marines, with a digital pattern of the

standard fatigue design, the NWU was meant to evoke the style of tactical gear worn by other services. All well and good except for the color, a blend of blue and grey. For extra mileage, officers and senior enlisted had spots of gold coloring on them. Arguably subverted however, NWUs are meant to be worn in a shipboard or industrial environment and are designed not to hide the sailor, but to hide any paint or oil stains the uniform accumulates. Thus, while they might "look" more military than the utilities they replaced, they would have been almost useless in an actual tactical environment. Not to mention that it's pointless for a ship's crew to camouflage themselves.
* The navy would then bring three obsolete cruisers out of reserve and commission them then build one new cruiser. For the next year or so the navy would honestly say that they had four more commissioned cruisers than before and the politicians would be satisfied. Then the navy would quietly decommission the old cruisers and repeat the scheme.
* The Nazgul are often depicted in art as having glowing red eyes. As they are normally invisible, this is their only visible feature.
* The Nazi leadership In-universe, post-war historians are baffled at the insanity of diverting a considerable amount of military manpower and resources to what is effectively glorified vandalism.
* The Nazi Occult containing every single Nazi Occult connection he could find, for use as a systemless sourcebook for weird WW2 plots.
* the Nazi Party. He was thrown into a concentration camp but still managed to survive the war.
* the Nazi Party threatened to quit unless the party's governing committee gave all power to him and acknowledged him as the party's undisputed Führer. By this time Hitler had already made himself indispensable as NSDAP's principal public face, public speaker, and fundraiser, so he got his way.
* The Nazis also had a series of variants for domestic policy outside Germany, particularly in the General Government (Polish) and Reichskomissariat Ostland, Ukraine, Muscowien, and Caucasus (USSR) zones. There would be a short-term 1/4 reduction in the size of the native populations (about 10 million Poles and 50 million Soviets) to make room for ethnic Germans settlers to be installed across the territory. After that, native population levels would be maintained or even decreased through controls on reproduction. Once the German population in those areas was sufficiently large, the remaining natives (by now fewer than 200 million) would be phased out entirely through ethnic cleansing or extermination. Abortions were permitted to non-Aryans (and sometimes forced on them) of course, along with birth control, as one step in realizing this aim.
* The Nazis also sponsored concerts of good, wholesome, Aryan music and also exhibitions of
* the Nazis and their snazzy uniforms, Stalin knew what he was doing when it came to aesthetics.
* The Nazis anticipated this would happen to Munich during the war, and took extensive photographs of the city so it could be rebuilt to its former glory. In reality, Munich's postwar rebuild is rather Zigzagged. The city was bombed so much, that the reconstruction of the Bavarian Palace is still ongoing and is expected to be completed in the 2040s. Despite this, the four tallest pre-War structures still stand with only one taking minor damage (from an Allied Plane crashing into the spire, knocking the top part off). This is because they were aligned in the cardinal directions and Allied bombers would use the building as a compass to their target in the city, and purposely avoided this trope. The U.S. was able to find all the documentation of Munich in a bunker after the war and was able to rebuild it.
* The Nazis carried out scientific explosive decompression experiments in the death camps, with a view to working out survival techniques for submariners at great depths, or for aircraft crews in planes that were going ever higher and higher and subjected to diminishing air pressure. Unlucky and dispensable test subjects were placed in atmospheric chambers and subjected either to massively increased atmospheric pressure or to the sort of atmospheric pressure to be found in deep space. Quite often they were used to test prototype high-altitude flight

suits and survival systems, and most of the conclusions drawn above were in fact scientifically proven by a regime that viewed some people as expendable lab-rats. While nobody wants to admit it, this Nazi research was in fact vital to post-war America and Britain, who reaped the benefits of Nazi science for their own military use whilst keeping their hands clean and staying morally spotless.
* The Nazis conducted several purges, from the party's first ascension to political power right up through the end of
* The Nazis had several super-heavy tank projects. You have the Landkreuzer projects, which were never completed. The P1000
* the Nazis in much of the modern world. Many uneducated tourists who visit parts of Asia are shocked to see the swastika adorning ancient temples or even homes, not realizing that it is an ancient spiritual symbol that was stolen and perverted by others in relatively recent times. In America, variations of the swastika were often used by Native American tribes.
* the Nazis never noticed this. (Then again, selling wine in metric measurements is quite common, even in the US.)
* The Nazis (Other European ethnic groups were much more lucky: the English were practically the Germans' equals, the French were just one notch below the English, and Italians and Spaniards were just one notch below the French. Hitler was prepared to respect all these peoples — unless, of course, they opposed Germany. But they really, really didn't like Slavs.)
* The Nazis outlawed atheist and freethought groups as well as Freemasonry in Germany in 1933. In one instance, the headquarters of the German Freethinkers League wound up being used by the churches of Berlin as a bureau to convert people and give religious advice. In a lesser example, the SS loyalty oath denounced atheists, while banning them from joining. Freemasons were also deported and executed in concentration camps alongside Jews and Gypsies. In practice though regarding the SS, those terms had socialist connotations in Nazi Germany. Any non-socialist who was not Catholic or Protestant (and Muslim in certain cases),
* The Nazis usually called units "elite" for propaganda purposes, such as the
* The Nazis were getting hammered in the tank battles on the Eastern Front, so they decided to build a scaled-up tank, with armor thick enough to shrug off enemy tank shells, and guns big enough to one-shot enemy tanks. The "Maus", as it was ironically called, weighed 200 tonnes, was 10 metres long and 3.71 metres tall. The tracks were 1.1 metres wide — more than half its 3.63 metre width — in order to try to spread the load, but it still tended to sink if the ground wasn't completely firm. The designers had a difficult job designing (and then redesigning) a suspension system strong enough to support the weight, and finding an engine big enough to drive the whole thing — in the end, more than half of the Maus was occupied by powerplant and transmission, and it still wouldn't go over 13 kph. Crossing bridges with that weight was out of the question, so it was designed to be able to ford rivers, completely submerged if necessary. It was to have a 150mm main cannon. Unfortunately, they were unable to do anything about it destroying roads and damaging nearby structures simply by its weight and vibration. In the end, only two prototypes were built. That's not all, though. Plans were on the drawing board for a
* Then Azula arrives and gives Zuko the chance to capture or kill the Avatar together, which would finally restore Zuko's reputation and allow him to return from exile. Zuko almost
* The NBA and NFL drafts are traditionally held each year in New York.
* The NBA attracts its fair share of hatedom from "purists" or old school fans who feel the league has been over-commercialized or because of the lower scoring of this era, over-emphatic on defense, hockey fans who feel the media focuses too heavily on basketball at the expense of their favorite sport, and racists who find the NBA to be a convenient way to side-vent their prejudices (if the person uses the word "thug" or any variation in describing why they don't like the NBA, they usually fall under the last category).
* the NBA during the 1991-1992 season due to his HIV Positive status, at a time when he was still playing at an All-Star level and public knowledge of HIV/AIDS was

more rumor and urban myth than fact. In 1996, he was medically cleared to play and rejoined the Los Angeles Lakers for the 1995-1996 season, when HIV was better understood and was no longer considered an instant death sentence. Johnson returned both to show that people with HIV could live their lives normally and so that his final season would be played on his terms.
* The NBA first implemented the draft lottery in 1985. The previous year, the Houston Rockets were accused of tanking hard to win the first overall pick in a
* The NBA Trivia mode forces the player to answer a question relating to the NBA (aside from one question that is instead about the mode itself).
* Then BBC newsreader Martyn Lewis appears in an 'archive' report on Elektra King in
* The NBC Chime (the notes themselves remain as a signature for the television network)
* The NBC Nonstop channels morphed into Cozi TV in 2012. Cozi is another retro channel in the vein of Antenna or MeTV, using the
* The NBC Rerun doesn't have any new episodes, usually between new episodes, during major holidays (Thanksgiving, Christmas, and Easter), or when the season ends or is on hiatus because of a writers' strike (as was the case for seasons six, ten, thirteen, and 33). It's 90 minutes long (just like a typical first-run episode), has the phrase, "Previously Recorded From An Earlier Broadcast" during the opening credits, and has dress rehearsal scenes (and, in some cases, sketches) to replace the live show footage (either for content reasons, to fix a technical error or missed cue, or to make a sketch/segment funnier after flopping badly on its first-run). This cut is the same one that airs on the West Coast.
* then beat the crap out of them, maybe even alongside your own avatar.
* Then, because simply killing someone who attacked her husband's reputation was not enough, she and her lawyer
* then becomes very dizzy, falls asleep with his head on his arms, and only upon awakening realizes he didn't lie down. Instead, he is up to his armpits in soft soil.
* then better file access speeds (write speeds may vary depending how good a solid state drive you invest in).
* Then Black Mage kills them all with his knives in a few seconds and summons the monster, who immediately dies to Red Mage (by accident, no less).
* then Blaustein) and Mary Ellen Cosgrave were called "Binky" and "Melly" by their high school classmates.
* Then brought right back in with two of the main group's Pokémon in
* then, but it's usually played for laughs.) Friends may come and go but the TARDIS is forever!
* , then by asking the doctor who genetically altered him to turn his father into a pig.
* The NCAA "death penalty" in 1987 is often thought to have killed the Southern Methodist University football team, and is often regarded as an argument against strong NCAA sanctions against any particular team. In reality, when the full extent of the pay-to-play scandal was brought to light, the university itself (and the church bishops overseeing it) decided to de-emphasize its football program (threatening to drop football entirely if need be), imposing extremely tight recruiting restrictions, making the team play in the tiny, on-campus Ownby Stadium (which the Mustangs hadn't played in since 1947) instead of Texas Stadium or the Cotton Bowl, and severing ties with almost all players and boosters associated with the program in the 1980s, greatly alienating the program's supporters.
* The NCAA,in recent years, has also been insistent in calling its players "student-athletes", regardless of what a consistent stream of recruiting violations and bankrupt ex-pros might imply.
* The NCAA mandate that all Division I schools with a football team must play football at the Division I level is often called the "Dayton rule", because the University of Dayton was a dominant team in Division III football in
* The NCAA "March Madness" Basketball tournament can act like this, because of automatic bids. A team that wins its conference tournament automatically gets

entered into the big dance. Every team in a conference gets to play in its tournament. In theory, a team can lose
* The NCAA Men's Tournament in general features several opportunities in the early rounds for David to fell Goliath before Goliath gets a chance to make a deep run. More often than not, another Goliath restores order as early as the second round, though David occasionally runs as far as the Final Four.
* The NCAA (particularly in football and basketball) and professional leagues such as the NBA, NFL and Major League Baseball
* Then Came Bronson 1970s TV series, where Bronson more-or-less single handedly saves the concert from being cancelled, which would have probably earned him an all-access backstage pass for his effort, is standing in the background watching the show which he saved, and mentioned (as a joke) to the band's manager that it just occurred to him that he never paid for a ticket.
* Then Came Bronson has Michael Parks, as Jim Bronson, traveling around the country on a motorcycle. The opening credits have Bronson briefly talking to a commuter next to him at a traffic light:
* Then came ChaosUT2 for the sequel, bringing with it a graphical upgrade and a few new additions like the Chaos Pulse Pistol as dual-wieldable spawning weapons, the C.U.T.T.E.R. which is a badass-looking version of the Ripper, the Chaos Grenade Launcher with four types of munitions (explosive, poison, napalm, flashbang/EMP) and the Vortex Launcher which now enables the user to actually run away from the black hole before it activates. The MUG (Multi Utility Gun) now operates like a normal flamethrower and the Claw can be loaded with needle packs whose projectiles stick onto whoever touches them and continually deals damage. It even added two vehicles: the easily forgettable hoverboard and the
* Then came Maya Matlin, a cute innocent band geek. She still mostly fits the mold but she's shown to have some bite to her when pushed, but her intentions stay mostly good. And it didn't take much to put her back on track.
* Then came the game itself... Friaça opened the scoring for Brazil just after half time, and the mostly Brazilian crowd went wild. Uruguay's Juan Alberto Schiaffino equalised twenty minutes later; the crowd spirit was dampened, but only temporarily as a draw still favoured Brazil. But then Alcides Ghiggia put Uruguay in front in the 79th minute, and the crowd went completely silent. Uruguay held on to win the match. Several Brazilian spectators either suffered heart attacks or jumped to their deaths from the top of the stadium, Rimet had to throw away his prepared speech and awkwardly hand over the trophy to Uruguayan captain Obdulio Varela with no ceremony, the winners' medals were melted down, and "Brazil the Victors" was never performed. The match is nicknamed the "Maracanazo", or "Maracanã Blow", in Latin America.
* Then came the sad day when the dev team announced that due to the lack of interest in UT3, ChaosUT3 was cancelled.
* Then came the second arc's villain Queen Morganthe, who in addition to being a magical prodigy that learned directly from Merle Ambrose himself and also has access to powerful Astral magic and can completely waste to entire worlds of the Spiral;
* Then came "Zero Year", a story meant to give readers Batman's new origin that was unfavourably compared to the acclaimed "Year One" by Frank Miller, while also suffering from a huge case of
* Then-captain Thrawn is also there and appreciates the gardens and how plants are arranged, but... see above, he
* then: Cap was revealed to have been a Hydra agent all along, via Red Skull manipulating a sapient, but juvenille Cosmic Cube into making it so. Though it isn't clear whether or not Kobik changed Cap's memories (With Red Skull giving the other Hydra agents the heads up) or changed the actual timeline.
* then carries on with fake adverts that are crashed through by the characters from the first ad.
* Then Cassandra sees the other two standing in a doorway and decides to investigate.
* then caused her arm to become demonic to make the girl an outcast. But when Mira

was captured by Cultist to build the R-System, not only does she learn about her Take-Over magic from Rob, but the torture from the cultist gives Beelzea a reason to lend Mira her power, letting her Take-Over her demonic power and make her become one of Fairy Tail's strongest wizards.
* The "NCC" prefix of Starfleet ship registration numbers stands for "naval construction contract."
* Then comes the fourth book, where we find out that for the most part, humans are
* Then comes the "Lost Light" arc. Whirl states that he actively hates the gods, Rodimus goes so far as to
* Then comes the movie "Arthur's Missing Pal" which is done entirely in 3D CGI.
* Then come the Capital Ships, which require Orbital Shipyards to build:
* Then compared them to Achnologia, a former Dragon Slayer who is now a Dragon and an anciently powerful being.
* Then Conner figures out that Caroline was working for Leek and wasn't really interested in him. He realizes she played him for a fool and turns to leave... Of course, Caroline is suddenly interested in him for real.
* then consist of endorsing and supporting them). The Illusive Man is bad enough, but Kai Leng, especially in the novels, is a racist douchebag of the first order.
* The NCR are not exempt from this. Most notable are Colonel Cassandra Moore, whose answer to the various tribes of Vegas seem to just be to try and wipe them out (especially the Brotherhood of Steel, to the point that she'll be pissed at you for managing to come to a diplomatic solution between the two) and General Oliver, a
* The NCR are the most obvious "soldier" faction, having based their government and military on the model of pre-apocalypse USA. The NCR is noted to have tons of money, greater numbers, and better equipment at their disposal.
* The NCR has access to functional pre-War US Army trucks, which they used to haul some of their troops and supplies from California to their bases in the Mojave.
* Then Dara O'Briain (the show's host) corrects him by telling him that there are in fact
* then decide to take revenge on the condescending feds by taking over the role of the terrorists.
* Then Dipper eventually realizes he has to play it backwards. Upon doing so, he and Stan discover a hidden message. Cue the spit take then.
* Then done again with a 3x3 window, only this time with only two defenders who smash "X" and "O" shaped holes in the windows, when one of the defenders manages to get three "O"-es in a row, the window gets blasted out.
* then drinks a glass of water. He swells up to the size of a parade float, and as a result, gets stuck in the doorway when Sonic tries to get them away from Scratch and Grounder.
* Then dropping major hints towards Lightning going to meet Hope in the in-game epilogue.
* Then, Duncan Idaho learns how to do it too, and passes the secrets on to a secret organization of men, leading to a shadow war were most battles are about who can out-nookie whom. The blowback from his very
* Then during the '90s during the gay AIDS epidemic, mutants were given a disease called the Legacy Virus that was essentially mutant AIDS. When asked when it would be cured, writers responded "
* then, during the climax, the world-wise character is confronted with a situation that requires them to dive right into the aphormism. Upon which they will give their younger companion some sort of nod of acknowledgement.
* Then during the Korean War became the more impersonal "Operational Exhaustion" which Carlin said sounded like something a car might suffer.
* The Neal submachinegun was intended to give the low-power but dirt-cheap .22 Long Rifle round effective military use. Because one round by itself does not do much, the gun was intended to deliver
* The Neanderthal Man, he tests it on his deaf-mute housekeeper, who only partly reverts and has no memory of being experimented on afterwards. Groves chalks the failure of the experiment up to "some incompatibility between my formula and the

basic female constitution."
* The Neanderthal Man in order to prove his theory that Neanderthals were smarter than humans. When he tests the serum on himself, he turns into a murderous ape-man.
* The Neanderthal Man, Professor Groves' fellow anthropologists think his theories that prehistoric man was smarter than modern man are absurd. It doesn't help that when he's asked for evidence, he starts yelling about how close-minded everyone else is.
* The Neanderthal Man to demonstrate that humanity's ancestors had larger brains. Piltdown Man was exposed as a hoax about five months after the movie came out.
* The Neanderthal Parallax: The Neanderthals only have children once ever 10 years. This is accomplished by women and men living separately and only meeting on a cycle that ensures they're only fertile one visit every 10 years. The population control also allows them to concentrate their resources on particular age groups at regular, predictable intervals.
* The Neanderthal Parallax" trilogy is all about an alternate universe where Neanderthals didn't go extinct, but homo sapiens did.
* The Neanderthal Parallax where Neanderthals and not Homo Sapiens survived, uses his implant to communicate with people from a universe like our where English is spoken and homo sapiens survived. This is especially important as Neanderthals cannot produce the long-e sound, making a lot of Homo Sapiens words unpronounceable naturally by them.
* The Neapolitan Novels. Lila is the nickname that only Elena uses, and her narration says that if she ever called her anything else Lila would know they had broken up for good). It's strongly implied the reason it remained to this level and didn't become a full lesbian relationship is the extremely conservative culture of Italy at the time the early parts of the series are set (the protagonists having been born in 1944)
* The nearby town of Desert Bluffs appears to fill this role for Night Vale as a whole. Albeit quite a serious one.
* The near-eponymous (technically speaking, the Manchurian Agent isn't the "Manchurian Candidate", but that's nitpicking)
* the nearest available equivalent to escape a Dyson sphere in "Relics".
* The near extinction of one or both warring families upon their children.
* Then Earl accidentally bumps his new golf cart into Richfield's trailer, to which Richfield fakes an injury... But the judge demands that Richfield hire back all fired employees while Earl give Richfield his money back.
* the nearly any enemy attack, they don't often feel the need to think and strategize, as merely blasting the enemy into oblivion is often enough to do the job. In contrast to several examples of this trope, the Daleks never grow out of this mindset and their solution to every defeat they have faced is simply to increase the strength of their weaponry and armor from what it was previously. Also in contrast to said examples, simply enacting this approach has enabled them to remain a relevant and competent threat over their decades-long history on the show.
* the nearly-as-advanced Humans and San'Shyuum, ultimately culminating in the Forerunners forcibly devolving the former and stripping them of all of their technology, and quarantining the latter to a mere two planets. Ironically, it's implied that the Forerunners' overbearing rule played a big role in the fall of their civilization; they had weakened their subject species so much that the latter could provide no real help in fighting back against the Flood, forcing the Forerunners to resort to wiping out all life in the galaxy (themselves included) with the Halos.
* then. Earth is just another planet where the Autobots are trying to protect the native populace from the Decepticons without being caught...but the discovery of a super-energy source brings notable Transformers from both sides, including the leaders of both factions, to Earth, the standard protocols being skipped over entirely.
* The Nebraska Cornhuskers football team in the '80s and early '90s under coach Tom Osborne never lost more than three games a year and were in contention for a national title every year, but choked against the speedy, athletic southern teams

(most notably Florida State and Miami, who clinched 3 combined national titles in bowl games against Nebraska). The most painful of these was in the 1983-84 season, when undefeated #1 Nebraska tried and failed a two-point conversion against Miami (in the Orange Bowl, held at Miami's home stadium) that would have won the national championship, when a standard PAT kick would have tied the game (there was no overtime in college football until 1996) and STILL kept them at #1 in the rankings. This infamously gut-wrenching moment can be viewed here:
* The Nebula Creature (a massive organism that Voyager mistook for a nebula.)
* The Nebula M78 Timeline, where the first eight Showa Era series such as
* The Nebulans who become Headmaster partners with Transformers go through a bit of this, as the binary-bonding process links their minds with those of their Cybertronian counterparts. When the peace-loving Galen bonded with Fortress Maximus, he turned into a cold and calculating warrior, while Zarak, a
* The Nebulon-B and Acclaimator class frigates look pretty damn cool, and the Nebulon-B is quite formidable for its size.
* The Necbromancer in the Haunted Sorority House, who has three forms and a special attack that takes 30% of your HP.
* "...the neck bone's connected to the head bone..." [No such thing as "the" neck or head bone: both head and neck have several.]
* The Necklace of Fireballs is the magic equivalent of a bandolier of grenades. If both the wearer and necklace fail their saves against a magic fire attack, all remaining fireballs activate immediately.
* The Neck Snap showed in Yang VS Tifa is shown again in Deadpool VS Mask albeit in a hand-drawn style, but Deadpool himself uses the Continuity Gem to invert the kill
* The Necloth of Trishula has the same effect and stats as the original Trishula.
* The Necro Critic. He reviews both bad movies AND bad videogames. And, as of recently, is even reviewing anime.
* The Necro Critic. Nowadays, he incorporates those types of rants into his review videos.
* The Necro Critic where Charles takes Tanya on a date in a graveyard.
* The Necromancer 'arranges' a death every so often, only to return under a new ID. Furthermore, Deathlist, the rival of the Principal, always pulls a Villain: Exit Stage Left, only to return an indeterminate amount of time. These two may fit another trope as well.
* The necromancer before the expansion had spells with awful scaling effects. His poison spells did not gain damage per second when you spent skill points into them, only duration, meaning you could kill anything ... over the course of 30 seconds. In an action RPG. The worst of the worst were poison skeletal mages which ended up doing 1 damage per second for 3 minutes.
* The necromancer Lord Markus of Tlantos intended to take over the body of his subordinate necromancer Chismar - in the case that his own body was killed - through the Soul Bridge spell placed on said subordinate. As Chismar was killed before Markus, the Soul Bridge forced Markus' soul into the corpse, creating a lich. Note that in this setting a lich is an omnicidal manifestation of supercharged necromancy and becoming one is a disgrace.
* The necromancer Sawyer is never seen without one of these on his face in
* The necromancers of the franchise base their actions on the notion of a Balance. The novels attempt to (not always successfully) play with this. In one book, the villain is a necromancer who points out that all the necromancers do is fight evil, which doesn't adhere to the concept of a Balance. The hero of the book, another necromancer, continues to fight him,
* The Necromantic Mysteries of Kyle Murchison Booth, also feature one of these as a major setting.
* The Necromantic Mysteriesof Kyle Murchison Booth has an elevator that has a tendency to break and stop between floors. After several long minutes of terrified screams from the person using the elevator, it will again work and a dead body will be all that's left. It's implied that this has happened many times.
* The Necromantic Mysteries of Kyle Murchison Booth stories take place in a Cosmic

Horror Story universe — unsurprisingly, as she openly acknowledges Lovecraft as a major influence.
* The Necronomicon is listed in the Ohio University Library card catalog.
* The Necronomicon was a fictional book merely cataloguing the monstrosities in Lovecraft's mythos. It's been so widely used as a literary reference, however, that people have made real life versions (including a visual one that inspired the
* The Necrons actively avoid this, preferring to teleport away without a trace rather than lose a battle. In earlier editions this was even the army's
* The Necrons also have a variant in the dreaded Warscythe, although it's more of a glaive than a military scythe, and is so deadly it can bypass virtually
* The Necrons appear fully robotic at first glance, but are actually full-body cyborgs created from a long-extinct alien race.
* The Necrons are a futuristic version of the trope. They're an updated version of the Tomb Kings from
* The Necrons are an entire RACE of this. Even if reduced to liquid metal, any Necron is teleported away and rebuilt to be redeployed. However, later fluff has nerfed this by reducing the Necrons' overall mental ability every time they die, some of them even forgetting that they're made of metal and flay their enemies alive to wear their skin.
* The Necrons are somewhere between the end of an interregnum and the formation of their second empire - they are in the process of waking from hibernation they were forced into due to the lack of sentient food for their
* The Necrons are the result of an ancient alien race, the Necrotyr, uploading their consciousness into skeletal robotic bodies. Thematically the Necrons are intended to be a
* The Necrons, being ancient alien souls sealed inside advanced necrodermis bodies, are not much bothered by fire.
* The Necrons can use their Lord's teleportation and immortality from the "Essence of the Nightbringer" skill to do this in the Imperial Guard stronghold. The Necron Lord simply teleports over a set of small islands in a river right to the enemy headquarters (the only structure that needs to be destroyed), activates the Nightbringer mode and gets rid of it; mission complete.
* The Necrons fought and ultimately lost a war for control of the galaxy long before the dinosaurs died on Terra. While most of them where asleep for their sixty million+ years of self-inflicted
* The Necrons gained immortality by being transformed into robots, which obviously presents a rather insurmountable obstacle to reproduction. In fact their (active) population is not particularly high, yet can war with other races with little issue because any "killed" Necrons are immediately teleported back to their base and repaired by automated systems.
* The Necrons get out of death (most of the time) by just teleporting out and regenerating. Things a Necron can get patched up from include: nanometer thin shuriken, rapid fire missiles, holy napalm, and anti-tank weapons that vaporize almost anything. If Necron forces are on the verge of defeat then they, remains and all, get teleported back to their tomb world for be repaired; taking this to the logical extension, this means that very,
* The Necrons have been going through a phase of Chew Toy status, amusing and pleasing some players to no end.
* The Necrons have the Flayed Ones, who wear their enemy's flesh as a hide (they are batshit insane due to a virus in their coding making them think they're still flesh and blood Necrontyr, and so wear dead people's skins to show off that they are still living).
* The Necrons have these in the form of Mindshackle Scarabs, which are occasionally used to subvert and conquer worlds.
* The Necrons have the Tomb Stalker, a giant metal centipede with two guns that fire beams of energy that flay you molecule by molecule. If that wasn't enough, it can become incorporeal in order to pursue its targets
* The Necrons make the Eldar look downright primitive in comparison. The Necrons have achieved immortality (

* The Necrons originally had vague allusions to ancient Egyptians, and their fantasy counterpart, the Tomb Kings. Come 5th Edition, they're all wearing pharaoh hats and wearing gold and blue jewelry while wielding sickle blades. Also done by Matt Ward. The players received massive
* The Necrons (or rather their Necrontyr precursors) mix this with number four and a
* The Necrons race, only made into immortal, self-repairing robots and locked in stasis for 65Myr. They haven't improved their technology because it's already vastly superior to everyone else's and they are now unthinking automatons, for the most part.
* The Necron's technology is made out of the same living metal as they are and have
* The Necron stronghold has a bunch of empty tunnels your forces can use (though you need to discover the tunnel exits to use them), one near your base and one near the Nightbringer. The goal of the mission is to get your hero to drop a bomb at the Nightbringer's room and evacuate before it collapses, which the tunnel makes a lot easier.
* The Necrons were also this, their army was pretty bland, with zero personality and very little to no updates. Now they got a massive change along with a lot of new figures and a revised back story making them more interesting, although there are those who feel that the changes removed what made them scary in the first place.
* The Necrons were once incredibly short-lived beings who longed for immortality. One day, they were approached by
* The Necrontyr declared war on the Old Ones using the Old Ones' refusal to share the secrets of immortality as a pretext. The real reason was because the Necrontyr had become spiteful and hateful beings due to their lousy short-lived existences and one of their leaders believed they needed an outlet. The Necrontyr waged a genocidal war on the Old Ones
* The Necrontyr homeworld lacked an ozone capable of protecting the Necrontyr from the worst of the radiation emitted by its sun. Radiation sickness, cancer, and brief lifespans plagued the Necrontyr. This led to the birth of a culture obsessed with death, an obsession that lingered even after they achieved immortality of a sort as the robotic Necrons. One major reason the Necrontyr waged war against the Old Ones (and eventually all life) was because they envied the Old Ones' power and immortality and resented them for not sharing their secrets.
* The Necrontyr's jealousy of the Eldar's long life which led them to pledge their services to the C'Tan.
* The Necrontyr's resentment of the Old Ones' longer lifespans was used by the C'tan to trick the Necrontyr into becoming the zombie-robot Necrons.
* The Necrontyr wanted immortal iron bodies to expend their livespan, and asked the C'tan (godlike beings feeding off stars) for their help. The result ? A population of nigh-invincible, self-repairing mindless automatons.
* The Necrontyr wanted immortality. The C'tan granted that wish...by turning them into undying robotic horrors. Not surprisingly, some of the Necrons who still have some of their mental faculties have decided that being fleshy short-lived mortals wasn't so bad after all.
* The Necrontyr were even worse bastards than the murder machines they would eventually become. They were a short-lived and bitter race who hated and envied the Old Ones for not sharing the secrets of immortality. They also grew to hate each other, and civil war was only barely averted when their leaders decided to direct all of that hatred towards the Old Ones, using their refusal to share immortality as a pretext for war. Yes, the Necrontyr tried to kill an entire race who had never really done anything to wrong them as
* The Necron warriors become stilted and repetitive when there's no Lord to command them. Sicarius spends the entire book trying to exploit this fact.
* The Necron World Engine, unsurprisingly, is a Necron ship the size of a planet (because they slapped an engine on a planet). An entire space marine chapter sacrificed itself to give an enormous Imperial fleet a fighting chance.

* The Necro-Overs (NEVER for short). Katsumi was previously a very good person and not all that evil, in fact he loved his mother dearly. Then she used the Necro-Over project to bring him back after his accidental death. However, when he was brought back, instead of the kind, caring son she once had, he wants everyone to be turned into 'monsters' like he is. When he's finally destroyed, he laughs at how it feels to die. It's unknown why, but he may have just been glad to be dead again.
* The Ned-Liest Catch", Edna falls in love with widowed Ned Flanders. Edna and Ned have a getting-closer-and-falling-in-love montage. Kids at school read about them in the paper with pictures of their dates, then they are watching a movie together, then walking and holding hands (while a river parts so they can walk on the dry bottom) and Edna is reading a story to his sons. It ends with Edna doodling lovey-dovey stuff.
* The Ned-Liest Catch, she's seen drawing little doodles of Ned's ripped body or an angel with Ned's head and writing 'Neddy' or 'Cupid Flanders' and similar stuff all over her sheet of paper.
* The need for an off-brand version of Golden Crisp Cereal gives us Golden Puffs. Mascot? "Lil Oatey." a blue Kangaroo. Lampshaded by the words on the package "Betcha can't taste the difference between Golden Crisp." and they're right. You can't.
* The need for an off-brand version of several other cereals you could lie to your children about and convince them that they were the advertised stuff is what likely brought us the "Toons" brand of breakfast cereal.
* The need for a snappy logo is what drove the New Atheist movement of the early 21st century to adopt several different logos, the most commonly-used being
* the need for secrecy complicates Part 2 should the source of their knowledge become known.
* The Needle Children, who cannot be seen through glass, laid pointless siege to an old folks' home in the suburbs.
* The Needle Drop. Even in Anthony's more frank and candid videos, he always asserts that Cal is a completely different person.
* The Needle Drop is acknowledged absolutely nowhere in Anthony's online presence.
* The "Needle" motherships of the Kadeshi are capable of spewing hordes of fighters
* The Needless: A being who doesn't need to eat, sleep, breathe, or go to the bathroom.
* The Needless to improve worlds/people's lives, for example terraforming mars and setting up portals to it and filling it with houses and free magical healing items and free food replicators, and they fix malaria and persuade everyone around them with any power to do the same.
* The Needs of the Many: If you can't save everybody, save the greatest number of people.
* The Needs of the Many in making the case that it may come to a point where killing Buffy's not-really-sister Dawn is the only way to save the world (failure of which would lead to Dawn's death regardless, as well as everyone else's). Buffy defies the trope, forcing its aversion, by threatening that she would kill anyone who attempted to kill Dawn.
* "The needs of the many outweigh the needs of the few (or the one)" also comes from said movie and
* "The needs of the many outweigh the needs of the few, or the one" is practically a mantra of the
* The Needs of the Many: Some lives have to be sacrificed in order to save other lives.
* The Needs of the Many: The needs of the many take priority of the needs of a few! So we're justified if we have to kill a few people to benefit the rest of society!
* The Needs of the Many: Utilitarian works may sometimes emphasize the majority needs outweigh the needs of the minority. Some may emphasize that if sacrifices need to be made, it will be on the minority.
* The Needs of the Many: You have to let some people die in order to save many others.

* The Nefertari family (Cobra, the late Titi, and Vivi) is descended from one of the ancient 20 kingdoms who formed
* The negative aftermath of the deaths of less likable, but quite influential characters isn't shown.
* Then Eggman launches an attack with the Death Egg Mk. II, which is temporarily interrupted by the
* The "neglected" variant shows up in a flashback for Vaarsuvius: their spouse went to great effort to arrange just such a dinner (sending the children on a visit to their grandparents, cooking a special meal, and setting the table appropriately), only for an oblivious Vaarsuvius to instead use the children's absence as an opportunity to study.
* The Negotiations-verse and manage to lay waste to much of Equestria, kill off a large number of their armed forces, and render Princess Celestia comatose after she spent the last of her power trying to protect her ponies from a brutal aerial assault, Twilight Sparkle decides to surrender the war, with the first story in the series taking place in the immediate aftermath of the war where she needs to negotiate a peace treaty with the UN to ensure the nation's continued survival.
* The Negotiations-verse is highly decorated for it and viewed highly.
* The Negotiations-verse points out something that Conversion Bureau fics tend to gloss over. Namely, if the sun and moon are moved by their leaders, what happens when those leaders go away to conquer another planet? Answer: the sun and moon stop moving, leaving the planet to bake to death on one half and freeze to death on the other while what little habitable land eventually is used up and the populace dies out.
* The Negotiations-verse that she never intended for this to happen and hoped to rectify it after the war, but it becomes a moot point after Equestria is defeated by humanity and Twilight gets to working on a potion that can give the converts their real bodies and minds back.
* The Negotiations-verse, which describes the war in the form of journal entries written by the protagonist, a Royal Guard), but it's stated to have gone on for five years, with both sides sustaining heavy losses (humanity lost at least half of their population and several cities/countries destroyed while Equestria lost the Crystal Empire, three of its princesses and most of its military forces).
* The Negotiator a hostage negotiator is framed for a crime, and knows most of his precinct is corrupt and probably in on it, so he takes hostages himself in order to attract the involvement of another precinct's negotiator, who he knows to be honest. In order to keep up the charade, he seems to execute an officer who came after him. Even the audience doesn't learn until much later that the man is still alive, merely bound and gagged out of sight.
* The Negotiator, Chris Sabian is trying to talk down negotiator-turned-hostage-taker Danny Roman. When Roman demands to talk to a confidential informant that can't be located, Sabian reasons that Roman doesn't know the guy either. He substitutes an impostor but is caught when Roman slips in a reference to the impostor's time playing ball for Colorado State and the impostor fails to challenge it despite having Arizona State in his personnel file.
* The Negotiator, Danny Roman is a Chicago Police Department officer who, believing himself wrongly accused of murder, has taken hostages in police headquarters, but the building itself is owned by the Federal Government. The FBI agents agree to let the local authorities handle the situation temporarily, but then later take over. When Roman escapes the building, the local police take over again, because he is now at large in the city, which is not Federal jurisdiction. (Realistically, the Feds would still have jurisdiction because he was still a suspect in a crime committed on Federal property.)
* The Negotiator: Except for the beginning where Danny arrests a shooter and then is accused of murdering his partner, the entire action in the second act take place from afternoon to nighttime when Danny Roman holds Niebaum and a few of his colleagues hostage.
* The Negotiator has an example when the President's son blows up due to a bomb set in his person. However, the vomiting was induced to have an excuse to kneel and

hide the detonator chip in the nearby mud.
* The Negotiator is built around this trope. Samuel Jackson's character takes over an office building and holds people hostage, but it's all right as long as he catches the bad guy in the end.
* The Negotiator, the 1989 novel unrelated to the film, the villains attempt to restart the Cold War because their weapons contracts are being canceled because the USA doesn't need them anymore.
* The Negotiator, the best negotiator the Chicago Police have, Danny Roman, takes some hostages after being framed for corruption. A rookie negotiator named Farley tries to talk to him, and Roman starts giving the rookie lessons on why you should never say no to a hostage taker, then begins asking Farley awkward questions, culminating with whether Farley ever dresses up like a naughty schoolgirl and gets spanked. (More on the quotes page)
* The Negotiator, the police attempt to ambush former hostage negotiator Danny Roman with a pair of fast-roping SWAT members entering through the windows. However, being an ex-cop, Roman is prepared for this and the whole operation backfires when Roman manages to add both SWAT cops to his collection of hostages.
* The Nehekharan Gods are obviously based on the Egyptian pantheon with its similarly named gods Ptra (Ra) and Basth (Bastet).
* The Neidermeyer: An insane military leader who treats his own troops as disposable.
* The Neidermeyer: A superior officer who is characterized by his lack of effective action.
* The Neidermeyer Col. McKinsey is, he promptly ordered the pilot who truthfully snarked at him to be taken to solitary confinement.
* The Neidermeyer: I fucking hate those faggots that call themselves soldiers and I don't give three shits if they feel the same way about me!
* The Neidermeyer: The leader equivalent to the tropes directly below.
* The Neighbor: A couple of drug runners discover that their neighbor runs a kidnapping-for-ransom operation next door.
* The Neighbor are complicit in a kidnapping for ransom operation, and are not against murder or rape as well.
* The [neighborhood],[borough] construct (e.g. Red Hook, Brooklyn or Jamaica, Queens) is very commonly used in New York City, since the city has way too many neighborhoods for the average person to be expected to know the locations of them all.
* The Neighborhood: Calvin and Tina Butler are in their fifties. Dave and Gemma Johnson are in their thirties, about the same age as the Butlers' sons Malcolm and Marty, who are also friends with the Johnsons' ten-year-old son Grover.
* The neighborhood in "The All-New Halloween Spooktacular" where Vision meets Agnes is a real community in Williamson, Georgia; Rolling Hill Drive is the name of the actual road, "Ellis Avenue" (which is the original border of the Hex) is a re-signing of Williamson Zebulon Road.
* The neighborhood that comes with this expansion pack has no summer by default. Its "year" consists of spring, autumn, winter, and winter.
* The neighboring cities of Davenport, Iowa, Rock Island, Illinois and Moline, Illinois began to be referred to as the "Tri-Cities" after World War I. In the 1930s, nearby East Moline, Illinois had also gained a substantial population to be of equal status of the other three, and the region was renamed the
* The neighbor loves the protagonist and they most likely know, but just doesn't feel the same way.
* The Neighbors: Everyone in Hidden Hills, a perfect suburban community, is an alien. Jackie makes one of these Crop Circles things in a field when she is upset.
* The Neighbors, everyone in the neighborhood attended their gardeners funeral, and most of the aliens haven't attended a funeral or know about death so they made several weird acts like a stand up comedy, or lighting fireworks.
* The Neighbors in suburbia who take on the appearance of a multiethnic family (white husband, black wife, Asian son, white daughter) with the names of famous American athletes.

* The Neighbors is about a whole neighborhood of aliens doing this. The fact that they've all named themselves after famous celebrities, and that each of their families is a hodgepodge of ethnicities among supposedly blood relatives, are the most obvious examples.
* The Neighbors, Larry and Jackie cite that they picked British English accents while learning to speak English because they think said accents are the best.
* The neighbors' ranks are shown with the stars on their uniforms. Soldiers with fewer stars are positioned higher in the chain of command.
* The Neighbors uses the exact same establishing shot — the outside of the apartment building while a synth riff plays — for every single scene transition.
* The neighbour Herbert, likewise, is an elderly man who is strongly implied to be a pedophile on his first appearance. Later episodes only make it even more explicit — while he has never been shown outright raping any children, he is almost always alluding to it in some way, shape, or form, or attempting to lure children to his house or trick them into touching
* The Neighbourhood is about the singer falling in love with an idealized, 'flawless' girl that he starts a relationship with... and then falls out of love with when he gets to know her and realizes that she's human and flawed the way everyone is.
* The Neighbourhood's most popular song is "Sweater Weather", a romantic song with a vastly different tune than their other songs like "Afraid" or "Honest".
* The Neimodians speak with Japanese/Chinese accents, stereotyping that Asians are greedy.
* The Neitherworld, where Beetlejuice dwelled, was full of nonhuman ghostly entities.
* The Nekoken's training in a nuthsell - Cover a child in fish. Throw them into a pit full of starving cats. The child learns or dies.
* The Nekropolis Archives, Amon, the Darklord of Shapeshifters, holds a Wild Hunt once per year in celebration of the anniversary of the Descension when the Darkfolk departed Earth and migrated to Nekropolis.
* The Nekropolis Archives, a werewolf named Honani kills a prostitute. The protagonist, Matthew Richter, exacts justice by extracting Honani's soul and transferring the murdered woman's soul into his body.
* The Nekropolis Archives. Demons can change their form to disguise themselves, but they can't alter their kaleidoscopic eyes.
* The Nekropolis Archives, Devona Kanti is the daughter of a vampire father and a human mother. She isn't as graceful as full vampires, her pallor isn't as white, and she is more emotional. Sunlight doesn't harm her but suppresses her vampire powers. Additionally, while vampires have no reflection at all in mirrors, Devona has a blurred and foggy reflection.
* The Nekropolis Archives Devona Kanti was born of a vampire father and human mother.
* The Nekropolis Archives. However, the effects are only temporary; more in-depth repair is eventually necessary to fully reattach the severed parts or they'll end up falling off again.
* The Nekropolis Archives, leech vines are thorny vines which wrap around victims and drain their blood. They particularly love to drain the blood of vampires, who are generally not amused by the irony.
* The Nekropolis Archives, main character Matthew Richter gets decapitated. Since he's already a zombie, it doesn't kill him, but it renders him unable to do anything but talk until his friends are able to get it reattached.
* The Nekropolis Archives, Molog, the Demon Lord of Insects, has a body made out of millions of insects. The Watchers also tend to manifest in the form of insects, and gather together swarms of these component insects when they wish to assume larger forms.
* The Nekropolis Archives, Nekropolis is located in a parallel dimension called the Null Plains. There, it is permanently night, and the sky contains no stars. The only source of light is Umbriel, the shadowsun, which remains in a fixed position

instead of rising and setting.
* The Nekropolis Archives, Nekropolis is located in the Null Plains, a realm of darkness. The main source of light is Umbriel, the shadowsun, which creates a permanent twilight.
* The Nekropolis Archives, one of the monstrous inmates in Nekropolis's prison of Tenebrus is entirely covered in eyes. Matt points out that, while it certainly looks creepy, it is also a significant vulnerability.
* The Nekropolis Archives, protagonist Matthew Richter dispatches the warlock Yberio in this manner.
* The Nekropolis Archives, silver is highly effective against a variety of types of Darkfolk which are otherwise difficult to harm, including vampires, werewolves, demons. It is also used as a spell component, though its efficacy as a weapon means that it is treated as a controlled substance.
* The Nekropolis Archives story "The Midnight Watch", Devona buys Matt a building to use as the headquarters of his detective business. When he hears what a good deal she got for what should be prime real estate, it doesn't take long for Matt to realize that their office is going to be heavily haunted.
* The Nekropolis Archives Tavi gets bitten in half by a rampaging dinosaur. However, due to being a lycanthrope with a powerful healing factor, he is able to survive.
* The Nekropolis Archives, the collective being called the Watchers originally had no physical form. After observing the Darkfolk, they learned to assume shapes in order to interact with other beings. They primarily manifest as insects, but can also take any other form.
* The Nekropolis Archives, the Dominari, Nekropolis's crime syndicate, ensure that no one goes spilling any secrets they shouldn't by requiring all their members to be implanted with a parasitic tongue worm. It lays dormant unless the host tries to betray the Dominari, in which case it detonates and blows up their head.
* The Nekropolis Archives, the Frankenstein creation Baristastein rips out a minotaur's heart and holds it up so he can watch it stop beating.
* The Nekropolis Archives, the stasis fields employed by the vampire Orlock to contain people he finds interesting trap the subjects in a pleasant illusory fantasy.
* The Nekropolis Archives, the vampires of Nekropolis, called the Bloodborn, cast no shadows in addition to having no reflections.
* The Nekropolis Archives, witches and warlocks are members of a race called the Arcane. They look human, and are capable of interbreeding with humans, but are actually a species of Darkfolk.
* The Nekropolis Archives, zombie protagonist Matthew Richter can't digest food anymore, so he has to puke anything he eats back up. He sometimes uses this as a combat technique, as anything stored in his stomach for a while becomes noxious enough to be toxic.
* The Nelly Furtado cover of "Crocodile Rock" was originally recorded for
* The Nelson Boys, also in tiny handmade books. Instead of becoming writers, they started a creamery business.
* The Nelson Touch Kurt complains about his mistress making him sit through all the remakes of "Kung Fu Panda".
* The Nemean Lion also had impenetrable skin, according to Pindar and Bacchylides (both c. 480 BCE). The only way Hercules managed to kill it was either choking it or shooting it in the mouth with arrows (depending on the version).
* The Nemesis Continuum is a set of physical laws from the Abyss, and every time you understand one, the next one makes a little more sense. And as people understand them, they become real. Suddenly, the
* The Nemesis, meaning you're never truly safe. Then you realize he's after you specifically, no one else, and won't stop hunting you all across town until he gets you: for the first time in the series you're not dealing with a random mutation lashing out at life, but an intently created weapon made for the specific purpose of killing STARS members, the last of which you are.
* The Nemesis' redesign includes a distorted, nearly removed nose, an exposed

heart with an armored plating and tubes covering it, and the replacement of its original
* The nemuranai are items that have had the kami within them awakened, usually through prayer and supplication (though sometimes they awaken through use). Such items tend to bestow good luck on their users, and the more powerful ones also grant unique abilities, such as a sword that deals more damage each time it hits an opponent.
* The Neo-Anarchist's Guide To North America gone extinct, but was brought back (probably via cloning) to populate the forests of Tir Tairngire.
* The Neo-Anarchist's Guide to North America. In Washington D.C. there's considerable conflict over jurisdiction between the FedPol (Federal Police) and the FDC (Federal District of Columbia) National Guard.
* The Neo-Anarchists' Guide to Real Life has devices that can do the same thing with keypads and card readers. The keypad sequencer feeds a keypad system a series of passcodes, and a passcard (AKA skeleton card) does the same with the card reader into which it's inserted.
* The Neo Emerald Spears, who are based off the Emerald Spears from Archie Comics'
* The NeoGeo Pocket, and NeoGeo Pocket Color are both also known as "NeoPoke" for short.
* The neo-nazi band. Having no real experience with the way the criminal underworld works, they're sent on a fixed race to "test their ability" against the protagonists, where they overspend resources, repeatedly underestimate the crew of the Lagoon, refuse to see facts, and waste time making dramatic and hammy proclamations about their heroic destiny as champions of the white race. Revy and Dutch kill all of them, and their would-be patron abandons them the moment it's obvious to him they've failed (though not before admitting to the leader that he set them up in the first place).
* The Neon Demon, a beautiful and virginal young woman, and not only bathe in her blood but cannibalize her as well. The director and co-writer said he was directly inspired by the tales of Elizabeth Bathory.
* The Neon Demon: A central driving force of the plot is that the main character, played by Elle Fanning, is almost supernaturally beautiful, to the point that she takes the modelling world by storm and instantly provokes lust and envy even from fellow runway models.
* The Neon Demon: After Jesse comes to the mansion that Ruby claims to be house-sitting, Ruby tries to initiate sex with her, but is rejected. Upset, Ruby leaves for her second job as a makeup artist for a morgue. There, she pleasures herself with a female corpse while thinking about Jesse.
* The Neon Demon is both a professionally trained ballerina and quite a gifted singer.
* The Neon Demon was criticized by some for having misogynistic undertones, but it was written by two women.
* The Neopets Team has a somewhat haphazard approach to how they build new features on the site, which can lead to confusion and
* The Neozoic, a long-form project revolving around the evolution of life on Earth over the next 100 million years.
* The Nephandi have this as their niche so much that they have a faction, the Obliviates, who specialize in creating potential extinction level events. It will only be the appetizer to feeding the broken, cracked remnants of reality into the Qlippoth's hungry maw, but it helps to pass the time.
* The Nephandi Once you become Nephandi there is no going back in any lifetime.
* The Nephew and moved to America to escape her family's persecution. It's later discovered that she sent several letters to Joe, but her brother kept them.
* The Nephilim can be included in this list. Sons and daughters of the unions of
* The nephilim Jack goes from being an infant to a young man almost immediately after being born because he senses that he's vulnerable as an infant. He still retains childhood innocence for a long time, however, despite being a super-powered being.
* The Nerd, a character once swears "Jesus!" loudly, but Rick Steadman (the

eponymous nerd) thinks the character is addressing him. Rick comments that the name would make him sound like he came from the Bible, or at least be a baseball player: "Jesus Steadman!" He then responds to the name for the rest of the show.
* The nerdfighters have made real-life versions of many things in it, like go-fast bars and the shopping list, as partially documented in
* The Nerd's preference for vintage stuff has also been exaggerated, to the point where he seems to be nearly completely out-of-touch with modern-day appliances with apparently little to no knowledge of newer games, in addition to apparently even using an old Commodore computer and vintage cell-phone on a regular basis. In earlier videos, he was implied to be at least moderately familiar with modern games as he mentioned games that were modern at the time every now and then, and in heavy contrast to his later
* The Nerd teases this when Rick spins a story about proposing marriage to an 8 year-old-girl with a necklace and her mother being so mad, leading to him being told it's a very sweet story... and then he reveals he was 30 when he did it.
* The Nerd: The script indicates that Axel is to be played very effete, and the ending suggests that he's trying to get everyone else out of the house so that he can share it with fellow theater devotee Kemp.
* The Nerd Trio are seen trying to use their inventions for various perverted purposes, like an invisibility gun to help them spy on a bikini wax and a mind control device to pick up chicks.
* The nerdy magician Telemain always talks like this, with Morwen usually having to translate for him. However, when he is glared at hungrily by Kazul, a sentient dragon, he manages to speak normally, albeit very very slowly.
* The nerdy obsessive-compulsive Twilight Sparkle has a few, slightly bigger ones when she's panicking. She'll pace around, and sometimes
* the Nerevarine Azura, who prophesied the coming of the Nerevarine, speaks about what is to come.
* The Nero Wolfe is a collection of recipes for dishes served in the novels.
* The nervous tic that Shinji displayed in the series, the clenching/relaxing of his left hand, shows up again just before the battle with
* The NERV White Paper RPG game introduced Maria Vincennes, a female EVA pilot from America.
* The NES also featured many third-party exclusives outside of the aforementioned
* The Nesk are ants that form themselves into larger bodies, as per this trope. Given that the same book includes a
* then-Espada Neliel Tu Odelschwanck following him around to keep him alive because he is weaker than she is
* The NES's Aladdin Deck Enhancer advertised itself as upgrading the game experience with more RAM and graphical power. What it didn't let on was that it was only compatible with a handful of games, and in the case of said handful, the Aladdin basically
* The Nestene Consciousness' Autons. Department store mannequins are the most famous type, but they can be made to resemble any object made of plastic, including an evil doll, a man-eating trashcan, a comfy chair of doom or its most impressive accomplishment: real people.
* The Nestene Consciousness encourages this, due to being an abomination with the ability to convert
* The Nestene Consciousness has the power to control plastic. Its minions are animated by it directly, the limbs of one creature, though they definitely act like your basic robot soldiers.
* The Nestene Consciousness is susceptible to "anti-plastic" and, like its minions, high-frequency noises.
* The Nest has a great example of this. A big warehouse complex is being used as a hideout by some fairly mundane thieves but ends up as the site for a huge battle between terrorists and a good-guy military squad.
* The Nest is about a multinational special forces team besieged inside a warehouse by Albanian mafia thugs.
* The NES version has Glass Joe and Don Flamenco, Von Kaiser and Great Tiger, Bald

Bull and Mr. Sandman (returning from the arcade game),
* the NES version, players are able to play as a purple leotard-wearing Samus if they complete the game in under three hours. You can also play as Samus in the purple leotard without beating the game by entering certain passwords, the most famous of which is JUSTIN BAILEY. Subsequently, Samus's leotard is sometimes referred to by fans as the Justin Bailey outfit. The leotard is also seen in the second-best ending for the game.
* The Net (1995) caught the tail end of this aesthetic in real time, showing it giving way to the Internet. As a sign of its times, a 3½-inch floppy disk was an important plot item.
* The Net (2016): the main plot is about a fisherman from DPRK who accidently crosses the border with South Korea, and wants to return home.
* The Netflix adaptation continues this gag; every episode’s theme song consists of telling you that the show is too depressing and you should go find something else to watch.
* The Netflix series limits her to being an exceptionally capable thief of the physically
* the Netflix series series currently lives on as an animated series on Netflix, merchandise, and occasional stage shows. Some of the original Llama Llama books that were unpublished ("Llama Llama Loves To Read" and "Llama Llama Easter Egg") managed to get released two years after her passing. Future Llama Llama books by Dewdney (such as "Llama Llama ABC") would also get released posthumously using Dewyney's manuscripts and illustrated by JT Morrow.
* The Netflix shows are also mostly self contained much like Phase 1 of the MCU though it too has its own ongoing
* the Netflix TV series for the Baudelaire siblings. Clearly even Snicket must've not been happy with how his own books ended after a while, as he's directly involved with the show and even wrote the scripts for several of the episodes.
* The Net has Angela Bennett wrap herself with Jack Devlin's sport coat while aboard his boat. When she finds a gun with a silencer in one pocket, she begins to suspect that Jack intends to murder her.
* The Net has burst and she goes into an angry rant about being fed up with the whole situation before forcing the car to crash (killing the agent) and she escapes, now willing to destroy the Praetorians once and for all.
* The Nether is an interesting derivative of this. Being directly inspired by the concept of the
* The Netherlands and Belgium have a milder version of these dynamics.
* The Netherlands attempted this as well, on the basis of "Staying neutral worked out for us in WW1, so why not now?". Unfortunately for them, they didn't count on the idea of the Nazis deciding to conquer them anyway, so when they
* The Netherlands between 1995 and 1998. However, they have cameo appearances in the 1999 and 2000 series.
* the Netherlands East Indies, but none of them had close to the same profile as the French Foreign Legion.
* The Netherlands has a reduced penalty for trading its luxury resources with other civs, allowing it more freedom to trade resources that would otherwise be scarce.
* The Netherlands hold the unfortunate record of being the only nation to have reached the World Cup final three times (1974, 1978, 2010) without ever winning it — despite their golden '70s side having led the 1974 one before opponents West Germany had even touched the ball. Their second great team of the late '80s did triumph in the
* The Netherlands in 2004, Jan Peter Balkenende, had to be hospitalized for several weeks after catching the disease and being treated for it.
* The Netherlands in World War II. In 3 days, when the first defenses reached the border, the German forces were already in the middle of the country. This happened mostly because the classic Dutch strategy of
* The Netherlands' largest city and capital is Amsterdam. There are two Amsterdams in New York named after the Dutch capital: Amsterdam (the city), which is

surrounded by the town of Amsterdam on three sides in Montgomery.
* The Netherlands' sex workers union is called the Red Thread. They are serious about being socialist. They are also one of the powerhouses of Dutch politics and have done valuable work on issues like workplace safety, improved public health care, and law enforcement reform.
* The Netherlands. The more often you do it, the more points get docked, leading to theoretical possibilities of -16/10 on an exam, which is considered the absolute limit of what is achievable without just failing out of school for being so bad at Dutch.
* The Netherlands there was a (now defunct) popular computer store called "Crazy Hans". Most probably inspired by Crazy Eddie.
* The Netherlands, the trading outpost of Dejima suddenly found itself as the only place left where the Dutch flag flew. The fact that the Dutch outpost also happened to be off the coast of Nagasaki in Tokugawa-era Japan probably helped.
* The Netherlands was even aired on a publicly-funded network after the watershed.
* The Nether also appears to have had its own Precursors, and once again who they were and what happened to them is not clear.
* The Nether (normally hidden by a ceiling of bedrock) is red rather than black like outside the Overworld.
* The Netherrealm Studios timeline made infamous mortal enemies Scorpion and Sub-Zero into these, having them finally reconcile and work together as genuine allies.
* the Nethersphere in season eight. It's all very much like a soulless corporate city.
* the Nether), there's often plenty of magma to light things up. You might prefer dark, cramped tunnels after a run-in with Ghasts, which are large enough to be restricted to more open areas.
* the Nether. They wield stone swords instead of bows and inflict you with the Wither status condition, which will steadily sap away at your health. Like all Nether mobs they’re immune to fire damage, and will thus not burn to death in the sun. They can also spawn as spider jockeys.
* The Net, Sandra Bullock's character is to meet a male friend at the airport; he is flying a small plane by himself, coming to discuss a secret file in person, when his navigational equipment is tampered with, and he crashes into a factory smokestack. This, as stated above, would have let loose far too much information, for the scriptwriters liking.
* The Net. The bad guys just didn't like it when someone else tried one.
* The Net They're able to pull it off so thoroughly in part because she's a recluse who has little face-to-face interaction with other people, preferring the convenience and anonymity of the internet.
* The net trap usually occurs once per series on British reality show
* The net version happened to Hikaru and Haruhi in the Halloween episode of
* The Net was largely composed of hysterical hand-wringing over how easy computers and the Internet supposedly make it for one's identity to be "deleted" by "hackers". Apparently, it took place in a world where no-one carries a driver's license, and everyone's brain is online with the security of Wikipedia.
* The network didn't cut away from it, but another famous example was Franco Harris' "Immaculate Reception" to win the 1972 AFC Divisional Playoff game for the Pittsburgh Steelers over the Oakland Raiders. The owner of the Steelers, Art Rooney, missed the play because
* The network has released ten original comedy series, but its first (
* The Network Operations Center of any telecom company. The prototypical one is probably the Bell System's NOC in Bedminster, New Jersey;
* The network's India branch had an internal break-in midway through the seventh season, with a staff member leaking nearly all remaining episodes of the season (save for the finale), as well as scripts and other information, for everyone to view well before their intended airdate. This led to several spoiler-spreading troll campaigns on social media sites and caused HBO to film
* The Network, the absurdly powerful cabal of business interests, spies, and politicians in

* The network was nicknamed "Can't Broadcast Sports" when it lost the broadcasting rights to the NFL in 1994.
* The NeuroLinker is the legal successor of the BIC: a small, choker-like device worn around the neck that provides both
* The Neutral Nation was a group of Native North American tribes of the Iroquoian branch of the Hokan-Siouan linguistic stock that occupied territory along the northern shore of Lake Erie. The French gave the Neutral Nation its name because of its neutrality in the Iroquois-Huron wars. They were able to remain neutral because they controlled flint grounds useful for making spears and arrowheads. Once gunpowder was introduced into the conflict, and once the Neutral Nation absorbed the remnants of the Hurons, the Iroquois practically destroyed them. Possibly doesn't count because of the influx of Hurons, although the Neutral Nation would certainly have been better off allying with the Iroquois early on.
* The Neutral scientist Spanner was known to be an expert on interdimensional travel. However, since he was a Neutral, the Autobot resistance never kept a close eye on him, and when the Decepticons came for him they were unaware for some time. By the time the Autobots found him, they learned he'd been kidnapped for his knowledge of Space Bridge technology... which the Decepticons took advantage of by building him
* The neutral town of Yuss in the Stanix region of Cybertron was a frequent target for relieving the boredom of Decepticons stationed in the area.
* The Neutral Zone, allowing the Federation to better deal with races they're too idealistic to understand, like the Ferengi (he becomes ambassador to their world).
* The Neutral Zone. (There were dozens on board... only three lived, and that was in the sense of being revivable by mid-24th century Federation medical science. It is noted they would have been regarded as dead by the medical science at the time of their freezing).
* The neutral zone trap in hockey. Essentially, it's a very heavy defensive strategy that prevents the attacking team from getting close to the net by pinning them in the neutral zone with no way to get around the defense. Critics complain it is extremely boring to watch (neither team really gets a lot of scoring chances as a result), but if done effectively it is very difficult to beat. In response to criticisms of this strategy during its heyday in the late 90s and early 00s, the NHL made several rule changes to open up the game—it made obstruction penalties a point of emphasis for officials, introduced a restricted area behind the goal where goaltenders cannot play the puck, and changed the "offside pass" or "two-line pass" rule so that the center line is no longer relevant in the rule's enforcement. While the trap still exists in today's NHL, it's been greatly modified to reflect these changes.
* The Neutral Zone Trap in ice hockey could become an effective version of this in a usually fast-paced sport. When a team used the trap, often to protect a lead, their five mobile players would all move into the neutral zone and force the other team to try and muscle their way through, which rarely worked, or just dump the puck into the defensive team's end and hope they could get to it first. An
* The Neutronium Alchemist, an intelligence agency is using biotech spiders to spy on a radical group. Realising what's happening the group arranges for gangs of local kids to squash every spider in sight as a game.
* Then Evelyn hooked up with the mother of Alan's girlfriend. Cue gay jokes and the children lying about their relationship to their own children, all played for laughs.
* the Neverborn, and it's been suggested a number of Infernals (the ones corrupted by the Yozis) will drop their masters' plans like a hot potato once they run into their Lunar mates.
* The Neverborn are the ghosts of Primordials who died in battle against the Solar Exalted and Primordials are fundamental entities who cannot be separated from existence, whose death messed up the cycle of reincarnation and created the Underworld and who want to destroy the universe, apparently so that they can finally finish dying. The Deathlords (who are 13 unusually powerful Solars) and Abyssal Exalted (Solar Exaltations that were corrupted by the Neverborn) serve

them.
* The Neverborn seem to have a history of sabotaging their own plans to further the cause of Oblivion. Between the First and Forsaken Lion getting spot-welded into his own armor for not destroying
* The never-ending misadventures of Charlie Brown against the horrible kite-eating tree also count.
* The Neverending Story 2, who makes Doug mention that Johnathan Brandis, the film's star, committed suicide and prompting him to explain that he wasn't insulting the actor, but the poorly-written character.
* The Neverending Story. A bit more prominent in the film adaptation. It's not an entity or being so much as it is a cosmic force, simply erasing the world form existence.
* The Neverending Story: A disturbing example when Atreyu introduces himself to Gmork as 'Nobody.' They then use that name as a disturbing and serious play on words regarding the hopelessness of the situation.
* The Neverending Story also sees Bastian punished by his personality and memories slowly leaking away.
* The Neverending Story, a magic book that dictates what is happening in the world of Fantasia and the main character, who is initially reading the book on earth.
* The Neverending Story. A monkey named Argax is the "steward" of the City of Old Emperors, and neither he nor his domain are very pleasant or fun.
* The Neverending Story, and wonders why the characters in the books never seem to have that need. He guesses there's no reason to interrupt the story in order to include irrelevant details. When he eventually enters into the world of a book, bodily functions are not mentioned again.
* The NeverEnding Story anything was removed. Its sequel, fortunately, picks up elements from the second half of the book, although it was still not quite there.
* The Neverending Story appropriately, in the Temple of a Thousand Doors. Doors were described as extremely thin, thick, gingerbread, buttoned, caves, shaped like an ear, mouth, etc.
* The Neverending Story asks Bastion some poignant questions about his love of books, then warns him that the one he's reading is "not for you", because it is unlike the "safe," normal books that Bastian is familiar with. (Unlike in the original novel, the film's Coreander seems to have done this for the express purpose of getting Bastian interested enough in the book to swipe it while Coreander's back is turned.)
* The Neverending Story as the leader of a gang of bullies. However, this movie isn't canon to the original book like the previous installments (each adapts a different half of the book).
* The Neverending Story: Atreyu journeys through the Swamps of Sadness, which consume vulnerable travelers with despair and suck them into a muddy grave. Atreyu's horse Atrax succumbs.
* The Neverending Story, Atreyu passes through a mirror that serves this purpose.
* The Neverending Story, Atreyu stares into a dark corner to find his nemesis, the large wolf beast that had been stalking him the entire story, eyeing him back.
* The Neverending Story attributed to "the needs of the plot", but only by the very narrowest of margins. The Ivory Tower is also a part of this trope. Since it is always at the center of Fantasia, a land of no borders and presumably goes on forever, the ivory tower can be and usually is close to or far from anywhere.
* The Neverending Story: Bastian becomes an evil psychopath toward the end of the book due to Xayide's manipulation, but snaps out of it, leading to a breakdown.
* The Neverending Story, Bastian creates a library with every story he has ever composed, for the benefit of a city of storytellers.
* The Neverending Story, Bastian gets a bit too fond of being an all-powerful unbeatable Marty Stu with the ability to make his every wish come true, eventually turning outright villainous as he decides to attempt to usurp the Childlike Empress and crown himself ruler of Fantastica.
* The Neverending Story: Bastian goes From Nobody to Nightmare all by the fulfillment of his own wishes; while there are some evil Fantasticans like Xayide

who manipulate him, the fact is that he wished them into being in order to defeat them with the ultimate goal of being loved and feared by everyone. Bastian is the purest example of how a small, helpless yet good-natured little boy can slowly yet inevitably turn into a cruel, heartless little tyrant by gaining unlimited power.
* The Neverending Story, Bastian goes into the school storage area (not the basement), which is rife with spider webs, with no spider in sight. He doesn't seem particularly yucked out when he has to brush gobs of it off in order to open the window.
* The Neverending Story, Bastian has to rebuild Fantastica from a single seed, through the power of his imagination. Everything else is pitch darkness.
* The NeverEnding Story: Bastian is scared of the stuffed animals, skeletons and other objects in the attic.
* The Neverending Story. Bastian sees the taxidermied heads of a fox, an eagle, and an owl, and later in the land of Fantastica he meets three sages with the heads of said animals.
* The Neverending Story: Bastian's father is well-intentioned, but he has become depressed and distant after his wife died and has ended up pretty much ignoring his son.
* The Neverending Story briefly shows the City Of Old Emperors, set up for would-be rulers of Fantasia, who invariably lose their minds once they sit on the throne. They are then driven into the city, where they wander around aimlessly, repeating pointless tasks under the supervision of a monkey.
* The NeverEnding Story, but Atreyu has to fight him. Gmork even says something to this effect:
* The Neverending Story but she also mentions that at the same time as he has been reading about Fantasia, there have been others watching Bastian in the same way.
* The Never-Ending Story causing all the stories to repeat in an infinite loop. Bastian, quite reasonably, freaks out at this point.
* The Neverending Story (Der Tausend-Türen-Tempel) which contains an infinite number of hexagon-shaped rooms with three doors each. Every door different in colour, shape, material etc. To get to the place you wish to go, you only need to pass through the rooms until you find the door that reminds you strongest of the thing/place/person you're looking for. This may take some time.
* The NeverEnding Story, Falcor tells Atreyu that he talks in his sleep.
* The NeverEnding Story: Falkor the Luck Dragon, a benevolent Eastern dragon in an otherwise Western story.
* The Neverending Story: Fantastica is apparently flat, and goes on forever in all directions.
* The Neverending Story: Fantasticans are only real in their world; once they are taken into our world, they become lies.
* The NeverEnding Story film ends this way, as the page quote indicates.
* The Neverending Story: Gaya, the Dark Princess, is described by Gmork as "very beautiful... to me anyway". Given that her admirer is a ferocious werewolf who loves the sinister and fiendish, a human might find her to be either a malevolent yet alluring temptress or a stark reminder that other beings' preferences may be a tad different than our own.
* The Neverending Story: Gmork fits the hunter form of this trope well, being a huge black hound and agent of the Nothing sent to kill Atreyu.
* The Neverending Story: Gmork's conversation with Atreyu in Spook City implies that Fantastica and the human world are part of one.
* The Neverending Story has Falkor, a large, serpent-like white dragon.
* The NeverEnding Story has The Emptiness slowly do this to Bastien by erasing his memories.
* The Neverending Story. Hence why he's able to save the fantasy land from dying: It's not because of the plot as such, it's because he sets everything in motion for it to expand forever, with every story opening up several more.
* The Neverending Story himself, after finding himself in Fantastica Bastian theorizes that his current experiences may be recorded in the book, and that "maybe someone was reading it at that very moment".

* The Neverending Story: If a human who comes to Fantastica fails to find their way back to the human world, without exception they all eventually attempt to supplant the Childlike Empress as supreme ruler of Fantastica, losing their memories all the while through wishing. The fate of all who stay on this course is to wind up in the City of Old Emperors as nearly mindless creatures without memory or ability to speak, performing ridiculous meaningless activities forever.
* The Neverending Story: "If we're about to die anyway, I'd rather die fighting! Come for me, G'mork! I am Atreyu!"
* The Neverending Story II, Bastian is slowly losing his memories which are being kept in what appear to be glass orbs by Xayide.
* The Neverending Story III. He then states that if the rest of the movies for that month are anything like this one, he is in "serious shit".
* The Neverending Story II, the evil empress Xayide and her minions go underground, while the narrator explains that they will be traveling at "at the Speed of Darkness, which is faster than light".
* The Neverending Story II: The Next Chapter (though to be fair, he didn't know that at the time)?
* The Neverending Story, is a gestalt collective of toxic flying blue beetle-like insects that clump together in whatever arrangement suits their purpose best, from a giant spider-thing to a massive disembodied hand. Her deadly poison grants the dying victim the ability to teleport.
* The Neverending Story is made up of humanity's stories and creativity — and often takes on a surreal, dreamlike nature. The world rests on a foundation of forgotten dreams, which are mined by Yor the blind miner.
* The Neverending Story male protagonists, since the main hero takes half the book to muster enough courage to even leap down the rabbit hole)—a lonely kid, who has troubles at home and at school, seeks to escape reality in fantasy, has his wish granted, and returns after having learned his lesson, stronger and better adjusted than before.
* The Neverending Story many subplots are deliberately left unresolved: "But that is another story, to be told another time."
* The Neverending Story: Morla, due to her long lifespan, has seen things come and go, and became convinced that nothing matters.
* The Neverending Story movie, Morla, the Ancient One is allergic to youth.
* The Neverending Story: One of the most prominent deconstructions. Many chapters end by tailing off abruptly, excusing itself by saying that it's another story for another time. It gets through illustrating people, places and things and then stops because the story recognises that a world should be far greater than the narrative it serves. Fully fleshing it all out would bog the story down in endless description of yet more people, places and things in order to explain where these people, places and things came from. In doing so it posits that, in order to fully realise a fictional setting, you'd have to literally write a neverending story.
* The Neverending Story: Or, in this case, German. When Bastian enters Fantastica, he has no problem conversing with anyone — which actually makes sense, since Fantastica isn't a self-contained fantasy world separate from ours, but made up of dreams, tales and fantasies complementary to our reality. Of course they'd also speak our language there.
* The Neverending Story purposefully leaves almost all subplots — such as what happened to the four messengers, Cairon's fate after meeting Atreyu, the adventures of Hero Hyrneck, what became of Ghemmal and of Sikanda — hanging. Hence the title. However, Bastian's main plot is resolved.
* The Neverending Story scene where he laments not being able to hold onto his tiny friends.
* The Neverending Story, Smerg's ice-cold breath has this effect, and turns some trees to stone.
* The Neverending Story: Subverted when the Childlike Empress asks the Old Man of Wandering Mountain to read ahead in the Neverending Story that he is writing. He tells her there is nothing but empty pages.
* The Neverending Story: Subverted with Hero Hynreck, who saved his one true love

Princess Oglamar but decided he no longer wanted to marry her.
* The Neverending Story suddenly sprouts a narrator only at the very, very end. It would be all too easy to construct a lofty critical reason for this, such as, "It's to emphasize thematically that the real story is only beginning etc..." but in all likelihood it was just because of earlier scenes being cut or a sloppy mistake in the film's writing or editing.
* The Neverending Story: The Animated Adventures of Bastian Balthazar Bux episode, "Tears of Sadness", revolves around Xayide contaminating Fantasia's water supply with the tears of the Acheris, which transform anyone who drinks or even looks at the water into lifeless stone.
* The Neverending Story: The Animated Adventures of Bastian Balthazar Bux in Canada.
* The Neverending Story: The Animated Adventures of Bastian Balthazar Bux, Urgl's bugbee honey, if mixed improperly, becomes a powerful liquid explosive. Which proves a great problem with Vermin steals a barrelful of badly mixed bugbee honey.
* The Neverending Story: The Animated Adventures of Bastian Balthazar Bux was the Childlike Empress' present to Morla.
* The Neverending Story, the bookstore from which Bastian gets the book is empty and abandoned as if for years when he returns. In the original book, the store is still there, although the storekeeper says that he has never seen the book that Bastian took.
* The Neverending Story, the Childlike Empress is a Divine beauty. The text mentions that she is "indescribably beautiful", and Bastian's first wish while in Fantastica is to be able to keep looking at her forever.
* The Neverending Story, the Childlike Empress seeks out the Old Man of Wandering Mountain, who writes the book that contains all of Fantastica. She asks if he can look ahead in the book to see what will happen, and gets the reply, "Empty pages". There's nothing ahead in the book, because it hasn't happened yet.
* The Neverending Story: The creatures of Fantastica are creatures of stories and can't create new stories themselves.
* The Neverending Story: The first half of the book is a fairly conventional fantasy adventure where Bastian becomes the hero of Fantastica. The second half is considerably heavier and more philosophical: Bastian travels to Fantastica, and his newfound ego runs amok, doing tremendous harm to feed his power fantasies until he finally loses everything.
* The NeverEnding Story, the hero defeats the villainess by "wishing she had a heart."... Which, since she personifies emptiness, causes her to go poof and her living crab-armor minions to explode.
* The NeverEnding Story. The longer the Bearer has Auryn, the more he begins to be upset, irritable and angry. This is the case for Bastian, at last.
* The Neverending Story. The main character also rewrites the reality he inhabits by coming up with new stories.
* The Neverending Story:The main character Bastian is described as being a boy of ten or twelve.
* The Neverending Story: The Nothing is an eldritch force that represents the opposite of humanity's imagination. It is empowered by things like apathy and cynicism and it threatens to erase Fantasia out of existence, which would leave humans' ability to imagine forever heavily damaged if such a thing came to pass.
* The Neverending Story. The Prime Minister (or whoever he's supposed to be) didn't want Atreyu the child, he wanted Atreyu the warrior. Atreyu just shrugs and says he is the only one of his tribe with that name and they can take it or leave it. They take it.
* The Neverending Story: There are two in the book: the Childlike Empress is the personification of fantastical inspiration, while the Old Man of Wandering Mountain is the personification of written and recorded stories.
* The Neverending Story, the residents of Fantasia are worried about The Nothing. It's an absence... not just a hole. A Nothing. Those pulled into it aren't just dead, they are gone from existence. This made for a Ticking Clock and also Nightmare Fuel for a small child.

* The Neverending Story: The Swamps of Sadness, in which Atreyu's horse Artax dies of despair.
* "The Neverending Story" (the theme to to the film) isn't by Kajagoogoo, it's a solo song by their lead singer Limahl. However after Limahl rejoined the band they added it to their live set due to popular demand. And the
* The NeverEnding Story undergo considerable change, including spouting contemporary pop-culture references. Bastian updates his hairdo because his sister calls it "un". The ultimate depiction in the movie, however, has to be Rock Biter taking his son for a bike ride...while singing "Born to be Wild".
* The Neverending Story, until the Empress explains that his quest was important and did have a purpose, even if it wasn't the one stated up front.
* The NeverEnding Story was basically written with the idea that its readers would write their own stories.
* The Neverending Story: When Atreyu's pony gets stuck in the swamps of desperation, he wants to save it, but it tells him in no uncertain terms that the mission (saving Phantasia) is more important and he must move on alone.
* The Neverending Story. When confronting his "true self" in a mirror, Atreyu sees Bastian, the boy reading the book, as his reflection.
* The NeverEnding Story, when he refuses to carry the sorceress Xayide.
* The Neverending Story, where Bastian gets to see several mindless humans setting up heavy stones with letters on them repeatedly, as an entertainment for an intelligent monkey.
* The NeverEnding Story, where the Rock Biter is unable to keep his friends from being pulled away into the Nothing. He sits, staring down at his massive stone limbs, and says slowly, "They look like big, strong hands, don't they?"
* The Neverending Story, witches are mentioned among the doctors who come to inspect the Childlike Empress, and the inhabitants of Spook City. Xayide is also an evil sorceress. Since none of the natives of Fantastica are truly human, they must be this.
* The Neverending Story, Xayide acts this way towards Bastian, as part of her gambit to manipulate him.
* The Neverending Story: Xayide created hollow metal horses that she could control with her mind. Bastian, due to Auryn, could also control these horses and rode one away from a battle until it shattered from overuse.
* The Neverhood after being born, was try to steal the crown), so the act is more his true self coming out because of his evil deeds.
* The Neverhood and a rather goofy one at that, but he's quite adept at solving difficult puzzles.
* The Neverhood coupled with some truly bizarre fables — such as the one about the talking burger box.
* The Neverhood eventually ended up creating that whole world's population this way. He was trying to duplicate himself, but the duplicate just assumed that he was really God, and went through the whole process all over again. This continued until eventually a duplicate was created that was not alive.
* The Neverhood has one scene where Klaymen gets chased around by a giant clawed monster called...a Weasel.
* The Neverhood However, it was released around the time adventure games were going out of style.
* The Neverhood is replaced with jokes and anecdotes. The mood of the game generally stays the same due to having very little in the way of dialogue.
* The Neverhood." It was even lampshaded in the manual, where it explained that there was only one way to die in the game and that it was well signposted.
* The Neverhood: Ottoborg is depicted as having eyes on his palms on Wall of Records. The fact that he is king created to be happy and joyful all the day may or may not induce further creepiness.
* The Neverhood some more people—since he and Klaymen don't really make for a "party" by themselves. Then the party itself happens. "And now it is time... to GOOF OFF!" The ending doesn’t stop there, however- realizing that both Willie Trombone and Big Robot Bil are still dead, Klaymen and Hoborg bring them back to

life, ending the game on a very happy note.
* The Neverhood soundtrack has an odd song called "Sound Effects Record #33" which simply consists of a voice naming a list of various strangely-specific sounds, the first of which is "Man Facing Backwards in the Shower Whilst Singing." The sounds of a man singing in what could possibly be a foreign language is then heard amid shower noises, which last for the rest of the song (no other sound effects are actually heard, despite them being named). Reversed, the song reveals a man singing "Kumbaya" in a shower.
* The Neverhood, that reveals that the latter ending is canonical, as Klogg ends up on another planet and Willie is still alive.
* The Neverhood, there is one moment when the protagonist finds a music box. Upon examination, it plays first three bars from "Pop Goes the Weasel". Then the box stops playing... and a weasel appears right behind the protagonist, accompanied with the fourth bar. Said "weasel" is a freakish green crustacean-like mess of pincers; all official information sources refer to it by this name.
* The Neverhood, whom you'd presume to be dead, survives and continues his evildoings on another planet, requiring you to get rid of him again.
* The Never Mythos, and various crossovers involving characters from both series' happen quite often.
* The Never Mythos is very explicitly a homage to the works of H.P. Lovecraft with a small Mexican village cut off from the rest of the world and made prey to countless horrific eldritch horrors — but uses that premise to deconstruct or subvert more cosmic horror tropes than it plays straight. The short stories, on the other hand, tend to play it straighter.
* the NeverNever and certain denizens after him being closer than originally believed.
* The Nevernight Chronicle after Leona tries to sell most of her Gladiators to stay afloat.
* The Nevernight Chronicle the three suns only set every two and a half years during a week long period know as True Dark
* The Nevers: Appropriately for a physician, Cousens can heal people by touching them. However, it appears to have limitations. He needs to physically remove a bullet before treating the wound proper; and more than once stresses to his patients that the wound is not fully healed and they must avoid aggravating it as it finished healing naturally.
* The Nevers features Primrose Chattoway, a teenage girl who grew to ten feet tall after becoming one of the Touched.
* The Nevers: He turns out to be gay, and is no different from your average working-class Victorian Englishman.
* The Nevers: Primrose Chattoway is a young girl who appears to be at least ten feet tall.
* The Nevers: The actress Hugo's been banging backstage throughout the opera performance in the pilot episode notes that his penis is still hard after crossing paths with Maladie and her gang.
* The Neverwas Haul is probably one of the most impressive bits of steampunk art ever created. A steampunk "mobile home" made from 75% recycled equipment and materials, the Neverwas Haul is basically a three-story Victorian mansion on wheels.
* The Neverwinter Saga has a habit of quickly bending his torso back and forth, so that his limp arm slaps against his frame and makes a clapping noise. Everyone who witnesses this is annoyed or disgusted by it - which is exactly why he does it.
* The Neville sisters find jobs at one of these. It's not the best job but is better than their previous ones.
* The New '10s; 2017: with the chance of playing the Super Bowl at home, trounced by the Eagles in the Conference Finals).
* The New '10s after congressional redistricting broke up many of the larger Republican concentrations (which mostly contains the Northernmost counties and Eastern Shore), leading many people to consider the State one of the most gerrymandered in the entire Union. Some parts of a district contain narrow portions

that are less than a mile in one direction and connect to larger blobs nowhere near the point of origin.
* The New '10s because the fans know they are playing a character, X-Pac Heat is the only way for bookers to actually get the correct reaction for a heel.
* The New '10s came out to near unanimous acclaim and commercial success.
* The New '10s covers featuring the film's title and a closeup of (usually) one of the main characters against a solid color backdrop. This was seemingly done so they'd be easier for kids to recognize the depicted character while hunting in the kids movie section in Target and the like.
* The New '10s from teenagers asking if they could become like the Halliwell sisters.
* The New '10s, Green Bay Packers quarterback Aaron Rodgers and head coach Mike McCarthy did not get along at all. Their animosity began when McCarthy, then the offensive coordinator of the San Francisco 49ers, convinced the team to pass on Rodgers in the 2005 NFL Draft in favor of Alex Smith and remained unapologetic about the decision even after being hired by Green Bay. The relationship only continued to go downhill to the point Rodgers would frequently ignore McCarthy's game plan and call his own plays. While the duo did manage to win a Super Bowl title in the 2010 season, eventually the turmoil began to affect the team's performance and McCarthy was fired in during the 2018 season.
* The New '10s has killed Indiana five times!) Their luck did not improve any in the following years, as Indiana got swept out of the first round by the Celtics in 2019 and the Heat in 2020, and lost the play-in game for the 2021 postseason to the Wizards.
* The New '10s, however, it was popular again to check the time by reaching into one's pockets, now that cell phones had surpassed watches in timekeeping devices and, well, people commonly store their cell phones in their pockets.
* The New '10s mocks several outdated aspects of the website that haven't been updated since the early 2000s. (use of Flash, the website's layout, their incredibly infrequent update schedule).
* The New '10s of all studios. The accompanying album and Netflix short movie meant to tie into it helped.
* The New '10s of the bloatware Metro apps, advertising or in-your-face pushing of Cortana that some deride Windows 10 for. They also follow a traditional every-few-years release cycle like older Windows versions, which helps endear them to anyone who isn't a fan of Windows 10's enforced "feature upgrades".
* The New '10s on a loop starting the day before Thanksgiving and leading up to the next morning.
* The New '10s or head sculpts. Naturally, some collectors get rather pissed about this, as they feel they're essentially being asked to pay for figures they already own.
* The New '10s the original jingle, so the rhythmic crunching is foreign to them. To the uninitiated, the commercials end up becoming nothing more than a random series of images followed by the Kit-Kat logo tagged onto the end.
* The New '10s, they ultimately finished third in the East Division while Ohio State would not only win the Big Ten but also make the Playoff with an undefeated record.
* The New '10s, Tony Hawk is currently a constant victim of this. Many of his tweets are anecdotes of how people always fail to recognize him and even straight up often ask him what he thinks Tony Hawk is up to nowadays. It's even worse when he tells them, often with skateboard in hand, that his name is Tony, to which the standard response seems to be "oh, like Tony Hawk?"
* The New '10s, which saw the rise of the #MeToo movement and increased social awareness of "toxic masculinity" and harassment of women, commentators have stepped forward and suggested that Seth's transformation is an allegory for just that. Seth is at first gentle, shy and respectful to Veronica - clearly a better match for her than her ex-boyfriend Stathis, a man who stalks her and abuses his position as her boss to get close to her and try to rekindle the relationship. After Seth takes on the fly genes, he becomes hairy and virile, aggressive during sex and increasingly

emotionally unstable and violent towards her.
* The New '10s, with lots of nightcore channels being created overnight. Nightcore soon became labelled as "lazy", "uncreative", and "oversaturated". As a result, many older listeners stopped following the nightcore scene. It didn't help that many of the new channels strayed from the original happy hardcore sound, even using non-electronic genres such as rock and hip hop.
* The New '10s with PayTV programs due to the ruling party moving towards extreme right conservative governance, despite there already being separate feeds of channels for Malaysia, Singapore and the rest of Asia. Sometimes, movie premieres advertised on HBO or Anime on Animax will bear the footnote "Not available in Malaysia and Brunei" when they could've chose to just omit advertising the premiere on the feed altogether. It's as if they advertise the show-that-you-will-not-get-to-see just to rub it in the face of the viewers...
* The New '10s with the likes of Paul Lee, Jeff Chan, and Gabe Norwood headlining a talented roster which was formerly coached by team-oriented tactician Yeng Guiao, but had only 2 championships to show for during their glory days (relatively paltry compared to the trophy-laden hauls of San Miguel, Purefoods, and TnT).
* The New '10s, writing duties usually go to DeBartolo, Kogen, Desmond Devlin, or David Shayne, while Tom Richmond, Hermann Mejia, and Tom Bunk have become the main illustrators.
* The New '20s opening synced to part of that song. Multiple variations and parodies ensued.
* The New 3DS's and New 2DS's C-stick is derided for having the feel of a pencil eraser or a laptop mouse nub compared to the full Circle Pad provided by the Circle Pad Pro, which is
* The New 3 Stooges even for the time, were pretty bad about recycling their own shots. For example:
* The New 3 Stooges: In "Get That Snack Shack Off The Track", the trio are robbed by infamous highwayman "Get Out of Town By Sundown Brown" and chase after him until he accidentally drives off a cliff and falls into a convenient local jail.
* The New 3 Stooges, with Moe, Larry and new Stooge Curly-Joe DeRita as themselves, featuring plots that were similar to the classic black & white live-action shorts (the series also included live segments at the end and beginning - the opening segment would have a Stooge tell the audience to watch the cartoon while they tried to deal with whatever problem they were now faced with, and the closing would pick up where it left off). One saving grace of the 1965 series was that it offered the surviving Stooges new income (and a new fan base) after the long-gone residuals from the old shorts.
* The New 52 approach — historically, this had always been the other way around.
* The New 52 as that version was the antithesis of everything Lobo stood for.
* The New 52: Futures End as the new Robin. While Duke did eventually join the Batfamily and became one of Bruce's partners, he was never an official Robin.
* The New 52: Futures End review on the anniversary itself was a revisit to his first video review, "Smoke and Mirrors", which originally had the first two parts only available as text reviews.
* The New 52, however, the main world is Prime Earth (previously New Earth).
* The New 52, known as Accountable, is able to access news feeds just by holding onto a smartphone for a few minutes.
* The New 52 redesign of Superman got a lot of this, which was a major reason it didn't last long. The most common critique was that it attempted to go for an "armored bodysuit" look which was in vogue at the time, but on top of looking needlessly fiddly and being harder to draw, it had many people wondering why
* The New 52, unusual as his sacred animals in mythology were panthers, bulls and serpents.
* The New 52 weakens him. To counter this, he creates a solar eclipse after being amped up on kryptonite.
* The New 52 would later provide canon reintroductions for them, it still created an avenue for Canon Divergence fics.

* The new actor takes over a major recurring character, and the characters make a point to address them as such from the very beginning of the episode.
* The new actor takes over with no announcement. In this variety, the actor is playing a character who has not recently been on the show. The audience is initially unaware that this person is the character we know, as his/her first interactions are always with characters who have joined the show since he left. Then someone he/she knew addresses him by name, and we are surprised. Though rarely seen outside daytime, this was done on
* The New Addams Family episode "Granny the Happy Medium" had Grandmama's brother Uncle Jester imply that he's responsible for Amelia Earhart's disappearance and the sinking of the Titanic.
* The New Addams Family in this fashion. The last round is worth all of the points, and when asked "Then what was the point of the matches before?" The reply is just "better ratings".
* The New Adventures: A sequel work is titled in a way that advertises how new it is, despite being years old and/or no longer the most recent work in the series.
* The New Adventures of Baron Munchausen is roundly squashed by one of his friends in the final episode, who points out that cholera bacteria aren't even the same kind of organism as coronavirus.
* The New Adventures of Batman after causing Batman, Robin, and/or Batgirl a major problem that sets them back.
* The New Adventures of Batman & Superman episode "Critters", Robin is running away from a giant bull, and he at least picks up a trashcan lid to leap through a window.
* The New Adventures of Batman His villainous scheme involved a plan to turn Gotham's water supply into chocolate syrup.
* The New Adventures of Batman: In the two-part episode "Have an Evil Day", Batman and Robin are transported to Bat-Mite's home planet, and as soon as they arrive Robin is caught by a giant Venus fly-trap like plant, and once again Batman comes to his rescue, though he narrowly avoids becoming plant food himself.
* The New Adventures of Batman series before it, featuring the same actors and feel.
* The New Adventures of Beans Baxter Beans’ original girlfriend in Witches Creek. In Washington, he is pursued by Cake Lase-–“the most gorgeous girl on his high school campus.” Beans, however, has eyes for nobody but Svetlana (played by for Miss Universe Shawn Weatherly), a beautiful Soviet defector.
* The New Adventures of Beans Baxter, Beans is given the task of babysitting a robot, which becomes an unstoppable killing machine when it hears its trigger phrase. The phrase was designed to be the least likely thing for a person to say ("M. I. N. D. Mood"), but Beans had a dental appointment earlier and his mouth was numbed-up. When his girlfriend asked him if he was in the mood to make out, his slurred answer just happened to match the robot's trigger phrase.
* The New Adventures of Beans Baxter: In "Beans Goes to Camp", UGLI steals a nuclear warhead, so Beans goes undercover at a parasailing camp to find it. Of course, parasailing plays a vital role in him saving the day at the end of the episode.
* The New Adventures of Beans Baxter one of the henchmen says he joined the evil organization for their dental plan.
* The New Adventures of Beans Baxter) possesses. Its head, Mr. Sue, is described as being a professional terrorist.
* The New Adventures of Beans Baxter: The opening scene of "There's No Place Like Omsk" has Beans catching Soviet defector Svetlana (played by Miss Universe Shawn Weatherly) in the shower.
* The New Adventures Of Captain Scarlet, but the results did look pretty damn cool.
* The New Adventures of Captain S, this happens to Chad and Lunk, after attempting to make an exploding volcano for the Science Fair Project.
* The New Adventures of Captain Vrungel state: "Screenplay by Alexander Khmelik, based on the memories of the novel by A. Nesterov".
* The New Adventures of He-Man. During a peace meeting with the Galactic Guardians,

he slips the fact that the meeting is just a diversion while Skeletor and Flogg attack Primus.
* The New Adventures of He-Man had a vehicle capable of submersion, atomspheric flight and space flight called Astrosub.
* The New Adventures of He-Man had He-Man being summoned to the future to save the planet, Primus. Needless to say, Skeletor follows him and joins the bad guys.
* The New Adventures of He-Man to appear outside the first episode are He-man, Skeletor, and the Sorceress, and they don't look or sound like themselves. In the early episodes, Skeletor is very soft-spoken, almost nice. This is in stark contrast to the verbally abusive Skeletor from the original show. However, he does sound less kind as the series goes on. His head looks less skull-like than it used to, and he has eyeballs instead of eyeless pits.
* The New Adventures of Huckleberry Finn had Huck, Becky and Tom fleeing a vengeful Injun Joe across time, space, legend and fiction. The three were live-action - almost literally everything else they interacted with was animated.
* The New Adventures of Invader Zim, a plot point which doesn't come up until near the end of Season 1.
* The New Adventures of Invader Zim: A quick gag at the start of Season 2 establishes that the Tallest have a long-standing argument over the proper way to pronounce "caramel". Red thinks it's "car-a-mel", while Purple is sure it's "car-mel".
* The New Adventures of Invader Zim. As of now it consists of one complete "season" which is more than 240,000 words long, with a second season started and more planned to come.
* The New Adventures of Invader Zim be Miz. It takes a confused Zim a few minutes to decipher this explanation.
* The New Adventures of Invader Zim carries on the canonical series' use of this trope. Zim repeatedly uses "Doom" in dialogue, several chapters have it in their titles, and in its logical extreme, the unnamed-in-canon city the series takes place in is named "Doomsville".
* The New Adventures of Invader Zim crashing into the Earth and burying itself.
* The New Adventures of Invader Zim. Cue wail of embarrassment from Dib as he and Viera are left utterly mortified.
* The New Adventures of Invader Zim: Despite being a vampire (and thus himself a paranormal creature) Norlock doesn't initially believe Dib when he says he arrived at his castle in an alien's spaceship.
* The New Adventures of Invader Zim discover that they share a love of video games, which serves as a basis for a friendship between the two of them.
* The New Adventures of Invader Zim: Ever since her mission on Meekrob was ruined by malfunctioning SIR units going on a rampage (and almost killing her in the process), Tenn has developed a phobia of insane robots, which causes her to have panic attacks if she's near MIMI when the latter goes into her GIR-like mode (or near GIR at most times). This has been used against her on several occasions.
* The New Adventures of Invader Zim features Zim spying on Dib with one of these in the first chapter.
* The New Adventures of Invader Zim first realizes just how oblivious most humans are to beings like him:
* The New Adventures of Invader Zim force known as the Consulars, who all have powerful telepathic abilities.
* The New Adventures of Invader Zim from him, with Team Save Earth using the resulting fight as a diversion to sneak in and do the same.
* The New Adventures of Invader Zim, GIR pulls this trick on Dib in Episode 4, during an argument over whether the latter has a big head.
* The New Adventures of Invader Zim given that the story alternates between this and more standalone events.
* The New Adventures of Invader Zim him free will in the first place — when she reprogrammed him, she could have left him as a basic SIR unit drone but now dedicated to her, but instead she gave him an actual personality and the ability to make his own choices. His gratitude for that is why he chooses to stay by her side.

* The New Adventures of Invader Zim: In Episode 5, this is Dib's reaction to the circular logic that the other Swollen Eyeball agents hit him with in regards to his request that he be granted access to Van Helsing's journal in their private library.
* The New Adventures of Invader Zim in size and armament, and it's meant to act as a secondary flagship to the Armada.
* The New Adventures of Invader Zim is just as much about Dib as it is about Zim, with Tak as a Tritagonist.
* The New Adventures of Invader Zim is now the janitor in Dib and Zim's school, and has converted his surprisingly spacious janitor's closet into one of these, as seen in his first appearance.
* The New Adventures of Invader Zim, it's established that the Irkens use an internet equivalent called the Irk-Net. There's also the Dark Irk-Net, which unlike the main version isn't monitored by the Control Brains, thus making it perfect for conducting criminal activity.
* The New Adventures of Invader Zim keeps the canonical rivalry between Zim and Dib, though Tak's presence as a major character opposed to both makes it somewhat of a trifecta.
* The New Adventures of Invader Zim most frequently seen powers is the ability to transform into a giant demonic bat.
* The New Adventures of Invader Zim: Much like canon, this is primarily a science-fiction story that nevertheless has a significant amount of magic and paranormal creatures involved.
* The New Adventures of Invader Zim, Norlock calls Slab Rankle out on his repeated usage of the word "punk".
* The New Adventures of Invader Zim, Norlock pulls this on Dib when they meet for the first time after Norlock follows him and Zim back to Doomsville. He sneaks up on Dib at Parent Teacher Night and when Dib turns around and sees him, merely says "Boo". Dib ends up shrieking like a monkey and scuttling away.
* The New Adventures of Invader Zim Nyx, over a shared love of games and cruelty towards others. Given Gaz's general apathy and misanthropy, everyone is shocked and disturbed by her actually making a friend.
* The New Adventures of Invader Zim of Zim's. Immediately after she's brought into the story, she tracks him down and manages to earn her way into his employment, to her extreme joy.
* The New Adventures of Invader Zim, one of Dib's new teammates, Steve, eventually creates some makeshift energy guns for the team to use against the Irkens. At first, they're pretty unreliable, as they'll short out if used too much, but after a while he fixes this and starts using them regularly.
* The New Adventures of Invader Zim, orders Nyx to call it off, which she does.
* The New Adventures of Invader Zim quickly turns into this when Tak returns to Earth, as she's now competing with Zim to conquer the planet, and Dib is now trying to stop them both. This leads to several three-way fights over the course of the story.
* The New Adventures of Invader Zim, Skoodge is said to have this problem with other languages. For example, he apparently once somehow turned a simple greeting in Vortian into "I would like to fill your pants with shrimp."
* The New Adventures of Invader Zim, Skoodge thinks that Zim is his caring best friend, despite the fact that Zim doesn't give a damn about him and doesn't even try to hide the fact. Of course, we can’t judge him too harshly for this, as the only alternative Skoodge has ever known is the Tallest, and unlike them, Zim actually recognizes that Skoodge does have worthwhile skills.
* The New Adventures of Invader Zim snaps him out of it by hitting and insulting him until his anger over the situation takes over.
* The New Adventures of Invader Zim that he won't let anyone else kill Dib but him. He later extends this attitude to Tak as well, but he's not as strict towards it as he is in regards to Dib.
* The New Adventures of Invader Zim. This makes him realize it's not real, which shatters the illusion and wakes him up.

* The New Adventures of Invader Zim through much of Season 1 is Dib complaining that he lacks his own unique weapon; by the seasonal climax he's solved this problem, having constructed a pair of plasma-channeling gauntlets for himself.
* The New Adventures of Invader Zim to most of history's most famous warlords, conquerors, dictators, and criminals.
* The New Adventures of Invader Zim" to serve as a figurehead. In order to conceal his identity, he wears a disguise composed of a cloak and a red mask in the shape of a stylized Irken face. Season 2 shows that his newfound followers start copying the look when carrying out attacks.
* The New Adventures of Invader Zim to the house proper (like a garage) are fair game.
* The New Adventures of Invader Zim to win his fight with Mortos, every other male present — human, Irken, and underworld monster — winces in sympathetic pain.
* The New Adventures of Invader Zim versions of the human characters involved in more mature situations.
* The New Adventures of Invader Zim: When Nyx is giving Zim and Skoodge her backstory in her introductory chapter, she mentions that for the first week after the power surge which electrocuted her PAK and rendered her Defective, everything tasted yellow.
* The New Adventures of Invader Zim, when Tenn is forced to evacuate her base on Meekrob, she makes sure to scuttle all her computers before she leaves.
* The New Adventures of Invader Zim when they realize that Dib and Steve are anti-alien, and start chasing them.
* The New Adventures of Invader Zim, where Tenn goes to a diner to mope over her being demoted to Tak's assistant, drowning her sorrows in soda and doughnuts. Her interactions with the bartender are played as if she's in a bar.
* The New Adventures of Invader Zim, which all three teams are after (Zim and Tak and their respective allies to conquer Earth with it, Dib and his friends to stop either of them from doing so).
* The New Adventures of Invader Zim, which is composed of non-canon stories based on plot outlines suggested to the author by a friend that are simply incompatible in rating with the main series.
* The New Adventures of Invader Zim, which means that technically they don't have to be subservient to the Tallest.
* The New Adventures of Invader Zim who allies with Zim. An exact age is never given, but he claims to have known Caligula, and states at one point that when he was human he built pyramids for a living.
* The New Adventures of Invader Zim Ying only ever refers to his mistress, Nyx, as "Madame".
* The New Adventures of Invader Zim, Zim and Dib apparently have this understanding regarding the canon episode "Bolongius Maximus" (the one where they're turned into boloney).
* The New Adventures of Jonny Quest deploy from it encapsulated in electrically-charged glowing spheres.
* The New Adventures of Jonny Quest: Ends the first act of "The Monolith Man."
* The New Adventures of Jonny Quest human but merely deformed or mutated in some way.
* The New Adventures of Jonny Quest to stone. Now he is driven to find more of the same radiation in an effort to study it so he can undo the damage to his good looks. One problem: the crystals which give off the radiation are extremely volatile and tend to explode without warning, making it extremely difficult to mine. Zartan's mining operations suffer multiple accidents as a result of the crystals blowing up and killing the workers. Undaunted, Zartan demands his men press on and on because restoring his handsomeness is more important than the lives of his employees.
* The New Adventures of Jonny Quest wings. The Reptilian himself is said to be part human, part dinosaur, but he isn't as blatant as Phorbus' other creations, looking like your standard anthropomorphic lizard man.

* The New Adventures of Kimba The White Lion) was heavily panned due to its low quality, and as a result ended on a cliffhanger after just 12 of its 52 episodes, skipping episode 2 and 3 for some reason.
* The New Adventures of Lucky Luke, Joe Dalton instructs his brother, Averell with this trope in order to impress the girl the latter is smitten with, only to get it done wrong with just narrow success.
* The New Adventures of Mighty Mouse episodes) and Mighty Mouse respectively but neither are credited.
* The New Adventures of Old Christine, a common joke of the series is her promiscuity during her college years.
* The New Adventures of Old Christine. A muscular young cop named Officer Johnson arrives on Christine's doorstep to warn her of a prowler in the neighbourhood. However, it happens to be Christine's birthday and she thinks Barb has sent her a stripper. Cue one increasingly confused conversation between Christine and Officer Johnson.
* The New Adventures of Old Christine curse) had these frequently mostly between Old Christine and her brother Matthew.
* The New Adventures of Old Christine happens when a handsome buff young police officer shows at Christine's place on her birthday to warn her about a prowler in the area. When he introduces himself as Officer Johnson, Christine assumes this is his stripper name.
* The New Adventures of Old Christine seemed to use this in every episode.
* The New Adventures of Old Christine sent in wine corks, unfortunately the ratings of the fifth season weren't high enough for the execs to justify renewing it.
* The New Adventures of Old Christine: When old Christine kept bringing up how she thought she was racist she was told not to use the word until she learns what it means.
* The New Adventures of Pippi Longstocking interview promoting the movie, when she wore a tight aerobics leotard without the binding.
* The New Adventures of Robin Hood homage Fantasy, but the episode "Dragon from the Sky" was about an alien crash-landing in Sherwood and repairing his space-ship in time before the Sheriff dissected him.
* The New Adventures of Robin Hood: In "Day After Day", an evil warlock curses a village to live the same day over and over until the woman he obsesses over agrees to marry him.
* The New Adventures of Robin Hood: In "First Love", Robin's former fiancé Olivia seeks the outlaw hero's help in rescuing her husband.
* The New Adventures of Robin Hood. Robin is hunted by evil aristocrats in "The Prey".
* The New Adventures of Robin Hood to brainwash either Marion, Little John, or Tuck to kill Robin.
* The New Adventures of Robin Hood when Marian is kidnapped to be a demon god's bride, Robin shows up with an Unicorn horn that can changed into different energy weapons, one of which is a energy sword. This dissolves into a light saber duel when the lead worshipper, possessed by the god, reveals his own energy sword.
* The New Adventures of Sherlock Holmes, then chuckles that this is literally true as well as metaphorically. When the radiologist is (naturally) murdered by one of his assistants, Holmes deduces, in his brilliance, that it must have been delivered with someone using their right hand. Thus, only the "adroit" (right-handed) assistant could've killed the radiologist.
* The New Adventures of Speed Racer have a centuries of hostility between them.
* The New Adventures of Speed Racer: In the future, mutants, people exposed to toxic waste, are relegated to living in ghettos, while "Norms" live far away from the toxic waste spills.
* The New Adventures of Speed Racer, Racer X works for a crime-fighting organization called InterNet. As the show was created in the early 90s, the word internet hadn't yet taken on its current meaning.
* The New Adventures of Speed Racer was Professor Tick-Tock, described as half-man half-machine.

* The New Adventures of Speed Racer whenever Spritle had something important to say the adults would ignore him.
* The New Adventures of Superboy about me is lies! I am not a hoax—and you will spend a lot of time in an American prison remembering that!"
* The New Adventures of Superman and Clark Kent his plan after he captures them.
* The New Adventures of Superman and Jimmy Olsen under the knees and back when rescuing them.
* The New Adventures of Superman bring up something related to the plot to his coworkers for a final joke.
* The New Adventures of Superman causes a crane driver to attempt to drop a school bus into a metal crusher.
* The New Adventures of Superman episode "Prehistoric Pterodactyls". After millions of years frozen in Arctic ice, two pterodactyls are freed and immediately go on a rampage.
* The New Adventures of Superman episode "Rain of Iron". A villain fires iron balls out of a cannon in a specific direction. They fly through space, hit an asteroid and bounce back to Earth at a specific location. Asteroids (a) aren't close enough to Earth for this to work and (b) travel in orbits around the Sun, so firing the balls in a specific direction would only work once.
* The New Adventures of Superman episode "The Chimp Who Made It Big", the chimpanzee Toto mutates into the giant ape Titano after being exposed to the radiation released in a collision between a kryptonite meteor and a uranium asteroid.
* The New Adventures of Superman episode "The Force Phantom". The "force creature" attacking Superman is powered by a generator on the Deimosian ship. The Deimosian captain orders that the generator be turned up to deliver more power. When his lieutenant objects the captain says "That is an order!"
* The New Adventures of Superman: In "Luthor's Lethal Laser", Luthor and Brainiac attempt to kill a shrunken Superman by fumigating him with kryptonite gas.
* The New Adventures of Superman: In "Luthor's Loco Looking Glass", Luthor sets up his base of operation in an abandoned amusement pier. For some reason, the Tunnel of Love has horror figures in it.
* The New Adventures of Superman: In "Rain of Iron", Lois Lane is knocked out by the boom when she attempts to maneuver her sailboat to avoid a torpedo.
* The New Adventures of Superman: In "Return of Warlock", Superman first makes Warlock think his car is about to crash into the wall of the penitentiary, before lifting the car over wall and dumping him out in the prison yard.
* The New Adventures of Superman: In "Superman Meets Brainiac", Brainiac raids Earth to gather creatures to repopulate a planet devastated by atomic wars.
* The New Adventures of Superman: In "The Atomic Superman", Superman tests a new explosive by swallowing it. It has the side-effect of causing him to breathe atomic fire.
* The New Adventures of Superman: In "The Fire Phantom", a living flame from Earth's core appears and sets off a mammoth forest fire. The living flame is a giant version of the classic "living candle flame mote", and has no intelligence or personality except for causing fire and destruction wherever it goes.
* The New Adventures of Superman: In "The Ghost of Kilbane Castle", Lois and Jimmy are left suspended above razor sharp blades.
* The New Adventures of Superman: In "The Halyah of the Himalayas", Superman defeats the Halyah by luring it on to a rope bridge, then cutting the ropes to dump the monster into a deep chasm where he can cover it in snow and put it back to sleep.
* The New Adventures of Superman: In "The Imp-Practical Joker", Mister Mxyzptlk hides among statutes of gnomes on the roof of a carnival fun house.
* The New Adventures of Superman: In "The Japanese Sandman", the sleep sand used by the Sandman cause people to fall asleep instantly when it is blown in their face.
* The New Adventures of Superman: In "The Mermen of Emor", the mermen attempt to do this to Jimmy Olsen and two other captured scuba divers as part of their annual games: first with lion sharks, and then a killer whale.

* The New Adventures of Superman: In "The Mysterious Mr. Mist", Mr. Mist attempts to feed Perry White into a buzz saw on his farm.
* The New Adventures of Superman: In "The Mysterious Mr Mist", Superman uses an ordinary vacuum cleaner to suck up Mr Mist. However, Mist manages to escape while Superman is busy rescuing Lois.
* The New Adventures of Superman: In "The Mysterious Mr. Mist", the disembodied Mr. Mist is obsessed with capturing Lois Lane and dragging her back to his subterranean realm to make her his queen.
* The New Adventures of Superman: In "The Prankster", Superman switches a pair of signs to cause the Prankster to drive his scooter into a river.
* The New Adventures of Superman: In "The Robot of Riga", aliens kidnap Jimmy Olsen and Lois Lane and put them in a cage on their homeworld Riga.
* The New Adventures of Superman: In "The Warlock's Revenge", the Warlock magically transforms the stairs beneath Lois Lane's feet into a slide to dump her into a busy street.
* The New Adventures of Superman: In "The Warlock's Revenge", the Warlock wants to borrow his sister's magical ruby to use its powers to exact revenge on Superman but she refuses because she's sure that the Warlock will fail again and Superman will destroy the ruby. The Warlock just takes the ruby by force and it leads to Superman eventually proving her right.
* The New Adventures of Superman involving a sliding floor over a pool of sharks.
* The New Adventures of Superman: Jimmy is menaced by an oversized spider in "The Neolithic Nightmare".
* The New Adventures of Superman: Jimmy Olsen gets wrapped up in a cocoon when he is kidnapped by the leader of the Insect Raiders in "The Insect Raiders".
* The New Adventures of Superman, put Filmation on the map, and while hardly epic, serve as a very faithful adaptation of the Silver Age comics.
* The New Adventures of Superman. Reversing the polarity of an electric charge transfers the powers of the episode's villain (and some other guy) back to Superman... after they got them from him through an electric shock.
* The New Adventures of Superman", Superman battles a shape-shifting alien creature that emerged from a fallen meteorite and devours iron structures.
* The New Adventures of Superman: Superman battles the mummy of an evil ancient Egyptian sorcerer in "The Malevolent Mummy."
* The New Adventures of Superman: "The Japanese Sandman". The titular monster (who commits evil acts in return for a black pearl) has red eyes.
* The New Adventures of Superman tries to use a bomb in an alarm clock to blow up a generator.
* The New Adventures of Tarzan himself, meant to compete against the MGM Tarzan features and film serials being produced at the same time.
* The New Adventures of Winnie the Pooh) and ingredients (jalapenos and turmeric) are somewhat... questionable.
* The New Adventures of Winnie the Pooh and then decides to wait for the train to run out of steam. Several days later the train is still going so Tigger causes it to crash with a banana peel, and Piglet is ok.
* The New Adventures of Winnie the Pooh assume she has the relatively more common name Cassie.
* The New Adventures of Winnie the Pooh at a trial to get Piglet off the hook:
* The New Adventures of Winnie the Pooh, "Balloonatics", had a balloon that Christopher Robin described as being "made of rubber and air" but was capable of carrying Pooh just like in the book. Later, Christopher reinflates it with his breath and it is buoyant enough to carry not just Pooh, but the other animals who grabbed on to try to bring him back down (except Tigger, who clearly wanted to go along for the ride).
* The New Adventures of Winnie the Pooh briefly featured popcorn as being popped on the cob. It ended up popping all over the place because Tigger put too much corn in the popper.
* The New Adventures of Winnie the Pooh, but then suddenly drops it...
* The New Adventures of Winnie the Pooh, Christopher Robin finds a kingdom of filth

under his bed, where his lost toys were enslaved.
* The New Adventures of Winnie the Pooh: During a western themed fantasy sequence, Pooh is thrown into a jail cell and somehow every single character is too stupid to notice that the bars are wide enough to easily step through and the back wall is completely missing. When Pooh is broken out of jail by Tigger, they even leave through the missing wall, but not before Tigger unlocks the door first, somehow not realizing they could have done that before.
* The New Adventures of Winnie the Pooh episode "A Pooh-Day Afternoon".
* The New Adventures Of Winniethe Pooh episode "Cloud, Cloud, Go Away," after Tigger insults a cloud for blocking his bouncing path. As it rains on him, Rabbit even seizes the opportunity to use Tigger's personal rain cloud to water his crops. But when Tigger tries to confuse the cloud by having Pooh and Piglet dress as him, the cloud turns violent and starts to thunder and lightning... at least until Tigger apologizes to it.
* The New Adventures of Winnie the Pooh episode "Groundpiglet Day", after Rabbit accuses Piglet of lying about Groundhog Day when there's snow in the Hundred Acre Wood (long story), the distraught little animal leaves him a note saying he's off in search of a groundhog. A very surprised Rabbit replies, "He must be kidding", and then reads further to find Piglet also wrote, "P.S. I'm not kidding."
* The New Adventures of Winnie the Pooh episode "Groundpiglet Day", Pooh, Tigger, and Rabbit think Piglet's been turned into a snowman. As Piglet appears to have melted, Rabbit starts crying that it was all his fault and begs forgiveness, to which the real Piglet comes up to him and says he does.
* The New Adventures of Winnie the Pooh episode "Rabbit Marks The Spot" saw Pooh, Piglet, Tigger, and Gopher looking for buried treasure, with help from a fake treasure map that Rabbit had created.
* The New Adventures of Winnie the Pooh episode "The Piglet Who Would Be King", Pooh enters Rabbit's house by going down the chimney while trying to find Rabbit. Because Pooh gets covered with soot while doing so, he starts tracking soot all over the floor but mistakes his own footprints for "honeynapper tracks".
* The New Adventures of Winnie the Pooh had Christopher Robin give Piglet a pair of "magical earmuffs" so that he could ice skate. Piglet loses the earmuffs, and believes that he cannot skate without them...until his friends are in danger. Naturally, Piglet saves the day, even without the "magic."
* The New Adventures of Winnie the Pooh had Pooh trying to locate Rabbit's lost hammer, by using one of these and setting out a bunch of nails as bait. The trap gets set off and when Pooh goes over to see what he caught, he finds that he caught a saw instead.
* The New Adventures of Winnie the Pooh had the Pack Rats, who steal things and leave behind walnuts in their place.
* The New Adventures of Winnie the Pooh, he comments that only a single keg of dynamite would be necessary...not knowing that Pooh, Tigger, and Piglet had each added a keg to the pile.
* The New Adventures of Winnie the Pooh: In "Luck Amok", Tigger picks all the apples from Rabbit's trees to decrease Rabbit's chances of getting hit on the head by one. He then sees an apple on the top branch he claims has a worm on it and pulls it down to give to Rabbit for him to see. This, of course, sends him flying across his garden.
* The New Adventures of Winnie the Pooh: In "My Hero", Piglet does a spit take during a meeting on who saved what, when Owl mentions Tigger is still Piglet's servant.
* The New Adventures of Winnie the Pooh): In the episode "Pooh Skies", a body wipe is used where Tigger is jumping on a trampoline and falls on Rabbit.
* The New Adventures of Winnie the Pooh: In the episode "Pooh Skies,"' when everybody unpacks their bags after having evacuated to Gopher's tunnels, Tigger unpacks all kinds of stuff from his trunk, including a kitchen sink.
* The New Adventures of Winnie the Pooh: In the episode "Sorry, Wrong Slusher", the judge in a dream sequence literally throws the book at the characters.
* The New Adventures of Winnie the Pooh: In "The Good, the Bad and the Tigger",

Judge Samuel J. Gopher takes his role in the Wild West roleplay a little too seriously.
* The New Adventures of Winnie the Pooh: Inverted at the beginning of "Rabbit Marks the Spot", where the camera zooms out of Tigger's mouth, complete with swinging uvula as he belts out the first note of the song they're about to sing.
* The New Adventures of Winnie the Pooh keeps trying to keep them on track.
* The New Adventures of Winnie the Pooh. Piglet is depressed about being so small, so the others make him think he has grown by tying boxes on his feet and putting binoculars backwards in front of his eyes. In another episode, Tigger tells a scary story where a giant Pooh scours the land for honey.
* The New Adventures of Winnie the Pooh: Pooh is asked to take care of a balloon, loses it, and then has a dream where he is put on trial by a jury of horrific accusing balloons.
* The New Adventures of Winnie the Pooh. Rabbit and Tigger use a boomerang to try to knock down a beehive, but it misses and they have to duck to avoid getting hit. The boomerang stays up in the air for the remainder of the episode, occasionally almost hitting Rabbit. At the end, the boomerang flies into Rabbit's house with a loud crash.
* The New Adventures of Winnie the Pooh, Rabbit gets so upset with the others wrecking his garden that he turns it into a fortress surrounded by booby traps. Leads to this line:
* The New Adventures of Winnie the Pooh, Rabbit once borrowed Christopher Robin's "Silly old bear." And yes, he used it with the same amount of endurance.
* The New Adventures of Winnie the Pooh, Rabbit plays a highwayman known by the name El Conejo during a fantasy sequence at the start.
* The New Adventures of Winnie the Pooh, Rabbit suggests a strategic retreat from an (imagined) danger.
* The New Adventures of Winnie the Pooh starting in 1997. (Oddly, because "A Day for Eeyore" was the first to be re-dubbed, "Honey Tree", "Tigger Too", and "Many Adventures" re-use the unique overture and main theme song from that short.)
* The New Adventures of Winnie the Pooh, the characters are playing pirate and their ship springs a leak. Tigger, as the first mate, tells Piglet, who's playing captain, that he must go down with the ship. Piglet then makes Tigger the new captain, who then makes Piglet captain again, and so forth.
* The New Adventures of Winnie the Pooh, this is the defining trait of Bruno the ape in the episode "Monkey See, Monkey Do Better."
* The New Adventures of Winnie the Pooh. This scene is also shown in the theme song.
* The New Adventures of Winnie the Pooh). Tigger helps him by attaching plungers to his feet, enabling him to climb up the tree, to which Rabbit states he feels like a graceful bird.
* The New Adventures of Winnie the Pooh, Tigger successfully pulls a cloth off Piglet's table without harming any of the dishes. Then he turns to leave the room:
* The New Adventures of Winnie the Pooh tiny legs. The other horse thieves aren't as massive but they also have tiny legs.
* The New Adventures of Winnie the Pooh went through one of these reversals on whether a story was taking place at dawn or midnight. (For some reason, it wound up on "Evening" after this reversal.)
* The New Adventures of Winnie the Pooh when Christopher Robin re-inflates the balloon that Pooh and the others thought was popped when it was really deflated.
* The New Adventures of Winnie the Pooh whenever someone opens a closet, and have a bunch of knick-knacks avalanche on them.
* The New Adventures of Winnie the Pooh. When he uses the dynamite, stuff and characters almost get blown up and though the others sometimes think that they're dead, they naturally never turn out to be.
* The New Adventures of Winnie the Pooh where Tigger imagines himself chasing after an anthropomorphized version of Eeyore's missing tail, but at the end of the sequence it turns out that there were multiple Eeyore tails.
* The New Adventures of Winnie the Pooh who thrives on dirt and wishes to spread

all his dirtiness throughout the world.
* The New Adventures of Zorro (1997) animated series, Zorro somehow manages to make a grappling hook go below someone's foot (while he's standing on the floor) and come back up to tie itself into a knot.
* The New Age Outlaws weren't part of the original line-up of D-Generation X - which consisted of
* The New Albion Guide To Analogue Consciousness, a shopping complex vast enough for one of the main characters to hide away comfortably for a long time, and technology used to open a dimensional portal to the afterlife. In-universe, Mascot 3000 (the first of the aforementioned AI to be created) has a love for pulpy Raygun Gothic adventure comics.
* The New Albion Guide To Analogue Consciousness by pretending that they have Lee in their thrall as leverage to stop Conner from blocking the funding for their big project.
* The New Albion Guide To Analogue Consciousness, Elysium (paradise for the souls of the dead) turns out to be this for the living when an expedition team tries to set up a city there.
* The New Albion Radio Hour. Each is badass on their own, but when they band together over the course of the album, they end up saving the city.
* The New Albion Radio Hour, the city-state of New Albion is controlled by a brutal authoritarian government. The leader of a voodoo cult/resistance cell figures out a way to cripple the government's soldiers by transmitting a hypnotic song into their helmets. Unfortunately, once the soldiers are enthralled they start singing along, which infects everyone near them until the entire city is trapped in a trance, leaving only a few people conscious enough to try and fix things.
* The New Albion Radio Hour, this is a major plot point, Constance, at one point asking "Wasn't there a... a radio broadcast?" before being subdued by the narrator, Lloyd Allen, and Lloyd, in the third act, trying to prevent his characters from changing the narrative, from changing the way the story plays out.
* The "New Alexandria" level has jamming devices that interfere with the HUD, similar to the
* The New Alfred Hitchcock Presents (1989, 1 episode entitled "Diamonds Aren't Forever") as James (a spoof of James Bond)
* The New Archies cartoon that has the normally-teenage Archie characters as middle schoolers.
* The New Archies had the middle schooler characters all voiced by children.
* The New Atheism, new atheist Sam Harris demonstrates that many Christian apologists have engaged in this practice in quoting atheist authors in books that they've written to try to refute them.
* The New Avengers: After being shot by the White Rat in "To Catch a Rat", Gunner struggles to his feet long enough to shoot the Rat as he was about to shoot Purdey.
* The New Avengers and arrives just after the man he was supposed to meet has been murdered, and seconds before internal security arrives. The second time, he happens to walk in on a murder the killer was planning on framing him for. The killer knocks him out and leaves him beside the body with the murder weapon in his hand.
* The New Avengers, and the monastery was being used to house the cryogenically frozen body of Adolf Hitler until such time as they could revive him.
* The New Avengers: At the end of "Sleeper", Steed, Gambit and Purdey steal outfits from unconscious robbers and infiltrate the gang, using the balaclavas to disguise their identities.
* The New Avengers: A variant occurs in "Complex". When Purdey is trapped inside a building that is trying to kill her, Steed and Gambit alert her that she needs to trigger the sprinkler system by dumping a large quantity of matches and lighters into the mail chute, which is the only access the AI cannot seal off. Purdey uses a lighter to set off the sprinkler and destroy the computer.
* The New Avengers by a bow-wielding assassin in "Faces". He uses an arrow to sever the the rope holding up a training dummy next to Purdey as a way of announcing his presence.
* The New Avengers, enemy agents seem to wander into Steed's house every other

episode.
* The New Avengers episode "Angels Of Death" has Joanna Lumley's Purdey taking on not one but two gorgeous female opponents (played by Caroline Munro and Pamela Stephenson), after Gambit's basic decency prevents him hitting women and they beat the bejasus out of him.
* The New Avengers episode "Target!" features the agency's shooting gallery being used to assassinate agents.
* The New Avengers episode "The Eagle's Nest", a group of Nazis disguise themselves as monks.
* The New Avengers episode "The Three-Handed Game" features three agents with perfect memory. Each of them was shown one-third of a secret message and was sent to deliver it via a different route, so that in theory nobody could intercept the entire message. (Come to think of it, kinda like the way data packets work on the internet.) Of course the bad guy figures out a way.
* The New Avengers episode "Three-Handed Game", an amnesiac agent desperate to find his way back to Steep crashes his motorbike through the window of Steed's living room.
* The New Avengers: Gambit does this to O'Hara in "The Gladiators" when he finds O'Hara scoping out the bad guys' escape route. He taps him on the shoulder and then slugs him on the jaw as he turns round.
* The New Avengers: Happens to Gambit in "Trap" when he is trapped by Soo Choy's men.
* The New Avengers has Purdy capable of taking on the best and winning. Unless that week's episode calls for her to cry and phone Steed for rescue. The episode where important figures, including apparently Steed and Gambit, are being replaced by imposters, is a case in point.
* The New Avengers. He comes crashing through the window of a folly in "Dead Men are Dangerous", and a health farm in "the Deadly Angels".
* The New Avengers: In "Complex", Purdey destroys the murderous A.I. controlling the building by triggering the sprinkler in the basement, causing it to short out.
* The New Avengers: In "Complex", the murderous AI controlling the building causes the floor to drop out of the elevator beneath Greenwood's feet, send him plummeting to his death.
* The New Avengers: In "Complex", the murderous AI controlling the building disposes of one its victims by dumping him into the building's trash incinerator.
* The New Avengers: In "Dead Men are Dangerous", Gambit leaps on the back of a fleeing car. He gets thrown off but manages to pull off the number plate as he goes.
* The New Avengers: In "Dirtier by the Dozen", Colonel 'Mad Jack' Miller plans to trigger a war in the Middle East and use the confusion to loot whatever isn't nailed down and disappear before any of the powers involved can work out what has happened.
* The New Avengers: In "Faces", Gambit poses as a homeless man to infiltrate a group creating duplicates of intelligence operatives. While looking for someone he can turn into a double of Gambit, the plastic surgeon initially doesn't think the disguised Gambit will be suitable.
* The New Avengers: In "Forward Base", Purdey and Gambit spook a Russian agent into revealing the location of the base by calling him to tell him his cover is blown, and then doing absolutely nothing. They reason that the fact that he cannot find them will absolutely convince him that they are on to him.
* The New Avengers: In "Hostage," a gang of villains abduct Purdey and hold her hostage to ensure Steed's compliance.
* The New Avengers: In "Hostage", Purdey's kidnappers carry her out of her flat hidden in a coffin.
* The New Avengers: In "Hostage", the kidnappers send Steed a lock of Purdey's hair with a warning that worse is to follow if Steed does not obey their instructions.
* The New Avengers: In "K is for Kill", a cadre of Soviet soldiers are accidentally awoken from their cryogenic sleep and embark on following their original Cold War orders; attacking several former military targets that have been abandoned for

decades.
* The New Avengers: In "K is for Kill: The Tiger Awakes", one of the Russian soldiers does this before tossing a grenade through the window of the Allied HQ museum.
* The New Avengers: In "Obsession", a rogue air force officer steals a rocket to blow up the Houses of Parliament during a state visit by a Middle Eastern statesman.
* the New Avengers. In opposing the collapse of the Multiverse they refuse to take any lives or destroy any inhabited world. The Superman expy who leads them even gave a speech that directly invokes this, contrasting Reed Richard's earlier 'everything dies' speech.
* The New Avengers: In "The Deadly Angels", Steed is in a car being driven by one of his friends. A sign is flashed that causes the friend to suffer a fatal heart attack. The car continues to careen along as Steed attempts to steer it to a safe stop.
* The New Avengers: In "The Eagle's Nest", Gambit captures an enemy operative who kills himself with a concentrated dose of jellyfish venom.
* The New Avengers in the "K is for Kill" two-parter. When they are killed they revert to their biological age.
* The New Avengers: In "The Lion and the Unicorn", Gambit steals a window washer's three-wheeled van to chase a fleeing thug through the streets of Paris. Naturally he ends up wrecking it.
* The New Avengers: In "The Lion and the Unicorn", Steed has to go to extreme lengths in order to convince the Unicorn's gang that he is still alive (after being accidentally shot by one of his own men) in order to prevent a gang war and recover a hostage the Unicorn's gang is holding.
* The New Avengers: In "To Catch a Rat", Purdey and Cromwell end up attacking each other when they both have the same idea of searching Cledge's apartment in the dark.
* The New Avengers: In "To Catch a Rat", Purdey and Gambit charge into a church expcting to confront an enemy agent. Instead, the confront two local ladies arranging flowers. Purdey immediately announces that this is wrong and he cannot force her to marry him and storms out. Gambit stands there for a few moments looking embarrassed before hurriedly stuffing some money in the poor box and slinking out after her.
* The New Avengers: In "To Catch a Rat", Purdey tells Cromwell to take of his trousers, to his obvious surprise. It turns out she had ripped his trousers during the struggle and intends to sew up the rip.
* The New Avengers: In "Trap", Purdey walks up to the captain of Soo Choy's men and gives herself up. While he is securing her, Steed gets the drop on him and knocks him out.
* The New Avengers: In "Trap", Steed, Gambit, and Purdey are on a plane when the main cabin starts filling with gas. Gambit opens the main door to depressurize the cabin and suck out the gas. The depressurization goes on for long enough for the pilot to get out of the cockpit and still be sucked out of the plane.
* The New Avengers. One of the soldiers is his father, who now appears about half the age of his son.
* The New Avengers plans to behead Steed, Gambit, and Purdey as revenge for foiling his drug operation. He gets as far as getting Gambit's head on the chopping block.
* The New Avengers: Purdey poses as a mannequin in a store window in an attempt to avoid two of the robbers in "Sleeper". She is hampered by the fact that her pants keep falling down.
* The New Avengers, Purdey undergoes a trip through a car wash, emerging to find that her jumper and skirt have become considerably shorter.
* The New Avengers: "Sleeper" contains an odd variant, in that does not involve any actual cover. Steed and Gambit pretend to be asleep at a bus stop. Every time the gangster there looks away, they slide closer to him. He is just on the verge of working out something is wrong when they jump him.
* The New Avengers: Steed and Purdey pull this trick to inflitrate Soo Choy's base

in "Trap".
* The New Avengers: The Avengers stage one as a distraction to allow them to snatch a defector from an airport in "House of Cards".
* The New Avengers, the Russians had developed a super-martial arts training program which would enable those who survived to deflect bullets with their hands. The graduate did fairly well, but it turned out he could only deflect attacks from one direction at a time.
* The New Avengers: The threat in "Gnaws" is a sewer rat mutated to monstrous size by an undiluted experimental growth formula spilled down the drain.
* The New Avengers: The villain attending Steed's party drops his champagne glass when he hears the general announce that the 'Eye of God' satellite is going to do an underground scan of Buckinghamshire, where he has concealed his stolen missile.
* The New Avengers: The villain in "Obsession" is an ex-fiancee of Purdey who had never been mentioned before.
* The New Avengers to create doubles of people in the security services, then killing the original and having the doppelganger take their place.
* The New Avengers: "Trap" opens with an agent being caught eavesdropping on the villains. Despite being shot by a guard, he manages to escape and survives long enough to deliver a cryptic message concerning a drug deal to Gambit.
* The New Avengers uses one of these disguised as a British agent training course. Agents would be shot with harmless little darts to show whether they passed. The villains poisoned the darts.
* The New Band of the Hawk is filled with these guys (making it a pretty
* The New Basic Readers were a series of grade school primers published in the 1930s through the 1960s, featuring, among other characters,
* The New Batman Adventures. But controversy was afoot; all the characters got a redesign, either minor or major. Batman, Robin and Batgirl looked fairly similar, and the new grisly Scarecrow was loved by everyone, but Joker, Two-Face, Croc, Baby Doll, Poison Ivy and Riddler weren't received nearly as well. The tone of the series is said to have suffered as well, with the focus widening to include Robin and Batgirl in most episodes. However, the series still produced some very memorable episodes, such as "Over the Edge", "Old Wounds", and "Mad Love".
* The New Batman Adventures, Calendar Man's counterpart is a former model called Calendar Girl (name aside, though, she's a very different character).
* The New Batman Adventures, Dick's becoming Nightwing is literally just Batman suggesting the name out of the blue.
* The New Batman Adventures episode "Beware The Creeper", when the Creeper rummages through a thrift shop looking for a new outfit. He holds a Halloween-type Batman mask up to his face for a moment, then dismisses it because "It's been done."
* The New Batman Adventures episode "Joker's Millions", Harley delivers this great line:
* The New Batman Adventures episode where she fear-toxin hallucinated that Gordon had turned against Batman and gotten both of them killed after she died in the tights. She intends to tell him the truth, and has him sit down before she starts. He cuts her off to maintain deniability, though, as it's implied he already knew.
* The New Batman Adventures has two goons driving the Ventriloquist insane so his criminal mastermind alternate personality Scarface can emerge. When he does come back, he sets up a grand heist. When getaway is imminent, he tries to kill the goons for forcing him out early.
* The New Batman Adventures), he gets score signs from Harley Quinn and his henchmen.
* The New Batman Adventures indicated that they weren't even sure if the character was human anymore, and whether or not it's just a costume.
* The New Batman Adventures were treated as canon for adapting into subsequent episodes, resulting in plot elements being established as "already happened" without prior explanation like Robin having split from Batman to pursue a solo career as the superhero Nightwing and Bruce Wayne's first encounter with Jason Blood/The Demon Etrigan before "The Demon Within", where he and Jason already know each-other. The series did adapt the Robin/Batman split in "Old Wounds" but that

was only an adaptation of first 2 issues of "The Lost Years" which also detailed Dick's journey to Nightwing, including where he got the winged glider costume.
* The New Batman Adventures which is knocked out of its stand and rolled towards the cops. They all run directly away from it.
* The New Battlestar and Caprica are described as dramas with sci fi elements by the writers; they at least are not trying to hide the science fiction, even if fans accuse them of downplaying it.
* The New Blood, Jason throws Robin through a window, and the resulting fall kills her.
* The New Blood respectively, have the male love interest survive alongside the Final Girl character for the entire final act.
* The newborn Saya and Diva were described by the first Joel as having the appearance of two-month-old human babies.
* "The New Breed": A man injects himself with experimental nanotechnology to cure his pelvic cancer. The problem is that they don't stop there, or even at healing old scars and adjusting his eyesight so that he doesn't need glasses anymore. For instance, they interpret his inability to breathe underwater as a physical weakness, and he develops gills. It only gets worse from there.
* The New California Republic has scientists working round-the-clock trying to solve their power, food, and water problems.
* The new canon also reveals that Admiral Ar'alani is also pretty good in a fight, often borrowing innovative tactics from Thrawn. Unlike Thrawn, though, she's fairly savvy in matters of politics and is able to bring that knowledge to devastating effect. Also, Thrawn once orchestrates an entire battle and then leaves it to his captain to implement according to his instructions, while spending the battle on the enemy's bridge.
* The New Captain Shūsuke Amagai arc (season 9). Suggested by Ichigo while hunting for assassins in Karakura Town.
* The New Centurions (1972). The police officer protagonist sees a robbery taking place inside a store, calls for backup, draws his gun and ducks behind a car for cover, then realises there's a couple snuggling each other in the front seat. He rushes over to warn them, only to get shot in the chest with a sawed-off by the couple, who are driving the getaway car.
* the new, chalked up an early victory against the Chitauri to all the hours he spent playing video games.
* The new Chaos Gods create new lesser daemons called Black Pharaohs, Valkyries and Reiglings. They're "fragments of their masters’ wills, creatures sent out to do their bidding, mirrors of their thoughts and emotions." They're not nice but they're not necessarily evil.
* The new cider—er, cidre—from Stella Artois is pronounced SEE-DRA.
* The New Class, and Ashley Tesoro got major roles on soap operas. Other than than, nothing.
* The Newcomers also were kept in their ship for a long time and had built up a natural resistance, like how lungs adapt to higher-elevation living.
* The Newcomer, set in an alternate world where the Haymarket Affair started an anarchist revolution in the late 1800s, the current territory of the United States is separated down the middle, with the dystopian capitalist USA to the east, and a loose federation of anarchist territories to the west. The Union of American Communes is portrayed rather realistically, with a slight bias, given that the author is an anarchist himself.
* The new community lots in Unleashed can only be traveled to by the whole family, which can be annoying when you just want to shop for pet supplies. Well, if Hot Date is installed, Unleashed will actually update one of the pre-made downtown lots with a pet store so you can buy pet supplies without making it a family outing.
* the new crown he has fashioned for his wedding features several entwined rose buds. This represents his bride Margaery's strong influence on him, as her house's sigil is a rose.
* "The New Crystal Gems", Peridot and Lapis impersonate Garnet and Amethyst, referencing how their voice actors Shelby Rabara (Peridot) and Jennifer Paz (Lapis)

originally auditioned for those roles.
* "The New Crystal Gems": When Connie, Peridot, Lapis and Pumpkin try to take on the roles of the Crystal Gems, tension starts to rise.
* The New Cybermen acknowledge orders by placing their fists over their "C" chest-logos.
* The New Daughter: Ants, which are creeping mound-dwellers like the story's antagonists. Sam gets an ant farm from school and tells his dad what he learned about them, namely that there's only one female ant and the hive can't last without her. This turns out to explain the reason the mound-walkers want Louisa.
* The New Daughter: A spider pops out of a container hidden in the straw doll Louisa gets from the mound-walkers.
* The New Day, a face tag team, began showing heelish tactics in their tag team matches like having Xavier Woods hide under the ring and cost opponents matches, while their opponents, Tyson Kidd and Cesaro, began using high-risk exciting moves (such as the Cesaro Swing) while feuding with New Day. Kidd and Cesaro may have lost the tag team titles due to New Day's cheating, but they are gaining a fanbase.
* The New Day: A group of Baptist preachers/motivational speakers who debuted in late 2014. Consisted of veteran Kofi Kingston and recent arrivals Big E and Xavier Woods.
* The New Day (an all-black stable with a sort of gospel/Motown/African entrance theme) commented upon their upcoming tag-team title feud with the Vaudevillains (two white men stuck in the 1890s) by saying they wouldn't be comfortable in the "bygone era" the Vaudevillains always proclaim as superior... because then they wouldn't have their smartphones.
* The New Day attached their stable's logo to matching track suits as a way to get around the company's dress code. This would later be turned into official merchandise.
* The New Day channel where he plays video games with celebrities and other wrestlers, only adds to his individual popularity. The New Day's escape from X-Pac Heat also launched Kingston into main event status, culminating in his 2019 run with the WWE Championship.
* The New Day, losing the match, but saving both Stewart's testicles and New Day's now one year long championship reign.
* The New Day since they had identical outfits and hairstyles and the referee only saw the back of Xavier's head when he turned around.
* The New Dick Van Dyke Show had this. When CBS refused to air it, writer-director Carl Reiner quit the series in protest.
* The New Dinosaurs: An Alternative Evolution: An attempt to describe what Earth life might be like if dinosaurs never went extinct.
* The New Dinosaurs: An Alternative Evolution has giraffe-pterosaurs (even with giraffe colors), penguin-pterosaurs, koala-dinosaurs (yes, they live in Australia), manatee-dinosaurs, pangolin-dinosaurs (called pangaloons), and even naked mole rat-dinosaurs to name a few. There is also a bird, called the Tromble, that filled the niche of a wooly mammoth in the absence of large mammals.
* The New Dinosaurs: An Alternative Evolution were later described in some form in real life, although most didn't resemble Dixon's creations except in the most basic concepts.
* The New Discworld Companion, it's mentioned that many of the animals kept at the College of Heralds are descended from previous generations of heraldic models, who'd gotten rather friendly with one another. And it shows.
* The New Discworld tells the story of Monsieur Jean-Paul Pune, founder of the Fool's Guild:
* The New Edition Story also features shot for shot remakes of "Girlfriend" and "My Prerogative".
* The New Eighth Doctor Adventures had been leading slowly up to a big, cataclysmic event involving Daleks, which is very likely the Time War from the revival series, but never called as such due to license issues. Once Big Finish got the rights to use Nu-Who concepts, the subtext rapidly became text.
* The New Empire was founded in the wake of the Ryuvian Empire’s collapse,

and its rulers saw themselves as successors to the Ryuvian God-Emperors. It was an oppressive place where the elite lived in luxury on the paradise planet of Eden Prime, while the rest of their citizens toiled in poverty. They tried to conquer the entire galaxy and were the dominant superpower for several hundred years, until the fledgling
* The New England Patriots' 2003 season has an interesting take on this. They began their regular season with a 31-0 loss at the Buffalo Bills. When the Patriots faced the Bills again at home in Week 17, they
* The New England Patriots and Bernard Pollard. Pollard has destroyed the Patriots so many times that his fan nickname is the "Anti Patriot" and the "Patriot Killer". Pollard is a good player and is generally well-regarded, but it's bizarre coincidence that Pollard has done the biggest damage to the Patriots.
* The New England Patriots attempted to trademark "19-0" prior to Super Bowl XLII, something that the rest of the sporting world refuses to let them live down. In fairness, the preemptive copyrighting was probably necessary, as less than a year earlier, the Colorado Rockies coined the term "Rocktober" and then had to pay a lot to buy the mark from some entrepreneur who jumped on it immediately.
* The New England Patriots of the 2000s and 2010s. They won the Super Bowl in three out of four years and are the only team to go 16-0 in the regular season. Since 2001, they've not had a single losing season, have made the playoffs every season save for two (2002 and 2008), and have won at least ten games almost every season (2002 being the sole exception). Starting in 2012, they appeared in eight straight AFC championship games, winning five and going onto win three Super Bowls, including three in five years from 2014-2018. Aside from the celebrated 16-0 2007 team, the 2016 showed how badass the Patriots were when, deprived of Tom Brady serving a four-game suspension for DeflateGate, they still grasped a commanding 3-1 record without him, including two games where the backup
* The New England Patriots use Ozzy Osborne's "Crazy Train" as their home entrance music.
* The New England Patriots were gunning for an undefeated perfect season in 2007, a record not matched since the 1972 Miami Dolphins. They rolled into the stadium at Super Bowl XLII like they already had it in the bag, openly antagonizing the New York Giants and their fans. When talking to reporters about a prediction from the Giants' Plaxico Burress that the Giants would win 23-17, Patriots quarterback Tom Brady responded dismissively, "We're only going to score 17 points? HA! HA! HA! Okay!" Words Tom Brady and the New England Patriots would soon regret when the Giants pulled a last minute upset during the fourth quarter, with David Tyree's famous "helmet catch" putting the Giants above the cap. Victory for the Patriots trickled away and their perfect 2007-2008 season was ended by losing the one game that mattered — The
* The New Era had some sort of vaguely explained Virus that could turn ANY sufficiently advanced computer into an AI, usually
* The New Era (literally a sentient computer virus) was released, destroying life across known space. According to sourcebooks published after GDW went under, Virus was eventually defeated and a Fourth Imperium rising from the ashes.
* The newer games award a Drone for each number of Power (normally out of 5.00 or 4.00) you attain. Unlike earlier games, Drones look and even act differently depending on shot type.
* The newer, more familiar Ghost Riders are collectively known as the Spirits of Vengeance, though this is more than a mere title in most cases.
* The new(er) Scorpion, Carmilla Black has had some form of belly baring in all variations (though the variance isn't much) costumes she's worn.
* The New Essential Guide to Alien Species race with empathy abilities, so it makes sense for them to have a good understanding of the subject.
* The newest incarnation of the Tau Broadside Battlesuit can choose to exchange it's Rail Cannon for a second set of smart missiles, giving it the appearance of a walking missile rack. It can
* The newest "main" human worlds are in the Stardust system, with the 3rd to 6th planet habitable, the main (4th) having 2 moons, the 5th 4 moons, several gas

giants further out in the system — and the system is in a globular cluster so it only really gets dark when it's cloudy.
* The Newest Plutarch, Ivan the Terrible, when a senior nobleman once complained that he's supposed to sit by the Czar's side, told him to do just that... while putting a needle in the seat. Khripunov has then gained the Czar's favor by asking to sit on that chair despite the needle.
* The Newest Plutarch, John-Lincoln Baird's pigerots (pigeon-parrot hybrids) are used to deliver spoken messages. However, there was a problem with them repeating old messages until a pill was made to erase old recording from their minds.
* The newest Russian tank, the T-14 Armata, first displayed during the traditional Victory Day parade in May 2015, has tank buffs all over the world practically salivating, and since the first announcement of its development in 2010
* the newest Winter Lady Molly Carpenter is going to buy a home down the street from her mortal family's and fill it with elite Sidhe soldiers to stop any mortal threat that dares to come after her family. She is also not telling them this or about her new position as Winter Lady.
* The new EU has the Empire attempt to enforce this by banning religion and belief in the supernatural generally, though there are underground religions around despite this, as you'd expect.
* "The new fierce battle is about to begin...!" / "Let your mighty fist shine!" —
* The New Frontier incarnation is the one that most fits this trope. His experiences as a pilot during the Korean War heavily influenced his attitude towards his later job as a test pilot and his role as the newest Green Lantern of Earth's sector. Hal's character is a typical hotheaded ace flyboy, similar to Chuck Yeager.
* "The New Frontiersman" newspaper, which Rorschach is a big fan of, demonstrates some pretty disgusting tendencies in the articles we read and are generally portrayed as racist lunatics. For some idea, it claims that a rival paper comparing superhero vigilantes and the KKK is a
* The new generation brought in by season 4 comes with Surette and Lipoff, two cronies of new
* The new generation leaves its hosts normal people who can be commanded by the right voice at any time.
* The new generation of female Assassins are also badass, either taken individually or working as teams. Lady T'Malia, Alice Band, Madame Deux-Epées, Remora Selachii, miss Smith-Rhodes and Jocasta Wiggs are the named Assassins in Pratchett's canon. Other fanfic writers have expanded on these characters and added new ones, such as Ruth N'Kweze, Joan Sanderson-Reeves and Davinia Bellamy. (For an example, see
* The New Generation saga features the Cyclone, motorcycles that, combining with the normal armor worn by the user, can be used as power armor. The various models are markedly less powerful than the MODAT series (developed on Earth as opposed to by the Pioneer Expedition) but more agile, cheaper, and can be outfitted with multiple weapon systems.
* The New Girlfriend (bigender main character; subject matter includes queer romance)
* The new government regulations on beer prevent the brew from fermenting properly. It has enraged so many beer drinkers that anarchists are now using it as an excuse to foment a revolution.
* The New Guardians and charismatic cult leader who literally worships cocaine.
* The New Guardians, calls them the Dragon Lines of Power, and draws upon them to create various seismic effects, as well as gaining incredible strength, speed, and flight.
* The New Guild and what might happen if a new Guild arose to lay claim to it.
* The New Guy, at the end the main character and his female friend have a close moment, complete with poetic music... Then she reaches over and snogs another of their group instead. Then the cheerleader comes back to him.
* The New Guy. Most of his scenes have him constantly giving insults that don't

make sense. When his friends point this out, he always tells them to "shut up". Doesn't help that in one scene, he is knocked unconsious by Dizzy, who looks phsyically weaker then him.
* The New Guy, the hapless protagonist has to beat up someone to get respect in prison, and then does the same thing when he goes into a new school in order to establish a bad boy image there.
* The New Guy, who is delivered by a sympathetic prison staff to his new school in a straightjacket and mask as a shout-out to Green (and by extension, Lecter). The whole thing was a sham to convince his new peers that he was a formidable badass, rather a reversal of his former image.
* The New Hansel and Gretel: Jack and Jamie are a young couple who have just gotten a great deal on an old abandoned house. Too late they learn that the house was abandoned for a good reason.
* The New Hansel and Gretel: Mathair gave Jack and Jamie exactly what they wanted — a house where they can spend the rest of their lives together — but they are both at the whims of her mercy as her babies.
* The New Hansel and Gretel, Mathair puts the specific things she offered them as part of the deal, though not all of it was as intended.
* The New Hansel and Gretel: On their second day, Mathair dresses Jack and Jamie up in more than just diapers. Mathair briefly considers dressing Jack up as a girl to have "two baby girls" just to torment him.
* The New Heroes: Caroline Wagner continued to fight as her superhero alterego Energy for three years after her son was born. Even after she lost her powers she continued to be an action Mum, teaching her son how to fight, outwitting mecha-armored baddies and making sure everyone in Sakkara gets their homework done.
* The New Horizons Pluto flyover to get there, and there was some uncertainty that every part of it would still work properly, but it did.
* The New Humans. In addition to being able to temporarily assume the powers of other superhumans, mundane skills and talents are permanently retained.
* The New Humans: The DDHA, the Department of Demi Human Affairs. They can detain a suspect for eighteen months without proof of powers and are not above barging in an elementary classroom with guns.
* the New Irken Order movement are often stymied by the Tallest and Commander Wiyn, who both dislike him personally and view his work as insulting to their own authority.
* The New Jedi Order established by Luke Skywalker from the no-longer-canon
* The New Job, Ukrainian folk-Catholicism is pretty heavily implied to be true, considering the pious main character's occasional experience of visions and miracles.
* The new Jovian and Jacqueline who serve Talon in Act VI, while considerably less sadistic and cruel than Hokuto's, aren't above indulging in this either; in Act VI chapter 43, when they're looking for Akua and Kahlua in the Shuzen castle, Jacqueline suggests that they just
* The new Karma has a passive that reduces the CD of her Mantra Charge when she hits an enemy with spells or basic attacks. Her Q is a notoriously strong nuke when charged, however it's no slouch when used in its basic form either. Her W roots and damages her target, if it's empowered it also heals her for up to 40% of her missing health. Her E is a single target shield that grants movement speed while her empowered E adds strength to the primary target's shield and grants an
* The New Kid can also end up crossdressing after a makeover from the Girls. There's a secret achievement for
* "The New Kid" describes a "new kid" who joins a neighborhood pickup baseball team and is instantly distinguished by skill and good sportsmanship, taking them to the championship and hitting a game-winning home run, and then reveals that the new kid is a girl.
* The New Lars delivery. The premise for the episode may have been inspired by when Moy auditioned for Steven in addition to Lars. This is contrast to White Diamond's power to control gems, which makes them speak in her voice.
* "The New Lars". Then he gets out of bed and learns that Lars sleeps in the nude,

which surprises him so much that he tumbles onto the floor and across the room.
* The New Look Series has M4k30v3r, who is kind enough to explain to Sonic everything it'll put him through and why. Being a machine may justify this.
* The New Look Series: It's too bad Young Link doesn't have eyes on his neck; if he had he wouldn't have pretended to be Princess Peach, mockingly, as she witnessed the whole act.
* The New Look Series: Trunks' New Look outfit and doing their chores. They also hide his clothes before they go to sleep, forcing him to stay dressed like that till next morning.
* the newly discovered Trappist-1 star system, all seven Earth-like planets would be visible to each other in detail, much like the view from Earth to the Moon as opposed to solid dots. This is because they travel in a very tight orbit around a very cool star.
* The newly emotional Lt. Commander Data gives a big "Yes!" after destroying Lursa and B'Etor's Bird of Prey in
* The newly-introduced Synchro Monsters with new rules related to them. This is justified, considering that the game has advanced so far between
* The newly merged Square Enix bought other companies that now are all under the Square Enix banner, most prominently
* The newly-minted Liutenant John Foley first realises that a full year of intensive training at Sandhurst sums up to knowing which set of cutlery to use for each course, and a schooling in the protocols and politenesses of a pre-war officers' mess. Within a day he's binned his course notes from officer school and learns how it's really done in wartime, from the bottom up. Later in
* the newly roboticized Sally, may very well outrank the Grandmasters, as Eggman is using them to keep an eye on the latter and keep them loyal.
* The Newlywed Game about how things will get better again) making an extremely inappropriate joke about Jewish women.
* The Newlywed Game, Carnie Wilson's version. First round, where the women are asked about the men, each question is worth 5 points. Second round, where the men are asked about the women, each question is worth 10 points. Except for the last question, which has two parts, each worth 15 points. The most famous version with Bob Eubanks was basically the same, except the final was a single question worth 25 points.
* The Newlywed Game invokes and practically tests out this trope: winning demands you know what your spouse would answer to a given question.
* The Newlyweds were revived as a complementary Sunday comic to Jiggs and Maggie (although this time focusing on their baby Snookums).
* The New Member to the last few meetings he's attended. And all of the aforementioned events take place over a few months.
* The New Mexico Steam Locomotive and Railway Historical Society obtained the retired Santa Fe 2926 with the intent of having it operational in a few years time. Those plans got nixed quickly when it turned out to need a lot more work than expected, thus a target goal was set to have it running for the centennial of New Mexico's entry into the union. They might have succeeded had scrap-thieves not broken in and stolen several critical components needed to get the engine rolling again. Thus, the return date was postponed, and parts had to be borrowed off sister engine 2912 (itself undergoing a restoration to operation before the economy puttered out, leaving it to be cosmetically fixed for the time) so they could be fabricated from scratch. As a consequence, only the fully-finished tender could attend the festivities, and work had to be invested in installing new security and a new engine shed to hide the locomotive in between runs. Work was then intended to be finished by 2019, but a derailment just a few days before her steam test set the group back for the rerailing and the track repairs. 2020 was then set as the target date, but then the COVID-19 pandemic shut down the state, grinding work to a standstill. No target date has been set for her return.
* The New Misadventures of Ichabod Crane featured a witch named Velma Van Damme, who was apparently responsible for the headless horseman that terrorized the folks of Sleepy Hollow.

* The new models avert these problems to some degree. Long hairstyles still don't quite look realistic, but they seem greased rather than gelled: which at least makes sense given the Medieval-Fantasy setting. Cape animation has improved considerably, and characters often have other animated pieces as well. also, they fixed some of the clipping issues (not all though). For example capes now jiggle in response to vertical movement: such as a female night elf's idle bounce.
* The New Moon: In the Finale Act I, after the masks come off and Robert is captured:
* The New Moon, "Marianne," was substituted with an entirely different song with the same title, but a version of this song with revised lyrics, "I'm Just A Sentimental Fool," was cut from the second act at a late stage.
* The New Moon plays this mostly straight; the first act ending with Robert in chains and Margot declaring her love for Captain Duval with a reprise of "One Kiss," though it's really a ploy to let her depart on the same boat as Robert. In an earlier scene, Duval tries to compose a love song for Marianne in an effort that Robert repeatedly sabotages.
* The New Moon trying to sing a love song and constantly getting interrupted.
* The New Mr. Peabody & Sherman Show episode "Outbreak" has Mr. Hobson experiencing the symptoms of a prehistoric flu one by one as Mr. Peabody reads them from a book.
* The New Mr. Peabody & Sherman Show has Mr. Peabody's foster parents show a slideshow of family pictures to an audience on Mr. Peabody's TV show. When Sherman zooms in to highlight the zits on his high school band picture, the normally unfettered Mr. Peabody has a breakdown.
* The New Mr. Peabody & Sherman Show has Mr. Peabody's foster parents who are non-anthropomorphic dogs. The embarrassment is so bad the normally unfettered Mr. Peabody suffers a complete nervous breakdown.
* The New Mr. Peabody & Sherman Show has Nicolas-Joseph Cugnot, inventor of the first car, driving like crazy and being chased down by police on horseback in what is described as a "relatively high-speed chase".
* The New Mr. Peabody & Sherman Show has the eponymous duo go back in time to watch what is supposed to be the first game of baseball, but the inventor Alexander Cartwright is such a poor sport, he keeps changing the rules on the fly to make sure he wins. Eventually, it gets so bad that the game bears no resemblance to baseball, and even Alexander agrees it's become a mess.
* The New Mr. Peabody & Sherman Show), have art styles that evoke 1950's and 1960's animation.
* The New Mr. Peabody & Sherman Show is a live show hosted by Mr. Peabody and Sherman. Needless to say, no episode goes as Mr. Peabody planned it. Disruptions had ranged from nosy neighbors (the show is filmed from their apartment building), a malfunctioning elevator, a black hole, an overzealous fan, and a viral outbreak leading to a government quarantine.
* The New Mr. Peabody & Sherman Show, Mr. Peabody and Sherman get trapped underground with explorer Lucy Walker, leaving Peabody starving and seeing Sherman as a hot dog and Lucy as a chicken leg. Not wanting to eat his son, or change history, he settles on a convenient hamburger that turns out to be a compass.
* The New Mr. Peabody & Sherman Show, Peabody tries to do a show about his vinyl record collection, but Sherman has no idea what he's talking about and assumed the episode was about world records instead.
* The New Mr. Peabody & Sherman Show the show gets consumed by a black hole. Mr. Peabody keeps hosting from inside, a bizarre space where the rules of physics do not apply and anyone can become anything.
* The New Mr. Peabody & Sherman Show, the titular duo fall off of the roof of a skyscraper and the credits roll as they continue falling and falling. In the resolution, the duo continue falling for so long that they run out of parting words before finally crashing into a flying car with no indication they were anywhere near the ground yet.
* The New Mr. Peabody & Sherman Show to deliver an envelope to Mr. Peabody.
* The New Mr. Peabody & Sherman Show, where the duo travel to the past in order

to have stories to share on their late night talk show. For the season finale, everyone Peabody and Sherman had helped petition to get the show cancelled, blaming Peabody for causing more overall harm than good with his time traveling.
* The new Ms. Marvel has this problem to contend with in addition to getting her powers out of the blue: having grown up in a Muslim household, Kamala has problems trying to juggle her family life and coming to grips with her new skill set. Since the girl is too frightened to outright tell her family what happened, her mother immediately assumes she's becoming a degenerate and is constantly reaming on her shirking her responsibilities. Her father is more understanding (as he thinks she just feels stifled at her age), but no less strict, and her brother, while being fervently religious to the point of openly denouncing the father's profession as a banker, just prefers to remain neutral. Eventually, however, Kamala's parents figure out her secret and accept it, since they know she is out doing good for the people around her.
* The New Mutants, but it's notable that literally every character that appears on-screen other than the titular mutants are dead by the end of the film, at the hands of the mutants no less.
* The New Mutants closing down movie theatres and messing with movie production).
* The New Mutants: Dani and Rahne are kissing outside (which is Rahne's first time doing so) when havoc inside the building stops them.
* The New Mutants: Dani and Rahne seem like friends only at first, but then they fall for each other, becoming a couple.
* The New Mutants has Brazilian Alice Braga as the American of Puerto Rican descent Cecilia Reyes.
* The New Mutants: Illyana spent part of her childhood as a prisoner of Russian mobsters, who would do things to the young Illyana that made them smile and made her weep.
* The New Mutants (lesbian main characters; subject matter includes queer female romance)
* The New New York hospital lobby are almost identical. The episodes even share an identical shot down the length of the room which highlights this.
* The New Nightmare, and thus has a total of 12 bullets as it fires two of them at once - he'll be killing enemies faster than Aline until they both get their hands on the shotgun.
* The New Nightmare game, health and ammunition pickups never self replenish. Infinite bad guys, finite supplies; you do the math.
* The New Normal features a pregnant Bryan next to his boyfriend and their actual surrogate mother.
* The New Normal: Goldie does this when she hears that Shania has taken a marker to Brian's couch.
* The New Normal has Goldie, a straight ally to gay couple David and Bryan. She stands up to her bigoted grandmother for them, and carries their baby.
* The New Normal (two gay main characters, subject matter includes LGBT marriage, LGBT parenting/family)
* The New Normal, which is about two gay men trying for a surrogate baby.
* The new (October 2010) update to the game which provides a web-based "calculator" that shows the tangible and intangible (i.e., titles) rewards that a player can expect to get from his or her account-based Hall of Monuments might put a slight crimp in this, as it graphically demonstrates that a player need only obtain a particular item - whether suit of elite armor, weapon, title statue, or miniature pet - once per account, not per character, and put it in the Hall of Monuments to obtain the reward for that item.
* The new one did this. Right out of the gate, you see women like Starbuck and Boomer (Kat and Caprica Six show up later on).
* The New Order Last Days Of Europe. Abaddon, the High Priest of Satan, also preaches human desires are sacred, leading to serial killers becoming high priests and being able to torture, rape and murder with impunity, such acts even being praised.
* The New Order Last Days Of Europe and lack of deescalation measures meant that

the United States and Japan would usually proceed to go to war over it.
* The New Order Last Days Of Europe, are still around as The Free Aviators, even as Russia descended into anarchy after the German victory. They still work to stop German bombers from targeting Russia.
* The New Order Last Days Of Europe: As an Axis victory mod, collaborators of various stripes plays major roles, some historic and some not. The rework of Reichskommissariat Moskowien puts the different motives for collaboration in stark contrast with Bronislav Kaminiski and Mikhail Gorbachev: Kaminiski (an historic collaborator) leads the collaborator hardliners who (at least so far as can be told at the starting date) genuinely believe in unconditional collaboration and the supremacy of German National Socialism, while Gorbachev (who in the context of the mod took to collaboration after the last great attempt at rebellion failed while he was still in school) leads the moderates who collaborate because they don't see resistance as meaningfully possible and so work within the system to try to moderate its excesses and push for reform and greater rights for Russians, not because they have any real loyalty to their German overlords.
* The New Order Last Days Of Europe gases until much of the Russian wilderness is turned into a poisoned wasteland.
* The New Order: Last Days of Europe. Himmler tends to stand out as one, though it's somewhat eclipsed by the sheer, unrelenting evil of the man to act on the ideas he has.
* The New Order: Last Days of Europe in cases when they make an alliance against the militants of the Ural League and the free city of Orenburg. In spite of their mutual disdain for each other, they can find a use for cooperation because of their common interests, as Dirlewanger wants to pillage Orenburg for its numerous riches and Lysenko wants Dirlewanger to provide his laboratories in Magnitogorsk with captured residents of Orenburg for further use in human experimentation. Their alliance, due to Dirlewanger's numbers and Lysenko's technological advantage, presents a mortal danger for other states in the Urals.
* The New Order Last Days Of Europe in the United States are called "Yockeys", after their leader Francis Parker Yockey.
* The New Order Last Days Of Europe. It can potentially beat out all the other warlord states to unite all of Russia to form the Kingdom of Rus.
* The New Order Last Days Of Europe maintain the trappings of the former Soviet Union despite the former being a fascist dictatorship in all but name and the latter being a non-ideological military junta run by Red Army officers.
* The New Order Last Days Of Europe, refused to believe that the Chairman was killed during the battle of Chongqing during the Second Sino-Japanese War and continued to resist the Japanese rule for decades, surviving due to banditry and raids in villages in Eastern Shandong. Eventually, he is captured by Kempeitai and executed, denying that Mao died to the end, even after seeing the photos of Mao's corpse.
* The New Order Last Days Of Europe (represented in-game by a clock reaching midnight), Sergei Taboritsky finally realises that Alexei is dead, and dies from shock.
* The New Order Last Days Of Europe (since the Reich's glory days were in war) and needs to implement one war plan after the other to keep himself from being couped by militarists even more insane than he is... and near the end of his options, he can implement Fall Rockwell, which is a massive naval invasion of the USA. Unsurprisingly, this ends either one of two ways: With the Germanic fleet carpeting the Pacific seafloor in steel and corpses, or in thermonuclear war and the end of the world.
* The New Order Last Days Of Europe that will help him to liberate the war-torn Russia from Nazi Germans and warlords.
* The New Order Last Days Of Europe: The Aryan Brotherhood in Russia is fascinated with Nazi Germany and convinced Russia must become culturally Aryan to survive. This extends to espousing Nazi ideals themselves even though as Russians they would be considered untermensch within the Nazi racial hierarchy.
* The New Order Last Days Of Europe, the Mad Regent of the Holy Russian Empire. In

his insane efforts to purify Russia of heretics, criminals and non-Russian ethnicities that he believes are in the way of Alexei's return, he will turn much of the Russian wilderness into poisoned wastelands from the sheer amounts deployed. And there's much emphasis in the sheer cruelty of the ever-deadlier concoctions deployed.
* The New Order Last Days Of Europe, the State of Eurasia has a rigid social hierarchy straight out of the Middle Ages as part of their ideology's push for a "Masterocracy" with social mobility nearly non-existent in said regime.
* The New Order Last Days Of Europe they're tame and sane while sneaking in crimes against humanity and slowly turning the nation worse, but stable and able to last and perpetuate its awful ideas because it won't collapse for the foreseeable future. Things like Igor Shafarevich's Reformed State of Russia and Albert Speer's Reich if he fends off both militarists and the Gang of Four are examples of states that could last long enough to make Fascism or even National Socialism the winning ideology of the Cold War, especially when contrasted against their particular opponents being either decent people or near-psychopathically mad.
* The New Order Last Days Of Europe where the Axis Powers won WWII, features numerous examples:
* The New Order Last Days Of Europe wings:. Through decisions and national focuses, the player can strengthen either wing.
* The New Order Last Days Of Europe" written on it where your minimap was. After that, all you can do is let the superevent play out, and watch as every region in the world blackens piece by piece, as civilization collapses... and, if you wait longer, some post-apocalypse events to show what follows.
* The New Orleans area had "Wild Bill Watson" who sold cars in cowboy costume screaming "I'm WIIIIILD" until hit with a Calming Pie.
* The New Orleans-area River Parish Disposal (a garbage collection service) has had the same slogan for years. "River Parish Disposal: Our business stinks, but it's picking up!"
* The New Orleans Saints for the most part were one of the worst NFL teams; some exclaiming that "Pigs Would Fly" if the Saints went to the
* The New Orleans Saints' head coach got the Nickelodeon slime treatment in a similar fashion after winning an NFL playoff game being simulcast by the channel.
* The New Orleans Saints, however, really do wear a champagne-gold color (officially called "old gold") and not yellow, but their NCAA counterparts the LSU Tigers play it straight.
* The New Orleans Saints spent a solid 20 years in the NFL's doghouse from their founding in 1967 up through the mid-80s. The team's stats were consistently abysmal, with local fans usually referring to them as the "Ain'ts" rather than the Saints. In the 1980 season, they lost their first
* The New Orleans swamp-dwelling Roux-Ga-Roux werewolf changes between its forms by ripping its own skin off, revealing the skin underneath.
* The New Pornographers have three songs that end in a similar fashion, "The Bleeding Heart Show" ("We have arrived... too late to play... the bleeding heart show"), "Testament to Youth in Verse" ("The bells ring no, no, no, no, no, no, no, no, no, no, no, no, no, no, no, no, no, no, no, no, no"), and "You Tell Me Where" ("You tell me where to be; I'll be there"). One review even compared "The Bleeding Heart Show" to "Hey Jude" in this respect.
* The New Pornographers Jimmy Swaggart's infamous declaration that "rock n' roll is the new pornography."
* The New Pornographers. Kathryn Calder serves as the female lead vocals on tour, but only when Neko Case (also a member, but a major solo singer in her own right) isn't available to tour.
* The new Primaris Marine elite unit, the Reivers, take the intimidation factor of regular Marines and crank it
* The New Prophecy arc of the main series, the Clans - having lived in the forest for countless years - are struggling because the forest is being destroyed by humans. Midnight promises them that there's a place for them to live with oak forests and streams and plenty of prey, and when they leave on their journey, their

ancestors give them a sign to show them which way to go. This was actually the original forest that the first group of cats started in, but it no longer has extra human activity and has perfect territory for each Clan.
* The New Rebellion and had later doubled back to help him at great personal risk. The smuggler community actually regarded Han, and Lando to a lesser extent, as unrealistically honorable and idealistic even before they went straight.
* The New Rebellion has General Antilles on the bridge of his fleet's flagship, looking out through the viewport and thinking he likes the design of this ship. It reminds him of being a fighter pilot, with only a thin barrier between him and the vastness of space.
* The New Red Green Show. One of the other Possum Lodgers asks why his explosives case is full of candles.
* The New Republic military in the sequel trilogy. They utterly refuse to actually
* The New Retcons that John's fellow dentist Everett had to take out a full page ad in the local paper to tell him his name was not "Elliot".
* The new Rider debuting at the usual time for such things is Para-DX, and Kamen Rider Genm gets a major upgrade complete with a new
* The New Riders of the Purple Sage song "Groupie" is actually a subversion based on real life; it's about a young woman who looks and acts like a groupie during the shows—going so far as to tell the guards she "knows the drummer" so she can get up on the side of the stage to dance—but who always just leaves after the show is over instead of trying to get to...know the band.
* The New Rock & Roll: In the 12th century, the Church denied all sacraments, including last rites, to all minstrels and street performers, effectively damning them all to Hell. The reason? Supposedly, what they did was unproductive and seduced people away from a "proper" Christian life. During the Middle Ages, musicians were seen as corruptors of youth who presumably learned their skills in Hell.
* The New Rock & Roll: The latest trend in [whatever] is corrupting youth and will lead to society's downfall!
* The New Russia, "dukh" ("spirit") or "shaytan" (Islamic devil) was used as the Russian equivalent for the above mentioned "haji" or "raghead".
* The New Russia inherited the Soviet security apparatus. While it underwent several reorganizations, around early 2000s it mostly came to the shape reminiscent of the old days.
* The New Russia, or at least how people saw it back in the 90's. Advances very quickly scientifically, but not very big on things like personal liberty and human rights. Also has elements of the Soviet Union, as like the USSR, they ridicule religion and want to weaken it as a societal force.
* The New Russia stable at 60-70 rubles per U.S. dollar, although it's sometimes seen as a "petrocurrency" and not particularly trusted in the global market.
* The New Russia to keep young people away from smoking, alcoholism, & drug abuse. Also, they make an assertive political statement.
* The news aggregator website Drew Curtis' Fark.com allows viewers to submit news articles for discussion with new, (hopefully humorous), headlines, many of which follow this trope.
* The Newsboy Legion. Guardian took them in and became their legal guardian in his secret identity.
* The New Science to us, and our countries aren't governed by two consuls sharing the power, and there aren't annual elections for them either. Vico also pointed out that Ancient Romans had a moral system entirely alien to modern society (i.e. of the 1700s) and that the institutions founded by the Romans should be seen in context rather than copied wholesale to the present.
* The New Scooby-Doo and Scrappy-Doo Show episode "No Thanks, Masked Manx" ended with Shaggy emulating Scooby's catchphrase of "Scooby Dooby Doo" by exclaiming "Shaggy Shaggy Doo".
* The New Scooby-Doo and Scrappy-Doo Show episode "The Dinosaur Deception" had a bald paleantologist named Dr. LaRue, who tried to used a robot disguised as a dinosaur to steal Montezuma's lost silver treasure.

* The New Scooby-Doo and Scrappy-Doo Show episode "Who's Minding the Monster?" had Scooby, Shaggy, and Scrappy tasked with babysitting a werewolf baby for his vampire parents when the baby's usual Frankenstein monster babysitter wandered off.
* The New Scooby-Doo and Scrappy-Doo Show, even though the suit part was not as detailed.
* The New Scooby-Doo and Scrappy-Doo Show: he forgot that the real Chairman Lewis can't read without his eyeglasses.
* The New Scooby-Doo and Scrappy-Doo Show the condiment, he felt compelled to break character to scream about how much he hated Worcestershire sauce.
* The New Scooby-Doo Movies, and just recolors him white to make a 'new' villain.
* The New Scooby-Doo Movies, Bobby Joe, the dim Globetrotter, when told to 'turn the wheel around' on a ship, takes the helm off its spot and puts it on the other side.
* The New Scooby-Doo Movies episode "The Frickert Fracas" had Simon Shakey disguise himself as a scarecrow to sneak around Maude Fracket's farm and steal a secret formula.
* The New Scooby-Doo Movies episode "The Frickert Fracas" sounded improvised (he was known for improvisational comedy and has his own syndicated show at the time), but it has since been noted that it was scripted so it can pass muster with CBS standards and practices.
* The New Scooby-Doo Movies episode "The Ghost of the Red Baron" (with the Three Stooges) has the Baron sending Velma airborne in a biplane. She doesn't know how to operate it and is flying around the airfield wildly.
* The New Scooby-Doo Movies episode "The Haunted Carnival" had a strongman called the Masked Marvel disguise himself as a ghostly strongman. Both the criminal and his monster disguise were bald.
* The New Scooby-Doo Movies, especially since the first season featured "Junior Superfriends" consisting of teenagers and their dog.
* The New Scooby-Doo Movies featured an example in the episode "The Spirit Spooked Sports Show", when Jay Teller makes a retort to Tim Conway claiming that his job as a coach is a cover for preparing for the role of Knute Rockne in a biopic.
* The New Scooby-Doo Movies had Gary Coleman, David Cross, and Big Bad Voodoo Daddy'' voicing themselves in cartoon form.
* The New Scooby-Doo Movies: In "A Good Medium Is Rare," two cops responding to a call about prowlers (although said prowlers were the gang rather than the bad guys) arrest the jewel thieves with absolutely no help from the gang.
* The New Scooby-Doo Movies in "The Exterminator" episode Don Adams keeps removing masks off Lorne Chumley until by accident he pulls at his face. "Well I guess that really is Lorne Chumley".
* The New Scooby-Doo Movies saw Pugsley digging to China through his sandbox. When Morticia chides him for being ridiculous, Pugsley tells the Chinese boy just under the surface that he'll have to go back home.
* The New Scooby-Doo Movies," the Harlem Globetrotters suggest an impromptu basketball game with the gang to while away time in a deserted mansion. When they see the Trotters do their thing, Velma suggests a group huddle to plan a strategy against them.
* The New Scooby-Doo Movies", the two groups decided to play basketball for fun. The Globetrotters said they would go easy on Mystery Inc since they're only kids. They change their minds when Scooby easily gets the ball and scores a basket. "Looks like these kids got tricks of their own..."
* The New Scooby-Doo Movies to match the Scooby look more than the Yogi look.
* The New Scooby-Doo Movies" with the Harlem Globetrotters, Meadowlark tricks Curly into volunteering being the first watch while everybody else gets some sleep. As Curly marches, he turns to us and says "Sometimes I wish Meadowlark would learn to keep my big mouth shut!"
* The New Scooby-Doo Mysteries episode "A Night Louse at the White House" had Scooby tackled when he is mistaken for the Ghost of George Washington. When asked what he as to say about the confusion, Scooby responds by crying "I want my Mumsy!"
* The New Scooby-Doo Mysteries had Daphne restrain a fleeing Shaggy by extending

her arms from offscreen.
* The New Scooby-Doo Mysteries to an extent in that Scooby and the gang were hired by the monsters to defend them from the ghost of Van Helsing, who turns out to be Igor in disguise trying to scare away the monsters so he'd have the castle to himself.
* The new Scorpion is the daughter of villainess Monica Rappaccini, probably fathered by
* The news crawl actually appears at the beginning of the obligatory court scene as well, where Mentok tries to predict what it's going to say next before finally just shutting it off.
* The new season itself ends with a number of hooks for more episodes, such as George Michael apparently having impregnated a woman in Spain, Buster being accused of murdering Lucille 2, the web vigilante group Anonymous coming after the family, and Lindsay getting into politics.
* The new series appears to be getting quite a bit of military backing, culminating in the appearance of Challenger II battle tanks in one of the Christmas specials.
* The new series' Cybus Cybermen shout "DELETE!" when killing people. As a result,
* The new series Daleks come equipped with a forcefield against bullets, that is apparently weaker around their eyepiece. Many characters about to fight Daleks are told to "aim for the eyepiece."
* The new series delights in this, occasionally taking it right into homoeroticism. The friendship between the Eleventh Doctor and Craig is the best example played to the letter, to the point where they get
* The new series did it with Sin ordering her men to spare the TV helicopter, so the whole world can see the destruction of Washington. Once she fights Ghost Rider and wins, she says the TV crew served their purpose and gives the order to blow up the helicopter.
* The new series Doctors are generally a lot more sexual (though this is never depicted on-screen).
* The new series episode "Midnight" starts out like this (we get the impression that they've come to the planet Midnight specifically to have a relaxing holiday) with Donna having a nice day in a spa sort of place while the Doctor decides to go on a fun day trip. Of course, this is
* The new series, faced with the terrifying prospect of a reasonable budget and cheap and high-quality special effects being widely available by that point, perhaps overcompensated for this by having a
* The new series goes out of its way to address the uncomfortable power dynamic between the Doctor and the companion, by making him more dependent on her than she is on him, and by cutting back a lot of the creepy subtext of the Doctor's paternalism, as well as inserting romantic elements. The trouble is that the uncomfortable relationship is still there by sheer function of the way the show works, only now it's presented as a romantic ideal, whereas the original series tended for the most part not to sugar-coat how difficult travelling with the Doctor could be. It also ends up providing the retroactive interpretation that a lot of the
* The new series has also added some variety (or possibly an aversion) to the quarry game: the quarry-like lunar setting in
* The new series has also introduced the idea of "fixed points", which amounts to there being some things you can change, and some things you can't. However, several villainous plots would have averted those fixed points if they had come to fruition —
* The new series has had various moments where the various undercover aliens' disguises were imperfect enough for regular human journalists to pick up upon them, such as the Master — for example, because no one at the university he supposedly went to could recall him. Unfortunately, the villainous alien in question will typically make quick work of anyone who finds them out before the protagonists arrive...
* The new series has its share as well, though the format change from multi-part

serials to fifty-minute one (occasionally two)-episode stories leaves less room for them. Still, a few episodes that use these very well and spring to mind quickly include
* The new series made several references to the "Shadow Proclamation", which was apparently some sort of law that nearly every alien species obeyed. Fans speculated on the origins and nature of the Proclamation. Near the end of Tennant's run as the Doctor, it was revealed that the Shadow Proclamation is "a posh term for Space Police". So apparently the Proclamation is not a law but an organization, or if it
* The new series managed to bring this back a bit, by having them all supposedly killed off. This means that for modern fans, any slight suggestion that there might be another one out there is incredibly exciting.
* The new series set one of these up with the Master. After his death and cremation in
* The new series started with the Doctor believing the Daleks were extinct, then he
* the new sets, Onua has a good amount of purple on him. He also has noticeably larger arms and a giant hammer.
* The New Sith Wars, specifically, lasted at least a thousand years. Whoever was there to see it start wasn't there when it ended. A family could have participated in that war for roughly fifty generations if they were in it from start to finish. Even exceptionally long-lived aliens like Hutts and Yoda's unnamed species would've been unlikely to live long enough to see the entirety of the war. More accurately it was a series of wars initiated by a renegade Jedi Master who declared himself a Sith Lord (Darth Ruin) and waged war on the Republic, and when he was assassinated by his followers a succession of other Sith with their own agendas rose and fell over the centuries to terrorize the galaxy, gradually de-stablising the Republic until the war climaxed with the destruction of the Brotherhood of Darkness — a cult that united various Sith Lords under yet another fallen Jedi Master (Lord Kaan) — by the Sith Lord Darth Bane, who decided that the Sith should operate in the shadows from hereon in, and as it was Bane's order that Palaptine belonged to when he destroyed the Jedi and took over the galaxy one could argue that even the millennia of peace that followed the New Sith Wars was just a lull in the fighting as the Sith changed strategy rather than a true end to the conflict.
* The news media will always warn people about the harmful effects of the sun during any heatwave, giving air conditioning tips, telling people to wear sunscreen and otherwise guard from the sun, and telling people not to leave children, animals, and the elderly anywhere, but especially a hot car.
* The news of the Four Beasts' awakening causes a panic that dwarfs the upheaval caused by Zebra's release. The entire population of the Human World retreats to the center of the Human World, leaving the borders completely deserted. Wholly justified, since the Four Beasts are horrifically powerful denizens of the
* The newspaper comic that most commonly runs into problems relating to this is
* The newspaper examples below are roughly similar, but as Battus is a mathematician in
* The newspaper finally pokes fun at the long standing leftist idea that promoting humans rights in totalitarian hellholes is the modern definition of "imperialism".
* The newspaper is also correct in accusing its rival reporter, Doug Roth, of not considering the long-term consequences of publicly confronting and accusing Dr. Manhattan, causing a pile-on that drives him to self-exile. With the lynchpin of American strategic superiority leaving for Mars, this ends up causing the Soviets to go on the offensive and escalating the Cold War at the worst possible time.
* The new Spider-Man Miles Morales originally did not shoot web, but eventually receives his own web shooters and learns how. It takes him a couple of tries before he gets the hang of swinging without smacking against a wall or onto a rooftop. Meanwhile, his best friend and unofficial
* The New Spirit: Donald Duck's pen, ink and blotter are alive. Even the radio seems alive, because it is shaped like a face and reacts to the things Donald says. The mailbox also reacts with surprise when Donald zooms past it.
* The New Spirit Donald is so determined to pay his income taxes that he personally

runs all the way from California to Washington D.C.
* The New Spirit. (No sequel was needed in '44, because by then Federal Income Tax Withholding had been introduced.) Reportedly, many more Americans did their civic duty because of these films.
* The News Quiz a discussion of the Channel Tunnel (sponsored by Scottish Widows Insurance) moved on to the woman in the Scottish Widows adverts, who Bob Mills thought was Sean Connery's daughter.
* The News Quiz describing Margaret Thatcher bringing democracy to Czechoslovakia: "She told the Czech president that all that was required was to dismantle the old, lumbering bureaucracy. He agreed that Czechoslovakia had the same problem."
* The News Quiz, discussing plans to make it harder for middle class people to get out of jury duty, which studies had found they disproportionately did, Alan Coren described his own experiences on a jury:
* The News Quiz finale because she can't watch ITV, in case she accidentally sees Keith Lemon and has to throw her TV out the window.
* The News Quiz had Phil Jupitus imagining David Attenborough in a strip club: "The female is now displaying..."
* The News Quiz, Jeremy Hardy mocked a rugby player who appeared in a Quorn ad trying to look like a sensitive New Man who did the cooking, claiming that you could tell he was thinking "Isn't there a coach window I could bare my arse out of?"
* The News Quiz lampshades the folly of having a Topical Panel Show being recorded on a Thursday for broadcast on a Friday as one the most anticipatable news events frequently occurs on a Thursday, an election in the UK. Leading to having to predict (Read:bluff) the result to perform gags accordingly.
* The News Quiz now plays on its royal connotations with the slogan "Leicester: We found a skeleton in a carpark once". This replaces the previous slogan "Leicester: At least it's not Derby".
* The News Quiz often credits the cuttings sent in by listeners with "Thanks to [name] for that piece of [nonsense/naughtiness/filth]" and starts the answers with "[Adverb]ly, this is the news that…" (The adverb is frequently an appropriate but unusual one.)
* The News Quiz, reporting that Theresa May wants to extend the Brexit transitional period but is still promising to deliver, suggested that the delivery will be so delayed, Brexit will come with a free garlic bread.
* The News Quiz Rich List. Coren misread it as "zoo" and went into a long flight of fancy about Hesseltine being removed from the Royal Zoological Society. When his misreading was pointed out, he said "It's the Two-hundred-logical Society..."
* The News Quiz, Sandi sometimes reacts to controversial gags with "Oh, there'll be letters!"
* The News Quiz, saying that cosmetics companies think men will only buy moisturiser if it's called "all-weather sealant" or something.
* The News Quiz, saying that men will only buy moisturizer if it's called all-weather sealant.
* The News Quiz?" she always expects them to add "Asking for a friend."
* The News Quiz sparring partner Sandi Toksvig (it may or may not be relevant that Sandi is in fact a lesbian).
* The News Quiz: "Those who abuse others on social networking sites are called trolls, not to be confused with the mythical creature. One is short-tempered, idiotic, and ugly, and the other is fictional."
* The News Quiz (which it predates by thirteen years). In its early years, it was a relatively straight panel game about the week's news, with the panel largely comprising journalists and politicians, but since around the mid-1990s there has been more emphasis on comedy.
* The Newsroom asking questions about Jim and Maggie around him, comparing it to "playing golf behind a foursome of blind people".
* The Newsroom. A woman comes into the newsroom with information about Anthony Weiner's infamous tweets. The distasteful task of conducting her pre-interview is delegated down by the entire staff until arriving at Maggie Jordan, the newest

producer.
* The Newsroom didn't pan out as well, marring his reputation a bit, but it still stands that any project Sorkin is attached to is worthy of some excitement.
* The Newsroom, he confronts her in front of everyone in the newsroom. After talking to her in a calm, but simmering tone for a minute or two he finally lets loose:
* The Newsroom. Jim accuses her of selling out by writing for a site that pays her by the view and thereby incentives her to write dramatically rather than honestly. She takes this badly and writes an article about the experience called "Old Media Guy and New Media Girl: An Analog Romance," which is portrayed as insipid and perfectly representative of Carnivore's standards.
* The Newsroom oil spill in the first episode. Also, the News Night team's coverage of the fictional military operation, Operation Genoa, in the second season was based directly on CNN's coverage of Operation Tailwind in the late 1990s.
* The Newsroom Season two seems to be going out of its way to excise the tumor with extreme prejudice.
* The Newsroom section below). She claims that it didn't occur to her that removing the question about what race Trayvon was would have such an effect on the tone of the story and gets in quite a lot of trouble.
* The Newsroom showcased Olivia Munn's fluency in Japanese in an episode about the radiation as a result of the Fukushima Earthquake. A later episode also had Jeff Daniels and former Broadway actor John Gallagher Jr. sing and play the guitar.
* The Newsroom, Sloan Sabbith does this when going off the rails while covering the Fukushima Meltdown in "Bullies". Don Keefer is distinctly unhappy and her "going rogue" has consequences that resonate through the rest of the first season and into the second.
* The Newsroom takes place during an interview with a subject who is obsessed with March Madness, college basketball's post-season tournament. A character even uses the game clock later to figure out that the interview tape was edited. However, the actual game being played on the background TV is a 2011 regular season game between Kentucky and Florida (perhaps as a nod to Florida alum Stephen Root, who played the character being interviewed). The game was played at Kentucky, while March Madness games take place at neutral sites.
* The Newsroom was 29 years old when she started shooting Season One when the character is supposed to have two PHD's and several years of real world experience beside, prior to the start of the show, making her character at least a few years older than her actual age.
* The new Star Trek movies do pick up on this, however. The scene at the beginning with the
* The New Statesman" Alan manages to keep a straight face as he "reluctantly" hands over the bribe, and Piers promptly grabs it as if he were afraid Alan was going to snatch it back.
* The New Statesman. As Alan commented, "You're a hard man, Piers Fletcher-Dervish... solid bone from the neck up."
* The New Statesman entirely by accident and the (rich female) victim loves the experience, even as Alan gets back to the hotel and concludes that he doesn't have time to deal with her cuffs if he's going to make the flight home. Possibly the only non-serious version with a female victim.
* The New Statesman: Even though he's the protagonist, Alan B'Stard and his wife Sarah are both amoral and power-hungry enough to qualify for this trope. (They take "love-hate relationship" to whole new levels...)
* The New Statesman for the tribe's high chief while they were both at Eton College.
* The New Statesman hostage. He holds her back against him to use as a human shield with one hand and holds a grenade in the other. She begs the fliers to "Do what he says, he's got a gun pressing into my back!"
* The New Statesman, though to hide his gender he had to be shot in sinister silhouette.
* The new Statue of Liberty found on the Neo-American space colony is actually a

* The news that Naru, the lasting friend with a history of extreme shyness, did come out of the shell for a dance practice with Hana in a public place such as local shrine — catches Yaya at a bad time, having a drink in a fast-food restaurant.
* The "New Student Starfish" episode has Mrs. Puff shift to the same incredibly messy art style as a sketch of her that offends her.
* the new stuff just isn't up to par of his fanbase. Less "They Don't Care About Us" and "Earth Song", more "Billie Jean" and "Beat It" please!
* the new Team Plasma have masks that cover the lower parts of their faces.
* The New Teen Titans comics that the cartoon is based on. It wasn't until later that he returned to his original "Beast Boy." In the cartoon, he's always "Beast Boy," and never changes his codename.
* The New Teen Titans learn that the attorney for the orphanage Donna's mother gave her to was using his information to blackmail and frighten new adoptive parents to give up their kids to him, thinking him to be legit, and then selling the kids on the black market.
* The New Teen Titans recalls her rescue from a burning building by Wonder Woman as a toddler, while there are dramatic flames dancing through the apartment it seems the reason Donna survived while the adults all died was that she was too small and low to the ground to have the same level of smoke inhalation.
* The New Teen Titans's curiosity about her past is her interest in her birth name, which was lost when Wonder Woman rescued her as a toddler. Dick finally tracks down someone who knew Donna before the fire and as Donna gets excited to learn her name the woman looks at her and calls her...Donna. Evidently her birth name was never lost at all despite all knowledge of it having been missing. This might have to do with Diana's innate connection to the truth.
* The New Teen Titans that she'd have trouble fighting with kidnappers.
* The New Teen Titans to her biological mother's grave after finally tracking down Dorthy's name and fate which Donna had been curious about for years. Donna left her mother flowers and a note thanking her for her love and trying to do what she could for her infant while terminally ill.
* The New Terrance and Phillip Movie Trailer", Chef's giant plasma TV transforms into a humongous mecha and goes on the rampage. By the end of the episode, Chef is still on the phone with customer service, trying to shut down the TV.
* The New Testament provides an example recounted within the Gospels; God gave a number of general rules, but by Jesus' time these had been analyzed and quantified into strict rules by the Pharisees. When the Pharisees tried to call Jesus on his "rule-breaking", he often explained that they had over-analyzed the letter of the law and missed the spirit completely. For example, in Matthew 12:1-2, Jesus' disciples were plucking ears of corn with their hands, but the Pharisees accused them of working on the Sabbath: "At that time Jesus went on the sabbath day through the corn; and his disciples were an hungred, and began to pluck the ears of corn and to eat. But when the Pharisees saw it, they said unto him, Behold, thy disciples do that which is not lawful to do upon the sabbath day". The irony is that the disciples' actions were in accordance to Deuteronomy 23:25: "When thou comest into the standing corn of thy neighbour, then thou mayest pluck the ears with thine hand; but thou shalt not move a sickle unto thy neighbour's standing corn".
* The New Testament while still rejecting God's gift of salvation, they can't change their mind in the afterlife to receive eternal paradise in heaven.
* The New Tetris, with each stage being set in a different country near a well-known landmark, or, in the case of the Mayan stage, within it. Naturally, this being Tetris, the final stop is in Russia near St. Basil's Cathedral.
* The New Tomorrow shows that attempts to rebuild modern society ended up falling short (perhaps caused by the second outbreak of the Virus at the end of the original series), leading to life reverting to a more decidedly iron-age level of technology (farmers, hunter/gatherers, feudal system among the Privs). This is apparently long enough after the events of The Tribe that said events have progressed into myth. Although bizarrely enough, there's still no adults around...

* The New Tomorrow. They also fear Zoot (who is Bray's brother, and acknowledged in the new series as the devil), showing that quite some time must have passed for a religion to have begun to form around them.
* The New Tower, built of solidified magic, temporarily rose a mile above Ankh-Morpork in
* The New Universe, but he can control how far out it extends or turn it off, which meant he didn't have any problem getting his hair cut, or need a special costume.
* The New Universe Even worse, even if you do get rid of it, you're keeping a portion of the power that will recharge itself back to full. It's so dangerous that, when the New Universe Earth was transported to the mainstream Marvel Universe, the Living Tribunal erected an impenetrable barrier so it won't contaminate the rest of the universe with its power.
* The New Universe, in which Pittsburgh is vaporized because Ken Connell gets careless with the Star Brand.
* The New Universe of Marvel had Jenny Swensen, who became this when her MAX armor was co-opted by the Army.
* The New Universe reveals that he's actually a paranormal, he devotes himself to policing his brethren, punishing the ones who use their powers for evil.
* The New Universe to get it, and as a result he causes a lot of damage and destruction before getting a handle on the brand's power.
* The New Universe... well, there's usually a scene of him focusing his power to destroy something with a beam attack, only to realize afterwards that he's just gotten nekkid.
* The New-U stations are controlled by the Hyperion Corporation, who are the main bad guys throughout all of
* The new Viz Media dub keeps all the songs in Japanese, except in cases where the characters are actually shown singing on-screen. This despite Viz mentioning that they had gone out of their way to cast actors that could sing; only
* The New WKRP In Cincinatti without Andy Travis, Jennifer Marlowe or Bailey Quarters (and only occasionally including Johnny Fever and Venus Flytrap).
* The New WKRP in Cincinnati, and creator Hugh Wilson and most of the cast initially agreed to take part. Then after it was decided to do a whole separate series, Wilson scaled down his involvement to just writing and directing the pilot, then finally he decided against even doing that. There was still at least some connection to the original show, with writer Bill Dial (he scripted the legendary "Turkeys Away" episode) hired as showrunner. While only three of the original cast members were regulars on the new show, almost everyone else at least put in an appearance.
* The New WKRP in Cincinnati: Morning drive time DJs Burns & Allen are exes who still work together professionally.
* The New Woody Woodpecker has an episode where Woody tries to delay Dooley so his pizza would be free. His efforts not only fail, but also ruin the pizza. When Woody tries to protest, Dooley says he guaranteed delivery, not satisfaction. Because Woody doesn't have the money to pay for the pizza, Dooley has him work off the debt as a delivery boy.
* The New Woody Woodpecker: In "Baby Buzzard", Buzz Buzzard reads an ad in the newspaper that Woody is starting a babysitting service for rich and famous couples. Buzz dresses himself in a bonnet and booties and acts like a baby as part of his plan to get Woody to babysit him so he can rob his house when he's not looking.
* The New Woody Woodpecker Show once found a Russian satellite that crashed and then he sold it to the junkyard for a few dollars. Later on, he learned the Russian Government offered five million units of their currency and he tried to get it back. After managing to get it back and take it to the Russians, he learned the money was worth less than the money he got when he sold it to the junkyard.
* The New World captains who come to the aid of Whitebeard during the Summit War. All of them are known for their terrifying infamy as pirates, but honour their debts to Whitebeard and come to his aid when Ace is threatened with execution.
* The New World could be considered one, as anyone who has been there then on refers to the first half of the Grand Line as "Paradise". Mind you, the first half

is crawling with dangerous pirates, many of which have some pretty badass superpowers,
* The New World is even more bizarre; there are islands with perpetual lightning storms, giant elephants with long legs touching the ocean floor as islands, massive man-eating planets with forests of cooked food to lure in victims, a place where you can inexplicably run on air, and apparently a
* The new World of Darkness core book reveals that the Apollo missions occurred to bring back the corpse of the Angel of Death from the moon.
* The New World of Darkness shies heavily away from the dense metaplot of the Old World of Darkness, where sourcebooks were like comic book issues: collect them all to have a hope in hell of understanding anything that was going on. While the New World of Darkness does have some metaplot elements, they are dramatically toned down from previous iteration.
* The New World Of Mr Tompkins: Justified with a Baby Universe where the gravitational constant is enormous. Inverted in Relativity Land, which should be a black hole if gravity still works the same despite the speed of light being 30 mph or less.
* The "New World Order" conspiracy theory is played both ways in the
* The New World version might be the mussarana, a large colubrid that likes to eat rattlesnakes. Of course, it's not particularly dangerous to humans itself, though it
* The New Worst Witch, Belladonna Bindweed's distinguishing physical feature is her waist-length hair.
* The New Year Song by Diskoteka Avariya. In this song, Grandfather Frost (Santa’s Russian counterpart) isn't evil per se, just shows up very, very drunk and doesn't watch his language much at what is supposedly a children's party.
* The New York City Subway has trademarked some, but not all of its lettered train services and, of course, all of the circular route bullets seen on signs and merchandise. This has the effect of preventing other transit agencies from labeling their services in a similar manner so, for example, you will only ever ride an F Train Brand Train in New York City. (In fairness to the MTA, the system it uses is tightly linked to the unique structure of the Subway—an amalgam of 3 different networks using two different building standards and running their networks through a small set of tunnels in Manhattan.)
* The New Yorker cartoons, such as one that has the palm tree replaced by a wind turbine and one castaway saying to another, "I miss the palm tree too, but at least we can have a refrigerator."
* The New Yorker, complaining, "I'm right there in the room, and nobody notices me."
* The New Yorker indulges in diacritical marks in a rather antiquated fashion.
* The New Yorker novels by saying "Dexter Morgan is one of the most likable vigilante serial killers in recent literature."
* The New Yorker shows a religious pilgrim walking through a dark tunnel with a glum look on his face. The caption explains that he has just learned that "the light at the end of the tunnel" is New Jersey.
* The New Yorker shows two kids watching as some policemen cart off a captured nogoodnik in this fashion. One of the kids proudly comments, "They don't mess around with Uncle Gus!"
* The New Yorker suggests that people who were pulling their money and assets out of Citibank were also returning their free toasters.
* The New York Giants and Brooklyn Dodgers played a special three-game tiebreaker for the 1951 National League championship after finishing the season with identical 96–58 records. In the bottom of the ninth of the third game, trailing 4–2, Bobby Thomson hit a three-run homer off of Ralph Branca to win the NL pennant. Thomson's homer is remembered to this day as
* The New York Jets and Kansas City Chiefs were tabbed as NFL Champions in 1968 and 1969. They were AFL champions and winners of the last two pre-merger Super Bowls.
* The New York Jets have been something of a case throughout their history. Their

only title win came in Super Bowl III, and they haven't made it back to the Super Bowl since then, no matter what kind of team they field. This has resulted in their being dubbed the "New York Jest".
* The New York Knicks have been to the Finals 8 times yet have only won the Championship twice: in 1970 and 1973. In 1994, they blew a 3-2 series lead in the Finals and lost the last 2 games to the Houston Rockets. They have also not been to the finals since 1999. After a terrible stretch where
* The New York Knicks use "Come with Me", Puff Daddy's contribution to the American
* The New York Mets baseball team is the butt of jokes and is overshadowed by the New York Yankees.
* The New York Mets have gotten this in the past few years. Oftentimes, they'll start the year playing fairly well, but by August or September, things will go wrong enough for them to be out. The worst of these were their epic collapses in both 2007 and 2008. They seemed to finally be averting this with a trip to the World Series in the fall of 2015 (their first since 2000), only to win only 1 game out of 5 and be soundly defeated—at
* The New York Rangers appear to be suffering from this; since the 2005 lockout, they've only missed the playoffs thrice. The problem is that each time into the postseason there always seems to be something to trip them up. 2006: Well, they just got back into the playoffs for the first time since 1997 - takes some of the sting out of a 4-game sweep by
* The New York Ripper in Britain, every single print got returned to Italy after the BBFC refused to classify the film.
* The New York Stock Exchange (fittingly nicknamed the "Big Board") have these all over the place, with a lot more running around and shouting from the spectators and never ending teletype ticker stock quotes, since every second counts when it comes to making multi-million-dollar trades on prices that can change at a moment's notice. With so much stock trading taking place by computer because they're way faster than any human broker can possibly hope to be the floors and visual big board are largely kept in place for tradition's sake.
* The New York Times described Wellstone's campaign style as, "[wearing] work shirts and jeans, Mr. Wellstone traveled the state in a rickety school bus, wrote his own speeches and stayed in people's homes rather than hotels." Boschwitz didn't hit the campaign trail in earnest until late October polls showed a gap of only a few percentage points separating the two, down from the large leads he had held throughout the year, though Boschwitz still usually polled ahead. Wellstone's everyman image struck a chord with voters, and he won the election by 48,000 votes and a margin of 2.5%.
* The New York Times got involved, writing in their "Topic of the Times" editorial section:
* The New York Times has a separate bestseller's list for children's books just because the
* The New York Times. MAD XL, a separate magazine reprinting older articles from the main publication, even named him an "Idiot of the Issue" in 2004.
* The New York Times Magazine. Three weeks later, another letter appeared in the same column: "Often your readers' questions are difficult to answer. Not the one from Justin in San Francisco — Yes!"
* The New York Times operated (before his semi-forced semi-retirement for health reasons in February 2015) on the "freemium" model as well (in this case, allowing subscribers to "read on" to more in-depth analysis more often) and actively evangelized for the system as the best way forward for digital news media.
* The New York Times used the controversy to bash Stephens, who had been highly critical of him in the past.
* The New York Times website and now part of ESPN, making him a promoted fanboy in a completely different field from his original interests.
* The New York Times would likely assume that the story took place in the suburb next to Berkeley, California.
* The New York Yankees interlocking NY (once shared with the Knicks).

* The New York Yankees of the 1970's weren't called "the Bronx Zoo" for nothing. Team star Reggie Jackson and team manager Billy Martin nearly came to blows in the dugout and had to be separated. Team captain Thurman Munson and Jackson did not get along, and that was no secret. And of course, owner George Steinbrenner, fired and rehired Martin multiple times. By some miracle of talent and skill, they found the time amidst all this dysfunction to win back-to-back World Series titles in 1977 and '78.
* the New York Yankees. When he went to take his position in center field on the Yankees' first trip to Boston that year, several fans threw paper currency onto the field - the TV commentators saw at least one $20 bill.
* The New Zealand alpine weta (an insect looking like a mutant grasshopper) freezes solid (the NZ mountains are COLD) every winter and thaws in the summer.
* The New Zealand Army provided extras for the final battle in front of the Black Gate. This was made necessary because the Black Gate scenes were filmed on an abandoned minefield. Behind the scenes commentary on the DVD makes note of how good these extras were at following directions and setting up formations, and how much enthusiasm they brought to the combat scenes. This led to a notable
* The New Zealand national team, the All Blacks, had not won the Rugby World Cup since the first tournament in 1987 despite going into every tournament as favourite, usually when ranked at number 1. They finally won in the 2011 World Cup which was hosted in their home country, but they struggled in the final against their opponent France, winning by just 1 point, even though they easily won when the two sides met in the pool stages. To put into perspective how strange New Zealand's lack of success in world cups is, New Zealand has a positive win/loss record against
* The New Zealand news company Stuff Limited ran a campaign known as "consequences" that depicted employees being humiliated for not breaking stories first, one of which included giving a male employees a hanging wedgie with a crane and leaving him to dangle over a group of runners.
* The New Zealand Story", and have a chance to escape in order to continue the game. If you make it to the end of this "hidden" stage, however, the game ends for real. You have to find a hidden exit in order to get out of this "nonstandard" game over. Escape and you have one last chance.
* Then explain," Hisao and Rin break up after an argument, and the last line of Hisao's inner monologue is about how much time he wasted on their relationship.
* The next and final event in his FATE route has Jungo secretly check up on the cat. The Protagonist can then suggest that he adopts the cat...
* The next arc throws a gut punch to the readers by showing just how divisive and corrupting a conflict of values can be when it applies to the overpowered main characters;
* The next big global compact sedan from General Motors is sold in Europe, and will be sold in the U.S., as the
* The Next Big Thing: a beautiful female illusionist and a temple priestess, who is actually a mummy brought to life with the use of the Book of the Dead. The main character Dan Murray spends a night of love with her.
* The Next Big Thing. A video game in development changes through every step of the process.
* The Next Big Thing called Krom-Ha. After that, he tells her: "Command me to kiss you, darling", to which she replies: "Ha ha ha, what a guy! Now do it, or I'll have you drawn and quartered".
* The next chapter has Bugs trying to set up Encyclopedia and Sally for a crime. This will usually involve a retelling of how Sally punched Bugs' lights out years before and thus he wants revenge.
* The next chapter is from Mort's and Antimony's perspectives. Curiously, even though they both seemed to be seeing the same things in the previous chapter, Mort's "case worker" looked like a guy wearing a cheesy vampire costume (possibly because we see it much earlier, moments after his death), while to Antimony it's a hideous emaciated vampire, mouth drenched in gore.
* The next day's strip has the homeless man take advantage of the pup, by now

wearing a sign reading: "Give Me Money or I Eat the Dog." His money cup is overflowing.
* The next day, Sun wakes up naked in bed to find Blake sleeping next to him. Just as she wakes up and they start cuddling again,
* The next day the Dean and Vernon meet up to split the cash. The whole thing was a scheme between them to rip off Charlie and Tiffany.
* The next day when Satou gets her cold, Kana returns the favor when she finds out he pretended to be sick to skip class. And she's
* "The Next Doctor" asked viewers to think of the perfect Victorian Christmas... but with Cybermen.
* "The Next Doctor": Infostamps are more primitive data cylinders uploaded into a Cyberman's chest.
* The Next Doctor" involves the Doctor taking on a giant steampunk Cyberman in Victorian London. The Doctor of course is in a hot air balloon.
* "The Next Doctor". It was also an actual mecha, because it didn't have a human brain in it.
* "The Next Doctor": The Cybermen attempt to convert Mrs. Hartigan. Problem is, she's too strong-willed, and dominates them instead.
* "The Next Doctor", who is so intelligent that she takes over the Cybermen and makes them her minions.
* The next dynasty didn't learn the lesson: one late Zhou emperor got his fool ass invaded because he'd keep
* The next episode filmed features much less of Padalecki's character, Sam, because post-wrist surgery, Padalecki was prescribed painkillers that left him a little loopy.
* The next episode opens with Choji getting kicked out of his house by his wife for being lazy and eating the sweets she bought for the family to enjoy, and almost losing an eating contest with Chocho in an attempt to when his wife's affection back.
* The next episode, the inspector declares his top-heavy tugboat unseaworthy, requiring him to go out and find another means of pushing/towing/hauling his new dredge downriver.
* The Next Food Network Star, and not knowing the difference can backfire on you in a major way.
* The Next Frontier and see a number of local worthies get into a very heated debate on what seems to be a political discussion show.
* The Next Frontier and the linguistics departments of every university in their home solar system working on the problem full-time.
* The Next Frontier applies or they use the same measurement system as humans.
* The Next Frontier has the odd reference to KBS News, the initials standing for Kerbin Broadcasting Service.
* The Next Frontier of exactly what it's a crossover with, and waits until almost halfway through Act 2 to drop the bombshell.
* The Next Frontier talks about his initial worries that the single career military officer assigned to an armed exploration ship owned by the civilian Kerbin Space Agency would have trouble adjusting to their much less formal way of doing things. As it turns out, Kurt manages pretty well: He's in the air force, who generally don't worry much about salutes and who calls who "sir" because it gets in the way of their actual duties when they're in the sky.
* The Next Frontier team sport that, for reasons probably involving hyperintelligent pan-dimensional beings with far too much time on their hands, bears an uncanny resemblance to the game of cricket."
* The Next Frontier; they're specifically looking for children's TV aimed at preschoolers, which is ideally adapted to give the linguistics departments of several universities on their home planet something to work with.
* The Next Frontier to be that size to carry enough fuel and other consumables for a multi-year interstellar mission.
* The Next Frontier warp drive, the narrative pointedly uses "hyperspace" instead of subspace. Quoth a plaintive footnote:

* The Next Generation also described the early scenes with the actors being washed up, bitter, and coasting on previous glory to be a "chillingly accurate documentary".
* The Next Generation, and has always been a totally scientific organization.
* The Next Generation and his back story, Miles O'Brien has been a tactical officer, flight controller, security guard, a transporter chief, tactical officer again (briefly), one of the greatest engineers in the galaxy, and then moves on to teaching at Starfleet Academy. Not a bad career path for an enlisted man.
* The Next Generation. An enemy who seems to outmatch the Enterprise orders his men to fire on the ship..... And John merely waves his hand, teleporting the enemy admiral to the bridge.
* The Next Generation are one of the few species shown that can't breathe normal air without a special device implies that their homeworld, Benzar, is not Earthlike.
* The Next Generation deals with a terrorist group who use a "folded-space transporter" in their attacks. There's a good reason such technology is not widely used: prolonged use causes humanoid tissue to break down.
* The Next Generation each other. An actual war was also mentioned to have recently been fought (offscreen) between the Federation and the Cardassians, with the current status some mixture of peace and a cold war. This state of affairs would continue until the next show, see below.
* The Next Generation enemy Romulan ships to save a Klingon outpost. They all died, but the act of courage impressed the Klingons enough to end decades of animosity.
* The Next Generation; every copy of the schematics is lost and everyone who knows how to make it is dead. Given that the Klingons considered it a treaty-violating potential planet-killing superweapon, there was probably political pressure not to rebuild it.
* The Next Generation feature two rival alien races called the Dorset and the Bader. The Dorset are a race of tall, thin artists; the Bader are stocky builders and engineers.
* The Next Generation first started broadcasting, there was some confusion over Will Riker's first name, with some people thinking he went by Bill. Troi does call him Bill a few times, but only in the first few episodes, and it seems to be a term of endearment that only she uses. This mistake even made it into some of the first licensed Next Generation novels.
* The Next Generation has rather long red hair most of the time, but she bobbed her hair for one season.
* The Next Generation has several episodes in which a planet's resident species is divided into factions in conflict with each other. One episode has a planet with two intelligent species, only one of which wants to join the Federation.
* The Next Generation, it was mentioned that the Federation had negotiated away its right to use cloaking technology in a treaty with the Romulans, making the Federations research into the phase-cloak illegal (i.e., a treaty violation that could lead to war with the Romulans). The episode showing the Romulans were working on it themselves showed that it was giving them trouble, and the illegal Federation project Riker had been a part of had not ended well either.
* The Next Generation) makes liberal use of hyposprays that knock people out almost instantly. Justified by being set 400 years in the future; they clearly have new drugs that provide safe, rapid means of anaesthesia. And the hypospray device itself presumably has sensors that allow it to instantly calculate the correct dose based on the target's height, weight, and species.
* The Next Generation — she reads the stage directions along with the part.
* The Next Generation -Patlabor-, as most of the original cast have retired from the SVU by then.
* The Next Generation -Patlabor-: The live-action sequel of the Patlabor series, based on the movie timeline.
* The Next Generation; Patrick Stewart had to seek a doctor because they were playing hell with his back, and they were also extremely hot and uncomfortable under the studio lights.

* The Next Generation. Picard is the diplomatic and distant leader, while Riker leads the away missions and is usually the one to get into the rough-and-tumble situations. Riker is also the one who deals with most of the crew discipline and assignments.
* The Next Generation's made it a requirement that whenever a guest star first put on their uniform, they had to stand in front of the cast and proclaim, "I hate my space suit." Afterwards, they were officially one of the family.
* The Next Generation's navigational shields, let alone the main shields.
* The Next Generation so it obviously never came from anything that was ever alive except in some kind of cosmic sense. The replicator uses transporter technology to rearrange the molecular structure of some kind of raw material (basically any sort of solid matter) into the molecular structure of edible food. This process can also be used to fabricate tools and spare parts.
* The Next Generation. Then Wesley, who was playing with other kids, accidentally breaks a greenhouse window and it just so happens that's where the moderators check at that moment...
* The Next Generation. This is, admittedly, slightly complicated by the fact that the Federation is described as a classless utopia without currency where people work for the common good - a pretty common vision of a Communist utopia. We never learn what economic system is used, in contrast, by the Cardassians.
* The Next Generation to "stabilize" the empire (to their advantage); however, once the clone learns his real nature, he turns out to be an honest sort who tries to fulfill his position as sort-of-but-not-really Kahless honorably (think less "second coming" and more "heir to his legacy"). Generally, the different Trek series treat the Klingons' faith in Kahless in a positive light.
* The Next Generation (where Picard arbitrarily decides to take it down to the planet where B-4's parts are located).
* The next happened during Chapter 2, where there was a 4- or 5-year jump.
* The next happened in chapter 7, during the month Shinji spent absorbed into his robot and it was narrated in the side-story "Friends or Rivals". Asuka went to Rei's apartment and they got into a fight. After beating the crap out of each other, ruining Rei's living room and being taken to NERV med bay they realized they had done something very stupid and made up.
* The next is a robber by Josuke, but he doesn't die and instead gets a knife through his stomach thanks to Josuke's ability.
* The next is Kakyoin, who gets punched through the stomach and spine by Dio,
* The next is the Wildhammer dwarves who live above ground, live at peace with nature, and ride gryphons as a major part of their culture. They were the representatives when dwarves were first added to the franchise in
* The next item on the city council's agenda was an update on the discrimination lawsuit from its legal counsel. Since the consul is a party to the suit, his diplomatic immunity should make things interesting.
* The Next Karate Kid but without the director and screenwriter of the first three films.
* The Next Karate Kid, forcing her to practice her reflexes and blocking motions.
* The Next Karate Kid, Mr. Miyagi takes on Colonel Dugan. Each of Dugan's thrown punches are prefaced with a very obvious pause, even when they're the lead-in of a cut to a new camera shot.
* The Next Karate Kid. Ned gets jealous of Julie and Eric hanging out and challenges Eric to a fight.
* The next level is the "All-Good" challenge, which is essentially clearing a song with the best rating being "Good". It gives you very little margin for error in terms of lower ratings and results in clearing a song with a score of zero.
* The Next like to think of themselves this way, but they fall into the same problems the humans they're descended from do. While they're hyper-intelligent, they still have human emotions, they still can't agree on positions, and some of them still believe they should be rulers of the known multiverse. However, they are more communal, disagreements rarely lead to physical conflict, and when something needs doing they'll just get along and do it because their intelligence leads them

all to the same conclusion: It needs doing, so we might as well get on with it.
* The next mission 'Heat', Gaz will yell that you're going to be left behind if you
* the next morning she reveals herself to be a Reaper sent to torture and kill him. He's revived, she's killed.
* The next movement comes many chapters later when Doflamingo finds out that in spite of how smart he was, he severely underestimated exactly how massive of a
* The next problem is that the Army's helicopters lacked sufficient navigational equipment to find their way across the wide featureless desert in the dark. So the decision was made to use Air Force MH-53E Pave Low helicopters, designed to allow Air Force Pararescue airmen to slip into enemy airspace to pick up downed aircrews without being detected. They featured the latest in navigational equipment, including GPS receivers, and sophisticated electronic countermeasures suites for avoiding enemy radar detection.
* The Next Reaper has two. Death is the first, while his son Grim is his successor.
* The next scene: Butch is driving back to the hotel he and his girlfriend are hiding out. He stops at a light, and who should cross the street at that exact moment but Marcellus Wallace, the man who put the hit out on him, who was out getting coffee.
* The next season features Pollun's younger sister Lullun who is even more annoying than Pollun himself. When she is introduced, she takes almost all of Pollun's annoying attitude.
* The next season saw Clemson return to its Clemsoning ways. While the Tigers returned to the College Football Playoff, they had no answer for Bama in the Sugar Bowl, losing 24–6.
* The next season, the Colts finished tied for the Western Conference crown with Green Bay and had to play a special tie-breaker playoff without star quarterback Johnny Unitas and backup Gary Cuozzo; forcing Baltimore to use
* The next series had one for an odd line in the very first book about Percy being the son of Nemesis, a
* The Next Star, YTV would run ads for it like clockwork, whether they be for auditions, the premiere, the finale, the promo that the contestants did during one episode, etc. It got annoying pretty fast for those who weren't interested in the show.
* The next step up is the Team Gulp; it holds a hefty 128 fluid ounces or a
* The next strip is a montage of Axel training, complete with The Eye of the Tiger in the background.
* The Next Three Days is about a man trying to break his wife out of prison for a crime that he feels she did not commit.
* The next time Fugate appears, Batman has learned from the above mistake.
* The next time Moist appears, he thinks he's getting the same treatment. So he borrows a pencil from Drumknott and gently tosses it through the door...
* The next time they visit Narnia a year later in Earth-time, hundreds of years have passed there, and
* The next time was the same character invoking this lesson to the other pirates who were about to invoke their rule "He who falls behind gets left behind". Of course, she might not be a pirate, but they are, so they keep to the code.
* The next time we see her, Dresden immediately knows where she's going to be at the meeting place (an Aquarium) after she's vanished from where she was supposed to be sitting - the otter pens. As he explains to Kincaid, "She's a kid. Kids love cute."
* The next video shows a young man trying meth, also saying that he'll only do it once, as he doesn't want to be like "that guy", a meth-addicted psycho, which scarily resembles him. He then tries meth once again, also with the same promise. Repeat a few times with the man getting more addicted, and he ends up being exactly like "that guy". In the end, a young girl buys some meth with the promise of only trying it once, as she doesn't want to be like "that guy". Which is obviously the guy before.
* The next villain after that, Majin Buu, is a murderous, magical demon who can

reform himself from a single piece of himself, and can reform himself if he is blown apart into a million pieces, or even air vapour. A single cell? All he needs is a single
* The next villain, King Sombra, is hard to place. He's certainly stronger than Chrysalis (who even powered up struggled with Celestia, while King Sombra took
* The next year, Carpenter did it again when the Cardinals were down 6-0 in Game 5 of the National League Division Series. He told everyone in the dugout, "This is going to be such a great comeback..." And then the Cardinals won 9-6 against the heavily favored Washington Nationals.
* The next year, Mary Jane plays the main role herself when the men who play Santa aren't available. She dresses up as
* The Nexus became a lot more vicious in the ring. And Michael Tarver...well, actually became awesome, especially after the booking on NXT Season 1 did everything to make you think he wasn't.
* The Nexus for having long red hair similar to that of the Wendy's hamburger chain mascot.
* The Nexus may not have been the largest man in that nine-man group, but he was definitely near the top of the list.
* The Nexus NXT would eventually take on a standard wrestling show formula, becoming much more popular when it did, making WWE's first effort that much more hated. These days, few wrestling fans will admit that they ever had any interest in The Nexus.
* The Nexus once had the gimmick of the 1.9 second punch, a punch that would instantly KO anyone.
* The Nexus Series: Imagine a cold war based around mind-hacking instead of nukes and you're halfway there.
* The Nexus Series. It's the year 2040, and one of the newest drugs on the street is Nexus 3, a concoction of nanomachines that temporarily creates a brain machine interface (BMI) for the user that allows them to run software on their own brain.
* The Nexus Series, much of the plot involves the actions of the Emerging Risks Directorate (ERD), an agency created to fight all forms of transhuman technology and those who would exploit it. The agency came into being after Neo-Nazi cloned children tried to kill an entire town with an engineered virus, only failing in killing millions because they released it too early. For reference, neither the DHS or the CIA trust the ERD.
* The Nexus Series. Things are a bit more liberal in the east however.
* The Nexus Series. We see some software programs being run on nexus, including a dating app that makes you say the right lines, a porn VR that controls your motor cortex to help you perform, and most notably, a fight game "Bruce Lee" given to main character Kade by Rangan to help him in tough situations. Notably, while the dating sim gets results, the porn VR glitches out at the worst time, and Bruce Lee usually get's Kade's ass kicked. The most successful app is Kade's serenity package, which modulates his neurotransmitter levels to keep his pulse under control and prevent people from knowing when he's lying.
* The Nexus. Since they were "Legends" and not "superstars", this was perfectly acceptable.
* The Nexus's New Nexus and the Corre, neither of which were nearly as popular or successful as the original Nexus.
* The Nexus supposedly doesn't let the Heroes die permanently so that they can be forced to battle for eternity
* The Nexus/The New Nexus/The Corre, Mason Ryan (Barri Griffiths), Ezekiel Jackson (Rycklon Stephens)
* The Nexus was released almost immediately, but brought back as an enemy of The Nexus.
* The Nexus who got together to take over WWE in the summer of 2010. All but two of its members (well-established second leader CM Punk and temporary "slave" John Cena) made their individual debuts in this decade. Spin off group "The Corre" debuted in 2011. Ezekiel Jackson, the only member who did not come from the Nexus, debuted in WWE in 2008.

* The Neyaphem, a race of exiled demonic mutants led by Azazel, who is also the father of Abyss, Kiwi Black, and Nightcrawler.
* then Felix after Doyle's death, and Locus after Felix's. It's also confirmed that the swords are alien artifacts that are, in fact, primarily intended to be keys.
* The NFL adopted new overtime rules for postseason games starting in 2010, and extended them to regular season games starting in 2012. If a team receives the opening kickoff and only scores a field goal, the game doesn't end until after the ensuing drive. A touchdown ends the game instantly, as does a safety. The game ends on the second possession with any result that is not still a tie. If the game is still tied after the first two possessions (either due to no scoring or matched field goals), the game goes to sudden death, usually labeled as "next score wins". This rule was first used in the playoff game on Jan. 8, 2012 between the Pittsburgh Steelers and Denver Broncos, in which Denver scored on an 80-yard touchdown pass-and-run on the first play in overtime, meaning it took longer to announce the new overtime rules than to
* The NFL advertised the competitive nature of their sport by using Edwin Starr's "War" to promote the league. However, they were careful about it in that they simply repeated the "War" portion of the song while stopping short of the "What is it good for? Absolutely nothing!" portion.
* The NFL also has the penalty of "extraordinarily unfair act". It's basically the same as a "palpably unfair act", but more extreme and thus allowing for penalties beyond the game in which it occurred. In this case, the team can be fined and/or have draft picks revoked, and the player(s) involved can be suspended for however many games the NFL Commissioner deems appropriate.
* The NFL blog "Kissing Suzy Kolber" does this with their fictionalized Pittsburgh Steelers wide receiver Hines Ward (an Korean-African American) character.
* The NFL celebrated its 100th season in 2019, kicking off the season with the Chicago Bears (the only team to play in every season of league play) hosting the Green Bay Packers in the league's longest-running rivalry. Additionally, the league scheduled a weekly game honoring landmark moments in NFL history (
* The NFL celebrated the 50th anniversary of the AFL in 2009 (the 50th season of the eight founding AFL franchises), and those teams wore AFL-era throwbacks. This caused an interesting situation with the New York Jets and Tennessee Titans; the Jets threw back to their earliest seasons as the New York Titans, facing the Titans who threw back to their days as the Houston Oilers.
* The NFL, claiming to own a trademark of the New Orleans Saints catchphrase "Who Dat?", sent cease-and-desist orders to New Orleans-area shirt vendors selling unofficial "Who Dat?" shirts shortly after the Saints entered the Super Bowl. This led to
* The NFL has been challenged by several rival leagues, among them the American Football League, the United States Football League, both versions of
* The NFL's Buffalo Bills held a slim 21-17 lead in the closing seconds of their November 29, 1998 game against the New England Patriots. With six seconds left and at the Bills' 26-yard line, Patriots quarterback Drew Bledsoe heaved a long pass (known as a "Hail Mary" due to the difficulty in completing it) for the end zone that fell incomplete as time expired, but the Bills were called for pass interference. NFL games cannot end on a defensive penalty, so the Patriots got one more untimed down from the Bills' 1-yard line which Bledsoe used to throw a touchdown pass to put themselves up 23-21. The Bills by this point had seen the replay showing that there was no interference, and were incensed when the refs tried to force them to come out and play the extra-point conversion even though it was nigh meaningless.
* The NFL's New England Patriots during the era of Bill Belichick and Tom Brady. After the "Spygate" incident during the 2007 season, the Patriots were disciplined for videotaping the New York Jets' football signals with NFL commissioner Roger Goodell ruling that it was a violation of league rules and fair play; the NFL fined Belichick $500,000 and the Patriots $250,000, and took away their first round draft pick. In the long run, this proved to be ineffective, when after missing the 2008

playoffs, they would win the #1 conference seed and home field advantage throughout the playoffs in 2010 (14-2), 2011 (13-3), 2014 (12-4) where they defeated the Seattle Seahawks in Super Bowl XLIX, 2016 (14-2) where they made a second half comeback to defeat the Atlanta Falcons 34-28 in overtime, and 2017 where they held on to the #1 seed en route to Super Bowl LII, only to narrowly lose to the Philadelphia Eagles 41-33. Ultimately averted in the 2020 season, where, having lost Tom Brady (who had gone to the Tampa Bay Buccaneers and proved to be exactly as useful as a 43-year-old man in a young man's sport usually is), they collapsed and missed the playoffs for the first time in a 12 years.
* the NFL. The original team moved to Baltimore and became the Baltimore Ravens, while a new team began operating under the old Browns banner three years later. While the new Browns team was originally stocked with personnel in the way that expansion teams usually are, the NFL considers the Browns to be one continuous franchise that "suspended" operations for three years, retaining all the awards the team had won prior to the move. Made even more confusing by the fact that this isn't the norm for the NFL; in most cases, a team that moves from one city to another is still considered to be the same franchise (Baltimore/Indianapolis Colts, St. Louis/Los Angeles Rams, etc.), but there was such an uproar at the idea of taking the Browns out of Cleveland that an agreement was eventually struck by which owner Art Modell would take the team and form a new franchise, while the franchise name and records would remain in Cleveland so that a new team could be built under the "Cleveland Browns" banner.
* The NFL used to air a commercial where a woman dressed to the nines in New York Giants gear greets her fellow female Giants fans with high-fives and cheers. When the last girl appears wearing (rival) Jets gear, they greet each other coldly
* The NFL went on to celebrate its 75th season in 1994; in addition to a league-wide anniversary patch, most teams wore throwback uniforms for at least one game. (Cleveland and Indianapolis opted not to wear throwbacks as their current uniforms were their most iconic, while Tampa Bay didn't have any older design to throw back to at the time).
* Then French prime minister Jean-Pierre Raffarin once held a conference in front of the European Popular Party, hoping to bring more people in favor of the creation of a shared European constitution, his argument?
* Then Gin sliced Hiyori in half, and cranked this trope up for Shinji, who directed his ire at Aizen, not Gin: Gin was just the subordinate doing Aizen's dirty work, so Aizen was the real threat.
* Then Goku tried it again after defeating Frieza after his legs and arm had been cut off, and actually gave him what he figured was enough power for him to live and escape the about-to-explode planet. But apparently this time Goku forgot that Frieza had committed genocide on at least two different occasions, and as soon as he flew off, Frieza used the energy he received to take one last shot at him. And then Goku demonstrated just WHY he could take that chance; because when Frieza tried shooting him, he responded by turning around and shooting an energy beam at Frieza, killing him. Or... not, as later episodes show.
* then got a gang of other department store Santas to beat him up when he tried to leave work.
* Then got retooled when Ennis took over and handwaved the Heaven Arc and made Frank Castle a badass normal again, followed by a back to basics approach.
* The NGO War Child estimates that there are 250,000 child soldiers in the world today.
* then gunned down on the steps of the precinct (by his other son, no less.
* then have to make a do-or-die sword throw, otherwise you'll get killed even if you defeat Kraagenskul.
* Then he demonstrates said juicer, which Dr. Nick shouts is "WHISPER QUIET" and acts incredulous at the fact that only one drop comes out of the machine. "You got all that from one bag of oranges?"
* Then he died on what was implied to be a quest bed — which means he'll come back to life as god-tier.
* Then he ends up in Wanda's reality and they're in a relationship again. Then the

world goes to hell, the Bobbi in
* Then Heero himself is thrown into the mix as well. Former child soldiers who can keep the military aspect of
* Then, he gives an opportunity to the Calgary Kid to become a WWE superstar. However, after joining WWE, he reveals himself to be the American wrestler
* Then he hiccupped, making a magician's saw cut him in half (a symptom of trick-ups is doing a magic trick every time one hiccups). Jorgen then commented he literally was half the man he used to be.
* Then, he made fun of the Canadian history, followed by the pledge of allegiance.
* Then he offers her tripe but takes that offer back for the same reason.
* Then he picks up the phone, and his client is still on the other end.
* Then he plays a crucial role in O-Chul and Vaarsuvius' plan to destroy Xykon's phylactery, and gets a promotion to major character.
* Then he proceeds to shoot the gas tank, put on his glasses, and do an
* Then her captors find out and force her to marry one of them instead, a terribly ugly dwarf. He's actually a decent person, but Sansa hates his whole family because of what happened to her father..
* Then he receives a second (handed to him) by Kotone, which he thinks is about another challenge, but is surprised to find is an actual love letter, only to get it ripped out of his hands only moments after he's read it by who he thinks is Kotone, but is actually her twin sister Akari who challenges him to meet her at a shrine by his house. He finds that Kotone actually does like him (to the point of being a complete stalker) and Akari is trying to keep from being requited. The challenge was more about his curse though.
* Then he spins around again and winds up face-to-face with a monster.
* Then he staked her and burned her alive. She got better... Interestingly, their relationship subsequently improved significantly.
* Then he starts going off on his plan to Enslave the Tri-State Area... I mean... Engrave my pie-plate carrier!
* Then he starts manifesting the Quirks of previous One For All users.
* Then he stopped doing that and went to work for Horizon Labs, putting that brain of his to work.
* Then he strikes again in the DLC case, when a witness starts insulting birds. Of course with Blackquill being such a bird-nut, he's not too happy about this and objects to it.
* Then he tries ramming the blade vertically into the side of the tree like he's trying to split the tree down the middle.
* Then his father burned his face off and kicked him out of the country as punishment for his idealism.
* Then his wife catches him pouring dry dog food into the toilet and asks him what he's doing.
* The NHL All-Stars skills competition has events that are worth 3-5 points each, until the Elimination Shootout- during which 12 players per side each try to score against an opponent's goalie in a penalty shot for one point, and those who score get to shoot again in the once all other players have shot. Of course, this doesn't render the previous rounds completely worthless, as even though no lead is insurmountable, you still need to score the goals in order to make up that ground, so the larger the lead, the more difficult to overcome it.
* The NHL also has victory songs, with a particularly notable example being Laura Branigan's "Gloria" after St. Louis Blues wins.
* The NHL celebrated its 100th anniversary in 2017 - from January 1st to December 31st, straddling two seasons - by having teams wear the centennial anniversary patch on their right sleeves. This included a pair of outdoor games specifically to celebrate the anniversary - the Centennial Classic on January 1st, and the NHL 100 Classic on December 16th.
* The NHL did something similar for visors beginning with the 2013-14 season. Again, those in the league already playing without visors are allowed to continue playing without them.
* The NHL is also beginning to acknowledge this, especially after several players

like Derek Boogaard, whose primary role was
* The NHL itself was the result of a long-running dispute in the predecessor National Hockey Association between Eddie Livingstone, principal owner of the Toronto Shamrocks and Toronto Blueshirts, and the other owners of the league (Montreal Canadiens, Montreal Wanderers, Ottawa Senators, and Quebec Bulldogs). The other owners realized the NHA's constitution meant they couldn't expel Livingstone, but they could vote to suspend the NHA (officially because too many of their players were overseas fighting in
* The NIA (a combination of every scare story about the CIA and NSA) in
* The Nibblonians are an ancient and powerful race, dating back to the beginning of the universe. Also the sworn opponents of the Brainspawn, who want to destroy the universe. Unfortunately, their cuteness means that no-one takes them seriously and people generally devolve into baby-talk around them. Not helped by their propensity for playing into this trope heavily (i.e. "Kitten-class starships").
* the Nibblonians (specifically Nibbler) froze him on purpose and would be watching over him/protecting him so he can save the universe in the future.
* The Nibblonians were already seventeen years old by the time of the Big Bang, while their nemeses, the Brainspawn, came to existence a few milliseconds after it.
* The Niblonians will eat anything that isn't considered sapient and have an apparent fondness for Earth animals, even those that aren't considered food and are much larger than their bodies (though they are capable of swallowing these animals whole). Also, they believe
* The Nice And Accurate Prophecies of Agnes Nutter, Witch work a bit like this:
* The Nice Guy, Kirby loudly declared the story to be bullshit, stating that's not how the events happened. Why is that?
* The Nice Guys for March to solve his downed pants ensue ("Turn around!" "You realize there is a mirror here, right?").
* The Nice Guys is the voice of the bee that Holland sees when he falls asleep at the wheel.
* The Nice Guys, March wraps his hand in cloth to punch through a window to unlock a door and immediately cuts his wrist open. Cut to the ambulance.
* The Nice Guys, one of the main characters has a backstory that involves stopping a robbery at a diner.
* The Nice Guys. One of the private detectives goes to break a glass pane in a door as part of breaking into a building. He carefully wraps a cloth around his hands to protect them... and slices his entire wrist open on the jagged shards left when he punches through the glass. He nearly dies from blood loss.
* The Nice Guys: Opens with a kid secreting a magazine from his sleeping father's stash. He later meets the centerfold when she crashes into their house.
* The Nice Guys, where only the last scene, months after all the chaos that happened, is set during Christmas.
* The Nice Guys with Holland's hatred of a particular phrase. For example, when his teen daughter Holly sneaks into a sex party that he's casing:
* The Nicelanders are fairly justified in not wanting Ralph to join the party at their building, considering he
* The Nice's song "Azrael" is about the Angel of Death (its alternate title).
* the nicest person in the world but he's never disloyal to his family or realm.
* the nice suite in Tenpenny Tower, you have to nuke Megaton for Mr. Burke.
* The Nicholas Book, when the villain attempts to stab the children's rescuer, Joshua strikes the former hard on the head with the largest book he can find. This gives their rescuer the upper hand for a moment.
* The Nick At Nite Rerun. The episodes used were from the "Not Ready for Primetime"-era (fall of 1975 to spring of 1980), though episodes from seasons four and five were shown more often than seasons 1-3.
* the Nickeleon show the smokebombs to escape Shredder, it turns out Michelangelo wasted all of them. Donatello made more in the following episodes through.
* The nickname also refers to the fact that she just generally terrifies dragons... and pretty much everyone else.
* The Nickname Game had the protagonists as a pair of Nicknamers. Most of the book

is spent trying to come up with a good nickname for the new girl.
* The Nicknamer: A character who is known for coming up with nicknames for other characters, which could be because they have trouble remembering or can't be bothered to remember their actual names.
* The Nicknamer: Character comes up with nicknames for characters they frequently encounter but never directly interact with.
* The Nicknamer for everyone she meets, not unlike the Vegeta example above.
* The Nicknamer is in effect in this universe this is actually quite a good strategy (some enemies are actually weakened by being referred to by nicknames).
* The Nicknamer relationship; "Peaches", "Poof" and "Captain Forehead" being his usual go-tos.
* The Nicknamer Subaru calls Hokuto "Hokke", Makoto "Ukki", Mao "Sari", Hajime "Shinonon", Midori "Takamin", Tsukasa "Kyashi", Yuzuru "Fusshi", Chiaki "Chi-chan-senpai", Adonis "Occhan", Souma "Zaki-san" and Koga "Gami-san".
* The Nidmuzug, or, more plainly, the Unclean. Humans who ate food contaminated by the spiritual taint that all Nidmuzugs emit and found themselves turning into were
* the Nidraa'chal push back the Owl faction (allies of Du'vantir from a neighboring city all wearing wingsuits) effortlessly, proving to the rest of the Drow that Felde can stand on its own, but in the process Snadhya'rune and Kalki both separately and very publicly lose their tempers, go on a rampage, and end up alienating their allies by showing their true colors, thereby breaking their true currency of power - fake trust, and in the process causing Snadhya to kill Kalki.
* The Nifty Ninties, Minnie Mouse cries massive gobs of tears while watching an emotional slideshow.
* The Nigerian trickster god Edshu: In one story, he walks down the road wearing a hat that is red on one side and blue on the other. When people on one side of the road ask "Who's that going by in the red hat?", they get into fights with people on the other side who insist that the hat was blue. The god takes credit for this, saying "Spreading strife is my greatest joy."
* The nigh-inseparable couple of Geoff and Bridgette, both avid surfers and beachgoers with incredibly kind, forgiving, and laidback personalities.
* TheNight130, Jim is Cinderella's younger brother but he doesn't agree with his sister's relationship with Esmeralda. Jim finds a way to break them up so that they're literally unable to reunite.
* The Night After to go on completely unaddressed until circumstances ensured he couldn't ignore it anymore.
* The Night Angel Trilogy, because their target's death is assured as soon as they accept the contract. "Assassins have targets because they sometimes miss."
* The Night Angel Trilogy essentially puts this together. Some of them become his bodyguards, others go back to the life they had for a bit, but mostly, he does this to redeem the once crime-ridden country and give it hope for a corruption light future.
* The Night Angel Trilogy proposes to her twenty year old adoptive father who she has a crush on days before her twelfth birthday.
* The Night Angel Trilogy, there's a bridge in Khaliras made entirely out of skulls and magic. The only real point of the skulls is to intimidate and show where the bridge actually is (it's possible to cross it with the skulls gone). Did I mention this bridge crosses what appears to be a mile wide bottomless chasm, and is the only way into the castle?
* The Night Angel Trilogy there's a whole list of these, including an ancient technique for forging swords and jewelry and everything ever made by Ezra the Mad.
* The Night Angel Trilogy, the Sa'Kagé is a particularly strong version of this.
* The Night Attack of Târgoviște had the forces of Vlad the Impaler attack the Ottomans with the night as cover, led to around a 1:3 death ratio in favor of the Wallachians.
* The Night B4 Christmas: The jail cell the music group were placed in is at least wide enough for Elvin to fit through, though he never gets himself out this way.
* The Night Before Christmas come alive on Christmas Eve for a song and dance

party.
* The Night Before: Flashbacks take place from 2001-2006 plus some in 2008.
* the night before he was due to marry Kory. It was also revealed that in an earlier point of their relationship, Babs went to deliver him flowers but instead bumped into Kory (who he'd just had sex with as his "first time"). These revelations were meant to explain why the engagement plot point became nullified in the "One Year Later" timeskip. Instead, it just complicated the issue and only gave fans the impression that Dick was an unreliable and indecisive cheater.
* The Night Before Krampus by Peter Johnson has a pair of Krampus coming to make the protagonists pay for the sins of past generations.
* The Night Belongs To Us: Among the vampires: Miss Chief resents her sire, Ada, but more for leaving than for turning her. Ada, in turn, hates her sire, Gustav von Heiden, because she isn't keen on immmortality.
* The Night Belongs To Us are cartoonier in style, and almost all in monochrome/sepia with a few muted colors.
* The Night Belongs To Us home, she has to drop off/throw Hank into the hallway because she can't cross the threshold.
* The Night Belongs To Us, the doctor Molly Yamamoto is called by her best friend who requests help for a werewolf issue while Molly is tending to a patient. Molly responds as if she is talking with a another doctor about a lab that analyzes some samples... And still manages to convey all necessary information.
* The Night Belongs To Us wants to kill Ada) after Ada eventually left/ broke up.
* "The Night Billy Raised Hell": Billy is gunned down by the police the second he's released from captivity.
* The Nightborne and Nightfallen have networks built throughout Azsuna and Suramar to control and redirect ley lines. A key part of the Nightfallen quest line is redirecting them to feed the tree which cures their magical addiction.
* The Night Circus by Erin Morgenstern has short, page-long portions in second person, which allow you to experience the circus "first hand."
* The Night Circus, Isobel is in London because she fled such a match. She had to sell her engagement ring for the money.
* The nightclub shooting also led to Universal delaying the release of any new announcements they had concerning
* The Nightcrawler's "Push the Feeling On" (the dub mix and subsequent remixes): "Ir in their lives again ir in their li to pull us" ad nauseam.
* The night elf mission Awakening of Stormrage expects the player to reach Cenarius' horn and awaken Furion Stormrage before the undead chop down all the trees blocking the way to his sleeping place. It and the undead base are placed across gaps to keep the player from reaching them, but it is possible to cross the gap with a Scroll of Town Portal and clever placement of the right building. Actually attacking the undead base requires destroying some of the trees they are trying to cut down. The undead base isn't especially well defended, except for that fact that is guarded by Tichondrius, a level 10 special
* The Night Elves are an odd example, in that the decadent ones (high/blood elves) are the defectors when they lost the civil war. Several blood elf
* The night elves are an unholy mashup of Classical Greece and Feudal Japan, with some Nordic and Celtic elements as well. Fluted columns stand side by side with torii in many parts of their lands. Also, the style of dress of night elf male aristocrats greatly resembles Japanese court robes: but, being elves, their fashion sense is more androgynous than any real-world culture aside from the Babylonians and/or Byzantines.
* The Night Elves are no longer immortal after the destruction of the World Tree. However, with the sweeping changes and threats to Azeroth recently, their culture has changed from their static ways of druid sleep into a far more active one; becoming a dying race has them more active and powerful than ever before.
* The night elves are one of the few notable exceptions. For the vast majority of
* The Night Elves' military, the Sentinels, is comprised solely of women because the race's men study druidism and spend centuries at a time asleep in the Emerald Dream. Over the course of the campaign male Night Elves join the battle, but only

as support casters (
* The Night Flier: As a vampire story, it makes a lot of use of this. Mutilated, bloody corpses are frequently seen, the Night Flier writes messages in blood, and the inside of his airplane is covered in blood, dirt and maggots.
* The Night Flier Dwight accosts Richard Dees in an airport bathroom. First Dees hears his footsteps and his fly unzip, then watches in the mirror as a stream of bloody urine appears from seemingly nowhere in the urinal behind him.
* The Night Flier: Dwight Renfield looks like a gentleman in a big black and red cloak with a high collar. However, it subverts the trope in that he always morphs into a decidedly unpleasant-looking batlike monster when about to kill.
* The Night Flier: Far from a handsome gentleman, the vampire Dwight Renfield will always appear as a barely-human bat-like monster to his victims.
* The Night Flier for the vampire, who prefers smashing every mirror he sees.
* The Night Flier: In a departure from the short story, in the climax, Dees demands to see the vampire's face, who then sends him into a trance so the protagonist can witness a glimpse of Hell, where he's mobbed by the deceased people he profited from in his life.
* The Night Flier: One of the vampire's victims, an elderly woman, is brainwashed into a girlish infatuation with him. She calmly sits on the front porch of her house as her husband is murdered in front of her, then walks back inside and waits for the vampire to devour her too.
* The Night Flier: Richard Dees is a sleazy and cynical tabloid reporter with few lows he would not stoop to for a story, with trespassing crime scenes and desecrating gravesites being some of his lesser crimes. After promising his new colleague a by-line for her assistance in tracking down the Night Flier, he screws her over by locking her in a closet.
* The Night Flier: Richard Dees is a tabloid reporter who has been searching for something supernatural all his life, and has become rather weary of all the cryptoid tales as a result. When he finally runs into a real vampire, the latter notes that meeting him is Richard's destiny, even if it were to kill him.
* The Night Flier: Richard Dees works for a tabloid magazine that specializes in things like UFO sightings and satanic rituals to draw in readers.
* The Night Flier to get the details about a grisly double murder from a local sheriff.
* The Night Flier-type magazine who uses a lot of dirty tactics to get stories, often breaking laws to investigate crime scenes. He's not above screwing his colleague over either. His sole motivation throughout the movie is to get his name back on the front cover.
* The Nightfly came out in 1984, which once again became a must-have for early adopters.
* The Nightfly, focused on mortality with a side of dystopia — ending up as a concept trilogy spanning adolescence to old age.
* The Nightfly of the optimism of the 1950s and early 1960s (albeit one leavened with hints of the darker developments just around the corner). From the liner notes:
* The Nightfort of the Wall has had a decidedly nasty reputation for ages. Partially for which it was eventually abandoned centuries ago. The
* The Nightfort, where Bran and company pass the Wall, is supposedly haunted by the Rat Cook, who violated
* The Nightfoxes, a group of District 5 rebels led by the brother of Foxface who cripple Panem's energy sources by blowing up or hacking into power plants.
* The Night Gardener, Alastair Windsor spends most of the book picking on his little sister. Near the end, he throws Kip's crutch — the only thing he has from his now-dead father — into the river. Luckily, he changes for the better not long after.
* The Night God Screamed (1971) has a group of Jesus Freak hippies kill a local preacher and then stalk his wife after her testimony gets their leader jailed.
* The Night Guard currently protect Luna and Celestia, but they were originally a set of separatists who thought Princess Celestia was a tyrannical overlord and

Nightmare Moon was trying to implement a republic. They promptly repented and switched sides when they found out how horribly wrong they were.
* The Night Gwen Stacy Died #121) as the story that marked the end of the Silver Age and the beginning of the Bronze Age of comic books.
* The Night Gwen Stacy Died, they have to replace the iconic setting with a clock tower because people have already seen the familiar set up with Mary Jane too many times. They also replace Norman with Harry. Don't expect a 100 percent faithful adaptation anytime soon.
* The Night Gwen Stacy Died was already bandied about when he became the writer, and he was simply the guy who executed it. He admits that he thought Mary Jane was a better love interest for Peter, but more to the point, felt that the death of beloved Gwen Stacy would be another defining moment for a character defined by tragedy. As he says, "tragedy and pathos are meat and potatoes to a guy like me."
* The Night Gwen Stacy Died, with her death being a permanent fixture of the mythos.
* The Night Gwen Stacy Died without any of the maturity and character he developed from being forced to accept the consequences of his actions.
* The Nightingale (2019) and her quest for vengeance only serves to traumatize her further rather than bring any sort of catharsis or closure.
* The Nightingale (2019) the protagonist is a young Irishwoman convicted for a petty theft and deported to Tasmania.
* The Nightingale (Kristin Hannah). Sophie makes it clear that she sees this as a patronizing comment from Vianne and does not appreciate it. Vianne is too shocked by this response to reply.
* The Night Is Short, Walk On Girl: The book takes place over roughly a year, spacing out the 4 events composing the story: A pub crawl in Kyoto, a used book fair, a school festival, and everyone coming down with a cold. The anime adaptation makes all of these events happen over a single night.
* The Night Is Short, Walk On Girl, the main character's mother tells her that most people are "rotten scoundrels, idiots, or completely idiotic rotten scoundrels."
* The Night It Rained Pancakes to make his brother question his sanity, but to make their feudal lord question the brother's sanity so he won't believe the brother's claims that gold was discovered on their land.
* . The night Jaune ran away from home to become a Huntsman, a pack of Grimm attacked his family and because Jaune had taken Crocea Mors, his father was forced to fight them unarmed. While Jaune did run back to try to help, he had initially hidden himself and only got back in time to see his mother get killed in front of him.
* ''The Night King'' Much like Light of the Seven, the piece begins with soft piano music before building up into a full orchestra.
* The Night King. Note that both times the Night King makes a Slasher Smile is when magical fire fails to stop him.
* The Night King takes things much further than regular White Walkers by raising hundreds or even thousands of wights at once and at a distance, and being able to raise any corpse in his vicinity that hasn't been burned.
* The Night Land and throws them in with things like air-ships, chainsaw-like weapons, and energy-based superweapons.
* The Night Land a wasteland full of mutated humans and supernatural horrors. Firearms were ineffective against most enemies in the Night Land, so a polearm was developed. One with a spinning saw-blade that was souped up with earth energy.
* The Night Land can release a powerful blast of energy on order to obliterate a horde of monsters trying to invade the city. However this is only used in extreme circumstances, since it consumes too much energy and leaves the city without power for days.
* The Night Land easily qualifies - the main pyramid is seven miles tall, with a 3/4 mile observation tower on top of that.
* The Night Land, enormous pyramids (the Great is over seven miles high, slightly taller than Everest) of seemingly indestructible metal that are humanity's last home on an Earth that has become a hostile monster-ridden wasteland.

* The Night Land have one in their arms when they venture to the titular Night Land. It is to be bitten in a hopeless situation, in order to prevent their soul from being Destroyed by the creatures of the Night. Dying this way at least people are able to reincarnate again.
* The Night Land have the Abhumans, which are prophesied to eventually replace the regular humans.
* The Night Land (more than a mile high). They're both sealed off from the outside world by necessity and are completely self-sufficient, relying on multiple stories of underground farms for food.
* The Night Land seems more concerned about being "destroyed" than killed. The implication is that being killed allows one to go on to the afterlife, while nothing follows being "destroyed".
* The Night Land, set millions of years in the future, both the Sun and all the other stars have gone out. (Hence, all the world is a Night Land.) When it was written, the way that stars work was not generally known, and the author implies that they had simply exhausted all of their fuel. Later fan works retcon this and say that the real reason all the stars went out long before they should have is that the evil forces of the Universe - the powers behind the Silence, et cetera - ate them. The only reason that they haven't eaten Earth is that it's the last place with any life, and if they eat it they won't have anything to do (or anyone to torment) until the Universe ends.
* The Nightlands invading the real world is the central premise of Palladium's Nightspawn/Nightbane RPG (name changed after first printing for legal reasons). The Nightlands are ruled by demonic sorcerers and illusionists who keep the mindless doppelgangers of real world people as slaves. There is also The Dreamscape where nightmares are literally real, and can find their way into the real world.
* The Night Land the majority of the human population came to live in vast caravans of mobile cities traveling the World Roads, alongside walker tribes and vast fleets making the same circuits at higher latitudes. This period lasted until the Earth became tidally locked and a massive eruption broke a vast crack into the Earth, bringing the age of mobile cities to an end.
* The Night Land, there are aircraft that would still be functional, if the air wasn't too thin to support them. They've remained in working order for hundreds of thousands, maybe millions, of years.
* The Night Land, which is set in the same universe albeit being written by a different author.
* The Night Land, with a history that "dealt not with odd thousands of years; but with very millions; aye, away back into what they of that Age conceived to be the early days of the earth, when the sun, maybe, still gloomed dully..."
* The Night Lords Chaos Marines, specialists in terror tactics on a planetary scale, are freaked by the Eldar Phoenix Lord Jain Zar, who moves so fast even the Marines' super senses can't pick her up.
* The Night Lords have a particular line in this, to the point where even
* The Night Manager, but back in London, the spymaster works out of a distinctly unglamorous warehouse office and constantly has to deal with bureaucracy and politics. Made with Bathtub Gin because the hero Jonathan Pine is a civilian hotel manager who is recruited to the spy trade.
* The Night Manager Jed and Pine part ways at the end of the series, but imply they will see each other again soon.
* The Night Manager Richard Roper employs a bodyguard/enforcer/torturer named Frisky. Although Roper mostly keeps him on the leash, Frisky makes it very clear, first in words and later by actions, that he has no qualms about the torturer part of his job, and probably enjoys it.
* The Night Manager: Roper has a small army of mercenaries in his employ from across the world, from he calls the "real United Nations".
* The Night Manager, who plays Jed. Laurie was about fifty six at the time, and she around twenty five.
* The Nightman Cometh, immediately rebuked with "You don't say stage freeze, you just do it!" on stage.

* The Nightman Cometh.) Naturally, Charlie is incensed at all of this and insists that there are no undertones whatsoever.
* The Nightmare Alpha "gun" is mentioned to be a handheld prototype version of the Nightmare boss. Because they use similar demon energies for their attacks, Nightmare is completely immune to Nightmare Alpha in every circumstance.
* The Nightmare Before Christmas", a deleted short clip of Oogie Boogie dancing in silhouette, he raises up his girth for a few seconds before it drops back down.
* The Nightmare Before Christmas and seems to have somewhat of a monarchical role in Halloweentown. However there's an elected mayor.
* The Nightmare Before Christmas and show no signs of having special powers. On the other hand, their appearances are distinctly off compared to the humans of Earth and what human children would be doing in Halloween Town is a mystery.
* The Nightmare Before Christmas: A particularly badass version is used:
* The Nightmare Before Christmas as Oogie Boogie sics his casino-themed deathtraps on Jack.
* The Nightmare Before Christmas), as well as to prevent Sally and Santa Claus from escaping his lair, though he doesn't actually inhale them.
* The Nightmare Before Christmas builds a female version of himself out of body parts around his lab. While not a genetic clone, he does give her a half of his brain, so that counts.
* The Nightmare Before Christmas can detach her sew-together arms or legs, although she's a noncombatant who uses this power for escape or distraction.
* The Nightmare Before Christmas cheats. For example, when he rolls a two, he slams his fist on the table, knocking the dice so they read a better number. While this does help him win at gambling, this results in him having to face Jack mano-a-mano, where he's finally taken down.
* The Nightmare Before Christmas crystallises in the song "Poor Jack".
* The Nightmare Before Christmas, decides to give Santa a vacation by kidnapping him and takes on the job himself.
* The Nightmare Before Christmas doing the commentary. It's at the mid-point; interesting, but a lot of info was already mentioned elsewhere.
* The Nightmare Before Christmas Dr. Finklestein is presented as a old man with a fitting gravelly voice, but in the Japanese dub he was given an high-pitched, nasal and younger-sounding voice.
* The Nightmare Before Christmas: Everyone in Halloween Town. There's a moment when Jack roars at Lock, Shock, and Barrel to scare them into shutting up. Shock almost looks like she's going to faint... and not with fear.
* The Nightmare Before Christmas explicitly confirms it, as the game takes place when Dr. Finklestein had just recently created Sally and Sally looks and behaves no different from how she did in the film.
* The Nightmare Before Christmas fans love the film. A common headcanon is that La Muerte is related to Jack Skellington, perhaps his mother or sister.
* The Nightmare Before Christmas featured a clown with a tear-away face.
* The Nightmare Before Christmas features a number of these among the inhabitants of Halloween Town:
* The Nightmare Before Christmas first appears dressed as a pumpkinheaded-scarecrow. He sets himself on fire to burn away the costume.
* The Nightmare Before Christmas - for a show-stopper at the movie's start, Jack Skellington, dressed as a scarecrow, plays fire-eater and sets himself ablaze, to everyone's delight.
* The Nightmare Before Christmas" from Christmas Town so that he's out of the way. But he clearly intends it to be a break for Santa, as evidenced by his telling Santa to consider it a vacation and a reward and sternly telling Lock, Shock, and Barrel to "see that he's comfortable" while Jack delivers the presents. However, Lock, Shock and Barrel have their own plans in mind for Santa....
* The Nightmare Before Christmas has a ghostly animal: Zero is Jack's ghost dog.
* The Nightmare Before Christmas has been turned into a toy, but among plush merchandise adapting characters from the film, the vampire teddy bear has been featured a few times, acting more like a replica by turning a fictional stuffed toy

into a real one. Human-sized reproductions of Lock, Shock, and Barrel's trick-or-treat masks have also been made.
* The Nightmare Before Christmas has The Clown with the Tear-away Face, whose easy removability (and perfect reattachment too) at will makes it less awful and more playful.
* The Nightmare Before Christmas has the main artist of Halloween Town taking over Christmas. The people of Halloween Town misinterpret Christmas rather badly, resulting in terrifying and dangerous toys for children.
* The Nightmare Before Christmas has the Mayor of Halloweentown, who is literally two-faced, and can rotate his head depending on his mood to show his happy or worried face.
* The Nightmare Before Christmas has the protagonist Jack Skellington depressed and burnt out from spending Halloween every year at being the best at scaring, his popularity, and his lack of anything relatively close to competition. As a result of this, he ends up discovering Christmas Town. After gaining an interest in the holidays and a disastrous sleigh ride, Jack rediscovers his enthusiasm for scaring.
* The Nightmare Before Christmas has three Brazilian Portuguese dubs: Megassom (VHS), Double Sound (DVD and TV), and Delart (3D Blu-Ray and streaming). Much of Double Sound's cast (and the translator and announcer) returned for Delart's dub.
* The Nightmare Before Christmas have a lot of fanart that ages them up into good-looking teenagers or young adults.
* The Nightmare Before Christmas. He never thought to use this in his battle against Jack Skellington.
* The Nightmare Before Christmas, if you look behind him, you can see Jack Skellington sneaking into the lair all spider-like.
* The Nightmare Before Christmas is a song about Jack Skellington, king of Halloween, finding the ins and outs of Christmas (snow, mistletoe, presents and Christmas trees et cetera).
* The Nightmare Before Christmas is the only one who opposes Jack's plans for Christmas, not out of malice but because she had a vision that his Christmas will go down in flames and she simply wants what is best for Jack.
* The Nightmare Before Christmas. It eventually bursts into flames, causing Sally to seriously question whether Jack's great Christmas takeover plan is such a good idea.
* The Nightmare Before Christmas It's also worth pointing out that this was Sally's suggestion.
* The Nightmare Before Christmas Jack and Sally confess their feelings for each other while on a snowy field (since Santa Claus had brought the snow to Halloween town).
* The Nightmare Before Christmas Jack calls Santa Claus "Sandy Claws", and teaches the name to all of HalloweenTown before Santa ever meets him, let alone has a chance to correct him.
* The Nightmare Before Christmas, Jack had always assumed Sally was a good friend and never realized she had feelings for him. It wasn't until Santa Claus pointed out she was proactively trying to rescue Santa Claus and she was doing it all to help Jack, Jack became flustered.
* The Nightmare Before Christmas, Jack runs straight into a signpost at the end of the song "What's This?"
* The Nightmare Before Christmas, Jack Skellington has a pumpkin on his head in his Pumpkin King costume.
* The Nightmare Before Christmas, Jack Skellington sets himself on fire, therefore having one of the most awesome entrances in Disney history.
* The Nightmare Before Christmas: Jack Skellington, thy name is clueless.
* The Nightmare Before Christmas, Jack Skellington uses a big chalkboard while trying to figure out the "formula" for Christmas.
* The Nightmare Before Christmas. Just before Sally delivers his soup, Doctor Finkelstein opens up his skull and scratches his brain.
* The Nightmare Before Christmas leads up to an Eureka Moment, with Jack even shouting "EUREKA!!!"

* The Nightmare Before Christmas. Most likely, Jack's status as the King of Halloween just makes him immortal.
* The Nightmare Before Christmas once you get to know him, just like the other denizens of Halloween Town.
* The Nightmare Before Christmas: One of the characters in the opening song "This Is Halloween" is the monster devoted to this "job".
* The Nightmare Before Christmas. Only the film's speaking parts were dubbed, but the song subtitles included on the disk are inconsistent with the dub and awkwardly translated in general, leading to some characters having different names in the spoken dialogue and in the subtitles. At least one line ("Uh-oh. I hope there's still time to set things right.") is missing and Jack just flaps his mouth silently, and one exchange ("What are you going to do?" - "I'm gonna do the best I can.") was left in English with no subtitles. To add further annoyance, the DVD was advertised as containing a Russian language track, one of the film's more interesting international dubs, but in reality it has the original English track on it twice. TV airings prior to 2010 did feature song subtitles written to match the dubbed dialogue (it's unknown why they didn't put these on the DVD), but they were in later years supplanted by the clunky DVD subs. At least certain TV showings fixed things like the missing line and the un-subbed exchange.
* The Nightmare Before Christmas: Oogie Boogie and Barrell have one constantly and Jack has one as his default.
* The Nightmare Before Christmas, Oogie Boogie is actually made up of insects, but for some reason has a snake for a tongue.
* The Nightmare Before Christmas: Oogie Boogie, the only inhabitant of Halloweentown who, though comedic, is outright evil instead of just playfully scary, is made of sackcloth sewn together over thousands of insects, spiders, scorpions, and a snake.
* The Nightmare Before Christmas, Oogie planned to make Santa and later Sally into snake-and-spider stew and ends up having all his bugs fall into the concoction, becoming stew himself.
* The Nightmare Before Christmas: Oogie's Revenge. At its base level it does everything you would expect a whip to do. Leveling makes it, in attack chains, form a scythe and flail at the end. It also makes a cyclone when he holds it out and spins himself around.
* The Nightmare Before Christmas: Oogie's Revenge convinced Disney not to do it. They chose not to throw it away entirely and made it into a video game instead.
* The Nightmare Before Christmas: Oogie's Revenge: Several of the boss battles can qualify (and the final battle definitely does).
* The Nightmare Before Christmas) playing an off-key, really creepy version of "Jingle Bells." However, since this is Halloween Town, where everything is supposed to be scary and creepy, Jack Skellington congratulates them instead of sending them off. Later, they give the same treatment to "Here Comes Santa Claus".
* The Nightmare Before Christmas. Sally seems more into him from the beginning; Jack is too depressed at first and then too invested in his schemes to notice her in a different light than as a compassionate friend.
* The Nightmare Before Christmas: Sally the ragdoll, whose detachable limbs often fall off at the slightest physical provocation. Fortunately, she carries a sewing kit around with her for that exact reason.
* The Nightmare Before Christmas says that there's no magic in Halloween Town — despite the fact that there's two resident witches.
* The Nightmare Before Christmas's benevolent intentions end up causing mass mayhem.
* The Nightmare Before Christmas skeleton, but played straight with the Mayor, who can only be described as "cone-shaped".
* The Nightmare before Christmas. That's right, an eleven-year-old girl with a fully adult skeleton.
* The Nightmare Before Christmas. The other spooks are frightening and with a bit of a skewed morality code, but are ultimately good-natured creatures that scare folks for fun. Enter Oogie-Boogie, the one spook who is genuinely malicious and

evil-natured, who even the other spooks seem to dislike. According to a supplementary material he's also this in a completely literal sense, being a refugee from a different bug-themed holiday that's no longer celebrated.
* The Nightmare Before Christmas the pretty wrapped box with the bow. He clearly has some idea (or realizes later) that the box needs to have an item inside it because the citizens of Halloween Town fill the boxes with scary toys rather than leaving them empty.
* The Nightmare Before Christmas: The Pumpkin King, a good deal of the enemies and several of the bosses are giant insects or arachnids.
* The Nightmare Before Christmas: The Pumpkin King. Aside from the opening cutscene establishing that the story takes place long before Jack discovered Christmas, the ending cutscene has Sally first meet Jack and fall in love with him and Oogie Boogie swearing revenge against Jack, both of which foreshadow Sally's crush on Jack Skellington and Oogie's battle with Jack in the movie.
* The Nightmare Before Christmas: The Pumpkin King is a Gameboy Advance prequel to the same cartoon.
* The Nightmare Before Christmas: The Pumpkin King, where one of the bosses is a gigantic arachnid known as the Crypt Creeper Spider.
* The Nightmare Before Christmas. The three shady trick-or-treaters, Lock, Shock, and Barrel, wear masks all the time, but in their introductory scene they take them off, revealing faces that look exactly the same.
* The Nightmare Before Christmas, the troublemakers, Lock, Shock, and Barrel do this at their introduction. There's also a deleted scene where they do this too.
* The Nightmare Before Christmas. The two films just go well together.
* The Nightmare Before Christmas, the well-meaning citizens of Halloweentown volunteer their services at Christmastime, but since their idea of a fun holiday varies wildly from Santa and his helpers, the end result involves a skeletal impostor Santa, toys that frighten children, tentacled Christmas wreaths, and a giant, tree-eating snake.
* The Nightmare Before Christmas They get one of the coolest, most sadistic songs ever.
* The Nightmare Before Christmas they like their gifts, but they shoot down his sleigh.
* The Nightmare Before Christmas. This, naturally, leads some fans to speculate that Jack has ADD. This is most likely not the case: Jack had been doing the same thing, in the same place, in the same way for an untold number of years. This was the first time he had seen anything like this; he's not distracted by "the shiny" as much as he's trying to take it all in at once while being very (musically) enthusiastic about it.
* The Nightmare Before Christmas to rescue Sally and Santa Claus moments after they hear the news.
* The Nightmare Before Christmas walks around on the tips of its very long, bat-like wings, its plump, stubby-limbed body not touching the ground.
* The Nightmare Before Christmas wants to share the joy of Christmas with everyone in Halloween Town, but his subjects don't get it and, because it's almost as new to him as it is to them, Jack can't find the words to explain it to them.
* The Nightmare Before Christmas: What does a military do when a skeleton is trying to be Santa Claus, scaring the crap out of the kids? Blow him up with missiles, apparently!
* The Nightmare Before Christmas when she tricks the doctor into eating the poisoned soup.
* The Nightmare Before Christmas, where Doctor Finklestein is referred to by name (once) in the movie, but is listed in the end credits simply as "Evil Scientist".
* The Nightmare Before Christmas: While planning (and singing about) the capture of Santa Claus, Shock has a box of large scorpions that she uses to illustrate her plan for herself and her brothers to hide in a box that Santa would open so they could kidnap him.
* The Nightmare Before Christmas who even approaches the realization that people don't want to be scared or attacked on Christmas.

* The Nightmare Before Christmas with stitches all over her body and puts deadly nightshade in her creator's food and drink to get out of the house, which gives her shades of being more determined and shows she has a great desire to be free.
* The Nightmare Before Christmas works to free Santa Claus. Mr. Boogie is not pleased to discover that her leg is detached.
* The Nightmare Before Christmas: Zero's Journey. Barrel, on the other hand, painfully belly-flopped.
* The Nightmare Before Christmas: Zero's Journey has Jack ask a pumpkin-headed scarecrow if he's seen Zero.
* The Nightmare Before Christmas: Zero's Journey has one in the form of a present-wrapping machine.
* The Nightmare Before Christmas: Zero's Journey. Jack asks them if they've seen Zero and gets a shrug in response.
* The Nightmare Before Christmas: Zero's Journey. Jack is naturally suspicious, but takes their offer so he can see to his duties as the Pumpkin King.
* The Nightmare Before Christmas: Zero's Journey, Lock, Shock, and Barrel bring a sled to Christmas Town. They've never actually done this before, don't know how to stop once they pick up speed, and smack right into a pine tree due to it.
* The Nightmare Before Christmas: Zero's Journey, Lock, Shock, and Barrel don't bring their walking bathtub, despite that their ulterior motive to go to Christmas Town was to steal candy and toys while searching for Zero.
* The Nightmare Before Christmas: Zero's Journey, Lock, Shock, and Barrel rob a toy store. The toy store owner gets a sizable mob to hunt them down with this mentality.
* The Nightmare Before Christmas: Zero's Journey. On the elves' side, some of them aren't the nicest characters, but the comic takes place on Christmas Eve, which is the busiest time of the year for them. They're understandably upset that the tricksters' mayhem is getting in the way of preparations.
* The Nightmare Before Christmas: Zero's Journey takes place in Christmas Town. Naturally, Santa's a core part of the plot, as Zero needs to find him to get back to Halloween Town.
* The nightmare difficulty is one of the most-run games of all time, so the route and performance is extremely optimized.
* The "Nightmare Forces" arc (issues 5-8) has the new Nightmare Moon,
* The Nightmare Fuel Film page are for those who don't want to sleep tonight.
* The Nightmare House, after hearing her parents talk of paying the mortgage, has a nightmare about a monster named Mor-Gaj who speaks in third person.
* The Nightmare House and Luan dreams her ventriloquist's dummy has come to life, while Lisa dreams about an evil teddy bear who spanks her and thinks she's a baby.
* The Nightmare House" and throw up black slime. They could be weirdoes in strange contacts, possessed humans, or demons.
* The Nightmare House doesn't know what a mortgage is, so she dreams it's a ravenous beast named Mor-Gaj, who eats money, Rita's purse, and tries to eat her.
* The Nightmare House has a nightmare where she's immobilized and dragged away by giant, talking spiders.
* The Nightmare House is Lola. "Lola" tries to pass it off as mixing up the names, but Lincoln remains suspicious and, after asking questions only his real sisters would know, discovers that his "sisters" are all imposters.
* The Nightmare House: Leni Loud's nightmare in features giant, talking spiders, which she describes as looking terrifying, especially their eyes.
* The Nightmare House, Lisa, a preschooler, has a nightmare involving being sent back to daycare and put in a diaper. A teddy bear thinks she's a baby.
* The Nightmare House, Lisa's nightmare ends with her shouting, "MOMMY!!!" because she wants Rita to save her from the evil teddy bear, who is spanking her.
* The Nightmare House make the joke "How many psychiatrists does it take to change a light bulb? Only one, but it has to want to change."
* The Nightmare House's nightmare involves accidentally punching her brother's head off.
* The Nightmare House's nightmare involves possessed-seeming dancers who chant to

her to "join" them.
* The Nightmare House sort of reaction, she tries making deliberately-bad jokes.
* The Nightmare House, subverts this. Nobody is laughing at Luan's jokes... because they're statues.
* The Nightmare House thinks Lincoln looks so nervous he may wet his pants.
* The Nightmare is a corrupting force within the Emerald Dream that twists any being connected to it, such as druids and dryads, into hateful monsters. It finally comes to a head in
* The Nightmare itself also looks like a horrifying giant spider to the Inquisitor. Seems like the Inquisitor is a bit of an arachnophobe.
* The Nightmare Neighbour Next Door due to the noise from constantly clucking chickens. It got so bad that animal-welfare agencies considered the birds mistreated and had to take them all away! But... the sheer amount of them meant that it took weeks to get every single chicken.
* the Nightmare possessing her, starting with the memories of her father. She doesn't even notice until she realises she can't remember her father's name.
* The "Nightmare Revisited" album, which is a cover album of the score and songs from
* The Nightmare Room episode "My Name Is Evil", the protagonist is male when she was female in the original story. The protagonist's peers were similarly gender flipped.
* The Nightmare Room where the hero doesn't want to be a hero, and the villain doesn't want to be a villain.
* The nightmare sequences from the first game have a similar visual and gameplay effect to this trope, alternating between a dark and distorted version of the location he was in previously and some bouts of outright
* The nightmare sequences throughout the game inject a tone of surreal horror into the game when they occur.
* The nightmare sequence where a demonic Gregor Mendel makes thousands of rotting cat corpses dance like marionettes.
* The Nightmare Stacks in order to sustain a field that will keep the faerie in our world.
* the Night Master by claiming the Night Master would say he stole the idea from Herman, not Carl.
* The Night Mayor alternates between two viewpoint characters, one of whom is an author of hardboiled detective thrillers; the chapters where he's the viewpoint character are narrated in first person in this style.
* The Night Mayor. "Darn!" and "Heck!" qualify as "the vilest abuse imaginable".
* The Night Mayor, everything is linked together through a system called Yggdrasil, after the World Tree in Norse Mythology that holds the worlds together. It's used for communication, for research, and other internet-like purposes. Unlike the actual internet, it's a single system with a centralized control hub, which is a plot point.
* The Night Mayor from the inside. When the protagonist is recruited to go into cyberspace after him, one of the first questions she asks is why they don't just switch the device off. The prison governor explains that if they do that while he's still plugged in he'll be killed, and the experts are still arguing about the legal consequences. Before that question is settled, he's gained enough control over the prison's systems to prevent the device being switched off.
* The Night Mayor has a bunch of slang based on verbing nouns or abbreviating things that aren't usually abbreviated, as well as new euphemisms such as "remaindered" for "murdered", and an instance where Susan uses the actual phrase "Expletive deleted!" as an expletive. In one scene, Susan reflects on the ways slang has changed in the past five years — "squitch" has replaced "kink", "bove" has replaced "zooper" — and the reader never finds out what any of those words mean.
* The Night Mayor implies that its protagonist is descended from a character in that novel.
* The Night Mayor is set entirely in England, but there's a passing mention of a

recent "War Between the States" that has resulted in political upheaval in North America including the establishment of the CSA as an independent political entity.
* The Night Mayor is Truro Daine, whose extensive criminal career is such that nobody can think of any precedent to compare him to short of fictional supervillains like Fu Manchu and Lex Luthor. When he was finally caught, the charges started with 8921 counts of first-degree murder and continued through arson, blackmail, drug-running, pornography, and other trespasses too numerous to mention. The jail time due for all his crimes is enough that if he lived that long he'd come out to find the human race had evolved into something else. He continues pulling the strings of his criminal empire from maximum security prison. The prison governor notes that a man of Daine's genius could easily have made a legitimate fortune larger than his ill-gotten gains, but apparently Daine would have found that too boring.
* The Night Mayor, Marlowe-inspired private eye Richie Quick narrates, before going on a prolonged bender:
* The Night Mayor movies. The master criminal Truro Daine hides out in the City to escape justice in the real world, and Tom Tunney is sent in after him. Daine fakes his own death in a way that makes Tunney appear the only suspect, so that Tunney has to concentrate on avoiding the City's police.
* The Night Mayor movies. (The realm has its own native hardboiled detective, said to be an amalgamation of Bogart's trope-defining film characters, but he doesn't appear in the story, having already fallen victim to the problem Tunney is being sent in to fix.)
* The Night Mayor movies, where it's always two thirty in the morning and every neon sign has a letter that doesn't work.
* The Night Mayor. That might be partly self-preservation, since the villain's plotting to take over the Alternet, but then again the ending suggests that Yggdrasil was never in any real danger from him and probably could have defeated him single-handedly if the protagonists hadn't got there first.
* The Night Mayor). The fortune teller turns out to be a white man in disguise.
* The Night Mayor, the new form of public entertainment is a kind of hyperreal virtual reality. Susan notes that it is still waiting for a pioneer to really showcase its potential as an artform the way D. W. Griffith and Sergei Eisenstein did for film in the 20th century, or Chillmeister Freaze did for ice sculpture in the 21st.
* The Night Mayor, the protagonists are brought into events because they have extensive knowledge of 1940s films: Susan studied film history in preparation for her career as a VR designer, while Tom just liked the films and then apparently went into VR design as a way of putting it to use. In addition, there are frequent references to songs from Susan's extensive music collection, which doesn't seem to include anything from after the book's year of publication.
* The Night Mayor the protagonists are trapped in a virtual reality realm built of old movie tropes. At one point, they're captured by an evil cult who throw the male lead into a pool of alligators.
* The Night Mayor, the protagonists are trapped in a virtual reality realm built of old movie tropes. At one point, they're captured by an evil cult who try to sacrifice the female lead to their god.
* The Night Mayor, the protagonists are writers, and there's a sequence about the difficulties of the hack romantic novelist now that science has eliminated all the diseases that heroines used to romantically die of.
* The Night Mayor, the protagonists get Conscripted to deal with an emergency. Conscription works like this: a government official turns up on your doorstep and informs you that there is a job that needs doing which you are particularly well suited for, and the government requests that you volunteer to do it. Officially, if you choose not to volunteer, you will be required to pay a fine and that will be the end of it; in practice, nobody has ever dared not to volunteer.
* The Night Mayor, this is noted as an attribute of the fictional action heroine Vanessa Vail. When she passes out from her injuries she falls gracefully into a nice-looking sprawl, and when she's dying of an incurable illness she's positively

angelic. The plot of the book involves her creator, Susan Bishopric, getting caught up in a real adventure, and getting increasingly annoyed every time she thinks about how good Vanessa would still look after what Susan's just been through.
* The Night Mayor, Tom Tunney is in an all-night diner when somebody starts shooting the place up with a machine gun. He dives for cover, and something falls on his head and knocks him unconscious. When he wakes up, he's lying in a pool of something dark and sticky, which he's relieved to discover is just ketchup.
* The Night Mayor: When Susan's agent calls her at the beginning of this 1989 book, his face appears in a window on her computer screen.
* The Night Mayor, whose crimes include murder, arson, drug running, pornography, blackmail, and theft, all on an epic scale. His rap sheet includes "8,921 counts of first-degree murder alone, excluding his various thermonuclear adventures". His sentence is concomitantly epic.
* The Night Mother enjoys a special role among the dead, being somehow married to the void itself. This gives her the ability to communicate telepathically in order to lead the dark brotherhood from beyond the grave. Although depending on which in-game sources you believe, she may have been a divine entity all along.
* The Night Mother is a mysterious figure who leads the Dark Brotherhood, an illegal
* The Night Of by the lead detective: when the cop in question asks to leave the detail out of his report, he's told to leave it in, because it humanises him as a witness and thus helps the prosecution's case.
* The Night Of: Freddy is introduced with a montage of his luxury prison suite, which features a lot of furniture, newspaper clippings of his former glories, and a large stash of contraband cell phones. We later see that other inmates sleep in cots in the public room.
* The Night Of has John Stone, a lowly lawyer who trawls late-night police precincts for hookers and pushers to recruit as clients. He advertises on the subway and pays cops to hand out his cheesy business cards. While he waits on a client, a cop cracks that he's just heard an ambulance siren pass by and asks if Stone wants to chase after it.
* The Night of January 16th proves that when it is announced that the bodies of the victims have been found ... and the judge lets the trial continue.
* The Night Of magazines hidden in his closet. Nasir is so innocent that his porn stash doesn't even have actual porn in it.
* The Night of Morningstar. Modesty escapes from her restraints and she and Willie sink the villainous plot.
* The Night of Morningstar, Modesty is attacked and injured while out on the town with her friends Dinah and Stephen. A bit later, there's a scene where Stephen and Modesty discuss the possibility that whoever was behind it will try again, and Stephen anticipates having to put some effort into convincing Dinah that Modesty will be all right. This remark is immediately followed by a cut to Dinah telling Modesty's sidekick Willie that she has confidence that Modesty can handle herself and anticipating that Stephen is going to need reassurance.
* The Night of Morningstar, when one of the Watchmen is arrested after failing to subdue Modesty, another impersonates an investigator from Special Branch to gain access to the police lockup and kill him before he can tell what he knows.
* The Night Of: One of the young arresting officers writes her report in overly technical language, in an apparent attempt to sound official. Veteran Detective Box tells her to rewrite it in simple language so that a jury can understand it.
* The Night Of scenario and fled in a panic, but it's tense seeing the two investigations converge.
* "The Night of Sudden Death" and "The Night of the Circus of Death" from
* The Night of the Bogus Bandits", Miguelito Loveless hands James West such a pistol, but he sees through the ruse.
* The Night Of: The brutal murder of a beautiful, young, white heiress sparks a media sensation. A few days later, cops investigate the murder of an African-American woman in the slums and sarcastically wonder where all the news trucks are at.

* The Night of the Bubbling Death which includes a large pool of acid (depicted as cherry red instead of the usual green or yellow) that dissolves anything it touches without a trace.
* The Night of The Doctor, in which he regenerates), he has actually appeared in more stories than any other Doctor thanks to his extensive appearances in audio plays, novels, and comics.
* The Night Of The Doctor prequel short has the Eighth Doctor realize he can't stay neutral in the war any longer and has him deciding to regenerate into a natural warrior.
* The Night of the Doctor she elects to stay on her ship until it crashes rather than go with him. The Doctor also elects to go down with the ship rather than abandon her.
* The Night of the Doctor", the BBC just went ahead and released the thing early.
* The Night of the Doctor". The Eighth Doctor is about to take a potion which will make him regenerate into the War Doctor.
* The Night of the Doctor" the Eighth Doctor tries to convince Cass that he's not one of those Time Lords, who have wrought destruction upon the universe during the Time War, by saying that he's "one of the nice ones." This doesn't work, and she chooses to die rather than trust him. He refuses to leave her side and dies too.
* The Night of the Doctor", this Doctor tries to save the life of a pilot, only to be rebuffed by her as she hates Time Lords due to their actions in the Time War. He remains on the ship as it crashes onto a planet and dies, but gets resurrected by the Sisterhood of Karn, only to be convinced by them to regenerate into a "warrior" incarnation in order to fight in the Time War. But the worst part of it? He gives up his name.
* "The Night of the Doctor" with completely different lighting and a different paint job.
* The Night of the Generals. While the witness could only provide one, seemingly unimportant detail regarding the killer (he was wearing trousers with a red stripe on them), that description greatly narrows down the field of suspects, as only German generals wear trousers with a red stripe. Major Grau quickly narrows the suspect pool to the three generals in the city who do not have alibis.
* The Night of the Grizzly is one of the earliest "Killer Bear" films.
* The Night of the Hunter and lecturing her that her body is only meant for having children.
* The Night of the Hunter climaxes with an angry mob forming against Harry Powell.
* The Night of the Hunter - Harry Palmer, recently a widower after murdering his bride, has meals given to him by sympathetic townsfolk (who think she's run off on him) - which he withholds from his stepchildren to get them to tell where their late father's stolen money is hidden.
* The Night of the Hunter. Psychos have been renamed Hypnos in Hunter 2E.
* The Night of the Hunter, right after the children's father has been hanged, and the other kids in town mock them by singing the song "Hing, Hang, Hung". This in itself is pretty creepy, but it doesn't get better when the little girl, too young to fully understand what has happened, cheerfully hums it to herself afterwards.
* The Night of the Hunter that he's actually happy for once to be riding the world of such an evil man.
* The Night of the Hunter where misogynistic serial killer preacher Harry Powell's switchblade pokes through his pocket while watching a burlesque dancer. This is an early indication of the substitution of murderous violence for sex in his brain.
* The Night of the Long Knives in 1934 was a general purge of Hitler's rivals and sometime-critics, focused on three groups: leaders of other conservative political parties, socialist-leaning members of the Nazi party, and the party's "brownshirt" paramilitary wing which was becoming increasingly violent and independent. The English name for the extra-judicial killings came from the Roman Emperor Tiberius' execution of Sejanus' family and supporters.
* The Night of the Rabbit narrates four acts of a theatrical play starring Jerry Hazelnut, each designed to lead him to despair and death.
* The Night of the Rabbit waist height fences are used literally to prevent you

from getting into certain places (the wood dwarves' house, the Hares family's garden and their birthday party). Instead, you have to solve some puzzle in order to get there. Talk about a hero who respects private property!
* The Night of the Rabbit, who have the power of using trees to travel across different worlds, times and possibilities. They use their magical powers to help the people of worlds they visit.
* The Night of the Tottering Tontine. West and Gordon are assigned to protect a government scientist invested in a tontine whose members are being killed off.
* The Night of the Tottering Tontine who enjoyed shooting up saloons for fun... cue him taking the substituted gun and offing himself instead.
* The Night of the Triffids ends with the protagonists, who live in one of the few surviving enclaves after the collapse of civilization, receiving a radio signal from another, previously unknown, group of survivors, and making plans for an expedition to find them.
* The Night of the Triffids, set after a catastrophe that reduces human civilization to a few widely-scattered enclaves, a traveler from England discovers that there is a surviving enclave in Manhattan, which he spends a significant portion of the book exploring. There are a couple of factors that make this more reasonable: enclaves can only be maintained on islands small enough to be kept clear of triffids (the protagonist's home is on the Isle of Wight), and as he's traveling from the east it has to be an east coast city for him to have much chance of encountering it.
* The Night of the Triffids's style of writing. Not exactly high art, but a decent page-turner.
* The Night of Wishes, Maurizio and Jacob wants to toss a piece of pergament with a spell on it into the fire. The pergament becomes animate and starts to strangle the two like a python.
* The Night of Wishes, where the skills of both main villains are needed to complete their objective.
* the Nightosphere has a lot of lines. Finn and Jake wait in one line for 13 days.
* The Nightosphere, home loads of creepy demons and is essentially Hell.
* The Night Owl: A person who prefers to be awake at night, rather than during the day.
* "The Night Patty Murphy Died" is a traditional Newfoundland folk song, recorded by, among others, the Canadian-based Celtic-rock band
* The Night Porter (1974): Controversial erotic film about the sado-masochistic love affair between a Nazi camp commander and a concentration camp survivor.
* The Night Porter, which depicts a rekindled sadomasochistic relationship between Max, a former SS officer (Dirk Bogarde) and Lucia, a concentration camp survivor.
* The Night Room, Argus is a computer program designed to predict the futures of high school and college students to allow them the freedom of choice to either pursue the prediction or stridently avoid it.
* The Night Room features teenagers who are being shown their ten-year high school renunion via virtual reality.
* The Nightrunner by Lynn Flewelling has the Four Gods, as well as the Mother, the goddess of the hill witches, and the dark god of the necromancers.
* The Night's Blade. While she may seem a reasonable person to the uninitiated, it's not long before the protagonists are made aware of the horrors she has committed.
* The Night's Dawn Trilogy) also serve as interceptors and scouts thanks to their superior FTL and maneuverability. The big difference to the standard fleet is the lack of fighters, for the reasons of practicality. Instead, high-speed, high-G drones called 'combat wasps' actually do the fighting thousands of kilometres from their motherships.
* The Night's Dawn Trilogy are named such - as they are skyscrapers IN SPACE. Literally hanging off the outside edge of rotating space habitats.
* The Night's Dawn Trilogy are primarily used as engineers and for patching up damage - some of them are so heavily modified that they don't even need space suits to survive in the vacuum, instead just needing a bottle of oxygen.

* The Night's Dawn Trilogy backwards, as a power grid and transportation network do exist.
* The Night's Dawn Trilogy by taking over people's body, usually using torture by already possessed or satanist cults to force their way in.
* The Night's Dawn Trilogy. Combat is performed by means of "combat wasps", independent, highly-manoeuvrable drones which are launched from ships. Each ship tends to carry maybe a maximum of twenty or thirty on average (some more, some significantly less), but each wasp subdivides on its way to its target into dozens of submunitions, ranging from one-shot lasers to simple kinetic projectiles, and including many, many guided missiles with their own reaction engines. A large battle between several ships can result in thousands of pieces of powered death duking it out in the space between the fleets.
* The Night's Dawn Trilogy, due to Earth's damaged environment and extremely high population (~40 billion), deportation is the standard penalty for nearly all crimes, "from rape to tax evasion".
* The Night's Dawn Trilogy, Earth deliberately creates colonies of this sort by a process of "ethnic streaming", to avoid giving people obvious differences to fight over. This is realised after the first, multi-ethnic extra-solar colonies descend into anarchy. Earth itself has a unified government, GovCentral.
* The Night's Dawn Trilogy. Earth suffers from devastating mega-cyclones (Armada storms) and so the entire population lives inside giant arcologies. Colonists heading to new colonies are a mixture of desperate people who've paid to go and petty criminals who've been sentenced to indentured servitude to the paying colonists.
* The Night's Dawn Trilogy, energy weapons of all kinds are not only available, but widespread. They're even available as nanonic implants under the skin. However, against the Possessed, electronics of all forms are horribly glitched at best, and completely shut down at worst. This means that the most effective weapon against them is a good old-fashioned chemical projectile weapon - a.k.a. a gun.
* The Night's Dawn Trilogy engage in a lot of sex once they've taken over a human body, though, in this case, it's because they've been deprived of sensation for so long.
* The Night's Dawn Trilogy has Eden, Felicity, Atlantis and Tranquility.
* The Night's Dawn Trilogy has planets surrounded by swarms of these, known as "Strategic Defense satellites". They usually are pointed outward to defend against attacks from space, but can be used against surface targets with devastating effects.
* The Night's Dawn Trilogy he eventually takes voluntary exile on a prison planet.
* The Night's Dawn Trilogy. It is also made clear that the problem is likely solvable by human technology, but only at immense social and economic cost.
* The Night's Dawn Trilogy kicks off when dead peopple start possessing the living, with a few of them becoming relatively prominent characters.
* The Night's Dawn Trilogy, living space stations, and organic servitors. They aren't entirely organic though; most common technology is still inorganic/non-living (they use electric jeeps in their habitats), and their ships/stations use non-living technology (like fusion reactors) when using living versions would be impractical or impossible.
* The Night's Dawn Trilogy — disrupt any nearby 27th century equipment. When the Possessed take over a planet, they must rely on archaic mid-20th century technology as modern equipment ceases functioning or is bugged beyond usability.
* The Night's Dawn Trilogy, or at least a machine left behind by such, it gives him the opportunity to save the world from the invasion of the dead and the opportunity to reshape the Galaxy as he sees fit. He promptly relocates the entire Confederation outside the Milky Way to form a tight star cluster, making interstellar travel much easier, thus forcing Humanity to become much closer socially and ideologically, as well as physically.
* The Night's Dawn Trilogy, serious criminals were suitably equipped with survival gear, and then sent on a one-way trip to the surface of a penal planet, where they would be effectively cut off from all modern (and indeed, not so modern) benefits

of human civilisation, and left to fend for themselves for the rest of their lives.
* The Night's Dawn Trilogy, starships (both conventional and biological) are unable to perform ZTT jumps or Swallow maneuvers within a certain radius of a gravitational field since local space is too warped to allow safe transmission. This radius is much smaller for the more sophisticated bitek Voidhawks, however, and Lagrange points (spaces where the gravitational pull of a planet is cancelled out by that of another celestial body such as a moon or star) theoretically allow FTL travel within a gravity well.
* The Night's Dawn Trilogy the cabal who secretly control Earth ensure their continued rule this way, by instantly killing the old body after having their memories transferred to a new one, even editing out those memories they don't want to keep. However the revelation that the souls of the dead pass on to an afterlife means that rather than a form of immortality, they're sending those souls to the Beyond each time a body is destroyed.
* The Night's Dawn Trilogy, the Edenists grow their children in pods that actually don't hatch until the child is the equivalent of 1 year old.
* The Night's Dawn Trilogy, the possessors have reality warping abilities summarily called the 'reality dysfunction', which form a de facto magic, if only because human scientists have not the slightest hint of how it works. Coming near to a possessor, or a possessor deliberately extending the reach of his or her powers causes electronics to fail. This is actually very inconvenient for them, as it makes travel in spaceships very difficult, and because it can be used to systematically detect them on planets with sufficient infrastructure.
* The Night's Dawn Trilogy. The reader can tell he's lost his temper whenever his face makes a sudden reappearance.
* The Night's Dawn Trilogy: there are both spaceships (Voidhawks and Blackhawks) and habitats (space stations that can be tens of kilometres long) that are alive and sentient, based on "bitek", a kind of organic technology.
* The Night's Dawn Trilogy to protect them from the armada storms raging across the surface of the planet. Newer arcologies are described as being much more monolithic.
* The Night's Dawn Trilogy to their vast orbital habitats when they die.
* The Night's Dawn Trilogy: Upon discovering the sleeping god at the end of the last book, and theorizing that it is capable of intergalactic travel, everyone is shocked. Although FTL travel has been known for more than 500 years, it took several months and hundreds of small FTL 'jumps' for the main characters to travel the 1300 light-years to find the Sleeping God in the first place.
* The Night's Dawn Trilogy want to do this to a town on Norfolk, but the Possessed who are already there band together to fend them off, finding themselves for the first time in perfect accord with the people they're possessing, who grew up in the town and don't want it overrun by hooligans either.
* The Night's Dawn Trilogy which she assumed was the Hell she'd been told about. When Joshua Calvert tries the same trick later it doesn't work, as the Possessed he's confronted with used to be a Muslim.
* The Night Sentinels are seen using spears with Argent Energy blades, and Valen the Betrayer totes an Argent Energy
* The night shift is explicitly shown several times over the course of the spin-off series. TNG shows both Data and Doctor Crusher commanding the bridge on the night shift. (It's implied that Data nearly always commands the night shift in addition to his normal duties because he doesn't need to sleep.)
* The Night Shift, "The Fog of War", in which Jordan, TC, and Paul discover a truck crashed in a remote area - the truck is full of human trafficking victims, some of who have been injured in the crash. They're forced to improvise medical care for the injured when unseasonably extreme fog delays helicopter rescue, but their efforts are complicated by a moral dilemma: an unconscious, heavily injured man they pulled from the back of the truck could die without a blood transfusion from one of the doctors (a risky operation to do in the field), but a female trafficking victim tells the doctors that the unconscious man is the coyote who endangered the victims' lives in the first place and is thus undeserving that sacrifice. The

actual coyote was the woman herself, and the injured man was an innocent victim she was attempting to pin the blame on.
* The Night Shift while he attempts to comfort her, even as he grieves along with her.
* The Nightside has a few characters who wear these. There's probably something in the air. Two of the more prominent examples are Dead Boy, who is dead, and wears a purple greatcoat; and Hadleigh Oblivion, the Detective Inspectre, who deals with crime that threatens reality itself, and has a black leather longcoat.
* the Night's King) even before then, but we're now at a point where everything depicted on screen has yet to be depicted on the page.
* the night sky turning alien and strange] or droughts, and terrible plagues.
* The Night Stalker effortlessly throws an orderly trying to subdue him out a window during his attack on the hospital.
* The Night Stalker (series)) is almost always alone in noticing what is really happening.
* The Night Strangler, an alchemist has developed an elixir of youth that has to be renewed every 21 years with the blood of a few women.
* The Night Strangler. Richard Malcolm goes on a killing spree to take the blood he needs for the elixir that keeps him alive every 21 years, but doing this and keeping himself in isolation for the waiting period have trapped him in an endless cycle, and he’s gone completely insane from this, and by this point he’s both too insane and too stubborn to see this.
* The Night's Watch and their perennial enemies, the wildlings. The wildling are described as fighting like heroes or demons, depending on who you ask —
* The Night's Watch consists of badass rangers who have to hunt down and kill groups of barbarians, zombies, giants, and
* The Night's Watch has defended the realm for generations, but are frequently dismissed as a gang of outcasts guarding against make-believe monsters.
* The Night's Watch is composed mostly of thieves and murderers who join to avoid their punishments. The rest of the kingdom forgets about them as they freeze and fight.
* The Night's Watch takes full advantage of their position atop the Wall to rain arrows, flaming barrels, and even a huge scythe down on anyone who tries to storm the Wall.
* The Night's Watch uses flaming barrels of oil to kill several Wildlings and drive off the mammoth at their gate in "The Watchers on the Wall."
* The Night's Watch, which offers atonement for anyone who joins. It
* The Night" Teri dreams that she's naked at school. When she finds a pencil and tries to draw clothes on her body (she's made of paper and her features are drawn on), she finds that it's not working, then it shows that she's drawing on herself in her sleep.
* The Night That Never Ends: The villain's main goal is to get rid of sunlight forever.
* The Night the Lights Went Out in Georgia" show that the people of the Plains Nation are living very much like the Plains Indians (without the racist implications), and that the friendliness depends on which tribes you encounter.
* "The Night The Lights Went Out in Georgia" was originally recorded by Vicki Lawrence.
* The Night the Scarecrow Walked. They naturally flee in terror. The next day when they go to investigate, he is gone; they encounter a man wearing his clothes, but while rather unattractive (and apparently only able to caw like a crow) he is neither very scary nor does he do any harm to them.
* "The Night the World Ended" has a guy use a fake newspaper to trick a homeless man into thinking the world will end that night.
* The Night They Knocked: A non-erotic example, in that one of the killers doesn't have a shirt on.
* The Night They Knocked. The film cuts to black just as they're about to open the garage door.
* The Night They Knocked: When one of the murderers reveals himself to the college

students in the house, he presses his hands against the back door window and leaves two handprints there.
* The nighttime monsters that live under his bed are lousy liars too. Every time he shouts out something like "Any monsters under there?" he's sure to get several replies of "Nope!" or the like. Even Calvin is smart enough not to fall for
* The Night Unfurls are a male-exclusive mercenary group who literally want to build a Sex Empire...
* The Night Unfurls, but each arc, excluding the transitionary/interaction-focused ones, has at least one of these.
* The Night Unfurls described in this fanfic only serves to hammer this further.
* The Night Unfurls do this briefly during the hunt for Shamuhaza within the streets of Rad. After mentioning that they still have to go on a date when they are done, he kisses her on the cheek in response.
* The Night Unfurls do this, but only one out of all of them fights with two blades.
* The Night Unfurls during the later chapters, though he definitely feels very insignificant while Kyril seems to be far above him.
* The Night Unfurls fits this trope to a T. Strict and abrasive to his recruits, yelling and calling them derogatory names are part of his routine.
* The Night Unfurls, Hugh shakes his head in a grimace, and Lily turns paler than usual.
* The Night Unfurls is never alone — he is surrounded by countless shadows resembling those he killed, including other hunters and beasts. Even Kyril himself admits that the dead sometimes come to speak to him in his dreams.
* The Night Unfurls is the main M.O. of this army to realise Vault's dream of a Sex Empire.
* The Night Unfurls it possesses, it's not nicknamed "the Murder Sword" for nothing.
* The Night Unfurls, it's not like he has not experienced such a phenomenon before...
* The Night Unfurls: Kyril is this to Celestine. Despite having a vision about the Good Hunter ends up either the saviour or destroyer of her land, the latter being the more likely outcome as he is a brutal killer, she has no choice but to call for his assistance, in order to end the war with Olga swiftly.
* The Night Unfurls, lay down his blades and live the rest of his life in peace after the war is over. The remastered version takes this trope to another level: not only does he desire to live in peace, he also wants to bring the Workshop in the Hunter's Dream to life.
* The Night Unfurls, orcs are portrayed as this, in classical fashion. Every single orc is a savage and a rapist, with Kyril outright telling his soldier recruits that orcs exist to kill, so their job is to take them out without hesitation.
* The Night Unfurls (or rather, the ones who are on good terms with him) is dead.
* The Night Unfurls overhearing his plan, giving him all the more reason to fulfil his mission.
* The Night Unfurls shows that celibacy and other close yet non-romantic relationships are by no means mutually exclusive.
* The Night Unfurls: Surprisingly, around half of the myths or legends about the Good Hunter have some truth to it, while the other half is either false or not confirmed.
* The Night Unfurls. There is also the implication that Vault has spent an ample amount of time garnering support from prominent members of the nobility and clergymen within Ken, even during the centuries-old war. Securing long-lasting peace in Eostia has never been more difficult than ever before.
* The Night Unfurls to create a breach for his company to charge through.
* The Night Unfurls to this trope: the Seven Shields (female-exclusive), and the Black Dogs (male-exclusive).
* The Night Unfurls to use, though there are a couple of notable axe users:
* The Night Unfurls, who is not a Black Dog member in the original, and is not an apprentice of Kyril yet as of now.

* The Night Unfurls whole journey in Yharnam before setting foot to Eostia. Certain characters, on the other hand, eventually catch a glimpse of his past and true character.
* "The Night Vale school district has announced some changes to the elementary school curriculum [...] in addition to the foreign language offerings of Spanish, French, and Modified Sumerian, schools will now be offering Double Spanish, Weird Spanish, Coptic Spanish, Russian, and
* The night-vision goggles from the movie are on display in the queue line for the
* The Night Warriors had a stage for every character, simply named after what each country the fighter was from.
* The Night Watch, a main character thinks about her secret lover and why nobody can ever know about their relationship. As Waters' previous books centered on lesbians, it seems obvious where this is going — but the lover is actually a man (the forbidden love aspect is because he's married).
* The Nightwave alert system offers free weapon and warframe slots every season, and you can buy Orokin Reactors and Orokin Catalysts using Nightwave credits. Since those are the primary "mandatory" things to spend Platinum on, it helps keep the game free even longer.
* The Night We Never Met, Sam Lester is a chef who runs a high-class delicatessen. He's constantly trying to convince his customers that the only difference between the less-expensive but still-high-quality domestic products he sells and the expensive, brand-name imports is the fact that a) they are imported and b) they are brand names. Most of his customers couldn't care less and buy the imports for the "prestige" factor.
* The Nightwing identity passed from Dick Grayson to Damian Wayne, and then Jon Kent, Damian Kent (AKA Dam-El, a combined clone of Clark and Zod), and Van-El (Conner/Kon-El's son) in turn.
* The NightWings all have two-part aspirational names, very often in
* the Nihilist movement in Russia cut their hair short. Ironically, many male members had long hair.
* The Nihilist Priesthood (since the Nihilists regard predestination as slavery, and undead immortality as the path to freedom from it).
* The nihilists also try to get ransom money without actually having the person they're trying to get the ransom for (the Big Lebowski's
* The Nika Riots of 532 AD, when supporters of two rival teams of chariot racing (supported by two different Christian sects) broke out in fighting that ended up snowballing into riots that burned half the city of Constantinople
* The Nikolai Duology, Nina has this reaction while stumbling through a snowstorm... and straight into a pack of wolves:
* The Nilfgaardian Empire believes gods aren't real. They use this as a license to rape, pillage, and loot temples. Given the supernatural weirdness that goes on in
* The NIMBY attitude. Nobody wants, say, a prison or a toxic waste dump built near where they live. Everybody knows that such facilities have to be built somewhere, they would just rather have them built somewhere else. And, of course, there's only so much "somewhere else" to go around.
* The Nimerigar were a race of little people from legends of the Shoshone; these people were said to inhabit the Rocky Mountains. In fact, the
* Then immediately rescues them so that they'll decide not to stake him.
* Then immediately subverted when Kitai rejects the idea, jokingly accuses Tavi of trying to get out of a wedding, and demands that he marry her in a proper Aleran ceremony.
* Then, in 1982, the Association of Mid-Continent Universities (the conference now known as The Summit League) took over the MCAA.
* Then in 1986, they released their last Top 40 hit, "All I Wanted", which had more of a mid 80's adult contemporary sound to it.
* Then, in 1999, Hamlet pulled advertising from theaters as it simply was suitable in a time where cigarette smoking couldn't be done in theaters and advertising for such was pulled, but not before going out with a bang.
* Then in 2013 they won their division and finished third in the West... only to

be
* Then, in 2014, a new film, this time an animated film, "Mortadelo y Filemón contra Jimmy el Cachondo" (Mortadelo & Filemon vs Jimmy the Joker, marketed internationally as "Mortadelo and Filemon: Mission Implausible").
* Then in 2020, we were introduced to Sega Shiro, the son of the master himself, for a series of 60th anniversary short films
* Then, in a later joke, a couple is enjoying a cruise, when one of them proposes. In the excitement of the moment, however, he drops the ring into the ocean. His now-fiance is apologetic and understanding, and the two decide to forget the ring and have a nice dinner to celebrate their engagement. When the server brings the gleaming silver platter to their table, he opens it, revealing a lobster, and what do you think it has on its claw? The donut!
* Then, in an episode where Arthur is trying to just forget about his piano lessons for a while, every show on TV is about someone playing the piano.
* Then in another episode he asked for the remote but when he saw it on the floor just out of reach he declared "it might as well be in china".
* Then in another episode, Ross breaks into his ex-girlfriend's apartment to retrieve his favourite
* Then, in a subsequent case, Jennifer and fellow associate Augustus Pugliese sue J. Jonah Jameson for libel on behalf of Spider-Man. They are winning the case when Pugliese decides he wants to add Peter Parker as a defendant
* Then in August 1996, the rebels launched a surprise attack and reclaimed the city, and kept control of it for the rest of the war.
* Then in Chapter 4: "I am sorry... for keeping quiet." Spoken by Sakura, confirming that she is the mole.
* The Nine, a short-lived television series, centered on the survivors of a bank robbery, and the things that had happened during the event.
* The Nine Dark Worlds of Nazyra are connected to the souls of Earth. Like its counterpart, Averya, it exists on a higher dimensional plane that overlaps the lower dimensions rather than existing apart from them.
* The Nine-Failed Fox, in the Epilogue's True Ending, achieved if Kou's skill stars add up to at least 8. It is an almighty, god-like being that wants to keep Shiori as its servant, but Rem convinces it to restore her life and let her return to her friends and family if the protagonists can prove their strength in a fight.
* The Nine Hells of Baator are for the most part grimly dedicated to the business of combating the demonic hordes and processing damned souls, but on the layer of Maladomini is a place where devils can unwind. Baatezu can exchange harvested souls for a stay in the Carnival Eternal, where they can enjoy a reprieve from their usual duties ranging from one day for 9 souls to two millennia for 999 souls.
* The Nine Hells of Baator, the bastion of devils out to subjugate the multiverse under the tyrannical rule of Asmodeus.
* The Nine Lives of Chloe King, in love with her enemy's son Brian (a muggle), while being the focus of her friend Alec's (also a Mai) affections.
* The Nine Lives of Chloe King, the titular character still has seven of her nine lives and has failed to even remotely attempt to fulfill her prophecy. In addition, her love interest is dying in her arms, and we are left without knowing his ultimate fate.
* The Nine Lives of Chloe King: The villain's son has dated/been friends with The Girl he's been trying to kill. if he took an half hour out of his busy day of being evil he might actually know this.
* The Nine Lives of Chloe King, whom she can't touch without poisoning.
* The Nine Lives of Chloe King, who was destined to unite the Mai prides.
* The Nine Lives of Fritz the Cat, depicts several scenarios in which the title character ends up dying in one way or another, although most of these seem to be hallucinations. Crumb killed off the character in the comic "Fritz the Cat, Superstar", released in response to the film in 1972.
* The Nine Lives of Tomas Katz features the Tuning Fork of Annihilation. When played back over the emergency broadcast system, it causes the destruction of all TV sets and kills all children who hear it.

* The Nine Lives Stealer is pretty cool. It's a +2 sword with the potential to, if the player scores a critical hit (1/20 chance), instantly kill any enemy with less than 100 health. Once its 9 uses are spent, it's still a +2 sword. and if you use the Book of Exalted Deeds, it may be redeemed.
* The nine-month defense of the 'Hero City' of Sevastopol and the fortress which overlooked the city. Besieged from the aftermath of the September 1941 Kiev Offensive until it fell in June 1942, more than 100,000 men died and 200,000 were wounded in its defense. The Soviets used secret underwater submarine pens built into the hill overlooking the city to supply, equip, and reinforce the defenders and evacuate the wounded. After several unsuccessful assaults, the Germans under General Erich von Manstein had to use four Super Heavy Railway Guns (based on the main guns of Battleships), several batteries of Heavy Artillery, flamethrowers, and poison gas to take the fortress.
* The Nine-part Key that someone has to assemble in order to get into the Black Tower.
* The Nine Pea-hens and the Golden Apples", a witch prevents the prince and his love from meeting a second time.
* The Nine Peahens And The Golden Apples": Neither of the characters -the king, the young prince, his brothers, the empress, the old witch, the old servant...- are given names.
* The Nine Peahens And The Golden Apples": The dragon holds the heroine captive and rides a horse.
* The Nine Peahens And The Golden Apples", the empress had gotten a dragon locked up in a cask bound with iron hoops and hidden away in a cellar under her palace. Then her husband goes into the cellar and accidentally releases the dragon.
* The Nine Peahens And The Golden Apples", the mountain's old witch warns the prince she will cut his head off if he fails to take care of her mare properly.
* The Nine Peahens And The Golden Apples", the mountain witch's mare transforms herself and her foal into fishes, later foxes and finally wolves.
* The Nine Peahens And The Golden Apples", the prince "goes nearly mad" with grief when he accidentally frees a dragon which kidnaps his wife.
* The Nines — technically more of a re-ascension, since the main character was a sort of god to begin with until he got addicted to playing various human characters in the world he made.
* The Nine Tailors to marry until the case is resolved, as they might need her testimony against him.
* The Nineteen Nineties, the transition was surprisingly seamless. His image on the actual bags however still uses his 90s design.
* The Nineteenth Wife features the First Latter-Day Saints, a fictional fundamentalist Mormon cult located in the (likewise fictional) town of Mesadale, Utah. The Firsts and Mesadale are closely modeled on the very real Fundamentalist Church of Jesus Christ of Latter-Day Saints (also called the United Effort Plan or UEP) and Colorado City (formerly Short Creek), Utah.
* The nineteen-year-old soldier Private Yevgeny Rodionov of the Russian Army. When he, along with three other Russian soldiers, got captured by Chechen Islamists during the First Chechen War, he suffered torture for several days because he refused to renounce his Christian faith and convert to Islam as demanded by the Islamists. Even when he was threatened with an army knife, he still refused to give up his faith, which got his throat slit by the said knife. Due to his defiance, he has become a sort of national hero in Russia, and many people even demand that he should be canonized to sainthood.
* The "Ninety Angry Ronin" Hiro makes Kensei fight were originally known as the "Ninety
* The Nine Worthies: Nine characters who personified the ideal values of a brave knight. They were three pagans (Alexander The Great, Hector, and Julius Caesar), three Jewish (Joshua, King David, and Judah Maccabee), and three Christians (King Arthur, Charlemagne, and Godfrey of Bouillon), thus uniting the three Western religions (polytheism, Judaism and Christianity) with which most Christians at the time were familiar. It was a very popular motif in art and writing, and there was a

sort of spin-off (to call it in modern terms) with nine lady worthies (where different artists and writers have different lists). All of those figures are still very well-known, but most people are not familiar with the idea of all of them united in a single concept, or with most of them being associated with knighthood.
* The Ningyo begins with Christopher Marlowe entering a dark catacomb underneath a small shack, and about to be bitten by a rattlesnake when the flashback begins to show how it got started.
* The Ningyo: Christopher Marlowe's piece of the map leading to The Ningyo.
* Then in issue #482, Krona turns Gunnhildr's underwear into a thong, giving her an "insane wedgie".
* The ninja Alchemist Warrior Shinobu Negoro has a large, triangular bang covering his left eye that symbolises his fighting style that relies on concealment, dirty tricks and his
* The Ninja Encounter: Rangers' friends are taken hostages in part 1, part 2 just adds a countdown and a monster of the week
* The Ninja Kids and everyone else encountered are puppets, specifically marionettes. This is only truly clear during the character selection screen, where the strings of the hero marionettes are visible.
* The Ninja Kids deal with a bunch of satanists, terrorists and assorted evildoers who want to "resurrect" Satan. They succeed, and you have to fight him as the final boss.
* Then in January 2011, they introduced the Trenta, a 31-ounce cup that
* "The Ninja of other Ninjas" possessing abilities that are unique or significantly rare.
* The Ninja Replacements's wedding and to rescue the other ninja from the Djinn Blade, has Echo Zane, a nindroid built similarity kin to Zane who was found in Dr. Julien's lighthouse to give the poor man some company.
* The Ninja, the antagonist Saigo uses the fake version of this to throw law enforcement and the antagonist Nicholas off the trail, killing a man of very similar build and chucking him off a high tower block face-first to fool identification procedures. (The novel is set in 1980 before routine DNA analysis).
* The Ninja Warriors Again wields a pimp cane that can direct an unseen Kill Sat to fire on your position.
* The Ninja Warriors Again with no technological explanation and the red fire-breathing ninja mooks have teleportation, suggesting that supernatural elements do exist in the game.
* The Ninja World War arc has seen tons and tons of these, with plenty of dead characters brought back suddenly as zombies (both characters that had been seen previously and even a few who were only known by reputation). Cue mass
* Then, in "Let's Find Out", he confronts BoJack about kissing Diane after their engagement. He claims to have found this out via security camera footage along the freeway, talking to his friends on the highway patrol, and
* Then in March 2021, he bought the rights to "Where Is My Mind?" from
* Then in "One Good Scare Ought To Do It!", the haunted house Phineas and Ferb made to scare Isabella's hiccups away is taken away by Doofenshmirtz's Christmas lights just when Linda comes home for Candace to show her, and all that's left is Baljeet which Linda finds insulting. Then the haunted house lands back in the backyard and Candace again tries to get her mom, but Doofenshmirtz' Disintevaporator, which is attached to it, destroys it before they come back out, leaving Baljeet behind once again.
* Then, in order to secure Sparklelord's aid, he tells him his first name (which had been erased from reality to form a pact), releasing an evil ghost wizard who proceeds to lay a curse on him. This does work, but at the cost of making Dr. McNinja Public Enemy #1, and convincing all of his greatest enemies to unite against him in one last, spiteful stand.
* Then in "Puhoy", Finn goes to a Pillow World and dances with Roselinen, a Pillow girl. He comments on how in his world pillows are used for bedding. Roselinin giggles, gives a sly grin and states that they are used for that here too. Finn nervously chuckles and blushes.

* Then in season 5, Robert says this to Jin when going into the smoke monster's lair after Montand. This does not turn out well, either.
* Then in season three, a man named Pat raids the mansion with a pair of men named Darrell and Lewis. Darrell is shot by Melissa and only has enough time to give a quick goodbye before succumbing to his wounds. Darrell is played by
* The Nintendo 3DS's eShop dropped the points system for money, so all
* The Nintendo 64's path through history was littered by the emaciated bodies of partially developed games. Some, like
* The Nintendo Cereal System ad claims "The Nintendo Cereal System is a super part of this nutritious breakfast," featuring two bowls of cereal next to a glass of orange juice, a pitcher of milk, and two pieces of toast.
* The Nintendo Direct at E3 2019 was a double whammy. Sakurai had told fans on Twitter to expect a (as in one) new character reveal, and the Direct started with the reveal of the
* The Nintendo Direct on March 26, 2020, which revealed the addition of a character from
* The Nintendo DS version of Bionicle Heroes got a T (Teen) rating, making it the first and only LEGO game to get this rating, as opposed to E10+ on every other LEGO game. In a similar case, CERO also rates the LEGO games a B (12+) for violence.
* The Nintendo Switch isn’t immune to these. Most are cheap gaming tablets loaded with retro game roms and made to resemble the Switch’s colors and button layout.
* The Nintendo Switch is widely regarded as the best Nintendo console since the Super NES, and its record sales numbers show, however that doesn’t mean it’s without its problems (in addition to the ones mentioned above):
* The Nintendo Treehouse videos demoing the game emphasized its unique, yet intense competitive aspects, focusing heavily on claiming and defending portions of the map as opposed to scoring kill streaks. Nintendo's most competitive game prior to this is
* The ninth (and last official) game in the series, on the other hand, is filled to bursting with straight examples of this trope. Since it was released as essentially a beta, its list of annoying features is long, but this is near the top.
* Then in "Thanks But No Thanks", Candace meets an elderly woman who has witnessed all of Phineas and Ferb's creations, but she has to bring Linda over to her because she's not up for leaving the house. However, whenever Linda comes over, the woman has left her room, and it isn't until Linda leaves that she returns.
* The Ninth Circle series begins with a youth dying in a hazing ritual gone wrong.
* The Ninth Configuration (i.e. as the astronaut who is told that he's going to die alone in space by the possessed Regan McNeill).
* The Ninth Configuration, the astronaut Captain Cutshaw wears ridiculous outfits, speaks in absurd non-sequiturs, and makes himself a comical nuisance at the mental hospital, all in an effort to mask his despairing worldview and his guilt over having to abort a NASA lunar mission due to a mental breakdown.
* The Ninth Doctor became the Tenth by taking the energy of the Time Vortex out of Rose, which began killing every cell in his body.
* The Ninth Doctor hardly gets through an episode without blaming himself and/or apologising to someone for getting them killed, failing to save somebody else, or just
* The Ninth Doctor keeps calling Mickey "Ricky" despite the constant corrections. Then it turns out that Mickey's
* The Ninth Doctor's era introduced the Time War to the series, creating a new justification for why he was the most important and unique of all Time Lords (namely,
* The Ninth Doctor's... lack of a silly hairstyle. Or hair, really. This is notable because the Doctor generally prefers longer hair, so a buzz-cut Doctor was a pretty large signal for where the series was going to go.
* The Ninth Doctor tended to do a big, toothy grin often accompanied with cute little hand gestures, directly lifted from the Fourth Doctor; the key difference

being that Four looked
* The Ninth Doctor was particularly fond of calling humans "stupid apes" whenever he was angry at them.
* The Ninth Doctor, who was in only one series of 13 episodes. As he also has barely any
* the Ninth Doctor, with Jackie Tyler's help, transferring his consciousness into the body of the villain, reversing the life draining devices he sent out, and surfing back to his own body as the man's body "wears a bit thin", so to speak.
* Then, in the 07 November 2010 race at Texas, Kyle Busch did this to a NASCAR official who was enforcing a penalty on him. One (lap penalty) plus one (finger raised) equalled three (lap penalty).
* Then, in the 2020 playoffs, several Steelers players flat-out said they weren't worried about the Wild Card round against the Cleveland Browns, even though the Browns had beaten the Steelers just a week earlier in the final game of the regular season, with JuJu Smith-Schuster in particular shrugging them off as "nameless gray faces" and "the Browns is the Browns". The game went badly for Pittsburgh literally from the first snap, which flew over Ben Roethlisberger's head and was downed in the endzone for a Cleveland touchdown. Cleveland ultimately came away with a 48-37 victory, and "the Browns is the Browns"
* Then (in the case of Lanks) or mortally wounded by a truck crash (in the case of Cyclops).
* Then in "The Chute", Tom and Harry are both convicted of a terrorist bombing and sent to a
* Then in the episode "Trio", when Carter, McKay, and Dr. Keller are trapped in an abandoned mine, McKay tries unsuccessfully to convince Carter that the pubescent boys outside will be more willing to get help for them if she flashes her breasts.
* Then in the expansion, things go to hell even more, and Diablos return is hinted. Here we go again.
* Then in the finale 4 2 Sing gives another concert with Big Hero 6 as their "special guests". Go Go, who had been
* Then in the fourth movie Welker comes back with a much deeper voice for
* Then in the late 90's there was the short-lived, pseudo-fascist Truth Commission, which was supposed to be a stable of South African commandos (who would refer to South Africa as the "Fatherland.") Once the head of the stable (The Commandant) was released, the South African angle would be eased up and eventually they would disband.
* Then in the next episode, Twilight has to up the ante to get AJ back on her side.
* Then in the off-topic thread Opel and TT started arguing over how stupid it was.
* Then in the season 4 episode, "The Grave Danger Job," as the Leverage crew investigates an embezzling funeral director,
* Then, in the season 6 finale, every pony in any position of power has been kidnapped and replaced with a changeling. While this is more of a stealth sugar apocalypse, all leadership being replaced with bug ponies would throw Equestria into chaos.
* Then in the season two episode "The Ghost of General Lee", two crooks inadvertently steal Bo and Luke's clothes (as they're skinny-dipping) when they steal the General. Again, this was just the opening scene.
* Then, in the sequel, it gets kicked up a few notches when Jackie gets captured and tortured
* Then in the very next scene, they find out the show was quickly cancelled due to low ratings.
* The ninth game nearly averted this trope where the endings of some female love interests show some affection between them and their partners. Nearly in a sense that the only affectionate gestures shown are caressing the cheek, embracing, gushing, and
* the ninth game, we get KIERAN, LEADER OF THE FIFTH PLATOON OF THE CRIMEAN ROYAL KNIGHTS! / SECOND COMMANDER OF THE CRIMEAN ROYAL KNIGHTS!.
* The Ninth Gate, a woman who just slept with Johnny Depp's character tells him

"don't fuck with me," to which he responds, "I thought I just did." The TV edit changes "fuck" to "mess" making Johnny Depp's response unintentionally bizarre.
* The Ninth Gate, book collector Dean Corso is called to retrieve a book of The Nine Gates, causing many scary things to happen such as people dying, Corso himself nearly getting killed by people who want the book for themselves for satanic purposes and being followed around by a mysterious blonde woman only known as The Girl.
* The Ninth Gate, Boris Balkan does this after killing Liana in front of her coven, making them all jump.
* The Ninth Gate do it, and will out of love for the craft of book-making and the challenge (plus the money, of course), but they cite the sheer difficulty when feigning innocence.
* The Ninth Gate looks for a book cowritten by Satan, is stalked by a (female) Satan who helps him on his quest, and then later has sex with her to gain immortal power.
* The Ninth Gate, made all the more portentous by Wojciech Kilar's score.
* The Ninth Gate), supposedly co-written by the Devil himself and contained clues on how to summon him in person.
* The Ninth Gate understand the true power of this book" while they flee in terror.
* The ninth issue of the original series was probably intended to be this for a series starring the various heroes from Marvel's 1950s comics. Which did happen, albeit 30 years later, with
* The ninth one has a mysterious figure known only as the Stranger plotting against
* The ninth season had Black Anchor Tattoo, who were considered one of the front runners at the start of the season, facing elimination after a poor performance in episode three, which shocked most contestants (and themselves even the most, probably). The fact that they were eliminated in favor of Tri-Cities Tattoo (who faced elimination for the thrid time in a row) made the elimination sting even more.
* The ninth Super Edition. Usually Super Editions star major characters, and are always about leaders or medicine cats. The ninth Super Edition was revealed to be
* The NIO movement itself is shown to be suffering growing pains, in the form of clashes between the leaders of its various cells over the best means of carrying out their goals.
* The Nipponese ninjas are not Fanon, merely discontinued: one of the many troop types in the first Warhammer Armies book that were subsequently dropped out of production because they didn't sell well enough.
* "Then I Saw Her Face / Now I'm an Amoeba), all of which focus on a particular character (who is not an amoeba).
* The Nishigori triplets are relatively minor characters who tend to provide comic relief and exposition about how figure skating competitions work. However, they're also the ones responsible for kicking off the plot by recording Yuri's reenactment of famous figure skater Victor Nikiforov's program and uploading it online; the video soon
* The Nissan 240Z, with its mix of affordability and high performance, revolutionized the affordable sports car, as detailed in
* The Nissan Cedric. According to legend, Australian advisors told Nissan that in Australia "Cedric" is or was slang for homosexual, to which the Nissan executives replied: "Australia has many homosexuals, therefore we shall sell many cars!"
* The Nisse (Norwegian) or Tomte (Swedish) was a gnome-like creature that lived on farms and helped farmers with taking care of animals and
* Then is used to denote the next item or action in a sentence, ex: Bob cooks a meal
* Then it comes back during the truly epic battle of the final mission.
* Then it gets completely inverted in "Allison from Palmdale," where Cameron adopts the personality and memories of Allison, a girl her personality was based around. Seeing Cameron suddenly acting like a
* Then it gets worse as Sandra notices, and all girls present (including

* Then it got inverted with the liberation of Kuwait by the U.S. led Coalition. While the air campaign went on for over a month, the ground campaign lasted just 100 hours.
* Then it got worse when Henshaw above found about the Alphas. He was tired of living, and realized the conversion process was similar to his own experience. So he decided to study them, commencing mass production to study the process, in hopes of eventually reversing his own state back to normal human.
* Then it happens. The Warthog crashes right through the wall! This moment is prominently featured on the DVD cover. There was also a commercial going around with focus on the CGI scenes in general.
* Then it one upped the one up in the fourth episode of Season 3 where Optimus, after being badly hurt due to the Decepticons destroying the Autobots' base, gets a Came Back Strong.
* The Nitpicker's Guide for Next Generation Trekkers regaining control of the ship, thus leading to the death of a sick child, at which point Data went insane and imagined the remainder of the series.
* Then it's averted because Ichigo marries Orihime, the girl who is both the second
* Then it's played horrifically straight. When Matilda gives birth to her son, the midwife decides to keep the baby for herself and tells Matilda she had a stillbirth, before taking the baby and her husband to New Zealand. The baby is happily raised under the name Finn MacKaulay, and decides to go back to Australia following his parents' deaths. There, he seeks to buy a farm, which leads him to meet Matilda, falling in love and marrying her. Matilda is pregnant with their child and about to give birth when she discovers a box of photographs and letters Finn kept from his parents. The shock and shame are so strong she suffers Death by Childbirth
* Then it's revealed that there's a second set of crystals. The bad guys have already collected two of the four dark crystals before the heroes even know they exist, and steal the other two after the good guys acquire them.
* Then it's revealed that Unalaq is a madman and got Tonraq kicked out of his tribe.
* Then it turned out that whole thing was an elaborate ruse and the character was actually a Consummate Liar
* Then it turns out that he's actually a Klingon sleeper agent who's having trouble "awakening", and those traumatic memories include the procedure that transformed him into a human.
* ...then it turns out that the new Timeline-3 future is even worse than Timeline-1: Liber8 didn't succeed in stopping the corporations from taking over world government, only weakening them just enough that the fighting stalemated, eventually degenerating into multi-faction anarchy, so that the alternate 2030's are a hellhole of constant warfare...in which Kellog is a major faction leader. Basically, anyone who wants to change their own timeline cannot, but if you just want to create a new timeline/universe where you can live like a king by abusing your knowledge of the (alternate but similar) future timeline, that is possible - which suits Kellog just fine.
* Then it was played for laughs when Cartman's cupid set him up with someone "like" him, an
* Then it was revealed that she had somehow gotten the powers of the Spring Maiden between walking out on the family when Yang was too young to remember her and volume five Yang confronting her. If the cutoff age for being a Maiden is thirty, that suggests she's a lot
* then it was sunk, in order to hide it from the Wraith. The remaining Ancients traveled from Atlantis back to earth and presumably told the story of Atlantis to the ancient Greeks. Only leaving out that it was on another planet, in another galaxy.
* The Nix In The Mill Pond", a poor miller becomes wealthy after making a deal with a water spirit.
* The Nix In The Mill Pond" laughs with wicked delight when the hero makes his

fatal mistake that allows her to kidnap him, as she's wanted to do since the moment he was born.
* The Nix In The Mill Pond" sends a flood to separate the couple after the heroine has already paid for her husband's freedom three times over.
* The Nix In The Mill Pond", the female lead has saved her husband from the nixie, and they have met each other again. The story ends with the next line: "They embraced and kissed one another, and no one needs to ask if they were happy."
* The Nix In The Mill Pond", the heroine plays a tune on a magic flute that temporarily allows her to see her husband. When they are separated again, they don't recognize each other until he plays the same tune on his own flute.
* The Nix In The Mill Pond", the hero's father is tricked into promising his newborn son as payment for the riches offered by the titular water sprite. The family manages to keep him away from the pond long enough for him to grow up, but she eventually comes calling and forces his wife into an adventure to get him back.
* The Nix In The Mill Pond", The huntsman and his wife's hometown is flooded by the titular water sprite in revenge for the heroine rescuing her kidnapped husband.
* The Nix In The Mill Pond", the huntsman is captured by a wicked but powerful water sprite and must be rescued by his wife.
* The Nix In The Mill Pond": The titular nixie promises the poor miller she will make him a rich man if he will give him "that which has just been born in your house." The miller naively assumes the nixie is referring to some puppy or kitten, and he promises what she demands. Then he goes back home and finds out his wife has just given birth.
* The Nix In The Mill Pond", the titular wicked spirit forces the protagonist couple through multiple trials before they finally reunite.
* The Nix In The Mill Pond", the wife and her husband are turned into a frog and a toad, respectively, by a malicious and vengeful nixie.
* The Nix In The Mill Pond tries to drown the heroes with a massive flood, the good witch saves them by changing the husband into a frog and the wife into a toad. When the flood subsides, they wash ashore in their human forms and eventually find their way back to each other.
* Then Jade tops them both with the Junior Compu-Sooth Spectagoggles, which allow her to view anywhere in Incipisphere space (thematically, as she's the Witch of Space.)
* Then Jotaro gains the ability as well, though not as long as DIO. Activating it while trapped by DIO's The World lets him move freely during the time stop. However, DIO doesn't figure out how to do this before nearly being killed by Jotaro. During Diamond is Unbreakable
* Then, just a few minutes later, as the guards are dropping him off in class, the teacher declares that something is wrong! He didn't bow to her, so he must be... from the
* Then just as mutantkind is about to get back on track and Cyclops looks like he's about to redeem himself as a leader of mutant kind, the Terrigan Cloud appears. While it gives birth to
* Then later, during the final act, when Jiminy reads the Blue Fairy's message that Geppetto was
* Then, later on? Shigaraki wakes up with All for One and all the quirks it was carrying ...and still has his Decay quirk ...and it's now ranged.
* Then later they accidentally become entwined in the rope, fall through a ceiling vent, hang upside down and shoot all the heavily armed gangsters.
* Then later, when he finds out that Cosmo (whom he had successfully captured and then let go after making him give him a pot of gold) was actually a fairy instead of a leprechaun:
* then leads to his bowl capsizing, causing Hayley to try and help Klaus again:
* then leaves when Homer says it came about when he owed the mafia money.
* Then Legacy of Lunatic Kingdom completely reverses the situation when you go to the moon, and see a Bad
* Then Let Me Be Evil: A character is treated like a villain long enough, they decide they might as well become one.

* Then Let Me Be Evil: A person really tried to be good, but so many people insisted on seeing the worst in them that they've submitted to being as bad as those people accused them of being.
* Then Let Me Be Evil: Deeming someone as evil without having done anything evil, and after getting fed up they decide to become evil or at least act the part. If mistreated and abused for no reason their persecutors have ironically crossed the Moral Event Horizon themselves. Their first unambiguously villainous act may well be their Moral Event Horizon.
* Then Let Me Be Evil: If a person who's trying to be good is mistreated enough, they'll submit to being as bad as (if not WORSE than) people accused them of being.
* Then Let Me Be Evil: They treat the character like he's evil, so now he becomes evil.
* Then Let Me Be Evil: They've treated me like a monster. Guess what? They've created a monster and I will destroy every last one of them until there's no one left!
* Then Let Me Be Evil, throwing fellow gladiators under the bus in order to rise through Batiatus's favor.
* Then Let Me Be Evil: When everyone else keeps treating you as a wicked person, you decide that you may as well prove them right.
* Then Lhasa, Tibet got an asteroid dropped on it because the protagonists were headquartered there.
* then-Lieutenant Price has to carry Captain MacMillian out of Pripyat, Ukraine after a helicopter falls on him. Fortunately, Lt. Price can put Capt. MacMillian down whenever he needs to fight, and while MacMillian cannot move independently, he's no slouch as a stationary shooter. Once he's put behind the Ferris wheel and assuming that both survive the resultant shootout (in effect "hold the line" until a helicopter arrives), he only has to be picked up again for the final dash to the evacuation helicopter by which time the danger should be passed.
* Then Louise bribes the other guy to throw the fight; meanwhile George decides to throw the fight himself, so they spend the entire fight not hitting each other, waiting for the other to hit them so they can fall down.
* Then made even worse when he hires her teacher and one of the guys that kidnapped her earlier to bring her back because he believes the Avatar took her.
* Then Marvel introduced Galacta, Galactus' estranged daughter. She has the same cravings her dad has, and is
* Then Mori does it again. In a tournament interview, he was asked about certain characters becoming playable, to which point he shut down the possibility of Celica being playable, mainly because she cannot fight. A while later, it is revealed that Celica is in fact playable, but the fighting is done by the artificial weapon Ex Machina: Minerva, which was issued to her by the aforementioned Kokonoe.
* Then much later down the line, when he first reveals his plans to use the Straw Hats and the combined Supernovas to purge Sabaody of all slavers, free the slaves, and potentially deal a killing blow to the slavery industry world-wide to Boa Sandersonia and Koala, both of whom are former slaves. Sandersonia goes nearly
* Then Mulan adds oxygen to the fire by trying to put it out with her fan.
* Then near the end of the first half of the fifth and final season Walt finds himself strapped to a pipe in an office. He has somewhere he needs to be,
* Then, nine months after that, Greg Farshtey (the head writer), announced that his wife had given birth to a beautiful baby girl. Turns out Mata Nui was right after all!
* Then not even twenty years later, their country was sold out to Nazi Germany by France and Britain, annexed as the Protectorate of Bohemia-Moravia and her population used as slave labor for German war industries for six years. After that, they lived under a repressive Stalinist Communist dictatorship for forty-five years
* The No. 1 Ladies' Detective Agency has an episode dealing with one that lampshades how it's just like a mystery novel plot.
* The No. 1 Ladies' Detective Agency, Mma Ramotswe investigates a doctor who sometimes seems to be very competent, and sometimes seems to have no idea what he's doing. She discovers the doctor is routinely switching places with his twin brother

(who definitely isn't a qualified doctor), so they can run two offices in separate cities at the same time, and make twice as much money.
* The No. 1 Ladies' Detective Agency: Precious Ramotswe falls squarely into this category, despite the fact that she rarely solves murders, isn't all that old and is hardly little in the waist department.
* The No. 1 Ladies' Detective Agency series by Alexander McCall Smith) subverts almost all of this trope, being a kind and overweight Botswanan lady who solves everyday problems, like absconding husbands, by a sharp psychological perception, persistence and being able to win the confidence of others.
* The Noah Ark from the same manga is another example: an intelligent colony ship designed to carry all human knowledge as well as 140,000 samples of human DNA.
* The nobility of Goa Kingdom routinely sent out all their trash out of the city and let it pile up to the point that it became a small town unto itself, the Grey Terminal, a zone where even the
* the Noble Classes controls the Labour Classes due to the former's high Cha stat compared to the latter's low Res stat. As of Book 7, when and how high Cha seems to work depends entirely on the plot.
* The noble houses in ASOIAF in general work like this, both in appearance (Martin's genetics is... peculiar) and in behavior (nobles are encouraged to imitate their more famous ancestors). One character (Joffrey Baratheon) was even correctly outed as not a real Baratheon by numerous characters, by virtue of him neither looking the part nor acting like how a proper Baratheon acts. By contrast, Robert's bastard children all act in a stubborn manner and have the Baratheon coloring.
* The noble houses of the Landsraad, mostly by virtue of being the male side of the Bene Gesserit breeding program (and many of their daughters being recruited into the Bene Gesserit). An unusual case of a hereditary aristocracy that really
* the Noble Sacrifice is not expected to survive this, but it is possible by various methods, such as blocking the original attack, buffing the Sacrifice to tank it, or just resurrecting him afterwards. Appropriately, his attack line sounds pleasantly surprised that he's alive at all.
* The Nobles are this: Each have between 10 and 20 neural centres for each individual, collectively referred to as "Congress". Also, representative of the readers' suggestions.
* The Nock Gun. The recoil was so great that people frequently wound up with broken shoulders after firing.
* The Noda who sneezed was Noda Miki, the main character, but the Noda whom Homura fell for is her big sister.
* The Noddy Shop and also uses the word "hell". The show itself is rated TV-Y, which usually doesn't allow these sorts of things.
* The Noddy Shop and having what they considered terrible acting and music.
* The Noddy Shop, a show aimed at preschoolers and early elementary schoolers, mainly features characters who are older than the target demographic, with at least three main characters (Noah, Aunt Agatha and Granny Duck) being in their 60's. Only three characters (the puppets Whiny and Whimper, who are babies and the human character Truman, who is in early elementary school) are in the age range of the 2-7 demographic the show is aimed for. However, in one episode, an adult character mentions she has a five-year-old grandson.
* The Noddy Shop a week before TV Ontario did in the show's home country. As a result, the affiliates that ran the show from Monday-Friday at the time ran a majority of the episodes before Canada got them.
* The Noddy Shop because the segments used were split in half and most of the show focused on the new live action characters.
* The Noddy Shop, began its run on PBS affiliates around the same time they dropped the latter show.
* The Noddy Shop by dressing up as a cat to scare away mice that she believes stole a ring belonging to Kate's mother.
* The Noddy Shop episode "Following Directions", the goblins have trouble assembling their new grill because they haven't read the directions.

* The Noddy Shop episode "Skunked". Whiny and Whimper ask who has has had an accident when smelling a terrible scent, but it turns out to be a skunk that has sprayed Truman.
* The Noddy Shop episode "Slugger", Noah accidentally calls Sam "Itchy".
* The Noddy Shop episode "The Big Mess", the toys and Johnny freak out when a vacuum cleaner malfunctions.
* The Noddy Shop episode "The Birthday Party", which is about Noah Tomten's birthday, first aired on September 11, 1998, two weeks before Sean McCann's 63rd birthday.
* The Noddy Shop. For instance, the children are friends with Aunt Agatha, the sister of their grandfather Noah.
* The Noddy Shop for Johnny Crawfish (Percy Travis III) and Gertie Gator (Paula Chavis) with Dennis Scott and a costumed Noddy character (whose voice was provided by Cindy Bandes Furman, also the singing voice of Island Princess), while the second show, performed at the 2000 Canadian National Exhibition, just featured an unknown female presenter and a Noddy costume character (still voiced by Furman) doing the songs.
* The Noddy Shop had a particular fondness for Johnny Crawfish out of all the new puppet characters created for the framing segments. A lot of merchandise happened to feature him on the packaging and he even got his own music video.
* The Noddy Shop had a weird example of this trope: the song "Partytime", while being a song about birthdays, only says "Happy Birthday" once and is more about how giving is better than receiving on birthdays.
* The Noddy Shop had many pop culture references its' 4-7 target audience wouldn't understand:
* The Noddy Shop had one called "Slugger", in which Truman and Sam want to play baseball with a group of Little Leaguers. However, a ball possesed with goblin magic comes into play, changing the circumstances.
* The Noddy Shop has a group of singing penguins called the Do-Wop Penguins who occasionally narrate the action going on in the shop, and are prominent in some of the show's musical numbers.
* The Noddy Shop has a talking lobster named Johnny Crawfish that is Noah's pet. In addition, there are toy characters based on animals that also speak, like Bonita Flamingo, Sherman Turtle and Granny Duck.
* The Noddy Shop has characters whose names are either human names given to toy and pet characters or descriptive words based on their personality or function. Warloworth Q. Weasel, however, doesn't fall into any of these categories, as his name is unique.
* The Noddy Shop has Whiny and Whimper, who are male and female babies dressed in blue and pink.
* The Noddy Shop in the episode "The Big Race" called "Slow and Steady" that was all about this trope.
* The Noddy Shop: In the song "A What If World", one of the lines Island Princess sings is "When you make believe it all comes true", which is a shout out to her verse in the theme song, "A place where make believe comes true".
* The Noddy Shop, in which the toys thank Noah Tomten for caring for them. After the passing of Sean McCann, who played Noah, in 2019, the song becomes significantly more poignant in the sense that this song is thanking not only the character, but the actor, for his hard work.
* The Noddy Shop is shown in which Bo Peep and her sheep decide to split up to become famous, but then realize that it would be better if they did an act together.
* The Noddy Shop, loved the Ruby Reds the most out of the show's puppet characters because of their jazzy harmonies.
* The Noddy Shop— Made for the United States market by Rick Siggelkow and had several celebrity guest stars from the United States, but was filmed in Canada with a majority of the actors and puppeteers being Canadian.
* The Noddy Shop, meaning that both shows possibly take place in the same universe, or at least in neighboring towns.

* The Noddy Shop: Most of the puppets in this show look cute and innocent, with them having either button eyes or being based on cute critters. However, the other puppets in the show aren't as nice. Johnny Crawfish, Island Princess and the Ruby Reds are some examples of this, with the first having weird-looking eyes, a mouth with teeth that always seems to be open and a huge chin, the second having eyes that might seem creepy and the concept of the latter (five singing lips that aren't attached to a face in a box).
* The Noddy Shop: Notable in that some of the actors commonly associated with this trope began their career on this show.
* The Noddy Shop (partly live-action): 65 episodes over two seasons, not including a Christmas special.
* The Noddy Shop premiered in the late 80's, when cable was considered a luxury by many.
* The Noddy Shop, retired from acting in the early 2000s to become an author and has rarely been heard from since.
* The Noddy Shop segments were changed in the show, and everything else remained the same. However, according to a showreel for the actress in question, a British version of the second season was planned with Susan Sheridan redubbing all of Noddy's lines in the live-action segments, but it was left unaired.
* The Noddy Shop segment where he tells a joke, and there's rarely any song on the show where he doesn't sing at least one verse. Also, Johnny got a non-canon music video to promote the show and he is listed before Planet Pup on the "Meet My New Friends" page of the 2000 Noddy annual. However, this is averted as far as episode plots go, as he has only one centric on him, "The Fish Story".
* The Noddy Shop's episode on the day that a fan who knew the show's creator Rick Siggelkow uploaded it, the popularity of said fan's episode uploads boomed. Originally, it would take 3 days for an episode to reach 1,000 views, but after this episode, the new uploads got 1,000 views in 24 hours or less.
* The Noddy Shop series as being stories Kate, one of the child characters, told to her brother Truman and her friend DJ while they were in the Book Nook of the titular shop.
* The Noddy Shop take place on holidays. Of those six, five of them aired before the holidays they were about:
* The Noddy Shop tells the story of a group of toys and a pet lobster who come to life when humans aren't around. In the second season, the toys could talk to the kids.
* The Noddy Shop, the American and Canadian re-packaged version of the show.
* The Noddy Shop, the boat in the backyard of the shop is inspired by a boat Sean McCann, who played Noah Tomten, used to play on as a kid that his brother had made for him.
* The Noddy Shop: The episode "The Fish Story" has a song called "I Can Do Better Than You".
* The Noddy Shop used song lyrics from what appeared to be the actual scripts for the show, with some of these using prototype names for the characters. On the lyrics page for "A What-If World" and "Partytime", Gertie was called "Crockodile", and in "Too Much Monkey Business", Gaylord is called "Swami".
* The Noddy Shop uses Nashville talent for the singing voices of the puppet characters. For instance, Joseph Wooten of the Steve Miller Band voices the lead Do-Wop Penguin. This is justifed, as the show was produced in Canada and the songs were written and recorded in Nashville.
* The Noddy Shop was limited with its dubbing. As of now, the only dubs of the show that were confirmed to exist are Latin Spanish, European French, Castillan Spanish, European Portuguese, British English (Noddy story segments, 1st season only), Hebrew, and Polish.
* The Noddy Shop was Stage 4 when it first aired, before going into Stage 6c for years after it was taken off the air. Two decades later, it would become a Stage 2 thanks to the people who originally watched it as it aired rediscovering it.
* The Noddy Shop were given to Matt Ficner, who created their puppets, rather than hiring another voice-over artist. Similarly, Noreen Young played a puppet she made,

Granny Duck.
* The Noddy Shop, whenever Warloworth is caught playing a trick on the toys, he has to take care of Whiny and Whimper, Noah's two baby dolls.
* The Noddy Shop: When Sean McCann died, Joseph Marshall, who later uploaded the entire series with creator Rick Siggelkow's permission, uploaded the official music video of "Thank You For Being You", the song from the Season 1 finale "Noah's Leaving".
* The Noddy Shop, where he played the main character, after a couple of fans posted tributes to him specifically mentioning the show.
* The Noddy Shop with the only audio being in English, though it did have subtitles.
* Then Odin and his brothers used the flesh and blood of Ymir to make Midgard. They made the sky from his skull. The blood? That's what's known as the "ocean".
* The nods to dragons and unicorns in Disney's Animal Kingdom were hinting towards a land that they ended up never building, Beastly Kingdom, focusing on fantasy creatures. The only things left of that (so far) are a dragon-shaped rock formation near Pandora, a bridge that looks like the entrance to a castle, and the big dragon who appears on the park's logo to the confusion of many a guest. The concept of including mythological creatures into the park was eventually picked up by Expedition Everest's Yeti, but has yet to be paid off in full.
* The "no earthly good" self-flagellation? Preceded by yet another authority figure's rant,
* The No End House. It has rooms that it can't possibly contain, rooms that are inexplicably dark and filled with fog, and rooms that break the laws of physics, including bringing dead people back to life.
* The No-End House. It moves on its own, its first five rooms constantly change their contents to depict visitors' worst fears, and its last room is a neighborhood-sized
* Then of course, being the origin story of Superman, there are loads and loads of fics that tells the tale of the Man of Tomorrow (literally) in the Smallville universe.
* Then, of course, their most infamous claim, made on April 1st, was the **spaceman** cheat, which supposedly summons a UFO in
* Then, of course, there's Señor Señor Sr., who only became a villain after Ron pointed out that his home was already half way to being a lair.
* Then, of course, there's the fact that Naruto is the 4th Hokage's son...something most of the audience had already figured out since they look similar and the guy's face is carved into the side of a freaking mountain. Just one look at his picture and most of the audience had already figured who Naruto's father was. If you took out the whisker marks on Naruto's cheeks and grew his hair out a little, they could be
* Then, of course, there's the Gadelaza, which has a beam that can blast a ship big enough for deep space exploration to bits in one shot.
* Then, of course, there was the chant of "Meeska, mooska, Mouseketeer!" Given that the original show premiered during the height of the
* Then of course we have others outside the system, such as the Monitor, the Anti-Monitor and the newly introduced World Forger, all sons of the creator of the Multiverse Perpetua. It's unknown where she and her kids are connected with the Endless.
* Then, of course, you have the Order of Mata Nui, a secret organization of badasses dedicated to protecting the Universe and occasionally doing the dirty work; the Brotherhood of Makuta, led by the above-mentioned
* then of your base heavy weapon ammo capacity, and most maps only contain enough ammo to fill 60%-ish of your capacity, so you can't even fire it once every mission! It takes several seconds to fire. And it can wipe out entire rooms of enemies (or an entire stage of the end boss) in a single shot.
* Then, ogres. They don't have as many instances dedicated to kill them as trolls, but they make up for it by being everywhere, including in places where they couldn't

* The No Horizontal/No Vertical challenge, depending on the stage or the game, can be deadly hard, if not outright impossible, even on Easy mode.
* The Nohrian and Hoshidan Scramble DLC's also get into the fun by having
* The noises other penguins make are endearing, but not exactly conductive to peace. Case in point, if you live in the coastal areas of New Zealand or southern Australia, and your home happens to be located on top of a little blue penguin breeding colony, you can forget about sleep, what with the males' raucous (
* The noisy neighbor Zoila visits Chaparron and Lucas house in every sketch of
* The Noisy Silent Movie", multiple shots of the Stooges operating a giant pipe organ are all used several times throughout the short if you look closely.
* The Noisy Straw: Producing noise when slurping through a straw even if the drink is not empty.
* the Nokk before turning it to ice so she can ride it in the very end.
* The Noldor domains in Beleriand and Númenor of the Dûnedain in
* The Nomad Soul towards first person shooting action, and more worrisome, towards beat'em up. None of the segments were particularly good, although some sequences were optional. Woe be to you if you reach the dramatically linear third act of the game without as many medikits as you can buy, however. No going back, and no purchasing more.
* The No Man's Land arc around the same time also may have had an impact on her. After failing to live up to Batman's expectations operating as Batgirl, Huntress sided with an
* The Nome King after the Jitterbug makes him dance uncontrollably he falls down The Pit of No Return, Tom and Jerry try to save him but he slips from their grasp and they accidentally pull off his boots and socks.
* The nomenclature of British tanks was a double-edged sword when psychological warfare was involved. It's a lot easier to be frightened by a "Tiger" or "Panther"
* The nominally heroic Sunset Company sacks all of the cities they conquer, which is played for
* The nominated charity, the Diana Trust, was embroiled in a long and mutually ruinous lawsuit with the noticeably mercenary Franklin Mint, who were producing Diana tat for money and even though their business flourished in the wake of her death, had reneged on a promise to donate to the charity. The charity suffered big losses, and the bad publicity nearly killed the Franklin Mint. Franklin Mint had paid $150,000 for a particular dress, so as to have exclusive use of it for their Diana dolls.
* The no-more-than-eight Chibi-Usa is good friends with Setsuna, who is at least in her late teens, but more likely early-to-mid twenties. Then throw in the fact that the Setsuna Chibi-Usa is friends with originally is the thousand-year-old (AND reincarnated) Sailor Pluto, and the gap is a bit bigger. In the manga, Chibi-Usa herself is over nine hundred but looks like a child, and even then Setsuna is significantly older than her.
* The Non-Adventures of Wonderella, 2005 calls and wants his shirt back... and maybe a second chance?
* The Non-Adventures of Wonderella, after an embarrassing conversation.
* The Non-Adventures of Wonderella and puts a stop to it by dressing like a supervillain and declaring that the heroes' petty squabbling has allowed her to launch her world domination plans. They immediately come to their senses and make peace with each other.
* The Non-Adventures of Wonderella fits here, some more blatantly than others:
* The Non-Adventures of Wonderella. (Fortunately, at least Rita, who records it, now knows not to show up.)
* The Non-Adventures of Wonderella: Has always stuck around at Stage 2, despite being a prominent image source on this wiki.
* The Non-Adventures of Wonderella has Ginormous, who travels the universe eating things that deserve to be eaten. She occasionally talks him out of eating the Earth.
* The Non-Adventures of Wonderella: "I NEED TO SHOOT YOU—TO SAVE YOUR LIFE!"
* The Non-Adventures of Wonderella: in just a few individual strips, the joke

requires her to have some difficulties fighting an opponent.
* The Non-Adventures of Wonderella is filled with puns normally, but some strips take the cake.
* The Non-Adventures of Wonderella: Parodied when Thor tries to make his excuse not to see Wonderella again after sleeping with her once on the basis that it wouldn't work out because of this trope because he's immortal. Wonderella was expecting something else and gets so angry she disproves his claim of immortality.
* The Non-Adventures of Wonderella the mirror-universe versions of Wonderella and Wonderita wear costumes with the colors reversed.
* The Non-Adventures of Wonderella" Then they fly their entire fleet straight into it.
* The Non-Adventures of Wonderella. The test was multiple choice, with an automatic failure to anyone who darkened the perfectly pure, white ovals. ("Racial purity must never be compromised!")
* The Non-Adventures of Wonderella. This naturally creates a beer monster, and then things get weird. Well, weirder.
* The Non-Adventures of Wonderella: This seems to happen to Wonderella frequently:
* The Non-Adventures of Wonderella. When the Vaguely Greco-Roman Godhead plans the destruction of the world to pave the way for a newer, better one, Wonderella shows the Godhead the value of human life... not with a well-reasoned speech, but by calling them "dickholes" and complaining that her sister can fly and she can't. Impressed that one of their creations should show such unbridled passion, they decide to leave the world as it is.
* The Nonadventures Of Wonderella when Wonderella, having seen her parents (one of whom doesn't even look human) having sex, curls up into a perfect ball. As in literally spherical with no protrusions.
* The Non-Adventures of Wonderella when Wonderella throws her "Wonderang" (also her tiara, just like Wonder Woman's) at a bad guy and misses. She then gets him to sing a song until it comes back and lodges itself in his skull.
* The Nonadventuresof Wonderella, where Wonderella helps Pinocchio to become a corporation so that he can be declared a real person. Unfortunately, the corporation was selling wood made from his magically growing nose — and all of that turns to real noses as well.
* The Non-Adventures of Wonderella, which apparently is enough to blast the sorceress to pieces. It's sort of taking that line "The most powerful weapon of all is friendship!" literally.
* The Non-Adventures of Wonderella, who is treated just as much of a joke as the rest of the cast.
* The Non-Adventures of Wonderella: Wonderella walks in on her parents having sex. Except her "father" is a vaguely Greco-Roman godhead made up of an amalgamation of a number of different gods and goddesses, so it's really not clear what she saw. While she's busy trying to repress everything, the godhead comes over and tries to talk it out. It doesn't go well.
* The Non-Adventures of Wonderella, Wonderita — who has the same sort of costume — advices her to show up in her costume first to check out a blind date so that she won't be recognised, saying she does that all the time.
* The NON agents, who give their names to a crowd of three people who hear three different versions.
* The non-alcoholic cocktails created by Willikins the butler certainly mimic the beneficial effects of alcohol for the recovering alcoholic Sam Vimes.
* The non-anthropomorphic animals from the Forest Of Doom used to be this trope to the extreme, until the show changed the art-style for regular animals, and they were replaced by generic, more realistic ones.
* the non-Brazilian Latino traffickers, from the middle to the end of the film, planned to drop an atomic bomb from the Amazon in Santa Catarina. If they wanted to take revenge on the government, they could attack Brasília, if they wanted to do something iconic, they could attack Rio de Janeiro or São Paulo.
* The Non-Bronyverse gets along extremely well with children, but he's especially close friends with the CMC.

* The Non-Bronyverse has less of a shop there, and more of a single unicorn proprietor who sells TD the staff Reginald for a song.
* The Non-Bronyverse has TD, who gets along extremely well with children and genuinely loves teaching Cheerilee's class, despite how much he hates being in Equestria.
* The Non-Bronyverse involve this. One where TD gets turned into a pegasus mare by poison joke, and another where he becomes an alicorn princess. Both times he's rather horrified.
* The Non-Bronyverse named Huo and Watt. He can barely manage to keep a straight face as he runs through the gag.
* The Non-Bronyverse once he tells her he spent two months in Equestria.
* The Non-Bronyverse the protagonist, along with his family, are transported to Equestria.
* The Non-Bronyverse when Philomeena tells Oswald that TD is his "father", not his "mother".
* Then once more right in front of her as he, Gunther and Wade save everyone, helping them onto the sleigh only for Kick to stop Gunther before he helps Kendall into it.
* Then once you've had your fun with that, acquire a jump-jet and leap into the air before
* The non-changelings of the Dominion seem to have little problem believing in Space Jesus, as they know the Founders are an alien race, yet
* The non-Cure main characters are usually referred as extra characters: "
* The Nondescript and actual focus of their attention. In the end, he never does get the makeover he was hoping for, but by then, he’s gained enough self-confidence that it longer really matters to him.
* The Nondescript to the point where his mother often came home with the wrong kid.
* The non-DSi Nintendo DS does not support wifi hotspots with WPA or WPA2 security, meaning that back when Nintendo WFC was in service, if you wanted to play games online you had to either spend money on a USB dongle that requires a PC running Windows XP or higher or downgrade the security of your router to WEP, which has been shown to be crackable even by someone with minimal hacking skills compared to WPA and especially WPA2 wireless security.
* the none of which survived. Apparently, she likes to look for guinea pigs.
* The non-human aspects of changelings' appearance in the nWoD are normally hidden by a powerful illusion called "the Mask." They don't maintain a masquerade so much as they sometimes put out the effort to not maintain one.
* The "Non-Illegal Robbery" sketch is about a group of criminals who aren't even plotting anything that's criminal.
* The non-linear nature of the game, and the ability to pick up party members and items in any order, was directly inspired by
* The non-meta outside perspective is even worse, as only maybe a few hours pass while the Prince runs from his tent at the Persian camp to Farah's room and tells her his story (and that's
* "The No No Song" by Ringo Starr. Residents of Saskatchewan, Canada growing up in the 90s may remember this song best as the commercial for Audio Warehouse ("where they said no no no no, don't wait anymore/no GST and no money down...").
* Then on Pinkie Pie, while upside-down inside her closet. Pinkie finds it hilarious.
* The non-powered combat armors also have rather bulky shoulders, with the Reinforced Mark II, NCR Ranger, and Riot Gear armors making both genders look like linebackers. Ditto the Reinforced Leather Armor.
* The non-romantic relationships also give bonuses. For example, maxing out the bear Okku's respect for you causes the
* The non-romantic variant is also seen in the prologue, regardless of Hawke's gender, with their twin siblings Carver and Bethany. Carver is a tall, brawny
* The non-sapient gorilla Marimbo became a goddess after a god of merriment challenged her to a drinking contest, and drank himself to death trying to keep up with her. It's implied that they were

* then on the streets of a city through traffic, until they arrive at a large department store.
* Then, on top of that, there's his relationship with his mother, who was the
* The Noob is set in the VR of the "Clichequest" MMORPG. (Mostly, at least.)
* The Noob, Ohforf is punished by listening to the bards, and temporarily goes crazy.
* The Noob, Ohforf's crotch agrees to go on a suicidal quest against the brain's will when Hypatia says she might "do anything" for a man brave enough to go.
* The Noob. The roleplayers debate about who has the most tragic past, every one of them saying their parents were killed by orcs.
* The Noordegraaf Files, Akila is this to Theo. Her introduction page is TITLED "The Lancer".
* The Noordegraaf Files dyes her hair blonde after she is rescued from her kidnappers. Akila, who is telling this part of the story, quotes the trope name verbatim.
* The Noordegraaf Files has Akila, who looks sort of like a cute swamp creature with spiky blue hair and breasts. However, calling her anything alluding to the fact that she looks like a fish-person is bound to get her very angry. She also grows tentacles on occasion. Sirens (the bird kind) and other monsters are also featured — humans are also in the comic's universe, but haven't appeared.
* The Noordegraaf Files has some major flaw that troubles them throught the story. Time will tell if they overcome said flaw, or - tragically - don't.
* The Noordegraaf Files has this as his main character flaw. He's never been through any true tragedy or loss in his life, and this makes him overly trusting and foolhardy. Given the fantasy world he's in is no fairy tale, he's in danger of getting himself killed.
* The Noordegraaf Files has Violet. She doesn't talk and is very, VERY flat-chested, so Theo initially mistakes her for a boy. The only possible way of noticing her true gender is that her arms are very feminine in appearance, and she has a ponytail.
* The Noordegraaf Files Katrina after seeing her practice sparring. Although, given Kat has had at least thirty different boyfriends, this might not be an uncommon trait in the comic's universe.
* The Noordegraaf Files. Once this occurs, your best bet is to stand back and wait for her to calm down - after any possible hostiles in the area have been beaten into the ground, of course.
* The Noordegraaf Files. She's implied to be very good looking, but hurt her (or her boyfriend), and you'll get a sword in your throat quicker than you can apologize. Not that an apology would help, of course.
* The Noordegraaf Files, Violet does this to Kat in their sparring match. Or at least TRIES.
* The Noordegraaf Files wears a very simple mask, with just two white circles covering her eyes. She may not be outright evil, but it's stated she's not completely sane.
* The Noordegraaf Files who has blue spiked hair that's as tall has her head. Davis', Katrina's and Theo's hairstyles could also count, to a lesser degree.
* The Noordegraaf Files would count. Giant guns? Check. Magical warriors? Check. Sword fighting? Check. Robotic soldiers? Check. Cybernetically enhanced women? Check. Homemade Flamethrowers? Check. Dysfunctional yet Badass Teenagers? Triple - check.
* The NOOSE base off Palomino Highway. It has security guards and electric gates, but no one will stop someone (even someone who looks like
* The Noose Hangs High. It doesn’t out work so well because they target the wrong people (e.g. stealing something from a guy who stole it himself).
* The Noozles, Osgood the lizard pops up out of nowhere at least once an episode to comment on what is going on.
* The Noozles, Sandy, gets caught in a snare set by a kiwi she is following in an episode. With her wearing a dress, the shot of her upside down is of head and shoulders only.

* The Nopon are very cute. They know other races find them cute, and will use it to swindle them.
* the. No problem for Fangio, who broke the lap record 9 times in the remaining 10 laps (he cut the time difference with the lead driver by a third in the first lap), and ended up getting his final Formula One race win.
* The Nora outcast anyone who breaks their laws. Interestingly, this works quite differently than any historical forms of exile. Outcasts stay close to Nora towns but are not allowed inside, and are not allowed to talk to anyone. The strange part is that this is
* The Nordics had their own version, Åsgårdsreien (depicted above), or The Ride of Asgard. It was generally seen as a ride of the dead that would cross the skies, often around Christmas times. It might have originated the common European myth, or at least contributed a fair amount of its mythology, such as the huntsman that leads it
* The no-really-it's-not-me-it's-this-other-guy version happens repeatedly to Bertie in
* The Norelco Christmas ad has been running annually since at least the late 1960s. Animated in
* The Norfolk Dolls of the FWA/WWA Academies started wrestling in their early teens and were
* The Norfolk, VA Police Department used to have an ad showing an officer missing anniversaries, holidays, and other major family events.
* the "normal" child will be completely ignored while the disabled child is waited on hand and foot because the parents feel the child needs their help more. This can also apply to physical disabilities and/or health conditions.
* The Normal Heart, a TV movie set in New York City during the AIDS crisis in the early 1980s. Based off the Larry Kramer play of the same name.
* The Normal Heart: Implied to have existed before the play, when Ned (A) unrequitedly loved Bruce (B), who loved Craig (C), who had a crush on Ned. However, the play opens with Bruce and Craig happily in love in a long-term relationship, while Ned's one-sided crush on Bruce continued.
* The Normal Heart. Many gay men refuse to give up sex even though it may be the way the then-unknown AIDS is transmitted.
* The Normal Heart: Tommy has a crush on Ned, who has a crush on Bruce. Ned is dating and in love with Felix, and Bruce is with Albert. Bruce's previous boyfriend Craig (who died at the play's start) used to have unrequited feelings for Ned. It's also implied that Emma has feelings for Ned.
* The normal implications of this trope are unpleasantly subverted in a flashback in
* The normal intent of this trope is inverted when Light uses a porn magazine to divert attention from an
* The normal life cycle of Goa'uld includes the spawning of new parasites by extremely rare slug-like queens, with Jaffa specially prepared to incubate the larvae; this almost always happens off-screen.
* The normally brunette Heather Burns is blonde when playing Cheryl in
* The normally fashion-conscious Rarity gets butterfly wings that quickly go to her head during "
* The normally reserved Jon Snow breaks down after burning Ygritte's body in the forest.
* The normally sexually omnivorous Zii seems to have stuck Gary firmly into the friend zone from very early on, basically because he's such a hopeless geek. Her attitude towards him is mostly
* The normal mode has the Store Manager, who has 8 HP, +3 Attack and +2 Defense, making him a pain in the rear to defeat, as he can easily KO any one at full health if he's lucky enough to roll a 6, or sometimes a 5. Even Marie Poppo, Arthur, and Kiriko, who have the largest HP pools (7 and 8 respectively), aren't safe.
* The normal reaction that the reigning World Champion will have when the music plays off the current holder of the Money in the Bank briefcase.
* The normal Skill Shot requires plunging into the right lane (which cannot be

changed beforehand).
* The normal townspeople aren't much better. They celebrate a second Halloween during summer, their elections for mayor involve people throwing seeds towards their preferred candidate and they release a bald eagle so it will kiss the new mayor. People are also allowed to marry woodpeckers. And among their citizens they have an overly-cheerful couple running the mortuary and a hillbilly old coot who happens to actually be a supergenius. Soos put it in better terms: "Everyone in this town is a tad strange. Except, ironically,
* The normal version are violent criminals with a spaceship, who attack other spaceships, just like
* The Norman Conquests Norman is having a drunken phone conversation with his wife, Ruth, while Ruth's brother, Reg, is trying to explain the overcomplicated rules of his board game idea to his wife Sarah, his sister Annie, and her would-be boyfriend Tom. The conversation lulls happen just as Norman forgets to keep his voice down, leading to such outbursts as, "I SAID YOU ARE A SELFISH BITCH!", and "LOVE!? WHAT DO YOU KNOW ABOUT LOVE?!"
* The Norman Conquests, Ruth tells her husband that he's "deceitful, odious, conceited, self-centred, selfish, inconsiderate and shallow." Norman angrily denies being shallow.
* The Normandy generates Mass Effect fields that it "falls" into, in order to mask its emissions when in stealth mode. Just
* The Normandy landings of Operation Overlord on June 6th, 1944 are the most famous, and largest, real life example to this day. The Allies invaded Nazi-held France across the English Channel. The Americans landed at Omaha and Utah Beaches, the British at Sword and Gold, and the Canadians at Juno. Of these five beaches Omaha is the most well-known because it was the most difficult, with the Americans suffering heavy casualties before finally breaking through. They were helped by a massive deception operation: though the Wehrmacht had fortified virtually their entire 3,000 mile Atlantic coast (the so-called "Atlantic Wall"), the obvious target was the short distance from Dover to Calais. So the Allies faked a build-up of troops and materiel at Dover and sent fake messages in old codes they knew were compromised, and
* The Normandy SR-2's pilot chair is so spiffy that Joker has a Nerdgasm over it. Given that he's got a bone disease that requires him to spend most of his time sitting, his reaction is justified.
* The Norman invasion of Wales began in 1067 under William the Conqueror, who perceived the war as unending. Unfortunately, nobody told his son and successor William Rufus that, and what ensued was something that didn't officially end until Edward Longshanks conquered it, bringing this long conflict to an end in 1283. And even
* the norm are specifically built to mimic those biological forms. Even for utilitarian robots, however, some design aspects carry over; for instance, many such robots have an "arm" (or two, or several) with joints at both ends and in the middle.
* The Norm is this. This is deconstructed many times, with Norm genuinely struggling at adulthood and him trying to be mature contributing to his depression.
* The Norn are characterized as a blend of Native American and Viking. They enjoy all forms of contest, prize skillful hunters, and consider life-or-death battles as places to prove their worth. Their individualism in all things, even war, means that they lack any army of their own.
* The Norn in Eye of the North can shapeshift into anthropomorphic bears as well. Whenever you talk to a hunter for the first time, they'll turn into one and attack. Additionally, there's the Nornbear, a corrupted version you have to kill, and whose brief existence inspires a
* The Norscans use giant Warp-mutated mammoths. The Arabyans also use war elephants, but theirs are normal beasts trained for combat instead of monsters like the ones used by the Norscans.
* The Norse god Balder was so greatly revered that every object, every element and every organism in the world

* The Norse god power "Undermine", which is available if the player chooses Heimdall when advancing to the Classical Age, allows the player to destroy enemy Walls and Towers effectively, but deals limited damage to Town Centers and Fortresses. Heimdall's myth unit, the Einherjar, also has decent attack against buildings.
* The Norse Gods get into a bit of this too, though it is by no means nearly as bad as the Olympians though.
* The Norse have Ulfserkers and Raiders equipped with axes, as well as the long-ranged Axe Throwers. Notably, those are all basic troops, while elite soldiers such as Huskarls wield swords instead.
* The Norse Hero: Fenrir, when Izuku is at his most enraged, is in a life or death situation or if his loved ones are in that situation, he takes on a form he dubs "Ragnarök". He grows to be 13-feet tall, he grows a pair of horns on his head and his eyes and embers go from orange to purple.
* The Norse Hero: Fenrir with his Fenrir quirk, but he has also learned how to use it by two long-accomplished Pro-Heroes (one of which being the Number 2 Hero Endeavor) and has an emergency hero license.
* The norse influences of the Rohirrim include a wide distribution of these particularly Éomer and Théoden. Notably, the
* The Norse myth unit known as the Mountain Giant (which is available if the player chooses Njord when advancing to the Heroic Age or Hel when advancing to the Mythic Age) is quite effective against buildings, and has a special attack that allows him to deal 120 crush damage to a building in a single strike.
* the Norse pantheon a goddess of love named "Astrild", she is in fact the creation of a Romantic-era English poet; the original Norse goddess of love was Freyja.
* The North American airing (on the Japanese premium channel TV Japan) of
* The North American P-51 Mustang used by the American and British air forces in
* The North American release of the game misspelled Xigbar's real name, Braig, as Bleig.
* The North and the South, when Orry and George are in a tavern having a beer, the bartender suggests they sit back-to-back so if someone asks the if they'd seen one another drinking, they could say they had not.
* The North Avenue Irregulars is about five churchwomen revruited to help Treasury agents to bust up a gambling racket.
* The North Carolina State University Wolfpack considers the University of North Carolina Tar Heels to be their rivals. The NC State side of the rivalry is quite heated and intense. UNC, however is too busy with
* The Northeast Corridor rail line that runs diagonally between New York and Washington, DC is officially east-west between New York and Philadelphia, but north-south between Philadelphia and Washington. The popular conception is that the
* "The Northern Air Temple", wherein said protagonists defend the titular temple... from a Fire Nation assault (the
* The Northern Frog titular beast is speared through its mouth, chained down, then has its head bashed in with a rock with the help of the invisibility-giving Ring of Solomon.
* The Northern Parliament (Soviet Union) uses SN, presumably for Soviet Navy.
* The Northern Pikes song "She Ain't Pretty" (she just looks that way)
* The northern reaches of Skyrim feature spectacular auroras. Whilst they fit with the northern, snowy province, they are far more extravagant than those featured on Earth and come in some pretty otherworldly colors. One of the
* The Northern regions of the Old World in general. The Northern Wastes where the Chaos Hordes reside are a bitterly cold, harsh wasteland full of horribly mutated monsters more than capable of tearing a heavily armed, experienced warrior limb from limb — provided you're not first killed by the local Chaos-worshipping tribes or by Chaos Daemons. Then there's the Troll Country which not only has tons of trolls but predatory animals such as wolves and bears that are thrice larger than regular beasts. This is all in general due to these lands being very close to the mutating influence of Chaos, as the north pole is covered by a gaping hole in reality that leads straight to hell.

* The Northern Swordsman, an editor unit, used to be a reskinned Longswordsman with a round shield. It was reworked so that he wields a small axe intead. again in a viking flavor.
* The Northern Water Tribe has three castes: The Royal Family, the warrior class, and finally, peasants. By
* The Northern White-faced Owl, popularly nicknamed the Transformer Owl, has a very interesting threat display. When faced with a competitor of similar size, it raises its wings to make itself look bigger, but when faced with a larger competitor, it adopts a 'concealing posture', holding its feathers tight against its body, covering the paler feathers on its chest by holding a wing over its front as if it were a cape, and focusing its eyes intently on the competitor, giving an impressive glare in the process.
* the North Hollywood shootout of 1997, the other bled to death), the police had fired over 650 rounds and the robbers themselves had been hit ten times.
* The North is not above betrayals and realpolitik that Ned accuses the South. While they were praising Robb as he was winning battles on the field, the stronger houses started going against his orders when the going got tough and after losing they put all the blame on him. The
* The North Korean pilot who tries to bomb a nearby ammo dump every day at five is nicknamed "Five O'Clock Charlie."
* The Northmen of the Seven Kingdoms of Westeros reflect the gruff, straightforward "code of honor" aspect, whilst the southern half of Westeros embodies genteel chivalry. And then there are the Northern Mountain Clans, who are essentially are as to Northerners as Northerners are to Southerners.
* The North Remembers. He is then betrayed by House Lannister, the house that had promised him power, when they take away his daughter Roslin, who is married to said liege lord, and execute her because Edmure had allowed Robb Stark's widow to escape with Ser Brynden Tully. He then promptly dies after hearing the news.
* "The North Remembers". Joffrey finds that Ser Dontos, one of the knights competing in his name day tournament, has arrived for the rounds drunk. So he orders his guards to make him "drink his fill." It's only by Sansa's intervention that he doesn't die.
* The North Remembers), where Jaime is a comic-relief character who becomes religious at the end, and Ned Stark is executed not because he discovered the illegitimacy of Cersei's children, but because he considered Cersei too weak to rule because she was a woman. At the end, the Lannisters are either dead or publicly humiliated.
* The North/South divide in the UK between the (now) poorer industrialised
* The North stopped hailing him as a hero, though, when he wanted to "go easy on" what they viewed to be the "traitorous" South during Reconstruction. He became one of only three U.S. presidents in history to have the Senate try him on impeachment charges. Most (though
* the North Vietnamese after his plane was shot down. Forced by his captors to participate in a televised press conference in 1966 for propaganda purposes, Denton blinked out the word "torture" in Morse code. This was the first proof that the US military had that the North Vietnamese were torturing American POWs.
* The North Vietnamese Army and Vietcong are no better either, with both factions being trained and supplied by the Soviets and using said training and equipment to mercilessly kill both South Vietnamese civilians and American forces brutally. In addition, the latter also partake in
* the North, Wales, and Scotland are no-go areas for the Conservative Party. Her management of the Strike itself suggests an exceptional degree of ruthlessness and state force was condoned to beat the miners into submission. Let's say her death was cheered and celebrated in many former mining areas.
* The North Wales Hospital (known locally as Denbigh Asylum, or Denbigh Mental)
* The northwestern part of Mexico, but especially Chihuahua, the biggest state, have a climate that can only be described as Australia's weird nephew. The capital city of Chihuahua (named
* The Northwest family are popular, well-respected aristocrats, going back to

Nathaniel Northwest, the founder of the Gravity Falls.
* The Northwest family got away with not inviting the workers who built their mansion to their party (that they promised them), along with many major crimes, due to their wealth and their status as the founding family of Gravity Falls (
* The North Wind sends the penguins to a safe house in Madagascar via cardboard box.
* The Norwegian Campaign of April-June 1940 placed special emphasis upon the rapid seizure of Oslo, which was accomplished rapidly but not with sufficient surprise to capture King Hakon or the country's military-political leadership. Norwegian resistance persisted after the capture of the Capital and was bolstered by the arrival of a Franco-British force, but then quickly crumbled as said force was recalled to France.
* The Norwegian constituent assembly of 1814 had several. Most notably the on going feud between the speaker, principal of the University
* The Norwegian dub had Eirik Espolin Jonson as Brock up until Advanced Generation, in which Erik Skøld voiced the character from then on. Jonson reprised the role in
* The Norwegian online grocery store "Kolonial" (an old Norwegian term for "corner shop") decided to preemptively avoid
* The Norwegians in the "Grouse" reconnaissance team are enthusiastic but can't hit their targets on the firing range, as they haven't had much time to train and have been drinking too much the previous night. One of them puts away his Thompson submachine gun, draws his Colt .45 and advances on the target firing, then twirls the weapon with the slide locked back. The female British SOE captain is not impressed, draws her own gun and puts a bullet through each bullseye while giving a
* The Norwegian title translates to "Rain of Freedom". This is not a well known type of rain; you'd have to watch the movie to know what the title is talking about.
* The Norwegian TV2 is an odd case where they give their own titles to movies that haven't got new titles in Norway. Like while the DVD title of
* The Norwood Builder is another example, in which a young man was accused of murdering a wealthy old curmudgeon who had recently named him his heir.
* The Noseless) have been in a damaged state since so long ago that said damage itself has become part of their iconic appearance. In fact, these ruins and others (such as the Parthenon) played a major influence on Albert Speer's theory of ruin value.
* The nose of P-40 with its distinctive radiator housing just cried for a shark mouth. That scheme was popular everywhere amongst the P-40 units, including versions featuring tigers, skulls, and anything else with a mouth.
* The Nosferatu antediluvian Absimiliard is seen as a father of monsters, as he's produced monstrous children known as the Nictuku who have a habit of hunting down and wiping out chunks of the rest of the clan. The mythical
* The Nosferatu are legendary for their abilities to gather information. While many take on a
* The Nosferatu Embrace warps people who receive it, to the point that they become atrocious wretches that cannot be seen in public without risking the Masquerade (luckily, they have powers to get around that). Some people get more messed up by the Embrace than others, like the Camarilla Justicar Cock Robin, whose mouth is more of a beak. He primarily communicates in Morse code, has to be fed by his assistants, and - in the rare cases that he succumbs to Frenzy - is noted to feed by gouging out his victim's eyes and drinking deeply.
* The Nosferatu is a vampire Clan cursed with the supernatural ugliness that goes way below average. Most of them fall under ''Fearsome and Clearly Inhuman' while the "prettiest" of them are no better than 'Ambiguously Monstruous'.
* The Nøkk (or Nyx) was a Scandinavian water spirit who could appear as a beautiful man or white horse, but who's real form resembled a bundle of twigs floating in the water. He would use his supernatural charm to lure people into the water to drown them, but lost power over the victim if they shouted his name. Fossekallen was similar, but only appeared as a man, and would use his fiddle to

charm people instead. He also lived in waterfalls (Foss in Norwegian). Some lucky humans could learn from him, and become almost supernaturally good at playing the fiddle.
* The Nostalagia Critic itself as Rachel Tietz was replaced by Tamara Chambers when Tietz left for acting jobs in California. Chambers and Tietz are somewhat similar-looking although Chambers is a little more chubby. They never play the same characters, though.
* The Nostalgia Chick after Sandy says that she now knows that Danny truly respects her.
* The Nostalgia Chick again, they'll put her coffin in the sun just to freak her out.
* The Nostalgia Chick, and given it goes right with Lovecraftian names such as Cthulhu and Azatoth is apparent that they're going all the way.
* The Nostalgia Chick and his commentary for the first "Spooning With Spoony".
* The Nostalgia Chick and Lindsay (her smarter and nicer actress), the former obliviously holds up a certificate that actually says "Extortion University awards you a useless degree in film".
* The Nostalgia Chick and Nella don't react well to gruesome pictures of foot-binding.
* The Nostalgia Chick and Nella; however, "My BFF, Nella" subverts the trope by revealing that their relationship is actually a business venture—the Chick pays Nella to look good and take her abuse.
* The Nostalgia Chick are friendly at first (or as friendly as the Chick can be), but when Chick discovers Lupa has Todd's affections but doesn't want them, she's so jealous that she tries to kill the redhead.
* The Nostalgia Chick as #2, but admits that other than the flying monkeys, there's not much to say about her. So instead, the Chick just says "here's some monkeys" and shows videos of chimps dancing to "Yakety Sax" for the next ten to fifteen seconds.
* The Nostalgia Chick, as part justification for the high-grade (cameras in Nella's house across the country, stealing Todd's government pay records, that kinda thing) stalking she does.
* The Nostalgia Chick, as she herself abuses Nella, doesn't like to show weak emotion, and makes a lot of off-color sex jokes.
* The Nostalgia Chick, as well as their real-life counterparts (Doug Walker and Lindsay Ellis), have been described as such. Given the 2018 #ChangeTheChannel movement, though, that is probably no longer the case.
* The Nostalgia Chick, before telling her "I'm still going to mastubate to your picture tonight!"
* The Nostalgia Chick. Both snobby, self-righteous and think they're better than everyone else, she beats on him but is pleasantly surprised to see him call her out over it (even if she does ignore it), and she's his inspiration for reviewing but knows how awful she can be.
* The Nostalgia Chick breakdown and both of them running offscreen, you'd think the ship had sunk if it weren't for the chorus of "Baby Come Back" playing over the ending credits.
* The Nostalgia Chick, but it didn't fit for their characters to do the same.
* The Nostalgia Chick, but turned it up a few notches when she became Dark Nella.
* The Nostalgia Chick can get her head exploded and only need happy pills to cure the minor headache she got.
* The Nostalgia Chick clashes with the Critic's the results aren't pretty.
* The Nostalgia Chick, desperation for power and psychopathic child tendencies) as well as their differences turning ying-yang (overly dominant/worringly submissive, emotionally repressed/can't hide anything, hates kids but loves animals/hates animals but loves kids), much to her self-loathing denial and his clingy love.
* The Nostalgia Chick, despite the fact that he only wrote the music, not the lyrics.
* The Nostalgia Chick different from the Chick's usual grin, which is just far too wide and teeth baring-y to be anything but disturbing.

* The Nostalgia Chick doesn't mind being called pitiful, judgmental, a shut-in or even facing the prospect of a painful death at the hands of her former best friend. No, all she cares about is the great insult of being called a nerd.
* The Nostalgia Chick does this too. At one point, she was talking about bad Disney sequels and then ended up revealing that her uncle molested her.
* The Nostalgia Chick. During Nella's song at the end, she mentions the Chekhov's Stairs (that the lead pushed someone down at the climax of the film) that have been there since Act One.
* The Nostalgia Chick ends her "Dreamworks vs. Disney" two-parter with one of these.
* The Nostalgia Chick episode, when the Critic is reasoning with her about why he made her do the movie, he pushes the door and she pulls, which should actually open the door but it remains closed.
* The Nostalgia Chick episode where Doug successfully makes her giggle in nearly every take.
* The Nostalgia Chick finds herself unable to get out the word "nice" in her Top Five Least Worst Disney Sequels, so settles for "less mean".
* The Nostalgia Chick for about a year. Even she couldn't properly explain it.
* The Nostalgia Chick for "realistic baby dolls". Baby Colic, Baby Scarred For Life, Baby Death Wish... that kinda thing.
* The Nostalgia Chick gets to hold the long note and plays it for laughs.
* The Nostalgia Chick, gives Disney villains helpful advice and enjoys playing in God's domain just a bit too much.
* The Nostalgia Chick gives her and Nella garish 80s fashion makeovers. But even though they're meant to be hideous, the costumes themselves are fun in their blatant 80s-ness.
* The Nostalgia Chick go down pretty quickly when she chloroforms him and he tranquilizes her. Justified, as this was for comedy.
* The Nostalgia Chick had Andre the Black Nerd on her Blip show, he instinctively closed the show by asking viewers to like and subscribe, saying that Youtube will violently punish those who don't include that message.
* The Nostalgia Chick had redeemed itself. But what did the next scene involve? ...aliens.
* The Nostalgia Chick had to be stared at by sad puppies for a while until she was forced to break out of deadpan mode and do her running gag:
* The Nostalgia Chick has a big breakdown in Spooning With Spoony after being raped by the titular character. The next episode later, she's dragging Nella everywhere to dance and shooting laser beams at her with delight. Two years later, she flinches and tries to hide her face when she's near Spoony and it's obvious she's nowhere near over the rape.
* The Nostalgia Chick has been going on for nine months at writing and is steadily driving her closer to a padded cell.
* The Nostalgia Chick has her assuring the viewer that she is done this time.
* The Nostalgia Chick, in her early videos, wore glasses, but quit after losing the frames. Her beleaguered best friend Nella often wears glasses as well.
* The Nostalgia Chick in the chest for rejecting Todd again, even though Todd has no interest in the former and has always stalked the latter.
* The Nostalgia Chick. In the Chick's eyes, Todd is the every way perfect man who'll fix her, and she's driving herself crazy in order to attain him. Critic, on the other hand, is the comfortable flirt who jacks off butter and sings about how everyone should be slutty but is just too fucked up for her to think a proper relationship with him could work.
* The Nostalgia Chick." In the Chick's words: "Can it be that this movie has redeemed itself with a mere one joke?!"
* The Nostalgia Chick is a LARPer, and manages to get in a little affectionate ribbing while doing so:
* The Nostalgia Chick is an expert on all kinds of disasters and glees over Disney being "a veritable treasure trove of gruesome ways to die".
* The Nostalgia Chick is like this sometimes. Justified by the fact that she's

trying to act like she's too intellectual to enjoy the things she reviews.
* The Nostalgia Chick is still just a shut-in alcoholic who'll never make anything of her life.
* The Nostalgia Chick is Tease acting like an actual scientist would in one scene. Also, neither of them have real degrees.
* The Nostalgia Chick is the ultra-unlucky version, as he dated the titular Chick back in high school, but is now her roommate who is constantly either abused or forgotten.
* The Nostalgia Chick is trying to kill Critic, but she was doing it independent of the rebellion.
* The Nostalgia Chick. It was a little too firm to be believed anyway, but lost all credibility when Doug and Lindsay confirmed later that the characters had already had sex at this point.
* The Nostalgia Chick lately. The fans think that she really does treat Nella badly and that she really is a neurotic mess. Lindsay's even said that maybe she needs to go even more hyperbolic to hammer the differences in. This has died down since Lindsay has transitioned from the Nostalgia Chick to a more serious critic/video essayist.
* The Nostalgia Chick moments, she's not keen on showing that she cares.
* The Nostalgia Chick movie because she knows how it feels to have a mother who thinks you're a disappointment.
* The Nostalgia Chick, Nella and Tammy use the Wii FIT to insult the hell out of each other instead of just using it for exercise.
* The Nostalgia ChickNella comes running out of the ocean and deliver a sopping wet Glomp.
* The Nostalgia Chick. Not quite there yet, however, as it was established early on that the cause of it was some kind of mid-mid-life crisis or depression.
* The Nostalgia Chick often acted as if her character was mean to her best friend Nella. Quite some viewers of her web video series took this abuse seriously and criticized Lindsay for not treating Nella better. It got to the point that Nella herself had to type a statement that they are just performing an act.
* The Nostalgia Chick originally had Lindsay's own Tennessee-tinged, typically feminine, quite lilty voice. Now she has a much lower sound, growlier and fitting her "ladette alcoholic who stopped caring" personality.
* The Nostalgia Chick over pretty boys and musicals is what manages to bring the old Nella back.
* The Nostalgia Chick parody who agreed with N. Bison about everything. When Part Four came around, it was found out she was just pretending to be sweet and stupid while trying to kill him off and take charge for herself.
* The Nostalgia Chick robot for a while. As it was fairly crudely built, we can assume it was pretty much just a glorified vibrator with human emotions.
* The Nostalgia Chick's "Dark Nella Saga" was this all the way. Nella left no scenery unchewed, Lindsay's acting is... not the best ever and that's still awesome, both because she knows this and Nella herself can actually act legitimately scary while still being funny.
* The Nostalgia Chick sequel gets an Honorable Mention for similar reasons; she found it dumb, but still more interesting than the original.
* The Nostalgia Chick's had a few, the most obvious being the Dark Nella Saga.
* The Nostalgia Chick. She has a thing for weak men, but what she loves about them is making them weaker.
* The Nostalgia Chick, she's even willing to have sex with his corpse.
* The Nostalgia Chick, she takes time from the synopsis to analyze various details.
* The Nostalgia Chick. She tears apart girly movies for a living. You do the math.
* The Nostalgia Chick shirt over a nearby chair in guilty memorial of the Kirk vs. Picard fight that got her killed.
* The Nostalgia Chick shows off this ability in her Top Ten Dance Crazes list, burning her BFF Nella's shoulder.
* The Nostalgia Chick) shows up as well, though by this point there are nearing twenty men in the main cast, so the female reviewers are still ridiculously

outnumbered.
* The Nostalgia Chick sociopath who fights dirty and gets turned on by weakness. He's a girly, weepy psychopath who likes to be dominated.
* The Nostalgia Chick, Spinister, Fangry, Gaihawk, Barricade, Roller Force, and Horri-Bull, among others, all sport a good level of pink. Blue is more equally divided between the factions.
* The Nostalgia Chick's show. When she turned into Dark Nella and got some modicum of payback, the fandom cheered like they were at a football match.
* The Nostalgia Chick started out like this, taking all the punishment to make the Chick look better, but has steadily grown a backbone since the Dark Nella Saga and can now call the Chick out on her bullshit.
* The Nostalgia Chick's trailer plays this for laughs and describes the Dark Nella Saga as a battle between evil and "slightly less evil". (Dark Nella being evil and the Chick only being slightly less.)
* The Nostalgia Chick sulks that now she can't see. Subverted overall in that she functions perfectly well without the glasses, and rarely wears them after that episode.
* The Nostalgia Chick) summed it up best when she said God would judge the Chick harshly for how low she's fallen.
* The Nostalgia Chick surreptitiously sets up cameras in her BFF Nella's parents' house. On the other side of the country. In Nella's bedroom. Without Nella's knowledge or consent. Repeatedly. Poked fun at, in that Nella is every bit as indignant about this as you'd expect.
* The Nostalgia Chick's video "Thanks for the Feedback" detailing a date between Chick and the Critic. In the original draft, they would have slept together and then been informed that they were actually brother and sister. This idea was scrapped prior to filming.
* The Nostalgia Chick that most of her jokes will be centered around lusting after "The Area".
* The Nostalgia Chick that she was about a second away from orgasming.
* The Nostalgia Chick that she was going too far with the abuse, Elisa unwillingly filled the abused best friend role.
* The Nostalgia Chick the Jem dolls might just be a blatant money-making fad, but at least she knows what she wants to do with her life, while Barbie (see above) seems to have ADHD or something.
* The Nostalgia Chick: "This is going to hurt me a lot more than it hurts you."
* The Nostalgia Chick. This is most likely due to the site's views on gender equality and feminism.
* The Nostalgia Chick to die, it's pretty easy to infer from her growing alcoholism that she wouldn't really mind it.
* The Nostalgia Chick, "Top 11 Most Inescapable Christmas Songs", etc.).
* The Nostalgia Chick to punish Maven for annoying her when she's (the Chick) still not awake yet. Maven stops her in the hallway, calling her Lindsay and asking her to hold a toy duck. The Chick throws the duck at her and storms off, saying she hates being called Chick. Maven is understandably confused.
* The Nostalgia Chick to task on how the heroine never uses her bird sidekick's flight to solve any of her problems (until, of course, the climax):
* The Nostalgia Chick used to be, but now wants to distance herself from those days as much as is humanly possible.
* The Nostalgia Chick villain Frollo as the tenth hottest animated guy, due almost entirely to the appeal of this trope.
* The Nostalgia Chick was dying and said she would accept having sex with his dead body if there was no hope when he was alive.
* The Nostalgia Chick was hurt enough by her playing that he gives in and does the crossover review she wanted to do with him.
* The Nostalgia Chick wasn't fooling anyone when she said she would be the last person to fall for a guy whose face she'd never seen.
* The Nostalgia Chick went on a similar rant at the end of her "Worst Disney Sequels" review, saying that it was negligent parenting to not care how idiotic

your child's entertainment is.
* The Nostalgia Chick were pleasured by Linkara, or so they tell him in "Linking Up With Linkara: the "Cincinnati Helicopter", the "Oklahoma City Taco Stand" "I don't know how he did to both of us at the same time..."
* The Nostalgia Chick. When exiting his bathroom, Kyle accidentally nudges Lindsay's boob. Lindsay gets a look of shock, then glares.
* The Nostalgia Chick when she has her hair down and wears messy clothes, either.
* The Nostalgia Chick: When she's annoyed and is trying to find the right words to say, the titular Chick talks with her hands a lot more.
* The Nostalgia Chick) where they made Linkara think they had an epic, once-in-a-lifetime threesome.
* The Nostalgia Chick who falls almost instantly, she was too oblivious to even notice.
* The Nostalgia Chick, who he never really notices making several thinly-veiled assassination attempts for her own ends.
* The Nostalgia Chick with her, he tries to get out of it by saying, "Yeah, I gotta go wash the dog...the fish...so...", but he gets dragged into it anyway.
* The Nostalgia Critic (1998) shows the Critic standing next to a giant footprint and flipping the bird upward.
* The Nostalgia Critic, according to Rob, Santa Christ's age is around 2000 but he started losing his memory at 1200.
* The Nostalgia Critic a legitimate typo, was done on purpose as a joke since he spends a good portion of the episode beating his head with a book trying to forget he ever saw it:
* The Nostalgia Critic, a line of Kool-aid juice boxes were prominently advertised as having "20% juice", as if that was a positive.
* The Nostalgia Critic almost always in-universe refers to himself or is referred to as The Nostalgia Critic, or Critic for short, but in his review of Doug's First Movie, his explanation of why he hated the Doug cartoon was actually related to real life teasing that Doug Walker experienced (not the Critic character, Doug himself) over his name and comparison to Doug Funnie, while admitting that the cartoon itself is just
* The Nostalgia Critic, and a mask when appearing in the light) also don't vary on wardrobe very much, except when the situation calls for it.
* The Nostalgia Critic, and he only did it so that people would like him.
* The Nostalgia Critic and is not specifically made for those projects to begin with.
* The Nostalgia Critic, and it depends on how he's feeling if he'll be embarrassed about crushing on guys or open about it.
* The Nostalgia Critic, and it's sadistic fun to see how he'll react to the next horrible thing happening to him.
* The Nostalgia Critic, and pointing out all the mistakes in the universe makes the little troll miserable.
* The Nostalgia Critic, and tells Hyper that he's trying to come to terms with new feelings.
* The Nostalgia Critic, and that it was creepy that fans think Malcolm and her deserve what he does to them.
* The Nostalgia Critic, and the Nostalgia Critic is the only one to share his name.
* The Nostalgia Critic and trying to kill the Critic every five minutes. There's also Handsome Tom, who changed his "hero" shirt into one that says "villain".
* The Nostalgia Critic and Videogame Confessions have been so long since they were updated, one could say the same for Ask That Guy (the host) and Dominic.
* The Nostalgia Critic and yells a long stream of psychotic screams and grunts.
* The Nostalgia Critic annoying, his big brother The Other Guy slaps him around and controls him for no reason other than for fun.
* The Nostalgia Critic apparently do always stay on during sex, confirmed by "Spooning with Spoony".
* The Nostalgia Critic appears in the fridge and starts talking, all he can do is stare in disbelief and throw away his bottle of Knob Creek.

* The Nostalgia Critic, a project he had been wanting to do for a long time. Unfortunately, due to the show being less popular than the Critic's and generating less site traffic, Demo Reel ended up having financial and production difficulties. Doug eventually brought back the Critic with the last episode of Demo Reel revealing that it was just purgatory for the Critic, retconning a bit of his previous character arc in the process. Since bringing the Critic back, Doug's reviewing style is accused of having become more mean spirited, such as being much quicker to attack actors involved in the films he reviews. He himself has stated in several vlogs and commentaries since the Critic's return that he doesn't care as much about offending fans as he did before.
* The Nostalgia Critic are bad, he admits that there are occasionally one or two funny jokes.
* The Nostalgia Critic arrives through flying and naturally lands this way.
* The Nostalgia Critic as a result of this, and many prefer when the show was just Doug sitting in his basement in costume yelling tirades at the camera.
* The Nostalgia Critic, as Doug wasn't exactly thrilled with having to return to the Nostalgia Critic, and many fans feel that at times this shows.
* The Nostalgia Critic, as he mutters that he's not surprised his own mother (established to be a horror) would try to kill him.
* The Nostalgia Critic, as he's simply credited as "Polite Purge Leader"; Henry is actually the name of Zoey's boyfriend.
* The Nostalgia Critic, as well as his nickname "The Ghost Who Walks".
* The Nostalgia Critic. At one point, he used one of the character's obsessions for tickling to bring up "Tickle-me Amy" (a very obvious parody of "Tickle-me Elmo"). It starts out innocent enough, but then the doll starts saying some... not very child-friendly things. He doesn't actually say it, but the look on his face does.
* The Nostalgia Critic before the game, her energy gets zapped and she ends up losing.
* The Nostalgia Critic behind the scenes, Doug and Tamara say that during the couch scene, Hyper wanted to slit her and Critic's throats to preserve the moment.
* The Nostalgia Critic breaking him into bringing him back, while at the exact same time his co-writer and brother Rob is in NYC and so unavailable to talk to.
* The Nostalgia Critic), but Critic is scared of what she could do to him and she hates admitting emotions.
* The Nostalgia Critic, but has some character moments in there and a lot of people think it isn't worth Doug constantly apologizing for it.
* The Nostalgia Critic, but he tries to convince us that he's just a normal player when really his love and sex life are both freak shows.
* The Nostalgia Critic, but not many sports fans shout "Go! Go! Go!" when their team is on defense (the clip he cuts to clearly shows the Green Bay Packers scoring a touchdown against the Bears).
* The Nostalgia Critic), but there's also Santa Christ taking a level in jerkass.
* The Nostalgia Critic, but when it comes to secrets he can't seem to help himself.
* The Nostalgia Critic by cutting to a picture of the monster wearing a trenchcoat and dark glasses. No one seems to notice the six ton behemoth when he's wearing that!
* The Nostalgia Critic came off like "fake geek girls are real and they're bad" (because Hyper was using boy toys that she didn't like and pretending she did to get Critic to sleep with her). Later episodes focused on the kidnapping and whatever else she did bad to him to maybe dilute this.
* The Nostalgia Critic can be very silly and not all there, shows a profound knowledge of various topics, in particularly film and comedy, as shown in his editorial videos.
* The Nostalgia Critic can eat sugar-frosted burrito-stuffed, lard-filled, liposuction-butter Hot Pockets all the time and still stay as skinny as he does.
* The Nostalgia Critic catchphrase is telling us about who he is and what he does. Seems simple enough, but factor in that he's a mess of insecurity regarding practically everything, and that catchphrase becomes self-reassurance.
* The Nostalgia Critic cereal in particular, and Barney states the reason as "it

came from your wife's box", causing Fred to snap and chase Barney with a gun.
* The Nostalgia Critic Christmas. Like with Halloween, has done at least two seasonally appropriate videos every December that the show's been in regular production. Unlike Nostalgiaween, these reviews don't have a subseries nickname. However there is a traditional celebratory freakout that gets more fantastical each year. His love even goes as far to give his Top 11 Lists an extra step beyond.
* The Nostalgia Critic constantly succumbs to peer pressure because he desperately wants to be loved and those arguments nearly always end with him crumbling for not much reason.
* The Nostalgia Critic cooking scene as he cooks a roast chicken to instructions on the TV. Then the dog hits the remote, which changes the cooking show to a workout program. Magoo proceeds to give the chicken a workout. The Critic immediately asks, "Yeah! How long until he switches to the porno channel?"
* The Nostalgia Critic counts down from "number banana" to "number relativity".
* The Nostalgia Critic. Critic doesn't care about Todd either way, what he's wary of is the Chick driving herself crazy over him.
* The Nostalgia Critic, Critic wonders what happens in reality while Doug has one of his Quailman fantasies, leading to a cutaway showing Skeeter being concerned about his friend as he stares into space.
* The Nostalgia Critic, Dan and his friends do this before the ad break, complete with Freeze Frame Ending. Critic tries to do it too, but doesn't know how they freeze frame like that. 80's Dan and crew remain frozen for much of the second half of the review.
* The Nostalgia Critic darkly deconstructs this one. He's so powerless usually, all his life even, that any whiff of power makes him cling onto it so hard he'll even consider suicide to keep it.
* The Nostalgia Critic does he mention relating and having nightmares where he's exposed.
* The Nostalgia Critic. Doug jokes in a commentary that Malcolm looking handsome in the suit is why the character's so popular.
* The Nostalgia Critic, Doug Walker uses his real name, but the Critic's persona, opinions, and backstory are wholly fictional.
* The Nostalgia Critic, drugged and raped by Spoony, having to get saved in the Brawl, and so on.
* The Nostalgia Critic, each was accused of copying the other — a rage-filled video reviewer who critiques children's media. They had a crossover feud, each did a review in the other's style and have remained friends in real life, and each has evolved their character over the years so they are more distinct from each other.
* The Nostalgia Critic emerged after a series of reports gathered in an online document detailed accusations of negligence and abuses suffered by contributing producers at Channel Awesome from Doug Walker and the management. When the Critic's current fandom clashes with those of the former Channel Awesome members, it isn't pretty.
* The Nostalgia Critic episode or when he does a dedication montage to his beard (after having had to shave it off in real life so that he could do his Joker bit).
* The Nostalgia Critic Evilina, who he's been known to babysit. Santa Christ seems to qualify as well, being a blending of the two biggest examples of this Trope possible.
* The Nostalgia Critic ("EXPLAIN MOVIE! EXPLAIN!") until his frustration finally erupted in an actual atomic explosion.
* The Nostalgia Critic fantasizes about killing her regularly, he still calls out for her when his usual music doesn't play and freaks him out.
* The Nostalgia Critic for overly tough women and owns testosterone pills.
* The Nostalgia Critic from rewatch, as all together the meta and foreshadowing moments become more clear.
* The Nostalgia Critic from the camera, although Doug said later he was in so much pain from the cold that it wasn't worth it.
* The Nostalgia Critic gets a lot of this character type. Doug has teased that the reason for this is that he looks good in them.

* The Nostalgia Critic gets possessed by the devil in one of his fights with the Nerd, and only Super Mecha Death Christ is able to defeat him.
* The Nostalgia Critic giving the original leading female no credit and focusing on an annoying minor male character instead.
* The Nostalgia Critic had a field day pointing out how this is not the most obvious or safest calling card, even pointing out that when it's impossible to notice the gasoline on the floor, a subway rider waiting for a train while smoking would be in for a bad day if they dropped their joint.
* The Nostalgia Critic had attempted to defy (via aversion) that same
* The Nostalgia Critic has been established in-universe and out as a horrible influence on people. Problem is, he doesn't know he's doing it and he's the one who usually ends up getting killed, raped or otherwise hurt in some way.
* The Nostalgia Critic has begun doing this occasionally in his new set of reviews (post-Review Must Go On).
* The Nostalgia Critic has multiple characters, it is common for the other reviewers to get him to cameo or crossover at least once as one of these characters. Inverted too though; he's had just about every contributor on the site crossover and cameo once in his videos, which probably helps get their names out to his fans and encourage them to watch his videos. His recent videos, meanwhile, tend to be filled with skits and cameos by actors/actresses from his Demo Reel series, leading many to complain that show is starting to focus more on guest star hijinx than on actual reviews.
* The Nostalgia Critic has ruined his life, unfolding an abusive backstory out during his run.
* The Nostalgia Critic has stated that this is the worst movie he's ever seen in his life PERIOD, so he REALLY means that.
* The Nostalgia Critic has this reputation and lives up to it well. But he would much rather be an active player, instead of being thought as a slut with a freakish sex life.
* The Nostalgia Critic hates. The author tract is more common in his editorials where he's more discussing subjects than reviewing films. Most notably "The Dark Age Of Movies" was how Doug Walker felt about summer films from 1996 to 2001.
* The Nostalgia Critic have much more fun this way. They've chloroformed each other, both got a bit "BAD TOUCH!" when the other is unconscious, she's tried to kill him and he's locked her in his basement, but he's in love and is one of the very few people she cares about.
* The Nostalgia Critic. He acted like a monkey in eighth grade and was pitied highly for it, as well as bullied for that and other things.
* The Nostalgia Critic He also displays this in other reviews, especially when he wanders off during a boring film.
* The Nostalgia Critic, he and kidnapper Hyper get two, the second one confirmed by Doug as Critic getting stockholmed.
* The Nostalgia Critic. He asks all the men present in the house for help, including the cameraman (his brother Rob), Mike Matei, and even James Rolfe himself, who tries and fails multiple times to tie the tie. In the end, James Rolfe's wife is the only one who is able to do it.
* The Nostalgia Critic, he discusses the darker side of this, asking about the people who hadn't wanted to be mean and the people destined to be victims.
* The Nostalgia Critic, he grabs for a "bigger" Jagermeister to help him cope with the awfulness... and pulls out a bottle that's roughly three feet tall.
* The Nostalgia Critic, he keeps his (apparently loads of) crying offscreen. All we see are some very red eyes throughout the entire movie.
* The Nostalgia Critic, he manages to avoid it for a while but the world's order is restored in the last episode.
* The Nostalgia Critic), he never fully comprehends how others can like it. In the specific case of the Grinch movie, at the end of his review he contemplates taking a more tolerant, open-handed view and saying that if people take pleasure in it or see something in it that he doesn't, then maybe that's what counts... then essentially says "Nah, I'm right, they're wrong!"

* The Nostalgia Critic, her possessive behavior towards the Critic hits too close to home for some victims of stalking and sexual harassment.
* The Nostalgia Critic. He's pretty much just a damaged little boy with a gun and temper tantrums at his disposal.
* The Nostalgia Critic him how angry he is through exaggerated grimacing and hand gestures, which does its job of making the Critic angry...at Terl for wasting his time and making him look stupid.
* The Nostalgia Critic his clothes start shedding. He's a complete mess when he's finished.
* The Nostalgia Critic: His job is showing the world that the '80s and early '90s had their fair share of utterly terrible shows and movies, as you can guess by his name.
* The Nostalgia Critic, his rocket chair must have been really awesome, even if it's never seen on-screen. He claims it could levitate using science.
* The Nostalgia Critic homage. He then looks down on the audience for not knowing what that is and tells them not to Google it so they can pretend they do.
* The Nostalgia Critic, however, he simply had his face buried in his hands, before saying, "I've got nothing. I have absolutely nothing."
* The Nostalgia Critic (how there's something about them that makes you keep coming back) and called his abusive mother "my world".
* The Nostalgia Critic if his (established to be very abusive) mother tried to be sexual with him, all he'd be freaked out by would be his dad's reaction.
* The Nostalgia Critic impression) in his Dungeons & Dragons review.
* The Nostalgia Critic). In a meta-example, the video itself can be pretty freaky too.
* The Nostalgia Critic in an all white suit (instead of his usual rumpled one), Nella and Elisa giggled and fangirled over him, much to the Chick's irritation.
* The Nostalgia Critic In fact, the experience is probably one of the most creepy things that That Guy with the Glasses has ever done.
* The Nostalgia Critic. In fairness, this was after she repeatedly hit him with a baseball bat and even then he apologized.
* The Nostalgia Critic instead of meme requests getting shouted at him.
* The Nostalgia Critic. Instead of molesting others, fandom has him getting raped by almost everyone. Depending on what you read, it's either seen as deserved, funny, hot, or creepy.
* The Nostalgia Critic (intentionally) dives into a pool fully clothed. After he climbs back out, he gets knocked back in again, almost immediately.
* The Nostalgia Critic" in which the villains try to sue Santa Claus for kidnapping, which makes the headline in the paper.
* The Nostalgia Critic is always seen contemplating suicide as a result of the movie's he's watching, though this usually says more about the movie than the Critic.
* The Nostalgia Critic is a pathetic, miserable, useless waste of space... but he rigged
* The Nostalgia Critic is a Type B. Imagine him as a twelve-year-old boy with no supervision and a gun and you get the idea.
* The Nostalgia Critic is big on this one, protecting friends and children to the most extreme degree even though he knows full well it'll get himself hurt.
* The Nostalgia Critic is normally an insightful, eloquent if swear-happy reviewer. Not the case when something works him up though; chipmunk noises are often formed.
* The Nostalgia Critic isn't simply called "Bowser", or at least "The Artist Formerly Known as Bowser", cutting to a Koopa-fied Prince symbol.
* The Nostalgia Critic is the only one curious enough to hear Critic out instead of attempting to kill him.
* The Nostalgia Critic is thirty years old and can still be bribed with a small bag of sweets.
* The Nostalgia Critic is trying to work on his temper and cynicism, but his insecurities about seemingly never being good enough are still getting in the way.
* The Nostalgia Critic It's not many creators who'd give their Straw Fans that kind

of satisfaction.
* The Nostalgia Critic, it won't stick. Which may be why Ma-Ti is still dead.
* The Nostalgia Critic, joking that this might be why Jack Driscoll is reluctant to bring a woman onto his ship in the original movie.
* The Nostalgia Critic), knows a lot about economics, and can parody a long Shakespeare speech even when depressed.
* The Nostalgia Critic knows what it's like to be on the receiving end, so he praises the Joker/Harley Quinn dynamic for capturing the trope so perfectly; that you realize fully your partner is bad for you, but there's something about them that makes you keep coming back.
* The Nostalgia Critic, Kylo's three-bladed lightsaber with many messages against complaining fans and BB-8 with many messages describing it as a cutesy Merchandise-Driven character.
* The Nostalgia Critic, lampshaded in Nostalgia Critic's Top 11 Fuckups Part III.
* The Nostalgia Critic lampshades this when reviewing several 80s and 90s sports movies. He begins to slowly clap and we cut to clips from the movies of other characters doing the same, making it appear that they, like he, are applauding the trope itself.
* The Nostalgia Critic, leading to a conversation between the two of them that, while not filled with rage per se, is certainly tense and accusatory on Critic's side.
* The Nostalgia Critic legs, but Lupa needs to teach him how to bend like a lady and in battle he's desperately trying to stop it riding up.
* The Nostalgia Critic: "Lettuce' is not funny. 'Cabbage' is freaking hilarious. Just watch: lettuce (silence), cabbage (laugh track). Works every time."
* The Nostalgia Critic, Lord Shyamalan can "shyamalize" performers by taking away their talent.
* The Nostalgia Critic — arguing that the backstory was nice, but an hour and a half watching jerks on a boat was simply too much.
* The Nostalgia Critic mocks Jaffers. Jaffers then responds by summoning all of the above for a battle.
* The Nostalgia Critic movie cut out a World Trade Center scene as to not offend anyone after 9/11.
* The Nostalgia Critic movies have began to find it uncomfortable and rather hypocritical seeing as how he insulted anyone who likes the fourth Transformers film, breaking his stance against fan hating.
* The Nostalgia Critic movies. When she has a breakdown asking him to tell her which movies to like, he realizes she was just pretending to like most of these things to manipulate him to fall in love with her.
* The Nostalgia Critic." Much to Roger's surprise since he thought angels couldn't be killed.
* The Nostalgia Critic' narration in the film was so hurried because he just wanted to get it over with so that he could move on to his next gig, and offers a fictional scenario of Willis reading a different version of the script word-for-word:
* The Nostalgia Critic never got to be a fan of anything, even though the real Rachel is a massive Tolkien nerd. Tamara and Malcolm got to enjoy stuff though.
* The Nostalgia Critic not to subject him to another song. Taxes and shaving someone's back are boring and icky, respectively, but whoring himself out has got to be overkill.
* The Nostalgia Critic of a now obscure catch phrase from the TV show "One Step Beyond".
* The Nostalgia Critic officially retired the Nostalgia Critic to move on to other projects. Only to return a few months later after those other projects failed to be accepted by fans.
* The Nostalgia Critic often does this when mocking how horrible a work is presenting something.
* The Nostalgia Critic of the Opera" is stalking female Beth, but female Hyper is still wanting to force male Critic into being with her.

* The Nostalgia Critic. Once he takes over and gets ahold of power, he uses it solely to entertain himself and threaten the lives of others if they do anything to endanger his hold on it.
* The Nostalgia Critic one about his love/hate relationship with his job.
* The Nostalgia Critic page, and that all the other clipless reviews have done really well regarding hits too.
* The Nostalgia Critic (parental abuse, date rape, bullying, and stalkers) and became a cynical, depressed man who has nothing left in his life but reviewing. He recovers, though.
* The Nostalgia Critic parents only stay in Type III because he can remember a few good moments and still love them despite portraying them as monsters when he was little.
* The Nostalgia Critic; Paul Schuler and Elisa Hansen are engaged in real life.
* The Nostalgia Critic predictable formula since the reboot happened. To wit:
* The Nostalgia Critic reboot is much worse with than ever before (outright disgusted faces at Frodo/Sam as just one example), and the reason why his LGBT fans complain and point this out is that Doug's previous project,
* The Nostalgia Critic recreates the scene of Luke Skywalker discarding the lightsaber, with Doug (as Luke) even more disdainful about it, and Tamarra (as Rey) completely baffled by the whole thing.
* The Nostalgia Critic refutes this viewpoint about both past shows and present shows. Disney and Warner Brothers cartoons are still well remembered because they appealed to both kids and adults. Kids shows today are exploring subject matter that was unimaginable in previous decades.
* The Nostalgia Critic review, as a skit has him, Malcolm and Tamara playing soldiers who are more interested in looking good than anything else.
* The Nostalgia Critic review during the scene with Rocky's post-fight victory speech being translated by the Russian interpreter.
* The Nostalgia Critic review, he loses his temper at teen girls thinking the monster dressed up as female is cute when in reality they cause so many body issues in each other.
* The Nostalgia Critic. Reviewing is the only thing he has so he's freaked out by people going into his territory and doing it better than him (or so he thinks).
* The Nostalgia Critic review. "It's turned me into what the movie always was: a dirty piece of crap!"
* The Nostalgia Critic review, lovable bum Chester gets killed. Critic doesn't care, and fandom was upset enough for Beth to tweet that he'll be coming back, but it has a lot more weight than the stagehand in the movie.
* The Nostalgia Critic review, not angry that she'd hurt him but annoyed because she left and he wanted to give her a job.
* The Nostalgia Critic review, the song "The Critic Brings It Home" was cut presumably for time reasons. That and Doug somehow made his voice sound like ear-poison.
* The Nostalgia Critic review. (This is all in-character, of course, Doug's parents are lovely and helpful.)
* The Nostalgia Critic review where they're fighting; while the Chick moves around a lot, the Critic never gets up from his chair.
* The Nostalgia Critic review, who actually interrupts his own opening catchphrase to say "MONKEYS AREN'T FUNNY!"
* The Nostalgia Critic, Santa Christ and the Devil, and doing the whole review from there.
* The Nostalgia Critic: Santa Christ "shoots lasers from his eyes", according to his theme song.
* The Nostalgia Critic's attraction to toppy women is so strong that there was one girl he dated
* The Nostalgia Critic, saying how even though you're pissed off at the former, management banks on you still having more of a connection to it than the latter.
* The Nostalgia Critic's bad movies only to realize, as he describes what she looks like now, that she's currently watching him. She then proceeds to respond to his

dissing of her movies from when she was a little girl by showing clips from some of the Critic's home movies from his own childhood.
* The Nostalgia Critic's "Blues Brothers 2000" review, a female version of him (played by Doug's ex Dayna) has on a white camisole instead of a white t-shirt.
* The Nostalgia Critic's commercial reviews, a Burger King Kids Club commercial shows a gorilla sitting down next to some kids. The Critic's voice comes in and reads "Actual odds of getting raped by a gorilla in a Burger King now only 1 in 5".
* The Nostalgia Critic selves. Justified, as seeing them scarred wouldn't matter one bit to the plot.
* The Nostalgia Critic's face on her neck, creeping everyone out even more.
* The Nostalgia Critic's Godzilla review. There is a running gag in the video that noone can pronounce one of the characters names
* The Nostalgia Critic's grandfather. He might have been crazy, but he gets points for being the only family member who Critic has fond memories of.
* The Nostalgia Critic's Halloween special had him criticizing an old Teddy Ruxpin doll... and then later that night it starts threatening him. The Critic declares it's time he removed the batteries, only to discover they've been out the whole time.
* The Nostalgia Critic. She develops an intense obsession for him and goes through extreme lengths to make him love her. At one point, she forces him to go on a date with her and she tries to manipulate him through his interests in entertainment. It almost works, but the Critic realizes what she's doing and he calls her out on it.
* The Nostalgia Critic. She is played by Rachel Tietz, who's white, while the Devil is played by Malcolm Ray, who's black.
* The Nostalgia Critic should be shot, (he is shot in the forehead) unshot, (the bullet hole disappears) and given a big bag of money (unusually, he immediately receives a bag of money). He then asks for and receives some lounge music too.
* The Nostalgia Critic: shows blatant disregard for gun safety, often waving the gun around, discharging it at unsafe distances, not unloading the magazine, not uncocking the pin, etc. He would likely accidentally blow his head off in real life. Then again he has blown his head off on purpose enough times already in character. The actor, Doug Walker, is of course using a prop gun, which is just an airsoft gun with the orange tip painted black.
* The Nostalgia Critic's involves the director questioning whether or not to fix any of the film's numerous technical errors; only to be reminded by the producer of the movie he's making.
* The Nostalgia Critic site, turning 11 into sort of a site-wide Arc Number (though he'll up it to 12 for Christmas Lists for obvious reasons).
* The Nostalgia Critic's just as bad, stammering and falling into awkwardness when he can't keep a lie going, which is often.
* The Nostalgia Critic's music video "F**king Love Christmas", Critic sings a psychotic metal song about how much he loves the holiday. He terrifies Malcolm and Tamara so much that Malcolm has to tranquilize him. He then sings that he built up an immunity to tranquilizers because of his insane love of Christmas.
* The Nostalgia Critic's "Nostalgic Commercials", during the "Wet Banana", "You and Your Johnson", and "Wonder Boner" ads.
* The Nostalgia Critic so fast that it makes the Critic's head explode.
* The Nostalgia Critic. Solution? Make Critic a girl so they can have all the BDSM sex ever.
* The Nostalgia Critic something to laugh about, as he apparently didn't know.
* The Nostalgia Critic songs with his own song, that went something like this:
* The Nostalgia Critic. Sounding like he needed a hug immediately yes, but not the best to hang around with.
* The Nostalgia Critic's parents telling him about the birds and the bees apparently included God injecting Adam with sperm. No wonder his sex life is fucked up.
* The Nostalgia Critic's performance. She appears on screen while he's talking to take him to task about it:
* The Nostalgia Critic's Top 11 F*ck Ups had the fans constant pointing out of

little spelling mistakes he made in the list, including one where he spells Nostalgia wrong.
* The Nostalgia Critic switches between being on Critic's side and leaving him tied up by Hyper Boner.
* The Nostalgia Critic talent down yet and so sounded like a howler monkey whenever he got pissy.
* The Nostalgia Critic, Tamara and Beth Elderkin. They're actually good friends in real life, but they sing about that not being allowed so they have to be "frenemies".
* The Nostalgia Critic that Doug and Critic are two different entities.
* The Nostalgia Critic that he should learn to keep his fucking mouth shut.
* The Nostalgia Critic, that is), he thought girls were loud and annoying.
* The Nostalgia Critic, the CGI scenes featuring the baby horrified him so much that he let out a scream that stretched out through the commercial break.
* The Nostalgia Critic: The Critic has a tendency to pucker his mouth when he's thinking something over.
* The Nostalgia Critic: The Critic is a complete and utter lightweight, but still drinks a lot. Malcolm, Tamara, and Rachel (the characters) all spend their off-time getting hammered as well. Even Santa Christ has been lampshaded to have drinking issues, while mother and daughter Aunt Despair and Hyper admit they're always drunk.
* The Nostalgia Critic The Critic is stuck babysitting Satan's daughter because he sold his soul for a good Zod impression.
* The Nostalgia Critic. The Critic says he's sure the character has her own name, but it won't matter because they'll just see her as Winnie, anyway.
* The Nostalgia Critic, the Critic would say, "I'm the Nostalgia Critic. I remember it so you don't have to." Occasionally, he would instead say, "I'm the Nostalgia Critic, and (something relevant to the situation)." Here is a partial list of such uses of the latter phrase:
* The Nostalgia Critic Their first onscreen moment as an official couple has them gush over how they both held the Critic hostage at different points, and they're even pronounced "psycho husband and stalker wife" at their wedding.
* The Nostalgia Critic. Then it escalates into a full-on Three Stooges routine with Spoony.
* The Nostalgia Critic, then sits around watching TV while the other reviewers actually put effort into running the country. The ideas he steals aren't even particularly cunning, but rather stuff like "we should use weapons".
* The Nostalgia Critic, then to a half-naked violinist running down a street wearing a big bird's nest on his head. Cut to the Critic, head at 45° angle, softly whispering "Why would you...?"
* The Nostalgia Critic, the Olsen Twins try and kill the Critic when he attempts to tell the world his new knowledge that they're evil.
* The Nostalgia Critic, The Other Guy is dressed as Palpatine in one review, and tells Critic that he's the dark shadowy overlord that controls him, "just like in real life".
* The Nostalgia Critic there, with the two actors being happy newly-weds in reality.
* The Nostalgia Critic, the screen goes dark and there's a mess of noisy shots. Nasty, but not particularly scary. But then there's two seconds worth of complete silence, and one last bullet rings out. It's bloody creepy. Critic apparently picked up some tricks from all that written abuse, as one of the scariest moments in "The Review Must Go On" is when Doug sees a shadow of Critic just beyond the corner of his wall, and he runs away when Doug notices.
* The Nostalgia Critic. The site members are now familiar and tired of his plots but they can't complain, or else they're fired. And they kinda enjoy it, even though they won't admit.
* The Nostalgia Critic. The title card (seen atop this page) mimicks the opening logo of the Three Stooges and their fight near the end is done in typical Stooges fashion.

* The Nostalgia Critic, they filmed in a heatwave and Doug could have passed out in his skintight outfit (and heavy helmet) but wanted more retakes because his tie didn't look right.
* The Nostalgia Critic, they pause momentarily to allow the Critic to close a door. Fighting resumes posthaste.
* The Nostalgia Critic. They're considered the pretty ones on the site, and if you're not into them, the constant perving they get both in-universe and out can get a little overbearing.
* The Nostalgia Critic: This tends to happen whenever the Critic ends the episode in a terrible rage. Whenever it does, the final line is always spoken by another character as "He's the Nostalgia Critic, he remembers it so you don't have to!"
* The Nostalgia Critic, though, she gets called in more often to review movies with Critic or at least offer an alternate opinion from his.
* The Nostalgia Critic threatens that if he doesn't do most of the work, he'll slit TSFG's wrists and leave him for housekeeping to find.
* The Nostalgia Critic to dress up like a dirty ballerina and took pictures for blackmail purposes.
* The Nostalgia Critic to have been taken away from his parents as soon as he'd shown the picture of them tearing him apart.
* The Nostalgia Critic took him to Chuck E Cheeses whenever it happened.
* The Nostalgia Critic to stop letting his fans draw comparisons between them.
* The Nostalgia Critic), to tell a little girl that she's adorable. And it's all ad-libbed.
* The Nostalgia Critic, to which he's actually asked if there's anyone out there who likes that movie to contact him and explain why. Otherwise, towards the end of the review he'll often point out something positive, so for some of his most extreme examples:
* The Nostalgia Critic to women who harass him at cons, and in a couple of vlogs she harasses everyone (in character) at cons.
* The Nostalgia Critic. Twist is, Critic only belongs to her in the literal sense as she's kidnapped him and is forcing him to be her boyfriend.
* The Nostalgia Critic used his farewell to call out Doug for bowing down.
* The Nostalgia Critic uses this trope not so much as an excuse but a really poorly though-out mythology. When the Critic questions it, the Chick responds by beating the shit out of him.
* The Nostalgia Critic was a complete work of fiction that completely bastardizes the man the character was based on for drama:
* The Nostalgia Critic was banned from returning to Kickassia by the Critic, after he plotted to overthrow him.
* The Nostalgia Critic was date-raped when he tried to go to prom. When he's raped again by Spoony, he's so traumatized he can't speak, but then goes into Rape is Love mode.
* The Nostalgia Critic was, given that she's an anthropomorphic rabbit. He had to reverse this in a later review.
* The Nostalgia Critic was largely unscripted. Doug Walker essentially wrote "Improvise, make it up, I don't care", and ended up using all of Phelan Porteous' ad-libs.
* The Nostalgia Critic was like this at first as both countered perceived slights, before turning into a general hatred that culminated in a decisive final battle. Twice, actually. It's all a joke, so that much is deliberate.
* The Nostalgia Critic was once an ethical person who tore apart movies that were only in it for the money and defended how children shouldn't be exposed to bad products. Later, he only does reviews because he admits that he's only in it for the money and casually kills kids a few times.
* The Nostalgia Critic was released on January 3rd. This was acknowledged during the beginning of the video:
* The Nostalgia Critic was selling birthday gifts and Christmas presents so he could keep living.
* The Nostalgia Critic was so that the audience wouldn't be confused. The Critic

argues that like the book, the film should try challenging the audience and make them think, and it's shown that the audience quickly lose interest in the film due to how forgettable it was.
* The Nostalgia Critic was tormented by a demonic Teddy Ruxpin in his Halloween episode.
* The Nostalgia Critic. Watch any review of his for a movie she's in and he will go gaga.
* The Nostalgia Critic wears battered sneakers when he goes outside, but when he's in his house he'll nearly always just be wearing socks.
* The Nostalgia Critic were told regularly they weren't wanted, giving them mass issues. The Other Guy, the older brother, is fairly normal in comparison and seems to have been treated better.
* The Nostalgia Critic when being shot in the chest earlier didn't even slow Call down.
* The Nostalgia Critic when Critic discovers Rachel Tietz showing up. Malcolm and Tamara join in, and so do a reluctant Walter, Heather, and Aiyanna. When Critic tells the other three who Rachel is, they try again with more enthusiasm, but...
* The Nostalgia Critic when he acts just as over-the-top as Carrey does.
* The Nostalgia Critic. When the Nostalgia Critic got sick of it, it showed up on its own and crushed him.
* The Nostalgia Critic when the Turtle Van can drive straight to the Technodrome without any problems.
* The Nostalgia Critic, where being a feminist (added onto the leather, the eyeliner and the 'bad boy' status) makes both Curiosa and Hyper attracted to him.
* The Nostalgia Critic where he doesn't review anything and is still called that slightly odd.
* The Nostalgia Critic, where he will raise one index finger while a "sproing" sound is heard.
* The Nostalgia Critic, where Sonic and Tails were trapped in a cage, with the floor opening up beneath them. The Critic wonders why, if Tails could fly, he doesn't just pick up Sonic and get them out of danger.
* The Nostalgia Critic who can't stand it when non-bratty children get abused.
* The Nostalgia Critic who refuses to take Critic's many violent no's as an answer.
* The Nostalgia Critic why the character he voiced, Zigzag, only spoke in rhymes. He tells him that he does not remember the reason. Or rather, all that he remembered is that it involved Rock Hudson and a banana cream pie.
* The Nostalgia Critic with minimal protection. You can tell by the way his legs twitch any time he gets a hit.
* The Nostalgia Critic with other actors as his emotions. But instead of any character references, they mostly just fight about whether they ripped off the former movie or not, even though they're focused on two completely different aspects of the body.
* The Nostalgia Critic wondering what's taking him so long, at which point Mickey walks in, covered in blood, and throws Prick's severed hand to Paw.
* The notable exceptions among the twelve major Olympians were virgin goddesses Hestia, Artemis and Athena, and of course Hera, goddess of marriage. Notice a pattern?
* The Notable Numeral: A group named after a word plus the number of members.
* The notable thing said ring is that it only does this to your average person while Jack Spicer's clones were at least able to operate like normal people except for one bad one and demons are apparently immune as Mala Mala Jong's clones didn't display any differing behavior from the original.
* The not-all-there, blood-splattered trenchcoat wearing villain Walter Sullivan of
* The Not Catch: Someone tries to catch a falling character but misses.
* The Notebook Allie has to choose between Lon Hammond Jr., a dashing young lawyer who is funny, charming, sophisticated, and comes from old Southern Money or the local country boy Noah Calhoun who threatens to jump off of the Ferris wheel if she doesn't go on a date with him and constantly fights fights with her.

* The Notebook: Allie only falls in love with Noah after rejecting him repeatedly only for him to persist.
* The Notebook, Allie's mother scoffs at Allie falling in love with a day-laborer in the first act. In the third act, however, she shows Allie that she once loved a day-laborer as well, but instead married Allie's father. She still has feelings for the working man as well.
* The Notebook Allie's parents think that Noah isn't good enough for her because he works at the lumber mill.
* The Notebook, a scene takes place where a woman repeatedly shoves and hits a man.
* The Notebook), contradicts herself at the drop of a hat, and still believes people will fall for it.
* The Notebook in the United States. Nine years after that film's release, the name topped the chart for male baby names.
* The notebook itself is a subject of debate. Does it contain some sort of sentience that can actually
* The Notebook: Noah climbs onto a moving Ferris Wheel to ask Allie out, right in front of her current date. He even blackmails her by threatening to let himself fall.
* The Notebook. Noah remains smitten with Allie all through the war he was sent to, doesn't engage with anyone, and goes back to the United States still having her in mind, only to find her engaged to another man.
* The Notebook. Their love is forbidden due to the fact that Noah is a poor boy with no money and Allie is a spoiled rich girl that comes from wealth and this causes much chaos and tension in their relationship. Despite this, the two young lovers do everything they can to be together and in the end, they end up getting married and having a family.
* The Notebook, when the ailing Noah wants to visit his equally ill wife Allie. The nurse on duty gently but firmly tells him that it's not allowed. . .then declares her intent to go and get herself some coffee before very pointedly turning her back and walking away.
* The Notebook, while Noah does have sex with at least one other woman after being separated from Allie, even she recognizes that Allie is the only woman he's ever truly wanted.
* The Notebook) while nursing him back to health after he's injured in World War 2.
* then other astronomers come up with more logical explanations was. This may have an interesting message.
* The Nothing After Death: The afterlife is nothing but an empty void.
* The Nothing After Death: The afterlife is shown to be nothing but an empty void.
* The Nothing After Death: The Mesopotamian underworld, Irkalla, was like this.
* The Nothing Equation", a scientist named Green is left alone in a one-man observation bubble that has had catastrophic effects on his predecessors. Over time, he becomes paranoid as the realization weighs on him that it's just him in a relatively thin-skinned pod miles from anywhere with the "nothing" of space all around.
* The Nothing Equation": The story ends with Green cracking from paranoia and being replaced by another scientist, Larkin, who is likewise convinced that the same thing won't happen to him.
* The notice board is where NPCs can post orders for you to fill. These orders don't have a time limit, and if you can't fill an order for some reason, you can ignore it or delete it with no penalty besides having to wait 20-30 minutes for a replacement order. Similarly, NPCs asking for individual items will not leave until you either give them the item or tell them that you don't have it. So if you don't have the item, you have all the time you need to harvest or produce it.
* The "no time to panic" can apply to TV shows themselves, also. An example:
* The "No Time Travel" rule was repeatedly broken during the Primordial War(s), and there is nothing stopping you from playing a game set during that turbulent period. This was a time when Reality itself was the casualty of the war, so don't expect that rules taken for granted today existed in any form back then.
* The notional multinational governance of the Associated Worlds in the

* The Notion Club Papers, combined with mental space travel (astral projection). The effects of time passing at a much more rapid rate means that the traveller in question looks down on what he initially thinks to be some sort of fetid anthill, but turns out to be his home city of Oxford through the ages...
* The notion of glory days got soiled thanks to the selective interpretation of glory on the part of the NSDAP following the country's defeat in
* The notion of Phoenix Wright accusing an animal of murder is something many people often wrongly attach to the series. Phoenix Wright, or any other protagonist attorney for that matter, has never pointed the finger at any animal. However the canon DLC case of
* The notion of pink for girls and blue for boys is a recent one. Before the 1940s (in America, at least), there were no specific colour attributions to gender. In fact, when pink and blue came into play, it was more likely to be
* The notion that human beings couldn't possibly have built them unaided and
* The notion that the Cuban Revolutionary Army troops on the other side of the Guantanamo perimeter fence might take a potshot at Kaffee in his dress whites (as suggested by the Marine who takes him on a tour of the facility) borders on ridiculous:
* The notion that "the main Bond girl works for the villains until she falls in love with James Bond" has only happened once, with Pussy Galore from
* The notion things will always end well for Uncle Sam, since the 1970s that feeling cannot be taken universally.
* The Not-Love Interest: A partner who is not romantically involved with the main character, despite fulfilling the usual role of one.
* The Not-Love Interest of a queen to keep up the threat, because proving the Queen is clear will save Kasia's life too.
* The Not-Love Interest, only there's no romantic relationship between them.
* The "Not Officially Sabrina Online Construction Set" (or NOSOCS), a parody freely editable by anyone of the
* The notorious 1988 musical adaptation). Even an attempt to revamp the show in 2012 with a greatly revised script and several song changes didn't get much of anywhere, though it was at least seen as better use of the story's potential, and got the creators willing to license it out, unlike the original version.
* The Notorious Bettie Page. Page was a brunette. Whether Mol dyed her hair or wore a wig on her head is not known, but in a couple of brief nude scenes, the hair in her lower regions was definitely brunette. You may draw your own conclusions.
* The Notorious B.I.G., an album released after he was being murdered.
* The Notorious B.I.G. and paying only lip service (if that) to what it took to get them.
* The Notorious B.I.G. in "Big Poppa"), that one would think it was one of their biggest hits of that era. But it fell just short of the Hot 100, topping the Bubbling Under chart. Their highest charting tune from the 1980s was "Don't Say Goodnight (It's Time for Love)", a now completely forgotten #39 hit from 1980.
* The Notorious B.I.G.. In order to make him appear, archive footage of Biggie performing was used and was lip-synced with Biggie's verse. That technique was used in many other music videos.
* The Notorious B.I.G.) means he can't trust anybody ("Me and My Bitch") and how everything now is a struggle ("Everyday Struggle"). Eventually, on the album's last track ("Suicidal Thoughts"), he contemplates whether it's worth living at all.
* The Notorious B.I.G. on the level of his debut single "Juicy". It is widely hailed as one of the greatest hip-hop songs of all time, despite never making it past #27.
* The Notorious B.I.G.. Which is Betty and which is Veronica is not as clear as it seems, as he and Kim were intimate for years before he met Faith.
* The Notorious B.I.G.", which is still quite well-remembered but not as much as "Only You", "Cupid" or "Anywhere", which peaked at #11, #13 and #15 respectively.
* The notorious bounty hunter Aloysius Knight in the Matthew Reilly novel
* The notorious "cannibal undertaker" sketch was apparently cut from the BBC master tape. The version appearing on PAL DVDs appears to be a reverse-standards-

converted
* The notorious case of figure skater Tonya Harding. In 1994, she, her ex-husband Jeff Gillooly, and her bodyguard Shawn Eckardt plotted to take out Nancy Kerrigan, Harding's main rival at the upcoming United States Figure Skating Championships and
* The notorious Chinese pirate Ching Shih took over the pirating business after her husband died, and then married her adopted son Cheung Po Tsai (modern Pinyin: Zhang Baozai). Supposedly, Cheung Po Tsai was also the lover of both Ching Shih and her husband after they adopted him at the age of 15.
* The notorious Corrupted Blood Incident was a glitch made worse by malignant trolling players, and was never intentional, but it did give the developers some ideas. The Great Zombie Plague of 2008 (an event used to promote their
* The Notorious Daughter of Fanny Hill covers one very busy day in the life of Kissey Hill: from getting up in the morning till some time after dark.
* The Notorious Daughter of Fanny Hill Kissey Hill dons a pair of long black gloves as a prelude to tormenting the Count de Sade.
* The Notorious Daughter of Fanny Hill: Kissey Hill, the daughter of a notorious madam in 19th Century London, follows in her late mother's footsteps with prositution in catering to various upper class gentlemen.
* The Notorious Daughter of Fanny Hill, the climax of the sexual encounter between the Duke and Kissey is represented by a dramatically wilting candle followed by a smashing mirror.
* The notorious Doctor Fid has created dozens of suits of powered armor over the course of his long supervillainous career in
* The notoriously foul-mouthed and short-tempered American politician Rahm Emanuel is missing most of the middle finger on one of his hands from an accident he had as a teenager. In a 2005 charity roast of then-Representative Emanuel, then-Senator
* the notoriously inbred and violent Gaunt family. And if Gaunt could do all this, it seems like it'd be a lot easier to just block up the original passage and make a new entrance elsewhere. A girl's bathroom sink isn't what you'd call a convenient place for your hiding spot. For that matter, why didn’t Gaunt open the Chamber himself, if he knew where it was and how to do so, and wanted to purge Muggle-borns from the school?
* The notorious M25 motorway surrounding London is the stitched-together remnants of a much more ambitious plan called "
* The notorious Oskar Dirlewanger was nearly sentenced for war crimes, stripped of rank and imprisoned after an investigation
* The notorious pirate Blackbeard tied slow matches (the kind used in match-lock muskets) into his hair and beard before boarding a victimized ship or entering combat. He did it because it was as scary as hell.
* The notorious pit-traps used by Viet Cong troops in the jungle against American troops during
* The notorious "Rape Rap," in which, based on a fan's grim comment on the
* The notorious Stasi used it as late as 1989, during the riots on the evening of the 40th anniversary of the GDR, as shocked western observers noticed. The horrible police brutality led many undecided bystanders to a decision TO JOIN THE PROTEST MOVEMENT in accordance with this trope.
* The notorious Wolf-in-Sheep's-Clothing is an alien monster that pretends to be a bunny (or other small animal) sitting on a stump, only to reveal its true nature as a tentacled, shapeless abomination when prey gets close.
* The notorious works of indie comics artists Al Columbia and Hans Rickheit and, at times,
* The notorius Cypher is well-known for wielding a pair of exquisitely crafted pistols (not similar; one is a bolt pistol, the other is plasma). Not to mention outdrawing and killing one of Abaddon's Terminator bodyguards so fast that even Abaddon nearly missed it. It's reflected on the tabletop too — he was the only character in the game that could fire both pistols twice in one turn. In his current rules, he has the highest Ballistic Skill in the game.
* The not-particularly-nice Chinese pirate Sao Feng, as played by Chow Yun-Fat, in
* the not-Powerpuff Girl (honest!) with a mohawk and in a wheelchair on their T-

shirt.
* The Not Quite Dead theory is used by some people to try to explain away the resurrection of Jesus of Nazareth in
* The "No Trader" run requires no interactions with traders — which is easier said than done, as traders not only sell you goods but also are sources of missions. Not buying anything also requires you to get gear as rewards from missions and from murdering basically anyone who comes into view to loot them for gear, ammo, and medicine.
* The Notre Dame cathedral in Paris, France has two pillars on its balcony missing, one of its gargoyles broken off, and the doorknob smashed off one of its doors. According to the climax of
* The Not-So-Harmless Punishment: A punishment seems bearable enough, maybe even laughable... until it's used.
* The Not-So-Harmless Punishment: A punishment that doesn't sound so bad turns out to be much worse than initially thought.
* The Not-So-Harmless Punishment: A punishment turns out to be much worse than it initially appears to be.
* "The Not-So-Rosed-Colored Glasses" was centered on a family portrait of the kids (as an anniversary gift for their parents Mike and Carol), an absent-minded photographer, a near-sighted Jan crashing into and ruining the photograph with her bicycle, the absent-minded photographer losing the negative and forcing a retake of the photo, Jan wearing her glasses for the new picture (she had not gotten the glasses when the original was snapped) and Mike immediately noticing the difference.
* The not-so-sad tale of Kajmaster Kajet's friend Big Wes for $30 from a dealer who vanished under mysterious circumstances 10 minutes later.
* The not-terribly-secret love between magic mentor Sephrenia and Pandion Knight leader Vanion is an
* The Not-Them are creatures that replace people despite looking nothing like them. Most other people will not notice the person's new appearance, and most photographs change to reflect the Not-Them's appearance. Though they appear to be regular humans, their actual forms are heavily distorted.
* The not-very-useful British comic hero Red Star Robinson only really cut it as a hero because of his robot bodyguard Mr. Syrius Thrice who was much more powerful. Thrice was dressed as a gentleman's gentleman and had proper Jeeves/Crichton manners but had powers Batman would envy.
* the Noughties, aimed at children, featured a possum named "Boofhead", who they used as an example of what not to do in a fire. He'd do things like climb the curtains instead of escaping, neglect to make escape plans, etc.
* The Noughties, however, their cars underwent a noticeable slide in quality. By the middle of the decade, Nissan's reputation was thoroughly tarnished, and things would only get worse when Ghosn was exposed as having engaged in financial chicanery.
* The Noughties, the city of Metropolis, since Luthor managed to acquire part of Brainiac's technology and apply it in the town's restoration.
* The 'no unexalting' rule has found some limited exceptions. It assumes that on a mystical level, the Exalt remains fundamentally human. Green Sun Princes who 'ascend' to full Primordial status with Heresy charms find their Exaltation flitting off to find a new host (not that they need it at that point). Likewise, Exalts who chose to take up a job offer to divinity extended via Greater Sidereal Astrology find their Exaltation moving on once they become Gods. Becoming a God or a Primordial results in the end of mortality... which looks like death to the Exaltation. It should be noted that in both of these cases, the exception is allowed because the action of releasing the Exaltation is a choice, and cannot be driven by any supernatural or unnatural compulsion at all else the powers fail to work. The more precise law would have to be "Exaltation cannot be taken away from Exalts, ever".
* The noun is used metaphorically. These are actually guns which shoot
* The Noun Who Verbed: A title consists of the main character's name and what they

do.
* The Nova Corps are basically a 'spin-off' of the Green Lantern Corps (Sinestro compared them to second-stringers, but considering his nature anything he says must be taken with a grain of salt).
* The novel “Birthright” attributes it to aliens entering Earth’s timeline, with the explosion a result of the distortion.
* The novel adaptation game cuts out Olympus Coliseum, Atlantica, Halloween Town, and 100 Acre Wood.
* The novel also double subverts the trope, by noting the tendency of most high priests to be evil, then states this is a very unfair description - they're truly pious men, determined to prove their devotion to their gods, and they'll remove the entrails of hundreds of people a day to show it!
* The novel also provides an explanation for the ludicrous situation of having only a single starship in Earth's solar system to protect the Federation capital. Apparently, losses in recent years have stretched Starfleet thin (
* the novel, are incredibly dangerous shapeshifting shadow things with acidic white tentacles, that like to haunt the library and kill anyone who goes inside.
* The novel Brian has been working on for several years turns out to be identical to the
* The novel character seems very close to the author in personality, though the events of each plot, per Reichs' afterwords, are only based on the broadest strokes of real-life cases. The television character is almost completely different from the novel character. It's really just the names.
* The novel chronicles the creation of one straight through the singularity. Protagonist Manfred Macx is one of the first people on Earth to realize that in such a world the best way to get truly rich is to help
* The novel contains a dark take or two on this. In one case, Capers, a member of the main character's
* The novel continuity actually kept the aversion and turned it into a plot point; apparently holograms are so perfect that it caused a bit of an
* The novel drops the number of resurrections to 2, saying he (Death) owed them one life per game (so 4)
* The novel featured an air-dropped Israeli nuclear weapon lost during the Yom Kippur War, later found in a Druze farmer's field in Syria, and refurbished with the help of an East German scientist. The movie doesn't get as detailed about it.
* The novel George's Cosmic Treasure Hunt opens with a very cool sequence featuring George commanding the space shuttle during a launch, which then turns out to be a dream from which he is awakened in an unfamiliar bed. The first half of the book covers how he got there.
* The novel goes into a bit more detail: namely, it comes about from the fact that the ship has been slowly accelerating for the past three million years.
* The novel had several kid-friendlier anniversary editions published too, including deluxe reissues of both the Joseph Schindelman
* The novel implies that Vito uses a different approach for someone with "real balls", someone who would be willing to lose everything over a matter of honor. Judging from the way Vito and Michael interact with other important mafiosi, the approach seems to be to simply make an offer; if the offer is refused, decide whether to accept the refusal, or go to war. But don't bargain (which would be seen as weakness) or threaten (which would be an intolerable insult).
* The novelisation goes even further, having Humphrey eventually going mad and dying in a mental hospital.
* The novelisation of "The Abominable Snowmen" changed most of the names of the Buddhist monks due to the writers bungling the research so horribly, with the exception of the
* The novelisation of "The Time Warrior" initially contained a very detailed and
* The novelisation of "The Web of Fear" turns Julius Silverstein into Emil Julius, to
* The novelization actually uses this trope (with "Make that two." "Big eater.", and Jillian points out he meant two beers.

* the novelization and other sources, the ambient heat of the steel mill brought the heroic Terminator back to life to finish its mission.
* The novelization expands on this. Yoda points out that since Darth Sidious earlier killed 4 of the best Jedi the order has, even the two of them together won't be enough to beat him. But if they target each Sith separately, Sidious will be aware that his apprentice is in danger and that
* The novelization explains that they didn't take blood from another frozen augment because McCoy didn't know if they could all regenerate like
* The novelization has an exclusive scene where, after the Shinto ritual, Mitsuha and Yotsuha have to entertain some guests and they note afterward that the party was full of elderly, most likely a jab at the silver tsunami Japan's facing.
* The novelization has Peggy as a female character. In the final movie, Peggy is a male character.
* The novelization has some fun with this. After agreeing to teach Luke in the Jedi ways, Obi-Wan quotes the saying, "Even a duck must learn to swim." Luke immediately asks what a "duck" is. (Considering that Luke grew up on a desert planet, it
* The novelization justified it by stating that the locks that needed a key were reinforced locks that made lockpicking useless (Jill even comments that she never saw that type of lock before
* The novelization offers no such kindness and describes it in GRAPHIC detail.
* The novelization reveals that she is a pretty competent commander, although she is heavily criticized by some of the Rebel Alliance leaders (it's all political). In the past, she was in command of an elite bomber wing and convinced Vader to amend his order to kill civilians.
* The novelization says that Earth is mostly abandoned at this point with people either living on space stations or colony planets.
* The novelizations of the American dub, that mix it with the manga continuity, provides a
* The novelizations of the first stories from Classic Who added various details to the episodes and even expanded a little more the details that were unexplained, usually written by the same scriptwriters of the series. This helped in actual years to get better help to recreate the
* The novelization spells it out more plainly: the robots didn't start using military-grade weapons until they found the military's research lab/weapons cache on Level 17 of the Lunar mine. Before that they were using re-purposed mining tools.
* the novelization, the Alliance heroes do leave through a portal, but almost immediately return to the broken remnant of Draenor.
* the novelization. While most of the book is written in third person, Stover breaks out the second person present-tense narration when he moves into an in-depth character study, which he always signals with the phrase "This is what it feels like to be X."
* The novella "Houston, Houston, Do You Read?" is about a group of male astronauts on a circumsolar mission who run into trouble and are trying to contact Houston to return to Earth. They get picked up by a ship crewed only by women, and spend a good deal of time asking where all the people (meaning the men) are. Turns out, their ship had slipped through time several hundred years and in fact a plague had wiped out all men and most of the women on Earth, leaving only 11,000 survivors. The world the guys returned to had no crime or war but also no advancement.
* The Novel of the Iron Maid revolves around a Mr. Mathias who secretly has a great love of obscure and intricate medieval torture devices, and has spent his fortune secretly amassing a great collection of them. He isn't a sadist or even a masochist and doesn't want to kill or torture anyone. He just thinks torture devices are cool and keeps his grim hobby a secret because he knows other people will be freaked out by it. No points for guessing how he dies.
* The Novel of the Iron Maid, since it revolves around a collector of antique torture devices who accidentally crushes himself to death with his latest acquisition after very explicitly neglecting to read the enclosed instruction

pamphlet.
* The novels about "A Dog Called Himself" by Kenneth and Adrian Bird. Himself has been taught to speak by a cruel circus owner, and after escaping takes up with an Irish tinker with whom he has a series of adventures. The dog's unusual name comes from what the tinker exclaimed on hearing the dog speak: "It was as if himself were talking!"
* The novels also subvert this with the Utsumi family, featured in the second novel. A wealthy human adopted a pair of orphaned ghoul siblings, but only because he was a
* The novels and later games also mention a "magnum launch," where a carrier simply takes every available pilot and loads them into every available ride, then dumps them into space as fast as possible, usually when the carrier itself is about to come under attack. Such missions in the games, while usually awesome, are also a bit more challenging because you can't personalize your loadout and are stuck with the defaults.
* The novels bring us the Demon Soul, probably the worst of them all. Created by one of the Dragon Aspects under the influence of
* the novels comes off like this in the movies. Some of the rules do seem to be different, especially fouls and the bounds of the field. On the other hand, even the books have a Calvinball-esque range of possible fouls.
* The novels confirm that this is standard for Sparks; they're insane egomaniacs, so of course they want everyone to know that they built the latest horrific abomination of science. Klaus encourages this, as when said horrific abomination of science eats a village, it makes it much easier to assign blame.
* The novel serialization of the Robotech saga. By the last book (#21), cell phones, internet and email were common enough parlance in the real world that references to them were included, despite never being mentioned anywhere in the previous books.
* The novels explain that the cat people learnt English through exposure to human pop culture and normally speak their own language, the nature of which is undisclosed. The only instance of two cats talking in the TV series seemed to suggest that in that continuity, English was preferred.
* The novel's game-regulating organization, the IFGS, actually has been Defictionalized into a LARPing club that stages its games outdoors.
* The novels have standardized terms for the full range of Vulcan, Romulan and Klingon time measurements, from seconds through to years. They're used quite often if these races are the POV characters in a given scene.
* The novels mention that, thanks to Orihime, Harribel and her fraccion managed to survive.
* The Novels Of The Jaran, Ilya fall in love with Tess because she constantly defies him when nearly everyone else in the Jaran obeys him. The fact that she doesn't fall for his charisma and good looks like most other women probably factored in, too.
* The novels see the introduction of gunpowder artillery in Western Europe. One siege has the seneschal complaining about these newfangled technologies when catapults worked just fine, as the town walls prevent him from seeing just how devastating the bombards are.
* The novels state there is also a rivalry between the Unggoy (Grunts) and Kig-Yar (Jackals), though it isn't nearly as intense as the one the Elites and Brutes have. Or at least, due to these races being lower in the
* The novels subvert it with Firo. While he initially seems pretty chill about
* The novels subvert this trope by having Casual Interstellar Travel of the vanilla variety (by hyperspace) for everyone, but featuring a wormhole network that allows for instantaneous travel between its termini, thus radically cutting on a delivery times. Naturally, the heroes' homeworld has the biggest bunch of those holes. Wormholes in the Honorverse don't really form a network, though. Various wormhole termini are usually too far apart for anyone to get from one to another, without hyperdrives that also allow FTL travel. They just supply a few very convenient shortcuts between some places.

* The novels were originally supposed to be about a Proud Warrior Race Guy, Wulfgar son of Beornegar of the Tribe of Elk (one of the barely-Viking-ish warrior tribes of the northern region of Faerun), captured in battle and made an indentured servant by a dwarf king. He eventually went out the way all Proud Warrior Race Guys want to — defending friends and family from a great menace, and succeeding.
* The novels zigzag on the issue. Martinese is descended from English but when trying to communicate in English with a young Jinto he can't understand it. It's unclear if that means that English is still being used somewhere or if at least some people know it but its no longer a living language like Latin in the modern world.
* The novel "The Cestus Deception" effectively makes one trooper in particular one of the lead characters. Apparently, Obi-Wan and several other Jedi and Senators have been striving to get the troopers seen as human beings.
* The novel "The Master Mind of Mars" introduces a religion centered around the god Tur. Unlike the Issus-based religion, which is global, this one appears to be limited to just the city of Phundahl. And like Issus, it's all a big scam. The statue of Tur in the temple is just an animatronic operated from within. When the heroes discover this, they make great use of it.
* the novel, the sandman guns are six cylinder revolvers, each cylinder loaded with its own special cartridge. The homer would follow and kill the runner. The tangler was a webbing bomb, the ripper would go through armor, the nitro was self-explanatory, the vapor was a gas bomb, and the needler, which function was not explicitly stated, could be conjectured to be a needle slug filled with an anesthetic.
* the novel transforms him. The 2018 movie has him be more heroic, the abuse from Beauty Smith making him wary of kind humans at first before bonding quickly with Weedon Scott and his wife. He also learns from Kiche that helping the people in the Native American village brings positive reinforcement, so he works very hard to earn their trust.
* The novel Turnabout features a group of elderly people who sign up for an experimental treatment to make them grow young again. After the process begins, they discover there's no way to stop the process...and each time they regress a year, they lose their memories of that year. The two main characters keep journals of everything they remember from a given year so that they can at least enjoy the stories as they regress to infancy.
* The novelty song "Little Eefin' Annie" has the singer describe his girlfriend Annie, who is incapable of saying anything without having it preceded by lengthy babbling.
* The novelty song "Snoopy vs. the Red Baron" actually has the facts correct (on the human half, anyway); Manfred von Richtofen really
* The novelty song "The Thing" is about a man who finds a box containing unidentified contents and being stuck with it for the rest of his life because everyone he shows it to turn him away in disgust, including a shopkeeper he tried to sell the box to, his own wife and
* The novelty song "The Thing", which is about a man who gets stuck with a box containing unidentified contents, usually has the man dead by the end of the song because of the penultimate verse mentioning him ending up in Heaven after years of carrying the box around, only for St. Peter to force him to take the box with him to Hell. June Carter's cover version (which was also an example of
* The novel version has Coalition defector Töne Förk want to kill the Coalition
* The novel version of "Shady Tree", a middleman in the diamond-smuggling ring, is a hunchback who Bond feels the need to think to himself was, whatever he may be, "not funny". In the movie, he's literally a
* The November 29, 1983 strip had Garfield complain about getting the business end of Liz's thermometer while Jon is driving him to the vet.
* The November Man is that her family was murdered in front of her and she was repeatedly raped by him when she was a child.
* The November Man: The CIA is revealed to have committed the bombing which caused

the Second Chechen War. It was blamed on Chechen terrorists.
* "The Novocaine Mutiny": Pierce is on the receiving end of a trial instigated by Burns. The events of Burns' short tenure as a Commanding Officer are discussed making use of
* The Novus civilization, founded by the crew of the Destiny over 2000 years before the crew actually encounters Novus (
* The (now abandoned) DARPA Metabolic Dominance program played about with this. DARPA started seeding some stuff aimed towards being able to boost human metabolic efficiency by a lot. If it had panned out, you'd supposedly be go at a full sprint basically forever without feeling out of breath (though it wouldn't stop your muscles from getting sore), go for a week or more with little to no sleep, and greatly diminishes pain.
* The now-almost defunct Mexican airline Aerocalifornia was named ''Aerotambo" (Tambo is Mexican slang for someone who is going to fall, and also means barrel or jail) due to their awful service.
* The now-cancelled but very excellent "Spider-Man: Tangled Web" series was based on this premise. Only 2 stories actually starred Spider-Man rather than his rogues and supporting cast.
* The NOW Comics version had Mishi Kato (half-sister to the original), who eventually became Hornet's
* The now-dead god Iyachtu Xvim used to be a Social Darwinist who didn't like helping the weak like some of the more goody-two-shoes gods, believing that they were directly responsible for their situations and didn't deserve help.
* The now-defunct Arena Football League's overtime rules guaranteed that each team had one offensive opportunity unless the first team to possess yielded a defensive score, whether by touchdown or safety. If the score was still level after each team had a possession, true sudden death applied. The defunct NFL Europa and United Football League also used nearly identical overtime rules to Arena Football; however, overtime was limited to 10 minutes rather than the full 15 in NFL Europa.
* The now defunct blog AntiSpore (a parody blog from supposedly a Christian Creationist taking issue with the themes
* The now defunct Burger Chef chain, which was sold to Hardee's, had sandwiches named the Super Shef and the Top Shef (a burger with cheese and bacon).
* The now-defunct group Bishoujo Club 31 (Saki Fukuda and Beni Arashiro were in it) had - you guessed it - 31 members.
* The now-defunct publishers Dell Comics and Gold Key Comics published many standalone adaptations of movies from the 1950s through the 1970s, including many Walt Disney titles. Dell published many of these under its
* The now-defunct Wall of Agents page reveals that Oscar has created a pill that tastes like any flavor the consumer wants, and that it's his favorite food.
* The now-defunct website marryourdaughter.com was a website purporting to sell teenage girls (some as young as 13) to prospective husbands (provided they submitted a "suitable" proposal). It was presented as a way for parents to earn some money, get rid of
* The now discontinued Salvar Chem Dogs. An Imperial Guard regiment consisting entirely of drug addicts, thieves, and psychopathic thugs, who are kept in check only by their addictions and promises of large quantities of their fix. They're also motivated by being allowed to keep anything they loot.
* The now-extinct Ayleids (Wild Elves) once ruled a mighty empire out of Cyrodiil, said to be the very first empire in Tamriel. At least some of their success is credited to worshiping the
* The now-famous Charlie Wilson was a U.S. congressman who used his own power - he was a member of the appropriations committee (money lenders) for black ops, as well as working with a number of CIA and Special Forces agents - to secure arms for Afghan Guerillas during the Soviet war in Afghanistan. Another point is the CIA agent he worked with, Gust Avrokatos, and the guys Gust worked with. Gust once remarked of the immense balls of the Deputy Arms Minister of Egypt. Apparently, during a meeting with Gust for weapons to be sold to Israel with money from the U.S. and Saudi Arabia with the intention of Israel handing the weapons to Pakistan

who would move them into Afghanistan (yeah), the Deputy Minister was also darting in and out of two other rooms that each smelled strongly of tobacco and hashish. Apparently the minister was making arms deals with the Iranians in the room on the left, Americans in the center room, and Iraqis on the right. This despite the fact that Iran and Iraq were at war, and Egypt's attitude towards America at the time was "we'll write insulting things with our right hands while you pass cash and guns to our left."
* the now-famous clip as Naughtie desperately tries to stop himself laughing at his mistake.
* The now-infamous attempt to widen Las Vegas' appeal beyond gamblers in the early 1990s was all about this. After the tropical-themed Mirage casino-hotel revived the conceit of a Vegas trip as a classy proposition, there was a push by the convention authority to appeal to the
* The now non-canon comics also feature the Robotech Refinery Satellite (
* The now-rare cartoon "Mississippi Hare" has a sequence late in that short where Colonel Shuffle suffers this after chasing
* The now-retired Sean Avery may have been the king of this trope. He not only annoyed virtually everyone on the ice he came in contact with,
* The Now Show awards them the prize of most baffling adverts ever. "What any of that has to do with a bar of chocolate, God alone only knows."
* The Now Show Edinburgh Fringe 2019 episode, guest stand-up Alice Snedden reveals that she has the lowest Uber rating of anyone she knows: 3.4. The audience "oohs" and she responds "Whoa, easy. I'm still in the room! Mind your manners!"
* The Now Show had a skit about the fact English has more euphemisms for penis than any other language. Hugh then goes through all of them. Twice.
* The Now Show has an entire section on unlimited salad bars, and how you opt for them thinking "It's a salad; it's healthy", and then find yourself loading your plate with multiple servings of cold sausage pasta, rollmop herring, and boiled eggs, none of which count as one of your five a day.
* The Now Show introducing the guest stand-up slot, Steve Punt explained that part of the ethos of the show was providing a place for new, young comedians, before adding that, unfortunately, they all had their own stuff going on.
* The Now Show, John Finnemore announced he was going to focus on good news! Instead he presented bad news in a good way, acknowledged rather manically that maybe it was "not quite so good after all", and by the end was in despair.
* The Now Show Jon Holmes admitted that his wife calls his 'Little Jonathan'.
* The Now Show (Marcus Brigstock's segments and sometimes John Holmes or Mitch Benn. Also "stand-in Marcuses" like Lloyd Langford)
* The Now Show: "Newton's law of universal gravitation states that every point mass in the universe attracts every other point mass with a force that is directly proportional to the product of their masses and inversely proportional to the square of the distance between them. And that's a bit like this packet of Smints."
* The Now Show on Scotland's options if it gets independence and doesn't have a currency union with the rest of the UK:
* The Now Show politician or celebrity than about conservatives and liberals.
* The Now Show racism. "I mean, if you threw a bottle of Reggae Reggae Sauce or a Nando's menu, I'd be offended, but I'd think you did some research!"
* The Now Show series 53 episode 6, about the TV audience channel surfing from the proposed Brexit debate:
* The Now Show was deliberately introducing lame puns and then undercutting them.
* The Now Show, where Hugh Dennis, Steve Punt and rotating guests (special or otherwise) thoroughly mock a news story of their choice. There is frequently, but not always, a musical segment.
* The Now Show with "Do you see? Do you see what we did there?" Most notably:
* The Nox (aka the Bad Hair Elves) are even more irritating in that they NEVER get called on a 'pacifism' that relies entirely on being
* The Nox always qualify. In one episode, they were called in to mediate a trial because everyone knows they'll be fair in their judgement.
* The Nox are also bad about this. They are devout pacifists in tune with nature

and look down upon humans as immature and violent, and seem to forget that their own pacifist lifestyle is only possible because they can cloak whole cities and perform feats of healing up to and including reviving the recently killed.
* The Nox are really a highly advanced civilisation with flying cities, which is just masquerading as
* The Nox — though they brought people back from the dead, so maybe it doesn't really count...
* The NPC dragons themselves are merged with classical elements of the Eight Trigrams (to an extent, anyways)
* The NPCs in the game also have affinity values with each other, which can be strengthened or damaged based on your choices during sidequests (such as how you resolve an NPC
* Then (perhaps) played straight in Babylon 5: The Lost Tales, where a man possessed by a demon turns up on the station.
* Then Perish to suddenly show up. The trapped person then starts begging Obama to rescue them.
* Then Piccolo Junior later blasts a hole through the right side of Goku's chest. Goku still manages to win.
* Then played somewhat straight when it's revealed Tex is really just an AI created from the Director's memories of his dead love.
* Then played straight again in "Doug's Sister Act" when Judy is afraid that her family is too boring for her new boyfriend Kyle, so she dresses up the folks and writes them a script.
* Then played straight in another issue when Spider describes "mechanics": synthetic drugs that can be taken both by humans and by
* Then played straight in later appearances when they appear much more competent, and actually pose a threat to Danny.
* Then played straight later on in the series, with the arrival of the 1st Central Squad.
* Then played straight later-on, when people are turned in the traditional way.
* Then played straight when the draenei—particularly draenei women—became very obvious perpetual fanservice. Fanart has
* Then Played Straight when they become headed by the Black Knight, they are now the antagonists, though many fall under Just Following Orders
* Then played with further in the episode "Punked", when Castle does it by accident. He doesn't realize Alexis's
* Then (plus teleporters) in the back, and equip them with similar weapons. Then add a fantastically advanced AI that can operate the tank better than its crew, and cover it in claymore mines to kill anyone able to get close. Finally, pour on a complete lack of anything even remotely resembling subtlety. Then you have a Crusader-pattern Land Raider.
* then-Princess Elizabeth's marriage to Philip Mountbatten, mostly because she was underage and he was still largely seen by the public as a Greek and Danish prince, even though he had given up those titles. After World War II, when Philip was a British war hero and Elizabeth had turned 21, her father finally consented to the marriage.
* then proceeded to state that the ten pages of MadnessMantra were "excellent" and they'd publish it for $150.
* ... then promptly starts rubbing his legs while complaining about how hard that is on the knees.
* the NPR radio plays use auralization as an audio aid to their crews.
* then Prussia fully realized that the kid nation he used to fight against more than once that swore was a boy is actually a woman.
* then "puts on a show", the Dalai Lama very politely asks him not to do that, which gets Naruto to leave. Naruto later confesses to Takami that it's no fun messing with people who legitimately don't get upset.
* then rapidly started dying of old age. He took care of Marceline when she was a child, and according to Death himself, may well live to see the Sun blow up.
* Then recall it has slight subversions in that the trial throughly humiliates Bob

and he goes out of his way to try and make Atticus’ life a living hell.
* Then reveal that the new content actually isn't what you had been promising for several years, but consists of something superficial, like extra color variations allowing for shallow aesthetic changes.
* Then reveal that this was all really a promotion for the new version/season that you promised in the first place.
* Then, right in the middle of their emotionally-charged conversation:
* The NSA has their own department of white hat hackers (better known as "penetration testers", since certain less technically-literate management types tend to panic at the word "hacker") that constantly test their own systems. And do some
* Then, said Norma are the good guys' version of the trope. Not only are they fighting against Mana users for their racism, but they're getting their power by reaping the DRAGONs they kill for a living as livestock, fueling a machine that holds their leader captive.
* The NSA is also often shown carrying out activities well outside its real-world mission of communications and cryptography intelligence and counter-intelligence. In the real world, for example, it does not employ James-Bond-style covert agents or snipers, and plays no role in domestic law enforcement.
* then sampled it himself. He reported back to the player that "urine doesn't taste a bit like Gatorade."
* The NSCL isn't above making jokes about his lust for certain female anime characters.
* TheNSCL review opens on a large 18+ advisory for violence, despite the show itself carrying a TV-PG rating.
* Then Sentinel Prime does it when trying to disguise his intent to blow up Omega Supreme.
* Then she dies from the stress. When a remorseful Lynette tries to apologize to the man, he tells her that he actually is
* Then she dies in a blaze of glory, taking down a wight giant before dying herself.
* Then she introduces you to some other students as Grok, Destroyer of Worlds.
* . Then Sheppard is revealed to have hidden his true gender for all his military career, letting Rodney to happily pursue him.
* Then she realizes that he is not the real Nova, but Kill ** Killian, who is using life fibers tied to his fingers to feed on the energy of the crowd of people who see him as the illusion of their heart's desire.
* Then she's involved in two love triangles - one involving herself and two men, and one with one of the men and his former fiancee.
* Then she spent over another year running around defending the castle, which was like the previous three years, but outdoors instead of indoors.
* Then she suddenly shows up again in ADWD as Fake Arya and is married off to Ramsay Bolton to strengthen his hold on the north.
* Then she waits patiently while Demetri Martin's character goes through the awkward, halting motions of courtship rather than take any initiative herself despite the fact that there's an informed mutual attraction.
* Then Shun revealed his chain would attack without missing if he had even a vague idea of who he had to attack, Then the Pope refrained from attempting it again in case Seiya, Shiryu or Hyouga pulled something like that.
* Then Slack gets to return the favor later, but nicks poor Charlie's ear in the process.
* Then some are just wild cards. The conventional military could, in theory, get rid of Nilbog, but no one knows how many aces he has hidden up his sleeves as contingency plans, and since he's content to stay in the area he's taken over, no one's bothering to go to the trouble of trying to uproot him.
* Then sometimes he'll get "Serious", which is your cue to run. When his son Ryo inherits the title of "Mr. Karate", he does not wear the mask (in most continuities - he does wear a different mask in
* Then spitting at the subsequent news that Rob Ford is entering rehab.

* Then, Starlee gets to share some interesting information with Elmer Lenhardt's former neighbor:
* then start delivering a smackdown. Ali did this in the aforementioned Rumble by getting Foreman to tire himself out in the first few rounds, then laying into Foreman with powerful punches until Foreman hit the canvas.
* Then subverted at the end of season two: Elle blasts Sylar through a glass door; he keeps running and it seems he's perfectly fine, but in the next scene, he has several gashes and wounds.
* Then subverted in the ending, where Flash is revealed to be a street racer.
* Then subverted in the fourth game, where Snake guesses who the mysterious informant is about three sentences into the conversation:
* Then subverted when he is (apparently) killed offscreen later in the episode by the same Terminator after he unloaded a Mossberg into it, which must have upped his threat level a tad.
* Then subverted when Toguro punches Yusuke into a wall, destroying nearly everything on its path. Yusuke is in a wall, with dust all around. He finally stands up, and Toguro smirks and says, "That didn't even hurt you, did it?" Yusuke gives an affirmative.
* The NSX itself has its own, technological force field. However, the ship still sustains damage when the
* The NTA Film Network, established in 1956, was basically a syndication service which offered films and series (including
* Then taken further with the various soul systems introduced in later games where Mega Man gains the ability to mimic the appearance and properties of other characters in addition to using battlechips.
* then that future was changed when Janeway went into the past to get the ship home sooner.
* Then that player knows what's actually going on. A note saying "Make a perception roll, but don't tell the others" makes
* The Nth Doctor: A character is recast and an in-universe explanation is given for why they look and/or sound different.
* The Nth Doctor's departure was arranged a couple of years before it occurred in such a way that before it happened a lot of time was spent focusing on the new actor.
* The Nth Doctor: When a character gets recast, an in-universe reason is given for why the character now looks and/or sounds different.
* The Nth Doctor, who the showrunners wanted for the role, had a scheduling conflict for the pilot. Cromartie's original "face" was played for one episode by Owain Yeoman.
* "Then the bartender says 'Hey, that's not a duck!'" on Lincoln's Gettysburg Address.
* Then the civil war began, prompting the Soviets to invade the country and try to restore order. The Americans funded a
* Then the clerk beats up the would-be slasher killer and confiscates his really big knife,
* Then the end of the world as we know it happens, as basically everyone returns back to the Lifestream. NERV also wanted this outcome, so it's a Lose/Lose/Lose Scenario since NERV existed to prevent the Angels from wiping out humanity. Apparently, for the rest of the world, it would be a Win Scenario since otherwise, Humanity will kill EVERYTHING else also instead of just Humanity. Depending on your interpretation, the Angels Attacks may be this for the Earth itself. No, this is not a Happy Mythos, why do you ask?
* ... Then the killer. The dog and cat vacate through a doggie door. The horse gets out via a larger opening. The victim? Follows the cat out. Did we mention she's slightly overweight?
* Then. Then the Allied forces pushed the Chinese back to about where the border had been in the first place, causing both sides to fight there until they decided to call a draw.
* Then the parents reveal they don't own a clown statue and tell her to get the

kids and run.
* Then the post-game has invaders that are Ultra Beasts in all but name:
* Then the post-series comics came along, and the story gets considerably more complicated.
* Then the President reveals that the vehicle for the planned American manned Mars mission is actually a warship armed with powerful guns and dozens of nukes. It proceeds to blow up a good number of Nazi warships before it gets overwhelmed and requests help.
* Then the purges extended beyond that scope, and gradually extended to every part of the Soviet Union, and every organ of bureaucracy and the army, leading to a million imprisoned in
* Then there’s the attempt of wearing high heels etc. to make her look more height–weight proportionate; this succeeds only in making her appear as "the
* Then the REAL Syaoran shows up and things get complicated. He becomes the main character, but we never find out what HIS story is until near the end of the manga, and that just makes things confusing.
* Then there are arco-flagellants, who undergo a process similar to servitoring, but much of their body is augmented with combat cybernetics. They have their hands replaced by shock whips and power scourges, get internal pumps full of combat drugs, and have a helmet fused onto their head which keeps them at peace and near comatose while at rest. Once their activation phrase is triggered and they go into combat mode, and... One particular case of this was an Imperial official who went rather...batty after a time and committed several atrocities. When he was apprehended, it was commented that death wouldn't suffice as a punishment; and he was sentenced to become an arco-flagellant and spend the rest of his days as a killing machine fighting the Emperor's enemies.
* Then there are demons, human spirits that are entirely ego, who remain active and cognizant entirely through the force of their will and obsession. They are universally awful and dangerous because, even if their obsession is something noble, they will possess and destroy you to accomplish their goals. Add to that the fact that while they still think and feel, they're utterly lacking in the emotional depth that hormones give you, making them incapable of love or even basic empathy, and you have the nastiest creeps in the whole setting.
* Then there are "facts" made up solely to insult the other personality spheres ("The Adventure Sphere is a blowhard and a coward") and even Chell herself ("
* Then there are her siblings who, like Grace, were born from the same set of
* Then there are knuckleball pitchers, who combine this trope (knuckleballs have very little velocity and hence take relatively little arm strength to throw, but take absolute mastery to pitch consistently), with
* Then there are local papers, which ignore stories like "global thermonuclear war breaks out" in favour of 'local interest' stories. London's "Evening Standard" is notorious for reporting
* Then there are ones where the employees are so used to complaints, and so unaccustomed to being thanked or complimented, that they can't even process the
* Then there are pipelines; indestructible terrain (except for the seams) that air units can't even fly over, yet ranged units can fire over them without any problems. Dual Strike shows us the pipes are slightly taller than tanks.
* Then there are plenty of characters who are not actually giants, but are still ridiculously huge compared to other humans for no apparent reason, such as Whitebeard, Gecko Moria, Bartholomew Kuma, and Magellan.
* Then there are Servos (mass-produced clockwork creatures) and Thopters (winged flying machines, ranging from hummingbird-size to passenger capable), primarily of the plane of Kaladesh. With the right deck, you can create a small platoon of them to overrun your opponents through sheer numbers.
* Then there are Silver-Bordered cards (as opposed to normal Black Border cards), which intentionally turn this up even further. All Silver-Bordered cards are explicitly not legal in any sort of formal play and don't exist on any digital clients of the game. They allow mechanics that don't actually work within the games normal rules, having cards that are both in your hand and in play, having non-

integer stats (including fractions, infinity, and π), influencing games outside of the one they're cast in, and getting benefits from high-fives from people outside the game. Silver-Bordered cards exist primarily for joke sets and promotional cards, but some of the more feasible designs have inspired regular black-bordered cards, like Giant Fan inspiring Power Conduit and The Cheese Stands Alone being reprinted verbatim as the black-bordered Barren Glory. Some also are simply regular cards but with their effects turned
* Then there are Sourcerers - the eighth son of an eighth son of an eighth son, or 'wizard cubed', who is inevitably a
* Then there are Space Hulks, which are a random collection of asteroids, comets, planetoids and various spaceships and stations (some of which may count as mile long ships in their own right) which fell into the Warp, ran into each other, and fused together instead of smashing apart because of the strange properties of the Warp. They frequently get used by Orks as spacecraft in their own right.
* then there are the boxsets starring such characters as the War Master, the Eighth Doctor, Missy, River Song and some other assorted characters and Doctors. There are also "companion chronicles" to go through.
* Then there are the Fiends, the creatures most frequently encountered in battles. Essentially, if a dead person is consumed by resentment towards their death but lacks the strength of will to keep their mind together (as is the case with an Unsent) they become a Fiend, a vicious, monstrous entity that roams (or indeed, haunts) the land looking for living people to prey upon. As it turns out, the tendency for deceased people to become Fiends is actually the most pressing reason why sendings are performed.
* Then there are the founders and significant figures of all the other of the numerous sects and offshoots of the Catholic, Protestant, and Orthodox groups, as well as the sects and offshoots that don't identify with the three larger classifications.
* Then there are the Haruchai who like to bottle up their natural passion in favor for extreme stoicism and tend to end up highly judgemental of anyone who doesn't live up to their nigh-impossible standards.
* Then there are the Individual Eleven who claim to represent the will of the mainstream Japanese populace, and pursue "refugee liberation" (read: "kick them out of the country!"), who also commit terrorist acts in the name of their cause. In the first episode of the second season, the Major in turn compares the Section 9 to a terrorist organization since they're a secret armed group that lacks governmental recognition or supervision—they do get the said recognition later in the same episode, though.
* Then there are their kin the Hekatonkhire, Spectres who lost their minds to Oblivion on the road to becoming Onceborn, giving them the power of the Onceborn without the intellect to back it up. This does
* Then there are the K-Fee Lite ads, which replace the jumpscares with less scary versions, demonstrating that K-Fee Lite has less caffeine.
* Then there are the "native dishes" she offers the Titans. In "Betrothed", the Titans stay at her home planet, Tamaran, and sit through a meal where the grossness of the food is
* Then there are the Orks who crew Looted Wagons, because the only thing worse than an Ork driving an Ork-made vehicle is an Ork driving a vehicle
* Then there are the other names they use for plans, including "Plan Suck" and "Plan Stupid, in honor of its creator, Mr. Stupid".
* THEN, there are the planet ranks, which are so difficult that nobody knows how to get them.
* Then there are the powers/side effects of said powers that automatically lead to an Extra-Strength Masquerade. As mentioned above,
* Then there are the Ryshadium, bigger and stronger horses that may or may not be sentient in their own right. They are intelligent enough to choose their own riders and refuse to accept any other. They need very little care since they mostly look after themselves, but they are more rare than
* Then there are the single-episode manifestations: Trelane ("The Squire of

Gothos"), who turned out to be a child; the Organians ("Errand of Mercy"), who imposed peace between the Federation and Klingons; Kevin Uxbridge ("The Survivors"); the Thasians, who give Charlie his power in "Charlie X"; etc., etc., etc.
* Then there are the soy milk advertisements featuring a family of terrifying anthropomorphic cows.
* Then there are the vampires, who are incredibly strong and almost unkillable by conventional methods, and can be reduced to dust through their weaknesses. One drop of blood on the ashes and they return to life. The only way to knock a vampire out for really long periods of time is to get rid of the ashes somehow, like burying it, sinking it in the ocean, or throwing it off the Disc.
* Then there are the various flying mounts, starting with griffons and giant furry bats and later progressing to sporebats, drakes, miniature helicopters, hippogriffs, etc. Lastly,
* Then there are the various songs sung by Vic Fontaine, played by James Darren.
* Then there are the Voth, who are descended from dinosaurs, having evolved on Earth millions of years ago and leaving during a cataclysm. After traveling for who knows how long, they settled in the Delta Quadrant and forgot their origins, with their official doctrine claiming that they are the first sentient beings to evolve in that part of space. To say otherwise is heresy. While they are undoubtedly more advanced than the Federation, they are not "millions of years" more advanced.
* Then there are those characters who died soon after their debuts only to appear in more episodes
* Then there are user-made levels which give oddly-coloured enemies via palette swaps just for the fun of it. Some sadistic authors put the all-black palette on the enemies and make them transparent. Great, now you're fighting almost-invisible aliens.
* Then there is a lovely scene from the manga in which The Baka Makie claims this trope but Negi is of
* Then there is also Sinçrena who is actually a ghost hybrid, half mermaid and half ghost.
* Then there is a male example when Franky goes rampaging through town without his trademark speedos... because they'd been stolen and he is chasing them. Many in town yell the trope.
* Then there is a more advanced form of teleportation called Instantaneous Movement, which is mostly reserved for the
* Then there is another arc in which Rena perceives that her father is being blackmailed by his new girlfriend, whereupon she kills her and her lover Teppei. This is only the beginning because she believes she is being persecuted by a mysterious organization which Mion belongs, resulting in her taking all the students of her school as hostages and was seconds away from blowing them all up with a homemade bomb.
* Then there is Arueshalae, the potentially redeemable succubus who is a major player in closing the Worldwound. She can become a
* Then there is Banjo the Clown, God of Puppets, created by Elan early on in the strip, as in a literal hand-puppet. Despite this, Elan's legitimate faith in him is enough to have be considered a god, albeit a very minor one. However, Banjo was considered to join the Northern Pantheon (Odin liked puppets), but was ultimately turned down (which ironically becomes something of a plot point down the line.) Furthermore, Banjo has started spawning his own pantheon which includes the heretical cult of
* Then there is Fifth Edition's Ritual Casting system, which you gain access to from either a number of class features or the 'Ritual Caster' feat. With it, you can cast spells without expending a spell slot or without even
* Then there is "Good Times, Bat Times", the episode in which Dale ends up with Foxglove as his girlfriend. It's often considered the chronologically last episode (there is no defined chronology throughout a show that has the pilot in season 2). Either way, we don't find out how things go on with Dale in a relationship with a cute pink bat (unless you count

* Then there is Harry Potter himself, who, at age 11, realized that being cursed forever was a
* Then there is hilarious end to the Skypeia saga when Conis kindly warns the crew they're about to fall...mere moments before the crew looks down and discovers
* Then there is Jessie with her giant... horn thing, which goes down to her waist and
* Then there is Jorah Mormont's love for Daenerys Targaryen. Even after she makes it clear that she is not interested in him that way, he stubbornly persists in trying to woo her. Even after she becomes involved with another man, he soldiers on. Even after she sends him on a suicide mission, then banishes him under the threat of death for having betrayed her once, he works his way across half of a continent to go back to her, kidnapping a dwarf as an apology gift. Jorah will
* Then there is Lucius The Eternal, the personal champion of the deity of excess, Slaanesh. Lucius' quirk is that should he be bested in battle and the one who defeated him feels even the tiniest amount of pride about it, said person will slowly and painfully morph into Lucius and the only thing left of them will be a new screaming face on Lucius'
* Then there is Negi's tragic backstory, wherein almost everyone in his home village except for him, Nekane (who had her
* Then there is of course the Eldar Craftworlds which are planetoid-sized Battlestars capable of launching fleets of "ordinary" Battlestars.
* Then there is Rainbow Dash, who isn't afraid to tackle any kind of challenge, believing fully she'll be able to handle it.
* Then there is Saigyou Ayakashi which uses its beauty to lure people to it and then drain their souls.
* Then there is Saruman the White, greatest of the Istari (Wizards), in
* Then there is South Korea. Unlike Singapore or Hong Kong, the country really didn't have a longstanding service sector and used to depend solely on agriculture. It was a complete backwater. Back in the 1950s, its GDP per capita was lower than some of the poorest African countries. Before the Miracle of the Han River happened, it was outclassed by
* Then there is the alternate-dimension villain group called The Praetorians, who are the evil version of the Freedom Phalanx hero group.
* Then there is the cocky American-accented couple whom Ray knocks out (
* Then there is the entire "The Blue Spirit" episode where Aang is being held hostage. Until he's rescued by
* Then there is the fact that Assassins and Templars have been trapped in a
* Then there is the High Elf mage Teclis, who is the extreme of this trope. Aside from having 3 wounds (which is meh by lord standards), he has the worst defensive stats in his army, who are
* Then there is the hilarious case of Steven Bradbury, the first man from Australia and the Southern Hemisphere to win an Olympics Winter Gold medal. He managed to win his heat, but was put against two favorites to win the Men's Speed skating over all in a quarter final. He came third when only the first two finishers would win. But the top finisher was disqualified for interfering with another skater. In the Semi-finals he was dead last, until everyone crashed and piled up, leaving him able to get 1st place. Then, when it came to the finals, the first four competitors are all in a dead head with each other, he's a good distance off just trying to finish. THEN THEY ALL CRASH AGAIN LEAVING HIM ABLE TO GET THE GOLD! It actually went to the Judges and they ruled that it qualified as no one actually cheated. Just horrible luck. The look on his face when it crosses the finish line screams "THIS IS ACTUALLY HAPPENING!?"
* Then there is the joke: This is not a drill. Repeat, this is NOT a drill. This is a
* Then there is the matter of "Whistlin' Past the Graveyard", which was written by Waits, but was intentionally supposed to sound like it was written and performed in the manner of Screamin' Jay Hawkins.
* Then there is the Night elf Illidan Stormrage, who had a similar path except for more personal reasons coupled with the effects this had on his body causing his

peers to mistrust him. Ten thousand years in prison didn't help things, as he immediately (though manipulated by Arthas) went to claim a demon artifact that turned him into a half demon. He eventually allied
* Then there is the one where Captain Archer brings his dog along to a meeting with those same aliens because they have some critical parts for
* Then there is the Penguin's declaration of "Burn, baby - burn!" which was a quote popularly attributed to rioting blacks in 1965 Los Angeles. The film premiered a month after the Rodney King riots in Los Angeles.
* Then there is the Queen's Own tasked to protect the Manticoran Royal Family
* Then there is the Skitarii Legions of the Adeptus Mechanicus. While Skitarii are cybernetically enhanced to extreme levels and have better armor than the Imperial Guard the Mechanicus doesn't care what happens to them and neither does the Skitarii themselves. They are usually cloned or artificially grown and their emotions are reduced. Death of a Skitarii is nothing more than a way of learning about the enemy. The Skitarii vanguards carry Radium weapons that poison them by just carrying them despite their radiation protected armor slowly killing them. It gets worse in Onager Dunecrawlers where the driver is connected to the machine and is placed in a electro-amniotic tank where he is slowly killed by harmful energies and is soon replaced like replacing batteries.
* Then there is the strategy of taking out weak players because other players are going to want to keep them over you later in the game. To make this happen, Cirie and Danielle pretended to be aligned with Courtney and Terry to vote out Aras, while Courtney and Cirie pretended to be aligned with Shane and Aras to vote out Danielle. In reality, Cirie was aligned with Danielle and Aras to vote out Courtney on a 3-2-1 vote. Basically, Cirie got Courtney to pretend to be in an alliance while the actual purpose of the fake alliance was to prevent the people who could save Courtney from working together.
* Then there is the Warlord, a ruthless and controversial militia leader. Periodically, his troops will complain about the military discipline required of them. They can either be given a pay bonus, be allowed to shake down civilians for "contraband" (generating corruption, and potentially turning the population hostile), or be let go... In which case they will join the Insurgents.
* Then there is Tin Nyanko, who, despite being a member of an evil organization, seems to really relish in being bad. It's kind of funny, since she is half healed and has a split personality.
* Then there is Wazdakka Gutsmek, who is attempting to construct a portal network so he can drive his bike from one end of the galaxy to the other without having to use the brakes. And who at one point ramped his bike through the void shields on an Imperator-class Titan to get at the crew. While he was on fire.
* Then there's Adam Smith, the founder of modern economics who, amongst other things, was famous for boiling bread and butter in a teapot and declaring it to be the worst cup of tea he ever had.
* Then there's a different breed of eldritch horror, Marit Lage... whose one card appearance so far, due to being a special token produced by a land in which she was frozen, can be obliterated instantly with an effect that appears at least once in every single block cheaply at instant speed and common — a simple bounce spell, available easily to every deck with blue in it.
* Then there's a distressed father rabbit of about 500, who gets a letter from the US government telling him to "increase production".
* Then there's a few others who have a repetitive birthdate as well, like Badr (8/8) and Juuniya (12/12). Ryusengetsu's birthdate is repetitive as well, but in a different way (11/22).
* Then there's all that space for Core War fics featuring Ackbar, Certavus, Tarix, Vastus, and the rest. How did the Great Beings take power, way back when? How did the tribes develop? So many questions, so much room for fanfics...
* Then there's also episode 248, "Behind the Laughter", which had this closing line in its first run: "The future looks brighter than ever for this Northern Kentucky family". However, this particular line was actually written multiple times and reruns change which location is stated.

* Then there's also the fact that Abraham Lincoln (via the remnants of the Lincoln Memorial, where the Gettysburg Address is still legible) is seen as something of a deity to freed slaves.
* Then there's also the God of Darkness. The terentatek that attacked and nearly killed Jaune in "
* Then there's also the Japanese terms 'kanojo' and 'kare', which can mean 'girlfriend' and 'boyfriend' or simply 'she' and 'he', depending on the context. Like all words that can change meaning based on context, this can get confusing.
* Then there's a more comical example in the Skypiea arc. Faced with a choice of four doors, Luffy says after they've entered that it may be like a game; pick the right door, you get a prize, and pick the wrong one... "then you fall off the island". Usopp panics, as the island they're on is 10,000 meters in the air, and Sanji dismisses it as absurd. Then they reach the end of the tunnel... and find that while the other three paths go straight forward, theirs plunges straight down, out of sight beneath clouds. Amidst the
* Then there's Angela's beloved former boss Dawna, pretty much a paragon of motherliness and benevolence.
* Then there's another moment where the Queen and Saito do this, only using something more... racy.
* Then there's Anya, who enters with a Freaking Flying Fire Kick that Negi barely dodges. Granted, she appeared two panels before between Nodoka and Yue, but they were watching from afar.
* Then there's Apu and Manjula. In her first episode, it looks like they have a
* Then there's Atomos, a summonable monster who is pretty much nothing
* Then there's Axem Red slashing the shit out of Mario with his axe (doing seemingly little damage, if any at all) while
* Then there's Blood Bowl. This is what happens when you take the over-the-top ridiculous aspects of Warhammer and replace the GRIMDARK with American Football. Based on the tabletop gaidengame, you can choose between "classic" mode (taking individual turns and rolling a crap-ton of dice like said tabletop) or "arcade" mode (standard real-time football, except instead of "downs" you play from kickoff/ snap until you either score, or the enemy gets the ball and HE scores.)
* Then there's Bon Bon. The toyline makes her most official name Sweetie Drops, despite the previously-released
* Then there's "Born Again Krabs" where SpongeBob finds an old patty underneath the grill. After multiple unsuccessful attempts from Mr. Krabs to sell it, SpongeBob put it in a cage because it
* Then there's Calvin. One arc has him write a report about bats (which he based entirely on his idea that bats were bugs
* Then there's Captain Hook, who once shot one of his pirates (off-screen)
* Then, there's Coach Z imagining his butt in "Decemberween Short Shorts". Matt Chapman noted in the DVD commentary that he originally made Coach Z's buttcheeks big, round and pulsating, to his friends' disgust.
* Then there's Coby, who accompanies Luffy for the first couple of episodes and chapters before he joins the Marines. He becomes a chore boy, but eventually becomes an apprentice to Vice-Admiral Garp, who was famous for having cornered Gold Roger many times.
* Then there's Damas in Jak 3: Wastelander, who says that he's proud of Jak after the latter wins an arena match. He then swiftly tries to keep up his disguise of the tough guy warrior king by saying what he's really proud of is the training program.
* Then there's Dark Continent. It's so dangerous and uninhabitable it makes the Berserk-verse looks tame in comparison.
* Then there's Darklord Kraagenskul. Have the DoV and a reasonable number of Combat Skill boosts? Somewhat tough, but managable. Don't have it? Prepare to fight crypt spawn, then make a do-or-die lunge for his sword (although if you're successful, Kraagenskul isn't extremely tough). Have the Sommerswerd? You have a time limit to beat the crypt spawn and
* Then there's Dave in Fallout 2. If you talk to him he'll tell you every unlucky

bad thing that's ever happened in his life. It would be tragic but it's also extremely funny.
* Then there's "Dead Man's Party" when the same dead cat scares Buffy twice.
* Then there's Dean "What're you offering" Connors, - McCoy says that Dean's not a
* Then there's D'rizzl, the only Dark Warrior to possess both intelligence and skill: Garland occasionally gestures towards competence but is usually a moron, Vilbert is basically incapable of dealing with any problem outside of LARP, and Bikke is the only character dumber than Fighter. It's fair to say that he has a miserable time of it... which only gets worse when Black Mage takes over the Dark Warriors and D'rizzl is forced to pull an
* Then there's Eina-Afa, a super-AI in charge of a space station the size of a large planet, who has been alone for longer than Earth has existed as a physical object.
* Then there's Ekuar, the wizened old rock-shaper, who retains his charm and wit despite having survived centuries of mistreatment by the trolls.
* Then there's Elaine of Astolat AKA the Lady of Shalott. Half the time she's an innocent maiden who falls in love with Lancelot and then dies of heartbreak. The other half she's still a maiden who falls in love with Lancelot, but instead of being innocent she forces herself of Lancelot with the help of magic and then bears his son. Unless that's Elaine of Carbonek.
* Then there's Ensign Harry Kim, fresh out of Starfleet Academy, who's nonetheless quite a gifted Engineer with particular talents for designing technical specifications and holo-technology.
* Then there's Eridan. After being rejected by Feferi, he turns to another potential love interest. And then another. And then, with increasing desperation, another...and then another...and then
* Then there's Eskarina Smith. Admittedly she belongs in the earlier stranger parts like Twoflower, but it took her 23 years to return, and about 34 books.
* Then there's Excelsior, a team of ex-teen heroes who try to get the Runaways out of the hero game...by putting their old costumes back on and fighting them. When one of their own members points out the mixed message, Turbo invokes the trope. "It's like my mom always said, Jono. 'Do as I say, not as I do.'"
* Then there's Fahr Outpost, a snowy region populated by bombs who wear bearskin hats. Their mayor speaks broken English peppered with 'da's and vehemently denies the existence of a superweapon on the base.
* Then, there's "Fail Safe". In an attempt to destroy/divert an asteroid headed towards Earth, SG-1 places a bomb on it. Unfortunately, Carter then discovers that the asteroid itself is
* Then there's Fate Averruncus, who apparently loathes his real name: "
* Then there's Feducci who consistently manages to get back up after being chopped to bits.
* Then there's Fëanor/Fingolfin, who are half-brothers and... don't get along well in canon.
* Then there's Frieza's race. They can survive the vacuum of space, can shapeshift to limit their power so as not to destroy their surroundings, and survive without any kind of sustenance for at least a
* Then there's Fulgrim, the Primarch who turned his dying homeworld into a thriving paradise and strove to make his Legion the perfect embodiment of Imperial glory and culture. His corruption came from the Laer, xenos exterminated by his Legion that worshipped Slaanesh and heavily modified their bodies for various purposes, from whom Fulgrim obtained a Daemon-possessed sword. Corrupted by the Daemon-sword, the Laer’s practices, and his fallen brother Horus, Fulgrim chemically and genetically altered his legion towards a more and more twisted ideal of “perfection”, while taking up Slaanesh worship, straying from the Emperor’s path. In the end, after killing his brother Ferrus Manus, Fulgrim came to his senses and
* Then there's Gagh-Azur from the 2e corebook, a creature of the ocean depths that seeks the creation of perfect life, and produces spawn that are generally some combination of land and sea dwelling creatures.

* Then there's Gotterdammerung. His sole power? Total destruction of anything he touches down to the quantum level. It can't be used for anything but death or destruction. Since he's the sensitive type and doesn't want to hurt anyone, it makes him a helpless bully magnet.
* Then there's his half-brother Alistair, your fellow Grey Warden. Since he's a party member, he's considerably better at it and if he takes the throne, he even gives the rallying speech before the Battle of Denerim.
* Then there's how all the various bugs and other small animals of the meadow—frogs, hedgehogs, etc—work together to play the music on the record. A multicultural group of people working together and living in harmony was not a Nazi-friendly message.
* Then there's Isaac, who was born to Abraham and Sarah very late, and after Sarah (in despair at a total lack of children) had told Abraham to have a child by her maid Hagar. Once Isaac was born, Ishmael did
* Then there's Italy, who's always quick to raise the white flag when he gets attacked. But as Chibitalia, he once defeated the Turkish Ottoman Empire. While the charakters in Hetalia in general don't spend that much time being badass, it doesn't mean they can't be, if they want to.
* Then there's items which grant magic resistance when worn, cloaks of magic resistance and
* Then there's its hated loot box system in which players are incentivized to pay actual money to open boxes in hopes of getting cosmetics through a randomized system. While the system garnered complaints in the beginning, it didn’t take until much later for the system to become more common in the gaming industry. Many people blame the game for popularizing and normalizing a gameplay mechanic that some have likened to gambling.
* Then there's Jack-In-The-Box, who is the CEO and lead inventor at a toy company, and whose weapons are enhanced versions of his various products. He's also smart enough to cobble together a quick-freeze spray from leftover car parts in a junkyard.
* Then there's Jack Ryder, who as the Creeper giggles like a stoner watching YouTube.
* Then there's Jack, who will kill you if you sleep with Roy. He will take a sniper gun and put a bullet through your brain if you fuck his boyfriend.
* Then there's Jared the intern, who has no idea how Pokemon battling mechanics or Pokeballs work, but through a combination of
* Then there's Jason Nesmith, the star of said cheesy space opera. When the film begins, he's a drunken egotistical
* Then there's Jennifer's first case: Dan Jermain wants to sue the Roxxon corporation, for which he worked as a safety inspector, because he got knocked into a vat of radioactive material, transforming him into the larger, stronger, more powerful Danger Man, wrecking his life in the process. The problem is that, because it was a workplace accident, Jermain can only get workman's compensation; he is barred by statute from suing Roxxon in tort! Also, he can only recover his medical bills and lost wages for a limited time from workman's comp. Plus, as an example of the absurdity of using Marvel comics as a source of law, Jennifer's strategy for winning the case is based on the return of Jean Grey story arc, in which it was revealed that Jean was never the Phoenix, but rather that the Phoenix took her place; based on that, Jennifer decides to argue that Dan Jermain died in the accident and that Danger Man is a totally new entity. That might be true, but the Phoenix/Jean Grey story has nothing to do with it. Jennifer would have to actually
* Then there's Jiraiya's long, flowing, spiky white hair, or Chouji's (part two) long, brown spiky hair? Which admittedly isn't all that amazing, until he uses his Human Boulder technique and uses his hair to turn himself in to a human hedgehog (Jiraiya also used a similar attack minus the rolling).
* Then there's Jones, who is even more of a blank slate. Whether she's
* Then there's Julia, a new Muppet with autism. She has a bit of echolalia when communicating with other characters, but also repeating what she, herself, says. For example, she says "Play, play, play" and "Boing, boing, boing", etc.

* Then there's just the fact that it's much harder to store these suits; while a fabric suit could be worn under one's clothing or folded and carried in a bag, plated armour would be much more inconspicuous and harder to hide or take anywhere. While some super-powered characters might have a means to get to their suit quickly, the non-powered heroes would need to have their suit hidden close by at all times.
* Then there's Kemintiri, who earned her place as one of vampire society's most wanted fugitives by killing and impersonating the Ventrue Justicar for
* Then there's Kenpachi, who reacts like this after getting jabbed at by multiple blades:
* Then there's Kevin. He would have a rather decent set of powers — his "groove" is so intense that he can force people into an
* then there's King Abdullah II... Who, by the way, is rumored to have personally led a bombing raid against ISIS as revenge for the group's execution of a captured Jordanian pilot.
* Then there's King Croesus, who was told that if he attacked his neighbor, a great empire would fall. Think about that for a moment — obviously, it's going to come true, since whichever empire lost the war would fall. Croesus just didn't consider that it might be
* Then there's Linux, which runs on PCs, Macs, Suns, or, according to Internet legend, dead badgers. There's no such thing as a "Linux" computer.
* Then there's Lisa's description of Mr Burns as a "monopolistic, self-aggrandising... umm... stinky-pants!"
* Then there's Mada, an Asura that can make itself so large that it's capable of swallowing the universe.
* Then there's me, Deadpool of those phrases were uttered during the first peek at the game.
* Then there's Mello and Near, where this trope is REALLY played around with. On the one hand, Near is like L in that he is an anti-heroic antagonist who uses questionable methods, yet he looks like a cute little boy. Meanwhile, Mello is an extreme
* Then there's Monk Gyatso, Avatar Roku, Avatar Kyoshi, and Lu Ten, all of whom are important to the plot, but are long dead before the series began. This is the implication of a series set 100 years later and with reincarnation; someone close to the cast will inevitably have died, either due to extreme old age or the main character himself (since it wouldn't be reincarnation if there wasn't a dead guy to begin with).
* Then there's Mortein's "Louie the fly" and all of its descendants, which like the Vegemite and Aeorplane Jelly jingles cited above date back to before television. And the Mortein ads are in Tv Tropes, ironicaly. As those male singers say: #More smart, more safe, MOOOOARTIIIEEN!!#
* Then there's Mr. Heartland, who doen't even try to hide the fact that he blatantly rigs the duels between his henchmen, the Fearsome Five, and the heroes. Heartland uses a device that let Semimaru, Kurage and Mosquito Ninja all start their duels by taking half their opponents life points and adding it to theirs, just because he can. On top of that, Kurage and Mosquito Ninja handicap their opponents with poison and hallucinations respectively, while Semimaru simply discards a Battle Royal rule he doesn't like (not that he takes advantage of discarding that rule...) Nonetheless, they all lose, proving that they were poor duelists who can't win even when they
* Then there's Ned Flanders. In "Hurricane Neddy", he's seen as a kid thirty years ago but this kid is also quite ambiguous in age (his voice sounds quite high, but the adult Ned has quite a high voice for a dude anyway). This could make him probably in his thirties or maybe forties. However, in "Viva Ned Flanders", he claims he is actually sixty but is so healthy (and possibly is blessed by God from going to church so often if the "daily dose of vitamin church" line is to be believed) that he looks younger. It's possible that he was lying to get the seniors' discount, but that would be
* Then there's Nighthowler and its effects, especially with the revelation that

prey
* Then there's Octavia, who is almost paired with Pompey in the first episodes, then married off to Antony (who is actually
* Then there's one-episode character Sergeant Rhoden from supply at headquarters in Seoul, who goes by the trope name - and lives up to his reputation.
* Then there's Part Six, where Enrico Pucci eventually evolves his stand into 'Made in Heaven', which has the power to
* Then there's pepper-spray, which, when dispensed from riot-control guns (also used to ward off bears) count as something between Agony Beams and
* Then there's Phoebe's grandmother's funeral. "Welcome. Here are your 3D glasses..."
* Then there's Pius Dea, which dominated the Republic some 11 thousand years before the contemporary setting. Followers worshiped a goddess (its name is "saintly goddess"
* Then there's poor Castiel. Whether you're a shipper or not, he gives up
* Then there's Porrim, yet another Maryam to fill this role - and an alternate universe counterpart to the Dolorosa. Not many people filling this role can pull off
* Then there's Principal Nedzu, whose Quirk makes him a super-intelligent
* Then there's Professor Poopypants. He gets hit by TWO cars and an ice cream truck and suffers no ill effects.
* Then there's Rainbow dragon, a 4000/0 special summon with no cost other than having all 7 different crystal beasts out, his effects can't be used on the turn he's summoned, but he has 2, the first is to send every crystal beast on you side of the field (a total of nine thanks to their effect of being spells when destroyed) to the graveyard for a 1000 point boost for each, the second is remove all crystal beasts in your graveyard from the game and then return every card on the field to their owners deck.
* Then there's Rika Sasaki's huge crush on her adult teacher, Yoshiyuki Terada, which is a point of contention with fans since in the manga he apparently accepts and reciprocates it (though he tells her to wait until she's of age). In the anime, he remains oblivious and she's way too shy to let anyone know.
* Then there's River Song, supposedly the Doctor's wife. She is also a time traveller, but moves on her own. Though it was indicated at first that they are meeting in roughly reverse order, later episodes show that it's a little more complicated than that. For example, the Doctor is present at her birth, but though it's the first time she meets him, it's not the last time he meets her. The only point we know for sure is that the
* Then there's Rosa Copeland, who has a serious collection of strictly-lace-up thigh-high ballet boots. Justified in that they were the heels her ability to easily handle wearing them despite her serious lack of experience with high heels in general manifested in. She actually foresaw the possibility of a Rainbow Angel Series mandating a collection of thigh-high ballet boots named for her and had the designs be strictly-zip-up to better accomodate two lockable straps over the zippers. At least she prefers to be able to bend her knees in her pairs...
* Then there's Roxas and Axel; whose overwhelming bromance is a major part of their characters.
* Then there's Saddler's favorite method of killing people: impaling them on a giant tentacle like appendage with a razor sharp stinger on the end...
* Then there's Sahar, her roommate, who's pretty much a female, bisexual
* Then there's Saint Patrick's Day. Just about everyone's forgotten that it's a
* Then there's Sasuke. While he still remains good-looking, after learning
* Then there's semi-perfect Cell's response to Vegeta's understandable confusion when he
* Then there's settlement, another major motivation. Emigrate to the colonies! Oversee the harvesting of agricultural produce and raw materials to shipped off to wherever - probably one's own country - and buy stuff from back home and elsewhere in the Empire, like a true patriot! This wasn't very profitable in pre-industrial economies like

* Then there's Sidoh, who's ugly as normal for a Shinigami, but isn't so much evil as pathetic and pitifully stupid.
* Then there's Sion, with his Unstoppable Onslaught which is a charge for roughly
* Then there's Skynet's attempts to avert its own destruction by repeatedly sending Terminators back in time to stop John Connor from being born or kill him. Not only does its Terminators never succeed, they are indirectly responsible for multiple attempts to prevent the existence of Skynet. Worst of all,
* Then there's Skype. You can call and chat with other Skype users for free, but to call a landline or cellphone, you need to buy Skype credits.
* Then there's Sollux's counterpart, Mituna, who has suffered a serious head injury in backstory and replaces letters with numbers virtually at random.
* Then there's Sonata, who refers to the broken and burnt Pinkie Iron Mk. V as a golf club, when it had only been referred to as a stick since her arrival.
* Then there's "SouthWest Pacific", which is about Calvin performing in a school play. What does the title mean, then? Well, during
* Then there's steamrolling, where a large vehicle just drives over a small one. Going by the rules, say an 80,000 lb semi hits a motorcycle with a roll of 3 damage. With a ram bar, that turns into 3 x 20 x 2 x 2. 240 damage. Now, evenly distribute this over all the armor and the player... which has up to 9 hit points. Yeah. Now note that this level of damage is likely to happen during say, a 15 mph crash(1d6-1). A 50 mph crash requires 5d6.
* Then there's stuff like both Brock and Molotov teaching Hank and Dean how to kill people in
* Then there's Takasu, the warden of the facility. In his duel with Yusei, he has them both wear
* Then, there's Tenchi's own mom, Kiyone Masaki (not to be confused with Kiyone Makibi, one of the six girls vying for him). Unlike his saintly
* Then there's that all-seeing eye at the entry gate that looks a lot like it belongs to one of the raid bosses... and the NPC who stumbles over his words as he almost says that the Master would be interested in certain items. It is very heavily implied that the Faire is related to the Big Bad of that expansion.
* Then there's that ghost story...Dolly one-step, dolly two-step, Dolly's gonna get you...Don't tell me you weren't scared of that as a kid!
* Then there's that sound that sounds like a rusty metal trapdoor that appears in several soundtrack pieces, eg
* Then there's the actual drugs (Superadine especially) which make you super powerful... and irreversibly mutate you, and a great example you don't learn about till the late game.
* Then there's the Acura A that looks like the top of the H was pinched together.
* Then there's the ad from Ortega taco sauce starring Olympic athletes. The only woman in the commercial
* Then there's the Aduka, whose secondary weapon is specifically designed to call down the Thor. A 4v4 match where
* Then there's the ad where a talking cookie is grabbed by a giant hand and pulled offscreen after he had been apparently seducing a
* Then there's the appropriately-named episode "Cape Feare", where the Simpsons go into the Witness Relocation Program and move into a houseboat to protect Bart from Sideshow Bob. When Bart — having been receiving death threats from Sideshow Bob, and understandably a little on-edge and fearful to begin with — tries to go to sleep, Homer bursts in at the most inappropriate time brandishing a knife, yelling
* Then there's the aptly named killer The Doctor. Unlike The Nurse, Herman Carter was one of these before he became a servant of the Entity. A psychopath working for an off-board CIA mind control program. People would beg and plead to not be sent to his office.
* Then there's the arc about Hayley's relationship with Reginald the koala.
* Then there's the arguable case of the Thousand Sons, who received so many "
* Then there's the Avenger, a van that tends to overheat faster in exchange for a more powerful boost, then there's the Commander, the expy of the

* Then there's the Bishop, who sets Valjean on a path of righteousness for the entirety of the play. Without him Valjean would likely have continued his self-destructive spiral until rejailed or killed, Fantine would have been arrested and died in prison, Cosette would have stayed with the Thenardiers, causing her to never meet Marius, who would more zealously assist the revolutionaries and die among them. Curiously, Eponine
* Then there's the Bublin King, who you have to fight four times. And in two of the fights he falls into a cliff upon defeat.
* Then there's the character of Vamp, who is to all evidence an actual supernatural vampire. In a milieu with psychics, an immortal woman and a man
* Then there's the Cipher Pol No. 9 assassin squad, who all more or less qualify, but are led by one Rob Lucci, who is just
* Then there's the coin flip that was used to determine if Londo or G'Kar would be the bad guy.
* Then there's the confusion to starts when reading or writing a date differently based on what
* Then there's the costumes for "Masquerade." The lyrics, which describe the ball with lines like "every face a different shade" and "grinning yellows, spinning reds" are being sung by revelers... dressed almost entirely in black and white.
* Then there's the crystal weapons. They have low shield penetration, but make up for it by not costing anything to fire unlike missiles.
* Then there's the deliberate version around twenty years ago in which a Winnipeg radio station had a contest, the prize being a trip to
* Then there's the Dizi rat. As one of the few universal meat animals in a galaxy where most predators would lose a fight with a human child, they practically explode if you so much as look at them wrong.
* Then there's the Doctor's various romances with women across time, including Queen Elizabeth I, Marilyn Monroe, and (implied) Nefertiti.
* Then there's the elevator at the beginning. Payne destroys the emergency brakes with bombs, then it turns out the crane Jack and Harry hooked to the car to secure it couldn't hold the weight either.
* Then there's the energy golems who can't move but can attack in a straight line with unlimited range with their
* Then there's the episode "Mikey's Pants", wherein Mikey rips his pants and his friends try to save him from being faced with
* Then there's the episode where a rogue Asgard made a teenaged clone of Jack. The clone survived the episode and went off to live his own life. There's all kinds of trouble a kid with the memories and skills of a special-forces veteran can get into.
* Then there's the episode where Maggie ran away, with Homer running through several versions of this to tell Marge in advance, including "She was only a baby, it's not like we grew attached to her" and "They grow up so fast, one minute they're a baby, the next they're out on their own."
* Then there's the episode where Stewie beats up Brian twice for not paying him some betting money on time. Later Brian comes limping into the living room, covered in bandages, and someone asks him what happened. Stewie makes a threatening gesture and Brian hastily replies that he "fell down the stairs'', prompting Stewie to say "Ooh, you should be more careful!"
* Then there's the episode where the Janitor eats a piece of his laxative-laced pie in order to convince J.D. to do the same. As they sit in adjacent bathroom stalls, the Janitor says, "Totally worth it."
* Then there's the episode where Walt creates a bunch of smoke bombs that look exactly like meth, or the pilot episode, where he creates a poison-gas bomb on the fly, while two guys are trying to make him teach them his method at gunpoint.
* Then there's the fact that Billy Cranston, the first Blue Ranger, invented a collection of wristwatches that could be used both as personal communicators, and could remotely activate an alien teleportation grid. Villains aren't the only ones who could
* Then there's the fact that Scarrans don't have external sexual organs, which

Chiana discovers after collapsing in agony from trying to
* Then there's the fact that Trucy Wright's mother, Thalassa Gramarye
* Then there's "The Father Will Kill The Son" relating to Angel and Connor. Even though it was placed in a prophecy book to mislead the heroes, it nevertheless came true, though again just literally: Angel "killed" Connor, but as part of a deal that gave Connor a new, more normal, life. The demon who planted the fake prophecy to try to stop the
* Then there's the Felnas, Mask of Disruption. As the name implies, it causes whomever the wearer targets to lose control of their powers. This works for the Toa's
* Then there's the film's climax, where an unimportant and replacable bridge is defended at all costs. Major Winters, of
* Then there's the first resolution we see between the Brainspawn and the Nibblonians...
* Then there's the four great Gods of Chaos created from the psyche of mortals: Khorne, god of rage and war; Slaanesh, god of lust and excess; Nurgle, god of disease and despair; and Tzeentch, god of schemes, magic, and ambition. It's worth mentioning that Khorne is sort of like an evil version of Odin, minus the magic. There were a number of lesser Chaos Gods, but they were minor gods and their canonicity is questionable (see below).
* Then there's the Galactic Counsel, a coalition of worlds devoted to peace.
* Then there's the Galaxy Gun. Its distinguishing trait was that it could stay in orbit of the Emperor's new throne world (protected by a fleet), and simply fire a missile into hyperspace. The missile would then exit hyperspace at its target and destroy it, while the gun was never in any danger.
* Then there's the giant dragon, The Kukla. He's given as one example of a mid-power Greater Elemental Dragon. This isn't even touching the Five Elemental Dragons, who are the apexes of the Elements. Anyway, he's a 1,200-foot-long gently slumbering beast guarded by twelve high-level war gods, whose job it is to kill anyone who tries to summon or otherwise disturb Kukla's sleep. Why? Because when he wakes up, he'll blow up Creation through liberal application of insane quantities of the five elements, and then go on to blow up the Wyld. Then, seven scales will fall down from his body and form the continents of a new world... Yeah.
* Then there's the giant ghost powered robot made from the city using the city's zombie defence system.
* Then there's the giant Horizon planetary attack missile launched against the Asuran homeworld, which carried
* Then there's the Hit-Monkey, which is basically what it sounds like, a
* Then there's the horror of 1978: In July, the Red Sox owned a 14-game lead in the A.L. East. Then, the Yankees began an astounding comeback while Boston slumps and they end the season tied; in fact, the Bosox had to win their final eight games just to get to the tie. In the winner-take-all playoff game, Bucky Dent's infamous three-run homer allows the Yankees to win and Red Sox fans stunned at the total collapse.
* Then there's the infamous case of the town of Vernon in - where else? -
* Then there's the infamous "Catwalk Escape from Haos" event during Chris' campaign which seems that the one ahead of another partner seems to heavily influence the rate at which Haos uproots sections of the catwalks you'll be running on. Hope you're good to race against a
* Then there's the infamous "Luca Brasi sleeps with the fishes" scene. The Don's most feared and loyal hit man vanishes around the same time his boss is gunned down, causing some debates in the family whether he turned on them or one of the other families killed him. Then the Tattalias send them Brasi's bulletproof vest wrapped around a dead fish, and their questions are answered.
* Then there's the joke that's "the funniest joke ever", but only if you're a guy. "What's the difference between peanut butter and jam?" Barney tells it to Lily, who is so disgusted that she refuses to see or speak to Barney for a month. The guys, while upset that the group has been divided, still think it's the best joke ever. The punchline of the joke is never uttered out loud on the show, but if you look it

up on the web, it definitely fails to live up to the hype:
* Then there's the Klingons, whose mythology in this series says that the ancient Klingons
* Then there's the Koa'ki Meiru archetype. It's actually supposed to be Core Chimail, being a portmanteau of "core", "chimera" and "mail", but for some reason the literal katakana spelling is the official one.
* Then there's the latter, the City of Tombstone exemplifies this trope way more than the former. While almost everoyne in the city is armed, it's one of the only few places where it has any semblance to normality in the apocalypse. Thanks to most of the survivors having to do their part by being assigned jobs and even having their own currency.
* Then there's the Legion of Substitute Heroes Auxiliary, made of those "not yet ready for membership in the Substitute Legion". So far, the only members of this group have been Antennae Lad (who picks up radio signals, not all of them from this universe or time period) and Double Header (whose power is that he has two heads and will eventually split into two full people.
* Then there's the Mana Burn spell on Demon Hunters and some demonic units that causes the target's mana to "combust", consuming the target's mana and dealing them damage equal to the amount of mana burned.
* Then there's the manga chapter about the young resort heir who is seeking the girl whose foot matches the marks she left in his head—a literal "first impression".
* Then there's the matter of players of dead dreamselves, who end up dreaming in the
* Then there's the matter of teleportation abilities, shared by at least two ESPers in the series. The way in which inertia is treated is somewhat inconsistent, with the teleportation effect either eliminating it entirely or somehow redirecting its vector after repositioning.
* Then there's the Mister Eaten questline, which dives straight into the heart of
* Then there's the more conventional creepies, like the Azlu, or Spider Hosts. They're spiritual parasites who infiltrate human bodies, consume the brain, and turn the body into a puppet. They can turn into giant spiders at will, and are almost singularly dedicated to strengthening the barrier between Earth and the
* Then there's the Mothership/Supercarrier. In addition to carrying fighters and bombers, friendly players killed in combat can be recloned in supercarriers and return to the fight with a ship from the supercarrier's bay.
* Then there's the Nspire line, which has interchangeable keypads; the original ones had the letter keys tucked in between the usual keypad keys, but the touchpad ones have a completely different layout that moves all the letter keys to a thumb keyboard at the bottom and consolidates the trig functions all into one button, among other things. Now, some schools are beginning to adopt the Nspire to replace the old 84's, so as time goes on this will turn into an "older folks don't know technology" thing for those raised on the latter.
* Then there's the numerous foreign wives of King Solomon, who lead him to build places of worship for their own gods. He is punished by the fracturing of the kingdom after his death.
* Then there's the old joke about the rich man who died, and an angel was sent to bring him to Heaven. He bargains with the angel, and its superiors in Heaven, to allow him to bring all his riches with him, which they are against. Eventually, they cave in and allow him one single suitcase and whatever he can fit into it, which after agonized deliberation, he fills with solid gold ingots. After he arrives in heaven, Saint Peter asks what he brought, and the man opens the suitcase. Saint Peter looks at him with a confused expression on his face and asks "You brought PAVEMENT?"
* Then there's the old man who died while masturbating on the Quick Stop's bathroom. To make matters worse,
* Then there's the old mechanic's joke, "If it doesn't fit, don't force it.
* Then there's the Omni-Gadgets. "Whaddya know, this 8 AP Omni-Gadget in my belt is a Force Field generator!".

* Then there's the one about the guy who gets a call from his wife on his way home from work, warning him that she heard in the traffic report about some crazy guy who's driving on the wrong side of the road. His reply: "It's not just one guy.
* Then there's the one Harmony/Wednesday fic, which used the common conceit that Harmony is actually Amanda from the
* Then there's the one that started it all (in-universe), Zefram Cochrane's warp vessel, the
* Then there's the one where Faye's new shrink suggests it as an outlet for sexual frustration.
* Then there's the one where they somehow manage to set Homestar adrift in the Arctic Ocean, and can't for the life of them remember how they pulled off their "greatest caper ever". It apparently started with The Cheat peeing in Homestar's melonade...
* Then there's the one with the mother and daughter on a boat: "Mom, do you douche?"
* Then there's the Overlords, who are damned sinners who have managed to amass a high level power and influence. Alastor is at this level.
* Then there's the passwords the Ministry suggested everyone set to identify impersonators. Mrs. Weasley's password to her husband was her husband's pet name for her — the embarrassing/adorable "Mollywobbles".
* Then there's the Philosopher's Stones themselves, which still contain the souls of the people sacrificed to create them. Once their energy is used up, these people are gone for good.
* Then there's the precautions they take in case some of their super soldiers rebel: the beast warriors have a brainwashing chip secretly installed in their helmets, the Augmented Units have large numbers of guns trained at their back, the formidable underwater warriors can't breathe air, the cyborg with the firepower of a battalion has a remote-controlled
* Then there's the problem when subspace extrudes into normal space. Basically, being caught in such a flux means trouble. The energies and particles coming from them are generally not healthy, and stresses can tear starships apart. And you can forget about trying to use Warp Drive (indeed, one
* Then there's the process of becoming akuma, which throws in plenty of
* Then there's the P-Wing, which can make almost any level a breeze (and unlike the cloud, they stay beaten if you die). Shame they are
* Then there's the rather chilling scene end, with Dee himself lying on his cot with his eyes wide open, mumbling the tune to "Frère Jacques" to himself. One can only imagine what he's seeing.
* Then there's the rather more nebulous and disturbing Red Room, a formerly defunct Soviet organisation, which isn't even glimpsed until the sequel. Only occasional references that make it clear that pretty much everyone (even HYDRA) is afraid of it, a brief appearance by a few of its less competent operatives and the presence of the Winter Soldier and Natasha, both of whom are products of the Red Room, and in chapter 70, mentions of HYDRA assaulting what
* Then there's the really bad joke that "if the universe is infinite in all directions, then I am the center of the universe". Once upon a time, a king asked a wise man to tell him where the center of the world was. The wise man pointed to a spot on the floor and said, "It's right here. If you don't believe me, go ahead and measure it."
* Then there's the real world where he's willing to defend Marge from an Ultimate Martial Artist.
* Then there's the Revolutionaries, who directly challenge the World Government, and within six years, have gained from strength to strength, to the point that its leader is considered "The Worst Criminal In The World". Most of what we know about them has been mentioned by other characters, and we have not seen much on the organisation as a whole, what its aim is, or even the aftermath of their actions. However, individual members of them seem to be decent enough folk.
* Then there's the ring transporters. What's in the rings on one side is exchanged with what's in the rings on the other. The only time we see this used to cause

bodily harm is in the original movie (trapped partially under the rings by O'Neill, Ra's
* Then there's the rise of cable networks and streaming options. In the past, the lower-tier of scripted television, which included soaps and Made-for-TV movies, was still pretty limited with only a few networks; even in the 90s, when cable TV was exploding, acting roles were still limited and you'd be lucky to get offered a soap role in order to get your foot in the door. Now when you have 450-some primetime and streaming shows looking to cast, taking a three-week role as a nurse on
* Then there's the Root Mother. Well, actually you're not fighting her, you're protecting her from a horde, so it's more of a horde battle than a true boss battle, but it is harder than any other horde battle (aside from The Risen) due to the fact that if they kill the Root Mother, you lose, so it's not just your health you have to worry about. Aside from the fact that you can get two archers and a Root Brute at once, all of whom can inflict Bleed, this is also the second "boss" you will encounter in the game (and one of few that will always be encountered on every campaign), and like Gorefist, if it's your first time playing, you won't be able to upgrade your Dragon Hearts yet since Root Mother herself is the one who upgrades them for you after this battle is over. Not to mention likely not having a lot of weapon mods unless you've beaten a lot of bosses on Adventure, with only three Dragon Hearts.
* Then there's the salute from the followers of the church of Altana. Raise both hands, open and palms up, while bowing your head.
* Then there's the scene where a nerd-disguised Naru punches Keitaro
* Then there's the scene where Jamal corrects the teacher's incorrect usage of farther/further.
* Then there's the second season episode "The Midterms", and this conversation between Charlie and Leo:
* Then there's the "Something Special for Someone Special" which is to say, a wedding ring! It's $100, and
* Then there's the SOR, whose training consists of working themselves to and past the point where the human body tears itself apart. Then they use alien drugs that allow them to rapidly regenerate, their bodies all the stronger from having been pushed so hard. They're the closest thing to superhuman, and can die of malnutrition if they're active in their gear for too long, due to the sheer impossibility of eating enough calories to fulfill their bodies' energy needs during such activity.
* Then there's the stoic, unflappable, eternally calm Zhu Li — not in a creepy way but in an I'm-on-top-of-things-and-nothing-fazes-me-no-matter-how-insane way. Though not nearly as extreme an example as Mai, the two do put their skills to the same use.
* Then there's the sun conure; its near-rainbow of orange, yellow, green, and blue feathers is definitely gorgeous, and it's has an engaging, playful personality. But this foot-long bird has a scream that feels rather like someone is hammering a white-hot railroad spike into your ear. And yes, they can cause temporary deafness at close range. No wonder screaming problems are one of the biggest reasons why a parrot gets dumped in rescue.
* Then there's the Theta Team attempting to wipe out the Many with explosives. It doesn't finish them, despite the report after the incident.
* Then there's the third game with Magnes' rocket. Launching it is the main objective of Echo Ridge Elementary's Science Club, and Luna 4 Prez gets caught up in it to secure votes for Luna. Once it gets launched, players tend to forget about it until the very end — where the same incident that almost caused the rocket to
* Then there's the time Kitty realizes she and Red are at a swinger party, and is just at such a loss she flubs the line.
* Then there's the time Mandy grabbed a genie's lamp and wished everyone in the world would just go away.
* Then there's the time Russ showed up. He crowed that Ross was jealous of him being a "real doctor." Ross remained unimpressed. "You're a doctor of gums! That's

the smallest body part you can major in!" To be fair, Russ has most likely hit his glass ceiling already, whereas Ross can and did go much further.
* Then there's the time they discovered that the giant space station full of sky has a hurricane in it.
* Then there's the Time Vortex, which can do virtually anything. When Rose absorbs it, she uses it to revive the recently-killed Captain Jack Harkness. However, since she is an inexperienced "Time Goddess", she ends up reviving him
* Then there's the titular Gundam itself, which isn't outfitted with any sort of funnels or Newtype weaponry, but instead can hijack them through the suit's Psycoframe with the Newtype Destroyer (NT-D) mode active. This also counts towards the Unicorn's own weaponry, particularly the shields on its Full Armor configuration (which come each with its own Psycommu panels, I-Field generators, and twin Gatling guns.)
* Then there's the Troubleshooters, whose members continue to work for their original service group between missions. Many others get jealous, as it's interesting (albeit dangerous) work and can be a fast track to promotion.
* Then there's the two-headed crime-solving goat. One head eats tin cans and the other eats health food.
* Then there's the Uber-ninja, whose custom-made nunchaku basically mean he's dual-wielding two roped-together
* Then there's the unsub's video editing room in "The Big Wheel", where he watches videos of his murders
* Then there's the Venom symbiote itself, after bonding to Flash Thompson.
* Then there's the version where the prostitute ties the mark to the bed before forcing them to listen to Rick Astley.
* Then there's the very impressive rocket launch from the first film, which is played more like an actual rocket launch — complete with massive roar, blinding engine flare and slow launch before blasting into the sky.
* Then there's the video chat on the non-armor-based cell phone in the middle of Afghanistan at the start of the movie.
* Then there's the Vulcan 300, a "toy robot" made from a pocky box, in
* Then there's the "WAAAH-HAAH-HAAH-HAAH-HAAH!" sound of someone crying in a cartoon, often with
* Then there's the weapons from the Ancient Cave. Some of them are the strongest weapons (and armor) for different characters, but if you get them is completely random and you can spend hours after hours trying to.
* Then there's the Web addresses, which they've been inconsistent about. A fake movie trailer listed www.whatthepfargtl.egg (a callback to an earlier episode in which Homestar believes the suffix for some site is "dot-egg, or dot-muffin or something") as its official site, but a later cartoon has Strong Bad registering virtualpizz.biz, a real domain that a fan snatched up quickly afterward and fortunately did not turn into anything untoward.
* Then there's the well-known case of Curtis Jackson, better known as 50 Cent, who in the early 2000's was shot a total of nine times in the chest, hand, arm, hip, and both legs, but survived to become a multi-million dollar rapper.
* Then there's the Winklers. Doreen isn't a vampire but likes acting the part (to the extent of adopting a stereotypical Uberwaldean accent despite being an Ankh-Morpork native who's never been even remotely near Uberwald). Her husband is one, but doesn't especially enjoy it, and presumably the
* Then there's things even the Free Kingdomers consider magical, like Oculatory Lenses. Free Kingdomers will stoutly deny that silimatics are magic: magic is things that
* Then there's this bit of dialogue after Homer becomes an artist, something that Marge had always dreamed of becoming herself but could never manage to succeed.
* Then there's this quote from the end of the very same storyline, when Akane finds Ranma in a hot bath so he can live up to his promise:
* Then there's TIM, the eyeless, nameless infernomancer who provided the first evil in the comic and
* Then there's tomacco; the disgusting tasting but hideously addictive tomato-

tobacco hybrid.
* Then there's Unova's Champion Alder, who can stop a rampaging Bouffolant with his bare hands and jump down tall cliffs like they're nothing, and Drayden the Gym Leader, who frequently wrestles with his high-level fully-evolved Dragon Pokémon to toughen
* Then there's what happens to those eaten trolls' lusii: They're fed to Feferi's
* Then there's when Curly prepares to pound a nail pointed the wrong way on a wall. Moe calls him an imbecile for what he's about to do since the nail's pointing the wrong way..because the nail goes on THAT wall!
* Then there's White Diamond. White diamonds symbolize purity and clarity, but White Diamond embodies madness and corruption. White Diamond is known for her terrifying anger, comes across to viewers as decidedly off, and participated in a corruption blast that mutated countless gems. White diamonds also symbolize love, given that they are traditional components of women's wedding rings. White Diamond implies herself to be devoid of love or empathy.
* Then there's Wild Fire, an alias of MLP storyboard artist Sabrina Alberghetti, and Mandopony, a fan musician. The two met, began dating regularly, and formally announced their engagement in January 2015. They even run a shared Tumblr account,
* Then there's "World of LordCraft" (from the same organization that's behind
* Then there's XRMs, which are practically cruise missiles. Sidenote: always turn off your night vision mode (even during night missions!) in
* Then there's Yugi who is just... he's like the poster child for Woobification. If you watch the unknown first season in particular, or read the manga, then you see that he starts out as nothing more than a
* Then there's Zeus, king of the gods himself. He has to resort to trickery to get his sister Hera to marry him; then after their wedding, he quickly tires of her nagging dislike of him and goes out to trick a gazillion mortal girls into sleeping with him.
* Then there was chapters 251-252, again with Konoka and Setsuna, which sort of inverts this. Setsuna treats it as a a Not a Date, then by the end
* Then there was "Croft's Pikes", an unfortunate incident where a bit of hyperbole on Churchill's part
* Then there was Denmark, when the Germans mounted a surprise invasion on the morning of April 9, 1940, which led to Denmark's surrender in about six hours.
* Then there was "Duck Flipping Burgers." In fact, every one of these attacks (barring "Sparrow Eating Hot Dog") are an actual move, which was confirmed via Dojo's book of fighting moves.
* Then there was Duplica's Ditto, which couldn't master transformations for a long time...it would never get the face right.
* Then there was Faith, who acted in this way for a time after killing a random human.
* Then there was Garrett Bischoff. Garrett actually does seem to have talent, but he's still very green and got shilled by every main-eventer in the promotion, which did not endear him to the fans all that much.
* Then there was his horrified expression when Homer started praising him for revealing the secret to defeating his new boss at work: "All hail Flanders. Mightier than Jesus. Praise Flanders!"
* Then there was Hollywood Harry aka Harold Kappowitz aka Koodles the Clown from the 2016 Terror Tram by Eli Roth. He was once a circus performer and children's variety show host before becoming the unofficial mascot for Universal Studios Hollywood when it first opened in 1964. But as time went on, people began to fear clowns thanks to their negative portrayal in movies and sensationalized news stories of clowns attacking people and kidnapping children. Kappowitz lost his job and was reduced to being an unpaid street performer outside the park gates. A few years later, he was banned from the property due to his increasingly erratic behavior. He fled into the Hollywood Hills and his character, Koodles, faded into obscurity. For decades, his presence in the backlot remained unnoticed even though the local wildlife surrounding the park and the occasional tour guide started vanishing. But these were brushed aside as the result of the park expanding and the

transient nature of volunteer tour guides respectively. Then, in the fall of 2016, during the "Clown Craze", people started to notice him wandering around the backlot and began to take videos and photos of him whenever they got the chance and they called him Hollywood Harry, the phantom clown. Soon, "clown hunters" began to go searching for him, only to discover he was not alone. He had assembled an army of former circus performers and clowns to help him in his revenge against Universal Studios for firing him all those years ago.
* Then there was ii, who was the head Admin on MSMF for a while and went through SEVERAL Usernames in his time. Oh yea, he was also one of the few boys in the Fandom which certainly helped his case...
* Then there was Moloch von Zinzer, whose cooking would invariably go from "acceptable" to "boiled sponge with gravy" immediately after serving Sanaa.
* Then there was Mr. King, Erek's 'father', who suggested pasteurization to Louis Pasteur.
* Then there was one of Galileo's books, which was once printed in parchment and highly soluble ink, so if you were caught reading it you could just throw it at some river and nobody could prove anything. Presumably other heretical books would've gotten the same distribution.
* Then there was that criminal that tried to steal from the Powerpuff Girls home. It went about as well as you would expect. At the end of the episode, he's intending to
* Then, there was that part where Light's archenemy L appeared during his death, both staring at each other and lampshading L's own death. This almost drove fans insane with their theories, riots and flame wars. Although the author has made it quite clear that the afterlife doesn't exist in the
* Then there was that time where Homer correctly guessed what a think tank was, much to the shock of his family.
* Then there was the arc when Chandler and Monica were seeing each other but didn't want anyone else to know. Except Joey had figured it out and they had sworn him to secrecy. This, of course, meant that he had to cover for their slip-ups, such as when Chandler's underpants were found in Monica's apartment ("Oh, they're mine."). This culminated in Monica and Chandler "outing" Joey as a sex addict to the group, at which point he turns the tables on them by announcing that he had slept with Monica in London and she'd become obsessed with trying to get him back in the sack ever since. Monica's forced to endorse his version, thus keeping the secret, allowing Joey to get a little revenge for the way he'd been taken for granted and - most importantly of all - protecting his reputation as
* Then there was the embarrassing fawning over an extra that female fans christened "
* Then there was the episode "To Love a Patty", where SpongeBob creates a Krabby Patty so perfect he ends up falling in love with it and refuses to eat it at all.
* Then there was the failed drug test in June 2016. When he returned, he started taking more clean pinfalls. This, ironically, led to him being better received in general by the fans, who thought Reigns as an angry upper-midcarder with an unclear agenda was better than Reigns as a bland babyface main eventer. So of course it was decided that Reigns had paid enough dues and was pushed back into the main event scene. Although he didn't win the title from champion
* Then there was the famous incident where Emperor Valerian lost to them in the Battle of Edessa and ended up becoming
* Then there was the issue of Japan's horrendous treatment of Allied prisoners of war. Needless to say, the Allies weren't happy. One reason why there were few Japanese prisoners apart from the Japanese themselves being averse to such an act is that the Allies themselves would rather kill enemy soldiers than capture them, out of anger towards perceived atrocities.
* Then there was the Japanese whiskey brand that chose to adopt another name when they noticed that
* Then there was the jeans commercial that put videos of masculine men to the song "The Jean Genie" (
* Then there was the magician doing card tricks, who triumphantly showed his

audience that a card had changed value before their very eyes. The little boy sitting next to him was unimpressed and pointed out that there were actually two cards stuck together...
* Then there was the one where Lisa has to tell Homer that Bart had rented a car with a fake ID and was trapped in Tennessee. Homer's face goes red and he says
* Then there was The Professor's recollection of the last time aliens invaded, and all they did was force the smartest people on the planet to breed with each other. It might not have been benevolent to mankind as a whole, but judging by his reactions, it sure was a great time for some.
* Then there was the Sally Field/Tony, Toni, Tone episode where Chris Farley's motivational speaker character Matt Foley plays a Mall Santa.
* Then there was the time Archer tried to justify his pay to the office drones:
* Then there was the time Bobby, not possessing a bamboo dagger blessed by a Shinto priest, threw an okami into a wood-chipper.
* Then there was the time Colonel Makepeace lead four SG teams to rescue SG-1 from Hathor. It did not go so smoothly and they had to be rescued by MORE cavalry, this time in the form of some rebel Jaffa, with air support provided by Bra'tac and General Hammond in a needle threader.
* Then there was the time he semi-jokingly threatened the Jonas Brothers with a drone strike.
* Then there was the time he tried to tell Hobbes this hilarious story he heard at school. When Hobbes tried to get him to, you know,
* Then there was the time that Nabiki flipped off Sōun. Given that she usually does it with her index finger, this is a non-verbal
* Then there was the time the babysitter thought Homer was trying to grab her butt (he was actually trying to pull off a piece of candy that was stuck to the seat of her pants—thus explaining the incriminating drool). She denounced him for sexual harassment. Next thing you know,
* Then there was the time the Doctor was shot to death, then kicked Death's ass and got back up. He was pretty defiant at the time, but when he returned to the office, he calmly scolded the gorilla and velociraptor fighting there.
* Then there was the time when Bush had a press conference with some US troops in Iraq, a PR event advertised as the President's chance to have a "frank, spontaneous conversation" with the soldiers. Problem was, a news channel picked up a live feed of the conference room before the event showing a full-blown
* Then there was the time where, after having already explored the myth "you can clean out a cement truck with dynamite", they then made the cement truck
* Then there was the time where there was a fight for Spike's love between a greed-grown Ember, Mina, and Rarity (Who had been turned into a dragon.)
* Then there was the underground war, where (predominantly but not exclusively) British and German diggers tunneled under the battlefield to lay explosive charges and undermine each other's trenches. This sort of warfare was slow, laborious and terrifying, especially when Your Tunnel met Their Tunnel very suddenly.
* Then there was the What If episode where Fry destroyed the universe by never coming to the future, causing a
* Then there was Tomo and Kagura's fight over Santa Claus. They conclude that he is paid by the government and flies at mach 100. They were thinking what to say to Chiyo, since they thought she still believed in Santa and they didn't want to crush her dreams. Chiyo stopped them by saying that she already knew Santa isn't real and that her father was Santa. Cue Sakaki's fantasies...
* Then there was Vriska, whose murder of Tavros by impaling him on his own lance led to Terezi impaling
* Then there was, "what a waste it is to loose one's mind or not to have a mind is being very wasteful."
* Then there was Yakko singing "all the words in the English language," which takes this trope to an extreme.
* Then there was Yawgmoth, a firm believer that strength came from conflict. And then he created a biomechanical hell named Phyrexia where
* Then there were catch wrestlers whose second job wasn't just a gimmick, like

Stanislaus Zbyszko the lawyer.
* Then There Were Five by Elizabeth Enright. He's extremely knowledgeable about the natural world, and teaches others about it.
* Then there were the anime Transformers series, The Headmasters, Masterforce and Victory, which ignored Season 4, and undid the finale again.
* Then there were the Guntank variants that appeared in IGLOO, which kicked all kinds of ass while operating primarily as very large (and
* Then there were the helicopters that the Philippine military lent to Coppola for the famous "air cavalry" scene against a village held by communist Viet Cong insurgents. Those were frequently taken back, interrupting filming, to do actual air cavalry work for the Philippine military units engaged in combat with real communist insurgents.
* Then there were the incidents with the Hatfields and McCoys being put in the same jar, and On The Sixth Day, when God was adding Humans to his recipe for Earth, Jerks in a spice jar.
* Then there were the Infinites - beings from beyond the universe who wanted to rearrange the galaxies to 'improve the energy flow of the Multiverse'. To this end, they demolished planets and re-shaped them into the means to move galaxies. The actual demolishing was done by human-sized drones which destroyed everything in sight and used the raw materials to replicate themselves until there was nothing left except the molten core and trillions of drones. The Infinites were pretty appalled when they discovered that planets - which to them are about the size of grains of sand - have tiny beings living on them which can't survive that sort of thing.
* Then there were the "manga-style" Archie stories in the early 2000s.
* Then there were the numerous other rumors of what Resetti does to you if you continue to reset long after he nearly has a stroke trying to hammer in "RESET THE GAME
* Then there were the Thousand Sons. Magnus's two big mistakes: thinking he knew more about the Warp than the Emperor, and thinking he was too smart to fall for a
* then the Saints win the Super Bowl occurred, the Saints get vilified for a bounty scandal.
* Then, the Thunder begun a slow climb towards a dominant team that just can't win the big one: losing the Conference Finals to the Mavs (who would win it all), the Finals to the Heat, trading away rising star James Harden while also losing Russell Westbrook in the playoffs en route to the Grizzlies beating them to the Western finals, and in the season Kevin Durant finally got his MVP award, struggling against the Grizzlies and Clippers before the Spurs outed them in the Conference finals. The following season Westbrook did his best to compensate Durant being the one sidelined by injuries, but the Thunder ended out of the playoffs. 2015-16 had OKC returning to form, beating a strong Spurs team and going up 3-1 on a Warriors team some deemed an
* Then. The title track became his first-ever #1 hit in 2013, followed by a second #1 in "Runnin' Outta Moonlight" and additional Top 10 successes with "Goodnight Kiss" and "Like a Cowboy".
* Then the trope is averted during the events of [ME2], thanks to the Reaper techs used for her resurrection; Jane becomes pregnant with
* Then the Undine blast their way into the Jenolan Dyson sphere and wipe out what's left of the Voth fleet before engaging the Dyson alliance.
* Then, the V-Cinema DVD Special took this to ridiculously funny levels, when in a bizarre (long story) moment, Kotoha and Mako dress and act like schoolboys... and then Ryuunosuke, Chiaki and Genta reveal that they're cross-dressers as well. The biggest WTF moment was when Takeru, who's calmly sitting... suddenly flips his clothes and reveal himself to be a rather CONVINCING cross dresser too.
* Then the war comes in, Endymion is killed, and Serenity either kills herself due to grief (manga and Crystal.
* Then the writers missed the young Enzo. So they made a duplicate from a back-up/ archived copy. Since everyone is really a computer program, this makes some sense.
* Then they are both killed off at the very beginning of season five.

* Then they combined the two, with Mustafa and Crews battling for attention. Then Mustafa brings out the horse.
* then they fell in love. Note that they didn't even remember being in the same day care until a former teacher told them about it.
* Then they go off to take over Hell together afterward! It's sweet! (No, really, this actually happens. They even wait for Hoji, his administrative assistant with a man-crush, to commit suicide and catch up with them, too.)
* Then they had a spectacularly bad February, including a stretch of losing 10 out of 11 games before two more losing streaks in March dashed their playoff hopes, ultimately finishing 13th in the East.
* Then they have a fling in the last episode, and in the first episode of the fourth season, James Lance has left the show and Matt is, apparently, dead. (The show lost a lot of its appeal in the fourth season. And not just because James Lance left
* Then they high fived. He gave her the ring itself the next day at breakfast.
* Then they introduced the B2 super battle droids, which are much bulkier and more menacing than the B1's. Namely, their blasters are mounted on a
* Then they make things worse by choosing a particularly inopportune time to try and sell their wares.
* Then they offer interstellar travel and he asks if there are any alien races prepared for war, a word that their translators fail to find an equivalent for. Realizing what kind of beings he's talking to, Yuri requests that they refrain from making further contact with humanity for at least 10,000 years.
* Then they're wiped out altogether by the Dominion in "By Inferno's Light"
* Then they see the private eye's car pull into the crowded parking lot. They need a distraction. Reuben, their manager, honks their car horn, then yells out the window: "All right! I know my daughter is here and I'm going FIND HER!"
* Then they spend their entire duel complimenting each other's skill in swordsmanship and discussing fencing techniques.
* Then the Yugoslav authorities paid the Czechs to get the bridge blown up, got it on camera, and then paid again to have it rebuilt!
* Then they upped output by few magnitudes. Best part? It was used primarily for orbital mining.
* Then they will get out their torches, pitchforks, and placards (with nothing written on them) and rampage through your towns, to lapidate statues of yourself, and to burn down all buildings they encounter, including vital public institutions, firms, and their own houses. While the
* Then things got a little worse when Noah (not Spoony) disparaged Nintendo
* Then this happened. It was the first time in the Super Bowl era that a playoff game went down to the last play in regulation through a game-winning touchdown, and the play that won it had been known ever since as "The Minneapolis Miracle".
* Then (though their twilight years are pretty quick, and basically just leave them enough time to find a way to die with dignity). And some of them can become truly immortal.
* Then throw in that this is Shakespeare, many of her rambling stories included double-entendres about how Juliet is expected to have sex and become pregnant very soon.
* then thrown out the window INTO SPACE all by someone he thought was on his side.
* Then to go along with the telepathy and teleportation powers of the dragons it was revealed that they have telekinesis as well, so at least part of their flight is likely a result of self-directed telekinesis to augment their wings.
* then to its original "Ultra Pompadour" form just before he kicks Boris' batty butt.
* then to Joffrey Lannister, and finally to his younger brother Tommen - in order to secure her Queenship. She's incredibly pragmatic about the whole thing - including not minding that Renly is gay, Joffrey is sadistic, and Tommen is half her age - and capable of manipulating all three of them. The only problem is they keep dying on her
* the N. Tropies game, it's possible that they may return in a future installment.

* Then try combining Invincibility with Turbo Mode, Tiny Bond and 2x Hunting Knives. No Spetznaz or Janus operatives can withstand the wrath of knee-stabbing midget 007.
* The Nuckelavee Grimm in Volume 4 is shown to keep trophies of its victims, such as flags or weapons. This is unusual behavior for a Grimm, which generally are not intelligent enough to do such things.
* the Nuckleavee fight at the end was the most inconsistent at 128 errors (123 continuity errors and 5 terrible animation/rendering screwups).
* the nuclear arsenals simply weather the barrage, but the losses would be unacceptable.
* "the nuclear option,". For reference, one of the most feared institutions in the supernatural world is the Wardens, and their preferred weapons, when not using magic or a magic-cutting sword, are guns and discipline.
* The Nuclear Option involves invading The Institute (possibly with the help of a giant, communist-hating robot if doing it for the Brotherhood), fighting your way through hordes of Synths including three elite units to destroy the entire underground lab complex with the aid of your faction's allies (and maybe giving the Institute scientists time to evacuate, or not and letting them die), and having a final encounter with the Institute's Director
* The nuclear radiation concept was soon dropped to focus on a string of
* The nuclear war itself was a subversion. Because on one hand, D.C. was just one of many,
* The nudibranch, a type of mollusk sometimes called the "sea slug", feeds on jellyfish and other stinging sea creatures. It is capable of taking the "stinging" cells from the creatures it eats and incorporating them into its
* The Nudifier — A character ends up naked because they were exposed to something that disintegrated their clothes.
* The Nudifier: A weapon, magic spell, substance, etc. that has the purpose of instantly destroying or disintegrating a person's clothes so they end up naked.
* The "nuggets", especially Hot Dog, Kat, and a gaggle of others from the new
* The NUKE is still considered a WMD due to the high risk of paper cuts.
* the nukes in question were infused with the saliva of Golb, an Eldritch Abomination which puts this squarely into this trope.
* The Numair Chronicles, Arram sees a female gladiator getting disemboweled in the arena. He vomits in disgust and horror.
* The Numair Chronicles's death was premeditated rather than caused by an errant storm and that Faziy had something to do with it, given her connection to the lightning snakes. His masters and friends advise him to keep this to himself lest he meet Faziy's fate.
* The Number 23 first meet when he bumps into her in the street and she drops her cake box.
* The Number 23, the hero and his wife first meet when he bumps into her in the street and she drops her cake box.
* The Number 23, the hero digs up a skull and leaves to get Police support. When they return the skull is gone and this trope comes in.
* The number 3 also pops up a lot throughout Daenerys Targaryen's storyline. She is explicitly told "The dragon (in her family sigil) has three heads" as a key prophecy. She is the youngest of three children, given three dragon eggs for her wedding gift
* the number 4, due to one of it's possible pronunciations, is considered the number of death, and April is the fourth month of the year. This date reflects his determination to apprehend or kill the members of the Phantom Troupe, and he is indeed referred to as a "god of death" in one of their predictions.
* the number 4 is considered unlucky because one of its pronunciations (''shi'') is similar to how they would pronounce "death".
* The number 612, or 6-12 (or 2-16), also appears, usually in relation to the Trolls. (June 12, 6:12 AM, 612 hours, 6 hours and 12 minutes...) often as a form of 12 divided into two groups of 6.
* The number 614, often accompanied by the letters "Gen", appears frequently early

on in
* The number 70 is referenced in a lot of Boards of Canada songs, "The Smallest Weird Number" being named after one of 70's properties. Most of the time the number is called "Sixtyten," in reference to the number's name in French. Furthermore, their independent record label is called
* The number 73 (- -... ...- - in Morse code) can be encountered all over the amateur radio hobby. It's an abbreviation for "Best regards".
* The number 7 has a cropped up constantly in many of Nasu Kinoko's works. Examples include the 7 Servants of the Holy Grail War, Ciel being the 7th agent of the Burial Agency (which is, of course, made up of 7 members), the 7th Holy Scripture (Nanako), the 17 Piece Dissection (Shiki's 'signature move'), the 27 Dead Apostle Ancestors and so on. It is explained in Tsukihime that the number 7 is considered "the most perfect number".
* The number 7 is everywhere, particularly in the Seven Kingdoms of Westeros (Really 7 provinces). There are Seven members of the Kingsguard, Seven gates to King's Landing, and most importantly, Seven gods that are the main religion of Westeros.
* The number 9 also keeps cropping up, especially in the Thousand Year Blood War arc. Yhwach seems to function in relation to the number nine: he was sealed for 999 years. After 900 years, he regained a heartbeat. After 90 years, he regained his ability to reason. After 9 years, he regained his power.
* the number 9 doors were at the very end of the game, as the party eventually discovers one more number 9 door blocking the final escape route that's actually a number q
* The number 9 is used elsewhere; with the 9 Free Cities in Essos, as well as the nine point of view characters in the first book in the series.
* The number "I Want to be a Producer" has a very Busby feel to it, with its elaborate set and chorus girl posing, though it is somewhat minimal.
* The number of boxers killed before the introduction of gloves was negligible (a handful of recorded cases). This number exploded with the introduction of gloves, because you could now punch opponents in the face repeatedly without breaking your hand. Furthermore, the way force is transferred through the glove increases the stress on the brain (read: brain damage and fatal aneurysms). Some sources estimate the death
* The number of characters that are likely to wield hammers at some point of the game are greatly increased in the sequel, including his apprentice Luca, the ninja Gekkou and possibly even
* The number of death traps, cold-blooded assassins, evil armies, cursed artifacts, hostile fauna, poisonous (and man-eating) flora, malevolent undead, and hidden ancient evils sealed all over the place that Lone Wolf runs into means
* The number of enemies (without counting the ladies) that Cyrano has made at the Burgundy Theater:
* the number of explosions cannot outnumber the hours spent writing the script.
* The number of Fantastic Fighting Styles just go on and on and would take way too long to list them all. Basically, anyone who doesn't have a
* The number of Harry Potter parodies that have pointed out how senseless this rule is are too numerous to list. ("This game is very complicated, but none of the rules actually matter, because once you catch this little golden thing
* The number of Itachi/Sasuke fans would surprise newbies, and the size of the fandom only seemed to
* The number of people killed in the Madrid train bombings is changed from 173 to the correct number, 191 (173 was a number reported early after the attacks).
* The number of people who have turned heel for no other reason than because they had the audacity to be angry after being attacked and/or bullied by
* The number of players who try in vain to shoot at the front of a T95 or T110E3 in
* The number of search results given will be appropriately changed when googling for "binary", "hexadecimal" or "octal".
* The number of television shows that offer "exclusive online content" on their

network's websites is truly staggering. Common offerings include behind-the-scenes blogs; extended interviews with the actors, writers, or competitors; games; photo galleries; and unaired footage.
* The Number of the Beast, as he pulled a lot of selective quotations out of materials that hadn't been translated into English as part of his "research").
* The Number of the Beast, a universe spanning device also allows you to visit universes which experience time on an axis 90 degrees to our own. This means you can spend any amount of time there and no time will pass in your own universe. Unusually for this trope, the main characters' first idea when this ability is discovered is that they could make a business off it. (Selling a week not in the calendar to students with a final exam coming up...)
* The Number of the Beast had someone mention that the future he was visiting had a device that made razors seem like stone age technology.
* The Number of the Beast is described early in the novel as performing advanced mathematical calculations in his head, but needing to grab a calculator to learn that 2+2=4.
* The Number of the Beast is specifically mentioned in the novel several times.
* The Number of the Beast, Lazarus Long's free-spirited ways inspire protagonists Deety and Jacob (her father) to do the deed.
* The Number of the Beast lounge, which was shaped like a Klein bottle... once you were inside.
* The Number of the Beast's other later works) involved the idea that any good enough piece of fiction caused a new universe to come into existence; its main characters visit Oz and other "fictional" worlds.
* The Number of the Beast. Steve Harris said it was just a joke given they were always asked if "Iron Maiden" was due to "Iron Lady", but their manager thought extra publicity helped by adding a black bar to Thatcher's face "as this would give the tabloids an angle and draw attention to the single."
* The Number of the Beast, they have, and the kids are indeed geniuses.
* The Number of the Beast they lost their innocence, it's standard practice to strip naked for Church services, symbolically reclaiming that innocent purity.
* The Number of the Beast, which describes a man recalling a Satanic Ritual he witnessed, only for him to be consumed by it at the end.
* The Number of the Beast, whose protagonists invent a dimension-hopping device that lets them travel to any time, place, or universe as easily as flipping a switch.
* The number of times people have managed to invade, hack, or subvert the
* The number of times Tuxedo Kamen holds Sailor Moon in this fashion (it happens more in the
* The number of ways the books can be arranged is 10^10^1,834,102, the largest number
* The number one cause of death in most developed countries is heart disease. Diabetes is also high on the list. Few people run screaming in terror from a
* The number pad on PCs has "123" on the bottom row. The one on ATMs has "123" on the top ones.
* The numbers 7 and 77 seem to be a recurring motif for the Djinn in
* the Numbers abduct her sister and she activates her Combat Cyborg nature in response.
* The Numbers all have phones that can call Juiz, who will grant any request within the realm of their 10 billion yen budget.
* The Numbers Man first appears as the guy who seems to manage every cape's money, but later we find out that he's actually Harbinger, a former member of the Slaughterhouse Nine.
* The Numbers Station, after finding out that the station's one-way operator has also been compromised, Emerson confirms it by phoning and getting the code-phrase slightly wrong on purpose.
* The Numbers Station, there is no romance between the male and female leads, who are a radio operator and a spook who have only recently met. The two operators on the other shift, however, are hugging and kissing at the very least, but this isn't

their story.
* The Numbers who serve under Kaido were the WG's attempt to produce artificial ancient giants like Oars. For some reason the WG deemed them failures. Despite this, the Numbers are indeed as big as Oars was, though they also display more animalistic traits than Oars.
* The number thirteen is all over the place in the national symbolism of the United States. The flag of the us has 13 stripes, the great seal of the United States has thirteen stars, a shield with thirteen stripes, thirteen arrows, a plant with thirteen leaves and thirteen berries, a motto with 13 letters ("e pluribus unum"), and a pyramid with thirteen layers. In addition numerous American states also incorporate the number thirteen into their official flags and seals. The number thirteen represents the number of states that the country had when it was originally founded.
* The Numenoreans built a similar "Seat of Seeing" on the hilltop of Amon Hen. Frodo was able to see all the way to Minas Tirith and into Mordor from the stone seat there.
* The numerical value NaN (Not a Number, which results from undefined operations such as subtracting infinity from infinity or multiplying infinity by 0) is displayed as "Mustard."
* the numerous cast changes managed to play this Trope straight for eighteen years:
* The numerous regimes modeled after Stalin's USSR or Hitler's Germany also conducted purges, though not quite to the scale of their "mentor" countries. After Stalin's death (1953) the purges in Eastern Europe became less common and far less brutal (people usually lost their jobs instead of their heads, or were put in prisons rather than labor camps).
* The numerous rumors that sprung up about acquiring the animals that hung around Forget-Me-Not Valley, which all wear neckerchiefs like the one that the player's dog wears. Carter's and Flora's Chihuahua are especially popular. Despite all rumors, the only pets you can own are the initial dog and a cat that Romana later gives you.
* The numerous times anteaters have evolved is an excellent example of how convergent evolution works: many unrelated mammals have independently evolved narrow snouts, powerful curved claws and long sticky tongues for feeding on ants and termites and breaking into their hives: these include the true anteaters of South America (distant relatives of sloths), the aardvarks of Africa (a distant relative of elephants and manatees), the pangolins of Asia (scaly mammals thought to be related to
* The Numskulls strip, Brainy accidentally switched Edd's truth control from 'true' to 'false'. When the other numskulls find out, he resets it to 'as truthful as can be.' Ed immediately insults an enormous violent thug.
* The Nun is set in 1952, the earliest time period of the series and predating all previous films released.
* The nuns from "Blood Sister: One Tough Nun", the fictional movie in the novel
* The Nun's Story. refuses to let her marry her longtime boyfriend, Jean, because he fears that insanity runs in Jean's family. It's one of the reasons, although not the only one, that she takes vows.
* The Nun's Story was dubbed in Japanese twice for airing. The first dub aired on NHK in 1969. The second dub aired on NET in 1974.
* The Nun? The ad was promptly removed—as it violated YouTube's policies—and was replaced with another jump scare-less ad.
* then upgrade itself with a Seeker missile, the same kind mentioned on the Skyrays, giving it the highest volume of missile fire outside of superheavy tanks.
* Then upon hearing about Thunderbolt still gaining fame while on a real heroic mission, Lil' Lightning then decides to join forces with him, along with the pup, obviously just to stop them from
* Then, upon watching the moose eat some walnuts, Dib becomes inexplicably horrified and determined to escape the wormhole at all costs.
* The Nuptialverse: According to DarthLink22, Applejack is gay, Rarity, Fluttershy and Cadence are bisexual, and Pinkie Pie is asexual.

* The Nuptialverse crude remarks regarding Applejack's behavior and occupation), Applejack bucks her out of the room and locks the door.
* The Nuptialverse duty is to record every detail of the lives of every living being, ever.
* The Nuptialverse it to state that shapeshifting one sapient being to another takes a load of magic, more than many can use, making it impractical for a pony to disguise herself as such.
* The Nuptialverse). Likewise, the other changelings were once flutterponies until Discord needed to give Chrysalis an army.
* The Nuptialverse. She's so old, she doesn't even remember her real name or where she came from.
* The Nuptialverse, who winces in sympathy. This was done for the sake of not forcing the story's rating up.
* The Nura clan's Kappa displays the power to create links between water bodies transporting between lakes.
* The nurse and doctor do this with the body of a patient they had recently killed (and buried, so they had to dig him up) in
* the nurse assigned to him was Asian, and he threatened to have his friends rape her. She was so afraid of him that she never took blood samples from him, which would have shown he was not a good match for that heart.
* The Nurse becomes this by the final scene. We see her ashen-faced and trying to comfort Benvolio as she accompanies the funeral procession inside.
* the nurse from the registry right when she's pointing a gun at Álex with the intent to kill him.
* The nurse in the sickbay Riker wakes up in will appear in the present, and come to be known as major recurring character Alyssa Ogawa.
* The nurse is also the only Sebacean for light-years, so Critchton plays the
* The Nursery Alice, apparently illustrated by a morbid Impressionist having a very bad acid trip. How it came to be in the children's section is beyond comprehension.
* The Nursery Alice most assuredly does. The text is the classic Carroll story, but the illustrations were apparently created by a morbid impressionist while on a bad acid trip.
* The nursery rhyme "Baa, Baa, Black Sheep" takes its tune from a 1761 French song titled "Ah! Vous dirai-je, Maman".
* The nursery rhyme takes on a different sort of irony than the classical version of this trope in
* The nursery rhyme "There Was a Crooked Man" has had multiple villainous adaptations. The nursery rhyme only has one stanza and doesn't feature any scares at all. In recent years however the nursery rhyme has the titular character become an embodiment of depression or the
* The nurse speaks about how she lost her daughter, who was Juliet's age (she nursed them both), and she treats Juliet as her daughter instead. (Besides that, her husband is also dead. This probably explains why she's still living with the Capulets after all these years—she lost her family, and she adopted a new one.)
* Then used as a call back at the end of the series where Coker says "time for plan B" to Adama. You get the impression it was going to be a common bit if the series ever got green-lit.
* Then used straight with the striking of the Doom Bell. It apparently induces
*), then uses an air pump in real life to clear out his computer mouse's sensor. Syndicate has this reaction:
* The Nut 1967: A Polish short about a walnut rolling around surviving numerous obstacles.
* The Nut 1967 has no dialogue, which is understandable since it is about a walnut rolling around avoiding all kinds of obstacles.
* 'The Nut 1967 is a Polish short about a walnut rolling around avoiding all kinds of obstacles, one of which is a hammer.
* The Nutcracker and other Christmas shows tend to go on sale by September, if not earlier. As well, the advertisements, such as e-mail reminders to regular patrons

of these events, begin during the summer. Auditions and rehearsals for Christmas-themed shows range from June to September.
* The Nutcracker and the Four Realms. Also, the toys were brought to life by a ray gun(?!) that Clara's mother invented, which technically makes this movie science fiction instead of fantasy.
* The Nutcracker and the Four Realms features an entire army of clockwork soldiers who obey the commands of anyone who possess the Key.
* The Nutcracker and the Four Realms, it received negative reviews from both critics and audiences.
* The Nutcracker And The Mouseking. As it gets crushed under a stone, later the King just uses Tall and Fat who stand under a piece of fabric and argue who's the tail and who's the head.
* The Nutcracker and the Mouse King. (As the original story is in the public domain, there are no legal issues.)
* The Nutcracker and the Mouse King they would let him have part of the Castle and a good portion of the Grove without a fight and in return, he would leave peacefully after he was done.
* The Nutcracker, and then have Clara mourn over his body for a moment before he not only revives, but turns into a prince.
* The Nutcracker ballet, Clara is given the nutcracker doll, which comes to life later on to help fight off the evil Mouse King.
* The Nutcracker crown is shattered, his soldiers also explode when they all inhale his vaporous remains and sneeze.
* The Nutcracker greatly simplifies its version of the Nutcracker's curse - kill the Mouse King.
* The Nutcracker has two of these and they're a great deal more complex than the very simple version in the ballet.
* The Nutcracker in 3D, being an invading force and wanting to exterminate toys.
* The Nutcracker in 3D between lightheartedness and grim drama was the main reason the movie was universally panned.
* The Nutcracker in 3D video, a self-imposed challenge partly inspired by how much his mother disliked swearing in his videos.
* The Nutcracker in some productions (other productions play it as straight fantasy with magical things orchestrated by the mysterious Drosselmeyer).
* The Nutcracker", Marie falls in love with the eponymous Nutcracker and declares to him that if he would have her, she would never reject him for how he looks. This is enough to break the curse and turn the Nutcracker back into a human man, as his curse could only be broken when someone loves him regardless of how he looks. Earlier, this trope is subverted when the Nutcracker (who is still human at the time) breaks the curse on a princess and is cursed in return, only for her to scorn him for being ugly.
* The Nutcracker Prince, most of the film is animated in a Disney-esque style but that sequence is animated in a bouncy more cartoony style.
* The Nutcracker Prince, the villainous Mouse King falls from a Christmas tree after losing a duel with the titular character, but survives (with a serious wound), only to tumble off a balcony and drown while attacking the heroine, Clara, later on. After a splash, his crown is seen floating before it sinks back into the waters.
* The Nutcracker spends much of the second act telling said backstory.
* The Nutcracker than the story itself. The music, plot, and characterization will usually come from the ballet, and the Mouse King and his story will follow the plot of the first act. Another good sign of this is the name of the protagonist; while she's named Marie in the story, most adaptations will call her Clara as the ballet does.
* The Nutcracker, the doll Clarette offers a ribbon to the Nutcracker as a favor before he goes into battle, but he shows her that Marie has already given him her ribbon.
* The Nutcracker, the nighttime battle that Marie witnesses involves her brother's toy soldiers joining the fray. Later, the nutcracker takes Marie to the doll

kingdom to be their queen, after she promises to love him no matter how he looks.
* The Nutcracker usually ends with the curtain closing on Clara awakening in her home with the eponymous Nutcracker in her arms, and realizing that all of her adventures were a dream. Some productions stick a little closer to the source material and subvert this trope instead when the Prince turns out to be Drosselmeyer's nephew, whose uncle had orchestrated the entire series of events in order to break the curse on him.
* The Nut Job 2: Nutty by Nature, a bunch of mice get inside a hazmat suit and walk around posing as a human.
* The Nut Job 2: Nutty by Nature (co-produced with South Korea and the United States)
* The Nut Job 2: Nutty by Nature". The Mayor decides to keep it that way to save electricity money.
* The Nut Job 2: Nutty by Nature was released in May 2017, the month it was supposed to premiere, instead of August 2017, its' final release date.
* The Nut Job, Buddy, Andie and a female mole do this to try to reach a latch that will open the trailer door to the truck they are trapped in.
* The Nut Job in the credits!) nearly two years after the song's heyday (the movie came out in January 2014).
* The Nut Job, Precious is a dog who is really eager to kiss Surly with a face lick. When they chase Mole into getting stuck through a fence, Precious decides to give Mole a celebratory 'face lick' from behind, which causes Mole to be quite surprised and Surly to point out that wasn't his face.
* The Nut Job responds with along the lines of "Hey, Raccoon's a bigger thief than me!"
* The Nutshack is Tito and Phil's landlord who desperately attempts to connect with his tenants, but is constantly humiliated by Tito and Phil, and none of the others seem to like him all that much.
* The Nutshack, proved to be their last as the show's failure with critics and audiences caused them to shift focus towards licensing anime titles for Myx TV. The same goes for the cast and crew, as none of them have done anything noteworthy following its cancellation, with the exception of co-creator Jesse Hernandez and theme composer NUMP. In fact, a few of them ended up quitting the TV industry to pursue other careers.
* The Nutshack save for three additional voice actors; one of whom was hired because she was willing to do it for free.
* The Nutshack takes this to its logical extreme and depicts every homosexual male character as a creepy rapist.
* The Nutters is unsure of what to wear. Jake tells him to "dress up nice", so he dons an Elvis Presley costume. After receiving "that's disgusting! get that off you now!" in response, he appears at the party dressed normally.
* The Nutters likewise has an equally remembered moment where Jake is video called while about to take a shower and is mistakenly thought to be fully naked.
* The Nutters: Luke is portrayed as a clueless ditz. His actor Liam Gaynor was noted to be one of the most intelligent and insightful members of the cast - even winning arts scholarships.
* The Nutters (mentioned above) was nominated for a Google Tech Festival award and the cast attended, Liam Gaynor was told that it was a formal event and arrived dressed in slacks, a shirt and nice shoes...only to find everyone else dressed casually.
* The Nutters, the whole cast were the same age as their characters (sixteen-seventeen).
* The Nutt House: A discussion about how nobody says 'no' to Big Jake.
* The Nutt House: A variant; while Norman is taking a shower, Ms. Frick takes the opportunity to throw all his clothes out the window. He steals a plastic-covered hanger from a laundry rack going past, which turns out to be a dress.
* The Nutt House Ddesn't actually cut away to them, but many of the jokes are random insertions that have nothing to do with anything else. Examples include:
* The Nutt House: Freddy the practically-blind elevator operator can't tell if

there's anyone in his elevator, or if he's stopped level with a floor, leading to a lot of cases of people scrambling up or down to get out of the elevator.
* The Nutt House has a scene where a woman has her dress unraveled in this manner.
* The Nutt House: Inverted. Reginald Thorndyke hates being called "Reggie", except by close friends, and he doesn't have any close friends.
* The Nutt House: Just after Reginald tells the immigration agent that the Nutt House only employs "red-blooded American workers", a Japanese painter comes in and talks to him in Japanese.
* The Nutt House: Norman happens to hear Sally and Charles talking about both the exact amount of money the hotel is in debt, and Charles's weakness for champagne.
* The Nutt House: Reginald is always seen wearing elegant grey gloves. (He has to take one off to snap his fingers.) Lampshaded: Big Jake's reaction on seeing him is to ask if he's a magician.
* The Nutt House: Reginald, realizing the twins who came in with Charles are Swedish, starts to speak loudly and slowly to them. Lampshaded: their response is "This guy thinks we're deaf."
* The Nutt House. The result was loud, jarring, clumsily dubbed-in laugh tracks that often drowned out the punchlines.
* The Nutt House walk past and assumes that the new glasses are giving him double vision, so he throws them away.
* The Nutt House was a failed attempt to recoup the construction costs.
* The Nutt House: When Norman calls Big Jake on the phone, two attractive young women at Big Jake's place are playing pool in miniskirts and low-cut tops. They have no lines, and appear to just be there for him to comment how he loves playing dirty pool.
* The Nutty Professor (1963) opens with Professor Kelp blowing up his classroom.
* The Nutty Professor (1963) The formerly nerdy, now-suave Professor Kelp wows a night club crowd by belting out an upbeat musical number. Put on the spot when asked his name, he picks "Buddy" after a patron interrupts to say "Hey, buddy, you really sang up a storm." Asked for a last name, he comes up with "Love" from the lyrics of a song playing in the background: goodbye Julius Kelp, hello "Buddy Love."
* The Nutty Professor (1996) coming onto the stage simply saying "Women be shoppin'!" and everyone laughs their heads off.
* The Nutty Professor (1996). Sherman exploits when he needs to reabsorb Buddy, by tempting him with a rubber ball laced with his serum, knowing Buddy would catch it in his mouth.
* The Nutty Professor and its sequel, Sherman Klump ends up getting fired around the start of the third act but gets his job back at the end.
* The Nutty Professor, Buddy does this to Carla when she's about to ditch him for showing up late to their date.
* The Nutty Professor. He's lost her again by the beginning of its sequel.
* The Nutty Professor in before kicking his ass and tossing him into a grand piano.
* The Nutty Professor, in which the obese Sherman Klump gets a lighter voice as his skinnier alter-ego Buddy Love.
* The Nutty Professor is between the title character, who is a college professor, and a graduate student.
* The Nutty Professor more than counts. Aside from being the one with the privilege of giving us our page quote there, he openly demonstrates his gasshole tendencies on both family dinner scenes in the first movie, resorting to deliberately breaking wind and utterly destroying any tracks of conversation that preceded it. Much to Ernie Junior's vast amusement.
* The Nutty Professor opens with the title character blowing up his classroom. As another teacher anxiously looks for him in the wreckage, she hears a knock on the unhinged door she's standing on — and finds him underneath.
* The Nutty Professor (played by Murphy) was so convincing, people were accusing him of "reverse blackface."
* The Nutty Professor: The Klumps when Sherman brings Carla over. They talk openly about sex, bodily functions, marriage, and other embarrassing topics, so much so

that Sherman tries to slit his wrists with a butter knife.
* The Nutty Professor took quite a bit of refuge in rather crude humor. One example was the constant use of the word "ass" throughout the move, most of it being used during the dinner with the Klumps, as well as Papa Klump loudly farting at the table in response to Mama Klump's suggestion of getting a colonic, and doing it up to six times (with Ernie Jr, their grandson, even managing to mimic his grandpa's farting once), with the sixth time having him leave the table apparently due to soiling his pants.
* The Nutty Professor. When Frink's father appeared in one Halloween episode, he was, of course, voiced by Jerry Lewis himself.
* The Nutty Professor: When Professor Sherman Klump watches TV, he sees ad after ad for weight-loss products. Amusingly, his father Cletus actually discussed this during a Klump family dinner, saying "Every time you turn it on, somebody talkin' about 'lose weight, get healthy.".
* The Nutty Professor), wherein another character refers to the titular character as "buddy" while he is under the influence of his transformation drug, prompting him to adopt "Buddy Love" as the name of his alternate personality.
* The Nutty Squirrels, had a hit in 1959 with "Uh Oh", a scat jazz song.
* The Nürburgring Südschleife and Start und Ziel Schleife were abandoned in 1975 and mostly demolished to make way for the Grand Prix circuit shortly after, although parts of the Südschleife still exist as public roads.
* The Nuva Cube functioned as the lock on the Bahrag's prison. By placing the Toa Nuva's six unique Nuva Symbols into the Cube, the cage would be opened. It is also, in some way, connected to the Toa Nuva's elemental powers, as they
* The Nuwisha alienated many Garou with their trickster ways. When the Wyrm targeted the Nuwisha for genocide, their reputation created difficulties for them when they sought refuge among the Garou.
* the Nuzlocke since the rest of Barb's collection appears to be just paper trash, like receipts and old greeting cards.
* The NWA and Ring Warriors retconned Kacee Carlisle's forced defense of the NWA women's championship belt into a her getting an inexplicable shot at
* Then we find out that in the distant past, "grand warfare" consisted of "throwing big stars at little stars." And they had foundries that ate planets to build fleets. Petey has begun mimicking some of this in his war in Andromeda against a species of
* Then we find out their parents made up the whole "Naming Gazebo" thing because he once tried to change his name.
* Then we found out ''those'' particles were made out of even smaller particles. If the trend continues we will eventually find out that those are made out of smaller still particles.
* Then we get to the Ringed City DLC, which really shows just how pointless this whole mess with the Fire and the Dark really was:
* Then we got legendary ghosts as the Red Lady, or Ghost Pirates as Vandala
* Then we have Al Thamen, that is an actual world (read universe) scale terrorist organization. Their goal is pure freedom since they want to overthrow destiny itself. The problem is that the very way to do so involves creating wars and causing the deaths of billions...
* Then we have "Bronze" Yohn Royce, noted for wearing an ancient suit of bronze armor. This normally wouldn't stand up to the steel armor and weapons used by those he face in battle, except it's apparently inscribed with magical runes that wards the wearer from harm, making it not only more fancy but also practical. His sons Andar and Robar in contrast wear silver-colored armor with bronze runes.
* Then we have Floyd Feylinn Ferell, who did not like to eat junkies because "they tasted funny".
* Then we have Hasshoken, exclusive to the Chinjao Family/Happo Navy. This martial arts allows the user to generate and manipulate vibrations to generate shockwaves for greater damage. Though they're concentric waves unlike the seismic force of the vibrations of the Gura Gura no Mi.
* Then we have its upgraded version, the Sky Sweeper, which gives the rifle the

ability to serve as a man-portable air defense system and adds 15kg to the base rifle. It uses a smart surface-to-air grenade round with megaton+ explosive yields with a 400,000 km range — enough to hit Earth while standing on the moon.
* Then we have Kyuma Inuzuka, who had a crush on Aina and wanted to prove his curse is also a blessing by protecting the people who five minutes ago wanted him dead for that curse.
* Then we have Lieselotte, a member of an alien-like clan who wanted her people to coexist with humans. She dies sacrificing her life to protect a person who she once saved as a child.
* Then we have Lord Recluse clearly a Doctor Doom pastiche combined with Darkseid, Formerly friend of hero, hates him for petty reasons (as in both the hero is petty and his beef with him is petty), super genius, rules his own nation - a hell-on-Earth but one who’s evil residents love him for; The thing is, well, that
* Then we have Ninjette, who, while a ninja herself, is on a whole different level, as she once consummated a marriage
* Then we have Rod and Todd. Both were around when Lisa was born, making them no younger than eight, and Rod looks a bit older (and in Lisa's story where she bases two alien brothers off the Flanders brothers, she says that one is two "space years" older than the other). This probably makes them either eight and ten, nine and eleven, or ten and twelve (Rod's voice hasn't changed, so he's probably not a teenager).
* Then we have the Season 9 opener. Woo boy, the season 9 opener... For starters, the Crystal Empire gets conquered at the very beginning of the two-parter. Then, after King Sombra is defeated, he
* Then-well-known stage actors James Daly and Louise Sorel, who guest-starred together in the
* "Then we must endeavour to find some common ground. For instance, I posit that ladies' bosoms are rad. Do you agree?"
* Then we see the example invoked with Jesse St. James. Jesse was a mole for Shelby Corcoran, who wanted Jesse to reveal indirectly that Shelby is Rachel's biological mother. After he transferred to New Directions, he briefly dated Rachel, only to go back to Vocal Adrenaline the minute she learned the VA coach was her mother, and lured her for the VA team to egg her. While it's implied his teammates forced him to hurt Rachel, it does not excuse
* Then when Charlotte reveals to Wilbur that she drinks flies' blood, Ike faints to the ground with a loud THUD. Then as Charlotte climbs down next to the fallen horse.
* Then, when he finally finds some success with winning the Money in the Bank contract, he challenges CM Punk
* Then, when he finally proposes for real, someone steals the ring as Juliet is accepting!
* Then when he shows up on screen, he's played by Mort (the only Jewish character) with his skin tone altered,
* Then, when he yells at them for saving him... Dave tries to stuff him back into the car.
* "Then, when I was slightly older, I had a bear. And I hung out on swing sets. Cause that's apparently what you do when you're a depressed child in Naruto, you hang out on swing sets."
* Then, when Kitty (whose going through menopause) and Red chaperone the guys when they visit the University of Wisconsin.
* Then, when Kronk takes over for the cook, she gives him a rapid-fire list of normal orders, and he pauses for a beat before
* Then when Meleager "accidentally" kills two of his brothers, his mom goes insane and burns the stick, which results in him horribly melting in the arms of his wife-to-be Atalanta.
* Then when one of Sweet's minions is captured by Spike and ordered to "sing", the music obligingly starts up...only to stop as the minion just speaks normally.
* Then, when Sean lectures him on how Eduardo pretends he runs the company while wearing "his ridiculous suits":

* Then, when Sisko hands him the bill for the damages his scheme caused, he invokes the trope again obliquely by asking if Sisko would take it in installments (indicating he's actually willing to pay rather than try to weasel out of it).
* Then, when the Doctor goes to remedy his no-clothing situation, he finds a
* Then, when they find out many of their fans are Bronies, they decide to do some research into the show to see what makes it popular. When Kathleen joins, she is not initially impressed, and comes up with "My Little Bear: Mauling is Magic".
* then", which aired within a week of each other in 2006, and had almost the exact same plot to the letter — school assembly convinces Bart/Chris to join the Army, Homer/Brian goes down to the recruiter's office to try to get the contract torn up, and ends up enlisting themselves, and immediately being deployed into a combat theater.
* then whose only purpose is to enter the access code that opens the pod and releases her.
* then) will cause accusations of this from faster loading players against the slowest. "Are you loading the game on a typewriter?" is a typical comment.
* The nWoD has the Men in Black, mysterious entities from beyond who show up in pristine suits, don't quite act human, go by names like "Mr. Door" and "Agent Clock" and act to "neutralize" any individual who's had an encounter with the supernatural. And if you admit that you
* The nWo Hollywood vs. nWo Wolfpac feud in 1998 was originally supposed to be this, but the Wolfpac became immensely popular with the WCW fans and their face status was cemented when
* The NWU also presented a much more practical, serious case of this trope, as the nylon cotton blend used for the Type I (Blue) uniforms was significantly more flammable than other modern military uniforms, a serious problem in the case of any shipboard fires or explosions.
* The NXT rookies from season 1 could count given that when the season was over, they rampaged WWE and formed
* The NXT women's division as a whole pulled this on the main roster women from the 2014-2015 period. NXT started giving the women time to wrestle, feuds that had meaning, fans were into them and the matches were usually hits. The match that really put NXT's women on the map -
* The NXT Women's division has really broken out of it. Taking cues from the ultra-popularity of
* The Nyakuza from the Nyakuza Metro DLC. Their leader, the Empress, is definitely
* The Nybor's line of spells (going from "Gentle Reminder" to "Wrathful Castigation") being particular favorites. 3.x also has an
* The Nydus Network can be used by Zerg to create a fast transportation tunnel between different locations on the map, but a Nydus Worm can only pop out in a location the Zerg player has vision of, requiring that a scout (usually an Overlord or Overseer) be sent to gain vision of that location. A Nydus can be used to tunnel right into the opponent's base, but this requires sneaking in a scout for vision.
* The nymph called the Guardian of the Bloom also is always described as incredibly attractive. You, the player, may feel
* The Nymphos of Rocky Flats. He subsequently finds himself stuck between vampire hunters and the Roswell aliens. Turns out that both the vampires and the aliens thought the other to be a myth. The alien ends up actually being friendly and only there to monitor human military progress and keep them from accidentally discovering that aliens are real.
* Then you find out that the reason she'll be flying instead of walking is because she's a ghost. Her husband shoots her in the last verse.
* Then you get to the Pereh, an ATGM-launching tank destroyer disguised as a Magach, or an American M48 Patton. It was used to great effect in all Israeli conflicts since the 80s thanks to it looking like a regular tank, which lead the attackers to believe that they were safely out of range, and then they'd get blown up by missiles at twenty times the expected range for the tanks that the Perehs look like.
* Then you got "Bag O' Glass", along with its spin-offs Bag O' Nails, Bag O' Bugs,

Bag O' Vipers, and last but not least, Bag O' Sulfuric Acid.
* Then you have Bird's interrogation, which starts with Kima trying to get him to make a deal while Bird
* Then you have Chameleon, the only RainWing who can't change the color of his scales.
* Then you have Mukuro in Chapter 17 when Harry is replaced by her future self who
* Then you have Pinkie Pie, who eats hot-sauce–covered cupcakes ("Friendship is Magic- Part 1"), burnt-to-a-crisp cupcakes ("Call of the Cutie") with nary a care.
* Then you have the Black Tiger. Apparently giant huntsmans were not scary enough so Capcom had to come up with a freaky redesign based on Australian funnelwebs to make your S.T.A.R.S commando shit their pants. Seriously, the games peaked the fright factor here.
* Then you have the Royal Military College, RMC Duntroon, which is the officer academy for the Australian Army
* Then you have the various takes on the hybrids. The movies show two different hybrids (Marcus and Michael) and mention a third (Lucian and Sonya's unborn child). The first two involve a member of one species getting exposed to the blood (and virus) of the other. While the viruses normally annihilate each other, the presence of the "Corvinus strain" in both allowed the viruses to merge into something new. In Michael's case, his original Lycan strain retained dominance, making him appear vastly more human than an average Lycan. Marcus, who started as a vampire, attained more bat-like characteristics, although he did gain several Lycan ones as well. It is unknown what Lucian and Sonya's child would look like, given that it was equal parts Lycan and vampire, or if it would survive at all, given the mutually-destructive "relationship" the two virus strains have.
* Then you have virches, which from the perspective of ril become more alien than the actual xenosophonts. While plenty of virches are accessible and understandable, there are many more hidden virches, or virches with wildly different physics. The interconnectness of these virches and the a-lifes that live on the Known Net make parts of it like this.
* The NYPD seriously considered cancelling trick or treating in 2001 due to the instances of people receiving anthrax in the mail. One spokesman said that they didn't have time to examine all the Pixie sticks given out that night.
* The NYPD turns up a lot in fiction set in New York City, to the point that there is a dedicated NYPD Movie and Television Unit that exists just to assist in live-action works. The NYPD has regulations in place that are designed to avoid confusing real police cars and police officers with actors or movie cars. Namely, movie patrol cars are required to be assigned fictitious precinct numbers. The list of actual NYPD precincts goes from 1-123, but skips some numbers, due to various precincts changing their boundaries, closing, or consolidating with others. The skipped numbers are used for fictional precincts. Common fictional precincts include the 12th precinct (
* The NYPD uniforms have a party salad of decorations on a plate that also includes their badge, and the most prominent decoration is the one awarded to 9/11 first responders, a simple black bar with the letters "WTC".
* The Nyx language is even worse. It appears to use future tenses that incorporate quantum uncertainty, meaning that normally binary states like on/off and alive/dead are understood as existing on gradients of possibility. Further, the exact meaning of a statement can change seemingly arbitrarily between sentences or even as it is being spoken. Finally, though their language is constantly changing, the Nyx understand everything they say as being the only thing that could possibly have been true at that moment — and if you ask the same question a moment later, they’ll give a completely different answer that they’ll see as self-evidently the only thing that could have been spoken in
* The OA: BBA makes a call, but the conversation turns awkward, so she hastily cuts it short by saying that she can't talk right now because she's busy eating a sandwich.
* The Oafa from the "Broken Wind" arc have their own dialect, although Tagon

refers to it as a form of Peroxide accent early on. It features a number of odd terms that appear to derive from common English idioms translated via
* The OA features many cryptic messages in Braille written in assorted locations throughout the show, including on Khatun's face.
* The OA: French is a star lacrosse player and has excellent grades. He's being courted for a full athletic scholarship. As the breadwinner of the family due to his mother's alcoholism, he doesn't have a choice but to succeed.
* The Oaken Throne trilogy, the squirrel princess Ysabelle is the apple of her father's eye.
* The Oaken Throne trilogy, Ysabelle dons the costume (made of red silk and sewn as a ghastly representation of a flayed corpse) worn by the high priest of Hobb to direct his minions to leave and so not pursue her and her friends.
* The Oakland Raiders were on the receiving end of two of the most controversial plays in NFL history: The Immaculate Reception (vs. the Steelers in the 1972 AFC Divisional) and The Tuck Rule Game (vs. the Patriots in the 2001 AFC Divisional).
* The Oak Ridge Boys, "Don't Break the Code." A man finds his wife in bed with another man and kills them both.
* The Oak Ridge Boys' "Elvira" was first recorded by its writer, Dallas Frazier, back in 1966, covered by Kenny Rogers and The First Edition a few years later, and was a minor single for Rodney Crowell before the Oaks' version became a big country crossover hit in the early 1980s.
* The Oak Ridge Boy's "I'll Be True to You" plays with this. The singer's girl promises him she'll be faithful, but he doesn't and after meeting her again with him only saying goodbye, where she starts
* The Oak Ridge Boys, tenor Joe Bonsall sang lead on their most famous song, "Elvira".
* The Oak Ridge Boys. (To be fair, the "baby" line is the only part of the song that anchors it to husband-wife love; the rest is rather open-ended. One wonders why they didn't just take that word out.)
* Theo also often uses a dollhouse to help her child patients express their pain, which often turns them into this.
* The Oan Servant of Darkness has the same vulnerability to yellow as the rest of his race has (sometimes), and as such Sun boy is able to stymie him with yellow sun bursts.
* The Oasis actually keeps the elemental weapons in mind, with fire weapons fizzling out and lightning weapons hurting everything on screen — including you.
* The Oathbreaker: Breaking an oath is one of the most basic forms of betrayal.
* The Oathbreaker of his marital vows abusing his power on his spouse who can’t fight back. The noble Liu Qingge thought it was strange that Yue Qingyuan would only have one spouse like a commoner instead of strengthening his household with the support of multiple spouses and concubines. Even when Liu Qingge loses faith in Yue Qingyuan, he doesn’t question the system and still believes polygamy as a given for high society.
* The OA: The main character goes by Nina, Prairie and "the OA" at various points in her life.
* The OA The OA's adopted mother Nancy gradually turns out to be one of these, ultimately admitting she adopted a blind child solely because she wanted a child that would always need her.
* The OA: The show's antagonist threatens this multiple times. Since only he has the code to unlock his captive's cell doors, even if one were to escape and kill him somehow, the rest would all just starve to death locked in their cells.
* The Oath of Office taken by all state and local officials in Kentucky requires them to swear that that have never participated in a duel, and goes into great detail as to what exactly "participating" means, taking up half the oath by itself. Many officials have been seen trying, sometimes unsuccessfully, to stifle laughter when getting to this part of what is supposed to be a solemn ceremony.
* The Oathsworn series fight with bearded axes, great axes, throwing axes, and when nothing more is available, blunt wood axes.

* The Oatmeal rant towards his clientele when he worked as a web designer for 14 years.
* The Oats Series are never named despite being the main characters. They simply refer to each other as "brother" although they can be identified by their American (Older Pig) and British (Younger Pig) accents.
* The Oats Series of Multidimensional System 3 in Oats Movie 2, but he only has one scene towards the end where he doesn't even have any lines and is immediately killed alongside Lazy Pete at the end of it.
* The Obcene Publications Act of 1959, intended to stop the publishing of obscene material. Penguin Books was taken to court in 1960, in order to prove that
* The Ob'enn race, who prove that even being a small and fuzzy koala-like bear doesn't get in the way of being a menace. Being sociopathic xenophobes with huge battleships goes a long way towards the goal.
* The Obernewtyn Chronicles and other Empaths are able to bathe people in feelings of calm, love, comfort etc. This just as well for the emotionally repressed protagonist.
* The Obernewtyn Chronicles, the antagonists and the protagonists both at some point seek out children with special powers, referred to as Misfits, to attend the titular Obernewtyn.
* The obituary fan: "He respectfully requests six Cleveland Browns pallbearers so the Browns can let him down one last time."
* The Obi-Wan. The hero may have to fight the donor. But on the bright side, the donor may have a magical object to help them on their quest.
* The Object of My Affection is all about this trope; a woman falls for the gay man who becomes her roommate after her husband leaves her.
* The Object of My Affection: Nina and George essentially become this, as he's her chosen partner in raising her baby. She'd like it if the relationship was sexual, but George is gay so she's happy with at least this.
* The objects you find prevent Archduke Ferdinand from being assassinated, results in the names of Russian Revolutionists being handed to the Czar, and make Adolf Hitler finally achieve success
* The Obliterator virus. Exacctly how it works is anyone's guess (the Warp is involved), but the infectee ends up bonded to his weapon, and ends up able to produce the ammo for it.
* The Oblivion Gates themselves can be diversion for those who are Sigil Stone-hunting, gathering Daedric alchemical ingredients which only grow within, and/or going for
* the Oblivion War, a war so secret just knowing about it will leave a mystical mark on the mortal which other participants of the war can spot. The War is about a group of people trying to erase all mortal knowledge of the Old Ones, ancient evil demon-gods, so the more people who know the harder it is to do their job. They fight various cults of the Old Ones who want to bring them back. If a mortal finds out and won't join the defenders of reality, the defenders cannot hesitate to leave the person be.
* The Oblongs. All that drinking and smoking (and living in a polluted town) should have killed her years ago. The second episode where Milo gets a pet dog had her accidentally drink gopher poison with no adverse effects (she was supposed to bury the gopher poison).
* The Oblongs amount of empty beer cans poor out which Pickles rides like a wave, and all the children leap out and start desperately kissing solid ground.
* The Oblongs. At a parent-teacher conference, his mother gets stuck in a desk and his father plays the piano... despite having no arms or legs.
* The Oblongs Bob wonders fitfully about his children being sold drugs.
* The Oblongs") competition. The lyrics contain advice for upper-class debutantes.
* The Oblongs do this to Granny. Sort of. Their son isn't even aware Granny is still alive.
* The Oblongs episode "Flush, Flush, Sweet Helga" ends with Helga finally getting out of the sewers after Pickles inadvertently sets the sewage on fire with a discarded cigarette and ending up knocking Debbie's locket into the sewer again,

making Helga retrieve it.
* The Oblongs for Student President, realizing that they have to appeal to the non-popular kids.
* The Oblongs from the local hospital for their containers; the remnants of the morphine is what the people really wanted.
* The Oblongs had a hygiene badge (which Helga could not, in good conscience, accept).
* The Oblongs, Hilda had herself intentionally subjected to this, as her sand body was far more appealing than her regular self. She then asks for seaweed to simulate going through puberty.
* The Oblongs is disfigured in an accident and tries jumping off a bridge in The Valley. Milo tells her she can't do it, and she does - sinking into the mud. Milo clarifies to her that everyone in The Valley has tried before.
* The Oblongs, Milo tells his friends how he's been running internet searches trying to find Helga's parents, but keeps getting sidetracked by porn.
* The Oblongs, Peggy is explaining to Milo the social hierarchy at school and notes that not only are they behind the dorks, geeks, and dweebs, but the wild dogs on the soccer field and the boy who lactates as well.
* The Oblongs Pickles quits smoking and become an adrenaline junkie. She tries boxing but is so vicious and dangerous she keeps moving to deeper and deeper sub-basements pummeling more and more people - including (by mistake) the "simple kid who fills the soda machines".
* The Oblongs, plumbing issues leave the entire city save the Oblongs' house without water. In order to cut down on bathroom lines, a hundred-dollar cash slot is installed on the door. When Bob's boss tries to use it and his bill is rejected, another character quips "the great equalizer".
* The Oblongs. The air is toxic, the land befouled, there's garbage everywhere, and birth defects plague the residents.
* The Oblongs, the local TV news show is completely biased in favor of the mayor, who in turn is completely biased in favor of the town rich.
* The Oblongs, the sex life between the father and the mother is so good that every night she's saying "Oh God" repetitively. The younger son, having lived his entire life listening to them, finds himself incapable of having a good night's sleep without it, and gets insomnia when their relationship becomes rocky.
* The Oblongs the teens are driven off the road by the two nasty Hill kids. It teeters on edge but, with a sigh of relief, it rights itself. Then the nasty kids drive up and kick their car off the cliff.
* The Oblongs: the Valley kids sneak into a Hill's birthday party and are discovered. Milo jumps on a tiny pony that, despite its incredibly rapid legs movements, goes nowhere fast. Two bullies jump on similar ponies but discover they are not catching up to Milo. They jump off their horses and, in two steps, capture him.
* The Oblongs. They're dumb bullies who will often pause their bullying for a moment to talk about their philosophy of life or their therapists.
* The Oblongs, when it is suggested offhandedly that Bob consider filing a lawsuit after being injured by a Globocide park ride, Globocide's lawyers immediately offer him a "really big check." It is in fact a novelty check worth only $20, which Pickles points out. They simply say, "But look how big it is!"
* The Oblongs, when Milo and Helga Phugley are living together (sorta) Helga says that she'll make a delicious dinner for two, and if Milo's good, she'll cook something for him as well. She laughs it off as a joke, though considering her weight, Milo didn't figure it out.
* The Oblongs where a crowd of people continually gasp until it's revealed it was just Mikey's (the ass kid) asthma.
* The Oblongs with the first two having headlines about a "local hero woman" and the third one with a headline about the "unexplained newspaper spinning continuing."
* The Oboro Muramasa, which can only be acquired after forging and finding all of the 107 other swords, is so sharp that it

* The obscure '90s song "I Like To Move It, Move It" was originally used as background music in the lemur party scene. Baron Cohen heard the song and asked if he could record a cover in-character as Julien. The song is now the franchise's theme song and is certainly no longer obscure if inextricably connected to the films.
* The obscure (at the time) Russian scientist Konstantin Tsiolkovsky developed a design back in
* The obscure German band Warning is another possible example, as their first album came out in 1982.
* The Observants see time linearly, which is why they demanded Clockwork kill Danny to prevent Future Danny's existence. Subverted with Clockwork himself, who has the ability to see
* The observatory towers in New York's Flushing Meadow Park are really moored flying saucers.
* The Observer. On first seeing him, this trope leads the viewer to believe that he's got something devious going on, but he turns out to be more ambiguous than that.
* The Observers and Trackers, although given the story, there are probably more of them.
* The Observers don't look cybernetic, but some of their physical and mental abilities are granted or enhanced by an implant in their brain. Over time, it takes over the areas of the brain that govern emotion. Though interacting with people who do have emotion can still create it in them, it seems to be a slow and limited process, and they don't like to admit it.
* The Observer, some random guy between two football club coaches who got in a fight, became famous overnight, for some reason. A common meme is photoshopped photos of historical moments with him standing in the background.
* The Obsidian Greatsword is obtained by cutting off the tail of Black Dragon Kalameet, the
* the Obsidian Lord, possessed by the Usurper, kills off the entire First District and destroys Miyu, the latter action sealing off the possibility of pushing the Reset Button.
* The Obsidian Order (Cardassian), the only organisation with a better reputation for efficiency and success than the Tal Shiar. Like the Tal Shiar, the Dominion views it as such a big threat that it wipes out the Order as a prelude to invading the Alpha Quadrant. The Obsidian Order is eventually replaced by the Cardassian Bureau of Intelligence which also very quickly gains a reputation for skill and efficiency at what it does.
* The Obsidian Trilogy and chastity for a year and a day on pain of castration, which becomes a problem when Kellen falls in love with Vestakia and has to sit on it until the end of the trilogy.
* The Obsidian Trilogy (and for some reason had made no attempt to correct the histories).
* The Obsidian Trilogy are this. They do not age or get ill, but they can be injured and killed. If they chose to bond with a human or elven mage, they will also die when their bondmate does.
* The Obsidian Trilogy: Armethalieh has nobles, merchants, and commoners, but unless you are a Mage, you're pretty much nothing. The Mages hold all of the high governmental positions, and most of the low ones, too.
* The Obsidian Trilogy: Dragons were once powerful forces of good in the ancient wars against demons, but bonding with a human or elf to grant magical power costs a dragon its immortality, so there are few left. The dragon Ancaladar bonds with the elf Jermayan and becomes a major character in the second book.
* The Obsidian Trilogy has a wizard perform a magically-generated version of lobotomy on a young girl, because it's against the law for a woman to use magic.
* The Obsidian Trilogy High Magic, the newer and more formalised magic, is often shortened to magick, while Wild Magic tends to get shortened to simply magic.
* The Obsidian Trilogy: Partially reversed in Mercedes Lackey and James Mallory's series. The magic hasn't completely gone away, but some of it has, and it's implied

it will be coming back.
* The Obsidian Trilogy takes place almost entirely in the winter, with the instigating incident happening during the first snowfall and the deciding battle months later as snow finally begins to melt. The Endarkened forces thrive on dark and cold, but how their opponents have to struggle with every aspect of war during a hard winter occupies a lot of pages.
* The Obsidian Trilogy, they're the figureheads of the setting's main religion.
* The Obsidian Trilogy: Vestakia's mother was a Wildmage human, and her father a Demon prince in disguise. When her mother found out the truth, she cast a spell to ensure that Vestakia has a human mind and morals, at the cost of Demonic physical features. Vestakia thus has a difficult childhood until she meets the heroes.
* The Obsidian Trilogy where Kellen's fighting prowess earns him the respect of his commanders, but he is unable to get his greater strategic goals taken seriously until he is able to succeed in the command of a small squad.
* The Obsidian Trilogy: While the entire city of Armethalieh might as well have its name changed to Misogynyville, Lycaelon Tavadon is a particularly extreme example even for them, especially in the first book.
* The Obsolete Man but they did not go far enough in eliminating the undesirables such as the elderly, the sick, the maimed and the deformed.
* The Obsolete Man. The Chancellor also mentions that the executions of 1,300 people in six hours were shown on television the previous year.
* The Obsolete Man". When the Chancellor asks Mr. Wordsworth when he wants to be executed, Wordsworth picks the traditional time: midnight.
* the obstruction was a pair of fingers. A burglar is in the house; the dog bit off his fingers and sent the man hiding somewhere, probably hiding in a closet at that moment.
* The Obstructive Love Interest: A love interest who constantly misunderstands her lover's behavior and treats him terribly until the ending.
* The Obstructive Love Interest who constantly rejects someone crushing on them due to misinterpreting their behavior.
* The Obulette is also another frequently picked level because there's a ton of vertical space and it's the only map to contain the
* The obvious actor/role substitutions: Jeffrey Sinclair/John Sheridan; Carolyn Sykes/Catherine Sakai/Anna Sheridan; Laurel Takashima/Ivanova/Lockley. Minor aversion with Ivanova, as she wasn't a straight substitution.
* The obvious example is "Louie Louie", performed by the Kingsmen in 1963. The song was a radio hit with a totally indecipherable slur of syllables, and some of the song's popularity came from public discussion of what the song was about. As rumors flew wildly, the song even caught the attention of the FBI, which investigated the song, believing that a song slurred so seriously must contain obscenity or pro-drug propaganda. The FBI agents were never able to decipher the song's mushy audio, and charges were dropped. The singer admitted he was so drunk that he couldn't remember exactly what he did sing at the time. (Other sources say that he had vocal strain that day, and was a little far from the mic due to its being so high.)
* the obvious means (where they have a subpage to themselves), but they're also known to dispatch villains in non-gravity-related yet still excessively vicious manners, and still manage to obscure it in a way that makes it perfectly G/PG-13 as far as the censor is concerned but even worse for the impressionable kiddies who now get to imagine in as much detail as they like what just happened.
* The obvious moral of the series is Love is more powerful than Evil. There are probably many possible alternative morals, but one easy one is: If you're putting all your security eggs in one basket (or six horcruxes),
* The obvious origin of the trope is guard dogs being used by humans to alert them of the presence of predators and enemies, due to their senses of hearing and smell being much more developed than ours.
* the obvious solution appeared to be breaking into the hospital and stealing it back. But what sort of attire would be appropriate for this hair-raising heist? Apparently Rainbow Dash thought a full-body stealth suit, complete with hood, was

the best option.
* The Ocampa relied on the Caretaker and his relay to power their underground society, as well as keep them safe from the Kazon. The Caretaker himself set this up after accidental destroying the surface of their planet and shattering their culture.
* The O.C., and after a series of bad things inevitably happen, he declares that "if there's cops and crying, well then it must be Christmas!"
* The O.C., a poor kid from the wrong side of the tracks is taken in by a rich family and introduced to the wealth-obsessed lifestyle of Newport Beach.
* The O.C. cannot tie his borrowed tie on his borrowed suit. He attempts to hide this by claiming he prefers the untied look and Sandy calls him on it, then helps him. A few seasons later this replays with Ryan's brother, Trey.
* The occasionally mentioned "Springfield Mystery Spot". It's unclear if Ozzy Smith was ever seen again.
* The occasional Sunday strips featuring puns so awful that the final panel then shows Rat threatening the strip's creator Stephan Pastis with death.
* The Occupation of Bajor drew most of its cues from the Nazi occupation of Europe in
* The occupation of the Aleutians was done to divert attention from the Imperial Navy's real objective, the US Naval base at Midway (it failed in this because the US's intelligence corps had cracked the Imperial Navy's radio codes/cyphers and knew exactly what was going to happen). It was also an example of
* The occurrence of Harmonic Convergence at the end of Season 2 releases a mass of spiritual energy that gives airbending to a lot of random people, including
* The O.C. deals with the first 'I love you' between Marissa and Ryan. It is played for laughs and drama at first, but works out eventually.
* The O.C. dirty, but the other characters certainly commented on the smell. Also, she stopped shaving her legs, but, slightly conveniently, we didn't see the results.
* The Ocean at the End of the Lane The thing that calls itself Ursula Monkton... at least until it abandons its disguise. Also, perhaps all of the Hempstocks, although they are a benevolent version of the trope.
* The Ocean came out with Heliocentric and Anthropocentric, a two-part scathing critique of religion. The former is focused on history and the treatment of heretics by the church. The latter is focused on apologetics more.
* The Ocean dub has a huge number of fans, despite being considered a
* The Ocean Group. In addition, several of the Vancouver actors they use began their careers in the company's dubs.
* The Ocean Hunter is full of these. A Megalodon even appears as the second boss.
* The Oceanic Six: A Conspiracy of Lies that the official story is a lie...but its explanation is hilariously wrong (one word: cannibalism).
* The Oceanic Six escape the island, but flash-forwards show them driven to return. Sawyer stays on the island so that his friends can escape. Desmond reunites with Penny. The man in the coffin turns out to be Locke. Ben moves the island far away at the cost of not being able to return. Locke becomes the leader of the Others. The freighter explodes with Michael and presumably Jin on it.
* The oceanic world of Taben is split between the natives of the dwarf continent of Beleri, who tend to light skin, yellow eyes, thinness and large noses and have a long tradition of exploration and marine raiding, and those of the Amenal archipelago, who have darker skin and developed an advanced, sophisticated culture early in the planet's history. It does not have a global government like the other Loroi worlds, being split between the Belerid nation and a federation of independent island-states in Amenal.
* The Ocean Palace is a monstrosity of a building that reaches from the ocean's surface all the way down to the planet's core. Once Queen Zeal is beaten the first time, it takes to the skies as the Black Omen, a huge flying fortress that...
* The Ocean people working on their projects. So many people have worked that the website even admits to giving up listing everyone who has been involved.
* The Ocean qualifies to whatever degree "Everywhere but the scattered islands

sticking out of it" counts as Loci.
* The Ocean's Heliocentric album. "Ptolemy was Wrong" is even about Galileo's heresy in discovering that the Earth revolves around the sun.
* The oceans of lava theorized to exist in planets that orbit very close to their stars such as
* The ocean sunfish, or mola mola, loses its true tail early in development, and grows a unique pseudo-tail - the clavus - from its dorsal and anal fins for an alternate rudder.
* The "Oceans Unmoving" arc attracted a lot of this sentiment, largely because it focused around a brand new cast, with most of the main characters stuck off-screen for months at a time.
* The Ocean Waif: Millie jumps under the covers of a bed in terror after seeing mice leaving a mouse hole in the mansion.
* The ocelot, a species of South American wild cat, looks exactly like a scaled-up housecat with a leopard fur.
* The O.C. fans use. Suitable too given how self-referential and somewhat self-derisive the show could be.
* The O.C. had this in the form of Ryan (poor) vs Luke (rich) competing for Marissa's love.
* The O.C. has Ryan and Marissa, and Seth and Summer. Fans have fondly nicknamed them the "fab four", or "core four," with Ryan and Marissa being the angsty ship, and Seth and Summer being the sweet one. Bonus points that Ryan and Marissa started out as the cute ship, and Seth and Summer as the one that would never work.
* The O.C. included an episode in which Sandy Cohen, played by Broadway veteran Peter Gallagher, sang to his wife.
* The O.C. In Season Two, The less crazy Zach Stephens mentioned a girlfriend he met in Italy named "Francesca".
* The O.C.. In the fourth and final season, both Seth/Summer and Ryan/Taylor are given about equal weight.
* The O.C. is a poor kid who is taken in by the very wealthy Cohen family. Sandy Cohen has this as his back story, as he was poor before he married Kirsten.
* The O.C., Kaitlin Cooper is referred to as a fifth-grader. Two seasons later, she's fourteen, which means an extra year has been added on somewhere. It's an interesting case because the new actress was only a few months older.
* The O.C. Luckily for him, his friends are on hand to clear his name.
* The O.C.: Marissa, a privileged rich girl, had a relationship with Alex, a bad girl bartender.
* The O.C. Marissa Cooper's boyfriend Luke Ward has sex with everyone, according to the character Holly.
* The O.C. of this trope being subverted when Summer demands Seth take the floor, but he refuses) and Ryan and Marissa share the couch. Marissa and Ryan wake up to discover that they're spooning.
* theocratic empire and defeat what was left of the original Covenant, securing the continued survival of Humanity.
* Theo creates one that reacts to Harry's emotions as "incentive" for him and Daphne to get back together.
* The O.C., Ryan and Marissa share their very first kiss on top of a ferris wheel. Marissa kisses Ryan in attempts of calming Ryan down from his fear of heights.
* The O.C. Ryan had three loves, though the first mostly took place before the start of the series. The first was with his childhood friend Theresa that was never more than on and off again but left them with strong feelings for each other. The second was with Marissa and was stormy and passionate and ultimately tragic, the great romance of his life. The third love with Taylor was never as comfortable as with Theresa or as passionate as with Marissa but it was the first truly adult love and - depending on how you interpret the enigmatic ending series ending- the one that might have lasted.
* The O.C., Ryan, Seth, Summer and Marissa are forced to spend the night in a hotel. Summer and Seth have the bed while Ryan and Marissa share the pull out couch. Ryan and Marissa wake up spooning, and we cut to Summer telling Seth she

didn't want to wake them up because they looked so cute together.
* The O.C. seemed to get beat up at least once an episode for much of the first season. This was often lampshaded by Seth.
* The O.C.. She isn't exactly evil, but she's sure not the most morally upstanding character in the series. Though, in the end she's one of the good guys.
* The O.C. Summer plans on converting to Judaism for Seth. Interestingly averted with Seth's mother Kirsten who is confirmed several times as not converting and is happily married anyway.
* The Octavo, the creator's own grimoire is so powerful that it can overload the most powerful anti-magic spell in existence and change reality.
* The O.C., the captain of the water polo team who was dating Marissa and who was always picking fights with Ryan.
* The O.C., the characters attended Harbour High School. The show often featured the physical building, but very rarely any storylines specifically tied to it.
* The O.C.. They go out of their way to create similarities between the shows: The Summer character is named April, the Seth character ad-libs his lines, the Seth and Summer actors dated in "real life," until they broke up, a reality show about "The Real Valley" was created after Laguna Beach happened. Was lampshaded in the series finale, when Summer states that The Valley had been picked up for seven more seasons.
* The October 13, 2010 episode was dedicated to Sanjay Singh, one of their regular EMTs, who had died the previous week. (Sanjay appeared in that episode, which was filmed several months before.)
* The October 15, 1998 strip had Doc Boy send Jon a letter in code that read "Whoever reads this is a poo-poo head"
* The October 1958 issue has several men underwater, wearing swim trunks, scuba tanks, and a bubble for a helmet.
* The October 2, 2002 strip has Garfield get Odie to chase his tail by telling Odie that his tail called him a noodle-neck stupid head.
* The Octonauts After it's over and Lemmy is finally reunited with his fellow lemon shark "dudes," he's given a sticker on his nose by Peso.
* The Octonauts and the Vaquitas puts the spotlight on Professor Inkling, who did not get many focus episodes in the original series.
* The Octonauts episode "The Humuhumunukunukuapua'a" after Captain Barnacles gets water sprayed in his face:
* The Octonauts: In "The Walrus Pups", Barnacles still has his mature voice during the flashback of him as a younger Polar Scout. Averted in the flashback in "The Caves of Sac Actun", where his vocal effects sound much younger.
* The Octonauts, the baby alligator Nipper cries "I want my mama!" after Kwazii tries to get him above water because salt water isn't good for him, only for seagulls try to snap him up as a snack.
* The Octonauts was based on a series of children's books that began in 2006.
* The Octonauts. While it's never explicitly stated, he most likely wears it for the "able to switch between light and dark areas" reason - a few times, he lifts it up and shows that he still has both eyes.
* The "octopus bagpipes" joke. There are a couple of variants, but basically they revolve around an octopus that could play any musical instrument it was given, until it was given a set of bagpipes, which it tried to have sex with.
* The octopus Fishman Hatchan uses Rokutouryuu (Six-Sword Style, with
* the octopus in Detroit on the finals — the NHL was forced to change the rules regarding debris onto the ice, which could even ensure in penalties for the home team.
* The Octoroon explores the challenges an interracial couple encounter in the pre-Civil War American south.
* The O.C. was that he went into business with George Lucas, so maybe it all worked out in the wash.
* The O.C. were this - it ended up being the cause for their break-up.
* The O.C., when Marissa first tells Ryan she loves him, he replies with a very un-smooth "Thank you."

* TheOdd1sOut has a video called "Peeing Yourself", wherein he recounts two times he wet his pants in elementary school.
* TheOdd1sOut has a video "Christmas Carols", where James discusses various Christmas songs, and talks about whether it hurt when Mary went into labour among other things.
* TheOdd1sOut'': In the comic "Spider Comic", a person calls the police just by noticing a spider in his house. The police ends up comprehending.
* TheOdd1sOut: In "Why Pi is Awesome", James says that the main reason pi is awesome is its name— it's a number that allows people to make silly puns due to sounding like "pie".
* TheOdd1sOut, James briefly wears a blue shirt and his sister is in a pink one in his video "My Poetry Teacher".
* TheOdd1sOut (James Rallison) made "NSA All Day", a comic inspired by this trope.
* TheOdd1sOut made the comic "Head Over Heels", which features a co-worker that doesn't understand his peer's figurative speech.
* TheOdd1sOut recaps different events from his life with drawings he made himself.
* TheOdd1sOut: The guy breaking up with the girl says this in the comic "Breaking Up".
* The Odd Angry Shot, although he is not a complete example. he is on his first posting, but he is a professional soldier (having enlisted) rather than a conscript. He gets some ribbing from his squadmates, but this gradually dies away as they spend more time 'in-country'.
* The Odd Angry Shot, a pompous admin sergeant-major in an air-conditioned office tries to throw his weight around with the SAS troopers arriving in Saigon for leave. Taking none of his bullshit, Harry threatens to punch his teeth down his throat. A fight is only averted by the arrival of a senior officer.
* The Odd Angry Shot, Bill gets soaked by a jeep driving through the muddy camp as he is walking back to his tent with his kit. And then the torrential rain starts.
* The Odd Angry Shot: Bung is machine-gunned and falls over the side of a bridge. When his squad mates retrieve his body, his blood is staining the water around him red.
* The Odd Angry Shot follows the tour of duty of an Australian Special Air Service Regiment reconnaissance team in the jungles of Vietnam. It was filmed at the Australian Army's notoriously adverse Jungle Warfare Training Centre in Canungra, Queensland. During the Vietnam War, all Australian soldiers - including draftees - who were to be deployed to Vietnam went through four weeks' specialized training in Canungra.
* The Odd Angry Shot, Harry is the corporal in command of Patrol 22. He is the longest serving member, and is doing his second tour of duty in Vietnam. He does his best to keep everyone alive and keep their spirits up no matter what happens.
* The Odd Angry Shot, however, tells the squad to go easy on them as they all fighting the same war, and the conscripts—unlike them—did not ask to be here.
* The Odd Angry Shot. Later his mates visit him in hospital before he is sent home. Rogers asks Harry to check if his testicles are still present (they are).
* The Odd Angry Shot: On the morning when they're supposed to be pranking the padre, Bill wakes up with a horrible hangover, a black eye, and no idea of how he got either. His squad mates describe his antics for him, which include sculling rum while doing a handstand on a jerrycan, letting the squad's pet spider sit on his arm, and getting into a fistfight with Bung.
* The Odd Angry Shot, the Australians and the Americans hold a contest that pits the Aussies' spider against the Yanks' scorpion.
* The Odd Angry Shot, the long-range patrol team deploy into the middle of their sector by fast roping out of a Huey.
* The Odd Angry Shot, the squad discovers Harry sketching and learn that he had been an artist before joining the army. He tells the story of how he realised one night that his wife didn't love him anymore. He packed a suitcase, left and enlisted in the army the next day, and has been in ever since.
* The Odd Angry Shot: While in Vietnam, Bill receives a thinly-disguised break-up

letter from his girlfriend back home.
* The Oddball Couple. Felix was a clean-cut cat named Spiffy, and Oscar was a slovenly dog named Fleabag. The theme of "my clean side and your dirty side" went to even greater extremes than in the original series, with the left half of their car in pristine condition and the right half falling apart.
* The Odd Couple (1970) after refusing to participate in Felix's version of "A Christmas Carol."
* The Odd Couple (1970) always had a living room couch, but in the first season, which was shot single-camera, it's not terribly prominent. When the show went to three-camera the set was redesigned and the couch, placed squarely facing the fourth wall, finally came into its own.
* The Odd Couple (1970)- during a rehearsal for "Scrooge", one of the characters (Speed) is hiding porn underneath his script and is sort of not paying attention to the rehearsal. He is suddenly asked to read for the part of Scrooge. But he thinks they want him to read the porn. He balks, saying he would be embarrassed. He's coaxed into reading and begins reciting a passage from the porn, to which a very surprised Felix says, "Charles Dickens never wrote that".
* The Odd Couple (1970) featured a greatly increased focus on Oscar's gambling, especially at the track, and Felix's love of opera because those were particular interests of their actors (Jack Klugman and Tony Randall, respectively). Also, Oscar's wardrobe on the show was, in many cases, Klugman's own.
* The Odd Couple (1970)", Felix breaks up Oscar's ex-wife's wedding (which would have ended Oscar's need to pay alimony) because he realized they weren't in love. Oscar calls him on it and demands to know what love is: (paraphrased a bit)
* The Odd Couple (1970) Felix falls madly in love with Gloria and wants to marry her, but he becomes such a nervous wreck that he loses his voice before he can propose to her, and he practically begs Oscar to propose to her on his behalf, even going so far as writing down very specific instructions on what to do and say. Oscar, wanting to get out of there, basically cuts to the chase and asks Gloria to marry Felix, to which she agrees.
* The Odd Couple (1970)", Felix goes missing and Murray eventually manages to ask Oscar to come down to the morgue to identify a body he thinks is Felix. Oscar is subdued with grief until he sees the body, whereupon he's shocked that they could actually think the guy was Felix. (The police had "identified" the body by the wallet.)
* The Odd Couple (1970)", Felix reports Oscar destroying a telephone, getting his weekend pass cancelled right after he and Blanche got married. Guilt-stricken, he makes up for it by bringing Blanche to the base and purposely leaving a chastised Oscar "sitting alone in his bunk" when he knows Blanche is about to come in. He lampshades it, saying that he had to report the thing that got Oscar in trouble, but if he doesn't see this, he doesn't have to report it.
* The Odd Couple (1970): In the episode, "The Subway Story", Oscar and Felix are trapped in the subway with a model, a pregnant dog, and a guy who cynically pretends to be blind to make extra money selling pencils. At the end, the not-blind guy gives Felix a puppy that he names Yawbus ('Subway' backwards.)
* The Odd Couple (1970) is so incompetent that Oscar Madison refers to him as "The only cop who's gonna retire a rookie". In "Natural Chilbirth", he tries to find a missing pregnant girl and brings a different pregnant girl back, despite her protests. Felix Unger tells him "That's all right. You did your best. That's what's so tragic."
* The Odd Couple (1970). It's a long scene with no dialogue that begins with Felix coming home late from work, gargling, putting his PJ's and a sleep mask on and climbing into bed. While on his back a sleeping woman suddenly rolls over and throws her arm around him, while still asleep. He picks up her arm, takes off his mask, sits up, gets out of bed, looks down at her (still asleep) and delivers the only line in the scene: "It's not my birthday...".
* The Odd Couple (1970) (just as Klugman himself had confidently predicted).
* The Odd Couple (1970), little Felix is so neat that his grandfather (played by Tony Randall) tells him: "There are two things people don't like — a dirty

old man and a clean young boy!"
* The Odd Couple (1970) money — Oscar had neglected to take a deduction for his alimony payments.
* The Odd Couple (1970). Once after Oscar draws a mustache on Felix with a marker in an episode titled "You Saved My Life".
* The Odd Couple (1970), Oscar asks a visiting monk to make him a hamburger. On the burger, he asks for mustard, relish, pickles, hot sauce, peppers and chili. The monk says, "No onions?" Oscar replies, "No, I've got an ulcer."
* The Odd Couple (1970) Oscar (in a fat suit) was hired by Felix as a last-minute replacement for the before half of a before-and-after shoot, after "the fattest man in the world" refused to do it.
* The Odd Couple (1970): Part of the backstory is that Felix's wife Gloria, growing tired of his irritating characteristics, "asked [him] to remove himself from his place of residence." "The Murray Who Came to Dinner" has Murray suffering a similar eviction after his wife becomes convinced he's cheating on her with the roller derby queen he's bodyguarding.
* The Odd Couple (1970) remake, in a further weird bit of synchronicity).
* The Odd Couple (1970) some scripts were like this, allowing Tony Randall and Jack Klugman to improvise. For example, a script might say "Oscar teaches Felix how to play football."
* The Odd Couple (1970): The boys befriend a Chinese wrestler (Jack Soo) who brings Felix and Oscar Jewish takeout- "chopped river", "rox" and "bager and cleam cheese".
* The Odd Couple (1970) was doing this all the time: "The opposite of brown is purple", "Millard Fillmore knew less about opera than any other President- except of course for Rutherford B. Hayes".
* The Odd Couple (1970) was often guilty of this. Many episodes, especially early ones, would end with Oscar and Felix each admitting that the problem was the result of their respective sloppiness and pickiness, and reaffirming the importance of their friendship.
* The Odd Couple (1970) when Felix photographs a family of little people, he develops a complex etiquette for his friends for fear they might offend them. However, when the time comes to take the picture he shouts: "Everybody say 'midget'!"
* The Odd Couple (1970), with the canned laughter occasionally used for "sweetening."
* The Odd Couple, after Oscar snatches the plate of linguini and senselessly throws it against the kitchen wall:
* The Odd Couple and Felix's father was an optometrist who fitted Oscar's father with glasses. Their families briefly stayed at the same hotel, and the boys met.
* The Odd Couple at the end of its first season. Strong ratings for repeats that aired over the summer of 1970 convinced them to bring the show back, and it lasted for a further four seasons.
* The Odd Couple, at the end of the first act, Oscar tells Felix that he's saving all the chips on the floor for his game tomorrow. Felix gets a vacuum and picks them up anyway. Oscar comes back in and yells, "Hey!" Then he follows up with..."I didn't know I had one of those!"
* The Odd Couple featuring Jack Soo as a wrestler, Felix tries to take an reaction shot of Oscar as he watches a ballgame and snaps the flash during an important moment. Oscar tries to watch the replay - and Felix accidentally sets off the flash in his eyes again. Lampshaded later when Felix offers to take photos of Jack Soo wrestling for Oscar's paper, and then proceeds to take pictures of everything but that.
* The Odd Couple, Felix, despondent over the dissolution of his marriage, visits Oscar and his poker buddies and after some talk, goes into the bathroom. The others become paranoid that he'll attempt suicide if unattended, so they break into the room and unfortunately hit Felix with the door, who then cries loudly about his back hurting.
* The Odd Couple, Felix has a bandage over his eyes due to recent surgery. When

Oscar throws him out, he stumbles to the closet and puts on what he thinks is his coat, but is actually his ex-wife Gloria's.
* The Odd Couple, Felix returns from the hospital wearing a post-op bandage (blindfold) as the result of a sinus procedure. Wanting to freshen the air in the apartment, he mistakenly grabs a can of whipped cream sitting next to the can of Glade. He also goes to the closet and mistakenly puts on his ex-wife Gloria's coat. After Oscar clues him in, Felix says "It fits!".
* The Odd Couple, Felix's marriage counselor threw him out of the office and wrote on his chart "Lunatic!".
* The Odd Couple, Felix tries to butter up Oscar by making his favorite meal — lasagna and french fries.
* The Odd Couple gave us this scene. It's poker night in Oscar's apartment, cigar smoke fills the air:
* The Odd Couple, Gwendolyn and Felix watch a washing machine this way during their double date.
* The Odd Couple had an episode where Felix was trying to win a new oven in a cooking contest, but a physical condition prevented him from the ability to use his arms. Oscar attempted to help, and in spite of screwing it up and creating something different, Felix won. But he concedes to the runner-up (a sweet girl vying for the oven as well), claiming that the dish he set out to prepare did not turn out be the proper dish.
* The Odd Couple has Oscar lose Felix to guest star Bobby Riggs as a glorified butler. Oscar offers to try to win his freedom back but Felix wins it back himself by holding a note longer than Riggs.
* The Odd Couple how many more adaptations it can spawn and how much merchandise is yet to come?
* The Odd Couple II: Oscar and Felix painfully go through several different metaphors, before Oscar says he can't remember what they started out talking about.
* The Odd Couple. In a episode which aired circa 1971, Oscar signs up with a computer dating service and embellishes his bio. He winds up matched with Felix's ex-wife.
* The Odd Couple is another example of the series improving on the movie, largely due to the talent and commitment of the two leads.
* The Odd Couple most innocent. He's shown to always want to do the right thing and often serves as a moral compass to the others. Even when Oscar tries to get him to lie to help someone, he's extremely hesitant. He ends up doing it, but he feels so guilty about it that he cries, and later finds himself unable to stand the guilt, so he goes and tells the truth. There are several other instances where he outright refuses to do morally questionable things.
* The Odd Couple, one of the poker players lights up a big cigar, leading another to say "Hey, do me a favor, smoke towards New Jersey!"
* The Odd Couple Oscar is hosting, he announces an act called the Aristocrats, but we never actually see the act.
* The Odd Couple, Oscar is watching a Mets/Pirates game from the press box when Felix phones to tell him not to have any hot dogs at the game because he's making franks and beans for dinner. Oscar misses seeing Bill Mazeroski hit into a triple play as a result of this. Another example from the TV adaption appears below.
* The Odd Couple, Oscar meets the Pigeon sisters he arranges his and Felix's double date with by getting stuck in the elevator with them. At least partially averted in the female version, though, because though Olive (female Oscar) gets asked on a date by the Costazuela brothers when she's stuck in the elevator with them, we know she's at least heard of them or seen them around the building before because she mentions them much earlier in the play.
* The Odd Couple, Oscar, whose refrigerator has been broken for two weeks, offers food to the men playing poker with him:
* The Odd Couple. Pamelyn Ferdin appeared in the Season One episode "Bunny is Missing Down by the Lake" as a member of an all-girl camp group who seeks shelter from the rain at the cabin Felix and Oscar stay at before becoming Felix's daughter Edna the following season.

* The Odd Couple, relocated the whole thing to Glasgow. The Pigeon sisters remained English.
* The Odd Couple separate, though their marriage didn't officially end until Somers died in 2007.
* The Odd Couple's opening sequence was written and produced that way to make sure everyone knew the roommates were not gay (per a request by the network). Jack Klugman once referred to it as "that cockamamie [silly, ridiculous] opening".
* The Odd Couple: Spoofed in the play and the movie version when Oscar complains about a cryptic note that Felix left for him, which was signed "F-U". "'F-U' meant 'Felix Ungar.'"
* The Odd Couple. The biggest difference is that the British Pigeon sisters are changed to a pair of Spanish brothers, whose names and accents become the source of a great deal of wordplay.
* The Odd Couple: "The fault lies not with the stars but with ourselves" made Oscar neat, and a finger-snap made him back to normal.
* The Odd Couple (the TV series). Oscar throws his cigar on the ground and Felix spears it with the end of his umbrella, returning it to him. The credit sequence ends with Oscar & Felix in the park eating lunch; Oscar tosses his sandwich wrapper on the ground and Felix starts to complain about it.
* The Odd Couple titled "Odd Couple On Ice!". The wraparounds for this had skaters in Oscar and Felix costumes performing routines while Tony Randal and Jack Klugman provided commentary.
* The Odd Couple was this big time, driving his then-wife Gloria, the doctor, and everybody else (especially Oscar) crazy.
* The Odd Couple, when Oscar is on a senior citizens' cruise for his ulcer, a guy has a trenchcoat full of junk food for sale.
* The Odd Couple would be Oscar Madison. A TV Land Commercial pokes fun at this by using a fake-cross section of the bed, with an increasingly disgusting and improbable item down the hundreds of layers pointed out.
* The oddest thing is that almost all enemies are fought in the standard RPG fashion: they and you have HP, attack, and defense, and you hit/shoot/spell at each other until one of you runs out of health. How the same style of combat works for fighting haunted billiard ball golems, clouds of lumberjack beard hair, and "visible music" is not entirely clear.
* The Oddities were there for Steele's match against Droz, which Droz won after
* The Oddities, who was not the kind of woman for whom that song was usually sung.
* The Odd Job. Same basic plot - guy decides to end it all by hiring a hit man to kill him when he doesn't expect it, but then finds he has something to live for after all and desperately tries to find the guy so he can cancel the contract. He succeeds, but then falls foul of one of the assassin's booby-traps.
* The Odd Life of Timothy Green, Timothy is kept perpetually on the bench during soccer games. His parents manage to convince the coach to give him a chance to play... and that backfires miserably as Timothy ends up accidentally scoring the winning goal for the opposing team.
* The odd little dance Chopper does whenever he's denying feeling pleased with being praised. The author says it was based on a
* the. Oddly, her looks haven't changed at all since her first manga appearance, when she stated (honestly) that she was 23.
* The oddly named "Cosmetic Moonlight Blaster" appears as part of Bahija's backstory in
* The Odd One utters this every time his teammates acted incompetent or didn’t go along with his plan. Since he plays Solo queue, this happens so often, it’s almost his catchphrase.
* The odds might be better than a million to one in this example, but in the tournament finals of ''
* The odds of dying in a terrorist attack in the United States are roughly one in twenty million. The War on Terror is estimated to have cost approximately five
* The Odds Were Never In My Favour do their jobs. No one died, but five students were extremely sick and the political fallout was huge for Hogwarts.

* The odd translation errors like "New Yark" and the "Great Canyon" from the dub of
* The Odd Way Home, a customer tells Duncan, "I gotta pee like a racehorse." This inspires Duncan to dream about a peeing racehorse, which he later draws.
* The Odd Way Home cuts from Maya performing "Blind" onstage with an acoustic guitar, to Maya and Duncan driving while a version of the song with more instruments plays in the background.
* The Odd Way Home, Maya's abusive boyfriend snarls "Look what you made me do to you!" while beating her.
* The Odd Way Home opens with scenes of Maya being violently beaten by her boyfriend. She leaves while he's asleep on the couch.
* The Odd Way Home, Rumer Willis as Maya sings "Blind," which she co-wrote.
* The Odd Way Home shows nothing but relief at the death of her abusive husband, saying that he did the world a favor by dying.
* The odd weapon used by Buffy (see below) originally appeared — will appear? — in the future, wielded by
* The Odessa File, not attached to the ignition but set to go off when the suspension is compressed. Fortunately the car is foreign make with a heavy duty suspension, so it doesn't go off until later when one of the villains steals it and drives over a bump in the road.
* The Odessa File Peter Miller finds after Tauber's suicide. Tauber notes that during the retreat, SS guards sometimes outnumbered their prisoners 10 to 1, using the task of escorting them as a pretense to their own escape to western Allied lines so that the guards wouldn't fall into Soviet captivity.
* The Odessa File would have done as soon as got healthy again was make a pyramid of skulls: not of the victims of the camps, but of those who had put them there.
* Theodora Goes Wild. In the midst of telling Michael she finally stood up to her aunts, Theodora slips in that she loves him. Promptly, Michael gives a bad reaction to the news.
* Theodora "Teddy" Carella, the hot wife of Detective Steve Carella, in the
* Theodore dreams of life in an idyllic country cottage, where he is free to cook elaborate recipes with enormous portions. However, he eats so much that he and his teddy bear inflate like balloons and float away, attracting unwelcome attention from the US Air Force.
* Theodore Rex involve the deceased having their bodies liquefied and used as fertilizer for the flowers. Mourners can take these flowers home, like taking a literal part of their loved one with them.
* Theodore Rex, Katie remarks about Theodore's bad breath several times. At one point she even squirted breath spray in his mouth.
* Theodore Rex tries for some neopunk style version of the giant battlemap with young waafs pushing units around with croupier rakes except the overblown size and odd dress code means that it looks more like the Olympic curling team are pushing around Hershey's Kisses.
* Theodore Rex was intended to be a theatrical release, but after some complications, including a few failed test screenings, it was released straight to video. Having a budget of $33.5 million, it was the most expensive direct-to-video release of its time.
* Theodore Roosevelt. 4) Roosevelt decided the badger or the girl was badass enough to allow the badger to live with his bear.
* Theodore Roosevelt, America's best-read President (perhaps second after Jefferson) and Medal of Honor recipient.
* Theodore Roosevelt apparently acted like this back in his days as a New York Police Chief. He'd go patrolling in the streets and if he saw a cop acting corrupt (taking bribes, hassling people for no good reason), he slapped them and then fired them on the spot.
* Theodore Roosevelt) became friends with forty-something Bobby Kennedy.
* Theodore Roosevelt before it hit him, but by that point, it had been slowed enough to not be a life-threatening wound. Declining suggestions that a hospital visit might be in order, Roosevelt instead proceeded to give a 90-minute speech,

opening with the lines:
* Theodore Roosevelt, doing handstands at state dinners, putting a tack on a gentleman's seat, riding in cars with men at a time when this was seen as scandalous, placing bets with bookies at the White House, using an officer's sword to cut her wedding cake because the knife was too dull...) probably was this for her daughter Paulina. It didn't end happy: Paulina became depressed and an alcoholic.
* Theodore Roosevelt fighting with his own heart condition and arthritis, ultimately earning him a Medal of Honor. Theodore Roosevelt IV was a member of one of the Navy's Underwater Demolition Teams, the precursors to the Navy SEALs. You'd have a hard time finding a more badass family.
* Theodore Roosevelt. He was awarded the Medal of Honor for his actions on Utah Beach with the first wave of troops on D-Day, but died of a heart attack a month later before the medal was presented.
* Theodore Roosevelt) in 1914. Although the expedition had been poorly planned from the standpoint of equipment and logistics, Rondon's wilderness expertise—and his decision to have another officer come upriver from the Amazon as far as possible, just in case—ended up making the difference between life and death for most of the men.
* Theodore Roosevelt made while drinking a cup of their coffee; they later admitted the slogan was actually a fabrication of their advertising department.
* Theodore Roosevelt said something like "Bully!" it meant "bravo, excellent, top-notch, well done", or someone who was a brisk, dashing fellow. It was also used in England to refer to a fellow laborer and "bully beef" is still used in a different sense to refer to pickled, canned or corned beef. Nowadays, it refers to the rough intimidating kid who would take your lunch money or someone who would intimidate you with physical or sometimes emotional threats.
* Theodore Roosevelt tells one to his fellow presidents on Mount Rushmore:
* Theodore Roosevelt the Presidency he added big game hunter, conservationist, and Amazonian explorer to the list.
* Theodore Roosevelt the right rank for the job, as a lesser officer wouldn't have had the weight to change war plans on the fly. He would be promoted and awarded the Medal of Honor. He ended up dying of a heart attack the following month.
* Theodore Roosevelt to be Chief Engineer of the Panama Canal, explaining that he wanted somebody who wouldn't be allowed to quit. Goethals took up his assignment with a sense of duty and saw the project through to completion.
* Theodore Roosevelt wanted to fight in World War One also, but was likewise refused a commission by President Wilson. In this case it probably had far more to do with Teddy's status as a former President than his age.
* Theodore Roosevelt was essentially the Acting Secretary of the Navy when the Spanish American War broke out and he joined the Rough Riders in the Army's Cavalry. He was also the Police Commissioner of New York City.
* Theodore Roosevelt was seen by many in his own time as a god among men!
* Theodore Roosevelt was shot in the chest by an assassin and took the time to finish his speech before he sought medical attention. He was helped a bit by the bullet being partially stopped by his glasses and the thick, folded speech being held
* Theodore Roosevelt when he took his volunteer Rough Riders to Cuba so that he'd always have a backup in case he lost his current pair. His eyesight was so poor that, even with glasses, he could only reasonably read large fonts, a fact that wound up saving his life when a thick pocketbook containing a campaign speech slowed an assassin's bullet enough to protect his vital organs.
* Theodore Roosevelt who was known for personally leading his soldiers in battles and for being a vicious boxer and singlestick fighter even as President of the United States.
* Theodore's lycanthropy, she suggests shooting him with a silver bullet.
* Theodore Sturgeon a strange man known as "Lone" assembles children with super-normal powers, attempting to build "Homo Gestalt" with himself as the head. But he knows that his cannot do it. Eventually he finds a replacement that can do the job.

* Theodore Sturgeon, Chub survives to the very end, despite being one of the workers killed during the massacre in the original novella.
* Theodore Sturgeon depicted a technology known as Logros in the novel 'Venus Plus X'. Logros was employed to do such effects as anti-gravitation, force fields, cold fusion, and many more diverse and fantastic things. But the principles behind Logros are advanced beyond any ability to describe, and all the machinery is invisible or not recognizable as technology to the uninitiated. However, we are assured that Logros is quite simple to build and use, as with any sufficiently advanced technology. For example, the underlying theory behind an electric motor is quite advanced, but the actual product is a series of simple coils of wires and magnets. Sturgeon goes on to make the statement, "Someday, we will be able to do absolutely anything with absolutely nothing, but the science behind it will be too complicated for any human or computer to comprehend."
* Theodore Sturgeon for a venereal disease that will soon cause them a painful death.
* Theodore Sturgeon's "Bianca's Hands" Bianca, who's severely retarded, has hands which are more attractive than the rest of her and move by themselves. Ran (who isn't very bright himself) marries her after falling in love with the hands, only to be strangled by them during the wedding night.
* Theodore Sturgeon's novella "The [Widget], the [Wadget], and Boff" use this in written form. It's implied that the words in brackets represent alternative translations of alien words that have more than one common meaning, or nonsense words for concepts inherently untranslatable. The alternatives are often hilariously incompatible, like [escape|die].
* Theodore Sturgeon's short story "The Hurkle is a Happy Beast" has got six legs, the middle pair of which is essentially a pair of prongs it can rock back and forth on, and it turns invisible when anxious, among other things. The author happily calls it a "kitten" anyway.
* Theodore Sturgeon's short story "Yesterday Was Monday", a couple are caught in a space with no time where the future is being constructed for each minute.
* Theodore Tremaine was a daytime newscaster for a local TV station on weekdays. On Friday evening, however, he took on the persona of Father Fiore, host of the Friday Night
* Theodore Tugboat, in the debut episode of Guysborough the Garbage barge. His grumpiness gets Theodore in a bad mood, which puts Emily & George in a bad mood, and so on until the entire harbour becomes snappy with each other.
* Theodore Tugboat tug visits the Big Harbor to take Owan the Oil Rig out to the ocean to work there. During his visit, Oliver bumps Theodore in a hurtful way. At one point, Theodore thinks about bumping Oliver back, but decides against it. When he explains his problem to the Dispatcher near the end of the episode, the Dispatcher is proud of Theodore for not fighting back, and tells him that if he did that, it would only make the problem worse.
* Theodore Tugboat, was decorated to look like Theodore and stationed in Halifax Harbor.
* Theodore Wicker serves as both an Officer and Support during the Hell Dimensions dungeons, especially once he's forced to give up his plans of rebuilding Hell in favour of leading demonkind to war: having made himself effectively immortal through dark rituals, the wonky passage of time in hell has granted him several centuries to hone his skills to incredible extremes, until he's not only experienced enough to manage the strategic maneuverings of an entire revolution, but powerful enough to match
* Theodor Fontane (which was also filmed) is an officer of an elite Prussian horse guards regiment, the Gens d'armes, the aristocratic officers of which were notorious for their arrogance and boisterousness. As it is set on the eve of the catastrophic defeat of 1806, there is a sense of dark foreboding.
* Theodor Kittelsen, another artist, had moved into the vicinity of Munch around 1910. Kittelsen, suffering from severe depression, rarely went outside at this point of his life, and his wife had to take all the errands for him. Inga Kittelsen then encountered Munch on a train, and Munch seemed to be interested in the fact

that Kittelsen lived nearby - they were, in fact separated by an open field. "It is good to know Kittelsen lives nearby", Munch stated. "But he must never come and visit me". Kittelsen, when told this, agreed and said almost the same thing.
* The ODSTs (Orbital Drop Shock Troopers) use SOEIVs (Single-Occupant Exoatmospheric Insertion Vehicles; also called HEVs or Human Entry Vehicles), despite the fact that
* The Odyssey (1997), a 1997 adaptation of the Homeric epic starring Armand Assante.
* The Odyssey accidentally allows Odysseus and his men to escape after being blinded.
* The Odyssey, after spending a five-day vacation on Circe's island, Odysseus bids her farewell and heads for his ship, only to find that five years have passed and his ship is now rotted and partially buried in the sand.
* The Odyssey and denounces the laws of the gods as irrelevant. This despite being the son of Poseidon. Hypocritically, after Odysseus blinds Polyphemus in revenge and arrogantly revealed his true identity, Polyphemus invoked Poseidon's favor (read: whined to Daddy) to punish Odysseus.
* The Odyssey appears and drinks first. Tiresias advises Odysseus on how to return to Ithaca, and other spirits (including his own mother, who died from grief) speak to him before the crowd of dead becomes too large, and Odysseus with his men flees back to the ship.
* The Odyssey, as he goes on about what the land Odysseus visited must have been like.
* The Odyssey - both fall in love with Odysseus and want to keep him on their islands, but due to divine intervention (Hermes usually is involved) they have to let him go eventually. Calypso even lampshades it, complaining that goddesses are always quickly separated from their mortal lovers, usually by a god killing them.
* The Odyssey, but an omen that the sun god was pissed off and about to get revenge.
* The Odyssey consists of Odysseus crying on a rock, Odysseus defeating sea monsters, Odysseus crying on a rock, Odysseus defying Poseidon, Odysseus crying on a rock...
* The Odyssey declares "Kyklops,/if ever mortal man inquire/how you were put to shame and blinded, tell him/Odysseus, raider of cities, took your eye:/Laertes' son, whose home's on Ithaka!" He may as well have given him the precise longitude and latitude of his house, and just thrown in his social security number, too.
* The Odyssey. Domestic and beautiful, she has stayed faithful to Odysseus, waiting for him for twenty years.
* The Odyssey: Dozens of foreign nobles seek Penelope's hand in marriage after her husband is presumed dead. Penelope still holds out hope that her husband is alive, but she cannot outright refuse them, so she stalls for 20 years while they take up residence in her estate and mooch off of her. Odysseus famously returns and kills them all for their transgressions.
* The Odyssey. For that crime not found in his poem of origin, Odysseus is burned forever in a tongue of fire.
* The Odyssey happened to him. Only the battle with the suitors at the end definitely happens, and that part of the story is merely unlikely, not impossible.
* The Odyssey has some examples, too (like most of the sailors' deaths), but it isn't really a tragedy.
* The Odyssey has Ulysses' right-hand man, having given up hope during the ten years of Ulysses' absence and sick of watching the suitors abuse their hospitality, propose to Penelope to get them out of having to entertain the wannabe boyfriends. She rejects him like all the others, and when Ulysses shows up they fight.
* The Odyssey innocent; the bard had been dragged along by the suitors, and the herald was actually Penelope's spy.
* The Odyssey: In trying to help her champion Odysseus win the footrace at Patroclus' funeral games, Athena causes one of his competitors, Aias the Lesser, to slip into a pile of ox dung. It even gets into his mouth and nose. Everyone laughs at him.

* The Odyssey is Odysseus telling the story of his return from Troy to the Phaeacians.
* The Odyssey. Later in the novel he reveals himself to the swineherd and cowherd after determining that they were still loyal to him, shortly before springing his trap on the suitors.
* The Odyssey: low survival rate (0%) and futile in every battle, Odysseus makes better progress once they're all dead.
* The Odyssey — possibly the first novelistic Quest in the West — to return home and defeat his wife's suitors.
* The Odyssey: Odysseus ends up being the only one of all of his men to make it back home to Ithaca, the others perishing in the various disasters that befall them.
* The Odyssey: Odysseus had this problem, due largely to Poseidon hating his guts.
* The Odyssey, Odysseus's party is picked off by the fantastical beings they encounter on their journey home. This was part of a curse Odysseus received, stating he would be allowed to finally return home at the end of his long adventure, but it would be at the cost of his men.
* The Odyssey, Odysseus's ship sank, and only he survived to spend seven years with Calypso.
* The Odyssey: Odysseus wants to get home. Every monster and god on the Great Sea is hindering him.
* The Odyssey of Flight 33" features stock footage of the 1939 New York World's Fair, specifically the Trylon and the Perisphere.
* The Odyssey: One of Odysseus' crewmen, Elpenor, dies embarrassingly. After surviving the Trojan War and plenty of perils on the return journey, he dies on Circe's island when he gets drunk and falls asleep on the roof of Circe's house, then falls off in his sleep and breaks his neck.
* The Odyssey, opening the bag of winds just as they were almost home, and butchering Helios' sacred calves. Sure, it was Odysseus' fault that Poseidon was angry at them, but you'd think his men would know better than to piss off the rest of the pantheon.
* The Odyssey Resurgence) about the Replicators and Adams considers the possibility of turning the Replicators on the Harvesters to stop them, although Adams accepts Carter and Landry's argument that the Replicators are too dangerous to seriously consider that as an option.
* The Odyssey Resurgence didn’t just steal the technology from his counterparts.
* The Odyssey run to several pages, however most of them only appear in one or two books.
* The Odyssey starts with the main character falling into a coma. Although he's not dead, he's completely disconnected from reality in a comatose dream world.
* The Odyssey suitors, this had to take some time to complete. To top it off, he then orders the horrified maidservants who had slept with the suitors to dispose of the corpses, and after they finish has them executed by his son. Who promptly decides stabbing is too good for them and has them hanged instead, making a point that he wants a painful death for them.
* The Odyssey, the next morning opens the cave so the sheep can graze but feels their backs as they pass to make sure that none of the humans try sneaking out. Odysseus comes up with the idea of clinging to the sheeps' bellies in order to get past the cyclops.
* The Odyssey, the protagonist has been unable to return home to Ithaca for 20 years of warfare and increasingly lonely wandering. Even when the goddess Calypso wants to make him her immortal sex buddy, all he wants is to see his mortal family again.
* The Odyssey - the whole crew can't resist the sight and song of the Sirens, even though it means shipwreck. A less sexualized reading, of course, is that the song itself is magically enchanted to be irresistible.
* The Odyssey to declare the feuding over and threatens divine retribution on any who violate her orders.

* The Odyssey to Polyphemus to remember the man who blinded him: Odysseus, son of Laertes, King of Ithaca. Polyphemus called out to his dad, who just happened to be Poseidon, for vengeance; as a result, Odysseus was stranded on Calypso's island for seven years.
* The Odyssey, when Odysseus meets Nausicaa, he mistakes her for the goddess Artemis and grovels for a few seconds before she convinces him that she is human.
* The Odyssey where a character prophesizes the slaughter of Penelope's suitors by seeing them all racked with painful, hysterical laughter and choking up blood. And still continuing to laugh as they're slaughtered.
* The Odyssey), whereas dreams that go through the ivory gate are deceptive and false.
* The Odyssey, who is big, but neither strong for his size nor really a fighter. After vainly trying to dissuade Iros from this, Odysseus finally agrees to the fight and girds his loins for the fight. And then the watching suitors and Iros see the muscles on Odysseus' legs, chest and arms...
* The Off-Beats. Even though she's a beatnik, her horn-rimmed eyeglasses are not a fashion accessory; she really needs them to see. In one episode when she loses them and the Populars find them and hide them from the rest of the Off-Beats, and while Tina is wearing the glasses, Betty-Anne's vision is so bad without them that she can't even see that Tina is wearing her glasses!
* "The Offbeats" has Repunzil, who has hair that, while not as long as her namesake, still trails a foot on the ground. In the The Offbeats Super Stuntacular in "Better Than A Poke In The Eye", she even uses her hair as a ladder to save August and September from drowning.
* The off-Broadway production had "There Once Was a Pirate" as the second act opener, which was briefly replaced by a different song, "Once Upon a Pirate Night," before being reinstated, and then replaced again by "The Guilty Ones" when the show moved to Broadway. A reprise of "There Once Was a Pirate" sung by the girls was, naturally, cut with it, and Broadway also lost reprises of "Mama Who Bore Me" and "Touch Me" sung by Anna.
* The Off Colors are another bunch of misfits, hiding from Homeworld's judgement. They consist of a
* The offences listed in "You Can Get Arrested For That" by Greg Champion consist mainly of things like buying an Olivia Newton-John record and not eating all your vegetables.
* The Office: After Michael and Jan get into a big argument during their dinner party, the neighbors call the police. When they arrive, Dwight tries handling it and the officers tell Dwight they don't want to deal with him right now.
* The Office, also dealt in this trope a great deal. One notable example had him make a mildly homophobic joke to a colleague, trip over himself after suddenly realizing that the colleague might be gay, and end up counseling him with advice on safe gay sex. The colleague wasn't gay, incidentally.
* The Office: An American Workplace episode "A Benihana Christmas", when Michael asks Ryan to go to Benihana, he puts forth a hurricane of excuses including having a peanut allergy and having eaten there the previous night.
* The Office and then fall from grace. Despite having no storyline to advance, he stuck around because as he was played by an executive producer on the show. Later seasons remedied this by making the character into a satire of a hipster, thus giving him something unique to do again.
* The Office and then moves in to kiss her, only for her to move back and reject his kiss. Rather than showing them as mutual love interests, it humorously shows Michael's belief that life is like a television show and that his coworkers are much closer to him than they actually are.
* The Office, Andy explains to the camera that he never told Erin he was engaged to Angela because she never asked.
* The Office an employee brings her baby boy to the office (dressed in pink). Pam tells the mother "she's so cute" only to have her say he's a he. When Pam explains she thought the baby was a girl because of the pink clothing the mother responds with "Pink is his favorite color."

* The Office being more famous than he is. The German and French versions also have better ratings than the original in their respective countries.
* The Office by having him read off idiot boards. "Now, I hear he's going to be my right-hand man, ad-lib masturbation joke... Mr. Dwight Shrute!".
* The Office Chair Racing Championship in the German resort town of Bad Koening sees more than 50 participants race downhill over jump ramps.
* The Office descends into a bitter fight between the two and utter chaos, much to the simultaneous amusement/horror of their guests.
* The Office, Dwight and Angela, along with secondary couples like Bob Vance and Phyllis.
* The Office. Dwight claims that he has never been sick in his life. Jim rightly points out that Dwight shouldn't have any immunities then.
* The Office: Dwight is given the task of choosing the company's health plan, and quickly gets delusional about it. Jim notes that it's the smallest amount of power that has ever gotten to someone's head.
* The Office, Dwight Schrute has referred several times to his Nazi maternal grandfather, who lives in Argentina and was 103 at the time of the interview.
* The Office each character is by how young and attractive they are, with Pam and Jim being the only characters who are not played up as buffoons, get tons of screen time, and end up being shipped together.
* The Office Employee Transfer, Cornell grad Andy asks Dwight if he thinks he can get into Cornell. Dwight replies, "If someone who can barely outsell Phyllis can get in, I think I can manage." Phyllis is, of course, right beside them.
* The Office episode "Valentine's Day" when a series of bouquets keep arriving but none for Pam, who keeps expecting one. She spends the episode getting more and more frustrated and all she gets is a 'Happy Valentine's Day' from Jim.
* The Office feature this type of humor, as the show is meant to portray an otherwise-mundane office environment where the inhabitants attempt to liven things up (usually for the camera) only for it to go very poorly. Examples from the most famous versions of the series include:
* The Office gives a great in-universe example of this theatre variant. Inevitably, his characters end up pulling guns and shooting everyone dead before the scene can take off.
* The Office had Tim vs. Gareth. The US version has Michael against Toby and Dwight against Jim; in the former case, Toby looked upon Michael's "rivalry" with a measure of disbelief, and in the latter case, Jim uses it as an excuse to constantly pull pranks on Dwight. A somewhat more straightforward rivalry in the US version was Dwight vs. Andy, first when Andy attempted to usurp Dwight's position as Michael's favorite and later when both got involved in a love triangle with Angela. They have since become fairly good friends. In later seasons, the Andy vs. Nellie rivalry replaced the Andy vs. Dwight one.
* The Office has Pam drawing a composite of a suspect who flashed Phyllis in the parking lot. When Dwight takes it upon himself to find the offender, Pam draws Dwight's face and adds a small mustache.
* The Office he can't visit without protests from the Shoah Foundation.
* The Office. He gives Ryan the "Hottest Office Member" Dundie award, openly admits he'd sleep with Ryan (in "The Fire"), and calls Ryan "sweetcheeks" once in Season 3. And there are many more examples.
* The Office, he stayed, because "bears attack when you least expect it."
* The Office introduced Recyclops, an eco-crusader who helpfully suggests ways to recycle and reuse items. Unfortunately, Recyclops (played by an increasingly deranged Dwight) grows more dangerous and militant each year, until finally, he renounces Earth Day and swears vengeance against humanity for some unspecified misdeed, and proceeds to exact his punishment by releasing copious amounts of aerosol spray.
* The Office: In "Ultimatum", Michael forces Kevin to eat a large piece of broccoli after he makes a New Year's resolution to eat more vegetables.
* The Office is a fan favorite but in-universe is generally considered annoying by the other characters.

* The Office is fussy, small and prudent. So fittingly, she has a bunch of pet cats, and dresses up as one for Halloween.
* The Office is lazy and unmotivated, yet he is still one of the top salesmen in all of Dunder-Mifflin. But when his job is on the line or when he wants to buckle down and work, he's among the most competent workers there.
* The Office is starting to feel really uncomfortable about Erin being around Andy.
* The Office is still part of the same universe, though, judging by Ricky Gervais's cameo as David Brent.
* The Office it goes in the corner and the meeting breaks up, Michael rejoicing in his newfound teamleading skills.
* The Office Jim and Michael go out on a sales call. When the camera catches Micheal coming out of a gas station's Women's Room, he explains that the Men's was too disgusting to use.
* The Office, Jones' character Karen Filippelli has an Italian last name (and admits to Italian ancestry), but the character also speaks some French and Chinese and it's also speculated whether she might have Filipino ancestry. At one point, Michael tactlessly tells her she looks very exotic and inquires whether her father was a G.I.
* The Office, Michael — unaware he's being romantically set up — is quirkily joking his way into the heart of Pam and Jim's friend. When Michael learns the truth, he exits the bar, unbuttons the top button of his shirt, puts on a backwards hat, and re-enters as "Date Mike," whose antics are so obnoxious the girl leaves early.
* The Office: Michael, after having walked in on the hospital room where Pam is giving birth.
* The Office Michael and played by frequent Steve Carell collaborator Will Ferrell. He only appeared for four episodes before disappearing after a total physical and mental breakdown.
* The Office, Michael attempts to hasten a game of Scrabble between Jim and Creed by grabbing all of Jim's tiles and playing "NOSCRUB." Creed immediately challenges.
* The Office, Michael Scott and Dwight Schrute seem tangentially acquainted with human society at best. Michael was clearly raised by pop culture, and expects everything to work out in real life the way it does in movies and on television. Dwight was raised on an insular beet farm without most of the niceties of civilization:
* The Office, Michael Scott burns his foot on a George Foreman grill and is dismayed when nobody takes his injury seriously. He even tries to monopolize the doctor's attention at the hospital when Dwight is taken there with a pretty serious concussion.
* The Office, Michael Scott misuses this trope constantly at his improv class. Any time he is called to act in a scene, he pulls out a gun to increase drama because "you can't top it". Of course, nobody can top it and it ruins every improv exercise the class attempts.
* The Office: Michael Scott refrains from making his usual "That's What She Said" jokes when he's with Holly, one of his only love interests that has real potential.
* The Office, Michael Scott uses this to demonstrate his technique for memorizing names in "Lecture Circuit".
* The Office, Michael wanted to build a robotic memorial statue of his old boss, Ed Truck. Dwight suggested giving it a short power cord so it couldn't kill them all.
* The Office of Film and Literature Classification is essentially Australia's version of the MPAA, but unlike its American counterpart, it is a governmental organization. By law, the OFLC
* The office of Hand of the King could be considered this, but depending on where the individual who holds the title falls on the morality scale, or where their king falls for that matter, this could also be
* The Office of Naval Intelligence (the aforementioned ONI) is basically an entire agency made up of these; apart from green-lighting SPARTAN-II in the first place, they also approved SPARTAN-III (which, despite absolutely zero involvement from Halsey, still used children, but as

* The Office of Naval Research takes advantage of this with their online game platform MMOWGLI (Massive Multiplayer Online
* The Office. One of Jim's pranks on Dwight involves offering him an altoid mint every time Jim reboots his computer for several weeks, until finally Dwight hears the reboot noise and puts out his hand for an altoid before Jim can offer one. Jim acts like he has no idea what Dwight is doing.
* The Office, Pam falls asleep in this exact pose on Jim's shoulder during one of the interminable conference room meetings. Even though he's had a rotten morning and lost his main sale of the year, this little gesture from Pam is enough to let him decide that he's had a pretty good day.
* The Office plays Charades in "Dinner Party", but he can't resist cheating. "Rhymes with Parnold Schporzenegger."
* The officers of a Russian sub would probably not walk around in parade uniform all the time. In fact, they certainly
* The officers of the Death Korps of Krieg are a weird subversion- they are possibly the most brutal commanders in the Imperium and treat their men like they're completely expendable. But the men don't care because they believe they are expendable, a Korpsman's sole purpose is to take an enemy bullet and quietly die to make room for the next one. In Krieg regiments, the Commissar's job is to
* The officers of the Golden Company are odd ducks. Yes, they are very blingy: for each year they have held a position of command, they wear gold armbands, wrist bands, neck torcs... whatever combo adds up right. This is on top of the standard sculpted sets with their heraldic colours of clashing, the filigree-and-gems and expensive inlays often seen in well-made, well-to-do Westerosi arms and armour. But, as far as, Essosi norms go: this is just boringly
* The "officer's quarters" that Lister and Rimmer occupy between Series III and Series V includes a microwave oven that's blatantly from 1989. Similarly, the exam room set in Series I appears to include film reels on a shelf.
* The officers selected by the Munitorum to serve as Division and Corps commanders for Operation Caribbean are almost exclusively this for a variety of reasons. There are a handful of competent officers whose careers had stalled for political reasons, but they're vastly outnumbered by the washouts, burnouts, and outright incompetents, not to mention the ones willing to sacrifice entire armies for their own glory.
* The Office, said that he has his character's unflattering bowl cut in his wedding photos, captured for posterity.
* The Office - she's very pretty and probably the nicest person in the show but she can be completely clueless, gullible, and naïve.
* The Office showed a bunch of clips of Stanley being "abrupt" with people.
* The Office, someone tells Michael he's wearing a woman's suit. Michael denies it vehemently, but eventually admits that he bought the suit from a sale bin, not realizing it was a suit for women. (He assumed the peculiarities of the suit — such as a lack of pockets and buttons on the wrong side — were because the suit was "Italian.") Later — as he's complaining about his day — he says "Also, I accidentally crossdressed."
* The Office). Subverted when Michael fake fires Stanley to discipline him, which backfires as Stanley says he is filing a lawsuit. This leads Michael to admit that he was only pretending to fire him.
* The Office subverts this in the Season 5 episode "Blood Drive"; after lightly flirting with a woman at the blood drive, he finds she left her glove behind. As the people running the blood drive are restricted from giving out personal information, Michael runs a Valentine's Day mixer at the office, advertising the missing glove in an attempt to attract her. But she never comes.
* The Office that those leaders rose to power with the help of stirring rhetoric (which was how Dwight got through to the audience).
* The Office. The characters have Office Olympics when their boss is away for a day, complete with opening and closing ceremonies. Events include "Flonkerton" (box-of-paper snowshoe racing), "who can put the most M&M's in their mouth", "Dunder Ball", "Hate Ball" (called so because of how much Angela hates it), then

there's a paper football game and "paper triangle flicking and hitting things" game. And Angela reveals she plays a game "Pam-Pong" (she counts how many times Jim gets up from his desk and goes to reception to talk to Pam). Also, Pam tries to throw stuff into Dwight's coffee mug.
* The Office, the other students in Michael's improv class are happy to take part in a scene ... until Michael is chosen to be in it.
* The Office. Though in another episode Creed (the character) heavily implies that he killed the real Creed Bratton and stole his name.
* The Office, Toby mentions having served on the jury for the Scranton Strangler (later admitting that they may have convicted the wrong guy), and in a later episode Jim returns from a two-week jury duty break (which he later admits to milking for a break from work after being sent home on the first day).
* The Office to the "One Red Paperclip" project (see Real Life, below).
* The Office tries this for about five minutes after returning from anger management with the new name "Drew" as part of a reinvention, but Jim continues to call him Andy to irritate him and he eventually gives up on it.
* The Office tries to figure out who is hotter, Karen or Pam, he specifically notes that Pam has bigger breasts.
* The Office (UK) after losing a pub trivia night, invents a "double-or-nothing" kettle-tossing competition, and starts insulting the trivia night's winners after "winning" the kettle-toss.
* The Office (UK): bullying his subordinates to offer up names of eligible friends.
* The Office (UK), David Brent gets caught in the middle of a (lame) dirty joke in the Seven Minute Lull at the end of "The Party."
* The Office (UK) has a subverted civilian example. David Brent is constantly asserting that he places his staff above all other concerns, including his own career goals, but in reality, he's just sucking up to be liked and will secretly sell out his staff to get promoted.
* The Office (UK) has Lee and Dawn's sojourn in the US. They entered the US to visit Lee's sister and stayed three years on a 90-day visa, only returning to Slough when the documentary crew offered free tickets. Since the two of them lacked work permits, they're forced to support themselves with jobs that paid cash under the table, like gardening and babysitting while living rent-free with the sister.
* The Office (UK) is so utterly uncomfortable that it must be seen to believed.
* The Office (UK): Lee play this to Dawn. Mostly of the "minor flaws" variation, but with hints of Latent Jealousy.
* The Office (UK) matter and which are irrelevant to ensuring her own survival.
* The Office (UK) (Sweden). Notably, Ricky Gervais and Stephen Merchant asked that each new version in another country follow the same plot of at least the first three episodes.
* The Office (UK). The one with lots of awkward clumsy movements and grunting.
* The Office (UK). They are linked by the character David Brent, who appears in all of them.
* The Office (UK), Tim Canterbury, who played pranks on Gareth to try to cope with the soul-crushing boredom of working in the office environment.
* The Office (UK) uses a cover of "Handbags and Gladrags", as made famous by Rod Stewart.
* The Office (UK) visits the office and actually gets the staff laughing at his jokes, David becomes passive-aggressively hostile, as he usually does when his self-image is threatened.
* The Office (US) accountant webisodes, the accountants asked Phillis if she had spent any company money on something, hoping to find the missing $3000, she admits to having bought something with a company card, but it was a heel for her shoe, only costing $14.
* The Office (US), after a prank makes Andy so angry that he punches a hole in the wall, Pam tells Jim that she thinks they broke his brain.
* The Office (US), after Deangelo attempts a slam dunk on a free-standing basketball hoop and pulls the whole thing down on top of himself.
* The Office (US) A hidden depth of Jim in early seasons is that he's a great

basketball player. It's also a way that he proves his dominance over Roy.
* The Office (US) also wrote the season 2 finale "Casino Night" as well as "Survivor Man".
* The Office (US) always has a short, one scene gag before the opening scene.
* The Office (USA), Michael invites a few co-workers over for dinner and takes them into the bedroom on the house tour. He apparently neglected to remove the video camera pointed at the bed.
* The Office (US), and all but Carell directed one of their own scripts at least once.)
* The Office (US) and can't understand why everyone in the office isn't helping him convince her.
* The Office (US) and declares that he will love her for the rest of his life, and everyone in the office stares at them.
* The Office (US) and this was after Hammond was prepped in a Formula Renault car (which itself he had trouble launching).
* The Office (US). Another one of the reasons the pairing is cute despite its obvious weirdness.
* The Office (US): An unusually sweet moment when Pam hugs Michael is ruined:
* The Office (US): At a Dunder-Mifflin shareholder meeting, Michael attempts to pacify the crowd with a 45-day, 45-point plan for staving off bankruptcy, to be generated during a 15 minute break.
* The Office (US), being written out of the show. The series continued for two more seasons without its main character.
* The Office (US), both are saddened when they each see the other exchanging gifts with their respective significant others. Their attraction to each other eventually causes Jim's relationship with Karen to fall apart, and in the season finale he finally asks out Pam, who accepts.
* The Office (US), calling Jim and Andy into a meeting to criticize them. After a few seconds, it becomes clear that the meeting is about their Call of Duty performance.
* The Office (US), convinces him that he was bitten and is turning into a vampire.
* The Office (US), Creed hands Jim a $3 bill with George W Bush's face on it.
* The Office (US) declares DEFCON 10 because he is afraid of an upcoming meeting with Jan. Later in the episode, he "increases" it to DEFCON 20.
* The Office (US) deliberately sets this off in response to her co-workers ignoring her requests for a little consideration for her morning sickness.
* The Office (US), Dwight and Andy perform this routine for differing motives based in politeness.
* The Office (US), Dwight invented a scheme to get Jim fired, which is easily another useful example we could list, but convinced a clueless Andy that it was his idea so that it couldn't get traced back to Dwight.
* The Office (US), Dwight is comforting a crying Pam and instinctively starts to do this, before realizing that they're inside and it's actually a little hot. He ties the sweater around his waist instead.
* The Office (US), Dwight issues Jim a demerit for tardiness, then explains his made-up, incredibly convoluted warning system for policing the office that, as Jim points out, logically ends with Dwight submitting a disciplinary review to his immediate superior (Jim himself, the Assistant Regional Manager). Jim responds by demanding the review be on his desk by the end of the day, or Dwight will be issued a "full dissadulation." What is that? "You don't want to know."
* The Office (US), Dwight is suffering from severe abdominal pains (actually appendicitis) and Jim pranks him by trying to convince Dwight that he's poisoned him:
* The Office (US): Dwight Schrute, Assistant (to the) Regional Manager. Michael and Creed are also big ones.
* The Office (US) episode "Christmas Party" wears a lampshade at one point during the episode, likely drunk.
* The Office (US) episode "Fun Run": Pam walks in on Michael, who is using his office to change. She later comments on how picturing an audience naked is a bad

idea and instead you should imagine them wearing funny winter coats.
* The Office (US): Even though Stanley and Darryl have clearly been obnoxious or inappropriately insubordinate, Michael constantly ignores it for the cameras, fearing accusations of racism.
* The Office (US) everyone would rather be working at Dunder-Mifflin than locked up in prison. They're working by choice and paid to be there.
* The Office (US) exemplifies this trope. Episode after episode is based around the principle that he desperately wants to be loved by everyone, especially his employees, and that he's really rather lonely outside of the office. This is, in fact, the justification for most of his outlandish behavior — he's trying to be a crowd-pleaser.
* The Office (US) fame have dated on and off in much the same way that their characters Kelly and Ryan did on the show.
* The Office (US)) finally shows his long-awaited dramatic film titled "Threat Level: Midnight."
* The Office (US) for a gay politician, Dwight suspecting he's the father of Angela's child, and Andy deciding to break into show business.
* The Office (US) frequently blurts out people's secrets. On several occasions, it's been due to him showing off what he perceives as a close friendship (evidenced, in his mind, by the fact that they confided in him in the first place) with the person whose secret it is.
* The Office (US) from Netflix in 2021 in favor of streaming it on its own subscription service, analysts had concerns over how many subscribers Netflix might lose as a result of this action.
* The Office (US), Gabe tries to embarrass Andy during his branch manager interview by asking him difficult, irrelevant questions. It backfires:
* The Office (US) got a Relationship Upgrade between seasons three and four, and then another one later on.
* The Office (US) has all the hallmarks such as a loud "preppy" fashion sense, privileged upbringing, and prestigious education (i.e. Cornell).
* The Office (US) has an entire episode, "Local Ad", about the employees making one of these.
* The Office (US) has a phenomenally poor memory, to the point that he has trouble remembering his coworkers' names, or even telling them apart. In one episode in Season 3, he thinks Meredith is new to the office, despite having worked with her for years.
* The Office (US) has few opportunities for promotion. They try to subvert it a few times but most of the time it does not stick. Michael will not get promoted past branch manager and while he has that job nobody else is really moving up. Most of the other people have specialized individual positions with only Michael above them.
* The Office (US) has Michael's rather rocky extended relationship with his boss Jan.
* The Office (US) has several of these. Jan from the executive branch has Michael (the manager) and Toby (the HR liaison) as her Number Twos. Dwight acts as Michael's Number Two but is not in any official way. Jim is his actual Number Two by Season 3, although what with how much work Michael actually gets done, Jim is the one actually running the office.
* The Office (US) has this subverted when Dwight is trying to get information from Kevin.
* The Office (US) have been available for years, however in 2011 Staples announced it would begin to sell actual Dunder Mifflin branded paper products in its stores (which is rather ironic, considering that on the show, Staples was Dunder Mifflin's biggest competitor).
* The Office (US)). In a later episode, when characters are musing over bad past breakups;
* The Office (US) in one episode when Pam sets Kelly up with a handsome Indian doctor and she has to choose between the two. Ryan then campaigns to get Kelly back, even riding in on a white horse outside the office. In the finale, they end

up running off together.
* The Office (US): In s05e15 Michael visits a playground and sits sad on a swing after being traumatized by the roast from his co-workers.
* The Office (US) in the office are to stop including Michael's favorite joke "That's what she said."
* The Office (US) is a fan of doing this, such as calling Jim 'Big Tuna', simply because of his lunch choice.
* The Office (US) is a psycho ex-boyfriend. He becomes one after Erin breaks up with him. He follows Andy, (whom Erin really likes) to the men's room and threatens him and follows Erin into the ladies' room and pleads for her to take him back.
* The Office (US) is generally aimed at adults, there are several baby onesies with the Dunder-Mifflin paper company logo on them.
* The Office (US) is hosting his last Dundies, he presents the "Hottest In the Office" award to a guy that year, which according to him is his first time doing it. Ryan immediately gets up to accept it, but then subtly angrily sits down after Danny Cordray (who isn't even there) is announced as the winner.
* The Office (US) is much older than the rest of his co-workers, and occasionally shows signs of going senile. Though, somewhat of a subversion since he never actually applied for a job and just walked into the building one day, pretended to be working, and continued to do so for years.
* The Office (US) is quite a bit taller than Pam (5'6) and his ex Karen (5'4). Dwight (6'2.5) used to tower over Angela (5'1) as well, although that had more to do with her being so small she had to buy children's size clothes; Dwight is over a foot taller than Angela.
* The Office (US), it is established in the pilot episode that Jim is head over heels for Pam, and that's one of the only reasons he works at Dunder Mifflin. "If I left," he explains, "what would I do with all this useless information in my head? You know? Tonnage price of manila folders? Um, Pam's favorite flavor of yogurt, which is mixed berry."
* The Office (US). It takes Andy a moment to realize it's a gay bar, and it's a very normal looking (if exceptionally nice looking) bar with average-looking gay clientele. The bar even holds a trivia night.
* The Office (US) - it turns you into an asshole), running a massive fraud, and getting busted and fired, then starting all over again as a temp at Dunder Mifflin, Ryan now carries a notebook filled with the names of people who piss him off. So he can "get back on them once I'm on the top again".
* The Office (US), it was revealed that he keeps a list of things he can say just to be able to add those four words.
* The Office (US), James Spader played one of the applicants interviewed to replace him. When asked how he would sell paper, he explained that "There is no such thing as a product. Don't ever think there is. There is only sex. Everything is sex." After he left the room, Jim commented that "He creeps me out... but I think he might be a genius."
* The Office (US), Jan does not like nor understand why she feels so attracted to Michael.
* The Office (US), Jim and Pam buy Kevin 69 containers of cup ramen, because "it's his favorite number."
* The Office (US). Jim and Pam, who are exhausted due to their new baby keeping them up all night, try to sleep in the warehouse crew’s secret nap spot. Unfortunately, they are right next to where Dwight and Angela's secret meet-up spot for their contractually obligated five sexual encounters. They’re shown wide awake having to stay perfectly silent listening to the whole thing.
* The Office (US): Jim's mugging for the camera often reflects how the audience perceives the ridiculous events on screen.
* The Office (US), Jim steals Karen's desk chair because his squeaks. So Karen (not realizing who she's dealing with) tries to get back at him by squeaking the chair. He sings the chorus for "Lovefool" by The Cardigans repeatedly to get it stuck in her head. She's begging him to stop in seconds.
* The Office (US), Jim switches his squeaky chair with Karen's, and then proceeds

to ride his chair throughout the office to avoid having to get up out of it and giving Karen an opportunity to switch it back.
* The Office (US), Kevin thinks that mummies are fictitious monsters from the horror genre, and expresses surprise and fear when people tell him that they exist and there are some in a local museum.
* The Office (US), Michael and Dwight think about this trope while looking for business leads that got thrown away.
* The Office (US), Michael asks if anyone wants some "man meat". Dwight then replies that he wants some, prompting Jim to announce "Michael, Dwight wants your man meat!" They were discussing ACTUAL meat (specifically the steaks Michael had just grilled) the whole time.
* The Office (US), Michael bends his insufferable 23-three-year old nephew Luke over a desk and spanks him in front of his entire staff, much to everyone's shock and delight.
* The Office (US). Michael brings in a tape from a kids' show he was on. There's an interview segment with a cat puppet called Edward R. Meow. While most of the staff laughs and notes that it's clever, Michael still doesn't get it.
* The Office (US): Michael gives Toby a rock as a present when Toby is leaving Dunder Mifflin, but tries to backpedal so he can look good in front of Toby's replacement, Holly.
* The Office (US), Michael glomps Jim after learning that Jim and Pam are engaged.
* The Office (US), Michael has left Pam with a list of excuses to give when he doesn't want to take a phone call. Her favorite, which she's saving for a special occasion, is "He's trapped in a oil painting."
* The Office (US): Michael lights up a cigar when Pam gives birth, before being told to put it out by a doctor. Later, he lights up again and immediately starts coughing.
* The Office (US), Michael, looking for an excuse to fire Toby, dares him to punch him. It doesn't work.
* The Office (US), Michael plays tourist in Manhattan and goes to 30 Rockefeller Plaza. He runs after a woman whom he thinks is Tina Fey (just from her haircut), and once it is revealed it is not her, the real Conan O'Brien walks by, just behind Michael. Needless to say, Michael is a bit upset when the cameraman tells him.
* The Office (US): Michael Scott believes in this trope and generally does not get along with lawyers even when they're being reasonable. He also attempts to tell lawyer jokes to them.
* The Office (US). Michael Scott buys an insurance policy that is "...only a cup of coffee an hour."
* The Office (US): Michael Scott often finds himself caught in these after an egregious faux-pas or a joke in really bad taste.
* The Office (US): Michael Scott sets up a roast for himself in one episode, foolishly assured at what jokes they will make about him...and then gets upset when they *really* rip into his character flaws.
* The Office (US), Michael takes all the women shopping, making Kevin very excited about getting to go inside the women's bathroom (he seems to have mixed it up with the popular women's locker room fantasy). Upon going inside his first words are "Oh... my... GOD!" Soon all the guys are hanging out in there, sitting on the couch and reading magazines. This annoys Creed, who has paid his female coworkers for the privilege.
* The Office (US), Michael unveils a movie he had been working on for years. In it, the hero has to learn how to play hockey and his mentor teaches him by having him mop the ice.
* The Office (US), Michael was very disappointed to receive a hand-knitted oven mitt from his Secret Santa (Phyllis) when he himself had gotten his person (Ryan) an iPod. Of course, this was stupid because he himself had imposed a $20 limit to the gifts to make the iPod look even better in comparison to everyone else's gifts.
* The Office (US), not to mention that the game has none of the show's humor, even when pulling office pranks, and the music isn't the show's iconic theme music.
* The Office (US) once boasted about playing "Mutey the Mailman" in a play, which

was a made-up character because there were too many kids in the class for all the normal roles. (Although it's more likely that his teacher just wanted a way to get him to stay quiet.)
* The Office (US): One of the last episodes has Kevin mention that he always assumed that the reason the documentary crew followed them around was because he and his coworkers were in some kind of human zoo.
* The Office (US), one of the signs of Michael Scott's ignorance towards New York despite his repeated visits there is the fact that his "favorite New York pizza joint" is a Sbarro.
* The Office (US) online dating username in the US version is "Little Kid Lover" — the previous name of this trope. (Explanation: He wanted to convey that he is good with children. Oops.)
* The Office (US) on this is something along the lines of "we wrote it as if they had sex, but we still kept it ambiguous."
* The Office (US): Pete "Plop" Miller, the new customer service guy in Season 9, lived in Vermont for most of his life before moving to Scranton. His actor Jake Lacy is a proud Vermonter as well.
* The Office (US) plays this for laughs with Ryan and Kelly. They are absolutely terrible for each other and share nothing in common, except for the fact that they are both narcissistic, vain, shallow, manipulative, immature, self-obsessed and selfish drama addicts. They make each other miserable whenever they're actually in a relationship, but whenever they break up and one seems to be taking an interest in another person, the other will pull out all the stops to sabotage any other relationship and ensure that they get back together.
* The Office (US) plays with this trope constantly, with Michael simple-mindedly assuming people can do things that they're not actually good at. There is at least one (almost) straight use of it, however: in "Night Out," Jim asks Oscar to talk to the cleaning crew since he's Hispanic. Oscar objects, but when he tries to speak to the cleaning crew in English, they don't understand. He then resigns to speaking to them in Spanish, and they understand him.
* The Office (US): Pretty much everyone at Dunder Mifflin Scranton is pretty incompetent, and yet somehow the Scranton branch is the most profitable.
* The Office (US)). Ryan and Gabe, who want to impress him and are drunk as well, follow suit.
* The Office (US): Ryan and Kelly in the early seasons. He was very quiet and reserved, she was a ditzy and bubbly chatterbox.
* The Office (US)Ryan had a get-out-of-jail-free card, because the actor who played him also happened to be one of the executive producers of the show. Well, he was a writer who got promoted to executive producer. It isn't like he pitched a hissy fit.
* The Office (US): Ryan sees Todd Packer's vanity license plate: WLHUNG.
* The Office (US) say to their faces, in an attempt to avoid this trope!
* The Office (US) season 5-episode 26 cold open, Kevin comes to the office carrying a gigantic pot of his Famous Chili. He proceeds to spill it all on the floor and try to scoop it back in the pot using office documents, while explaining that it is the thing he does the best.
* The Office (US) seems to be building a career on playing this character.
* The Office (US) show-runners had originally refused to let him cut his hair, until Krasinski had the show's hairstylist create a convincing wig he could wear for the show.
* The Office (US)'s Michael Scott, Regional Manager of the Scranton branch of Dunder-Mifflin. It's shown that he used to be a great salesman, and still is when called upon, but has none of the right skills for management.
* The Office (US) somewhat lampshades it in this gem of a verbal throwdown:
* The Office (US)'s pregnancy was written into the eighth season for her character Pam. It wasn't a big deal since at that point she was already married with one child; she and Jim just decided to have another kid.
* The Office (US), stated in one of the show's DVD commentaries that when he first auditioned for the role of Jim Halpert, he struck up a conversation with another

man at the audition and stated in passing, "I hope they (the show's producers) don't screw this up." The other man then introduced himself as executive producer Greg Daniels.
* The Office (US) suffered from this. In an arguable subversion, after they began making the show completely different from the original British version, it actually got a lot better.
* The Office (US) that Kelly is chagrined about her parents wanting her to date. As for Kelly herself, he might be a little attracted but this is outweighed by what he sees as her annoying traits.
* The Office (US). The main reason it made it to a second season was Kevin Reilly, NBC Entertainment president at the time, had loved the second episode, "Diversity Day", and felt the series had enough potential to warrant another go.
* The Office (US), the villainous Goldenface (Jim) plots to dig up the corpse of Michael Scarn (Michael)'s wife, whom he had previously killed, and "hump her real good." Watching the movie several years later, Jim cringes at the line
* The Office (US) They have a very tense confrontation that lasts through a few episodes, and Michael throws in her face repeatedly that he's having sex with her. So bonus points here to Michael who invoked the trope after having actually done the deed.
* The Office (US), this is how Pam's pregnancy is outed to the office. Stanley had confided in Michael that he had had an affair, which Michael then lets slip in the break room, but then tries to cover it up with a series of, what he thought, were outrageous gossip-lies so that nobody would believe the story about Stanley. One such lie, "Pam is pregnant", turned out to be perfectly true.
* The Office (US): This is Pam's reaction in the Season 2 finale when Jim confesses his love for her.
* The Office (US), this trope was brought up in the episode "Did I Stutter?" While already the show's eye candy, Pam gets even hotter when it's revealed she wears contacts and has to wear her glasses when she forgets her solution. While Michael doesn't like them, she finds herself the object of Kevin's advances after he reveals he has a glasses fetish.
* The Office (US): Towards to beginning of the series, Jan Levinson goes through a messy divorce from her husband who refuses to have children with her. According to her, they both get married knowing they had different ideas about family but figured the other would change their mind.
* The Office (US) up by then implying that he his presence or absence has absolutely no meaningful effect on business at all.
* The Office (US) used at the table read, Michael Scott never appears. One of his two lines is dropped, the other one is given to Creed. An additional piece of dialogue was added to the Q&A, in which an audience member asks about Michael's whereabouts, and Jim, who still keeps in touch with him, mentions that Michael put Dunder Mifflin and the documentary behind him, and isn't interested in revisiting this part of his life anymore.
* The Office (US) was strictly confined to her workspace behind a chest height wall due to her pregnancy. It was originally intended to include this pregnancy into the show itself, with the child being Dwight's, but the 2007-2008 writer's strike axed that story arc.
* The Office (US) when Dwight, Andy, and Michael have just discovered the existence of Parkour, which Jim describes as a fad from several years ago. The trio excitedly jump around the office shouting "Parkour!" and generally just knock things over.
* The Office (US) when Dwight is calling various people out for having had sex in the eponymous office:
* The Office (US): when Karen calls a company in Canada looking for her favorite chips, she speaks in perfect French. Never seen before that scene or since.
* The Office (US), when Michael is calling his mom to tell her about his fake engagement to Holly, Andy Bernard exclaimed "speaker phone" as he hit the aforementioned button so all the office could hear.
* The Office (US) when Michael Scott is having trouble getting to talk to boss David Wallace over the phone. Dwight decides to take the phone in his place and

tries to give a pseudonym. He uses Michael's real first name and then the last name of the first thing he sees- a roll of scotch tape. Thus, Michael Scotch. Later averted when Micheal winds up being redirected to Charles Miner, the very person he had wanted to complain to David about; when Charles asks who is calling, Michael simply replies "I was never given a name" and hangs up on him.
* The Office (US) when Michael tries to ride a regular (as opposed to stationary) bike.
* The Office (US): When the whole group is on an evening cruise, the captain assigns Dwight the task of piloting the ship, which Dwight eagerly accepts. Turns out Dwight is put in front of a prop steering wheel to get him out of the Captain's hair. Even Michael can tell it's fake.
* The Office (US) where Dwight and Jim team up to make a sale. At the beginning the meeting, Dwight uses the client's phone to make a call while Jim speaks to the client directly. After working through an extension directory Dwight places the phone on the desk as it plays hold music. Once Jim finishes the pitch, he reveals that Dwight's phone call was to one of the big name companies that competes with Dunder-Mifflin and they have been on hold for the entire time. They then call up Kelly (their customer service) to show that Dunder-Mifflin has superior service when she answers the call immediately.
* The Office (US), where Jim is sort of embarrassed by Katy's past as a cheerleader.
* The Office (US) where Michael wants to hire a male stripper, according to his understanding of "seperate but equal" (He was hiring a female stripper for a bachelor party.)
* The Office (US): Where Ryan is working when Michael recruits him for The Michael Scott Paper Company.
* The Office (US) with a shy crush on her best friend, and a big part of her appeal is how approachable she is, combined with her obvious but understated good looks. In later seasons, she gains more confidence.
* The Office was put online complete with Phone (570) 555-0698, Mobile Phone (570) 555-0698 and Fax (570) 555-0245.
* The Office: 'We'd like to offer you a very generous redundancy settlement.'
* The Office: When Jan tells Michael that his branch will be closed down in favor of Josh's Stanford based branch she says it's because the company has big plans for Josh in the new position implying that the entire branch is closing due to Michael's inability to match up to Josh. Michael then asks what position Josh will have in the restructured company, "King of the stupid universe?"
* The Office. When Jim is promoted, Dwight goes through an elaborate plan to bug his office, and ends up with hours and hours of Jim talking to clients about paper.
* The Office, when Michael holds the pizza boy hostage and demands a better deal, and his coworkers inform him he is committing a felony by holding a minor against his will.
* The Office. While Jim and Pam do get married in front of all of their friends, it turns out they sneaked off and eloped before, anticipating that the gang might do something stupid.
* The Office who comes between Dawn and Tim, with whom she is clearly besotted. Given the show's aspiration towards low-key realism, it's odd that the show never explains why Dawn stays with Lee for as long as she does.
* The Office will have a short tag that relates to a B-plot, or a one-off gag in earlier in the show. For instance, if a small gag was someone complaining about their Dr Pepper being stolen out of the office fridge, expect to see whoever it was taking the Dr Pepper out of the fridge during the bonus material.
* The Office, with the implication the attractive ones turned them down.
* The official backstory for the Romulan player character's first officer Tovan Khev has him working as a security officer on the frontier mining colony Hfihar before coming to Virinat. He had a reputation for both honesty and fighting skill, which was why D'Vex recruited him to work security on Virinat.
* The official BBC website had "Pond Life", a set of Amy and Rory-focused mini-episodes. It also sometimes has preludes to the main episodes.

* The official Catholic stance on Family Planning (or, "the rhythm method") vs Birth Control has inspired an ad featuring Pope John Paul II, who is rubbing his very prominent belly and grinning, underneath is written, "Would he be more careful if it was him that got pregnant?"
* The official character page Abigail is absolutely terrified of ghost stories.
* The official comic featured a boat that the cast initially thought as a good means of escape, but was quickly declined since its cargo hold was full of witches.
* The Official Couch Potato Handbook has a page deconstructing the series in terms of Freudian symbology. It's disturbingly plausible.
* The official explanation for Flak's wildly-varying luck and why he can randomly do higher or lower damage is that he's this:
* The official explanation for how fifteen people, including the entire crew, died. Throughout the film technical problems plague the Hell House team
* The official explanation for Ian Rider's death was that he was speeding, which Alex knows he would never do.
* The official extended version of the song "Awesome As I Wanna Be" includes the line "You wish you could be 20% cooler."
* The Official Fanfiction University of Middle-earth, all of the Legolas fangirls are willing to stab each other.
* The Official Fanfiction University of Middle-earth due to the staff's "learning through mental scarring" teaching methods.
* The Official Fanfiction University of Middle-earth has lots of them as students. They're brought there to get over it.
* The Official Fanfiction University of Middle-earth, many of them land there, but they'll be very disappointed.
* The Official Fanfiction University of Middle-earth, Miss Cam is a stand-in for Camilla Sandman.
* The Official Fanfiction University of Middle-earth, Morgoth and Sauron constantly fight over this.
* The Official Fanfiction University of Middle-earth, one punishment involved having to write lines in "Urple" ink, Urple being a colour described as a combination of pink and purple in the worst possible way. It's very hard to write when looking at the ink is painful. Or listening to Bombadil poetry for a whole day.
* The Official Fanfiction University of Middle-earth. They're called "the Urple Bandits".
* The Official Fanfiction University of Middle-earth, this gets deconstructed with the subject "Evil Is as Evil Does 101", taught by Sauron himself, to teach that Evil is more than calling yourself evil because it's cool and dark and edgy. Like causing a river of blood, at least.
* The Official Fanfiction University of Middle-earth, we have Toey the toe ring, BreadLegs and RollFeet.
* The Official Fanfiction University of Middle-earth when Lina's roommate mistakes Lina's list of random elven-sounding names for her "How To Conquer Middle-Earth" essay and gets it delivered to Sauron. Fortunately, the Dark Lord believed that it was a kill list.
* The Official Fanfiction University of Redwall signed up as a catgirl.
* The Official Illustrated Guide eventually explained in its FAQ that the blood from a woman's period isn't freshly oxygenated blood flowing from the heart, like blood from a cut would be, and thus doesn't elicit the same reaction.
* The official iPhone and Android apps for the site both have exploits that allow you to view 18+ videos without an account. They also have exploits that allowed private videos to be viewed by anyone, such as when
* the official journal 3 as a teaser for its release, mentioning that everyone who reads it has been getting nightmares and headaches.
* The Official List of Unofficial Rules has a few, including Chapter 8.
* The official lorebook, but is still fueled by a magical substance. The Garleans themselves were heavily inspired by the ancient Allagan Empire, though they used the term "Aetherochemistry" which blends sorcery and science a bit more seamlessly.

* The officially-registered makeup patterns, stage names, and personas of professional clowns are passed down from mentor to student, often along family lines.
* The official Marvel explanation is that the Norse gods (and all the other pantheons) are
* The official music video (not the earlier fan-made one) for "Kids" from
* The official name for Drywaters, a now-defunct faction founded by Fundy and Niki, is Smokey-Corn-on-The-Cob-Waterville-Dry-Hands-Desert-Land.
* The official philosopher of this view must be Joseph de Maistre, who wrote in his
* The official policy of the Empire is that the Skaven don't exist. Apparently dragons, giants, lizardmen, zombies, goat-headed mutants, and inconceivably powerful chaos gods are fine but
* The official pony trading cards refer to the mayor of Ponyville as "Mayor Mare", a
* The official prequel comic book shows a photo of Logan with a mysterious woman that he knew before his memories were erased, and the woman in question even appears in some of his dreams. This was going to be a minor subplot in the actual movie (and was even referenced in one of the script excerpts
* The Official PS4 Unboxing, which is owned by Sony, which owns the Playstation brand.
* The official revival began in 2005, 9 years after the TV movie and 16 years after the original show's conclusion.
* The officials actually insisted on installing a computer network on the
* The official SpongeBob YouTube channel features several five-minute edits of some of the show's most popular episodes, mostly from the early seasons.
* The Official Star Trek Cooking Manual by Mary Ann Piccard. In-universe, the personal cooking log of Christine Chapel.
* the official status, Aerith is implied to be Cloud's love interest, while Tifa is the manifestation of his inner light.
* The official story of first contact for the Aslan is that it happened when their first few ships encountered human traders not far from their homeworld.
* The official strategy guide for WC3 included a CD with, among other things, a section of outtakes, including the one mentioned above.
* The official system of galactic coordinates used by NASA uses the Sun as its centre point.
* The official timeline of the series. One of the biggest fanon debates in video game history was explained
* The official timeline that was released in the 2011 artbook. This third split involves Link dying in the final battle instead of fulfilling his destiny, with this branch eventually leading to the NES games.
* The official trailer for the 2013 pilot episode for a proposed new version of
* The official unofficial crowd chant of the United States of America in any sporting event whatsoever is "U-S-A! U-S-A!" which got its start during the 1980 Olympics (and the Miracle on Ice in particular) and has since spread so that it can possibly come up during any international competition, but still is most often heard during the Olympics.
* The official website stated that the anko filling in his head makes him sustenance, which makes sense in a way. Though one of the early edutainment specials from the early 90s shows him that he's about to eat a soft-served ice cream cone, until he trips over and cries about it.
* The official word after Twilight's ascension was that the title of Princess (and the alicornhood it entails) was a merit-based one in Equestria, being granted based on great deeds rather than based on royal blood. This explanation was seemingly abandoned by the introduction of the alicorn-by-birth Princess Flurry Heart, although her existence is treated as an anomaly by characters in-universe.
* The Officio Assassinorum is the Imperium's answer to tough questions that need to answered a single, surgical attack against enemy leaders. The types of assassin include:

* The offside rule and the evolution of it, is a kickstarter for shifting the tactical metagame.
* The Offspring, changing it from a sappy love song to someone singing about another person they absolutely hate.
* The off-spring game Mordheim is set in the world of Warhammer Fantasy and fits the bill even better than its progenitor. In the ruined city of Mordheim, the pious become zealous, the tough becomes weak and the good become corpses hung above the streets. It says something that the only irrevocally "good" faction is a small group of fanatic warrior monks who *everyone else* think are evil.
* The Offspring has this in spades. It sounds like a pop song from the '30s or '40s, while the lyrics are about how to make sure you don't get raped in prison, warning you "don't turn the other way" and "don't pick up the soap, it's bad for you".
* The Offspring is about the singer decapitating people and keeping their heads.
* The Offspring is a sarcastic reflection on unhappy American lifestyles. The band did not set right away on this, but realized they had a theme after a few songs complaining about the US in the late 90s were recorded.
* The offspring of the Muruchi fought by Jack shows up in the next series,
* The Offspring's song "When You're In Prison" is in the style of a 1930's radio crooner (complete with crackles and static), and features lyrics such as:
* The Offspring's video for "Dividing By Zero/Slim Pickens Does The Right Thing And Rides The Bomb To Hell" features an animated narrative about a fighter pilot in a futuristic war.
* The Offspring. Then, after several minutes of silence, an Arabian version of track 7 Come Out And Play's riff ensues. Curiously, the very same Genocide riff re-appears in the next album "Ixnay on the Hombre" track 14, "Change the World", only decreased by a tone.
* The Offspring. The Offspring is now signed to indie label Time Bomb Records, and their Columbia catalogue (and all their compositions) are now owned by Round Hill Music.
* The Offspring, this is made obvious with the use of cans of soda. They're shaken up by the entire party crowd until they burst, spraying white foam everywhere. In the end the entire party is knee deep in white foam, and the main guy, who has a girl doing some very soft core porn-ish things to him in a hallway, ends up literally exploding when she takes a can and shakes it up rapidly, her entire head becoming covered in the white foam.
* The Offspring: "Walla Walla". The burglar claims "He just gave it to me!" The judge is not convinced.
* The Offspring who is very aware of the way his girlfriend treats him, he just has too little self-esteem to expect anything better. She sleeps with his friends, blows him off, uses him when she's drunk, and tells him he's "like a disease". He plans to break up with her but never does. The chorus ends like this:
* The off-topic section of the NeoGAF forums frequently tags weird news stories with a guessing game—does the weird news story happen in
* The Off-Witch school inspector Mistress Broomhead is quite close to this as well. She tries her best to close the school down...until Miss Cackle discovers that she's an old school classmate - who's been wicked since childhood. She apparently turned all her teachers into snakes and tried to encase the school in a block of ice.
* the of loving, and only cares about her love hunger being satisfied.
* The Of Mice & Men song “Contagious” pretty much quotes this trope verbatim as well.
* The oft-cited "thief suing homeowner for an injury when breaking in and winning"
* The oft-discussed horror novelist Sen Takatsuki turns out to be one. During public appearances, she noticeably
* The often-changing nature of how Bender works can result in these. Such as in
* the of the Satellite Cannon in exchange for weapons more suited to actually killing other Mobile Suits.
* The oft-parodied early '90s TV commercials for Mentos (immortalized specially by

the
* The oft-repeated urban legend of a punk-rocker girl or woman coming to some hospital's emergency department with complaints of severe abdominal pain. She is diagnosed with appendicitis and scheduled for emergency surgery. While she is being prepped
* Theo Galavan in Season 2 secretly staged a mass breakout at Arkham Asylum just so he could thwart the released criminals to gain public reputation. Then he had Penguin assassinate numerous political candidates while also staging a 'failed' assassination on Theo, "convincing" him to run for mayor of Gotham at the urge of his ever-more-adoring fans.
* The OG example of this trope in the series are the Showa era version of the Xiliens, also known as the People from Planet X, who appear outwardly human and don’t seem to have a hidden beastly form. This is averted in
* The OG LoL narcissist is, of course, Draven. Famed executioner of Noxus, and has an ego the size of a small country. His narcissism is even incorporated into the game, with his
* Theogony, Eros is one of the primal gods (brother to Gaia and Tartaros) and thus older than Aphrodite. Also in most myths Eros engages in all kinds of mischief without needing Aphrodite's orders to do so. The story of Eros and Psyche, where he is portrayed as her reluctant servant, is so late that it can be considered literature more than actual mythology.
* The Ogre Downstairs, the Ogre spanks Johnny and Malcolm with a backbrush.
* The ogre in the film is a human-looking idiot who apparently thinks that a pretty silly
* The Ogre Kingdoms also have the vaguely mammoth-like Thundertusks, so enormous that they can carry two ogres at a time, and true mammoths that can carry four.
* The Ogre penchant for inbreeding is inherited from their parent race, the Hill Giants, who while not as fond of it as the Ogres, are still willing to breed within the family now and then, producing some young in the process who look only barely like the standard Hill Giant. Marsh Giants, descended from Hill Giants who fled into the swamps and were reduced to reproducing with boggards, demons, and their own kin, are if anything, even more warped than the Ogres and Ogrekin, with bloodlines sullied by incest, interspecies rape, and demonic taints.
* The ogres are directly descend from the cyclopean ogron, who in turn descend from the properly gigantic gronn, who further descend from the colossal magnaron, who are made up of as much lava and rock as of flesh. The magnaron themselves descend from an ancient, extinct species of even larger giants known as the colossals, who were so large that entire settlements have been built in their massive skeletons. The first colossals, in turn, were formed from boulders fallen from the body of Grond, a mountain given life by a Titan to fight
* The ogres could also count, although they are completely unrelated to the Titans, having originally come from the world of Draenor (the
* The ogres of the Ironskin tribe ride rhinoxen, creatures resembling very ill-tempered wooly rhinoceri with two horns side-by-side. Their warlord, Ghark Ironskin, rides a great mechanical beast shaped like a Rhinox, rumored to be haunted by a Daemon, that was given to him by the chaos dwarfs.
* the ogress curses the hero to forget the heroine as soon as his mother kisses him. However, when she sends a magical dove to recite her story, it jogs his memory loss.
* The Ogre warlord Greasus Goldtooth from is both a stunningly powerful (if also very lazy) warrior and an incredibly shrewd businessman who has built his empire on physical conquest, intimidation, bribes, and cunning trade agreements in equal measure. It helps that he commissioned a magic crown that increases his intellect.
* The ogron also gave rise to the orcs as well as the ogres — meaning that
* The Ogrons, ape-like minions of the Master and the Daleks, are a literal version of this trope. Oddly, that's more of an
* The Ohga Shrugs wiki. Also doubles as the main source of in-universe material.
* The Ohgma Infinium, an artifact associated with Hermaeus Mora, the
* The Ohguino Wastelands are divided between two factions: Meat-lovers and

vegetarians, in an all-out war.
* The Ohio-class SSGN submarine, which can carry up to 154 cruise missiles in its VLS tubes.
* The Oho Jees speak with broken grammar and often say bizarre things both in and out of battle.
* The oh-so-helpful Scorpio horoscope of "You're a Scorpio", which Drew's character enthusiastically notes is true.
* The oil could also be considered a parasite, since it seems to have limited sentience. The
* The Oil Patch is also full of these. From pipe stretchers and buckets of steam to "Push Slaps" (the Rig Manager is also known as a "Tool Push"), "Glasses for the Blind Rams" (blind rams are a set of hydraulic rams used to close off the well completely), or the "Key to the V-Door" (the V-Door on a rig is the metal slide that drill pipes ride on when brought up to the floor).
* Theo James opted not to bulk up too much feeling a slender and athletic build was more suited for Four.
* The O'Jays' "(For the Love of) Money" is a prime example. Commercials
* The O'Jays song "Back Stabbers" involves a number of shady individuals who fall into the
* The Ojou of his school, and widely agreed to be gorgeous. Towards the end of the series, he plays highly successful female roles in a movie and a play (and frets that he's going to have to make his living as an actress instead of as an actor).
* The Okapi; the only remaining giraffe that doesn't look like the tall blondes one thinks of when one hears the word; the other four extant species of giraffid are members of the genus
* The Oklahoma City Bombing on the morning of April 19, 1995 that killed 168 people and remains the worst domestic homegrown terror attack in US history.
* The Oklahoma City Thunder had Eric Maynor, a backup point guard, tear his own ACL prior to the playoffs.
* The Oklahoma Court of Criminal Appeals was forced to throw out a rape case.
* Theokles, whose neck was so thick, it took Spartacus four swings to fully decapitate him.
* Theokoles. Besides his tremendous size and strength, he takes incredible damage without stopping. He allows Crixus to impale him so he can grab his wrist and trap him. His neck is so thick that he can't be decapitated in one strike.
* The Oksana Baiul Story. Most glaring among the liberties taken is the near-complete absence of Viktor Petrenko. In real life he persuaded his own coach to coach Oksana, he paid for all her costumes early on, and even translated for her during interviews before she learned English.
* The old "20% cooler" line gets referenced in a twisted way in the second story-arc of
* The old adage that you should drink eight glasses of water per day is misleading. The reality is that a healthy adult should consume a total of about 64 ounces or two liters of water in a day, but this includes the moisture in the foods you eat; you don't have to chug away. In fact, if you're eating three square meals each day, you can survive without drinking
* The old Alexandra Hospital in Singapore was the site of a massacre of doctors and their patients by the Japanese during World War II and has a reputation for being haunted.
* The Old Ball Game that lands on said ice cream when Dennis gives it to him, he accidentally tosses said ice cream into Lefty Malone's shirt, causing him to strike out as a result, and gets a black eye from him after the game ends due to Dennis telling Lefty the insult Mr. Wilson said to him earlier.
* the old Blades headquarters in Skyrim is with the blood of a dragonborn.
* The old blind Tsar declared his daughter will only get married to the one who brings the armor of the Tsar Ivan Vasilievich. However, if no suitor succeeds in fulfilling the task in seven years and seven times seven weeks, the law states the Vasilissa must get married to her most distinguished suitor.
* The Old Blood update introduced Kuva Liches, and with them, Kuva-variants of

existing weapons alongside brand-new ones. The Kuva Shildeg is a new warpick-like hammer with a massive spike on one end, granting it plenty of puncture damage alongside a wonderful critical hit chance.
* The old cliche of parents/teachers/other authority figures leading troublesome children around by the ear.
* The old "Confucius say" jokes fall squarely into this category. No doubt most of the people who have told these jokes have no familiarity whatsoever with the actual
* The Old Convict, and is favored by the Golden Girls, most notably Frieda. The button-up is no longer authorized in Max by Season 6, and Frieda is back to scrubs in "Florida".
* The Old Convict: An elderly prisoner who's been locked up for a very long time.
* The Old Convict: An elderly prison inmate who's been serving a very long sentence.
* The Old Country: An immigrant character's (often unspecified) country of origin.
* The Old Country: The ancestral homeland of an immigrant/diaspora community that is living abroad in another country.
* The Old Course at St Andrews Links is by far the most famous among the courses on its property, and most casual golf fans outside of the United Kingdom probably couldn't name another course on said property through fact alone. Some might be able to deduce the presence of the New Course because of the name of the Old Course, but don't expect much else. This example may even encompass the entire
* The Old Curiosity Shop wasn't crowned until 1837; it should have been "His Majesty", referring to George IV.
* The old dancing guy in the Six Flags commercials. His name is Mr. Six.
* The Old Dark House (1932) is a rare Horror Film where Everybody Lives.
* The Old Dark House (1932), though not incredibly deformed, is a raging madman with a taste for arson and is thus kept locked in his room by the rest of the family with the help of a mute and deformed butler.
* The Old Dark House (1963) is convinced that another biblical flood is imminent, and has built an ark, complete with animals, in the backyard of his ancestral home.
* The Old Dark House (1963) is violently protective of his daughter Morgana. This is rather unfortunate for the protagonist, whom Morgana has the hots for.
* The old dean of Evil Academy was so good, in fact, that the evil reputation was used as a defense mechanism to keep idiot heroes out. The one hero it should have kept out, however, was far more worthy of this forged reputation.
* The old Disney cartoon has this in a literal sense, when two music-themed islands of animate musical instruments assault each other... using giant organ pipes and horns as cannons.
* The Old Disney Home, there's a creepy Pinocchio doll as well as various other possessed Disney merchandise.
* "The Old Dope Peddler", a parody of gentle music-box style songs about innocent neighborhood figures, from
* The Olden Days: Governor Frontbottom and Sergeant Olden get stuck in one of these after Frontbottom complains that their dialogue exchanges are too simplistically written. It goes on for about twenty seconds.
* The Olden Days, Governor Frontbottom is thinking to himself about how to deal with the mud-diggers, when an unnamed sergeant walks out of a tent and asks him to keep his thinking down because he can't sleep, "not with you walking around wrestling with inner demons."
* The older ads weren't quite as preachy. The newer ones, though... well, they really rely on
* the older boy she fell in love with as a child was her best friend via Time Travel.
* The older cartoon, "The Flying Cat", has Jerry do this when attempting to describe that there's a... what it says on the title... to his canary pal.
* The older commercials for the telecommunications company Vonage featured people doing
* the older form of the protagonist. Graduated college at age 14 and went on to invent flying cars, self constructing buildings, time machines and much of the rest

of the future's technology.
* The older Maxis manuals, with their commitment to wit, wisdom and just generally going above and beyond the call of duty, were worth the price of admission alone. Of particular note were the Additional Information sections at the end of the manuals, such as
* The older Professor X reassures his younger self that empathy is "...the greatest gift we have: to bear their pain without breaking." That must have sounded like a bold statement to his 1973 self because, at the time, he regarded his psychic nature as a grave weakness, but his elderly self is proven right in
* The older sensibilities of the various settings is also the main reason Frank and Sadie Doyle's constant drinking can be
* The Older Son in the parable of the Prodigal Son is probably one of the oldest examples. The guy mostly exists to complain about the fact that his turd of a little brother is getting all the respect for dragging his sorry butt home after wasting all his inheritance money, while the older son has been obedient and worked hard all his life and has never been rewarded. Dad scolds him for not celebrating that his brother is once again part of the family. Yeah, it's a metaphor about the value and meaning of repentance, but the older son does have a point: why bother working hard when the rewards for being a turd are so much better?
* The older Traditions tend to look down on more technologically-minded mages like the Sons of Ether and the Virtual Adepts, sometimes even believing them to be one step removed from becoming members of the Technocracy. In the past, this actually led to House Verditus being dissolved by the
* The older wiser engines of Sodor tend to get hit with this in later seasons of
* The oldest actively serving Space Marine is Dante, Chapter Master of the Blood Angels, clocking in at over 1,400 years (the Blood Angels in general have a reputation of living longer than average if the Black Rage doesn't claim them).
* The oldest and most forgotten multiverse was built for the original
* The oldest and most longest-serving MP in Parliament is acclaimed as "Father of the House". Recent FOTH's have included former prime minister Edward Heath (86) and ex-cabinet minister Tony Benn (82).
* The oldest and probably most famous example of this is Arjuna, from the
* the oldest character in the show, and yet forms friendships with many of the other characters. The closest of these are likely his relationships with Connie Kendall and Eugene Meltsner, who began the show as both high school and college students, respectively.
* The oldest child is favored because they are the firstborn/family heir. Tends to apply more to sons than daughters, since old inheritance laws favor boys over girls. This is found more often in fantasy or historical literature, where these laws have a real impact on how the family is run. Sometimes, the oldest child may have a huge set of standards thrown on them, but other times, an overachiever will set
* The oldest daughter notices his confusion, then rolls her eyes. "That's Dad. He said he was gonna mow today come hell or high water."
* The oldest DJ in Poland is one DJ Wika, who is 82, a former teacher and social worker, and can rock a party like someone quarter her age.
* The oldest documentation of a melon monster in Japan is the 18th Century
* The oldest example in the series dates back to the very first movie; non-canon though it is, its villain El Drago had consumed the Scream-Scream Fruit, which gave him the ability to
* The oldest humans of all are Gilgamesh and Tsagaglalal, the first that Prometheus awakened. Tsagaglalal seems fine, but Gilgamesh's mind has cracked over thousands of years and he's often left in
* The oldest known depiction of beer-drinking is a clay tablet from Ancient Sumeria depicting two men drinking from the same vessel with long straws. It's believed that straws were used to avoid the bitter solid byproducts of fermentation that sink to the bottom. (History is unclear on whether or not the two were sweethearts.)
* The oldest known example of a gay option in a video game comes from an obscure

1992 Game Boy game called
* The oldest known example of slipping on a banana peel being played for humor dates to 1880 and a
* The oldest known group of cats lived around a lake, but human construction work made prey scarce and life difficult. Jayfeather/Jay's Wing promises them that there is good land for them in the mountains; he knows this because he's traveling back into the past and knows that the Tribe of Rushing Water lives in the mountains later and realizes that these cats would become the Tribe.
* The oldest known living thing on Earth is a single, giant patch of
* The oldest known non-clonal organism is a bristlecone pine which was dendrochronologically dated in 2013 to be 5,067 years old. To put that into perspective, this tree was already about 494 years old when construction of the pyramids of Giza began.
* the oldest location still in operation worldwide. Their agreements did not have the mandatory updating clause and are allowed to stay as is, with many stores qualifying for spots on the National Register of Historic Places.
* The oldest Loyalist Marine is Bjorn the Fellhanded, now interred in a Dreadnought and thus kept in a chemically induced coma most of the time. By the best reckoning, he is well over
* The oldest military sensor still in use is the "Mark I Mod 0 Eyeball". Those who have had corrective surgery sometimes joke about how they've gotten the "Mod 1" upgrade.
* The oldest of them is Daytia, that, thanks to help from aliens, developed such an advanced technology they one day
* The Oldest Ones in the Book, an index of the most universal and recurrent tropes.
* The Oldest Ones in the Book" but the essential concept of predefined manoeuvre for tactical advantage remains the same.
* The Oldest Ones in the Book. However, the additional power of succubus had to be added when the squick factor of accidentally sleeping with an animal, apparently, wasn't enough to get the point across!
* The Oldest Profession, but it turns out she was just a waitress advertising a diner.
* The Oldest Profession the Church, described as the Bride of Christ.)
* The Oldest Profession: While the concept of having sex for goods or services has likely existed for around as long as people have, the oldest known specific example is Shamhat's profession, which was being a temple prostitute.
* the oldest son and daughter of the same family. Aegon the Conqueror tried to have it both ways by marrying his older sister out of duty and his younger out of love, although apart from Maegor I all the Targaryen kings descended from the younger.
* The oldest sources have Daimon used in reference to the Gods. The Christians referred to the Greek Gods as Daimons/Demons because that is what they were actually called by their own worshippers.
* The oldest Star Trek example must be the original pilot, "The Cage", footage of which was reused in the only Original Series two-parter, "The Menagerie". The Talosians, alien inhabitants of planet Talos 4, are
* The oldest stone hand axes we find were made about 2.5 million years ago. The oldest fossils placed in the
* the oldest surviving heroic legend Mana consumption, meaning that if he so deigned he could go full throttle without negatively impacting his master.
* "The Oldest Trick in the Book" is from an Ancient Egyptian tale of a man who would pull the head off a chicken and then re-set it to the chick completely unharmed. It is considered the oldest trick since the man never claimed to use magic or be blessed by the gods, just that he was skilled in ways that the audience was not.
* the oldest tropes in existence. In the story, Gilgamesh seeks out Utnapishtim, the man who survived the Great Flood by hiding inside a boat.
* The oldest unequivocal instance of this trope is probably that found in the
* the oldest written calendar in the world were destroyed. To date, only a fraction of the missing pieces have been recovered.

* The old EU treated the Force as being more or less irrelevant to anyone who wasn't a Jedi or Sith, and most denizens of the galaxy were only vaguely aware that the two were different beyond being a petty religious schism. The new EU has introduced it as a more wide-spread religion which the Empire suppressed and which made a comeback after it fell. It was also confirmed that "the Maker" is a creator god which some believe in.
* The old Expanded Universe), but no mention has yet been made of them being used in the battle to prevent escape.
* the old Expanded Universe. The conclusion was arguably inverted as he ended up not repenting before his death.
* the old fashioned way. Afterwards, he's popular enough to run for mayor.
* The old flour sack baby assignment you would be given in health class. With more advanced technology, this assignment has been upgraded. It now includes a realistic, electronic baby doll that cries at more or less random intervals, even in the middle of the night, needing to be "fed," "changed," or "rocked." Included with some sets of dolls is a "crack baby," which, once switched on, cries almost all the time in a far more high-pitched and desperate tone than the other dolls.
* The old folk singer Richie Havens did a haunting and powerful song called "The Klan", about the titular hate group:
* The old folk song "John Riley" is the very embodiment of this trope. In it, a young woman is questioned by a prospective suitor. She refuses him because she's betrothed to the titular man, who sailed away some years previously. He persists, asking what she'll do if her fiancee has died in battle, drowned, etc. She answers that she'll mourn him and remain true to his memory. She persists in this line of reasoning, even when he suggests that her fiancee may have married someone else. After this, he reveals himself to be John Riley, having been satisfied with her fidelity.
* The old folk song "Scarlet Ribbons". The narrator overhears his/her young daughter praying for scarlet ribbons for her hair before bedtime. Unfortunately it is very late, and all the shops are closed, making it impossible to obtain them. When the narrator checks on his/her daughter again before dawn,
* The Old Forest on the borders of the Shire, which is intelligent and actively hostile, as a result of being one of the last survivors (along with Mirkwood and Fangorn) of the old-growth forests that once covered most of the continent, the rest having largely been destroyed by Sauron's armies and by human expansion during the Second Age. It's full of thorny bushes that let people deeper into the forest but close up when they try to leave, it's actively tried to expand into settled land in the past, and in its depths waits
* The old game of foot-the-ball in Ankh-Morpork was like this, before Lord Vetinari and the wizards civilised it in
* The Old General mentions importing plenty of sausages for the nuns to eat.
* The Old Gods once ruled over the entirety of Azeroth with their Faceless and Aqir servitor races. Their Black Empire was eventually shattered by the Titans and the Old Gods and their servants were bound in prisons. Remnants of their rule remain scattered across Azeroth, below its surface, and within
* The Old Gods, praised by the Children of the Forest and the First Men before the Andals brought the Faith of the Seven from Essos and still worshiped in the North in a somewhat syncretic fashion. This religion is clearly based on pre-Christian European paganism and frequently invokes shades of various druidic and pagan faiths of pre-Christian Europe, as well as other animist religions such as worship of trees on which faces are carved and a past that includes human sacrifice.
* The Old Gods. Their worshippers are not organized, with no holy texts, priests, or rites like the Faith of the Seven. While their original worshippers, the "
* The Old Gods themselves a form of corruption meant to infest planets and corrupt the world spirits which can one day grow into
* The Old Gods themselves could be labeled Abusive Precursors as well, given the hand they took in shaping the current life of Azeroth coupled with their
* The Old Gods: The previous group of deities who ruled before the current pantheon came to power.

* The Old Gods who believe that existence is suffering and wants to end it all, or a personification of the chaos and destruction caused by the conflict between modernism and pre-modernism. Either way, several extremely dangerous SCP's are associated with him.
* The Old Gods, who supposedly inhabited Azeroth before the Titans came along.
* The old, green-skinned Chinese man who sells Homer the cursed Krusty doll in one of the Halloween specials. It's possible he's wearing green makeup, but...
* The Old Grey Hare: Bugs and Elmer are shown in then distant year of 2000, where they are both old.
* The Old Grey Hare" takes us into the far distant future year of 2000 where a decrepit old Bugs and Elmer are still playing hunter and prey. As usual, Bugs puts on a fake death scene and, having dug his own grave, stands in it as he exchanges tearful goodbyes with Elmer, manages to switch places with him, and quickly shovels the dirt over him, laughing manically. Then, just to rub it in a bit more, he pops into the ground and gives Elmer a big kiss on the face and a burning stick of dynamite!
* The Old Grey Hare (who died in 1977) and Carl Stalling (who died in 1972) is implied to still be alive.
* The old grumpy hag who runs the local diner and still has problems with fitting her hairnet,
* The Old Guard, admits to being roughly six thousand years old, placing her birth in the Neolithic era.
* The Old Guard an adaptation of the comics, focusing on the arrival of a new immortal into a group of world-weary immortal mercenaries.
* The Old Guard: Andy is so old that she can't remember her own age, or what the members of her family looked like. Even her "real" name, Andromache the Scythian, reflects this. She was already thousands of years old by the time the Scythians entered the historical record in the 8th century BC. The Scythian era is just the furthest back she can remember.
* The Old Guard before finally calling a truce and falling deeply in love.
* The Old Guard. Close-ups of what's on the board are shown during the credits.
* the Old Guard dies but does not surrender - and the survivors surrendered anyway.
* The Old Guard focuses on a group of immortal warriors (some of whom are millennia old), how they cope with the passing eras, and the fact that they will eventually lose their immortality and die.
* The Old Guard of Napoleon's Imperial Guard. There were also a Young and a Middle Guard, but the Old one was the creme de la creme of the greater French empire. Composed entirely of veterans of Napoleon's earliest campaigns, with at least ten years of service, they were highly valued by Napoleon. Since they were the only soldiers who could dare complain about their conditions in front of the emperor, they were known as "Grognards" (grumblers). Militarily, they served as a reserve thrown into battle at a critical moment to tip the scales, though more usually were kept in the back to avoid taking losses. When the Old Guard broke and routed at the final stage of Waterloo, the rest of the French army followed soon upon hearing of it, such was their
* The Old Guard. The first sign of them coming back to life is when the pupils of their leader contract suddenly as they focus on what's in front of her.
* The Old Guard. The protagonists have a safehouse in a village outside Paris that has been abandoned because it's directly under a busy airport's flight path.
* The Old Guard, the rest of the immortal soldiers dream about it and realise they have to bring her into the fold. So Andy travels to Afghanistan, breaks into a Coalition base, pistolwhips Nile into unconsciousness and drives off with her in a stolen Hummer. When Nile wakes up and tries jumping out of the Hummer, Andy shoots her in the head as well. While this helps convince Nile she is immortal, she has trouble believing that Andy has her best interests at heart.
* The Old Guard use bladed weapons from their past as well as modern firearms.
* The Old Guard was once worshiped as a god, and therefore doesn't believe there's any real ones.
* The Old Guard: When one of their captors asks mockingly if Nicky is his

boyfriend, Joe chews him out, telling him just how much Nicky means to him and calling the guard a child.
* The Old Guard when they were both figuring things out, but eventually they fell deeply in love and have been going strong for nearly a millennium.
* The old Herbal Essences shampoo commercials that would feature women shouting as if in orgasm when shampooing with Herbal Essences because it was just
* The old hexmap-and-cardboard-chits wargames of the 1960s-80s by Avalon Hill and SPI have rules for improved defense by woods, mountains, rivers, road movement, and so on.
* The Old Hunters version of the threaded cane for Strength users. Untransformed, it's a huge cleaver.
* The old Irish song "Killieburne Brae" is about a loud and annoying woman who is dragged off to hell, then terrorizes the demons there in all kinds of colourful ways. She is eventually sent back to her husband, with the moral that "women are worse than the men/when they go down to hell they are truant again."
* The old Irn-Bru ads with the slogan "Barr's Irn-Bru, made in Scotland from girders" showed people acquiring super-strength and invulnerability from the drink.
* The Old Iron King was reputed to have the ability to imbue his iron creations with life, though the only iron golems we see are in the Brume Tower in the DLC.
* The old jingle for Chiquita bananas warned consumers that they should never refrigerate bananas because they're a tropical fruit that hails from warm climates. What happens if you do it anyway?
* The old joke about a man who orders a banana split, with ice-cream, fudge, chocolate sauce, crushed nuts and whipped cream. The waiter asks if he'd like a cherry on top. "No thanks, I'm on a diet".
* The Old Kingdom active in the Kingdom, so they're not shown as being selfish or mean — it's just a bad situation. Sabriel does look forward to her son Sam taking on the mantle of Abhorsen-in-Waiting, as that means they'll get to spend time together.
* The Old Kingdom, Ferin was raised as a possible host for the Witch With No Face (Chlorr of the Mask) and given the best training, education and care possible. "Ferin" isn't even a proper name, but what she decides to call herself when she's sent to deliver an important message since she was always just called "The Offering". All the tribes that swear fealty to Chlorr practice this, and if the girl isn't chosen by the time she's 17 she is sacrificed instead to return the bit of Chlorr's power that she puts into each girl back to her. One of her flashbacks shows her tribe being reverent but distant to her, since one way or another they know they'll lose her.
* The Old Kingdom. Lirael is more than a little annoyed when she finds this out, given the trouble she had to go to to keep the Dog fed.
* The Old Kingdom situation and even Charter magic can be dangerous for the untrained.
* The Old Lady and the Pigeons, the only characters that speak in the short are the American tourists. Everyone else is either silent or only "talks" in vague sighs and mumbles.
* The old lady got two shots off before getting cut down, and neither one of them hit Uzi guy, but they did go through the wall (made of cheap modern wallboard which can't stop bullets worth crap), and some poor immigrant in another apartment packed full of them is now without much of her lower arm.
* The old letter that Shakespeare delivers talks about strange weather, food shortages and a soldier returning home because the war was already over by the time he got there.
* The old logo for USA Today shows a stylized globe with North and South America facing us.
* The Old Man & the Gun: Forrest Tucker has staged 16 prison escapes during his long life. In the end, we get a montage of them all.
* The Old Man & the Gun: Forrest Tucker wears a nice suit and dapper fedora wherever he goes, including his bank robberies.
* The Old Man & the Gun: In the end, Forrest Tucker can't enjoy his comfortable

retirement with Jewell. At the age of 79, he robs four banks in one day and winds up back in prison for the final time.
* The Old Man and the Big 'C' to a group of women ordering dessert at a restaurant, whom start laughing at one of them making a joke before they suddenly begin eating each other alive.
* "The Old Man and the C-Student", Bart is ordered to go on community service:
* The Old Man and the C Student edited to appeal to seniors with the poorly dubbed: "Frankly my dear, I love you, let's remarry".
* "The Old Man and the "C" Student", Principal Skinner decides to make the students at Springfield Elementary do mandatory community service to teach them respect. When Bart gets taken to his placement, he at first thinks it will be at the "Fireworks, Candy and Puppy-Dog Store," but it's actually at the Springfield Retirement Castle next door.
* The Old Man and the Key" shows that Abe lost his license when he drove into a whale's tank at a marine theme park.
* "The Old Man and the Lisa" had a particularly disturbing twist on the traditional
* The Old Man and the Lisa", Lenny is temporarily put in charge of the nuclear plant. Homer makes a bad mistake and Lenny sends him home to think about what he did. He soon forgets what it was and spends the rest of the day watching TV.
* The Old Man and the Sea death. Mr. Hemingway said it was just about a dude and a fish.
* The old man from scene #24 who guards The Bridge of Death in asks anyone who wants to cross
* The Old Man in the Cave", a nuclear war devastated Earth in 1964, killing millions of people in the process. Major French tells Mr. Goldsmith that there are approximately 500 people alive between Buffalo, New York and Atlanta, Georgia. In the ten years since the war, many people have died as a result of eating food contaminated with Strontium-90 or from the plague.
* The Old Man in the Cave", Mr. Goldsmith is the only survivor of the Village after the other residents, Major French and his men all eat the canned food that the Old Man warned them was contaminated with Strontium-90.
* The Old Man in the Corner. A classic armchair detective, the Old Man relies mostly upon sensationalistic "penny dreadful" newspaper accounts, with the occasional courtroom visit. He narrates all this information, while tying complicated knots in a piece of string, to a female Journalist who frequents the same tea-shop (the ABC Teashop on the corner of Norfolk Street and the Strand). They enjoy an antagonistic relationship, as the Journalist attempts to cut the Old Man's ego down to size and the Old Man trumps her every time.
* The Old Man of the Mountain in New Hampshire was a large granite cliff edge that resembled the profile of an old man's face. The formation was a famous landmark for centuries and a subject of
* The Old Man of the Mountain with the introduction of the titular character.
* The Old Man of Wandering Mountain is just as old, and has existed just as long.
* The old mid-80's Levi's jeans ads, where the Levi's logo would open like a door and various random weird creatures would walk or scurry out. The most memorable were the giant green alien in the samurai armor, and the Tarzan guy wearing jeans who would swing out yelling "Leeeeee-viiiiiiiii's!"
* The old museum piece could fire 4,000 rounds per minute without problems when equipped with an electric motor instead of a hand crank.
* The old name for this was St. Martin's Summer, named for the feast-day of St. Martin of Tours, November 11.
* The old nest lord of the Cretan nest, described as having been almost half as large as the Green Death.
* The old Norse game Hnefatafl simulates an escape from a besieged fortress, as opposed to a pitched battle (like
* The old Norwegian soft drink Solo came up with an ad campaign that some of its detractors called "
* The old novelty number "Crazy Mixed-Up Song," by Homer and Jethro (among

others): "You may think that this is the end/Well it isn't 'cause there is another chorus." Then: "You may think that this is the end/Well it is" and the song cuts off.
* the old one failed to win an Emmy Award) the passage of time in the real world, imploring viewers to watch episodes live and ignore other events that would drive their ratings down, how unlikely it was that they got a second season after mediocre ratings and ending the first season on an unsatisfying cliffhanger, etc. And that is still only part of the fourth wall breaking they do in the course of a single song.
* The Old One's Army is an optional crossover event themed on tower defense. Its third and most difficult tier ends with with fighting Betsy, a giant fire-breathing dragon who could prove to be difficult to take on even with endgame-tier equipment. She must be fought while
* The Old Ones (aztec god-like extraterrestrials worshiped by Lizardmen). They modified the orbit of the planet, the planet's continents and tectonic plates, created the Lizardmen from actual reptilians that already existed to protect their
* The Old Ones might have been an exception. They used their power and immortality to explore the galaxy and seed life on other worlds and more or less lived in peace. Even when the Necrontyr declared war on them, the Old Ones showed mercy to their vastly inferior foes instead of simply wiping them out.
* The Old Ones' puzzles that are found when exploring ruins. The Rubric (guess what symbol is not being repeated) and Cuboid (guess the face of the dice by looking at the others) ones are easy enough to do, the Cypher (guess how many dots of what colors go on the square) ones occasionally have (apparently) multiple correct solutions but only one is accepted as being correct by the game, but they still remain interesting and doable most of the time, but the Dial of the Old Ones is especially disliked, as it involves manipulating two wheels in a way that can't be done ingame and is extremely difficult to do mentally, assuming you even understand you have to turn both of them. Even veteran players and puzzle-masters tend to just look up the answers for these ones.
